• **Summary:** The largest tofu manufacturers in France are: (1) Société Soy makes 12,500 kg/week (12.5 tonnes/week) of their basic tofu, much of which is made into second generation products. In fact, regular tofu counts for only about 15% of their tofu sales, whereas Tofu Burgers (*Croque Tofu*) account for 45% and Tofu Sausages (*Tofinelle*) account for 20%. These figures do not include their soymilk, which is more but which is sold as soymilk. They sell to the mainstream market. Société Soy’s market for tofu and tofu product has been growing at the rate of about 40% a year over the past few years.

(2) Daizou SARL (related to Le Bol en Bois, in Champigny sur Marne) makes an estimated 500-600 kg/week. They sell tofu from the shop and deliver to several Japanese retail outlets. Their customers are mostly Japanese. Their production seems to have remained static during the

past 2-4 years. There are 2-3 small companies that make about 200 kg/week. Innoval (pronounced EEN-oh-val) no longer makes tofu in France. Cacoja (pronounced KA-ko-jah) in the east of France makes what they call their "soy base," to be mixed with meats. It is ultrafiltered, concentrated soymilk with a high solids content but it is quite different from regular tofu. Presently, they may not be selling any tofu in France, and their program to sell the soy base seems weak.

Thus the total size of the tofu market in France is about 14,000 kg/week or 728,000 kg/year. It is growing at about 35% a year.

Update: 12 July 1990. Société Soy has been planning a major export program to the UK. Now they have decided to drop that and export instead to Italy. Address: Founder and Owner, Société Soy, 1 rue du Crêt de la Perdrix, 42400 St.-Chamond, France. Phone: 77.31.23.66 OF.

2296. Hansen, Asger Somer. 1990. The soymilk market in Europe (Interview). *SoyaScan Notes*. March 27. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** There are no statistics published on soymilk in Europe. The soymilk that is made can be used in either of two ways: (1) Aseptically packaged (typically in Tetra Brik cartons) for consumer use as a beverage or pudding-like dessert; (2) Soymilk base is used as an ingredient in other foods or to make "processed tofu," which is made by ultrafiltration rather than by coagulation. Alpro is definitely the largest manufacturer with output estimated at 18-24 million liters/year. DE-VAU-GE is second biggest with about 12 million liters/year in the form of long-life packs (beverages and desserts). DE-VAU-GE will soon start to make tofu, which will be used mostly as an ingredient in their foods (sausages, etc.). In Asger's opinion these are very good products. Finally there is Cacoja, Triballat, and some smaller companies making a total of about 5 million liters/year. This gives a rough estimate of 35-40 million liters/year of soymilk made in Europe.

The growth rate of this market during the past 2 years has been slow, maybe 5-10%. "The real growth area has been in processed foods with tofu as a main ingredient. That's where I see the growth happening, in foods like dressings, egg-free mayonnaise, sausages, etc."

Cacoja sells "soymilk base," which is sold from the factory in tankers. Last time he talked with customers, they were not satisfied with the quality of the product. The capacity is only 1,500 liters/hour. The Adventists are considering a soymilk plant in the USSR.

Anders Linder left DTD on 1 Nov. 1989. He was asked to leave because the company was not making enough money, and because the company has new management under APV. He is now living at Domsten, Helsingborg, in Sweden. DTD's name is now APV-DTD, part of APV-Pasilac. Asger is in charge of the Soya Technology Div. Two other people are employed by this division with him

(Elizabeth Gibson). John Davies is in Hong Kong. Address: Technical Manager, Danish Turnkey Dairies Ltd., Soya Technology Div., 2 Europaplads (P.O. Box 146), DK-8100 Aarhus C, Denmark. Phone: (86) 12 4155.

2297. Marshall, Philip. 1990. Update on history of Cauldron Foods Ltd. (Interview). *SoyaScan Notes*. March 29.

Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Cauldron Foods Ltd. was founded in 1980 and began to produce tofu in late 1981 in Bristol. This was a pioneer tofu company in England, and they have grown the business and the market by hard work. At Chapel Lane, Bristol, their original address, they made tofu and tofu burgers. In late 1983 they moved to 4 Conduit Place, St. Paul's, Bristol. Then in Aug. 1986 the company moved to 149A South Liberty Lane, Ashton Vale, Bristol, Avon. In Sept. 1987 Philip and his partner, Peter Fagan, sold their entire ownership in the company to Rayner Burgess Ltd. Thus Cauldron Foods Ltd. is a wholly owned subsidiary of Rayner Burgess Ltd. (not a division). Then Fagan left the company in about April 1989; he is now doing frozen ready meals. Generally things are going exceedingly well, thanks to the team that is working with the company. Philip is officially Operations Manager, but unofficially his responsibilities are much wider than that. The company does not present itself as a subsidiary of Rayner Burgess Ltd., even though the latter owns 100% of the stock. Address: Owner, Cauldron Foods Ltd., 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol BS3 2TL, England. Phone: (0272) 632835.

2298. Marshall, Philip. 1990. The tofu industry and market in the UK (Interview). *SoyaScan Notes*. March 29. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The largest tofu manufacturer in the UK is probably Dragon & Phoenix in London. They do not reveal anything about their production or sales statistics. In 1984 they were producing an estimated 10,000 kg/week. Now they may be producing roughly 20,000. Second largest is Cauldron Foods, which now produces about 15,000 kg/week, working long shifts and using a completely continuous process that includes a Takai roller extractor (Philip does not like Takai's equipment, and will soon replace it; he feels that it is poorly built, low-quality parts and materials, stainless steel is magnetic, cast iron pumps, etc. He had to completely take their machine apart and rebuild it).

A distant third is Regular Tofu Co., now owned by the Haldane Foods Group. They use a Takai hydraulic press. As a very rough guess, they might be making 4,000 kg/week. Paul's Tofu is probably the fourth largest tofu maker in the U.K. Paul is an old, good friend of Philip's. His product is excellent, and he supplies the organic, natural nigari market. He might make 3,500 kg/week. Dragonfly is a small company at Totnes, Devon, that probably makes less than 1

tonne/week of organic tofu. In addition there are probably a number of Chinese tofu companies that are largely invisible except to the Asian community. There are also some in Birmingham, England. Birchwood Health Products (Clwyd, Wales) is no longer in business. Philip does not know when they stopped. They never really surfaced.

The total market size is probably about 45,000 to 50,000 kg/week.

The future looks good and the market is growing, but only due to hard work. Cauldron Foods is spending quite a lot of money on PR, marketing, education, and new product development. Cauldron's production and sales have more than doubled during the past year. About half of his sales come from his 3 types of basic tofu, and half from second generation products, especially burgers. The vegetarian market is an increasingly important one in the UK, and many non-vegetarians are reducing their consumption of meat, becoming more adventurous eaters, and looking to try new products. There is a general heightening of awareness of food and the variety of food. Cauldron is launching a line of frozen "ready meals." Address: Owner, Cauldron Foods Ltd., 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol BS3 2TL, England. Phone: (0272) 632835.

2299. **Product Name:** [Fast Food Program: Tofu Mussel (Imitation Shell-Fish), With Vegetables Baked in Dough, Tofu Pillow, UFO Sweet Snack with Apple & Vanilla].

**Foreign Name:** Tofu Muschel (im Teig Gebaken), Tofu Kissen, UFO.

**Manufacturer's Name:** Geestland.

**Manufacturer's Address:** Bremerhaven am Fischbeinhof 1, D-2850 Bremerhaven, West Germany. Phone: (0471) 2 60 20.

**Date of Introduction:** 1990 March.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with founder and present owner of Geestland, Paul E. Bremer. 1990. April 25. These products were introduced in March 1990. The UFO (Unidentified Flying Object) looks like a flying saucer.

2300. **Product Name:** Okara Burgers, and Tofu.

**Manufacturer's Name:** Noel Purvis Tofu.

**Manufacturer's Address:** 37 Sandy Hill Gardens, Ballymun, Dublin 11, Ireland. Phone: 01-8424891.

**Date of Introduction:** 1990 March.

**New Product–Documentation:** Letter concerning an interview with Noel Purvis conducted by Anthony Marrese. 1992. Sept. 7. Noel has been familiar with soy products since 1979 when he read Jane O'Brien's book *The Magic of Tofu*. He started making tofu for himself at about that time and sent for books on tofu by Shurtleff and Aoyagi, and by The Farm in Summertown, Tennessee. Noel also met people from The Farm who visited to Ireland and tried to get soyfood

production started. They did leave a small influence and some people in the south of Ireland still make tofu as a result of their visit.

In 1988, in preparation for starting his own business, Neil (who was in the Ballymun Community Enterprise Training Program) received a grant to have a study conducted by Christina McGowan of the Centre for Marketing Studies, University College Dublin. Finished in Feb. 1988 it was titled "An Analysis of the Market for Soya-Based Products" (37 pages). The results were not promising, so he received no further funds to help start the business on a large scale.

In about March 1990 Noel started commercial production and sale of soyfoods. His business started by selling okara burgers; his family and friends used the tofu. In mid-1990, due to the success of the Okara Burgers, Neil started making more tofu and selling it too. He now sells these two soy products once a fortnight (every two weeks) at the local organic food co-op. He makes 10 kg of tofu per batch once a fortnight. He uses his home address for business and is looking for a new location for production and possible expansion. The burgers, which are tasty, are sold in plain white burger bags.

"Noel gave me two other names of small producers in Ireland and said that many have come and gone over the years."

2301. Shurtleff, William; Aoyagi, Akiko. comps. 1990.

The European soyfoods market for tofu, soymilk, dairylike products, and meatlike products in the UK, France, West Germany, Belgium, and The Netherlands: From 1980 to March 1990. Lafayette, California: Soyfoods Center. 54 + 24 + 104 + 52 p. Unpublished manuscript. Subject/geographical index. Author/company index. 28 cm. [827 ref]

• **Summary:** This is a photocopy copy of a market study and bibliography conducted for a customer. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

2302. Drosihn, Bernd. 1990. The founding and history of Viana Naturkost GmbH in Cologne (Interview). *SoyaScan Notes*. April 7. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bernd started to make tempeh in Cologne in about Aug. 1989 after leaving Soyastern. He moved the company to his present address in Huerth, and started making soyfoods there in Jan. 1990. He makes 3 types of tempeh, 2 tempeh burgers, and 2 tempeh spreads (introduced in 1990). The burgers and spreads are selling well, but the basic tempeh is going more slowly since it is a little unknown to the German consumer—not as well known as tofu. The only other tempeh company in Germany is Byodo in Munich—they also make tofu. Both Bernd's company and Byodo make about 200 kg/week of tempeh. They each

make their own tempeh starter. Recently Bernd wrote a little tempeh cookbook titled *Tempeh: A traditional food with a future* (1989, Viana).

The founder of Byodo was Lukas Kelterborn. Harry Whitford came a little after it was founded. Whitford left Soyastern about 6 months ago and since then has been unemployed, living in Dorsten (100 km away; Alleestr. 13a, D-4270 Dorsten 1, West Germany. Phone: 02362-43493), where he runs a Zen Center.

Bernd feels that the future looks bright for his company, in part because he is also making second generation tofu products, including 2 tofu spreads, and 1 tofu sweet cream dessert, all launched in 1990. He buys the tofu from Tofuhaus Tiefenthal because the quality is excellent, better than from Soyastern although the price is higher than that from Soyastern.

He is now also making two short-term misos (a rice miso and chick-pea miso), fermented for 3-4 months, plus a miso spread. He started to sell these 6 weeks ago and they are selling well. His company address used to be Neusserstrasse 199, D-5000 Cologne 60, but he has recently moved. Address: Founder and president, Viana Naturkost GmbH, Schmittenstr. 106, D-5030 Huerth 6 (Fischenich), West Germany. Phone: (02233) 41323.

**2303. Product Name:** 8 Bean Bangers: Soya Based Vegetable Sausages [Herb, or Spicy].

**Manufacturer's Name:** Goodlife Foods. Ltd.

**Manufacturer's Address:** Unit E, 32/34 Gordonhouse Road, Parliament Hill Fields, London, NW5 1LP, England. Phone: 01 485 6583.

**Date of Introduction:** 1990 April.

**Ingredients:** Water, textured soya flour, palm oil, wholemeal rusk, potato starch, soya bean oil, carob bean gum, vegetable stock, mixed spices, mixed vegetables, sea salt, garlic powder.

**Wt/Vol., Packaging, Price:** 227 gm (8 oz) paperboard box. Retails for £1 18 (7/92, Scotland).

**How Stored:** Frozen.

**Nutrition:** Per 100 gm.: Energy value 1220 Kjoules / 293 Kcal (calories), protein 11.6 gm, carbohydrate 16.4 gm, fat (vegetable) 19 gm, dietary fibre 5.2 gm.

**New Product–Documentation:** SoyaFoods (ASA, Europe). 1990. 1(1):3.

Leaflet published by Goodlife Foods Ltd. and Adams Marketing. 1990. April. "Goodlife Foods: New in Frozen Foods!" A photo shows the boxes/labels of both products. Label sent by Leah Leneman, purchased at Natural Food Larder in Edinburgh, Scotland 1992. Jan. 2 and July. Label is 4.75 by 3.5 by 1.25 inches. Box. Black, red, and white on tan. Color photo of several sausage-shaped bangers. "Just heat and eat. Bean Bangers are soya based vegetable sausages and are suitable for vegetarians and vegans as well as those wishing to eat less meat." Can be grilled,

shallow-fried, or microwaved. Circled green V certification symbol. "Approved by the Vegetarian Society." UPC indicia. Note that the company is now located at: 34 Tatton Court, Kingsland Grange, Warrington, Cheshire, England.

**2304. Product Name:** Smoked Tofu Satay.

**Manufacturer's Name:** Goodlife Foods. Ltd.

**Manufacturer's Address:** Unit E, 32/34 Gordonhouse Road, Parliament Hill Fields, London, NW5 1LP, England. Phone: 01 485 6583.

**Date of Introduction:** 1990 April.

**New Product–Documentation:** Letter from Bernd Drosihn, founder of Viana. 1990. May 10. This fresh product, which has no label, was introduced in April 1990.

**2311. SoyaScan Notes.** 1990. New Trend: Large European food companies, and agricultural- and dairy cooperatives now launching and actively promoting innovative new tofu and soymilk products: Mostly dairylike and meatlike products (Overview). May 8. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** In Jan. 1980 Vandemoortele N.V., one of Europe's largest oilseed crushers, located at Izezem, Belgium, began to make its first commercial soymilk product (GranoVita Soja Drink in plain and carob flavors, packed in 500 ml Tetra Brik cartons) which was private labeled (co-packed) for DE-VAU-GE, a large Seventh-day Adventist health food manufacturer in West Germany. This was Alpro's first customer. In June 1980 Vandemoortele created Alpro N.V. to take over this production. The company quickly became Europe's leading soymilk producer and by 1990 had about 70% of the European soymilk market. Their new soymilk plant, costing about US\$15 million and having a capacity of 45 million liters a year, opened in Wevelgem in June 1990.

In June 1984 Migros, Switzerland's leading retail food chain, launched 5 tofu products: Natural Tofu, Tofu Snack with Spices, Spicy Tofu Spread, Diced Tofu with Cream, and Tofu Bolognese. In 1985 they introduced Tofu with Mushrooms and Gravy, followed in 1986 by Canned Tofu Kashmir (with Curry and Fruits), Tofu Spread with Cheese

(in a Tube), Tofu Chocolate Crème, and Tofunaise (in a Tube), then in 1987 by Seasoned Tofu. In 1986 Migros, a 61 year old cooperative with 1.4 million members, had net sales of 3,166 million Swiss francs. The tofu was made by a Migros company named Conserves Estavayer in Estavayer-le-Lac, near Zurich.

Galactina is a well established Swiss company (located in Belp) that has made a soymilk named Naga Sonda for enteral tube feeding since 1980. In 1981 they launched the product in liquid Tetra Pack. They entered the tofu market in 1984 with Galactina Tofu, then in 1985 added three types of Seasoned Tofu (Gourmet Diced with Soy Sauce & Spices, Provencale with Herbs, and Jardiniere with Vegetables), followed in 1987 with Tofu Spread and 1988 with Tofu Burger and Tofu Salads. All were marketed very attractively.

In Aug. 1985 DE-VAU-GE, one of Europe's oldest and largest producers of vegetarian health foods, began operation of its new soymilk plant (purchased from STS/DTD) in Lueneburg, West Germany. By 1990 they were Europe's second largest soymilk manufacturer, with 15-20% of the market. They also sold many tofu products and were planning to produce tofu in the near future.

In 1985 Laiteries Triballat, a large French dairy products company (mostly cheese, located at Noyal-sur-Vilaine, Brittany) introduced Sojasun, an innovative cultured soymilk yogurt in 4 flavors, two with bits of fruit and two with fruit puree. In Oct. 1988 and early 1989 they promoted the product extensively on French television and in German print media. Sales in several western European countries were said to be good.

In 1986 Parmalat, the Italian dairy giant, introduced a soymilk named Soialat. By 1989 they had created a subsidiary named Parma Soia, which sold three lines of more than 20 soy products. The Campi di Soia line (containing soymilk, soy pasta, sauce, and sprouts) was sold at supermarkets. The Nature Soy line was imported, and the Erboristeria line was for the health food market.

In Jan. 1987 Cacoja, a newly-formed affiliate of the Coopérative Agricole de Colmar (CAC), began production of soymilk and soy desserts at its new, fully-automated plant (with an ultrafiltration system) at Issenheim, France. Purchased from Alfa-Laval, the plant cost 11 million French francs and had a capacity of 1,500 liters/hour of soymilk containing 4% protein. By 1990 Cacoja was Europe's third largest soymilk producer.

In Sept. 1987 Rayner Burgess Ltd., a large British Food company that specializes in an array of unique condiments, purchased Cauldron Foods Ltd., Britain's second largest tofu manufacturer, and the largest marketing its products to the Caucasian and health-food trades.

In Jan. 1988 British Arkady, a large British food conglomerate owned by Archer Daniels Midland Co. (Decatur, Illinois) acquired the Haldane Foods Group, and made it part of British Arkady's Health Foods Div. The

Haldane Foods Group was put together by acquisition of Direct Foods Ltd. (founded 1980, acquired by the Group in 1985), Vegetarian Feasts Ltd. (founded 1984, acquired 1986), Haldane Foods Ltd. (founded 1983, acquired Aug. 1987), Vegetarian Cuisine Ltd. (founded 1985, acquired 1987), Regular Tofu Co. Ltd. (founded 1983, acquired Aug. 1987), Realeat Foods Ltd. (founded 1984, acquired Sept. 1988), Saucemasters Ltd. (founded 1988, acquired Feb. 1989), and Genice Foods Ltd. (founded 1988, acquired March 1989). Self-proclaimed as "Europe's leading healthier food group, most of these companies make tofu or soyfood products.

In April 1989 Huegli AG, a leading Swiss food company, purchased 75% ownership in Yamato Tofuhaus GmbH, one of West Germany's leading tofu manufacturers. At about the same time, Huegli purchased Horst Heirler, the country's leading distributor of fresh products.

Also in April 1989 Lima N.V. of Belgium, one of Europe's earliest natural foods companies, purchased Jonathan PVBA, Belgium's leading tofu manufacturer.

In Sept. 1989 Innoval (formerly Sojalpe), an acquired affiliate of Les Silos de Valence (a large 5,000-member cereal cooperative in Rhone Alpes, France), began to produce tofu, soymilk, and liquid soy concentrate (with an ultrafiltration unit) at a modern new plant, with a capacity of 2,000 liters/hour, purchased from Alfa-Laval at a cost of 20-21 million French francs.

In Feb. 1990 Euro-Nature, a French investment fund, purchased 97% Lima N.V. of Belgium.

In early 1990 Avo Feinkost GmbH, a large West German spice from Osnabrueck, launched the Sofit line of soy products, including various meatlike products, dressings, and salads.

2312. Whitford, Harry M., III. 1990. Re: Early history of Byodo Naturkost GmbH. Letters (faxes) to William Shurtleff at Soyfoods Center, May 11 and June 8. 2 p.

• **Summary:** "Byodo Naturkost was founded in the summer of 1984 by Lukas Kelterborn (whose idea it was), Hermann Konrad, and myself. I contributed the name—Byodo is the Japanese Buddhist term meaning "eternity," or with extended vowels (Byôdô) "equality" as implied in the perfection of indifference. The full original name was "Byodo Naturkost, Lukas Kelterborn, Hermann Konrad & Harry Whitford." It's legal status was a "GbR" ("Gessellschaft buergerlichen Rechts"—a "Personen Gesellschaft"), that is, a company made up of individuals who carry full personal responsibility for the debts and assets of the company. In Germany, such a company must include the names of all owners in the company name. Hermann and I were both cooking at Keyno Vegetarian Restaurant, where I was in charge of soyfoods production and quality. We made our own tofu and tempeh at the restaurant.

"Byodo started as a tempeh company. The first product was Frisches Tempeh (Fresh Tempeh, in English). Production

started in about Sept. 1984. Originally we were in the Thalkirchnerstr. in Munich in a former bakery together with the Italian Aikido-teacher and Tofu maker Georgio Sapia. I don't remember the exact address. Lukas left a few months after we started in about Oct. 1984 to take over a health food store (Reformhaus). We started making a Tempeh Burger (Tempehburger) later that fall after we realized we couldn't keep the company going only on tempeh.

"A Tofu Burger (Tofuburger) followed shortly afterwards that fall and Lukas' last service to the company was to establish the tie to Soyastern, which was unable to fry burgers due to complaints by the neighbors. We started buying tofu from Soyastern in Cologne to make burgers for them—at a distance of 400 miles!

"On 2 July 1985 Byodo Naturkost was transformed into a new company with a new structure, Byodo Naturkost GmbH. GmbH stands for "Gesellschaft mit beschränkter Haftung" ("Company with limited liability"), which is comparable to a "Co. Ltd." in the USA. Michael Mossbacher entered the company at that time, and the base capital was used to move to Hirschbergstr. 9.

"In the fall of 1985 we started making tofu after a scandal: We had been buying tofu from Sapia to make our burgers for the Munich market. But he bought conventionally grown beans and sold the tofu as bio [organic]!

"In early 1986 (winter) we made tofu spreads (Tofu Brotaufstrich). There were 3 kinds: Paprika, horseradish & green pepper (Paprika, Meerrettich & Gruenerpfeffer). We also started making Vegetable Tofu (Gemuese-Tofu), which is tofu with chopped veggies pressed into it—ready to fry. Somewhere along the way we started to make tofu to sell also. I don't know when.

"I left Byodo in September 1986 after unsolvable differences became ridiculous and intolerable. Another reason I left was that none of the others at Byodo had ever had anything to do with spiritual practice.

"I worked part time at Svadesha making tofu until I could clear up my debts enough to be able to accept Soyastern's offer and make the move to Cologne. I started advising Soyastern 'unofficially' in Jan. 1987. The move and work permit finally came together on July 15, 1987.

"Soyastern is now basically bankrupt, with debts of DM300,000 (US\$150,000), whereas the German legal limit is DM50,000." Address: Eurosoy consulting, Alleestr. 13a, D-4270 Dorsten 1, West Germany. Phone: 02362/43493.

2313. Seewer, Conrad. 1990. The tofu market in Switzerland (Interview). *SoyaScan Notes*. May 17 and 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Galactina was the first company in Switzerland to sell tofu in supermarkets. In about 1984 their tofu was sold in a test market in the Bern area at Co-op supermarkets under the Galactina brand. After a while Co-op introduced their own tofu product, made for them with the Co-op brand

by PLL in Lausanne from soy protein isolates. Galactina does not consider that product or the Yasoya made by Baer to be a types of tofu. Tofu must be made from soymilk by the traditional process. Co-op still labels its product as tofu, but they may not be able to continue since the regulations are now getting stricter. Co-ops isolate tofu replaced most (but not all) of Galactina's tofu in Co-op supermarkets, which hurt Galactina's sales a lot. Co-op then introduced a yogurt-type product made by PLL, which they called Soya Dessert, but it is no longer on the market. Co-op also now carries Baer's Yasoya, which is like a tofu made from isolates and with 2-3% lactose added. It is different in consistency from the isolate tofu made by PLL, and it is marketed completely differently and is not private labeled for Co-op. Now Galactina tofu is sold in all department stores that have a food department, and most of the stores that sell milk (The "White Chain" controlled by milk distributors). Starting in 1989 Galactina started to sell its tofu (1 tofu, 2 bread spreads, and 2 salads) in Switzerland's 500 Reform Houses under the brand name Galaform with the Biona certification symbol (like the Neuform in Germany); 90-95% of the Swiss Reform Houses are Biona stores with the Biona label. Products with the Biona label can only be sold in Biona Reform House stores and must meet certain quality and production specifications. In 1-2 months Galactina will come out with new labels that look even fresher and tastier.

Seewer thinks (though he has no market statistics) that Migros/Conserves-Estavayer is the biggest tofu maker in Switzerland (but they only have 2 products), followed by Galactina, then Soyana, and PLL/Co-op. He is not sure which of the last 2 is largest. There is a smaller tofu company in Bern [Berner Tofurei] selling regionally; he also owns a health food store.

A rough estimate of the total size of the tofu market in Switzerland would be 500,000 kg/year. The growth rate has been uneven. In the beginning in 1984 and 1985 there was a boom. A number of products were introduced at that time that were not properly developed and of low quality. Then consumers got frustrated because many felt that tofu didn't taste good and was difficult to cook, etc. In 1986 the market dropped; Co-op and Migros reduced their lines. Now tofu is catching on again. Galactina has introduced "third-generation" products that taste good, but it takes a lot of marketing work to re-establish tofu and tofu products on the market. Over the past year, Galactina sales have grown about 10%. The first generation is plain tofu. The second generation is tofu with taste, as with 50% diced vegetables or some flavors mixed in. Third generation would be a burger or sausage, ready to heat and serve, or a bread spread that contains less than 10% fat. Address: Marketing Manager, Galactina Ltd., Birkenweg 1-6, CH-3123 Belp, Switzerland. Phone: +41 31 811 111.

2314. Howell Mountain Distributors. 1990. Longa Life

products: Effective May 23, 1990 (Leaflet). P.O. Box 96, Angwin, CA 94508. 1 p. Single sided.

• **Summary:** Made in Australia. Describes 9 frozen products (Hot Dog, Vege-Snag–Curried, Vege-Henchen, Vege-Herb, Vege-Smoke, Vege-Garlic, Vege-Wurst, Cavellami Steak, Meatless Schnitzel). Address: California. Phone: (707) 965-7557.

2315. Speck, Peter. 1990. The tofu market in Switzerland (Interview). *SoyaScan Notes*. May 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The market has been stable and without much change for the last few years, but now there seems to be a slight upturn. However some new second-generation products will soon be launched. Galactina has a tofu burger and Migros will launch one in the next few months. Galactina and Migros are the main companies selling tofu in supermarkets; both are doing a good job marketing. Co-op is selling a tofu made by PLL with soy protein isolates under their own brand. During the last year a number of publications showed that this tofu was made with isolates and that gave Co-op a very bad reputation. This adverse publicity did not hurt other types of tofu. Co-op announced on television that they are considering changing the product name from tofu to something like “soy product” or “soy curd.” They do not have the equipment to make tofu from whole soybeans. Soyana is still on the market but mainly in health food shops. Not much has happened with Soyana in the last year; a few years ago they were much stronger. Baer makes one soft tofu in one bland and 3 spiced flavors; all are made from isolates with dairy protein, cereals, and vegetables added. They have promoted these with a very large marketing budget (Peter heard 4 million Swiss francs, but that figure may be too high). Baer introduced this product because the market for dairy products in Switzerland was not growing. It is sold at Co-op supermarkets, dairy shops, and many other types of stores (except Migros) all over Switzerland. Note: Dairy shops (Molkerei / Laiterie) are retail outlets that sell mostly milk and cheese, but since turnover is slow they usually also sell bread, vegetables, canned goods, etc. plus Galactina and Yasoya soy products. They never sell Migros or Co-op products.

Peter estimates that the five largest tofu manufacturers in Switzerland, in descending order of size, are Migros, Galactina, Baer, Soyana, and PLL/Co-op. If we include tofu made from isolates, Peter estimates that 500 tonnes/year of tofu are sold in Switzerland. The percentage growth rate is now very low. The market grew very rapidly during the early years (1985–86), but during the past 2 years tofu has gotten a bad reputation because people didn’t know how to prepare regular tofu. By the time that companies had realized that consumers needed second generation tofu products, the consumers didn’t want to try tofu any more. Even though they gave cooking classes and distributed

a gourmet tofu cookbook, it was too late. In retrospect, second-generation tofu products should be introduced with cooking classes before basic tofu. One market sector that is now growing well is the institutional/catering [foodservice] market that sells to university and company dining halls (canteens), big hotels, or hospitals. In some cases the tofu dishes are prepared outside the institution and in other cases inside. Tofu use is also growing in restaurants, especially vegetarian and hotel chain restaurants; the latter cater to many vegetarian travelers. But tofu is not sold in regular Swiss restaurants. This institutional sector is responsible for the slight growth in the total market. Soyana was the first company to sell to this institutional market, but now Galactina is offering successful cooking classes for hospital cooks. About half of all Galactina tofu is now sold to the institutional market. Now Galactina and Migros are trying to rejuvenate the tofu market with new products. Both companies have a deep belief in the potential and future of tofu. But it will be hard, because tofu has a bad image, like liver or spinach. Peter feels that yogurt-like soy products will never do well in Switzerland because the country has a long history of dairy yogurt and soy products are found to be of lower quality by comparison. One of the main groups buying soy products in Switzerland are the “Green People.” They often buy at Reform Houses, where Soyana is the main supplier. Most of Soyana’s sales are from Reform Houses. 4-5 months ago Galactina launched tofu spreads, salads, and burgers under the Galaform brand in the Reform Houses. Over the past few years, flavored tofu products and tofu spreads (Tofunette) have been most successful for Galactina. They have found that it is important to add new flavors from time to time, just like with ice cream. Of Galactina’s 3 product lines, tofu products are probably the best sellers, followed by the baby foods, then the clinical feeding products, but they are all about the same size. Migros’ most successful products have been their regular tofu, spiced tofu, tofu spread, and Tofunaise. They are planning to launch a tofu burger in the next month or two.

Speck once heard that Unilever developed a whole range of tofu and soy products. He does not know when or where they did this or what they plan to do with the products, but he thinks they were for the German market.

Huegli has an annual turnover of about 150 million Swiss francs. They are in the dry soup and dry product business. He has a pamphlet describing the company. Address: Home: Muenzingen, Switzerland. Work: Haco Co. in Gumlingen. Formerly with Galactina, Ltd. Phone: 031-52-1631.

2316. Daenzer, Walter. 1990. The tofu and soymilk markets in Switzerland (Interview). *SoyaScan Notes*. May 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Soyana introduced its Soyaquell brand in about 1985 for the mainstream market. The Soyana brand is

reserved for the Reform market. Many (but not all) Soyana products are now sold under the Soyaquell brand—such as tofu, soymilk, etc. New products include Tofu Pastete (cake-shaped hors d'oeuvres, 1989) and some new Tofu Burgers.

Competition in the soyfoods market is terrible in Switzerland—its the most competitive market in Europe. The market is small and people have very high quality expectations. Galactina is trying to get into all the Reform stores. They are doing everything they can to market their products there. Some years ago the regular food industry got interested in soya, but their standards allowed them to make tofu and related products using soy protein isolates. Baer Weichkaeserei had a big campaign which resulted in Galactina tofu products being kicked out of all Co-op supermarkets. Also Galactina products had many problems selling in the supermarkets. So Galactina has decided to sell their products in the Reform stores. And now Soyana has lots of competition from Galactina. The Swiss Biona Association used to sell only Swiss soyfoods. Nothing else was imported until about 2 years ago. At that time, they got offers to sell soymilk made in France and Germany. “Then Biona did something terrible; they gave the Biona sign to all foreign suppliers. So now Société Soy is coming in from France, Heirler with a big range of products from Germany, etc. Products from all over Europe are now being imported to Switzerland and sold at Reform stores.”

Soyana invested a great deal of money as a pioneer in the Swiss soyfoods market. Just when it looked like they were about to recover their losses, the terrible new competition began. And the competitors are using every trick in the book, including unfair means and deceptive advertising. They have no sense of purity of product; for example they say they are using nigari but they use calcium sulfate with 10% nigari. Soyana does not pasteurize its tofu but the competition does. So now Soyana has to educate its former customers about the advantages of not pasteurizing. Now Soyana has to become a quality pioneer and an advertising pioneer. Reaching and convincing all these people costs lots of money, but Soyana is doing it. Soyfoods have changed from being an alternative food to being a big money maker, so the big food companies jump in with the goal of making more money by selling lower priced, lower quality foods. Their advertising is often dishonest.

“The whole soy thing has proved to be an alternative for people who really need it. And that is a stable market, but it is not booming. In America it seems that the big food producers have slept while the soyfoods market has grown, but in Switzerland the situation is different. Many big Swiss companies jumped in when they got the idea that soya is healthy, but many of them didn't know anything about the products. So now Soyana is looking for alternate things to do to avoid this terrible situation.”

If Soyana tries to export its products from Switzerland, it has to pay 20% customs duty, and Swiss wages are high.

But companies that import foods to Switzerland have to pay a much smaller tax, and the process is easier. This will not change with the opening of trade in 1992 because Switzerland is not part of the EEC! Swiss has always cherished its separateness, independence, and neutrality.

Concerning the term Broteinheit (“Bread Unit,” it is not Broteinhalt) relating to diabetic exchanges, the term is not well defined or agreed upon by professionals, so it is a big problem.

Soyana used to be the only soymilk manufacturer in Switzerland. Then a Swiss-French company with a French name started making soymilk. Their prices were low, but they couldn't reach the big consumer chains. Address: Soyana, Postfach 8039, Zurich, Switzerland. Phone: 01/202 89 97.

2317. Krieger, Verena. 1990. Re: The tofu market in Switzerland. Letter (fax) to William Shurtleff at Soyfoods Center, May 31. 5 p. Typed, with signature on letterhead.

• **Summary:** Switzerland's largest tofu manufacturers are:

Migros/Conserves Estavayer makes 4,650 kg/week of tofu. They are introducing a silken tofu.

Galactina Ltd. in Belp makes 1,500–2,000 kg/week of tofu.

Baer makes Yasoya, an isolate-based tofu-like product. Production figures are not available. They are taking a large share of the market with an inferior product and aggressive advertising.

Soyana in Geneva makes tofu. Production figures are confidential.

PLL Produits Laitiers Lausanne SA in Lausanne makes 1,000 kg/week of tofu [using soy protein isolates].

Tofushop Centanin SA in Carouge (Geneva) makes 750 kg/week of tofu. This company was formerly named Osoja: La Maison du Tofu.

Genossenschaftstofurei in Ottenbach makes 600–700 kg/week. They also produce and sell tofu kits.

Berner Tofurei in Frutigen makes 400 kg/week of tofu. They also make 100 kg/week of tempeh.

Tofurei Pfannenstiel in Maennedorf makes 160 kg/week of tofu.

Krieger estimates the total market size to be about 10,000 kg/week or 500,000 kg/year. [Note: If we estimate Baer's production to be 1,500 kg/week and Soyana's to be 1,250 kg/week (see 1990 estimates by Peter Speck), the weekly total becomes 12,110 kg/week of tofu and at 50 weeks/year, the annual total becomes 605,500 kg/year.] The market is stagnant. Best-selling products include Soyana Tofuburgers and Galactina Tofu Salads.

The following tofu companies are no longer in business: Gauthier Loeffler Tofu, Joya, Le Grain d'Or, Soy Joy, Tangram Tofurei, Thieus Soja Spezialitaet. Address: Bruchmattstr. 24, CH-6003 Lucerne, Switzerland. Phone: 041-22 50 34.

2318. **Product Name:** Tempeh Burgers.

**Manufacturer's Name:** Soy Feliz.

**Manufacturer's Address:** 17802 N.E. 21st St., Gainesville, FL 32609. Phone: 904-485-1527.

**Date of Introduction:** 1990 May.

**New Product–Documentation:** Talk with Jose Caraballo. 1990. July 27. He started making and selling tempeh burgers at his home in May 1990. In Spanish “Soy Feliz” means “I am happy.”

2319. Urban, Svadesha Ruediger. 1990. The history of Tofurei Svadesha, West Germany's first tofu manufacturer (Interview). *SoyaScan Notes*. June 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ruediger Urban was born in about 1940. After 3-4 years of studying photography, in about 1969, he began working in a restaurant named Hotel Brauneberg that had been started by his brother in the city of Traben-Trarbach on Mosel (Moselle) River. At the restaurant he came across a large, high quality cookbook (covered in white silk) by Werner Fischer [or perhaps Alfred Walterspiel] titled *Meine Kunst in Kueche und Restaurant* (My Art, Kitchen, and Restaurant) that contained 2-3 pages of information in German about how to make tofu. He started to buy the ingredients, but he was so overworked that he had no time to really start experimenting with tofu.

Then he went to work in a “Macro-Shop” in Deggendorf, in the Bavarian Forest, but he did not do anything with tofu there. Meanwhile he sold arts and crafts at marketplaces for several years to support himself and his two sons.

Then, in about 1979, he started on the side to make tofu in a little farmhouse at Winterlehen 1½, Einweging, in the Bavarian Forest (Bayerischer Wald). He ordered a copy of *The Farm Vegetarian Cookbook*, from which he learned more about tofu. He made only one product, tofu, using organically grown soybeans and nigari coagulant. Initially he tried making the tofu without removing the okara, but he soon filtered the milk to removed the okara. He made the tofu using a gas stove, which he sometimes used in the kitchen and sometimes moved out into the garden. The tofu was sold under his name Svadesha (he was a disciple of Bhagavan Sri Rajneesh) but he had no officially registered business. On weekends his two sons, Premdeva (the elder) and Gyandeva, helped with the tofu business. Twice a week he produced about 30-40 kg of tofu, which he packed in small plastic tubs, loaded into his car? and drove more than 200 km (120 miles) into Munich. There he personally delivered it to a handful of the new generation of natural food stores (*Biolaeden*) that sold all of his tofu. These pioneer natural foods shops included Erdgarten (the first), and Macro-Shop on Amalienstrasse. While still in Einweging he introduced his second product, Kraeuter Tofu (Herb Tofu),

made by mixing and mashing herbs into finished pressed tofu to make a sort of seasoned tofu cottage cheese.

After about a year making tofu at this location, he decided to go to India for 6 months, so he entrusted his small business to another person while he was gone. The company fell apart during this time. Upon his return from India, Svadesha moved the business to Aeussere Koetzingerstr. 52a, D-8492 Fuerth im Wald, very near the Czechoslovakian border, and farther away (about 200 km or 120 miles) from Munich. He knew a woman friend there where he could work and stay. This new tofu shop began operation on 1 March 1981 and, because of pressure from retailers who needed official invoices, he registered the company under the name Svadesha Pflanzen-Feinkost. By mid-1982 was using 20 lb of soybeans each time to make tofu 3 times a week. In Furth im Wald he introduced a new product, Tofu Pflanzarl, a special kind of Bavarian meatless meatballs or “Bolleten.” Soon he was getting more and more orders.

So in 1983 Svadesha moved his company into Munich, his main market, and set up shop in Das Werkhaus at Leonrodstr. 19. Alexander Nabben's tofu shop was in the same building, but Alexander kindly offered to stop making tofu at that time. Svadesha changed his company's name to Tofurei Svadesha Naturkost Produkte. During this period, at meetings of Germany's various German tofu makers, the question arose as to which company had started first. It was clearly decided and agreed that Svadesha had been the first. Other early companies were Alexander's Tofu Shop (an underground business founded by Alexander Nabben at the Werkhaus on Leonrodstr. in Munich; started tofu production by Jan. 1981), and Auenland Tofu und Soja Produkte (founded by Peter Wiegand at Prien-Chiemsee; started tofu production in March 1982). Svadesha thinks (but is not sure) that Biogarten sold tofu made by other companies (including Svadesha's) but never made their own. Note that all of West Germany's early tofu companies started in southeastern Germany in the area around Munich.

In Munich, Svadesha kept making improved versions of his regular tofu, herb tofu, and tofu meatless meatballs. He also launched a new Tofu Pastete (Tofu Spread), and Raeucher Tofu (Smoked Tofu, in 3 flavors).

In 1985 Svadesha moved again, this time to a suburb east of Munich near Denning, into a former butcher shop (at Ospreussenstr. 22, D-8000 Munich 81), the company's present location. There the company really started to earn money. They introduced a new type of Tofu Pflanzarl, new Tofu Pastete (one with herbs, and one with tempeh), Tofu Burgers, Spice Tofu, Tofu Spring Rolls, and Tofu Schnitten (Tofu Slices) marinated in shoyu then fried, and Sauerkraut Schnitten (Tofu slices filled with sauerkraut). He also started selling tempeh, which was made by Byodo Naturkost.

On 1 June 1990 Svadesha sold his company for a good price to Robert Mayer and Erhardt Schwartz. He had learned 1 year before that he had cancer of the cheeks. At that time

the company acquired a new structure and the name became Tofurei Svadesha Naturkost Produkte GmbH. The new owners agree with Svadesha's philosophy and have solid business experience, so the future looks promising. The company's best selling products are now, in descending order of popularity: Plain Tofu, Tofu Pflanzarl, Smoked Tofu, Tofu Schnitten (marinated, deep-fried slices), and Tofu Spring Rolls.

Aside from being the first tofu company in Germany, Svadesha feels that his other major innovations were being the first to make smoked tofu, Tofu Pflanzarl (tofu meatless meat balls), Herb Tofu, Tofu Schnitten, and Sauerkraut Schnitten. Address: Home: Waldstr. 4, D-8015 Ottenhofen, West Germany.

2320. Belleme, Jan. 1990. Wheat meat: A meaty-tasting substitute for beef that has no saturated fat and half the calories. *Your Health*. June 19. p. 31. [3 ref]

• **Summary:** An introduction to seitan, with two seitan recipes: Oriental pasta salad with peanut sauce, and New England boiled dinner. "Nutritionally, seitan is a powerhouse. In both quantity and quality, the protein in seitan is similar to that in beef. Sirloin steak and seitan both supply approximately 16 grams of protein per 100-gram (3.5-ounce) serving, or 25 percent of the U.S. Recommended Daily Allowance... Although unseasoned seitan, raw wheat gluten, is low in one essential amino acid, lysine, this is easily offset by cooking it in a soy sauce-seasoned broth, or by combining or serving it with lysine-rich foods such as beans. And while the 3.5-ounce sirloin comes with 11.5 grams of saturated fat, 58 milligrams of cholesterol and nearly 300 calories, seitan contains no saturated fat or cholesterol and only 120 calories per 3.5-ounce serving." Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

2321. McKelvey, Richard. 1990. New developments at Lightlife Foods in Greenfield, Massachusetts (Interview). *SoyaScan Notes*. June 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Richard was the sales manager at Tomsun Foods while the company was growing rapidly and at the time it went bankrupt. New products at Lightlife Foods include Foney Baloney (Aug. 1989), Lemon Grill (Tempeh Burgers) (Nov. 1989), and Lean Links (April 1990). Lightlife now buys its tofu from Nasoya. About half the company's sales come from tempeh and tempeh products, and about half from tofu products. The best-selling products are (1) Tofu Pups, (2) Lightlife Tempehworks Soy Tempeh, and (3) Fakin' Bacon. The company is trying to get away from the pure Tempehworks products and to include Lightlife on every label. The new soy tempeh labels will read as shown above. He feels the Grills and the Lean Links have the greatest potential. The Lean Links are very close in concept to their meat counterparts. Address: Sales Manager, Lightlife Foods

Inc., 74 Fairview St., Greenfield, MA 01301. Phone: 413-774-6001.

2322. *SoyaScan Notes*. 1990. Co-packing and private labeling (Overview). June 20. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** From the point of view of a company who wants another to co-pack/private label products for them. Examples Tofutti Brands has a ice cream maker make its soy ice cream. White Wave has a sausage company make its Healthy Links. Advantages: No need to buy new equipment, space, insurance, or hire new workers, which saves money and time. The co-packer has the experience and equipment needed to produce the products. Product development time is usually reduced. Disadvantages: Logistics may be more complicated, especially if the company is not located nearby. A big company may not be very interested in giving you the specialized help and service you need at the beginning or in emergencies. Watch out: Be sure to get a non-compete clause so that company can't steal your product, drop you, and start to compete with you. Get a contract with a long duration, and lots of specifics.

From the point of a company who has a product that other soyfoods companies want to have packed and sold under their label. Examples: Hinoichi Tofu, and Alpro soymilk and soy desserts. Advantages: Co-packing greatly expands your sales. It allows you to use your plant at higher percentage capacity, which lowers per-unit costs. Disadvantages: The co-packed products usually end up competing with yours, thus lowering sales and profit margins of the in-house brand.

2323. Gaiser, Klaus. 1990. The second German Soyfoods Association meeting, and new developments (Interview). *SoyaScan Notes*. June 29. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Shurtleff wrote a letter to the German Soyfoods Association. Gaiser translated it into German and read it to those assembled at the second meeting. But the letter did not impress them very much; the smaller tofu manufacturers are still afraid of the bigger ones. They are all struggling with their daily problems of cash flow, etc. and do not seem very interested in long-term planning. Now Klaus and Thomas Karas are interested in working to reactivate the European Soyfoods Assoc. and/or found a new association in Germany. Klaus is not so busy now during the summer, when people in Germany eat less tofu than during the cold months.

Concerning Auenland, Klaus feels that this company was a very unfair competitor in terms of spreading misinformation about Klaus. In Germany there is a law that magnesium salts cannot generally be used as an "ingredient" in foods (incl. magnesium chloride in tofu), unless it is considered as a "processing aid" (*Hilfstoff*) if very little ends up in the final product. This last area is a gray area. Yamato

has always taken the safer path and used calcium sulfate as a coagulant. But tofu was introduced to Germany mainly by followers of macrobiotics, who favor use of nigari (unrefined magnesium chloride). So Peter Wiegand repeatedly went to Yamato's most important wholesaler and complained: "Can you imagine it. Yamato is using 'Plaster of Paris' in their tofu. Its just like making concrete out of soybeans. For God's sake. How can you sell such a product to your retailers?" Yet Wiegand knew that this was a good, natural coagulant that had been used in China (where it is named *shu-gao*) since ancient times to make tofu.

Concerning Avo Feinkost and their Sofit line of second generation tofu products—it is a complex situation. Klaus is not sure whether or not Avo makes any tofu, since the company does not sell any tofu as such. Klaus is not sure but he thinks that Avo does not buy tofu, but rather makes tofu out of soy protein isolates. The products are quite good imitations of sausage products. The man who runs the tofu operation is a butcher by trade. The biggest German Reform House foods distributor is Heirler, which like Yamato, is partly owned by Huegli. Heirler sells basic tofu that is mainly from Hensel, and second generation tofu products which (as far as Klaus knows, up until now) exclusively from Avo but under the Heirler brand. Heirler does not yet sell any Yamato products, but in the long run Heirler will since Yamato is a sister firm. Things seem to be moving very slowly, however.

Concerning Wolfgang Haberger, Thomas started the company officially in 1982 and Wolfgang joined in Jan. 1984 because he had capital to found the GmbH (Company Ltd.). He left officially in June 1989, but in fact he left earlier. Klaus and Wolfgang did not fit and work together well. Address: President, Yamato Tofuhaus GmbH, Rittweg 11/1, D-7400 Tuebingen-Hirschau, West Germany. Phone: 7071-71094 or 95.

**2324. Product Name:** Veggie Burger (Shipped from the USA to the Soviet Union as a Dry Mix).

**Manufacturer's Name:** Archer Daniels Midland Co.

**Manufacturer's Address:** 4666 Faries Parkway, Box 1470, Decatur, IL 62525. Phone: 800-637-5850.

**Date of Introduction:** 1990 June.

**Ingredients:** Textured soy protein concentrate, natural flavors, seasonings.

**How Stored:** Shelf stable.

**New Product–Documentation:** Peter Golbitz. 1990. *Soya International*. April/June. p. 10-12. "Soya Interview: Dwayne Andreas, CEO Archer Daniels Midland: Soybean Ambassador." Peter Golbitz. 1990. *Soya International*. April/June. p. 14. "ADM unveils new veggie burger: Over 50 million served." "Originally developed by ADM's wholly-owned subsidiary in the United Kingdom, British Arkady, over fifty million servings of the veggie burger, along with soy sausages and meat analog mixes, were sold in the

U.K. last year. According to Ron Ferrari, sales manager of ADM's Protein Specialties Division, the veggie burger was developed to meet the demands of vegetarians..."

Archer Daniels Midland Co. 1990. "Annual report." "ADM has introduced its veggie burger, an all-vegetable protein food product based on soy protein concentrate. This innovative, cholesterol-free, reduced calorie product also contains dietary fiber and appeals to the vegetarian market. Early indications of good acceptance in the U.S. and U.S.S.R. suggest that this product has global potential..."

Stewart Reeve. 1991. *Soybean Digest*. Dec. p. 40a. "Fast food delight." "The product has already proven itself in an export market. ADM introduced a similar product trademarked as the Veggie Burger to the Soviet Union in October 1989 at a food trade show in Moscow. Shipped as only the dry mix, Veggie Burgers are sold in Soviet grocery stores as the mix or served in restaurants as burgers. The Petina restaurant in Moscow now sells 4,500 Veggie Burgers a day, Lensch reports. The Veggie Burger is tailored to the tastes of Soviet consumers. 'For example, the Soviet Union product has 10% fat content rather than the 5% the U.S. has. They're looking for calories,' he explains."

Talk with Lee Lensch of ADM. 1991. Dec. 16. Initial commercial sales began in June 1990. Although Realeat and British Arkady developed the Vegeburger in the UK using TVP (textured soy flour), ADM reformulated it in the USA using textured soy protein concentrate. Worthington Foods has a registered trademark on the name Veggie Burger in the USA only, so that is why ADM named its product Harvest Burger—after extensive talks with Worthington in the spring of 1990. The Veggie Burger made in the USA with textured soy protein concentrate is not currently sold in the UK. Kees Touw, who is in charge of all international sales for this product, would know why it is not sold—but it is probably because British Arkady or Haldane has their own line of products. Maybe one of their products is now made with textured concentrates.

**2325. Brown, Peter J.** 1990. Worthington Foods acquires La Loma foods. *Soya International (Bar Harbor, Maine)*. April/June. p. 13.

• **Summary:** In Jan. 1990 Worthington Foods purchased the La Loma Foods line from Loma Linda Foods for approximately \$6 million. Worthington's 1989 sales were \$62 million, up 29% over 1988. The La Loma line is expected to increase Worthington's sales by up to 15% a year. The company has now four different food lines and brands: La Loma, Worthington, Natural Touch, and Morningstar Farms. The latter accounts for most of the company's sales, and Worthington states that Morningstar Farms products can be found in 90% of America's food markets.

**2326. Product Name:** Soypreme Tofu Dinners [Tofu

Marinara, Tofu Luau, or Tofu Stroganoff].

**Manufacturer's Name:** Cedarlane Foods.

**Manufacturer's Address:** 1864 E. 22nd Street, Los Angeles, CA 90058. Phone: 213-745-4255.

**Date of Introduction:** 1990 June.

**Ingredients:** Organic whole wheat (Kamut) pasta, tofu (organic soybeans, filtered water, nigari), green beans, carrots, corn, tomato puree, tomato juice, soy sauce, corn oil, garlic, olive oil, honey, sea salt, herbs, spices.

**Wt/Vol., Packaging, Price:** 11 oz package.

**New Product–Documentation:** Soya International. 1990.

April/June. p. 23. Contact: Terry Mayo. Ingredients for the Stroganoff are: Organic whole wheat (Kamut) pasta, tofu, green beans, carrots, corn, water, soy sauce, corn oil, mushrooms, onions, organic whole wheat pastry flour, cooking wine, arrowroot powder, garlic, pepper, hydrolyzed soy protein, sea salt, parsley, kelp, dulse, papaya enzyme.

Ad in Whole Foods. 1991. July. p. 76. "Soypreme. Substituting without sacrificing."

2327. Golbitz, Peter. 1990. ADM unveils new veggie burger: Over 50 million served. *Soya International (Bar Harbor, Maine)*. April/June. p. 14.

• **Summary:** "What vegetarian burger can make the claim 'Over 50 million sold?'" Archer Daniels Midland's (ADM) new soy protein-based burger! Made from ADM's own formula of textured soy protein concentrate and other vegetable-based ingredients, this is the same burger that Soviet officials were caught stuffing in their pockets at a recent U.S. trade fair exhibit in Moscow.

"Originally developed by ADM's wholly-owned subsidiary in the United Kingdom, British Arkady, over fifty million servings of the veggie burger, along with soy sausages and meat analog mixes, were sold in the U.K. last year. According to Ron Ferrari, sales manager of ADM's Protein Specialties Division, the veggie burger was developed to meet the demands of vegetarians... "This cholesterol-free product contains dietary fiber, half the fat, 20% fewer calories, and similar protein levels of beef."

"ADM, because it is not a consumer food products company, is currently looking for marketing companies to distribute the product to supermarkets, natural food stores and supermarkets. 'We would like to see the product sold in fast-food outlets as well, as it would be a natural alternative to meat,' says Ferrari..."

"Dwayne Andreas, ADM's illustrious chairman, has dubbed the burger the 'ninth wonder of the world' because it has the ability to relieve extreme malnutrition for over 500 million people." Address: Soyatech, Bar Harbor, Maine.

2328. Golbitz, Peter. 1990. Soya Interview: Dwayne Andreas, CEO Archer Daniels Midland: Soybean Ambassador. *Soya International (Bar Harbor, Maine)*. April/June. p. 10-12.

• **Summary:** "If you want to look over the long pull, in the U.S., we are keeping four times as many tons of animals alive as people in order to eat meat. As the population increases, as it will by one billion people between now and the year 2000, that balance is going to have to change in order to feed the human race." Address: Soyatech, Bar Harbor, Maine.

2329. Golbitz, Peter. 1990. Lite soyfoods making their way to market: Shape of things to come? *Soya International (Bar Harbor, Maine)*. April/June. p. 16-17.

• **Summary:** New low-fat soyfood products include Westsoy Lite (made by Westbrae Natural Foods, and containing only 1% fat and 18% of calories from fat), fat-free versions of Soyco cheese (made by Galaxy Cheese Co. in Cheddar Chunk and Mozzarella Chunk styles), Lean Links (made by Lightlife Foods and containing only 12% of calories from fat). Address: Soyatech, Bar Harbor, Maine.

2330. **Product Name:** Egg Rolls [Vegetarian, Pizza Tofu, or Spinach Tofu].

**Manufacturer's Name:** Health Is Wealth, Inc.

**Manufacturer's Address:** Sykes Lane, Williamstown, NJ 08094. Phone: 609-228-1150.

**Date of Introduction:** 1990 June.

**Ingredients:** Tofu Pizza: Stone-ground whole wheat flour, tomatoes, mozzarella cheese alternative (organic tofu, canola oil, casein, sea salt, citric acid, soy lecithin, guar gum), olive oil, soybean oil, natural spices.

**Wt/Vol., Packaging, Price:** 3 egg rolls per 9 oz package. Retail for \$2.49 (7/90).

**How Stored:** Frozen.

**New Product–Documentation:** Soya International. 1990. April/June. p. 22. The only soy ingredient in the Vegetarian Egg Rolls is soy sauce. Spinach Tofu ingredients are the same as Pizza Tofu but with spinach instead of tomatoes. Contact: Robert Giacoboni.

Ad (color) in Natural Foods Merchandiser. 1990. Nov. p. 22. "The great taste of cheese without the cheese." Shows 3 types of Egg Rolls, 2 of which bear the word "tofu" prominently atop the front panel. "Health is Wealth has replaced the cheese in our ever popular egg rolls with tofu mozzarella."

Product (Egg Rolls [Pizza Tofu]) with Label purchased at Open Sesame in Lafayette, California. 1992. Feb. 13. 5 by 4.75 by 1.75 inches. Paperboard box. Red, white, and blue on black. Color photo of the prepared sticks. "The great taste of tomatoes & cheese without the cheese! Handrolled with Tofu Mozzarella, tomatoes, & stone-ground whole wheat. All natural. Cholesterol free. No MSG. No preservatives. Lactose free. Made with the cheese NûTofû alternative." 3 egg rolls (9 oz.) retail for \$3.99. The phone number is now 609-728-1998.

Soyfoods Center Product Evaluation. 1992. Feb. 13.

Package design: Excellent, however the text on the front panel of the Spinach Tofu Egg Rolls that states “The great taste of spinach and cheese without the cheese!” seems deceptive, since the cheese in this product is made from cow’s milk. The ingredients listing is likewise deceptive since it lists “casein (protein)” rather than “casein (milk protein).” Flavor: We liked the Spinach Tofu Eggs Rolls best—by far.

2331. International Wheat Gluten Association. 1990. Product application bulletins (Leaflets). 4510 West 89 St., Prairie Village, Kansas 66207. 1-2 p. each. June. 28 cm.

• **Summary:** The International Wheat Gluten Association publishes many product application bulletins which give basic information, specific formulas and procedures for the use of vital wheat gluten in the following products: Multigrain bread (use 4.0–5.0% by weight of dry VWG). Batters for coated foods (3.0%). Breakfast cereals. Sausages and other meat products (3.2%). Seafood analogs (such as surimi crab analog, 2.0%). Imitation cheeses (with sodium caseinate, 5.75–6.30%). Flour tortillas (2.50%). Pizza (1.0–2.0%). High protein pasta (1.6%). Flour mills. Bran bread (2.0%). Bread with low slice weight and high specific volume (30.0%). Brown soft rolls (2.0%). Kaiser (hard) rolls (2.0%). “Salad” rolls (4.0%). Hamburger buns (2.0%). French bread (2.0%). Protein increased bread (5.0%). Wheat bread with bran (3.0%). Whole wheat bread from flaked wheat (10%). Wholemeal fibre increased bread (6.0%). Vienna bread (2.0%).

They also publish one bulletin on wheat gluten in

aquaculture diets (5-10%). Address: Prairie Village, Kansas. Phone: (913) 341-1155.

2332. **Product Name:** [Soy Sausages (Thick and Short)].

**Foreign Name:** Chorizos de Soya.

**Manufacturer’s Name:** Productos Alimenticios Soyavyn.

**Manufacturer’s Address:** Planta Soyavyn, 2a Calle Poniente No. 2-4, Lourdes, Colón, Depto. La Libertad, El Salvador. Phone: 51-0705 or 23-3554.

**Date of Introduction:** 1990 June.

**Ingredients:** Soya, green vegetables, oil, eggs, meatlike flavor, spices, salt, colorings.

**Wt/Vol., Packaging, Price:** 10 sausages in approx. 3/4 pound plastic bag.

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm.: Carbohydrate 19.5 gm, protein 6.6 gm, fat 4.1 gm, minerals 2.1 gm.

**New Product–Documentation:** Letter and Label sent by Kris Duville of Productos Alimenticios Soyavyn. 1992. June 2. This product was launched in July 1990. Chorizos are thicker and shorter than Salchichas.

Label. 6 by 4.5 inches. Red and blue on white. “Soya, vida, y nutricion. Precooked. Fry in a little oil. Serve with fried tomatoes, onions, and eggs, as you like.”

2333. **Product Name:** [Soy Sausages (Hot Dog Type)].

**Foreign Name:** Salchichas de Soya.

**Manufacturer’s Name:** Productos Alimenticios Soyavyn.

**Manufacturer’s Address:** Planta Soyavyn, 2a Calle Poniente No. 2-4, Lourdes, Colón, Depto. La Libertad, El

Salvador. Phone: 51-0705 or 23-3554.

**Date of Introduction:** 1990 June.

**Ingredients:** Soya, flour, oil or fat, egg, spices, salt, seasonings (*saborizantes*), colorings.

**Nutrition:** Per 100 gm.: Carbohydrate 20.2 gm, protein 6.0 gm, fat 3.3 gm, minerals 1.5 gm.

**New Product–Documentation:** See next page. Label and letter sent by Kris Duville of Productos Alimenticios Soyavyn. 1992. April 22. 6 by 4.25 inches, folded in half. Paperboard. Blue and red on white. “Fry in a little oil. Can be consumed fresh. Serve in hot dogs.” Chris also encloses 3 color photos of all Soyavyn products in their packages.

2334. **Product Name:** [Soy Burgers (With Fresh Vegetables)].

**Foreign Name:** Tortitas de Soya.

**Manufacturer’s Name:** Productos Alimenticios Soyavyn.

**Manufacturer’s Address:** Planta Soyavyn, 2a Calle Poniente No. 2-4, Lourdes, Colón, Depto. La Libertad, El Salvador. Phone: 51-0705 or 23-3554.

**Date of Introduction:** 1990 June.

**Ingredients:** Soya, green vegetables, egg, spices, seasonings (*saborizantes*).

**Nutrition:** Per 100 gm.: Carbohydrate 24.6 gm, protein 5.8 gm, fat 2.1 gm, minerals 2.0 gm.

**New Product–Documentation:** Label and letter sent by Kris Duville of Productos Alimenticios Soyavyn. 1992. April 22. 6 by 4.25 inches, folded in half. Paperboard. Blue and red on white. “Serve fried or baked. Nice with a fry of tomatoes or vegetables.”

2335. *Soya International (Bar Harbor, Maine)*. 1990. Yves Tofu Wieners up to bat at Candlestick Park. April/June. p. 3.

• **Summary:** This product, made by Yves Fine Foods of Vancouver, BC, Canada, will be served at San Francisco Giants baseball games in Candlestick Park, San Francisco, this year, in a new eggless variety and a larger ballpark size. This will be the second year that meatless tofu hot dogs have been available along with meat hot dogs at concession stands in the stadium.

2336. Tjomb, Paul. 1990. Le pâté nouveau est arrivé: Ingrédients, soja [The new pâté has arrived: Ingredients, soya]. *RIA–Revue des Industries Agro-Alimentaires* No. 443. 14 May to 5 June. [Fre]

• **Summary:** For some years, Cacoja has specialized in soyfoods (food products based on the soybean; les produits alimentaires à base de soja) made from organically grown soybeans. This company is finishing studies on the formulation of a new line of products, soya pâtés, which will be commercialized about a month. Cacoja is an affiliate of the Est-Lait [“East Milk”] group. The company presently markets an important line of products consisting of desserts, of confections with 20% soya, of beverages,

and of mayonnaises. A large part of its activity is devoted to developing convenience prepared foods (*plats cuisinés*) which contain an average of 20% soya. The company also offers quenelles (like sausages), ravioli, and lasagne which are distributed fresh with a shelf life of 3 weeks. One of this company’s flagship products is the soya medallions (médaillon de soja). These are two round meatless patties (gallettes, 125 gm each, about 3/8 inch thick), rich in protein. They are vacuum packed in plastic film with a shelf life of 21 days. The medallions come in 4 flavors: carrot, mushroom, tomato, and garlic and fines herbes. Mme. Chanterau is director of product development.” Address: France.

2337. *Vegetarians of Alberta*. 1990–. Serial/periodical. Edmonton, Alberta, Canada: Vegetarians of Alberta Association. Frequency: Quarterly.

• **Summary:** Form filled out by David J. Parker. 1992. July. The first issue was published in May/June 1990 (7 p.). The publisher, Vegetarians of Alberta, was founded in July 1989. The founder and first editors were Margaret Marean, Glen McLean, and David J. Parker. A copy of all back issues still exists at the Society. The present title is *Vegetarians of Alberta Quarterly*, published by the same organization at the same address. It is still published quarterly. Circulation is now about 200.

“The organization was started by Father Evaski-Mclean who deals in soya products. Picnics in the park were our first endeavour and & still are although we go indoors over winter. We sell tofu wieners at Earth Day and other events to get money to operate although our budget is small. Please find back issues of our journal” enclosed. Also enclosed is a leaflet (3 panels each side) titled “Vegetarians of Alberta.” Address: c/o 10257–95 Street, Edmonton, Alb T5H 2B3, Canada. Phone: 469-1448 or 429-3679.

2338. **Product Name:** Multigrain Cutlets.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Road, Worthington, OH 43085. Phone: 800-628-3003.

**Date of Introduction:** 1990 June.

**Ingredients:** Water, textured vegetable protein (wheat gluten, soy protein concentrate), red wheat flakes, barley flakes, oatmeal, rye flakes, triticale flakes, white wheat flakes, millet, guar gum. Broth: Water, flavorings (hydrolyzed vegetable protein).

**Wt/Vol., Packaging, Price:** 20 oz (567 gm) can. Retail for \$2.65 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** *Soya International*. 1990. April/June. p. 23. Contact: Don Michalenko.

Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan*. 7th ed. Appendix A.6-27.

Product with Label purchased at Adventist Book Center

in Pleasant Hill, California. 1990. July 19.

2339. **Product Name:** Veelets.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Road, Worthington, OH 43085. Phone: 800-628-3003.

**Date of Introduction:** 1990 June.

**Ingredients:** Textured vegetable protein (wheat gluten, soy concentrate, soy isolate), egg whites, wheat flour, corn flour, soybean oil, corn oil, modified food starch, partially hydrogenated soybean and cottonseed oil, natural and artificial flavors from non-meat sources, leavening (sodium acid pyrophosphate, sodium bicarbonate), calcium caseinate, salt, onion, mono- and diglycerides from vegetable sources, garlic, caramel color, paprika, niacin, iron (as ferrous sulfate) vitamin B-1 (thiamine), vitamin B-6, vitamin B-2 (riboflavin), vitamin B-12.

**Wt/Vol., Packaging, Price:** 10 oz paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 2.5 oz (71 gm): Calories 230, protein 14 gm, carbohydrate 12 gm, fat 14 gm, cholesterol 0 mg, sodium 390 mg, potassium 120 mg.

**New Product-Documentation:** Soya International. 1990. April/June. p. 23. Contact: Don Michalenko.

Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19. 8 by 4 by 1.25 inches. Red, black, and yellow on white. Paperboard box. Front panel states: "A vegetable protein product. Completely meatless. Lightly breaded. Delicious as an entree or sandwich. Microwave in minutes. 4 patties. No cholesterol. No MSG added. No animal fat." Package design is copyright 1990.

Soyfoods Center product evaluation. 3½ inch patties are lightly breaded and pre-fried. Flavor, texture and salt level are very good. Package design: Excellent.

2340. **Product Name:** Golden Croquettes.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:**

900 Proprietors Road,  
Worthington, OH 43085.

Phone: 800-628-3003.

**Date of Introduction:** 1990 June.

**Ingredients:** Textured vegetable protein (wheat gluten, soy concentrate, soy isolate), egg whites, cracker meal, rice, soybean oil, corn oil, partially hydrogenated soybean and cottonseed oil, potatoes, nonfat dry milk, natural and artificial flavors from non-meat sources, onions, salt, sucrose, parsley

flakes, celery, niacin, iron (as ferrous sulfate), vitamin B-1 (thiamine), vitamin B-6, vitamin B-2 (riboflavin), vitamin B-12.

**Wt/Vol., Packaging, Price:** 15 oz paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 3.75 oz (106 gm): Calories 280, protein 19 gm, carbohydrate 20 gm, fat 14 gm, cholesterol 0 mg, sodium 890 mg, potassium 230 mg.

**New Product-Documentation:** See next page. Soya International. 1990. April/June. p. 23. Contact: Don Michalenko. Product with label purchased from Craig Klatt at Adventist Bookstore, Pleasant Hill, California.

2341. **Product Name:** Tofu Garden Patties [With Garden Vegetables or With Mushrooms and Soya Cheddar Cheese].

**Manufacturer's Name:** Yves Fine Foods Inc.

**Manufacturer's Address:** 1138 East Georgia Street, Vancouver V6A 2A8, B.C., Canada. Phone: 604-251-1345.

**Date of Introduction:** 1990 June.

**Ingredients:** With Garden Vegetables: Tofu, (water, organic soybeans, magnesium chloride), stone ground whole wheat flour, gluten, fresh carrots, green peppers, celery, onions, crushed tomato, soy grits, garlic powder, seasonings, rice syrup solids.

**Wt/Vol., Packaging, Price:** 6 oz package. Retail for \$1.99 (7/90).

**New Product-Documentation:** Soya International. 1990. April/June. p. 22. The ingredients for Tofu Garden Patties with Mushrooms and Soya Cheddar Cheese are: Tofu, soya cheese (tofu, soy oil, casein, salt, citric acid, lecithin, natural flavor, guar gum, annatto seed), stone ground whole wheat flour, gluten, mushrooms, soy grits, garlic powder, seasonings, rice syrup solids. Contact: Yves Potvin.

Spot in Health Foods Business. 1991. Jan. p. 76. "The burgers are made with either fresh vegetables and spices, or with mushrooms and soya cheddar cheese."

No preservatives. Low in saturated fat. Since 1985 we have been committed to providing you with the highest quality in healthy, easy to prepare entrées. Always cholesterol and preservative free..." The company name is now Yves Veggie Cuisine Inc. The president is Yves Potvin.

**2343. Muso Shokuhin.** 1990. [Pure heart: Muso general catalogue]. Otedori 2-2-7, Chuo-ku, Osaka 540, Japan. 88 p. Printed 1 July 1990. 30 cm. [Jap]

• **Summary:** This strikingly beautiful, full-color catalog, pictures and describes Muso's natural-food macrobiotic products in Japanese for the Japanese market—although the title is written only in English. Includes many kinds of miso, shoyu (incl. Marushima Shoyu), black soybeans, yellow soybeans, kinako [roasted soy flour], seitan (in a jar from Marushima, p. 41; the product name is written as "Seitan" in large roman letters, then in smaller letters in katakana), San-Iku Foods canned products (Gluten Burger, Gluten Meat, Linketts, Soyees, Snack Joe; p. 41), yuba, gomoku nimame (cooked whole soybeans), many kinds of sea vegetables and related products, San-Iku Soyolac (8 different products), Marusan soymilk (5 different products; 3 are named mineral tou-jyan; the latter is the Chinese term for soymilk), macrobiotic books. Address: Osaka, Japan. Phone: 06-942-

0343.

2344. Rabheru, Neil. 1990. Brief history of Unisoy Milk 'n' By-Products Ltd. (Interview). *SoyaScan Notes*. July 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Neil, who founded this company, was born in Tanzania. One of his parents was of Indian origin (born in India). He arrived in the UK in 1972 and went to work for a very large electronics company. By the mid-1980s he had cornered himself into a very specialized field of environmental testing and performance of defence equipment. The next step up in the organization was a long way away, so having run out of excitement in life, he began to look for more rewarding work. While doing a little import/export work he met an Indian named Mr. John Patel [pronounced puh-TEL] who suggested to him that they start a company to make soymilk, soy ice cream, and burgers. Mr. Patel did not have any money. The company was founded in June 1985. Before anything else happened, Neil became very concerned over irregularities in Mr. Patel's financial activities, and decided to discontinue his involvement with Mr. Patel. A few days later Mr. Patel died unexpectedly on 5 Nov. 1985. On Nov. 10-12 Neil selected the location for

his new plant, then he raised the necessary startup capital from five venture capitalists in high tax brackets, but he was the company's only executive. Neil was never in any way involved with Michael Cole or with Soya Health Foods Ltd. (which is still owned by Mr. Arora, a Sikh) despite what others have said. Jan Freeman is presently involved with Unisoy.

In May 1986 Unisoy began to make its first product, White Wave Soya Milk (plain/unsweetened, or sweetened with raw cane sugar) at their present address. Before this time, the soymilk market in the UK was "very stagnant and boring, with limited growth. There was a very high price differential between dairy milk and soya milk. Soymilk packaging was poor. The ratio of the volume of business to the number of brands on the market was too high. Too many brands were fighting for too small a market. There was tremendous brand loyalty, promoted in part by the wide range of product tastes. That was Unisoy's biggest problem. So Unisoy decided to crash the price barrier, and develop some nice packaging and a better tasting, much creamier product." To learn how to make soymilk, Rabheru did an extensive study of the literature. He found many conflicting opinions but agreement on some basic points. To help resolve these, he consulted with Dr. H.L. Wang at the USDA Northern Regional Research Center in Peoria, Illinois. He developed a unique process, purchased a soymilk plant from Taiwan, modified it with steam injection and instrumentation to suit his application (he has an engineering background), developed soymilk products, ran taste tests, and continued improving his process. Unisoy's main competitors in the soymilk market at that time (and still today) were Alpro/Vandemoortele and Granose. Unisoy has taken over virtually all of the market share of Soya Health Foods Ltd., mostly because of better quality and lower price.

In May 1987 Unisoy introduced White Wave Soya Yogart, a line of products were yogurt-like desserts in fruit flavors with a shelf-life of 10-11 weeks with aseptic packaging. This was followed by Unisoy Carob & Banana Organic Drink (Aug. 1988), Unisoy Gold soymilk (March 1989), Maranellis Ice Supreme (soy ice cream, May 1989), and Unisoy Soy Yogart (Aug. 1989). All the previous soy ice creams and yogurts in the UK had contained soy protein isolates, since the manufacturers did not know how to make soymilk with a high protein levels. Even today, all the soy ice creams in the UK are made from soya isolates. Unisoy makes a special rich soymilk used specially for making their ice cream.

Over the years Unisoy steadily improved its soymilk process with numerous innovations. They now make excellent quality soymilk without dehulling the soybeans, without adding any oil or lecithin, and using only 1-2 people to operate the largely automated plant.

In Dec. 1988 Neil sold the company to Daisy Dairies Ltd. This cooperative group of companies has their head

office in Hyde, Cheshire, and they also have fresh milk, UHT, catering, and ice cream manufacturing divisions, plus now Uniso. He would prefer not to comment on the effects/results of the sale. Address: Unit 1, Cromwell Trading Estate, Cromwell Rd., Bredbury, Stockport, Cheshire SK6 2RF, England. Phone: 061-430 6329.

2345. Marshall, Philip. 1990. Early work with soyfoods in the UK: Direct Foods, Whole Earth, Harmony Foods Ltd., and Haldane (Interview). *SoyaScan Notes*. July 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Brian Welsby founded Haldane Foods in 1983. But he was active with health foods long before 1980. He used to do the product mixing for a company named Direct Foods Ltd. (in Petersfield, Hampshire), which was owned by Peter and Anna Roberts, a very nice, committed pair of vegans. They were among the first people to market dried soya products, particularly TVP, in the UK. And they were certainly the first people to develop the market for composite dry soya products—like burger mixes. Philip has no idea when Direct Foods started, but it may have been in the late 1960s. [Note: It started in Aug. 1969.] They were one of the pioneers of vegetarianism and veganism in England.

Greg and Craig Sams are brothers, both American. Both are very talented guys, excellent at marketing. Greg is in a wheelchair. In the early days, both were the key figures/principals at Whole Earth with the early events at Portobello Road. Whole Earth, which started as a bakery, became Harmony Foods, a large health food wholesaling company. [Note: In 1980 Harmony Foods Ltd. was at 12 Orpheus St., Camberwell, London S.E., England.] Harmony had some of its own Harmony Foods brands and was one of the first companies in the UK to import Japanese miso, shoyu, etc. At some point, Whole Earth was sold off as a health food wholesaler, and its still going with such popular brands as Whole Earth jams, sauce, etc.

Peter Fitch was responsible for putting together the Haldane Foods Group, which incorporates Direct Foods, Haldane Foods, and Realeat. Address: Owner, Cauldron Foods Ltd., 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol BS3 2TL, England. Phone: (0272) 632835.

2346. Klatt, Craig. 1990. Best-selling Worthington and Loma Linda food products in Northern California (Interview). *SoyaScan Notes*. July 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** This store has a large selection of meatless products made by these two Adventist companies. Of the canned products, Worthington's (and the store's) best-seller by far is FriChik (based on spun soy fibers), followed by Vegetable Skallops (with artificial seafood flavor; originally developed by Battle Creek Foods of Michigan), then Veja-Links or Burger. Loma Linda's most popular canned product

by far is Big Links (like a Polish sausage), followed by Vege-Burger.

Of the frozen products, Worthington's best-seller is Smoked Turkey Slices, followed by Stripples (like bacon), while Loma Linda's best-seller is Corn Dogs (based on their Big Franks), followed by Fried Chicken. Loma Linda has tended to follow Worthington in terms of new product development and introduction. Craig has heard for reliable sources that spun soy protein fibers are quite similar to plastic fibers in that they are hard to digest and have a scouring effect on the digestive system. They also seem to cause large amounts of flatulence. His store is working to carry products with a "cleaner" list of ingredients, which are less highly processed, such as those made by Cedar Lake. Address: Manager, Adventist Book Center, 2300 Nourse Rd., Pleasant Hill, California 94523. Phone: 415-685-4300.

2347. Michael, Brenger. 1990. History of La Fonte della Vita S.r.L., Italy's largest manufacturer of tofu and seitan (Interview). *SoyaScan Notes*. July 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** This company was founded in Feb. 1985 by Mr. Demontis and his wife, Ms. Borello, on Via Matteotti?, in Fossano, about 35 miles south of Torino (Turin). He joined the company in the fall of 1985 and became a partial owner. He learned to make tofu from *The Book of Tofu* by Shurtleff & Aoyagi. Today the company is owned by 5 people, with the DeMontis owning the largest share; Mr. Mario Cozio joined later. Originally the company made only nigari tofu, but by autumn they had introduced 4 tofu spreads (tofu pâté), and soymilk. In April 1986 the company moved about 15 miles further south to Via Circonvallazione 87, 12049 Trinita (Cuneo), Italy. They are still at the same location but the street was renamed in about 1987? so that their present address is Via Monviso 18, 12049 Trinita (Cuneo). After the move, they introduced two types of seitan (plain and fried), fried tofu, tofu with herbs, then two tofu burgers (one with sea vegetables, and one with seitan). They used to make soymilk but after it grew to a certain level they stopped making it and began buying it from a company in Belgium [probably Alpro], so that they could focus on expanding tofu production. In June 1990 they began making tempeh.

Today they are the largest among 5 tofu manufacturer in Italy. They make about 2,500 kg/week of tofu and have 23 employees. The company's best-selling product is fried seitan, followed by natural seitan and regular tofu (about equal), tofu burgers, and tofu spreads. During the last year sales have grown about 30%, due in part to an aggressive program to introduce 2-3 new products a year. New products are tempeh and seitan burgers. Address: Via Monviso 18, 12049 Trinita (Cuneo), Italy. Phone: (0172) 66 397.

2348. MT Plate. 1990. July. New soyfoods restaurant or deli. 641 N. Palm Dr. (P.O. Box 3243), Palm Springs, CA 92263-

3243.

• **Summary:** Letter from Tanya Malch. 1990. Sept. 11. This restaurant opened on 17 July 1990 with completely vegetarian (except rennetless cheeses) lunch and dinner menus consisting of Pasta, Pizza, and Pacific Rim foods. The dinner menu represents 8 countries. They have a young, full-time French chef who adds style and presentation and is doing great things with the tempeh. They make their own tempeh, presently for use at the restaurant only, and lite-soy-millet. For lunch they serve tempeh burgers, tacos, Tempehting Garden Salad, and a wonderful tempeh paté on a bed of greens with basmati rice. For dinner, appetizers include (from Thailand) Thai Stix, which are skewers of tempeh to dip in a south seas peanut sauce, and (from Japan) aged tofu. Entrees include Tempeh Scallopini with Shallot and Shiitake-Sake Sauce. Everyone loves the tempeh. “We have tempeh addicts who never knew the word before we opened.” Her partner is Mona.

Menu. 1990. 8.5 by 11 inches. 1 page, two sided. Black on yellow.

Talk with Tanya. 1991. March 7. She tells how tennis star Martina Navratilova came repeatedly to her restaurant before and during the local Virginia Slims tennis tournament and loved the tempeh, then after winning the tournament, Martina stopped her press conference to talk about what a great food tempeh is! (see separate record). Tanya uses about 48 cups of soybeans a week to make tempeh. She mixes 3 parts of soybeans with 1 part millet and makes only soy & millet tempeh—her favorite. She feels that fresh tempeh is far superior to its refrigerated or frozen counterpart. She also teaches a cooking class on tempeh.

M.T. Plate then moved to 43 North Pacific Coast Hwy #201, Redondo Beach, California 90277. This restaurant was on the second floor of a building. Then the rent tripled and investors balked. So Tanya closed it in mid-1993. Now she wants to make tempeh. Address: Palm Springs, California. Phone: 619-323-9686.

2349. **Product Name:** [Soglowekteva Vegetarian Schnitzel].

**Foreign Name:** Zoglovakteva Schnitzel min Hatzomeach.

**Manufacturer’s Name:** Soglowekteva.

**Manufacturer’s Address:** Nahariyya, Israel.

**Date of Introduction:** 1990 July.

**Ingredients:** Water, rehydrated soy protein concentrate and wheat gluten, vegetable oil, egg whites, natural spices, onion, salt (less than 1%) vegetable ?, yeast, lecithin, vitamin A, vitamin C, vitamins B (B-1, B-2, B-6, B-12, niacin, pantothenic acid). Breading: Bread crumbs, starch, sugars, spices.

**Wt/Vol., Packaging, Price:** 600 gm paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 100 gm.: Calories 270, protein 16 gm, carbohydrate 18 gm, fat 14 gm, cholesterol 0 mg, sodium 100 mg.

**New Product–Documentation:** Label obtained by Nora Perry in Tel Aviv, Israel. 1990. July 5.

2350. Tivall. 1990. Aizeh mi’shloshet ha’hamburgerim hu ha’hamburger Tivall [Which of these 3 hamburgers is a Tivall hamburger? (Ad)]. In: Playbill for “Of Mice and Men” by John Steinbeck. 1990. Presented at Habimah National Theatre, Tel Aviv, Israel. 30 p. See p. 28. [Heb]

• **Summary:** Half page color photo shows a boy with 3 hamburgers in front of him pouring catsup on one of them. The text below the picture reads: “Which of the 3 hamburgers is a Tivall hamburger? All three! Surprise? Maybe. But while you sit there surprised, your son has already finished eating his hamburger. Let him be healthy! Now, when you or your child feel like having a juicy hamburger, you’ll know: Tivall offers 3 kinds of vegetarian hamburgers:

“Hamburger Tivall: The classic hamburger. (Don’t forget to let your child pour the catsup on himself!) The grilled hamburger: Try it with barbecue sauce, pickles, and onions. The American hamburger from the ‘World of Tivall series.’ Prepare a double portion with lettuce, tomato, and thousand island sauce. It’s nickname is the ‘big burger.’ Bon Appetit.” Address: Israel.

2351. **Product Name:** [Vegetarian Burger].

**Foreign Name:** Hamburger min Hatzome’ach.

**Manufacturer’s Name:** Tivall.

**Manufacturer’s Address:** Kibbutz Lochamei Hageta’ot, Oshrat, Israel.

**Date of Introduction:** 1990 July.

**Ingredients:** Water, wheat protein, soya protein, vegetable oil (soybean and cottonseed), natural spices, onion, salt (less than 1%), garlic, hydrolyzed vegetable protein, paprika, powdered beets, natural flavors, lecithin, vitamin A, C, B (B-1, B-2, B-6, B-12, niacin, pantothenic acid). spices.

**Wt/Vol., Packaging, Price:** 600 gm plastic wrapped package.

**How Stored:** Frozen.

**Nutrition:** Per 100 gm.: Calories 221, protein 16 gm, carbohydrate 7.5 gm, fat 14.2 gm, cholesterol 0 mg, sodium 100 mg, iron 5 mg.

**New Product–Documentation:** Label obtained by friend of Nora Perry at Tel Aviv, Israel, supermarket. 1990. July 4. 7 by 11.5 by 1.5 inches. Plastic bag. Brown, yellow, green, red, white, and black. “Vegetarian food products grown with nature’s goodness. No food coloring, no preservatives, no cholesterol. Contains all the basic nutritional necessities: Protein, carbohydrates, polyunsaturated fats, and minerals and vitamins.” Back panel: “How to prepare.”

2352. **Product Name:** [Vegetarian Burger (Grilled Hamburger Style)].

**Foreign Name:** Hamburger min Hatzome’ach (Hamburger

Grill).

**Manufacturer's Name:** Tivall.

**Manufacturer's Address:** Kibbutz Lochamei Hageta'ot, Oshrat, Israel.

**Date of Introduction:** 1990 July.

**Ingredients:** Water, wheat protein, soya protein, vegetable oil (soybean and cottonseed), egg albumen, salt, natural spices, hydrolyzed vegetable protein, lecithin, vitamin A, C, B (B-1, B-2, B-6, B-12, niacin, pantothenic acid).

**Wt/Vol., Packaging, Price:** 300 gm paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 100 gm.: Calories 235, protein 16 gm, carbohydrate 11 gm, fat 14 gm, cholesterol 0 mg, sodium 100 mg, potassium 110 mg, iron 5 mg.

**New Product–Documentation:** Label obtained by friend of Nora Perry at Tel Aviv, Israel, supermarket. 1990. July 4. 8.5 by 4.75 by 1.5 inches. Paperboard box. Green, red, and white on yellow. Front: Photo of 3 hamburgers on a plate alongside some corn and lettuce. Plate is sitting on a light wooden table besides a variety of grains and vegetables. "New! Hamburger Grill. No food coloring, no preservatives, no cholesterol. Contains all the basic nutritional groups: Protein, carbohydrates, polyunsaturated fats, and minerals and vitamins." Back panel: "How to prepare."

2353. **Product Name:** [Tivall Vegetarian Sausage Roll].

**Foreign Name:** M'afeh Naknikiah min Hatzomeach.

**Manufacturer's Name:** Tivall.

**Manufacturer's Address:** Kibbutz Lochamei Hagetaot, Israel.

**Date of Introduction:** 1990 July.

**Ingredients:** Sausage: Water, rehydrated soy protein concentrate and wheat gluten, soybean oil, egg albumen, natural spices, onion, salt (less than 1%), garlic, hydrolyzed vegetable protein, paprika, lecithin, vitamin A, vitamin C, B vitamins (B-1, B-2, B-6, B-12, niacin, pantothenic acid). Dough: Wheat flour, vegetable oil, water, and salt.

**How Stored:** Frozen.

**Nutrition:** Per 100 gm.: Calories 337, protein 10.5 gm, carbohydrate 22 gm, fat 23 gm, cholesterol 0 mg, sodium 100 mg.

**New Product–Documentation:** Label obtained and translated by Nora Perry in Tel Aviv, Israel. 1990. July 5.

2354. **Product Name:** [French Style Vegetarian Schnitzel with Wine and Mushrooms].

**Foreign Name:** Schnitzel Tzarfati min Hatzome'ach im Ya'in ve Pitriot.

**Manufacturer's Name:** Tivall.

**Manufacturer's Address:** Kibbutz Lochamei Hageta'ot, Oshrat, Israel.

**Date of Introduction:** 1990 July.

**Ingredients:** Water, wheat protein, soya protein, vegetable oil (soybean and cottonseed), mushrooms, onions, egg albumen, salt, natural spices, white wine, lecithin, vitamin A, C, B (B-1, B-2, B-6, B-12, niacin, pantothenic acid). Breeding: Wheat flour, corn starch, soybean oil, spices.

**Wt/Vol., Packaging, Price:** 400 gm paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 100 gm.: Calories 240, protein 13 gm, carbohydrate 18 gm, fat 13 gm, cholesterol 0 mg, sodium 100 mg, potassium 210 mg, iron 5 mg.

**New Product–Documentation:** Label obtained by friend of Nora Perry at Tel Aviv, Israel, supermarket. 1990. July 4. 6.5 by 8.25 by 1.75 inches. Paperboard box. Red, yellow and blue on a design of beige crisscrossed fibers which covers the entire box. Picture of 2 schnitzels on top of each other alongside asparagus and an elegantly cut mushroom and tomato, all on a china plate. Glass of wine beside china plate with a satin tablecloth beneath both plate and glass. “No food coloring, no preservatives, no cholesterol. Contains all the basic nutritional groups: Protein, carbohydrates, polyunsaturated fats, and minerals and vitamins.” Back panel: “How to prepare.”

**2355. Product Name:** [Vegetarian Schnitzel].  
**Foreign Name:** Schnitzel min Hatzome’ach.  
**Manufacturer’s Name:** Tivall.  
**Manufacturer’s Address:** Kibbutz Lochamei Hageta’ot, Oshrat, Israel.  
**Date of Introduction:** 1990 July.  
**Ingredients:** Water, wheat protein, soya protein, vegetable oil (soybean and cottonseed), egg albumen, natural spices, onion, salt (less than 1%), garlic, hydrolyzed vegetable protein, yeast, lecithin, vitamin A, C, B (B-1, B-2, B-6, B-12, niacin, pantothenic acid). Breeding: Wheat flour, corn starch, soybean oil, spices.  
**Wt/Vol., Packaging, Price:** 1 kg plastic wrapped package.  
**How Stored:** Frozen.  
**Nutrition:** Per 100 gm.: Calories 290, protein 13 gm, carbohydrate 18 gm, fat 18 gm, cholesterol 0 mg, sodium 100 mg, iron 8 mg.  
**New Product–Documentation:** Label obtained by friend of Nora Perry at Tel Aviv, Israel, supermarket. 1990. July 4. 6.25 by 13 by 2 inches. Plastic bag. Brown, yellow, green, red, white, and black. “Vegetarian food products grown with nature’s goodness. No food coloring, no preservatives, no cholesterol. Contains all the basic nutritional groups: Protein, carbohydrates, polyunsaturated fats, and minerals and vitamins.” Back panel: “How to prepare.”

**2356. Product Name:** Choplets.  
**Manufacturer’s Name:** Worthington Foods, Inc.  
**Manufacturer’s Address:** Worthington, Ohio.  
**Date of Introduction:** 1990 July.  
**Ingredients:** Textured vegetable protein (wheat gluten, soy protein concentrate), caramel color. Broth: Water, flavorings (hydrolyzed vegetable protein, spice extractives), yeast extracts, dextrose, salt, soybean oil, caramel color, monosodium glutamate.  
**Wt/Vol., Packaging, Price:** 8 oz, 17 oz, and 30 oz can. 20 oz can retails for \$2.75 (7/90, California).  
**How Stored:** Shelf stable; refrigerate after opening.  
**New Product–Documentation:** Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19. 20 oz (567 gm) can. The

ingredients are now: Textured vegetable protein (wheat gluten, soy protein concentrate), caramel color. Broth: Water, flavorings (hydrolyzed vegetable protein, spice extractives), yeast extracts, dextrose, salt, soybean oil, caramel color, monosodium glutamate.

Note: This product was first introduced in Oct. 1941, but did not contain textured soy protein at that time.

**2357. Product Name:** Cutlets.  
**Manufacturer’s Name:** Worthington Foods, Inc.  
**Manufacturer’s Address:** 900 Proprietors Road, Worthington, OH 43085. Phone: 800-628-3003.

**Nutrition:** Per 7½ oz.: Calories 140, protein 11 gm, carbohydrate 15 gm, fat 3 gm, cholesterol 0 mg, sodium 14 mg, potassium 260 mg.

**New Product–Documentation:** Label (Honey Baked) obtained at World Vegetarian Day in San Francisco. 1990. Oct. 6. 9 by 4 inches. Paper can label. Reddish brown, yellow, black, brown, green, and white on yellow. Full color photo of crock of beans with tofu wieners and a spoon dipping in. “3-minute main dish.” Date of 8/90 written encoded on label.

Products with Labels (all 3) purchased at Open Sesame in Lafayette, California. 1991. Jan. 31. \$1.89 each. “Lead free can from Health Valley. This can is enamel coated for your protection.”

2359. **Product Name:** Garden Gourmet Vege-Dogs in Pastry.

**Manufacturer’s Name:** Tivall.

**Manufacturer’s Address:** Imported by Tivall, USA, Inc., 9633 E. Bexhill Dr., Kensington, MD 20895. Phone: 301-946-8855.

**Date of Introduction:** 1990 August.

**Ingredients:** Rehydrated soy protein concentrate and wheat gluten, soybean oil, egg whites, spices, salt, onion, garlic, tamari sauce, hydrolyzed vegetable protein, paprika, natural flavoring, guar gum (natural vegetable gum), lecithin, vitamin A, thiamine (Vitamin B-1), riboflavin (vitamin B-2), pyridoxine hydrochloride (vitamin B-6), vitamin B-12, nicotinamide, vitamin C, calcium pantothenate. Pastry: Wheat flour, soybean oil, partially hydrogenated soybean oil, water, sesame seeds, salt, mono and diglycerides.

**Wt/Vol., Packaging, Price:** 12 oz package.

**How Stored:** Frozen.

**New Product–Documentation:** Garden Gourmet brochure sent by Tivall, Israel. 1990. Sept. 4. Glossy insert. “The ‘pig in a blanket’ has left the pig behind. It its place is a lightly

seasoned, wholesome entrée in a light puff pastry.”

**2360. Product Name:** Garden Gourmet Vege-Cutlets.

**Manufacturer’s Name:** Tivall.

**Manufacturer’s Address:** Imported by Tivall, USA, Inc., 9633 E. Bexhill Dr., Kensington, MD 20895. Phone: 301-946-8855.

**Date of Introduction:** 1990 August.

**Ingredients:** Rehydrated soy protein concentrate and wheat gluten, soybean oil, egg whites, spices, salt, onion, garlic, hydrolyzed vegetable protein, natural flavoring, lecithin, vitamin A, thiamine (vitamin B-1), riboflavin (vitamin B-2), pyridoxine hydrochloride (vitamin B-6), vitamin B-12, nicotinamide, vitamin C, calcium pantothenate. Breeding: Wheat flour, corn starch, partially hydrogenated soybean oil.

**Wt/Vol., Packaging, Price:** Retail: 7 oz package.

Foodservice: 3.5 oz.

**How Stored:** Frozen.

**New Product–Documentation:** Garden Gourmet brochure sent by Tivall, Israel. 1990. Sept. 4. Glossy insert. “... as delicious as it is nutritious. Main-meal satisfying with its delicately seasoned flavor and crisp crumb coating, our Vege-Cutlet has instant taste appeal. Excellent baked to a golden brown.”

2361. Tivall. 1990. Tivall vegetarian food products: Growth with nature’s goodness (Portfolio). Kibbutz Lochamei Hagetaot, Mobile Post, Oshrat 25220, Israel. 6 p., incl. 4 inserts. 29 cm. [Eng]

• **Summary:** The cover of this full-color brochure shows an empty white plate flanked by a fork and spoon. The four inserts describe the company’s four main product lines: Tivall in Israel, Garden Gourmet in the USA, Tivall/Tesco in Great Britain, Gourmet Vert in France, and Tivall Gourmet-Garten in Germany. Each line has completely different package designs and product names. Each 2-sided color insert contains a photo of the package and details on each product for each line. For example, Tivall/Tesco retail products in the UK are: Vegetarian sausage, Vegetarian burger, Vegetarian cocktail sausage, Vegetarian sausage roll, Vegetarian strudel, Vegetarian schnitzel, Vegetable patty, Vegetarian whole wheat schnitzel, Vegetarian slicing sausage, Vegetarian nuggets. This line also includes the following products available in catering packages of 2.27 kg, 3, 5, or 10 kg: Vegetarian lasagna, Vegetarian burger for “Tesco,” and Vegetarian Grills for “Tesco.”

The French Gourmet Vert line includes: Freeburg (vegetarian burger), Crocknack (sausage), Vege-Pane (cutlets), Takit (nuggets), Crockroll (sausages in pastry), Vege-feuillette (savory filling in pastry), Gale vert (patty with vegetables and grain).

The German Tivall Gourmet-Garten line includes: Gemuese Patties (spinach, or carrots, corn & peas), Veglettes (Schnitzel), and Sesamies (nuggets).

Four color photos show: An aerial view of the Tivall food factory, sausages coming down a stainless steel chute off the production line, patties being packaged on a conveyor, chefs in tall white hats cutting the products in a kitchen. “Tivall. A patented process and unique seasoning system guarantee the winning combination that shoppers are looking for.”

The Tivall international network includes the head office in Israel, plus distributors John A. Taylor Ltd. in London, Yarden France in Paris, Schoenmakers Import & Export in Ooltegensplaat, Holland, F. Nowak GmbH in Essen, West Germany, and Tivall USA Inc. in Kensington, Maryland. Address: Oshrat, Israel. Phone: 04-858700.

2362. Tivall. 1990. Tivall frozen foods (Portfolio). Kibbutz Lochamei Hagetaot, Mobile Post, Oshrat 25220, Israel. Four inserts. 31 cm. [Eng]

• **Summary:** The cover of this full-color brochure shows a silver, green, and black oval that reads “Tivall Frozen Foods” against a bright yellow rectangle, set in a black background. The four pages of inserts describe individual products. The two inside pages bear the V-shaped logo of the Vegetarian Society of the UK, but in black on a white background. The brochure is targeted at the British market. “The demand to maintain a healthy diet is underway and no longer is it considered a fad but a way of life. Today over 30 million British adults claimed to be concerned about nutrition and over half of them say that they are trying to cut down on their fat intake. In the last 5 years, cholesterol has become something to avoid. It is against this backdrop that Tivall has developed a wide range of tasty products which are based on Soya and Wheat Protein but match the nutritional values, taste, and texture of meat. Tivall products are natural and wholesome, do not contain additives, preservatives, artificial colouring or meat.

“Tivall products give today’s caterer an extra option—something new and tasty which appeals to the health conscious customer. A range of products which are suitable for vegetarians and taste good too. The Tivall products offer the caterer portion control and more menu alternatives. Because the products are frozen they are simple to prepare and serve without waste.

“Tivall products originate from an ultra-modern frozen foods factory in Israel. The name Tivall itself means ‘quality from nature.’ The production process is truly revolutionary and at last there’s a vegetarian alternative to meat that matches the nutritional value and texture of meat but without cholesterol, without artificial colourings, additives, and preservatives. Tivall Frozen Foods, Jatko House, 798 High Road, London N17, England. Tel: 01-801-6421.

The inserts give details on, and large color photos show: Vegetarian garden vegetable pattie [sic, patty], Vegetarian savoury strudel, Vegetarian burger, and Vegetarian whole-wheat schnitzel.

On the rear cover of the portfolio is a color photo of the “ultra-modern frozen foods factory in Israel” where Tivall products are made. Standing in the foreground are 30-40 employees dressed in blue uniforms. Address: Oshrat, Israel. Phone: 04-858700.

2363. Torii, Yasuko. 1990. [Re: New developments with tempeh and natto in Japan]. Letters to William Shurtleff at Soyfoods Center, Sept. 2 and 23. 2 p. Handwritten and typed, with signature. [Jap; eng+]

• **Summary:** In Japan, tempeh has not become popular. Marusan-Ai has stopped making tempeh. What a shame that Mr. Kanasugi, who was so enthusiastic about tempeh, has just passed away. The Tempeh Study Group (Kenkyukai) is still meeting 2-3 times a year and trying to popularize tempeh.

On the other hand, natto is becoming very popular and production is increasing rapidly. Natto groups are sponsoring various events to help popularize natto outside Japan.

Mrs. Torii traveled to Budapest, Hungary in early September to attend an IFOAM Conference on organic farming, which is spreading in Eastern Europe. There she enjoyed tasty chilled tofu (*Hiya-yakko*) and met a person who knows a lot about tofu. At an international agricultural fair, she found that soyfoods were becoming popular. The booths offering roasted soybean snacks and soya burgers were crowded. She saw an attractive soy cookbook containing color photos, and met a man who is translating *The Book of Tofu* into Hungarian. The Kombinat was doing a lot to develop and popularize soyfoods.

In Feb. she went to Indonesia with other members of the Tempeh Study Group to attend a symposium on soybean fermentation. It was very interesting. Address: Kamitsuchidana 324, Ayase-shi, Kanagawa-ken 252, Japan. Phone: 0467-76-0811.

2364. Eberenz, Walter. 1990. Das BBZ Gespraech mit Klaus Kempff [The BBZ spoke with Klaus Kempff]. *Badische Bauern Zeitung (BBZ, Germany)*. Sept. 8. p. 4. [Ger]

• **Summary:** Klaus Kempff is managing director (*Geschaefstfuehrer*) of Life Food GmbH, of Freiburg. We spoke about the food uses of Soya.

BBZ: Mr. Kempff, you manage a company that makes soyfoods. To what extent and from where do you get your soybeans?

Kempff: Five years ago we began to make soya products for human food, and above all tofu, but also smoked tofu, sausages, balls, and pastes (*Würstchen, Klösse, Pasteten*). We presently buy our soybeans from the USA where they are grown organically (*Sie stammen aus kontrolliert biologischem Anbau*). We presently use about 1.5 to 2 metric tons a month [or 18-24 tons a year]. The demand for our products has steadily increased.

BBZ: What guarantees do you have that the American

soybeans are really grown the way they are said to be grown?

Kempff: We buy our soybeans from Arche, a wholesaler, whose owner we know personally. He has been to the USA several times to inspect the soybean he imports. And a guarantee is attached to every sack.

BBZ: Can you imagine ever buying soybeans that are grown in Bavaria—so near to where you work?

Kempff: When we can be sure to get organic quality (*biologische Qualität*), I can imagine buying from Bioland or Demeter, or also contracting for our own soybeans.

BBZ: How much do you pay for organic U.S. soybeans?

Kempff: We presently pay about 1.30 German marks per kg.

A portrait photo shows Klaus Kempff.

2365. Archer Daniels Midland Co. 1990. Annual report. P.O. Box 1470, Decatur, IL 62525. 33 p.

• **Summary:** Net sales for 1990 were \$7,751 million, down 2.3% from 1989. Earnings for 1990 were \$483.5 million, up 13.9% from 1989. Shareholders' equity (net worth) is \$3,573 million, up 17.8% from 1989. “This fifth straight year of record earnings showed good contributions from the Company's core businesses of oilseed, corn, and wheat processing and was aided by initial contributions from some of the new value-added operations... The company operates 121 processing plants in the U.S. and owns, or has an ownership interest in, 25 foreign plants...”

“The protein specialties division expanded both in terms of output and facilities this year. The production of edible soy protein isolates more than doubled this year due to greater market penetration in both domestic and export markets. The production of soy protein concentrates also increased as this product demonstrated its adaptability in food and animal feed products.

“A new facility for the production of industrial soy protein isolates was brought on line in February. These products are used in a variety of markets worldwide, including the paper coating industry. ADM is the only company which produces a complete line of value-added soy proteins.

“ADM has introduced its veggie burger, an all-vegetable protein food product based on soy protein concentrate. This innovative, cholesterol-free, reduced calorie product also contains dietary fiber and appeals to the vegetarian market. Early indications of good acceptance in the U.S. and U.S.S.R. suggest that this product has global potential...”

“ADM Ross & Rowe expanded its facilities this year with the completion of a new lecithin production plant in Decatur, Illinois. The division is now capable of producing modified, enzyme hydrolyzed, complexed and microbiologically pure lecithins” (p. 4-5).

From page 8 to page 15 are four 2-page color photo spreads, each concerning ADM's new Vege Burgers. The text of each reads: London: “Due to the trend toward healthier

eating, many restaurants in Great Britain, including the Hard Rock Cafe in London, offer Vege Burgers as a popular menu choice.” Moscow: “Cafe Vege Burger opened in Moscow in early spring and sales have far exceeded expectations.” Great Britain: “Vege Burgers are sold in a variety of flavors in many retail grocery and health food stores throughout Great Britain.” Decatur, Illinois: “In the Decatur area, several grocery stores and employee cafeterias are now selling veggie burgers to the growing number of health-conscious consumers looking for nutritious, good-tasting food.”

“Haldane Food Group has benefitted from the ongoing trend toward a healthier and more varied diet. A recent Gallup poll which indicates a 150% increase in vegetarians since 1984 helps to explain the emergence of Vege Burger and other TVP products as market leaders. Over 60 million servings of Vege Burgers were sold by Arkady Group companies last year. Production capacity at the Coventry frozen food factory has been supplemented with off-site storage and additional burger manufacturing machinery. Kwaliti Foods, now renamed Saucemasters Ltd., has enjoyed increased sales in a potential growth market, especially with private label businesses. The company’s manufacturing capacity has been expanded with the addition of bottle and jar fillers, labellers, and more off-site storage. Genice Ltd. has introduced an extended range of non-dairy ice creams based on soya isolate, soya milk, or tofu. Yogurt-based ice creams are now being marketed.” Address: Decatur, Illinois.

**2366. Product Name:** Heart & Soul Trim Slice Meatless Cold Cuts [Turkey Style, Roast Beef Style, Ham Style].  
**Manufacturer’s Name:** Gourmet Naturally (Manufacturer). Common Objective Co. (Marketer-Distributor).  
**Manufacturer’s Address:** 1. 5890 Black Welder St., Culver City, CA 90232; 2. P.O. Box 261, Hermosa Beach, CA 90254. Phone: 213-373-5826.

**Date of Introduction:** 1990 September.

**Ingredients:** Turkey Style: Water, vital wheat gluten, tofu, natural flavor, canola oil, natural smoke flavor, salt, herbs and spices, soy oil.

**Wt/Vol., Packaging, Price:** 4 oz (112 gm) paperboard box. Recommended retail: \$1.79 (9/90).

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Andrew Harrison of Common Objective Co. 1990. Sept. 19. The Roast Beef Style and the Ham Style products contain most of the same ingredients, but no tofu.

Press release. Sept. 1990. “Try a slice of life.”

Products with Labels (Turkey, Ham, Roast Beef styles) purchased (\$1.75 each) from Berkeley Natural Grocery Co., California. 1991. Nov. 24. 4.5 by 5 by 5/8-inch paperboard box. Turkey: Red, yellow, green, tan, black, and pink on white, with little pink hearts scattered on the white background. Illustration of two slices of bread, with lettuce,

and the words “Trim Slice” between them. “All natural. 97% fat free. No cholesterol. Trim Slice is completely free of cholesterol content, very low in fat and it tastes terrific in your favorite sandwich combination. Best of all, Trim Slice is a cruelty-free product containing no animal products or animal by-products.” A logo of a turkey in a red circle with a red line diagonally across the cow reads: “No meat. Just wheat.”

Soyfoods Center Product Evaluation. 1991. Nov. 26. Package design: Very good. Flavor and texture: One person rates excellent (9), another rates dislike slightly (4).

Talk with Andrew Harrison, President, Heart & Soul, Common Objective Inc. 1991. Nov. 27. Only three products in this line are currently on the market; they were introduced in Sept. 1990. Two others (Corned Beef Style, and Pastrami Style) are under development and will be introduced soon—even though they are listed on the labels of other products in the line as if they were available now. He owns a company, Gourmet Naturally, which manufactures only Heart & Soul Products, including this product. Legally this company is separate from Heart & Soul, but the two will soon be merging. Andrew’s forte is sales and marketing; he has worked with distributors and brokers in the natural foods industry for 12 years.

**2367. Product Name:** Heart & Soul Tofu Lasagna, and Tofu Enchilada [California, or Mexicali].

**Manufacturer’s Name:** Gourmet Naturally (Manufacturer). Common Objective Co. (Marketer-Distributor).

**Manufacturer’s Address:** 1. 5890 Black Welder St., Culver City, CA 90232; 2. P.O. Box 261, Hermosa Beach, CA 90254. Phone: 213-373-5826.

**Date of Introduction:** 1990 September.

**New Product–Documentation:** Talk with Andrew Harrison, President, Heart & Soul, Common Objective Inc. 1991. Nov. 27. These were Heart & Soul’s first soy products, introduced in March 1989. The first two products contained tofu, and the Mexicali Enchilada contained soy cheese. None of these are on the market any longer.

**2368. Product Name:** Midland Harvest Harvest Burgers (Frozen) [Original, Taco, Italian-Style, or Sausage-Style].

**Manufacturer’s Name:** Harvest Direct, Inc. Made in Decatur, Illinois, by Archer Daniels Midland Co.

**Manufacturer’s Address:** P.O. Box 4514, Decatur, Illinois 62525. Phone: 800-637-5850.

**Date of Introduction:** 1990 September.

**Ingredients:** Water, soy protein concentrate, partially hydrogenated corn and/or soybean and cottonseed oils, isolated soy protein, methylcellulose, natural flavors, onion powder, salt, maltodextrin, modified corn starch, corn syrup solids,...

**Wt/Vol., Packaging, Price:** Four 3.2 oz patties per 12.8 oz pack. Retail for \$1.99 (12/91, Illinois).

**How Stored:** Frozen.

**Nutrition:** Per 3.2 oz.: Calories 140, protein 16 gm, carbohydrate 7 gm, dietary fiber 4 gm, fat 4.5 gm, cholesterol 0 mg, sodium 350 mg, potassium 450 mg.

**New Product–Documentation:** Talk with Richard Gross, owner of Nature’s Oven, Florida. 1991. Sept. 3. Concerning ADM’s new Harvest Burger (a name used only in the USA, called Vege Burger in the USSR and Veggie Burger, made by British Arkady in the UK and sold elsewhere in Europe), Richard finds its texture too tough and chewy (like the sole of a shoe), the flavor a little bit off, and he dislikes their use of methylcellulose as an ingredient (a binder) in the product; it is wood pulp processed with caustic soda and other chemicals, and there is a residue—it is not really natural as ADM claims.

Note 1. This is the earliest English-language document seen (Nov. 2014) that contains the term “Harvest Burgers” (or “Harvest Burger”).

Stewart Reeve. 1991. *Soybean Digest*. Dec. p. 40a. “Fast food delight.” The first test market for this product began in April 1990 in 7 grocery stores, 2 cafeterias, 2 restaurants, and a hospital in four cities in central Illinois.

Two leaflets distributed at Natural Products Expo East in Baltimore, Maryland. 1993. Oct. “How vegetarian are they...?” A color bar chart shows that Harvest Burger contains no animal-based ingredients, Garden Burger from Wholesome & Hearty contains four (low-fat Mozzarella, cottage cheese, egg white blend, cheddar cheese), and Griller from Morningstar Farms (Worthington Foods) contains two (egg white, calcium caseinate). “How do ‘vegetarian’ patties stack up?” Comparing the 3 types of burgers mentioned above (90 gm serving), Harvest Burger is lowest in fat (4.5 gm), in calories (140 gm), and in cholesterol (0; tied with Griller). Garden Burger has the lowest percentage of calories from fat (26%) and the most cholesterol (11.4 mg). Griller contains the most fat (9.8 gm), the most calories (197), the highest percentage of calories from fat (45%), and the most fiber.

Talk with Lee Lensch of ADM. 1994. March 4. In April 1990 ADM started its first “public tasting” of the Harvest Burgers (as frozen patties) in Decatur, Illinois. It took until September 1990 to get packaging for the product, and that month ADM made its first shipment, to Super Value supermarkets in Minneapolis, Minnesota, with Indianapolis being the real focus test market. So ADM sold directly to a supermarket chain, not to a food distributor. In Jan. 1991 the four frozen Midland Harvest products first really hit the grocery store shelves in Indianapolis as a test market. For details, see interview with Lensch (4 March 1994).

Package with Label sent by Dr. Walter Wolf of Peoria, Illinois. 2000. Aug. 5. The package is copyrighted “ADM 1990.”

2369. Maitre, Pierre. 1990. Current European markets for

soyfoods. Lecture presented at Eurosoya Conference. Held 5-7 Sept. 1990 at Strasbourg, France. \*

• **Summary:** The following is summarised from a report by SoyaFoods (1990. 1(2):6-7). France: A study in April 1990 on 2,052 men and women showed that for 33% of respondents the word ‘soya’ was associated with oil. Indeed 66% had not heard of any soyfoods. Of the remaining 34%, only 19% had heard of soyamilk and 19% of soya-based desserts. Tofu and other products were less well known. Some 57% thought soya was a modern product, 66% thought soya was nutritious, and 61% thought soya was good for slimming. The reasons for not consuming soyfoods were given as follows: Never thought about it 45%. Prefer to buy my usual brands 14%. Do not like the taste 14%. Not found in shops 6%. Too expensive 5%.

For those who had tasted soyamilk or desserts, the taste was rated as follows: Soyamilk and other soy drinks: Rather good taste 58%, neither good nor bad 29%, rather bad taste 8%. Desserts: Rather good taste 61%, neither good nor bad 26%, rather bad taste 11%. As a result of this survey in France, SOJAXA is targeting its activities to address the problem of educating the consumer about soyfoods, in particular tofu which is less well known in France than soyamilk and desserts.

The UK: Most large supermarkets carry soyfoods, except Marks and Spencer. The strong interest in vegetarianism has played a major role in the development of the soyfoods market. Vegetarians represent about 8.6% of the population and the vegetarian market is estimated at about £5 billion.

Benelux: The Benelux markets are similar to France. In Belgium there are at least 11 suppliers of soyamilks. The most popular products are drinks and desserts. Higher income groups tend to consume soyfoods.

Germany: Soyfoods are more widely carried in natural food stores (*Biolaeden*) and Reform Houses (*Reformhaeuser*) than in supermarkets. Young German consumers accept soyfoods more readily than French consumers but price is an important factor. German consumers seem to be well informed about products and the best selling items (in descending order of importance) are tofu, sauces, sausages and delicatessen products, milks, and desserts. The following percentages of shoppers in *Biolaeden* and Reform Houses have positive opinions about soyfoods: 70% in the age 20-30 group, 55% in the age 30-40 group, and 65% in the over 40 age group.

“Spain: Soyfoods development is fairly constant in Mediterranean countries such as Spain. All soyfoods are imported and are found in specialist shops, generally associated with dietetic products, e.g. calorie controlled products. Only recently have soyfoods been sold in large supermarkets. The influence of tourism has led to a changed image for soybeans which are perceived as good for health and a modern lifestyle. Current interest is producing new

products which are geared to local tastes. The most common products at present are soya drinks, desserts, sauces and soya sausages. Sales in non-specialist shops are likely to become more important.

“Italy: Soya foods and products containing soya are sold mainly for dietetic reasons.

“In summary Mr. Maître felt that progress had been made over the years in terms of product quality, marketing, product information and international recognition, but there should be no complacency. More will need to be done to stimulate demand in Europe.” Address: 18 Square les Oliviers, 13111 Coudoux–Aix en Provence, France. Phone: 33/43.52.09.44 (fax).

2370. *Soya International (Bar Harbor, Maine)*. 1990. APV Crepaco, Inc. has new machine for vegetable sausage. July/Sept. p. 3.

• **Summary:** “APV Crepaco has introduced a new continuous forming system, the *APV Sintermatic*, for the production of natural sausage, made from animal or vegetable sources—such as soya—without the use of a casing. The system utilizes a cold process... For more information, request APV Crepaco’s brochure #G-1-200 from the company at 100 S. CP Avenue, Lake Mills, Wisconsin 53551, or telephone 414/648-8311.”

2371. *Soya International (Bar Harbor, Maine)*. 1990. Tofu festival held in Taiwan. July/Sept. p. 3.

• **Summary:** “In celebration of the 2169th birthday of the tofu inventor Liu An—King of Huai-nan of the Han Dynasty of China—Taiwan’s tofu industry presented its ‘First Tofu Festival’, on September 15, 1990. The event was held at Taipei Grand Hotel for over 300 attendees. The Tofu Festival was planned to promote further usage of tofu and to spur development of new tofu products, such as tofu ice cream, burgers, etc. The event was sponsored by Dr. T.C. Tung, Chairman of the Chinese Research Foundation of Food and Nutrition, and Dr. Steve Chen, President of the Chinese Nutrition Society, (Director of American Soybean Association/Taiwan). Henry Kao, Senior Advisor to the President of the ROC [Taiwan] was keynote speaker.”

2372. **Product Name:** Soya Nova Soya Sage Rolls.

**Manufacturer’s Name:** Soya Nova Tofu Shop.

**Manufacturer’s Address:** R.R. #2 Rourke Road, C-28, Ganges, Saltspring Island, BC, V0S 1E0, Canada. Phone: 604-537-9651.

**Date of Introduction:** 1990 September.

**Ingredients:** Incl. okara, tofu, brown rice, fresh onions, garlic, carrots, chili peppers (seasonal), olive oil, safflower oil, herbs and spices.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter from Greg Lundh of Silverking Soya Foods in Nelson, BC, Canada. 1990. Dec.

14. Soya Nova Tofu Shop introduced this product in Sept. 1990. Labels are not yet available.

Talk with Debbie Lauzon. 1990. Dec. 28. “I now have a really cute little cottage industry. I met a master pastry chef from France named Pascal Pellerin. He worked at Tassajara in California for a while. When I saw that he was unemployed I put him at work in the tofu shop. We came up with some really nice Soyasage Rolls... They use okara and are made in French puff pastry and can be sold frozen. Just bake and serve. The inside has okara, tofu, brown rice, olive oil, herbs, spices, etc.”

Leaflet sent by Deborah Lauzon. 1991. Feb. 6. “Soya Nova Tofu Shop.” Describes the rolls and lists ingredients.

2373. Stievenard, Mr. 1990. Concentrating soya milk by ultrafiltration. Lecture presented at Eurosoya Conference. Held 5-7 Sept. 1990 at Strasbourg, France. \*

• **Summary:** The initial soymilk contains 4% solids at 80°C. Ultrafiltration is conducted using a carbon / zirconium membrane with a process control factor of 3.5 at 80°C. The resulting concentrated milk, which now contains 12% protein, is cooled in a chamber. It is then heated to 55-80°C, conditioned, and chilled. The concentrated contains 12% solids and at 4°C its texture is that of a gel. The typical composition of the final product is: dry matter 22.8%, protein 12.7%, lipids 7.4%, and carbohydrate 1.2%. Compared with normal soyamilk, concentrated soyamilk has higher levels of phosphorus, calcium, and magnesium, and lower levels of the flatulence-causing oligosaccharides saccharose, stachyose, and raffinose. Applications of concentrated soyamilk include soya ice creams, pâtés, sausages, salad dressings, mayonnaise, and ready meals. Address: Cacoja, France.

2374. **Product Name:** Meatless Healthy Bologna (Made with Tofu).

**Manufacturer’s Name:** White Wave, Inc.

**Manufacturer’s Address:** 1990 North 57th Court, Boulder, CO 80301.

**Date of Introduction:** 1990 September.

**Ingredients:** Organic tofu [water, soybeans, gypsum, nigari (magnesium chloride)], soy oil, wheat gluten, egg white, tapioca starch, wheat germ, soy sauce (water, soybeans, whole wheat, salt), dried yeast, natural liquid hickory smoke, garlic powder, spices, natural flavor, beet powder and oleoresin paprika for color. “No more, no less.”

**Wt/Vol., Packaging, Price:** 5.5 oz (156 gm) vacuum pack. Retail for \$2.10 (10/90, California).

**How Stored:** Refrigerated.

**Nutrition:** Per 1.5 oz.: Calories 120, protein 7 gm, carbohydrates 5 gm, fat 8 gm (polyunsaturated 7 gm; saturated 1 gm), cholesterol 0 mg, sodium 340 mg.

**New Product–Documentation:** Talk with Steve Demos. 1989. May 13. This product will be officially launched in

Sept. Talk with Steve Demos. 1989. Nov. 1. The term Links need not be approved by the FDA. Anyone can use the term. The product is not yet out, nor has it been in any interstate sales yet. It is made in Denver. It should be out soon, probably by mid-December.

Label obtained at White Wave booth at World Vegetarian Day in San Francisco. 1990. Oct. 6. 5 by 7 inches. Flat vacuum pack with see-through front. Red, black, and yellow on white. "Cholesterol-free! Great for kids! Hearty luncheon slices." Talk with Lon Stromnes. 1990. Oct. 6. The product was introduced in Sept. 1990. Recommended retail is about \$2.10.

**2375. Product Name:** Soya Burgers, Soy Milk [Chocolate, Cardamom, Vanilla, or Plain].

**Manufacturer's Name:** Lisa Camps.

**Manufacturer's Address:** 1694 Ouneachem Baht, Anjuna Bardez, Goa, India 403-507. Phone: 0091-0832-2273648.

**Date of Introduction:** 1990 October.

**Ingredients:** Soya Burgers: Okara, potato to bind, onion, garlic, capsicum; breaded with bread crumbs then deep fried in olive oil. Served with Cole Slaw and Hummus.

**Wt/Vol., Packaging, Price:** Burgers: Served on a plate to eat on site or take away in waxed paper. Price: 50/- rupees. Soya milk: Packed in 250 ml milk grade biodegradable bags, sealed with a machine, served with a straw-poked a hole in the bag. Price: 10/- rupees.

**New Product-Documentation:** Letter (e-mail) from Lisa Camps of Goa. 2005. May 15-17. These products were introduced in about 1990. In 1989-90. Lisa decided to settle in Goa. She ran a lingerie business and also sold soya burgers, hummus brown bread, and 4 flavors of soy milk every Wednesday in the Anjuna Flea Market, where she had a food stall; she made these in her home kitchen at 1694 Ouneachem Baht, Anjuna Bardez, Goa, India 403-507.

Letter (e-mail) from Lisa Camps. 2005. July 16. Lisa is not aware of anyone who sold soya burgers or soy milk in Goa before she did. These products were introduced in Oct. 1990; the season in Goa starts in October and ends in April. The business had no name at that time; it was just a nameless stall in the local market.

\*

**2376. Product Name:** [Biosoja Soja Delights: Tofu Lasagna].

**Foreign Name:** Biosoja Soja Delights.

**Manufacturer's Name:** Sojinal. Affiliate of Cooperative Agricole de Colmar (CAC) (Marketer).

**Manufacturer's Address:** 8 rue Merxheim, 68500 Issenheim, France. Phone: 89 74 53 53.

**Date of Introduction:** 1990 October.

**Wt/Vol., Packaging, Price:** 300 gm can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product-Documentation:** Spot in SoyaFoods. 1991.

Spring. p. 5. "Ready meals from Biosoja." Tofu Lasagna, introduced at SIAL in Paris (Oct. 1990), supplements the company's existing line of 3 Soya Deli company's existing range of Soyabean Delights products which includes Financière Sauce, Basmati Rice and Curry Sauce, and Tofu Ravioli. These are portion controlled soya-based ready meals for one person. Each meal is available in a 300 gm can and contains less than 300 calories.

SoyaFoods. 1992. Autumn. p. 7. "A profile of Sojinal." See Table 2. "Biosoja retail food products." Canned ready meals with less than 300 calories.

**2377. Product Name:** Garden Delight: Cutlets, Nuggets, Burgers, and Spicy Burgers.

**Manufacturer's Name:** Tivall.

**Manufacturer's Address:** Kibbutz Lochamei Hageaot, Mobile Post, Oshrat 25220, Israel. Phone: 00972-4-858700.

**Date of Introduction:** 1990 October.

**New Product-Documentation:** Spot in SoyaFoods. 1991. Spring. p. 4. "Lite foods from Tivall." "A new range of frozen 'lite' products called Garden Delight have been launched in the UK by Tivall. Manufactured from soya and wheat protein, Garden Delight cutlets (400 gm), nuggets (300 gm), burgers (300 gm), and spicy burgers (227 gm) are reduced in calories and low in fat. Similar products have been very successful in Israel and are also due to be launched in the Netherlands."

**2378. Worthington Foods, Inc.** 1990. Morningstar Farms: The foods you love... Only healthier. 900 Proprietors Rd., Worthington, OH 43085. 4 panels. Catalog. Undated (But Oct. 1990). 28 cm.

• **Summary:** Contents: Scramblers: Cholesterol-free real egg product. Morningstar Farms: Cholesterol-free meatless products. Morningstar Farms: The most complete line of cholesterol-free foods: Scramblers, Breakfast Links, Breakfast Patties, Breakfast Strips, and Grillers. Address: Worthington, Ohio. Phone: (614) 885-9511.

**2379. Contra Costa Times (California).** 1990. A perfect turkey for California? Nov. 28.

• **Summary:** "News Item No. 2: Thanksgiving passes peacefully among the 15,000 residents of Arcata, where a new California trend-tofu turkey-is hatching for the holidays."

"The Tofu Shop's warm-and-serve ersatz turkey is flavored with a secret blend of spices and herbs, and comes in sizes up to 25 pounds. There's 'stuffing' and 'pumpkin pie' also fashioned from-you guessed it-the mushy, malleable staple of millions of Japanese."

**2380. Ashland Soy Works-Soy Deli.** 1990. November. New soyfoods restaurant or deli. 225 Water St., Ashland, OR 97520.

• **Summary:** Menu brought by Claire Wickens. 1991. Oct. 14. "Its just a few steps to delicious gourmet tofu." "The Soy Deli serves lunches, dinners, snacks, and desserts. Take out or eat in. Burritos, lasagna, chili, salads, tofu burgers, eggless salad sandwiches, deep fried tofu, hot tofu loaf sandwiches. Our cheesecakes are famous: fruit topping, chocolate peanut butter, double chocolate mousse. No meat, eggs, or dairy. Extra lite lunch specialties: Eggless salad, Malibu salad. Fresh pyramid juices, coffee and tea. Ready to eat—try our packaged tofu products: Oregon baked tofu. Curry baked tofu. BBQ baked tofu. Tofu (meatless) loaf. Sunny eggless salad. Fortune bread, and the famous Tofu burger." On the back of the menu are three tofu recipes: Tofu stroganoff. Tofu-spinach balls. Creamy poppy dressing.

Talk with James Muhs. 1991. Oct. 14. Ashland Soy Works moved to 225 Water St. in Aug. 1990, and they opened the Soy Deli in Nov. 1990. Address: Ashland, Oregon. Phone: 503-482-1865.

2381. **Product Name:** Legume Vegetarian Franks & Beans. **Manufacturer's Name:** Legume, Inc. **Manufacturer's Address:** 116 Fairfield Rd., Fairfield, NJ 07006. Phone: 201-263-1013.

**Date of Introduction:** 1990 November.

**Ingredients:** Navy beans, water, tomato paste, organic tofu\* [organically grown soybeans\*, water, calcium sulfate (a naturally mined earth mineral)], sweet potato puree, apple cider vinegar, canola oil, molasses, honey, tamari soy sauce (water, soybeans, sea salt), onion, soy oil, isolated soy protein, mustard powder, garlic, spices, natural flavors, sea salt, beet powder, paprika oil, guar gum. \* = Grown in accordance with California Health & Safety Code 26569.11.

**Wt/Vol., Packaging, Price:** 9 oz plastic bag (boil-in-the bag).

**How Stored:** Frozen.

**New Product—Documentation:** Talk with Gary Barat. 1990. Oct. 31. Legume is now introducing 7 new boil-in-the-bag products. All are non-dairy, cholesterol-free. The word "tofu" does not appear on the front panel of any of the products because a huge segment of the American population does not have a positive image of tofu. These products will sell for about \$1 less each than the old Legume products. They will sell the products where they do not need to pay slotting allowances, as in Southern California where 15-20% of the company's total business now is. Business is way up in the kosher market. All will be introduced at the Natural Foods Merchandiser show in Philadelphia this weekend.

Label sent by Gary Barat. 1990. Oct. 31. by 5.5 by 1.5 inches. Paperboard box. Green, white, and black. Full-color photo of the product in a white dish. "Low fat. No cholesterol. Microwaveable. All natural. Legume main courses."

2382. **Product Name:** Legume Vegetarian Chili.

**Manufacturer's Name:** Legume, Inc.

**Manufacturer's Address:** 116 Fairfield Rd., Fairfield, NJ 07006. Phone: 201-263-1013.

**Date of Introduction:** 1990 November.

**Ingredients:** Tomatoes, water, black beans, red chile beans, onion, corn, organic\* tofu [water, organically grown\* soybeans, magnesium chloride (nigari)], tomato puree, canola oil, sweet potato puree, tamari soy sauce (water, soybeans, sea salt), chile powder, garlic, natural flavors, spices, sea salt. \* = Grown in accordance with California Health & Safety Code 26569.11.

**Wt/Vol., Packaging, Price:** 10 oz plastic bag (boil-in-the bag).

**How Stored:** Frozen.

**New Product—Documentation:** Talk with Gary Barat. 1990. Oct. 31. This weekend at the Natural Foods Merchandiser show in Philadelphia, Legume will introducing 7 new boil-in-the-bag products.

Label sent by Gary Barat. 1990. Oct. 31. by 5.5 by 1.5 inches. Paperboard box. Green, white, and black. Full-color photo of the product in a white dish. "Low fat. No cholesterol. Microwaveable. All natural. Legume main courses."

2383. Tofu Shop (The). 1990. Restaurant: Holiday special tofu turkey (Ad). *Northcoast Holidays (Regional Visitor Publications, Eureka, California)*. p. 36.

• **Summary:** A half-page vertical ad. Graphics: At the top of the ad is a black and white photo of a bearded man cutting a large block of tofu into cakes. Near the middle (vertically) is an illustration of the front of the Deli.

Upper text: "In business since 1977, the Tofu Shop has been making hand-crafted tofu for over a decade."

The lower half of the vertical ad is an ad (on a dark background) for "Holiday special Tofu Turkey." "Order one of our delicious Tofu Turkeys.

"Pumpkin tofu pie! Try this non-dairy alternative. Delicious, cholesterol-free and baked in a wholewheat crust. Small 6 oz. \$1.55. Large 9" (special order) \$5.95.

"Not 'n Natural Tofu Turkey dinners! Served at our deli beginning Sunday, Nov. 15, includes hot slice of tofu turkey, stuffing, gravy, cranberry sauce & salad. \$5.25.

Hours: Mon-Sat 8-8. Sun 11-6. Address: 768 18th St., Arcata, California. Phone: 822-7409.

2384. Tofu Shop (The). 1990. This holiday season, make it Tofu Turkey (Leaflet). Arcata, California. 1 p. Front and back. 22 x 14 cm.

• **Summary:** Typeset, dark green on beige, with four illustrations. Identical to the 1989 leaflet / sell sheet, except for the colors and some new product sizes: Tofu Turkeys now come in small (2-3 servings) \$7.50. Tofu-Turkeys stuffing now comes ½ pint \$1.95. Address: 768 18th St., Arcata, California.

2385. Roberts, Peter. 1990. History of Direct Foods Ltd. and Compassion in World Farming. Part II (Interview). *SoyaScan Notes*. Dec. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In about 1970 Direct Foods launched 20 more convenience (add water, cook, and serve) vegetarian protein products, all were TVP-based alternatives to meat sold under the Ranch House brand. These included Curry, Stew, Goulash, Bolognese, Vegetable Mince, Soysage, Seasavour, Sizzleberg, Sosmix, Savoury Macaroni Mix. etc. All were vegan products except the bolognese, which contained milk powder, but even the milk was soon eliminated, so that all products were vegan. etc. Anna wrote three cookbooks, with even more recipes: (1) *The Earth Shall Feed Us* (1976; now out of print); (2) *The Protoveg Cookbook* (1984, which sold about 8,000 copies via mail order and health food shops; now out of print); and (3) *The Magic Bean* (April 1985, published and distributed more widely by Thorsons). These were sold in both health food stores and regular bookstores.

At this time British Arkady was making a product named Banger Mix (a “banger” is a sausage), made with soya protein and pig fat. Peter asked them to replace the pig fat with a hardened vegetable oil. The Roberts named the resulting product Sosmix. Introduced in about 1970, it was a dry sausage mix and soon became their best-seller. Because Sosmix became such a success, British Arkady invited Direct Foods to market Arkady’s new vegetarian Burger Mix. Direct Foods accepted and again the product did well. Shortly after that, in about 1972, Brewhurst Health Food Supplies Ltd., the biggest health food distributor in the UK, asked if they could distribute the Direct Foods line of products. Direct Foods appointed Brewhurst as their first distributor, but did not give them an exclusive distributorship. This was a major breakthrough; sales tripled almost immediately. Soon Direct Foods appointed other distributors, and exporters, that exported to Jamaica, Malta, and Greece. So Direct Foods remained a product developer, marketer, and mail-order house.

In 1973 British Arkady started making TVP in England, then in 1974 they were acquired by ADM, largely because ADM had seen the rapid growth of the European TVP market, especially among food manufacturers. Most of Arkady’s TVP was being sold to food manufacturers (for use in canned stews, etc.) and institutional foodservice, not to retailers.

The Roberts continue to run their growing business out of their home. The kitchen was the weighing room, the lounge was the dispatch room, and the rest of the house became the warehouse. There was no room left for the Roberts. Moreover, with a steady stream of delivery trucks coming down their narrow country dead-end road, they began to have problems with the town planning authorities. So in about 1974 they rented a warehouse for Direct Foods

in Petersfield, about 5 miles away from Greatham—and breathed a sigh of relief at home. At this time their best-selling products were Sosmix, Protoveg Beef Chunks, and Beef Mince. Sales began to grow rapidly. For a short while, Brian Welsby’s Haldane Foods did the mixing of the Ranch House line of products under contract.

In about 1976 and 1977 Direct Foods participated in its first exhibition, the huge Ideal Home Exhibition, which runs for a month every spring at Olympia in London. They served samples of Sosmix, which was an entirely new product for the British public, and it was a great success. Long lines of people were attracted by the smell, then won over by the ease of preparation, low price (less than half the price of eat sausage), and health benefits of this meatless sausage.

Direct Foods’ first competitor was Itona (pronounced ai-TOE-nuh), which by 1978 had started buying TVP from Arkady and selling it as Itona TVP. Itona had purchased other soy products (probably soy flour) from Arkady before this. At one stage, they tried to make an agreement with Arkady which would have forced Direct Foods to buy from Itona, but this did not work.

Another strong competitor was Real Foods in Edinburgh, Scotland. They sold flavored TVP in 50 kg paper sacks to health food shops so that the shops could weigh out any amount the customer desired. This approach lowers the price of TVP to the consumer but in the end hurts the market due to lack of recipe information. After a while Real Foods disappeared.

In about 1979 the Roberts started their own health food store, named The Bran Tub, in Petersfield. In England a “bran tub” is sort of like a “lucky dip” where kids dive for presents.

Over the years Direct Foods had many problems with local regulators concerning labeling—but won in every case. One thought Protoveg was misbranded because the label said it was a vegetarian product but it contained salt—which was a mineral not a vegetable! Another tried to outlaw the term Sosmix because it sounded too much like sausage. The most important was when the public health authority took Direct Foods to court claiming that the term “Vegetable Goulash” was a contradiction in terms since “goulash” typically contained meat. Peter argued the 4-hour case himself and his victory set a major precedent. Representatives from many large food companies were present in the courtroom, and they congratulated Peter afterwards.

In March 1985 the Roberts sold Direct Foods (which was making good money) to British Arkady. Arkady had tried to sell their Arkady TVP to the retail trade through the Cash and Carry chain but had failed—at considerable expense to Arkady. Now Arkady wanted to buy either a majority share in Direct Foods or buy the entire company. Peter knew that if he said “no,” Arkady was in a position to undercut Direct Foods and take away much of their market share. A major loss of market share would be a disaster,

since Direct Foods' sales would then drop below the steadily rising threshold needed to cover their overhead and make a profit. Moreover, the Roberts wanted to spend more time concentrating on their animal welfare work through Compassion in World Farming. During the period from 1969 to 1985 Peter had devoted about 2/3 of his work time to CIWF and 1/3 to Direct Foods. Direct Foods was run mainly by Anna Roberts (who put in about the same amount of time as Peter), her sister, and her sister's husband, Bob Howe, who was production manager at the mixing and packaging warehouse. At the time of the sale Direct Food had 18 employees and was buying 30 tons a week of TVP from British Arkady. Address: Compassion in World Farming, 20 Lavant St., Petersfield, Haunts (Hampshire) GU32 3EW, England. Phone: 0730 64208.

2386. McNichol, Bethanye. 1990. His beef with meat: Vegetarian doctor argues for a plant-based diet—not just to improve personal well-being, but also to help save dwindling water and topsoil. *Oregonian (The) (Portland, Oregon)*. Dec. 25.

• **Summary:** A photo shows Dr. Michael Klaper.

Note: This is the earliest English-Language document seen (Nov. 2014) with the term “plant-based diet” (or “plant-based diets”) in the title. Address: Sent by Klaper in his “Physician for the Planet” leaflet 1991.

2387. Dacosta, Yves. 1990. Lait de soja et tofu [Soy milk and tofu]. APRIA/CDIUPA, 1 avenue des Olympiades, 91300 Massy, France. 102 p. Dec. No index. 30 cm. Series: Actualités Scientifiques et Techniques en Industries Agro-Alimentaires. No. 45. [85 ref. Fre]

• **Summary:** Contents: Preliminary remarks. 1. Production of soy milk and tofu: Principles of production, the soybeans, cleaning/washing, soaking, grinding, cooking the slurry (*bouillie*), extraction of the soy milk, coagulation, separation of curds and whey, pressing the curds, removal of the tofu from the mold, cutting and packing the tofu, the need for water in a tofu shop, variations in production, storage and preservation of soy milk and tofu after their production, yuba, production of tofu from seeds other than soybeans.

2. Applications/uses of soy milk and tofu: Products: Soy milk and soy milk products (soy milk, sweetened soy beverages, dairylike soy milks, soy-based infant formulas, powdered soy milk, concentrated soy milks, soy milk mixed with other animal or vegetable milks, soy ice creams and frozen desserts, fermented soy milk products such as soy yogurt, various soy milk desserts [such as custards], sauces, dressings, and mayonnaises made from soy milk), tofu and tofu products (smoked tofu, fried tofu [*tofu frit*], marinated tofu, fermented tofu, breaded tofu, tofu mayonnaise and sauces, tofu spreads for bread, tofu sausages, pâtés, or biscuits/pancakes [*galettes*], tofu quenelles, quiches, fritters, raviolis, pizzas, mixed salads, prepared dishes (*plats*

*cuisinés*), or sandwiches, tofu cakes, cheesecakes, or tarts, tofu desserts, ice creams, or chocolate bars), preparations based on okara (sausages, pâtés, croquettes, burgers, special breads or biscuits), the nutritional arguments for soy milk and tofu (rich in proteins, lipids, absence of cholesterol and lactose, low in sodium, an excellent ingredient in “light foods” [*aliments allégés*]).

3. A quick look at the major enterprises making and or selling soy milk, tofu, or their products in selected countries: France (Cacoja, Innoval, Soy [Société Soy], Sojadoc, Triballat, Celia, Celnat, Lima-Andiran, Maho Distribution, France-Proteines-Services), Great Britain (Plamil Foods Ltd., Itona Products Ltd., Soya Health Foods Ltd., British Arkady Co. Ltd. [subsidiary of ADM; incl. Haldane Foods Ltd., Regular Tofu Co., Tofeata Tofu], Granose Foods Ltd., Cauldron Foods, Dragon and Phoenix, Paul Jones (Tofu Shop), Full of Beans Soyfoods, Birchwood Health Products, White Waves, The Bean Machine Co-op Ltd., St. Ivel, St. Giles Foods Ltd., Yu's Tofu Shop, Tousoy Ltd., Allied Foods Ice Cream Co., Nexus Foods, Vegetarian Feasts, Unisoy Milk and By-Products Ltd.), Germany (DE-VAU-GE Gesundheitswerk GmbH, Soyastern Naturkost GmbH, Nuxo-Werke Rothfritz), Netherlands (Heuschen-Schrouff, Linn Oriental Products, Solnuts B.V., Manna Natuurvoeding), Belgium (Alpro, Jonathan P.V.B.A., Lima Foods, De Hobbit, Seven Arrows), Switzerland (Conserves Estavayer S.A., Soyana, Galactina), Sweden (Trensums Musteri, Aros Sojaprodukter), Italy (Crivellaro), Spain (Zuaitzo), USA, Japan, Hong Kong, Taiwan, Singapore. Bibliography.

Note: A great deal of the information in this report is taken, without permission or adequate citation, from books published by the Soyfoods Center in California. The statistics and dates given for the European, American, and Asian markets are taken almost completely from Soyfoods Center books. In some cases where the author relied on these books published more than 2 years ago, the information is presented as if it were current, whereas it is actually out of date and no longer correct. Dacosta's book, which might be called a “review of the literature,” contains little or no new information. However his bibliography, based largely on a search of the CDIUPA database, with some original references, is quite good.

APRIA stands for Association pour la Promotion Industrie Agricole. APRIA administers CDIUPA. Address: Conseiller d'Entreprises, France: 47, rue Guersant-7015 Paris, France.

2388. **Product Name:** Midland Harvest Taco Filling 'n Dip (Dry Taco Mix Based on Textured Soy Protein Concentrate).

**Manufacturer's Name:** Harvest Direct, Inc. Made in Decatur, Illinois, by Archer Daniels Midland Co.

**Manufacturer's Address:** P.O. Box 4514, Decatur, Illinois 62525. Phone: 800-637-5850.

**Date of Introduction:** 1990 December.

**Ingredients:** Soy protein concentrate [textured], corn starch, dried onion, partially hydrogenated corn and/or soybean and cottonseed oils, maltodextrin, tomato paste, spices, salt, hydrolyzed vegetable protein, garlic powder, natural flavor, malt extract, zinc oxide, niacinamide, ferrous sulfate, copper gluconate, vitamin A palmitate, calcium pantothenate, thiamine mononitrate (vitamin B-1), pyridoxine hydrochloride (vitamin B-6), riboflavin (vitamin B-2), cyanocobalamin (vitamin B-12).

**Wt/Vol., Packaging, Price:** 4 oz foil pouch.

**How Stored:** Shelf stable.

**Nutrition:** Original: Per 21.25 gm dry (5 servings per packet): Calories 100, protein 8 gm, carbohydrates 8 gm, total dietary fiber 1 gm, fat (total) 1.7 gm (saturates 0.5 gm, monounsaturates 1.0 gm, polyunsaturates 0.2 gm), cholesterol 0 mg, sodium 280 mg, potassium 390 mg.

**New Product–Documentation:** Stewart Reeve. 1991. *Soybean Digest*. Dec. p. 40a. “Fast food delight.” Talk with Lee Lensch, 1991, Dec. 16. This product is sold only through ADM’s direct mail company named Harvest Direct. The company sells only ADM’s dry mixes. The company began operation in Dec. 1990, and this product was introduced at that time. The 4 oz of dry mix makes 16 oz (1 lb) of finished product—just add water and mix.

Ad in *Vegetarian Times*. 1992. Jan. p. 16. “Harvest’s got it!” “Midland Harvest now comes in seven flavors: Original, Taco, Herbs and Spice, Curry, Italian, Sloppy Joe Fixin’s, and Chili Fixin’s. Call Harvest Direct at 1-800-835-2867 for a free 16-page catalog.”

Label sent by ADM. 1991. Dec. 17. 5.25 by 3.75 inches. Self adhesive. Red on white. “Cholesterol free. Low fat. All-vegetable protein. Microwaveable. A delicious Taco entree, based on a savory blend of textured soy protein concentrate and traditional taco flavors. The only ingredients you add are water and your imagination for variations. The result is tasty loose “ground meat” type Taco filling. The Taco filling can be used for tacos, enchiladas, tostados, dips, sauces, chili, sloppy Joes, and many other dishes.”

**2389. Product Name:** Midland Harvest Burger ‘n Loaf (Dry Mix Based on Textured Soy Protein Concentrate) [Original, Herb and Spices Style, Italian Style].

**Manufacturer’s Name:** Harvest Direct, Inc. Made in Decatur, Illinois, by Archer Daniels Midland Co.

**Manufacturer’s Address:** P.O. Box 4514, Decatur, Illinois 62525. Phone: 800-637-5850.

**Date of Introduction:** 1990 December.

**Ingredients:** Original: Soy protein concentrate [textured], partially hydrogenated corn and/or soybean and cottonseed oils, isolated soy protein, natural flavors, methylcellulose, malt extract, dried onion, salt, dried garlic, black pepper, beet powder, spices, zinc oxide, niacinamide, ferrous sulfate, copper gluconate, vitamin A palmitate, calcium pantothenate, thiamine mononitrate (vitamin B-1),

pyridoxine hydrochloride (vitamin B-6), riboflavin (vitamin B-2), cyanocobalamin (vitamin B-12).

**Wt/Vol., Packaging, Price:** 6 oz foil pouch.

**How Stored:** Shelf stable.

**Nutrition:** Original: Per 34 gm dry (5 servings per packet): Calories 140, protein 16 gm, carbohydrates 7 gm, total dietary fiber 4 gm, fat (total) 4.5 gm (saturates 1.3 gm, monounsaturates 2.7 gm, polyunsaturates 0.5 gm), cholesterol 0 mg, sodium 350 mg, potassium 450 mg.

**New Product–Documentation:** Stewart Reeve. 1991. *Soybean Digest*. Dec. p. 40a. “Fast food delight.” Talk with Lee Lensch, 1991, Dec. 16. This product is sold only through ADM’s direct mail company named Harvest Direct. The company sells only ADM’s dry mixes. The company began operation in Dec. 1990, and this product was introduced at that time. ADM hopes to also sell it through retail stores, but there is no firm timetable. The 6 oz of dry mix makes 16 oz (1 lb) of finished product—just add water and mix.

Ad in *Vegetarian Times*. 1992. Jan. p. 16. “Harvest’s got it!” “Midland Harvest now comes in seven flavors: Original, Taco, Herbs and Spice, Curry, Italian, Sloppy Joe Fixin’s, and Chili Fixin’s. Call Harvest Direct at 1-800-835-2867 for a free 16-page catalog.”

Labels for Original, Italian Style, and Herb and Spices Style sent by ADM. 1991. Dec. 17. 5.25 by 3.75 inches. Self adhesive. Original: Blue and black on white. “Cholesterol free. Low fat. All-vegetable protein. Microwaveable. A delicious cholesterol-free entree that is based on a savory blend of textured soy protein concentrate with natural flavorings. The Burger ‘n Loaf mix can be used in a multitude of recipes: make burgers, loafs, spaghetti balls, or any recipe where ground meat is used.”

**2390. Product Name:** Health Burger Mix (Dry Mix) [“Sausage” Flavor or Grille Flavor].

**Manufacturer’s Name:** Mission Foods.

**Manufacturer’s Address:** 2205 Highway 66, P.O. Box 3075, Ashland, OR 97520. Phone: 503-488-2451.

**Date of Introduction:** 1990 December.

**Ingredients:** TVP–soy flour [fortified with zinc (oxide), iron (ferrous sulfate), vitamin B-3 (niacinimide [niacinamide]), calcium (pantothenate), vitamin B-6 (pyridoxine hydrochloride), vitamin B-2 (riboflavin), vitamin B-1 (thiamin hydrochloride), vitamin A (palmitate), vitamin B-12], rolled oats, soybean oil, parsley, onion salt, caramel and certified color, natural and artificial flavorings, hydrolyzed vegetable protein. No MSG or animal products used.

**Wt/Vol., Packaging, Price:** 8 oz plastic Ziploc bag. Makes 1 lb.

**How Stored:** Shelf stable.

**Nutrition:** Per 2 oz ready to eat meatless serving: Calories 198, protein 19 gm, carbohydrates 25 gm (Dietary fiber 8.2 gm), total fat 2.8 gm (% calories from fat 12% vs 64%

for beef burger; saturated fat 0.25 gm), cholesterol 0 mg, calcium 75 mg, copper 0.6 mg, iron 7.7 mg, potassium 925 mg, sodium 138 mg, zinc 8.6 mg.

**New Product–Documentation:** Talk with Clyde Boismenu of Basic Foods. 1991. March 7. Robin and Paul Noll are marketing a product that looks something like what Fantastic Foods has done. Its a dry product.

Talk with Robin Noll. 1991. March 7. This product was introduced in test market in Dec. 1990. Their organization, whose official name is simply “Mission,” is a portable mission, a church on wheels in the form of a bus. They provide local soup kitchen service.

Label with sample, letter, photo of bus, and leaflet sent by Robin Noll. 1991. March 8. Label. 4.75 by 1.6 inches. Black, white, pink, and orange on yellow. Illustration of 3 angels holding a large heart, in the middle of which is written, “Cholesterol-free! High fiber and protein. Low sodium & fat!” The label also states: “Quick & easy! Use with or without ground meat. Needs no refrigeration. 8 oz. makes 1 lb.”

The leaflet (8.5 by 11 inches, black on tan) states that Health Burger is “Made with Profibertine, combining protein and fiber in a unique way... Ideal for folks allergic to wheat (and gluten) eggs and dairy products, or who want to reduce their fat, cholesterol and salt intake while adding high quality protein and fiber.” Then it lists “Four easy ways to use Burger Mix,” gives a typical nutritional analysis and compares it to beef. “Diabetic exchanges: Equal to 2 lean meats and one bread portion.”

The letter notes: “Although we have sold 8 oz. retail packages for test-marketing purposes as well as frozen burgers for local hospital use, we really would like to specialize in the 25 lb. bulk boxes (@\$1.50/lb = \$37.50 F.O.B. Ashland)... We have a full range of dry textured soy products available that we broker for the Pacific Northwest, as well as carrying the Chewy Lumen/Heartline products... We are considering relocating to the Eugene area this summer.”

Talk with Robin Noll. 1991. March 12. TVP (made by ADM) is NOT one of the ingredients. The Nolls buy textured soy flour in the form of flavored bits from PMS Foods in Kansas. The Nolls use a process developed by Paul (an inventor) to mix these bits with oats and grains so that the grain fiber combines with the soy to yield Profibertine, a unique product made and trademarked only by them. They fund their work from their savings. Their children are grown up and they wanted to do something they enjoyed and believed in. It is not yet supporting itself. They are too small to ask for county funding. Meals on Wheels does not like soy products.

2391. Shurtleff, William; Aoyagi, Akiko. 1990. Tofu & soymilk production. 2nd ed. Lafayette, California: Soyfoods Center. 336 p. Illust. by Akiko Aoyagi Shurtleff. Index. Dec.

11. 28 cm. [223 ref]

• **Summary:** Contains many new advertisements, plus changes on the copyright page, on page 14 (Soyfoods Association in now located at Bar Harbor, Maine), and rear cover of both paperback and hardcover editions (new ISBN for each). Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

2392. **Product Name:** Lalita’s Vegetarian Lasagna.

**Manufacturer’s Name:** Surrey International.

**Manufacturer’s Address:** North Arlington, New Jersey.

**Date of Introduction:** 1990 December.

**Ingredients:** Organic whole wheat pasta, spinach, mushrooms, pureed vegetable, textured vegetable protein. Topped with soy cheese and marinara sauce.

**Wt/Vol., Packaging, Price:** 12 oz.

**How Stored:** Frozen.

**New Product–Documentation:** Soya International. 1990. July/Sept. p. 4.

2393. **Product Name:** [Artisanal Tofu Burgers (From the Forests, Indian, Pumpkin, Buckwheat, From the Sea, From Provence, From the Mountains)].

**Foreign Name:** Galettes Artisanales au Tofou (Forestières, Indiennes, Potimarron, Sarrasines, Marinières, Provençales, Montagnes).

**Manufacturer’s Name:** Tofoulie.

**Manufacturer’s Address:** St. Pierre, 26560 Séderon, France. Phone: 75-28-55-05.

**Date of Introduction:** 1990 December.

**Ingredients:** Tofou\* 77%, mushrooms from Paris\* 32%, rolled oats\*, onions\*, shoyu\*, sunflower oil\*, herbs and spices\*, unrefined salt, garlic\*. \* = Organically grown (*Ingrédient issu de l’agriculture biologique*).

**Wt/Vol., Packaging, Price:** 200 gm plastic bag.

**How Stored:** Refrigerated (store at 4°C).

**Nutrition:** Per 100 gm.: Fats (lipids) 7.6 gm, protein 13.5 gm, carbohydrates (glucides) 7.3 gm, calories (Kcal) 152 (635 kJoules).

**New Product–Documentation:** Form filled out and Label sent by Joel Pichon. 1996. June 14. His company started making tofu burgers in Dec. 1990, and now makes 3,700 lb/month. Label is a yellowish-white transparent heavy plastic bag, printed with brown and green letters. Near the bottom of the back panel is a UPC indicia. Below that are two logos, one for recycling. Between the logos is written: *Produit de l’agriculture biologique. Système de contrôle CEE, Ecocert 31076 Toulouse Cedex.*

Letter from Michel Claude and Joël Pichon in response to questions from William Shurtleff of Soyfoods Center. 1996. July 4. Their company now produces 7 different flavors of tofu burgers; a package with Label for each flavor is enclosed. On average the following amounts of each flavor are produced (in kg/month): From the Forests 400, Indian

450, Chestnut 400, Buckwheat 250, From the Sea 250, From Provence 350, From the Mountains (300).

2394. **Product Name:** Meatless Bologna Luncheon Slices.  
**Manufacturer's Name:** White Wave, Inc.  
**Manufacturer's Address:** 1990 N. 57th Ct., Boulder, CO

80301. Phone: 303-443-3470.

**Date of Introduction:** 1990 December.

**How Stored:** Refrigerated.

**New Product–Documentation:** Spot in Product Alert. 1990. Dec. 17.

2395. **Product Name:** [GranoVita Heidelberg Small Vegetarian Sausage With Organic Tofu].

**Foreign Name:** GranoVita Heidelberg Vegetarische Wuerstchen mit Bio-Tofu.

**Manufacturer's Name:** DE-VAU-GE Gesundheitswerk GmbH.

**Manufacturer's Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

**Date of Introduction:** 1990.

**Ingredients:** Water, vegetable oils and fats in changing proportions by weight, organic tofu (Water, organically grown soybeans, calcium chloride), onions, egg protein, wheat protein (gluten), soy protein, plant thickener agar-agar, spices (*Gewuerze*), natural aromas, rolled oats, seasonings (*Wuerzmittel*), garlic, sea salt, fermented rice flour, smoke.

**Wt/Vol., Packaging, Price:** 6 dumplings weigh 200 gm.

**Nutrition:** Per 100 gm.: Protein 10.6 gm, fat 30.9 gm, usable carbohydrates 5.7 gm, calories 343. 1 BE (Broteinheit, or diabetic exchange) = 210 gm.

**New Product–Documentation:** Form filled out and Label sent by DE-VAU-GE. 1990. June 11. This product was introduced in 1990. Label: 2.5 by 4.5 inches. Self adhesive. Green, red, yellow, and black on white. Illustration of two red-roofed traditional houses among trees and bushes.

“Contains no flesh. Simply heat or fry. Practically cholesterol free. Recommended in the context of a natural whole foods diet (Im Rahmen einer Vollwerternahrung zu empfehlen).”  
 Exklusiv Neuform certification symbol.

Note: In German, *Heide* means “heath, moorland, or moor.” Thus Heidelberg refers to the moorland around Lueneburg where DE-VAU-GE is located.

2396. **Product Name:** New World Foods Red Chile Tamales (With Granular Tofu Curds).

**Manufacturer's Name:** Food Plant Inc. (The) & Southwest Soyfoods.

**Manufacturer's Address:** 2889 Trades West Rd., Santa Fe, NM 87501. Phone: 505-471-8979.

**Date of Introduction:** 1990.

**Ingredients:** Organic\* corn, Organic\* Rico Soy (soybeans, water, calcium sulfate—a natural mineral, caramel color), organic\* soy fiber, organic\* corn meal, red chile pods ground with water, soy oil, shoyu (water, soybeans, wheat, salt), spices, salt. \* = Organically grown & processed in accordance with Section 26569.11 of the California Health and Safety Code.

**Wt/Vol., Packaging, Price:** 12 oz vacuum pack—Contains 4 tamales. Or 13 lb 8 oz foodservice pack—Contains 72

tamales.

**How Stored:** Frozen or refrigerated.

**Nutrition:** Per 2 tamales: Calories 275, calories from fat 98, total fat 11 gm (saturated fat 1 gm), cholesterol 0 mg, sodium 365 mg, total carbohydrate 41 gm (dietary fiber 6 gm), protein 10 gm, vitamin A 25%, vitamin C 2%, calcium 26%, iron 64%.

**New Product–Documentation:** Leaflet sent by Richard Jennings of VPS, Inc. (Vegetable Protein Specialists). 1993. Nov. 26. “New World Foods.” These tamales are made from corn cooked in the traditional way and then stone ground. The tamales are steamed in a vegetable parchment.

Talk with Richard Jennings of VPS. 1993. Dec. 1. This product was introduced in 1990. A key ingredient was Rico Soy (small, firm chunks of tofu), which was renamed and trademarked Befine by Sept. 1993.

New Label sent by Richard Jennings. 1993. Nov. 29. 3 by 5 inches. Self adhesive. Black on gold. Illustration of a symbolic Aztec crow. “Vegetarian.”

Letter and color labels sent by Richard Jennings of VPS, Inc. 1994. Dec. 28. The first focus of New World Foods products was foodservice. Starting in 1990 the company used generic labels printed with a personal computer and label printer. In the spring of 1994 they decided to go after the retail market as well. So they developed attractive new color self-adhesive labels for each product (see New World Foods, 1994).

2397. **Product Name:** Original Field Roast (Vegetarian Grain Meat Sausages) [Mexican Chipotle, or Italian].

**Manufacturer’s Name:** Grain Meat Co.

**Manufacturer’s Address:** Seattle, Washington.

**Date of Introduction:** 1990.

**Ingredients:** Mexican Chipotle: Filtered water, wheat protein (vital gluten flour), expeller pressed high oleic safflower oil, onions, fresh garlic, apple cider vinegar, yeast extract, chipotle peppers, onion powder, granulated garlic, brown sugar, chili de Arbol peppers, salt, barley malt extract, cumin seed, paprika oleoresin, oregano and spice.

**Wt/Vol., Packaging, Price:** 12.95 oz (368 gm).

**How Stored:** Refrigerated.

**New Product–Documentation:** Labels for both products sent by Field Roast Co. 1990. Product with label purchased at Whole Foods in Lafayette, California. 2014. Sept. 3. Italian flavor.

2398. **Product Name:** Granose Vegetarian Spicy Links.

**Manufacturer’s Name:** Granose Foods Ltd.

**Manufacturer’s Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1990.

**Wt/Vol., Packaging, Price:** Glass jar.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Color photo of package in

*Linda McCartney’s Home Cooking*. 1990. p. 18. The label is red, white, and black on green.

2399. **Product Name:** Granose Vegelinks.

**Manufacturer’s Name:** Granose Foods Ltd.

**Manufacturer’s Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1990.

**Wt/Vol., Packaging, Price:** Can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Color photo of package in *Linda McCartney’s Home Cooking*. 1990. p. 18. “Wheat protein frankfurters and sausages in brine.” A photo shows numerous frankfurters in a bowl.

2400. **Product Name:** Mandarin Soyfoods Garden Patties [Bar-B-Que, Cajun, and Teriyaki].

**Manufacturer’s Name:** Mandarin Enterprises Ltd.

**Manufacturer’s Address:** 11031 Bridgeport Rd. #107, Richmond, BC, V6X 3A2, Canada.

**Date of Introduction:** 1990.

**Ingredients:** Bar-B-Que: Tofu (organically grown soybeans, water, magnesium chloride [purified nigari]), brown rice, soybean fibre [probably okara], soy grits, brown rice flour, fresh onions, fresh carrots, fresh celery, fresh green peppers, crushed tomatoes, sesame seeds, rice syrup solids, sea salt, spices, tomato powder, powdered fruit solids, sunflower oil, smoke and spice extracts, natural flavor, spinach powder.

**Wt/Vol., Packaging, Price:** 2 patties. 170 gm (6 oz).

Pinched ends box.

**How Stored:** Refrigerated or frozen.

**Nutrition:** Per 100 gm.: Calories 255, protein 10.3 gm, carbohydrates 27 gm, fat 6.0 gm (polyunsaturates 3.7 gm, monounsaturates 1.1 gm, saturates 0.6 gm, cholesterol 0 mg), dietary fiber 2.2 gm, sodium 1050 mg, potassium 425 mg.

**New Product–Documentation:** This is the line extension of 3 products launched in 1989. Talk with Gerry Blanchard of Natural Promotions, Vancouver, BC, Canada. 1992. Jan. 22. His company developed the packages / labels for these products. Mandarin now has 10-11 distributors in the USA. Six flavors are now available.

Label for Bar-B-Que sent by Gerry Blanchard. 1992. Jan. 22. 7 by 5.5 inches. Paperboard sleeve. Red, brown, and dark green on tan and light green. Illustration of a tofu burger with trimmings between buns, surrounded by a tomato, green pepper, celery stalk, and sliced onion. Silhouette of a cowboy riding a horse and swinging a lasso. “Ready in 3 minutes. Prepared with tofu, savoury herbs & vegetables. Cholesterol free. Microwaveable. Heat and serve.” Called “Pâtés Jardinières” in French.

Two leaflets for all 6 Mandarin patties also sent. One shows a huge illustration of a burger with the 6 packages below it. The other shows the six packages lined up in a typical produce case. On the back is a list of ingredients and

nutritional composition for each flavor.

**2401. Product Name:** [Natura–Naturana Soya Ragout].

**Foreign Name:** Natura–Naturana Soja-Ragout.

**Manufacturer's Name:** Naturawerk.

**Manufacturer's Address:** D-5000 Hannover, Germany. Phone: (0511) 66 20 20 / 29.

**Date of Introduction:** 1990.

**Ingredients:** Whole wheat flour (Weizenvollkornmehl)\*, soya protein, powdered cream, dried parsnips, dried peas, starch, dried mushrooms, granular seasoning, sea salt, mixture of spices.

**Wt/Vol., Packaging, Price:** 100 gm foil pouch in a paperboard box. Retail for DM 3.95.

**How Stored:** Shelf stable.

**New Product–Documentation:** Label sent by Anthony Marrese. 1990. Dec. 12. 4.75 by 6.75 by 1.12 inches. Orange, white, red, and black. Color photo of the prepared stew next to a ball of rice on a white plate, garnished with mushrooms and snow peas. "Ready to cook." Neufarm Reformhaus logo.

**2402. Product Name:** [Amazing Grains–Roast Seitan (Organic)].

**Foreign Name:** Amazing Grains Rôti de Seitan (Biologique).

**Manufacturer's Name:** Noble Bean.

**Manufacturer's Address:** R.R. 1, McDonalds Corners (near Elphin), Ontario K0G 1M0, Canada. Phone: 613-278-2305.

**Date of Introduction:** 1990.

**Ingredients:** Certified organic wheat flour, spring water, peanut butter, canola oil, tamari, spices.

**Wt/Vol., Packaging, Price:** 6 oz.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Letter and photocopies of Labels from Allan Brown. 1998. Jan. 21. This product was made for 8 months in 1990.

**2403. Product Name:** [Vege Ham {Meatless Ham}].

**Foreign Name:** Vegehamu.

**Manufacturer's Name:** San-iku Foods.

**Manufacturer's Address:** 1-1 Nagaurataku, Sodegauramachi, Kimizu-gun, Chiba-ken 299-02, Japan.

**Date of Introduction:** 1990.

**New Product–Documentation:** Letter from San-iku Foods. 1990. June. This product was introduced in 1990.

**2404. Product Name:** [Sobo fix Soya & Vegetable Patties, Soya Pies, Soya Coffee, Granulated Soya, Soya Flakes, Soya & Vegetable Ready-Mix].

**Foreign Name:** Sobo fix Soja-Getreide Bratling, Soja Pastete, Soja Kaffee, Soja Granulat, Soja Flocken, Soja Getreide Fertigmischungen.

**Manufacturer's Name:** Sobo Naturkost.

**Manufacturer's Address:** Goltsteinstr. 43a, D-5000 Cologne 51, West Germany.

**Date of Introduction:** 1990.

**New Product–Documentation:** Box sent by Anthony Marrese. 1990. Dec. 12. These products are listed on the side of a box of Soja-Dreikorn Auflauf.

Ad in Schrot & Korn. 1992. April. p. 48. Sobo Naturkost is located at the address shown above. The phone and fax numbers are 0221-343277. The company sells Soja Flocken, Soja Pastete, Soja Kaffee, Soja Getreide (neu, Fertigmischungen), Soja Knabbers, Soja Granulat.

**2405. Product Name:** Summerfield's Chili [Hot Lentil, or Mild Black Bean].

**Manufacturer's Name:** Summerfield Foods, Inc.

**Manufacturer's Address:** P.O. Box 3235, Santa Rosa, CA 95402. Phone: 707-579-3938.

**Date of Introduction:** 1990.

**Ingredients:** Black bean: Water, black beans, textured soy flour, tomato paste, canola oil, natural mochi rice flour, molasses (unsulphured), spices, onion powder, sea salt, paprika, garlic powder.

**Wt/Vol., Packaging, Price:** 15 oz (425 gm) can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Labels sent by Roland Au of Summerfield Foods. 1991. Jan. 25. 9.5 by 4 inches. Red, turquoise blue, dark blue, and red on white. Color photo of the chili in a white dish.

**2406. Product Name:** Tofu-Scramble (Eggless Seasoning Mix) [Regular, Cheese, Bacon flavor].

**Manufacturer's Name:** Vegetarian Health, Inc.

**Manufacturer's Address:** P.O. Box 525, Maywood, IL 60153. Phone: 800-323-4092.

**Date of Introduction:** 1990.

**Ingredients:** Soy flour, salt, natural and imitation flavorings (onion and garlic), spices, caramel coloring; fortified with vitamins and minerals: zinc oxide, niacinamide, ferrous sulfate, copper gluconate, vitamin A palmitate, calcium pantothenate, thiamine mononitrate (B-1), pyridoxine hydrochloride (B-6), riboflavin (B-2), cyanocobalamin (B-12).

**Wt/Vol., Packaging, Price:** 5 oz paperboard box. Retail for \$1.99.

**How Stored:** Shelf stable.

**Nutrition:** Per 1 oz (28 gm): Protein 14 gm, carbohydrates 10 gm, fat less than 1 gm, cholesterol less than 1 mg, sodium 4 mg, fiber less than 1 gm.

**New Product–Documentation:** Ad in Company catalog. 1991. March. Talk with company salesperson. 1991. May 31.

This company developed this product. It is a dry mix meant to be added to tofu.

2407. **Product Name:** Peanut Braised Tofu.

**Manufacturer's Name:** Wildwood Natural Foods.

**Manufacturer's Address:** 31 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

**Date of Introduction:** 1990.

**Ingredients:** As of 1998: Wildwood tofu (filtered water, soybeans organically grown in accordance with the California Organic Foods Act of 1990, nigari/magnesium chloride, a natural firming agent), marinade (soy sauce, water, brown rice syrup, rice wine, ginger powder), peanuts, onions, celery, red bell peppers, water, soy sauce, apple juice, vinegar, tomato paste, honey, toasted sesame oil, ginger powder, mustard, garlic, salt, and spices.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1990, and made at Wildwood's plant in Fairfax.

2408. **Product Name:** Wildwood Seitan: Made the "Say-Tahn" Ron Way.

**Manufacturer's Name:** Wildwood Natural Foods.

**Manufacturer's Address:** Fairfax, CA 94930.

**Date of Introduction:** 1990.

**Ingredients:** Organic whole wheat flour grown in accord with Sec. 26569.11 of the California Health & Safety Code, filtered water, shoyu, onions, ginger, kombu sea vegetable.

**Wt/Vol., Packaging, Price:** 8 oz.

**How Stored:** Refrigerated,

**New Product–Documentation:** Label sent by Wildwood Natural Foods. 1990. Nov. 1.62 x 2.62 inches. Black type and red silhouette of trees on silver. Black birds are flying out of forest.

2409. Facciola, Stephen. 1990. *Cornucopia: A source book of edible plants*. Vista, California: Kampong Publications. ix + 678 p. Indexes (six!). 28 cm. [522\* ref]

• **Summary:** "In your hands is one of the most remarkable efforts to come out of the struggle to preserve the genetic diversity of our planet... Steve Facciola has put together an easy-to-understand, easy-to-use compendium of the diversity of food plants available to consumer, gardener and scientist" (from the Preface). The largest and most comprehensive work of its kind, this book gives details on 3,000 edible plant species and 7,000 varieties.

Contents: Preface, by Noel Vietmeyer. Introduction. Acknowledgements. Botanical listings: Alphabetical listings of plant families (*Glycine max* and *Glycine tabacina* are listed in the family Fabaceae, pronounced fuh-BAY-see), fungi families, algae families, bacteria families. Cultivar listings (by common name for the most important and popular crops, e.g., shiitake, soybean, spinach, sprouting

seeds). Sources (names, addresses and phone numbers of firms that sell seeds, plants, etc.: Domestic commercial, domestic non-commercial, overseas commercial, overseas non-commercial). Bibliography. Indices and appendixes: Index of principal vernacular names. Index of vernacular and other names occurring elsewhere in the text. Index of usage and edible parts. Index of species native to or naturalized in North America. Index of species not listed in Kunkel [Gunther Kunkel. 1984. *Plants for human consumption*. Koeltz Scientific Books, Germany]. Index of families and genera. Appendix A: Abbreviations used—For type of product offered, for annotated bibliographical citations, in descriptions for sources. Appendix B: Endnotes used in the cultivar listings.

As of Aug. 1994 an electronic version of this book is now available. It runs on Microsoft Windows and uses more than 25,000 hypertext links to cross reference information.

The main information on soybeans is found on pages 91 (Botanical listings for *Glycine max* and *Glycine tabacina*), p. 219 (*Aspergillus oryzae* culture), p. 221 (*Actinomucor elegans* culture for fermented tofu or sufu, and *Rhizopus* cultures for tempeh), p. 224 (*Bacillus subtilis* culture for natto), p. 482-83 (for "field soybeans," lists 5 black-skinned cultivars, and 7 yellow-skinned cultivars; plus 11 "vegetable soybeans"—Agate, Butterbeans, Envy, Extra Early, Fiskeby V, Hahto, Hakucho Early, Kanrich, Okuhara Early Green, Prize, and White Lion), p. 485-87 (sprouting seeds including soybean sprouts with directions for sprouting), and p. 500 (Soyfood cultures).

Additional information on food uses of soybeans is found throughout the book. Tofu: p. 9 (In Indonesia, a salt derived from the fruit of *Rhus javanica* (*Nurude*, *Mu-yen*) is used to coagulate tofu), p. 61 (In Japan the seeds of *Cannabis sativa*, called *asanomi*, are used in deep-fried tofu burgers (*ganmodoki*)), p. 76 (A vegetable curd similar to soybean tofu can be made from the seeds of the bottle gourd or calabash (*Lagenaria siceraria*)), p. 92 (The seeds of the Bonavista bean or hyacinth bean (*Lablab purpureus*) can be prepared as tofu), p. 127 (The seeds of okra, gumbo, or lady's finger (*Abelmoschus esculentus*) can be made into tofu or tempeh). Kecap (Indonesian soy sauce): p. 9 (In Indonesia, the plant tuberose (*Polianthes tuberosa*) is added to the substrate in making kecap), p. 191 (In Indonesia, fresh leaves of kaffir lime, also called ichang lime, makrut, or djeruk purut (*Citrus hystrix*) are used to flavor kecap). Miso: The following can be used as a substrate for miso—p. 88 (Peanuts), p. 94 (seeds of the velvet bean, also called cowitch, cowhage, benguk (*Mucuna pruriens*)), p. 155 (barley (*Hordeum vulgare*)), p. 156 (proso millet (*Panicum miliaceum*)). Address: 1870 Sunrise Dr., Vista, California 92084. Phone: (619) 726-0990.

2410. McCartney, Linda. 1990. Linda McCartney's home cooking. New York, NY: Arcade Publishing, Inc. (a Little,

Brown company). England: Bloomsbury. 174 p. Illust. Index. 25 cm.

• **Summary:** As of 1994 this is said to be the world's best-selling vegetarian cookbook. It contains more than 200 recipes and many full-page color photos, uses TVP (both chunk and granular styles) in at least 22 recipes, mostly main dishes, including: Turnovers (p. 65). Beefless pie (p. 85). Beefless rice casserole (p. 86). Beefless stew (p. 86). Burgers bourguignonne (p. 89). Chili non carne (p. 94-95). Festive roast with savoury stuffing (p. 98). Lentil and steaklets stew (p. 104). Linda's lasagna (p. 104-05). Madras onion curry (p. 105). Maine sauerkraut (p. 105). Meatless loaf (p. 106). Mexican loaf (p. 108). Mince and aubergine casserole (p. 109). Moussaka (p. 109-10). Oriental beefless casserole (p. 115). Shepherd's pie (p. 120). Simple beefless hash (p. 120). Sour cream steaklet chunks (p. 121). Spaghetti sauce bolognaise (p. 149). Stuffed and broiled mushrooms (p. 125). Stuffed peppers (p. 126).

Linda and Paul (of Beatles fame) McCartney have been married since March 12, 1969, are vegetarians and very active in the field of animal welfare. Linda, born in Scarsdale, New York, USA, has been a committed vegetarian for twenty years, during which time she has lived in England. She is also a world-famous photographer. Her color photo appears on the cover. TVP is more popular among consumers in the UK than in the USA. Pages 18-19 show a color photo of many meatlike products and their packages—including Protoveg Sizzles, Protoveg 5 Grain Burgamix, Tivall Vegetarian Schnitzel, Sausage, and Burger, Fritini Vegetable Pattie Mix, Realeat Vege Burger Mix, Dietade Low-Salt Vegetarian Gravy Mix, Granose Vegetarian Spicy Links, Sausalatas, Vegelinks, and Sausfry, Friggs Vegetable Gravy Powder, and Worthington Wham, Bolono, GranBurger, Vegetarian Fillets [fish alternatives], Stakelets, and Stripples. Page 43 gives a brief description of soya beans and soyfoods. Address: England.

2411. Wagner, Lindsay; Spade, Ariane. 1990. *The high road to health: A vegetarian cookbook*. New York, NY: Simon & Schuster / Prentice Hall Press. xv + 288 p. Foreword by E. Lee Rice. Index. 24 cm. [54 ref]

• **Summary:** Lindsay Wagner, whose lovely color photo appears on the cover, first achieved widespread television in the early 1970s as "The Bionic Woman." Recently she starred in the Academy-Award winning film *The Paper Chase*. This vegan cookbook uses no meat, dairy products, or eggs. A section titled "Raising the Dairy Question" (p. 13) discusses problems with milk and concludes: "A terrific substitute for milk products comes from that little marvel, the soy bean. Soy milk has the look and consistency of milk, and some brands even taste like it. Try some on your breakfast cereal, top your pies with our creamless Whipped Cream, spread your sandwiches with eggless Mayo Spread and enjoy Huevos-less Rancheros for brunch. You'll never look at

another carton of milk."

Chapter 4, "About the ingredients," includes discussions of Braggs Aminos, cold-pressed oil, kuzu, lecithin, miso, mochi, nori, soy milk, soy sauce, tempeh, tofu. Soy-related recipes include: Huevo-less rancheros (with tofu and soy milk, p. 65). Vegetarian "salami" (with firm tofu, p. 82-83). Mayo spread II (with soy milk, p. 88). Ginger tamari dressing (p. 131). Creamy oil substitute (with soy milk, p. 134). Tofu sour cream (p. 134). Eden cheesy sauce (with soy milk, p. 136).

Chapter 10 (p. 141-59) is titled "Entrées for the meat lover"; most of the recipes are based on soyfoods: Marinated tempeh (p. 141). Marinated tofu. Barbecued tofu or tempeh. Tempeh marinade. Teriyaki tofu. Polynesian tofu. Tofu piquant. Tofu ribs. Grilled tofu with summer vegetables. Japanese eggplant and tofu Romano. Pecan herb loaf (with tofu and soy flour). Easy tofu burgers. Easy easy burgers (with Marinated tempeh or tofu). New Age Italian sausage I (with Marinated tempeh and Marinated tofu). New Age Italian sausage II (with Marinated tofu). Spicy tempeh stir fry. Tofu cacciatore.

Lasagna with zucchini and mushrooms (in Light sauce with soy milk, p. 166). Manicotti stuffed with zucchini and tofu cheese (p. 175). Tacos (with Marinated tofu and tempeh, p. 187). Eggplant al forno (with tofu, p. 213). Banana-strawberry tofu pudding (p. 231). Italian cheesecake (with tofu, p. 243). Coconut-mocha cream frosting (with soy milk, p. 260). Tofu fruit sauce (p. 261). Mock whipped cream (with soy milk, p. 262).

An interesting last chapter titled "Afterword: Meat—We can live without it! Here's why" discusses the role of an "animal-based diet" on destruction of the environment. Address: 1. California; 2. Woodland Hills, California.

2412. Wang, Wenqiao; Kang, Wenbin. 1990. *Chinese vegetarian cuisine: 100 authentic recipes*. Beijing, China: New World Press. 142 p. Illust. (color photos). No index. 26 cm.

• **Summary:** Part II, titled "Bean curd and bean product dishes, contains 21 recipes, including: 34. Bean curd in fermented black beans [fermented black soybeans] (with 3 3-inch {7.5 cm} cakes of bean curd {about 6-7 oz. or 180 gm}). 37. Peppery hot bean curd (with 1 tablespoon Sichuan soybean paste and 1 tablespoon soy sauce). 38. Smoked bean curd (Smoking can be done before or after the ingredients are prepared). 39. Fried bean curd balls (resemble Japanese ganmodoki balls). 41. Dry-cooked bean curd bamboo (with "½ lb {225 gm} bean curd bamboo" [dried yuba sticks]; the yuba is soaked, then put in boiling water, then deep fried in a wok).

42. Braised bean curd shreds in tomato sauce (with "¾ pound {330 gm.} fresh bean curd sheets" [pressed tofu sheets] each cut vertically into 3 rectangular pieces of equal width, then piled atop one another and cut into thin shreds).

43. Bean curd sheets with tangerine peel. 44. Flavor potting five-fragrance dried bean curd (with 1 lb. white fresh pressed bean curd [pressed tofu]). 45. Bean curd bamboo with chili oil (with ½ lb. bean curd bamboo [dried yuba sticks]). 50. Stuffed bean curd. 51. Crispy-fried pine nut rolls (with 3 dried bean curd sheets {soaked}). 52. Deep-fried five-shred rolls (with “3 bean curd sheets” [pressed tofu sheets]; the result is like deep-fried spring rolls). 54. Bean curd triangles (tofu is cut into triangles then deep fried).

Part IV, titled “Vegetarian imitation meat dishes” includes: 71. “Mother and her sons meet”—chicken and eggs (with “4 bean curd sheets”). 74. Vegetarian ham (with “20 dried bean curd sheets [dried yuba sheets] {soaked}”). 74. Vegetarian chicken (with “5 dried bean curd sheets”). 75. Vegetarian duck (with “6 dried bean curd sheets {soaked}”). 76. Vegetarian fried dry minced meat (with “3 dried bean curd sheets {soaked}”). 77. Vegetarian sausage (with “3 dried bean curd sheets {soaked}”).

80. Crispy and fragrant “duck” (with “15 dried bean curd sheets {soaked}”). 81. Diced ‘chicken’ with green peppers (with “3 dried bean curd sheets”). 82. Braised vegetarian chicken (with “3 dried bean curd sheets”). 83. Vegetarian eight-treasure chicken drumsticks (with “3 dried bean curd sheets”). 84. Vegetarian chicken curry (with “½ lbs fresh bean curd sheets {thousand sheets [pai-yeh]}”). 86. Vegetarian red-cooked chicken (with “8 dried bean curd sheets {soaked}”). 88. Deep-fried “duck” (with “2 dried bean curd sheets {soaked}”). 89. Deep-fried “duck” with fermented black beans (with “3 dried bean curd sheets {soaked, or substitute egg wrappers}.” “Rinse the black beans well, soak in warm water until soft, removed and pound into a pulp”).

A glossary (p. 133+) includes definitions of: Soy bean sprouts. Bean curd (six types): (1) Fresh bean curd comes in two types. The southern has a more watery consistency and is very soft. The northern contains less water and is firmer. (2) Fresh dried bean curd; pressed into small firm squares [dofu-gan, pressed tofu]. (3) Fresh dried bean curd sheets; also called “hundred pages” or “thousand sheets” [pai-yeh or ch’ien chang; pressed tofu sheets].

(4) “Dried bean curd bamboo (*fu zhu*); not bean curd at all, though so-called, but rather a by-product from making bean curd. It is the rich cream that rises to the top of the boiling soybean milk before gypsum is added to curd. The skimmed cream is sun-dried thoroughly in narrow stiff sticks [dried yuba sticks]. Soak in warm water to soften before using.”

(5) “Dried bean curd sheets (*yu pi*) [dried yuba sheets], same as dried bean curd bamboo, but dried in the form of folded semicircles. The dried bean curd sheet called for in the recipes in this book is a round piece with a diameter of 9 or 10 inches. Soak in warm water to moisten before using. It is also called ‘oil sheet,’ for it looks as if it were glazed with oil... According to ancient Chinese medicine books,

they can clear up excessive heat in the lungs, stop coughs, eliminate phlegm and stop inflammation, and are good for the stomach.”

(6) “Fermented bean curd cheese [fermented tofu]; salty and creamy cakes of fermented dried bean curd [pressed tofu] with a savory flavor, appearing in white or red.” Many recipes call for MSG (optional).

Recipes also call for: Sesame paste, gluten, and several different types of mushrooms.

Note: Also published in Chinese in 1990 by the same publisher. “Both authors have worked for many years in the catering business. Wang is a member of the editorial board of the Chinese magazine *Cooking* and Gang himself possesses excellent cooking skills... All 100 recipes have been tested and proven successful” (from the rear cover). The many color photos (on glossy paper) were taken by Zhou Youma and Yan Xinqian at Gongdelin (the Forest of Merit and Virtue) Restaurant, a famous vegetarian eating place in Beijing. Address: China.

2413. Sanitarium Health Food Co. 1990? Our story (Leaflet). 148 Fox Valley Rd., Wahroonga, N.S.W. 2076, Australia. 2 panels on each side. Each panel 30 x 21 cm. Undated.

• **Summary:** This glossy, color leaflet gives a brief history of the company, interspersed with many color photos. The company’s export division is at Hudson Ave., Castle Hill, NSW 2154, Australia.

“The fascinating history of the Sanitarium Health Food Company started in the late 19th century when a group of highly motivated immigrants from the United States decided to make their living by distributing health foods that they had imported from Battle Creek, in Michigan, USA. Battle Creek was famous then for its Sanitarium, the health retreat based on a Swiss model, where the rich and famous from all parts of the United States and Europe came for a relaxing health holiday. One of the draw cards of this place was a breakfast cereal and health food manufacturing plant, the purpose of which was to supply food to the institution as well as to the neighbouring districts.

“A selection of these products was sent to Melbourne, Australia, in 1897, but before too long the demand for these unique foods outstripped the availability. Local production was inevitable...”

“The name, Sanitarium Health Food Company, was adopted in 1898.”

Photos show: (1-4 on front panel) Weet-Bix in a white bowl. A man on a bicycle pedaling a wheeled cart in front of him; on it is written Sanitarium Health Food Co. A modern factory with a company flag flying over it. Veggies in a wrap on a plate. (5) The old Battle Creek Sanitarium. (6) A hand pouring a pack of So Good Soymilk. (7) A very old photo showing an early food factory along the banks for a river. (8) An aerial view of a modern food factory. (9) A bottling line. (10) A breakfast table on which Sanitarium breakfast food

products are served. (11) A Sanitarium food delivery truck. (12) Packages of the leading Sanitarium food products: Weet-Bix. Corn Flakes. Weet Bix Hi-Bran. Puffed Wheat. Weeta Puffs. Good Start. Ricies (rice cereal). Honey. Peanut Butter (Smooth or Crunchy). Crunchy Granola. Caffex. Golden Toasted Meusli. So Good (soymilk). Vegetarian Sausages (canned). Vegetarian Bologna (canned). Address: Wahroonga, Australia. Phone: (02) 487 1711.

2414. Sanitarium Health Food Co. 1990? Product range. 148 Fox Valley Rd., Wahroonga, N.S.W. 2076, Australia. 6 p. Catalog. Undated. 30 cm.

• **Summary:** Product lines include: Flake biscuit range (incl. Weet-Bix [“Australia’s favourite whole wheat malted breakfast biscuits”], Corn Flakes, and Muesli). Loose cereal range. Sundry cereal range. Drinks and beverages (incl. So Good soymilk). Spreads (peanut butter and marmite). Legumes, grains, seeds (incl. soya beans in 500 gm bag). Dried fruits. Nuts. Mixes (such as nuts & raisins). Canned vegetarian meals (24 meatlike products, 3 of which are dry TVP in boxes). Misc. foods (incl. natural lecithin and lecithin granules).

The company also has an export division at Hudson Ave., Castle Hill, NSW 2154. Address: Wahroonga, Australia. Phone: (02) 487 1711.

2415. **Product Name:** D’lites Vegy Protein Mix [Chicken Style].

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1990?

**Ingredients:** Chicken style: Textured vegetable protein (soy protein isolate and concentrate), egg whites, soybean and/or corn oil, salt, flavorings (hydrolyzed vegetable protein, onion powder, turmeric, spice extractives), monosodium glutamate, carrageenan, niacinamide, etc. Reduced calorie mayonnaise: Water, soybean oil, modified food starch, egg yolks, vinegar, salt, eggs, mustard flour, phosphoric acid, DL alpha tocopheryl acetate (vitamin E), calcium disodium EDTA to protect flavor, natural and artificial flavor, oleoresin paprika, beta carotene (color), celery, green peas, dill pickle, modified food starch.

**Wt/Vol., Packaging, Price:** Roll.

**How Stored:** Frozen.

**New Product–Documentation:** Seventh-day Adventist Dietetic Assoc. 1990. *Diet Manual, Including a Vegetarian Meal Plan. 7th ed.* Appendix A.6-27.

2416. **Product Name:** Savory Slices–Vegetable Protein Slices / Artificial Beef Flavor.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Road, Worthington, OH 43085. Phone: 800-628-3003.

**Date of Introduction:** 1990?

**Ingredients:** Textured soy protein isolate, egg whites, soybean oil, wheat flour, partially hydrogenated soybean and cottonseed oil, yeast extract, flavorings (hydrolyzed vegetable protein, monosodium glutamate, onion powder, artificial flavor), caramel color, corn syrup solids,...

**Wt/Vol., Packaging, Price:** 20 oz (567 gm) can. Retail for \$2.65 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19.

2417. **Product Name:** Turkee Slices: Vegetable Protein Slices–Artificial Smoked Turkey Flavor.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1990?

**Ingredients:** Slices: Textured vegetable protein (soy protein isolate, wheat gluten), egg whites, soybean and/or corn oil, partially hydrogenated soybean oil, flavorings (hydrolyzed vegetable protein, monosodium glutamate, artificial flavor, onion powder, natural smoke flavor, disodium guanylate, disodium inosinate), dextrose, brown sugar, salt, niacinamide, iron, vitamins. Gravy: Water, modified corn starch, flavorings (hydrolyzed vegetable protein, monosodium glutamate, onion powder, artificial flavor, disodium guanylate, disodium inosinate), salt, wheat flour, dextrose, soy protein isolate, soybean oil.

**Wt/Vol., Packaging, Price:** 13 oz can. Retail for \$2.35 (7/90, California).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19.

2418. **Product Name:** Tofu Burger.

**Manufacturer’s Name:** Ashland Soy Works.

**Manufacturer’s Address:** 225 Water St., Ashland, OR 97520. Phone: 503-482-1865.

**Date of Introduction:** 1991 January.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Jim Muhs. 1991. Oct. 14. The company introduced this product in Jan. 1991.

2419. **Product Name:** Fantastic Cha-Cha Chili, All-O-Round Spaghetti, Splittin’ Peas, Leapin’ Lentils Over Couscous, Rockin’ ABC’s.

**Manufacturer’s Name:** Fantastic Foods.

**Manufacturer’s Address:** 106 Galli Dr., Novato, CA 94949. Phone: 415-883-7718.

**Date of Introduction:** 1991 January.

**Ingredients:** See below.

**Wt/Vol., Packaging, Price:** 2 oz (56 gm) paper cup.

**How Stored:** Shelf stable.

**New Product–Documentation:** Ad (full page color) in *Health Foods Business*. 1991. Jan. p. 40A-B, and in *Whole Foods*. 1991. Feb. p. 27. “Add some character to a quick lunch.” The label of each cup is clearly visible. Ingredients: Fantastic Cha-Cha Chili uses textured vegetable protein as the second ingredient. Fantastic All-O-Round Spaghetti is seasoned with soy sauce powder. Fantastic Splittin’ Peas is seasoned with miso and soy sauce powder. Fantastic Leapin’ Lentils Over Couscous is seasoned with miso powder. Fantastic Rockin’ ABC’s is seasoned with miso powder. All the products are low in fat. Just add hot water and serve. Same ad in *Natural Foods Merchandiser*. 1991. Jan. p. 25 (insert).

2420. Fowler Brothers. 1991. Catalog: January 1991. P.O. Box 2324, San Rafael, CA 94912. 79 p. 28 cm.

• **Summary:** The company is a “distributor of natural foods.” The following makers, distributors, and brands of soyfood products are listed: I. Bulk Products: Miso (American Miso, 8 products), Soy foods (Turtle Island tempeh and Soy Deli tofu burger). Soy Sauce & tamari (San-J domestic shoyu and tamari, Westbrae Johsen shoyu), Tofu (Quong Hop, 6 products).

II. Packaged products: Ah Soy (Westbrae, 7 soy drinks), Eden Foods (Edensoy, 6 soy drinks), Pacific Soyfoods (6 types of soysage), Pacific Tempeh (4 products), Quong Hop (11 soymilk and 4 tofu products), San-J (tamari crackers, 14 soy sauce & tamari products), Soy Deli (Quong Hop, 5 soy foods, 8 vacuum pack tofu), Sweet Earth (3 vegeburgers), Turtle Island (10 tempeh products), Vitasoy (7 soy drinks), Westbrae (2 instant miso soups, 14 soy drinks, 14 types of soy sauce and tamari). Address: San Rafael, California. Phone: 415-459-3406.

2421. **Product Name:** Tofu Burgers, Sesame Tomato Soya Burgers.

**Manufacturer’s Name:** Pureland Soy Products.

**Manufacturer’s Address:** 23 Depot St., Maroochydore, QLD 4558, Australia. Phone: 071-43-4254.

**Date of Introduction:** 1991 January.

**New Product–Documentation:** Letter and leaflet sent by Jennie Finnigan and Ricciardo Ferrari. 1992. June 17. In June 1992 the company moved to a new address with a new phone number: Lot 47 Page Street, Kunda Park, QLD 4556. Phone: (074) 45 6077. The leaflet (brown on yellow) states that, in addition to tofu, the company also makes Tofu Burgers, Curried Lentil Burgers, and Sesame Tomato Soya Burgers.

2422. **Product Name:** Korean Style Vegetarian Potstickers.

**Manufacturer’s Name:** Shin-Sun Foods.

**Manufacturer’s Address:** 2551 W. Winton Ave. #6-0,

Hayward, CA 94545. Phone: 510-887-6140.

**Date of Introduction:** 1991 January.

**Ingredients:** Filling: Cabbage, tofu, zucchini, onion, sesame oil, garlic, ginger, sea salt, black pepper. Wrapper: Unbleached flour, rice flour, water, egg.

**Wt/Vol., Packaging, Price:** 12.5 oz. for 10 potstickers.

**How Stored:** Frozen.

**New Product–Documentation:** Leaflet (8.5 by 11 inches, 3 color). “New! Shin-Sun Foods. Fresh, healthy, and delicious.” “Each potsticker is individually hand wrapped in our kitchen. Hand wrapping takes a little longer than machine manufactured foods, but the appearance is greatly improved, and the product is more stable. All the ingredients used are fresh, and not frozen. Using fresh produce is more costly, but we think the taste and quality is well worth it.”

Talk with Susannah Yang of Shin Sun. These potstickers were launched in Jan. 1991. They were the company’s first product.

2423. Lesser, Peter; Elkin, Ed. 1991. History of Pacific Soyfoods in Olympia, Washington (Interview). *SoyaScan Notes*. Feb. 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Pacific Soyfoods was started by Peter Lesser in 1981. Initially it was run out of the kitchen a collective restaurant named Café a la Mode, located on 4th Avenue in Olympia, Washington. They made tofu from scratch, and used the okara from the tofu to make soysage, using a version of the recipe published in *The Farm Vegetarian Cookbook*. Initially these products were served in the restaurant (the okara was used in sandwiches), but by about June 1981, they had started delivering the Soysage to the local food co-op and to 1 or 2 local grocery stores in Olympia. When the restaurant was closed after a year of operation, the wholesale accounts still wanted Soysage, so Peter decided to keep the soy operation going and at that time, in Feb. 1982, he coined the term “Pacific Soyfoods.”

Peter stopped making tofu and bought his okara from a Korean-American tofu manufacturer named Boo Han in Lakewood, Washington. In the spring of 1982, Pacific Soyfoods’ landed its first wholesale account, Pacific Rim (formerly known as something like C.C. Grain), a collective wholesaler in Seattle, that delivered to the Puget Consumers Co-op (PCC) in Seattle. Soon thereafter he started selling to natural foods wholesalers, the first one based in Seattle and the second one based in Portland, Oregon. Then in 1983 he expanded his product line by adding to the Original Soysage, Italian and Mexican flavor, and changed from a fresh Saran wrap packaging to vacuum packaging. He expanded his distribution into the San Francisco Bay Area, first through Pacific Trading Co. (Mark Brawerman), then after he folded [sic, relocated], Ben Lee at Quong Hop & Co. took over the distribution. At one point, Quong Hop offered to set up a plant in the state of Washington with Peter overseeing it, in

order to reduce freight to Washington. Island Spring also distributed Peter's products, and he would sometimes get okara from them.

In about Nov. 1985 he introduced his first tofu burger, the Earthling Tofu Vegetable Burger. He bought the tofu for this burger from Boo Han.

On 1 April 1988 Peter sold Pacific Soyfoods to Ed Elin. At that time the company made four soyfood products: three flavors of Soysage, and Earthling Tofu Vegetable Burgers. Peter left and started Northwest Natural Foods, which makes Medallions, salmon or halibut patties/burgers with wild rice. He tried many times to make a salmon & tofu burger but was unable to get the right texture. (His phone number is now 206-866-9681.) Elin purchased his tofu and okara from Boo Han's, just up the road in Tacoma, Washington. About 12-15 months ago Boo Han changed hands; it is now named Hang Yang, owned by Mr. Choy, a Korean-American, who does not speak English—although his brother does. Hang Yang is very aggressive and doing well; he just upgraded to a new system.

Ed continued to make the same four products, and will be getting new labels (with some color changes) next week for two new flavors of burgers. To the Original Earthling, they will add a Barbecued Earthling and a Teriyaki Earthling. The Barbecued flavor should be on the market in late Feb. and the Teriyaki in March. His business is "growing so fast I can't believe it." His bestselling product is the tofu burger. He has also become distributor for other companies outside the region; he brings up and distributes Quong Hop's entire Soy Deli line. He plans to take on some tofu wieners and the JSL line of egg roll wraps and won-ton skins. By mid-summer he plans to have three of his own styles of tofu (soft, medium, and firm) private labeled by Han Yang.

He fully services his own products in about 175 supermarkets on a weekly or bi-weekly basis. His big accounts are Q.F.C. [Quality Food Centers, the big market in Seattle], and Safeway. He sells only in supers, no natural/health food stores. But he does sell his products to companies that distribute to natural/health food stores, such as NutriSource and the Mountain People's Warehouse down south. The business in natural food stores is too small. Address: 2948 29th Ave. S.W., Building 2C, Olympia, WA 98502. Phone: 206-943-6234.

**2424. Product Name:** 2 Quarter Pounders (100% Vegetable Meatfree Burgers).

**Manufacturer's Name:** Realeat Company Ltd.

**Manufacturer's Address:** Hayhill Industrial Estate, Barrow on Soar, Leics., England.

**Date of Introduction:** 1991 February.

**Ingredients:** Water, textured soya flour, vegetable oil (hydrogenated), onions, wheat gluten, wholewheat rusk, cellulose gum, natural flavors, sea salt, malt extract, spices, beetroot.

**Wt/Vol., Packaging, Price:** 227 gm paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 100 gm.: Energy 183 kCal (calories) / 767 kJoules, protein 12.0 gm, carbohydrate 6.3 gm, fat 12.4 gm, dietary fibre 6.8 gm.

**New Product–Documentation:** Label (carton) sent by Leah Leneman of Scotland. 1992. July. 4.5 by 9.5 by 1.1 inches. Reddish brown, orange, yellow, green, and black. Large color photo of the burger with buns and trimmings at bottom of front panel. "New recipe." Back panel: "Also available: Vegetable Bangers. Realeat Quarterpounders are a delicious and nutritious alternative to meat burgers. They have more protein, higher fibre and less fat than ordinary burgers and are free from artificial colours and preservatives. Quarterpounders are quick and easy to grill or fry and will not shrink when cooked. Guarantee: If for any reason you are dissatisfied with our product, please return the carton, stating why and where purchased, for a full no-quibble refund. Your statutory rights are not affected." 4 small color photos show the 2 burgers on plates with other foods ready to serve. UPC indicia.

**2425. Product Name:** Sunburger.

**Manufacturer's Name:** Sunfood Products.

**Manufacturer's Address:** Fort Lauderdale, Florida.

**Date of Introduction:** 1991 February.

**Ingredients:** Textured soy protein concentrate, vital wheat gluten (powdered, 75% protein, serves as a binder), natural flavorings, natural spices, fresh onion.

**New Product–Documentation:** Talk with Richard Gross. 1991. Sept. 3. He first developed the Sunburger in 1974 (which see). He bought the name back from one of the surviving parties who makes rugalach. He had been supplying the Sunburger to Tree of Life in boxes, and to other foodservice accounts. The new products uses soy protein concentrate instead of TVP; it is baked rather than fried. It has "no fat" (i.e. less than ½ gm of fat per serving). The quality and acceptance are good. New he has only one variety (plain), but he will add another flavor (like breakfast sausage) within the next week.

**2426. Product Name:** Meatless Healthy Bacon (Made with Tempeh).

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

**Date of Introduction:** 1991 February.

**Ingredients:** Soy tempeh (cultured organic soybeans, water), soy sauce (water, soybeans, whole wheat, salt), miso (soybeans, water, salt), dried yeast, beet powder for color, dehydrated onion, granulated garlic, natural liquid hickory smoke and spices.

**Wt/Vol., Packaging, Price:** 6.5 oz (184 gm) plastic pouch.

**How Stored:** Refrigerated, 45-60 day shelf life.

**Nutrition:** Per 1 oz.: Calories 27, protein 4 gm, carbohydrate 4 gm (incl. 3.3 g, dietary fiber), fat 1 gm, cholesterol 0 mg, sodium 310 mg.

**New Product–Documentation:** White Wave News. 1991. Vol. 4, No. 1. June. A photo shows the label. Like all White Wave products, Meatless Healthy Bacon is made with soybeans grown in accordance with Section 26569.11 of the California Healthy and Safety Code [i.e. organic soybeans]. A comparison of 1 oz. broiled / fried bacon (pork) with Meatless healthy Bacon shows: Fat: 14 gm vs. 1 gm. Saturated fat: 4.95 gm vs. 0.15 gm. Cholesterol: 24 mg vs. 0

mg.

Label sent by Lon Stromnes. 1991. July 30. 4.5 by 10.25 inches. Plastic pouch. Red, black, and yellow on white. “Cholesterol-free! Vegetarian breakfast strips. A great-tasting choice.”

Leaflet (black and white, single sided, 28 cm) sent by White Wave. 1993. June 22. “White Wave meat substitute fact sheet. White Wave now sells four meat substitutes: Meatless Healthy Franks, Meatless Healthy Links, Meatless Healthy Bologna, Meatless Healthy Bacon.” The main ingredient in each is organic tofu. Nutritional information about and all ingredients in each product are given.

2427. *Time*. 1991. To the roars of the herbivores: *Entrepreneurs*. 137:65. March 4.

• **Summary:** Discusses the Gardenburger. Developed by Paul Wenner, the president of Wholesome & Hearty Foods Inc. (Portland, Oregon), this meatless competitor of the hamburger contains mushrooms, onions, oats, brown rice, low-fat cheese, egg whites, bulgur wheat, walnuts, and seasonings pressed into a patty and baked. It contains only half the calories and one-fifth the fat of an ordinary hamburger. “Wenner expects to sell 8 million patties this year.” A small photo shows Wenner with a large photo of his Gardenburger.

2428. **Product Name:** Earthling Tofu Vegetable Burger [Barbecued, or Teriyaki].

**Manufacturer’s Name:** Pacific Soyfoods.

**Manufacturer’s Address:** 2948 29th Ave. S.W., Building 2C, Olympia, WA 98502. Phone: 206-943-6234.

**Date of Introduction:** 1991 March.

**Wt/Vol., Packaging, Price:** 8 oz. or 16 oz.

**New Product–Documentation:** Talk with Peter Lesser of Northwest Natural. 1991. Feb. 8. He plans to introduce these two new products in Feb. and March (respectively) 1991.

2429. **Product Name:** Vegetarian Sausages.

**Manufacturer’s Name:** Soy Works (The).

**Manufacturer’s Address:** P.O. Box 158 (Huffam Street), Motueka, South Island, New Zealand. Phone: 64-03-528-9170.

**Date of Introduction:** 1991 March.

**Ingredients:** Soy pulp (okara), soy protein, soy oil, breadcrumbs, potato starch, gluten, carrageenan (seaweed) gum, caramel, garlic, onions, herbs, spices.

**Wt/Vol., Packaging, Price:** 400 gm.

**New Product–Documentation:** Letter and business card sent by Jan Batchelar, owner. 1989. Nov. 8. “I am also looking to develop a vegetarian sausage from the okara.”

Letter (fax) and Label sent by Bruce Trevett and Jan Batchelar of The Soy Works. 1991. Aug. 5. “The Soy Works has been in operation since February 1983 producing tofu for the local market. Our most recent product is Vegetarian

Sausages which are selling extremely well.” The Label is 4.5 by 3 inches. The product is subtitled “A healthy alternative.” Atop the front panel is written: “No preservatives. No cholesterol. High protein. Low salt. No artificial flavours or colors. Pre-cooked. Dairy free.”

Real Label sent with letter by Bruce Trevett & Jan Batchelar. 1992. Jan. 23. Blue and green on white. The product was introduced in March 1991.

**2430. Product Name:** Spring Creek Great Balls of Tofu (Italian Flavored Meatless Meatballs).

**Manufacturer’s Name:** Spring Creek Natural Foods.

**Manufacturer’s Address:** 212-C East Main St., Spencer, WV 25726. Phone: 304-927-1815.

**Date of Introduction:** 1991 March.

**Ingredients:** Tofu, okara (both made from certified organic soybeans), whole wheat bread crumbs, walnuts, onion flakes, granulated garlic, parsley, sea salt, black pepper, tomato sauce.

**Wt/Vol., Packaging, Price:** 12 oz vacuum pack. Retail for \$3.65.

**How Stored:** Refrigerated.

**New Product–Documentation:** News release. 1990. Dec. 20. The product will be available on 1 March 1990. Talk with Bill Quick of Spring Creek. 1992. Jan. 10. This product is now out. It is meatless meat balls made with tofu, okara, bread crumbs, walnuts, and other minor ingredients in tomato sauce.

**2431. Product Name:** Pepper Steak Gluten, B.B.Q. Gluten, or Curry Gluten.

**Manufacturer’s Name:** Sprout Delights.

**Manufacturer’s Address:** 13090 N.W. 7th Ave., North Miami, FL 33168. Phone: 305-687-5880.

**Date of Introduction:** 1991 March.

**Wt/Vol., Packaging, Price:** 8 oz round plastic tubs with label on the snap-on lid.

**How Stored:** Frozen.

**New Product–Documentation:** Talk with Steve Bern of Sprout Delights in Miami. 1992. July 11. He introduced these seitan products, which have a Sloppy Joe consistency, in March 1991.

2432. Yakabushi, Konrad. 1991. Ontario soybean growers crushed by plant closing. *Toronto Star (Ontario, Canada)*. April 11. p. C1, C10.

• **Summary:** Last month Victory Soya Mills, Ontario’s largest soybean crusher, ceased operations and padlocked the doors of its plant on Lakeshore Blvd. East, thus closing a chapter in Toronto’s history.

For almost 50 years, “convoys of trucks had converged on Queen’s Quay during the dying days of Indian summer to unload” the harvest of many Ontario farms at the soybean crushing facility.

While some Toronto residents will hardly miss the mile-long traffic snarls, “the closure has left many others with a wistful sense that an annual rite of autumn and a historic Toronto landmark, are soon to be lost forever.”

But for many of Ontario’s 25,000 soybean farmers, whose crops were crushed by Victory Soya Mills, the plant closure raises more serious issues; where will they sell their crops in the future? Central Soya Co. Inc. (Fort Wayne, Indiana), the plant’s owner blames the demise “on several factors, including high municipal taxes, traffic problems and encroaching development on the city’s waterfront.” Bill Campbell, vice-president of processing at Central Soya, says the basic problem was that “the plant was unable to operate profitably in that environment.” The larger problem is that there is an excess of soybean crushing capacity in North America.

Soybean farmers point to federal policies aimed at promoting production of canola, a competing oilseed grown on the Prairies to the west. Even today, “Ottawa subsidizes the shipment of canola to Eastern Canada and, during the 1970s, handed out grants to encourage the construction of canola crushers in the West. Central Soya told the Ontario Soybean Growers’ Marketing Board that the plant might be spared if the Board could get the government to change some of those policies.

Built in 1944 during World War II, the plant was a key factor in the birth and development of Ontario’s (and Canada’s) soybean industry. Production rose rapidly during the 1970s “as continent-wide health concerns sparked a move away from animal fats to vegetable oils.” Soybeans even found their way onto Canadian dining tables in the form of margarine, salad and cooking oils, soyburgers, tofu, and soy flour in baked goods. Moreover, soybeans were increasingly used in industrial applications from printing

inks to paints, and soybean meal became the standard protein source in livestock and poultry feeds.

Today Ontario grows 95% of Canada's soybeans and 70% of these are grown in southwestern Ontario, which stretches further south than Detroit or Ann Arbor, Michigan.

Until last year, about 85% of Ontario's soybean crop was crushed in Canada yielding two value-added products: crude soybean oil and protein-rich soybean meal. But with the closure of Victory Soya Mills, about one-third of Canada's soybean crushing capacity and roughly 2 million bushels of soybean storage space have been eliminated, farmers will have to sell their soybeans anywhere they can.

Central Soya, which owns a smaller soybean crushing plant in Hamilton, Ontario, "says it is considering expanding that plant to make up for the lost capacity in Toronto.

The only other Canadian plant that crushes soybeans is ADM Agri-Industries, Ltd. (dba Maple Leaf Monarch), in Windsor, Ontario, owned by ADM of Decatur, Illinois.

It seems clear that the plant closure will hurt Ontario soybean farmers, in both the short and long terms. They may end up having more of their soybeans crushed in the United States and they will surely have to expand their markets overseas.

Photos show: (1) The Victory Soya Mills plant and silos. (2) Jim Allin, a soybean grower, standing next to a large sack of Pioneer brand soybean seed.

2433. Gaiser, Klaus. 1991. Re: Huegli acquires Soyastern, owned by Thomas Karas. Letter (fax) to William Shurtleff at Soyfoods Center, April 18. 1 p.

• **Summary:** Soyastern (Dorstener Tofu), owned by Thomas Karas, was acquired by Huegli a few days ago. Follow-up talk followed by letter (fax). 1991. June 26 and 28. In about Feb. 1991 Huegli Nahrungsmittel GmbH bought the Soyastern brand only, not the company. Soyastern Naturkost GmbH has now been moved into the same town as Huegli (address: Guettinger Str. 23, D-7760 Radolfzell, Germany), and the huge chicken factory in Dorsten, formerly occupied by Soyastern but never paid for completely, has been closed down and returned to the former owners. Yamato is producing part of Soyastern's products. The larger part has been taken over by some other factory which has been producing the tofu for Heirler (which Huegli now also owns). Alexander Moosmann from Huegli is managing director of the new Soyastern, and Thomas Karas (still located in Dorsten) works for him as director of sales and marketing for the health food market (*Naturkostmarkt*). Thomas' task is tofu product manager for the whole group/firm. Soyastern and Yamato are now working together to develop a strategy for selling more of their tofu and tofu products in Europe, primarily in the Reform market and natural/health food market. Yamato is committed to making all of their soy products from organically grown soybeans. Yamato plans to move into a larger factory soon to keep up

with their growing production. The plan now is to keep both the Yamato and Soyastern brands. The traditional/classical tofu products (such as basic tofu, smoked tofu, sprouts) will be sold under the Yamato brand, while the new/modernized European second-generation products (like tofu burgers) will be sold under the Soyastern brand. "The market for regular traditional tofu is limited and will stay limited in Germany. The growth potential lies in new, modernized second-generation European tofu products. Soybeans and soyfoods still do not yet have the best reputation here in Germany, for various reasons. Some people even think negatively of them." Things at Yamato and Soyastern are changing rapidly now but should have settled down within 6 months.

Huegli is now buying some spray dried tofu from a company in the USA or Canada. Shurtleff encourages Yamato to start making their own spray-dried tofu since this is a product which is growing very rapidly in the USA. Address: President, Yamato Tofuhaus GmbH, Rittweg 11/1, D-7400 Tuebingen-Hirschau, West Germany. Phone: 7071-71094.

2434. Harvest Direct, Inc. 1991. We couldn't keep the lid on taste this great! Introducing Midland Harvest (Ad). *Vegetarian Times*. April. Inside front cover.

• **Summary:** This full-page color ad introduces the all-new Midland Harvest Burger 'n Loaf and Taco Filling 'n Dip, both made with 100% vegetable protein. Three photos show the products used in favorite dishes. "100% Vegetable Protein."

This ad also appeared in *East West* (July/Aug. 1991, p. 37). Address: P.O. Box 4514, Decatur, Illinois 62525. Phone: 800-835-2867.

2435. **Product Name:** [Soy Beefsteak].

**Foreign Name:** Bistek de Soya.

**Manufacturer's Name:** Productos Alimenticios Soyavyn.

**Manufacturer's Address:** Planta Soyavyn, 2a Calle Poniente No. 2-4, Lourdes, Colón, Depto. La Libertad, El Salvador. Phone: 51-0705 or 23-3554.

**Date of Introduction:** 1991 April.

**Ingredients:** Incl. wheat gluten, soy flour, spices, and meat extract.

**New Product-Documentation:** Letter from Kris Duville of Productos Alimenticios Soyavyn. 1992. June 2. This product was launched in April 1991.

2436. **Product Name:** Lightlife Barbecue Grill (Vegetarian Tempeh Burger).

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** P.O. Box 870, Greenfield, MA 01302. Phone: 413-774-6001.

**Date of Introduction:** 1991 May.

**New Product-Documentation:** Talk with Michael Cohen. 1991. Sept. 17. This tempeh burger has a barbecued flavor. It

is marinated and packed with marinade in the package.

**2437. Product Name:** [GranoVita Organic Whole-Grain Tofu Ravioli].

**Foreign Name:** GranoVita Bio-Vollkorn Tofu-Ravioli.

**Manufacturer's Name:** DE-VAU-GE Gesundkostwerk GmbH.

**Manufacturer's Address:** Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

**Date of Introduction:** 1991 June.

**Ingredients:** Pasta shell: Whole wheat flour, egg, mineral water. Filling: Bio-Tofu (water, soybeans\*, calcium chloride), sea salt, fine bread crumbs, Parmesan cheese, spices. \* = Organically grown.

**Wt/Vol., Packaging, Price:** 250 gm poly pouch. Retail for DM 2.98 (6/91, Hamburg, Germany).

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm.: Protein 12.8 gm, fat 4.8 gm, usable carbohydrates 36.5 gm, calories (kcal) 240 (1021 kJoules).

**New Product–Documentation:** Label sent by Anthony Marrese of Hamburg. 1991. June. 6 by 7.5 inches. Poly pouch. Red, light green, and dark green on white. Illustration of a plate, spoon, and pot surrounded by green and red vegetables. “Vegetarian. Contains no meat.”

**2438. Product Name:** Traditional Foods Hickory Smoked Seitan, Seitan Curry, Seitan with Ginger, Seitan with Garlic & Herbs.

**Manufacturer's Name:** Santa Fe Organics.

**Manufacturer's Address:** 906 Locust St., Columbus, NC 28722. Phone: (704) 894-3132.

**Date of Introduction:** 1991 June.

**Ingredients:** Hickory smoked: Organic wheat flour\* & vegetable broth seasoned with whole bean soy sauce, onion, garlic, and natural hickory smoke. \* = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

**Wt/Vol., Packaging, Price:** Retorted in a 1 pint (16 oz) glass jar with a 2-piece canning lid. Retail for \$3.99 on the East Coast.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Talk with Lenny Jacobs.

1991. Nov. 15. The Bellemes' new seitan products are now on the market. They are expensive but good. The Bellemes were going to spell seitan as “saytan” but they got a lot of flack from the idea and decided to drop it.

Talk with Jan Belleme. 1991. Nov. 14. Santa Fe Organics (run by John Belleme) started making four seitan products in June 1991. They are made from high-protein wheat flour. The plant is located near Rutherfordton, but not on their property. The principal owner of the business, who lives in Santa Fe, New Mexico, chose the business name. Starting the business took much longer and was much more complicated than expected. They do not yet have a brochure describing the products, but every distributor who has seen them immediately wants to carry them.

Small leaflet (3 panels each side. Each panel: 6.2 x 5 cm. Black, brown, and silver on white. Front and back) sent by John Belleme. 1991 June. “All about seitan.” One panel is: “Cooking with Seitan–Traditional Foods Seitan.” Another: “Try all Traditional Foods Heat & Serve Seitan Classics: Chili Beans with Seitan. Seitan Sloppy Joe. Smokey Mt. Seitan & Beans. Pasta Sauce with Seitan & Miso. Zesty Pasta & Grain Topping.”

**Seitan** has a delicious and hearty flavor and meaty texture. In fact, it is closer to meat in texture and taste than any other vegetarian food. Ground up, you can use it to make chili, burgers, sloppy joe, lasagna, tacos and sausage, just to name a few. In chunks or slices **Seitan** makes delicious pepper steaks, stews, pot pies, Stroganoff and sandwiches.

Our **Seitan** is made the slow traditional way. We first knead organic wheat flour to develop the gluten (protein). Then we gently simmer the gluten for 3 hours in a savory broth seasoned with rich, naturally-made whole bean soy sauce, vegetables and selected herbs. Enjoy!

Our **Seitan** is made the slow traditional way. We first knead organic wheat flour to develop the gluten (protein). Then we gently simmer the gluten for 3 hours in a savory broth seasoned with rich, naturally-made whole bean soy sauce, vegetables and selected herbs. Enjoy!

Talk with John Belleme. 1992. March 7. He makes his seitan using a seitan machine that he ordered from Muso in Japan.

Talk with a reporter. 1992. March 12. John Belleme believes that it is not good to make seitan starting from vital wheat gluten, since the latter is made from white flour and the finished raw gluten does not absorb flavors nearly as well as raw gluten made from whole wheat. This reporter found that the Bellemes' products had a flavor and texture that was remarkably similar to that of meat.

Labels for all 4 products sent by Santa Fe Organics. 1992. April. 8 by 2.5 inches. Two pastel colors plus white. Illustration of ears of wheat. Hang tag (neckhanger: 2.5 x 2-inch, 6-panel leaflet) attached to neck of jar with a rubber band. "Seasoned Wheatmeal. All natural vegetarian entree. Please recycle this container. Printed on recycled paper. Copyright 1991 Santa Fe Organics."

**2439. Product Name:** California Dream Burger. Reamed Dream Burger in Aug. 1993.

**Manufacturer's Name:** Season's Harvest.

**Manufacturer's Address:** 52 Broadway, Somerville, MA 02145. Phone: 617-628-1182.

**Date of Introduction:** 1991 June.

**New Product–Documentation:** Talk with Ademar Reis. 1993. Nov. 29. He introduced this consumer retail product, made with tofu powder (purchased from Minnesota Waxy) and textured soy protein concentrate, in about June 1991. The name will soon be changed to Dreamburger so it can be copyrighted.

2440. Folkers, Doerte. 1991. Verbraucherwissen ueber Soja als Naehrstoffquelle und Lebensmittel [Consumer knowledge of soya as a source of nutrients and a food]. In: F. Meuser and P. Suckow, eds. 1991. Soja in Lebensmitteln: Vortraege 2. Hamburger Soja-Tagung. Berlin: Technische Universitaet Berlin, Institut fuer Lebensmitteltechnologie und Gaerungstechnologie–Getreidetechnologie. 171 p. See p. 9-21. [10 ref. Ger]

• **Summary:** Discusses German consumer attitudes toward soya and plant proteins based on surveys using 8 questions with 2,000 people in 1989. When asked which of 9 foods on a list were important sources of protein, those foods receiving the highest percentage of responses were fish (85.3%), meat (72.4%), soybeans (50.3%, up from 39.0% in 1978), and butter (41.0; even though it is mostly fat and contains almost no protein). When asked if people need more or less protein, 39.3% said "about the same as before," 33.6% said "more," and 25.5% said "less."

When asked if people should consume more plant protein or animal protein, 61.3% said more plant protein and therefore less animal protein, 19.5% said "same as before," 12.9% said that it makes no difference since "protein is protein," and 5.4% said more animal protein and therefore

less plant protein.

"One source of plant protein is the soybean. Do you know if the soybean is used as a food or in foods?" 48.3% said they did not know. 37.2% said yes, as a food. 28.0% said yes, in foods.

"Which foods are you aware of in which soya is used?" Soya oil 34.1%, in breads and baking 26.3%, soy sprouts 17.8%, soy sauce 14.6%, in convenience prepared foods (*Fertiggerichten*) 9.7%, in sausages and cold cuts 8.9%, in meat substitutes 7.7%, as soybeans 7.6%, in noodles and pasta 7.0%, tofu and tofu products 6.9%, soybean flour 5.9%, vegetables 5.8%, salads and raw foods 5.4%, soyburgers or patties (Soja-Bratlinge) 4.1%, soymilk 4.0%, other 15.0%.

"I will read you a list of foods in which soya is used. Please tell me if you have heard of it, tried it, or purchased it." (percentage responses): Soy oil 70.5%/24.2%/17.7%. Raw soy sprouts 55.5%/24.0%/14.4%. Soy sauce 54.5%/28.1%/17.6%. In bread 39.5%/19.6%/14.2%. In convenience prepared foods 28.5%/10.0%/6.5%. Soyburgers or patties 21.3%/7.3%/3.5%. Soymilk 19.4%/4.0%/1.8%. Tofu and tofu products 18.6%/7.6%/4.6%. In noodles or pasta 17.6%/5.9%/3.4%. Address: Inst. fuer Ernaehrungsoekonomie und -soziologie der Bundesforschungsanstalt fuer Ernaehrung, Stuttgart, Germany.

2441. MacNeil/Lehrer Newshour. 1991. Dwayne Andreas, ADM, Vege Burgers, and investing in the Soviet Union. Television broadcast. PBS. July 15. Based on a report by Paul Solman. [1 ref]\*

• **Summary:** The Café Grill in Moscow, one of the hottest restaurants east of Sweden, sells 4,500 Vege Burgers a day. Both the owners and the customers are Soviet, but the burgers are shipped from America's heartland. "The fabulously successful, cholesterol-free Vege Burger. Behind it stands a huge U.S. firm that could invest hundreds of millions of dollars in the USSR. You look at the success of a Vege Burger in the Soviet Union and you can imagine Mikhail Gorbachev thinking that his could look like ours here in the U.S. some day. All he needs is some time to turn the system around and enough capital. So as Gorbachev makes the rounds at the Economic Summit in London this week he's thinking about capital and how to raise it..."

"We went to see someone whom Gorbachev has turned to for advice since his days as Agriculture Minister, the head of the \$8,000 million Archer Daniels Midland Corporation, and incidentally the man behind the Vege Burger, known as Mr. Agribusiness, Dwayne Andreas," who has built an empire on the soybean. Its cheap, plentiful, and thus (he thinks) an ideal food for a hungry Soviet Union. He is actually selling Vege Burgers in the USSR. He notes that "we have shipped enough to the Soviet Union, and most of it is already sold, to make 14 million patties." And he has noticed, contrary to what is generally believed in this country, that the Soviet people have a lot of money on their pockets and

a lot of savings, partly because they have not had a lot of goods to buy. So there is a ready market for Vege Burgers and the rubles are available. To avoid getting stuck with lots of rubles that are not readily convertible to dollars, Andreas has set up a tricky bartering arrangement, essentially trading his Vege Burgers for petroleum, which will then be sold for dollars. Andreas hopes to put a patty freezing machine in literally every major Soviet city. Plus, he wants to build a processing plant like the one at corporate headquarters in Decatur, Illinois, that would be a \$100 million dollar investment all by itself. The main obstacle to Andreas is getting the Soviet Union to recognize the right of private ownership. That is the key. Once he has that right, he would keep the money in the Soviet Union rather than taking it out. The Soviets have got to make their country as comfortable as California for investors, “then we’ll all be glad to have assets there.” Andreas’ first small step in that direction is the Vege Burger, a staple at the ADM executive dining room in Decatur. The boss (Andreas) eats them at least 3 times a week. Solman remarks that his Vege Burger doesn’t taste any different from the hamburgers sold at McDonald’s, just a little smoother consistency. What does Andreas think are other main problems with the Soviet economy? It is far too centrally controlled. Fixed prices distort the market, created a black market, and cause farmers and housewives to hoard. The answer is a market economy. And the time to help the Soviets is now—while the window of opportunity is open. If it closes and things slide backwards, the West might have to wait another 70 years.

2442. Pringle, W. 1991. Soya protein, past experience & future potential. In: F. Meuser and P. Suckow, eds. 1991. Soja in Lebensmitteln: Vortraege 2. Hamburger Soja-Tagung. Berlin: Technische Universitaet Berlin, Institut fuer Lebensmitteltechnologie und Gaerungstechnologie–Getreidetechnologie. 171 p. See p. 153-59. [4 ref]

• **Summary:** Contents: Introduction. Potential uses of soya bean. Past product launches. Soya product as a foodstuff.

A certain Mr. Robert Whympier was probably the first person to show Europeans how the functional character of soya proteins could be exploited. He returned to England in 1923 after a trip to Japan with a suitcase full of soya beans and a head full of ideas. He carried out a series of experiments using soya flour as an ingredient of the dough in the breadmaking process. This work culminated in the granting of a British Patent in 1926. The patent described conditions of unusually vigorous dough mixing which allowed for the maximum inclusion of air. Very substantial improvements in the colour of the bread crumb and the volume and quality of the bread were observed. We now know that this bleaching and improving effect is a direct result of a coupled oxidation reaction involving the lipooxygenase enzyme present in the soya flour. The breadmaking industry of Europe now uses thousands of

tonnes of enzyme-active soya flour every year as a bread improver.

“The work of Whympier and his associates continued and in the early 1930’s a heat processed full fat soya flour appeared on the market.”

Henry Ford, a man of vision, initiated the next phase in the development of soya proteins for human food. In the early 1950’s [sic, mid-1930s] he put together a team to work on the isolation of pure protein from soya and the subsequent spinning of this protein into a stable fibre.” After his scientific team was disbanded, the expertise was not lost, for the scientists found places in food companies and began to look at the use of isolated soya proteins in the food industry. It is now well established that isolated soya proteins have functional uses for binding and emulsification, and for improving nutritional value. “More controversial and newsworthy was the attempt by the old Ford researchers to produce textured protein products to simulate meat and other traditional protein foods. They did this by two processes: (1) The spinning of isolate into fibres, using technology from the textile industry; (2) The extrusion of soya bean meal under conditions of high temperature and pressure... Branded food products based on these textured soya proteins were launched on the market in the late 1960s and all during the decade 1970-1980.”

During the early 1970s the future looked a little bleak due to the world population explosion, the world energy crisis (precipitated by OPEC), and the world food crisis (which was more specifically a protein crisis). The first World Soy Protein Conference, held in Munich in 1973 with over 1,000 delegates, was a very important affair. “The U.S. Secretary of Agriculture, Mr. Earl L. Butz, opened the conference. Senator Hubert Humphrey made a memorable inspirational address... I was there and I can tell you we all thought we could make a big impact on the world’s on the world’s problems by supplying textured soya protein.”

Against this background, many such products were launched in the U.K. in the mid-1970s by major food companies. All but Kesp were based on textured soya flour: 1975 Feb.—Mince Savour by Nestle; 1975 May—Country Meadow by Brooke Bond Oxo; 1976 Jan.—Soya Choice by Cadbury; 1976 April—Economince by Spillers; 1976 Sept.—Kesp by Courtaulds (made from spun soy protein fiber).

“All of the products enjoyed real success for a period of time. In particular Cadbury’s Soya Choice sold well for about three years in every area of the U.K. Sad to relate, however, all of them quietly and gradually lost sales and finally disappeared from the market. It is important to know why... People did not want a substitute food; this was a challenge to their security, a threat to the comfortable familiar world.” The consumers of today have become more “green.” “It is clear to me, the emotional conditioning that sees security in the consumption of traditional animal foods is being replaced by the more logical attitudes of a new

generation. The young people of today want to find ways to preserve the environment and they have an increased perception of health problems that may be caused by the consumption of animal products, especially animal fat. These and other factors are making vegetarianism more attractive.

“A recent Gallup poll has shown, in the U.K., that 3% of the total population are vegetarians. A total of 8.5% are either totally vegetarian or avoid red meat, and 9.3% of children are vegetarian. Vegetarianism has moved from being a refuge of cranks to being fashionable.”

A new product popular among yuppies is Quorn, a textured fungal protein, marketed by ICI and RHM via Sainsburys and other selected suppliers. Address: The British Arkady Co. Ltd., Manchester, England.

2443. Spaid, Elizabeth Levitan. 1991. Give me a burger—Hold the meat: A widening variety of dishes enliven the plant-based diets of today’s vegetarians. *Christian Science Monitor*. Aug. 1. p. 14.

• **Summary:** Vegetarian diets are no longer bland or uninteresting (if they ever were). Today’s vegetarians enjoy a rich variety of flavors, and sound nutrition. A new generation of vegetarian adults are raising their kids on healthy vegetarian or vegan diets. They also know more about nutrition. And a much wider variety of vegetarian foods and cookbooks are easily available. Almost every supermarket now carries tofu, frozen meat alternatives, all kinds of fruits and vegetables, breakfast cereals, etc. There are now alternatives to almost every meat, dairy, or egg product—from tofu dogs to soy cheese, from eggless mayonnaise to fake bacon made of tempeh—not to mention soy milk and soy ice cream. In short, there are a great many more things to eat in the plant kingdom than in the animal kingdom.

“Many people wince when they hear the word ‘vegetarian,’ thinking tofu (a cheese-like food made from soybeans) and salad are the staples of such a diet.” But vegetarians know this is a myth.

For many people discovering the rich, varied, and delicious flavors is a big discovery, a real and happy surprise. When many people decide to “go green” they also decide to give up meat, which is so destructive to the environment. Others believe it is ethically wrong to kill and eat animals. Still others believe that a vegetarian diet is more healthful.

Tofu can be used in a remarkable number of ways, and made to blend in so one doesn’t even know its tofu. Delicious sauces can be made out of “silken tofu and miso,” and people think they are eating some type of rich cream sauce.

2444. Kane, Marion. 1991. The cutting edge: Sink teeth into vegetarian fare. *Toronto Star (Ontario, Canada)*. Aug. 28. p. C3.

• **Summary:** At the seventh annual Vegetarian Food Faire at Harborfront’s York Quay Centre, there will be plenty of

mouth-watering food and info to get your teeth into. But there won’t be any meat.

The Faire will be held on Sept. 7 and 8, from 11 a.m. to 6 p.m., sponsored by the Toronto Vegetarian Association. It “addresses what the group calls the ‘four cornerstones of a vegetarian lifestyle: health, animal rights, environmental concerns and the elimination of world hunger.” Soy City Foods will be there to prepare barbecued veggie burgers, tempeh stew, vegetable curries, tofu pot pies, and non-dairy brownies.

Dr. David Jenkins, of the Univ. of Toronto’s nutrition department will explain the nutritional benefits of a vegetarian diet.

A large photo shows Penny Cassel of Soy City Foods as she shows off her Tempeh Reuben sandwich, a vegetarian delight. “Tempeh is an Asian food prepared by fermenting soybeans.”

2445. **Product Name:** Mushroom and Tofu Stroganoff.

**Manufacturer’s Name:** Culture Foods Ltd.

**Manufacturer’s Address:** 4 All Saints Workspaces, 75 Raleigh St., Nottingham NG7 4DL, England. Phone: (0602) 788963.

**Date of Introduction:** 1991 August.

**Wt/Vol., Packaging, Price:** 12 oz (340 gm) aluminum foil container with paperboard sleeve. Retail for £1.69.

**How Stored:** Frozen.

**New Product–Documentation:** Label sent by Alison J. Clark of Culture Foods Ltd. 1991. Aug. 23. 5.76 by 4.5 inches. Orange and turquoise blue on white. Heavy paper sleeve. Logo resembling the Vegetarian Society’s “V” but with a sunflower growing out of it. “No animal ingredients. Marinated tofu in a creamy mushroom sauce. No artificial additives of any kind. Tofu is a protein rich soya bean curd.” A letter adds that the company, a worker’s co-operative, sold its first order on 8 Aug. 1991.

2446. **Product Name:** Granose Vegetarian Wholefood Kitchen Vegetarian Sausages.

**Manufacturer’s Name:** Granose Foods Ltd.

**Manufacturer’s Address:** Stanborough Park, Watford, Herts., WD2 6JR, England.

**Date of Introduction:** 1991 August.

**Ingredients:** Water, textured defatted soya flour (defatted soya flour, iron, thiamin, riboflavin, vitamin B-12), hydrogenated vegetable oil, rusk, stabiliser (methyl cellulose, of plant origin), sea salt, hydrolysed vegetable protein, herbs, spices, colour (beetroot red).

**Wt/Vol., Packaging, Price:** 270 gm paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 100 gm.: Energy 190 kcal (calories; 790 kJ), protein 6.9 gm, carbohydrate 12 gm, fibre 4.5 gm, fat 13 gm.

**New Product–Documentation:** Part of label sent by Leah Leneman. 1992. Jan. 2. 6.5 by 3.75 by 1.12 inches. Black,

blue, white, and yellow on gray. Color photo of browned sausages on a plate with sliced tomatoes, green beans, and sliced browned potatoes. “Individually frozen sausages of seasoned soya protein. Six sausages. No artificial colours or preservatives.”

**2447. Product Name:** Veggie Life Burgers (Vegan Burgers).

**Manufacturer’s Name:** McLaud Partnership. Later renamed Laudisio & McClain Partnership.

**Manufacturer’s Address:** Made at Kitchens, Inc., San Rafael, CA 94901. Phone: (415) 927-0236.

**Date of Introduction:** 1991 August.

**Ingredients:** Brown rice, tofu, green peppers, onions, mushrooms, carrots, sunflower and sesame seeds, oat flour, vital wheat gluten, tamari, garlic.

**Wt/Vol., Packaging, Price:** 2 patties per 7 oz. retail pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter (typed on letterhead) from Steve Demos, owner of White Wave, to Leonardo Laudisio of Veggie Life, 46 Lucky Drive, Greenbrae, California 94904. 1992. July 20. Demos thanks Laudisio for a very enjoyable dinner with wine last week and summarizes their discussion. Veggie Life would like White Wave to manufacture, private label, and vacuum pack its baked and frozen Veggie Burger. White Wave believes that it can produce the product for about 16-29% less than it presently costs Veggie Life. Veggie life will supply all labels and boxes.

Natural Foods Merchandiser. 1993. May. p. 6. “White Wave purchases Veggie Life.” In March, White Wave, a soyfoods manufacturer in Boulder, Colorado, acquired

the rights to manufacture Veggie Life vegetarian burgers from Laudisio Veggie Life, also based in Boulder, for an undisclosed sum. “Laudisio president Leonard Laudisio has been retained by White Wave as corporate chef to market the tofu company’s products to food service providers.”

Talk with Leonardo Laudisio. 1993. May 21. He started this company in San Rafael, California, about 3 years ago and introduced Veggie Life in the summer of 1991. The original recipe was developed in New York and passed on to him. Originally tofu was the main ingredient, followed by brown rice. But some customers thought they would not like tofu, so Leonardo made brown rice the main ingredient, followed by tofu and vital wheat gluten. Initially he sold the product at Grateful Dead concerts (he followed the group around) and at performances sponsored by Bill Graham Presents.

Labels sent by Leonardo Laudisio. 1993. June 15. A 1-page photocopied leaflet (black on white) titled “Veggie Life Burgers: Bulk Price List” states that there are 9 units per vacuum pack, each 3.5 oz. and 4 inches in diameter. The price per pack is \$6.75. The product has a 30-day cold shelf life and is freezable. A label 4½ by 3¼ inches, black on white photocopy, bears the name Veggie Life Burgers: The healthy vegan\* alternative. It lists the ingredients shown above, \* = No eggs, meat, or dairy. Net weight per patty 3.5 oz. “Produced in Kitchens, Inc.; San Rafael, CA 94901. McLaud Partnership (415) 927-0236.

Note 1. McLaud is a name combining McLain and Laudisio. McLain was a person who helped in formulating the recipe, but who never actually became Laudisio’s partner; he could not stand the risk.

Note 2. This is the English-language document seen

(Nov. 2014) that contains the term “Veggie Life Burgers” (or “Veggie Life Burger”).

The second label is 3.75 by 3.25 inches. Black on white photocopy. “The healthy vegan\* alternative. Complete protein. Pre-baked, just heat in toaster, microwave, oven, on grill or barbecue. Perishable keep frozen or refrigerated. No preservatives, artificial colors, or colors.”

The third label, 4.5 inches in diameter, printed two on glossy leaflet, is similar to the second, except that the company name is now Laudisio & McLain Partnership. Below the label is written: “Veggie Life Burgers for a healthy body and environment. Colorado agent: 303-231-9938. California agent: 927-0236. Distributed by Natural Food Purveyors (415) 289-9522.” These patties were always retailed in 2 patties per pack. In the beginning they were sold fresh in the dairy case; later they were sold frozen.

The fourth label is 3 5/8 inches diameter. Self adhesive. Yellow and green, with a grain symbol curving around each side. The product name, subtitle, phone number, and ingredients are the same except that the “organic tofu” [not the soybeans] is said to be “Grown in accordance with California Organic Foods Act 1990.” The company now seems to be named “Veggie Life” and near the bottom of the label in small letters is written “Leonardo Laudisio.”

2448. Pickarski, Ron. 1991. *Friendly foods: Gourmet vegetarian cuisine*. Berkeley, California: Ten Speed Press. 277 p. Illust. Index. 23 cm. [23 ref]

• **Summary:** This is a stylish vegan cookbook, with a wealth of sophisticated and delectable soyfoods recipes. The author recommends only high-quality ingredients. Brother Ron grew up in Michigan and during high school spent time in the restaurant business flipping hamburgers. Later he became a Franciscan monk (OFM). A look at his own health revealed the need to change his diet. So Brother Ron changed to a natural vegetarian diet and experienced weight loss and renewed energy. Now he considers himself a food missionary—helping people transform their lives through food. Friendly foods are “foods that are friendly to our bodies, our pocket books, our busy schedules, and our environment.”

In the section on dairy-like products, the author recommends soy milk and some “tofu ice creams.” He recommends use of soy cheeses sparingly since they are high in fats (especially the softer types). He considers nondairy creamers to be a less healthful than their dairy counterparts, since they are high in saturated fats and artificial additives. “Typically, nondairy creamers contain corn syrup solids, partially hydrogenated vegetable oil (including coconut oil, cottonseed oil, palm oil, or palm kernel oil), sodium caseinate, sodium phosphates, mono- and diglycerides, sodium silico aluminate, and artificial color. I do not consider this type of product to be an example of a high-quality food.”

Soy-related recipes include: Marinated vegetables with

marinated tofu (p. 41). Shish kebabs (with marinated tofu, p. 42). Marinated tofu with scallions (p. 43). Gefilte tofu with horseradish and charoset sauce (p. 49-50). Zucchini bisque (with tofu, p. 66). Tofu wakame salad (p. 82). Tofu cottage cheese (p. 89). Vegan sour cream (with soy milk, p. 90). Soy mayonnaise (with tofu, p. 90). Silken tofu mayonnaise (p. 91). Lemon cream dressing (with tofu, p. 92). Oil-less miso dressing (with soy milk and white miso, p. 96).

In the chapter on entrees, there are detailed descriptions of tofu, tempeh, and seitan. Soysage (with cooked soybeans and soymilk, p. 105). “Meatballs” (with cooked soybeans, p. 107). American loaf (with silken tofu, p. 112-13). Tofu spinach pie (p. 120). Auberge Hanfield pie (with silken tofu, p. 121). Russian vegetable pie (with silken tofu and tofu cottage or ricotta cheese, p. 122). Greek moussaka (with tofu topping, p. 128-9). Sweet and sour tempeh (p. 133). Southern fried tofu (p. 134). Tofu Swiss steak (p. 135). Tempeh stew (p. 136). Thanksgiving day tofu (p. 137). Tofu Jamaican run down stew (p. 138). Tofu paneer (p. 139). Seitan (p. 140-43). Seitan à la Normandie (p. 144). New England boiled dinner (with tofu or seitan, p. 145). Seitan Parmesan (with vegan cheese made with tofu, p. 147-48). San Francisco stir-fry (with seitan or tofu, p. 151). Berner platte (with protein accompaniments made with tofu and Soysage, p. 155-56). Vegan Béarnaise sauce (with silken tofu, p. 161). Miso sauce (p. 164-65). Tahini lemon sauce (with silken tofu, p. 165). Steamed kale with lemon miso sauce (p. 176).

In the dessert section, there is mention to tofu chocolate as an alternative to chocolate. Carob cake (with tofu chocolate, p. 217). Chocolate cream couscous cake (with filling made with silken tofu, p. 220). Silken tofu chocolate “cheesecake” (p. 221). Key lime shamrock torte (with silken tofu, p. 222). Raspberry sabayon sauce (with silken tofu, p. 232). Tofu chocolate “buttercream” icing (p. 234). Tofu chocolate ganache (p. 234-35). Mocha grain coffee (with any grain coffee substitute, cocoa, brown rice syrup, and soy milk, p. 238). Christmas soy nog (with soy milk and lecithin granules, p. 238).

The last section of the book, titled “The Culinary Olympics,” gives recipes that Brother Ron prepared while competing in these Olympics, starting in 1978. These Olympics are held every four years at Frankfurt, Germany, by the International Cooks Society. The American Culinary Federation is the U.S. organization that promotes the competition. “In 1978 I won a gold medal in the national competition, which qualified me to compete in the 1980 Culinary Olympics. In 1980 I founded the American natural foods team and, with this team, international competition to gain widespread competition for vegetarian cuisine. In that year, I became the first professional vegetarian chef to compete in the Olympics and win a medal for totally vegetarian foods. I also competed in 1984 and 1988... My team won bronze and silver medals in all three years that we entered the competition.” Soy-related recipes dominate this

section, and include: Baked tofu pâtés (spinach, tarragon, or carrot, p. 241-42; won a bronze medal in 1984). Tofu and sea vegetable quenelles (beet, spinach, or carrot, p. 243-45; won a silver medal in 1988). New York cima roll (with tofu, p. 248-49; won a silver medal in 1988). Tofu seitan Wellington (p. 250-51; won a bronze medal in 1984). Vegan London broil (with seitan, miso, and tamari, p. 251-52; won a bronze medal in 1984). Southern blackened tempeh with tomato-apricot-ginger coulis (p. 253-54; won a silver medal in 1988). Carrot cream in squash shell (with soy milk and tofu, p. 255-56; won a silver medal in 1988). Chocolate squash confection (with Tofu Chocolate Ganache, p. 259-60; won a silver medal in 1988). Address: O.F.M., St. Anthony's Shrine.

2449. Cohen, Michael. 1991. Early work with soyfoods, The Farm, Laughing Grasshopper, New England Soy Dairy, and The Tempeh Works (Interview). *SoyaScan Notes*. Sept. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Michael's interest in soyfoods began in about 1971-72 when he became a vegetarian, while living communally with friends in Boston. He was interested in Eastern religions and philosophies, Ram Dass, Be Here Now, Hatha Yoga, etc. He probably tasted a little tofu at this time.

In early 1972, Michael took a trip to California, first met Stephen Gaskin, and got introduced to Stephen's Monday Night Class—a week before Stephen's community left (on 10 Feb. 1971) for Tennessee to buy the land that in Sept. 1971 would become The Farm. Michael returned to Boston and worked for the next 9 months to save money. In 1973 he left the USA for a year to travel on an undirected personal spiritual adventure to India, Israel, and the Middle East. While he was in India, various people in Boston with whom he was living communally got more closely involved with The Farm in Tennessee.

In the summer of 1974 Michael moved from Boston to Amherst, Massachusetts, where he got involved in a vegetarian, natural foods restaurant named Equinox. It was a 4-person partnership founded by Judy Roberts (who later married Tom Timmins); Michael was their first employee. Eventually he became a partner. The main dishes in this small natural foods luncheonette were soups, sandwiches, and salads. They occasionally prepared a soy burger from soybeans or a stir-fry tofu dinner entree. Michael worked there for about a year until there were 6-7 partners, then he and his girlfriend (Shelley Moore, who was also working there and was to become his first wife) decided (as did Judy Roberts) to leave. The restaurant soon moved into very large quarters, took on large debts, and eventually went bankrupt.

Michael and Shelley (who was from Memphis, Tennessee) left for a short tour of the southeastern United States. For most of the next 2 years he lived on The Farm in three different locations. Starting in late 1974 he and Shelley lived for 7 months on the 40-acre Virginia Farm, a satellite

of the Tennessee Farm in Louisa, Virginia. During that time Michael and Shelley were married. Soybeans were grown along with vegetables and corn on this farm, and the women made soymilk in the kitchen at least twice a week and (as a treat) tofu and/or soyburgers (from mashed soybeans) every week or two. All meals were strictly vegetarian, with no dairy products or eggs. Soymilk was a staple in the diet.

Then they moved to Brattleboro, Vermont, and lived for 1-2 months with Tom and Judy Timmins in their home. Tom was working for Llama, Toucan & Crow, a worker-owned natural foods distributor. Michael then got a job working for Llama. About 6 months later, Llama (which was not making it financially) sold out to their current owner, Barclay McFadden of Stow Mills. At the time of the sale, Tom left Llama and went into partnership with Ira Leviton and Kathy Whelan in the Laughing Grasshopper Tofu Shop.

By this time Michael and Shelley had become much more interested in tofu; they were eating it frequently, had gotten a copy of *The Book of Tofu* by Shurtleff and Aoyagi, and were thinking / dreaming about starting their own small tofu plant in Brattleboro—40 miles from Laughing Grasshopper in Millers Falls. Tom Timmins convinced Michael to become a partner in Laughing Grasshopper rather than becoming a nearby competitor. So Tom left Llama, made a couple of runs into Boston driving the Laughing Grasshopper van to distribute the tofu and feel out the company, and in Feb. 1977 paid \$2,000 to \$2,500 to become a partner in Laughing Grasshopper. He did mostly production, but also delivered tofu to Boston and went to stores to try to pick up new accounts. Tom was more the “numbers person” and Ira fancied himself to be “the tofu master.” It all worked pretty well. The company had only one product—nigari tofu. Michael does not recall them making or distributing any tofu pies or cheesecakes.

During this period, from early spring until June, Michael and his family lived on a local satellite of The Farm in Montague, Massachusetts, next to Millers Falls.

In Nov. 1977 Laughing Grasshopper moved to Greenfield and changed its name to New England Soy Dairy. At that time Steve Hassell was brought in as a controlling partner; he invested \$40,000 in the company—money which the company needed and did not feel it could obtain from a bank. On 20 November 1976 Michael and Shelley had their first child. Ira told Michael, “I just hope you have your child on a Saturday so that it doesn't interfere with work.”

Shortly after the move to Greenfield, before the company got back into tofu production, Michael decided to take a temporary leave of absence from the company, in part because he and Shelley decided they wanted to have their second child (soon to be born) on The Farm in Summertown, Tennessee. Michael left in June 1978 and Joshua was born in September. They stayed on The Farm until Nov. 1978. After living in Summertown for several weeks Michael and Shelley (as was the custom) donated all of their savings

(about \$5,000) to The Farm—permanently.

On The Farm, because of his experience at Laughing Grasshopper, Michael was considered to be a fairly knowledgeable soy person, so he went to work in the soy dairy, where the main product was soymilk (fortified with vitamin B-12 and usually sweetened with sugar); a little tofu was made occasionally. After Michael arrived, the soy dairy started making much more tofu for the 1,850 Farm residents. Typically they now made tofu twice a week, and 500 pounds each time. The people loved it. No single person in the Soy Dairy was particularly knowledgeable in making soyfoods; it was run by a rotating crew. Tempeh was made in a separate building, the Lab, by Cynthia Bates and Alexander Lyon. Michael had first learned of tempeh when he, Ira, and Tom had visited Dr. Keith Steinkraus at Cornell Univ. But at The Farm he first had a chance to taste it (“It knocked my socks off”); unfortunately, he never had a chance to make tempeh on The Farm. Michael found the experience at The Farm, with its many equipment breakdowns, extreme poverty, and wasted time to be very frustrating; he was used to running a business efficiently.

After 5-6 months, in Nov. 1978, Michael and his family left The Farm—penniless. Returning to live briefly at the Montague Farm and work at New England Soy Dairy, he found that there was no solid position for him, so he was put in a temporary R&D position. But after a month or two, the Soy Dairy no longer felt like the place he wanted to live and work. Fortunately in Jan. 1979, Michael’s father offered to lend him \$30,000 to start his own business. A year earlier, Bernie Cohen at the Montague Farm had invited Michael to join in starting a tempeh business, but Michael declined saying, “It will never fly.” But this time, within a few weeks, Michael decided to establish The Tempeh Works. The Soy Dairy partners were supportive of Michael’s leaving, especially since they planned to focus on dairylike products and no longer planned to make tempeh. In March of 1979 Michael rented a space for the business in Greenfield and he made his first batch of tempeh there in July. It was served at the annual Soycrafters Convention in Amherst. The company began regular production in September 1979. The Tempeh Works was America’s first Caucasian-run company to make only tempeh in a commercial building. Address: President, Lightlife Foods Inc., P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 413-774-6001.

2450. Cohen, Michael. 1991. Recent developments at Lightlife Foods (Interview). *SoyaScan Notes*. Sept. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Since it began making soy tempeh as The Tempeh Works in 1979, Lightlife Foods has evolved into a company that each year receives about half its income from tempeh and half from tofu. At the peak of hot dog season, 65-70% of sales may come from Tofu Pups and other tofu-based products. In response to tempeh burgers

and 5-grain tempeh air-freighted in from California, The Tempeh Works launched 3-Grain Tempeh in May 1982, New England Tempeh Burgers in July 1982, and a line of early Tempté spreads in early 1984. Based on projected growth in sales, the company borrowed \$250,000—a large amount for relatively small company. They moved into a new building in the summer of 1984, and actually purchased it in the summer of 1985. This is the building they are located in now.

With new large payments of interest and principal, the company experienced increase competition from other tempeh companies (Appropriate Foods, Soyfoods Unlimited) plus a slowing in growth of the total tempeh market. To try survive with minimal capital investment, Michael proposed to Bob Davis of Light Foods that The Tempeh Works serve as a master distributor of Bob’s Light Links (a tofu hot dog made in Sacramento, California, and shipped frozen to Massachusetts). Michael sent the Light Links to his distributors along with orders for his tempeh products. Soon problems developed. First, Light Links contained eggs and Michael was getting many requests for eggless tofu hot dogs. Second, in the peak summer season, many of Michael’s orders for Light Links were either not fulfilled or delayed 2-3 weeks; this created a bad relationship for him and the accounts that carried his tempeh. Third, Light Foods did very little promotion of its Light Links by offering discounts, whereas Tempeh Works did lots of discounting—creating more problems with retailers or even lower margins for Michael on the Light Links. In addition, as soon as Michael started to sell a lot of tofu hot dogs and realized what low margins he was earning, he started to think about making such a product himself. One day Tom Timmins of New England Soy Dairy (a large local tofu maker) and Michael sat down at Tom’s kitchen table and worked out a plan for Tempeh Works making their own tofu hot dog. But since he had no money to buy equipment, Michael then went to the National Rural Development and Finance Corp., a federally-funded economic development organization in Washington, DC. They had picked Massachusetts as one of their 4 demonstration states. Michael got a loan for \$50,000 based on a plan to build the tofu hot dog to a point where he could carry the debt of increasing the size of their plant buying their own equipment. The plan went like clockwork. Lightlife Meatless Tofu Pups were launched in Sept. 1985. For the first 2-2½ years, they were co-packed at a plant about one hour away, then they were made entirely in-house. On 14 Oct. 1987, reflecting the new diversification, the name of The Tempeh Works was changed to Lightlife Foods, Inc. After a year’s work, Michael pulled together a \$750,000 loan package in May 1988, rolling his former \$250,000 loan into it. Today the company is in good shape.

Today, the company’s best tempeh products are: (1) The 3-product line of tempeh grills (marinated tempeh burgers, in American, lemon, and barbecue flavors); the three outsell soy tempeh two-to-one. The 18-burger institutional

packs, 3 packs per case, also sells very well to natural foods restaurants, retail stores with a lunch counter, and colleges. (2) Soy tempeh (both in a retail and institutional sizes). Many colleges use it in a stir fry, stroganoff, breaded cutlets with mushroom gravy, etc. During the last year Lightlife has had a full-time sales person developing the institutional market. (3) Fakin' Bacon. In addition, Lightlife has just picked up its first airline account. People like tempeh but its unsightliness (mold on the surface) is a big barrier. So second-generation tempeh products are the answer to this problem.

Of Lightlife's tofu products, Tofu Pups are by far the best-seller. They are a "mega-product" for the company. The next best seller is Lean Links Italian, then Foney Baloney.

Looking at the company as a whole, it is in great shape. The past year "has been an absolutely superb year for us." Sales are rising every month and the future looks bright. The big gambles that Michael has taken with large loans have really paid off. The company is now well organized and tight at all levels, especially the core group of around 8 people. "We run a tight ship and we don't spend a dime that is not going to make us money. We're careful. We've taken it slow. One big mistake was taking on a frozen natural cookie dough, totally outside the company's field. We almost lost our shirts on it in a big way. We're committed to bringing out 3-4 new products a year. We're also realizing that the natural foods business is a good one. We're not as interested as we once were in banging our heads against a wall trying to get into supermarkets. If they want us, we're glad to go in, but we're not going to pay them \$5,000 to \$10,000 per product to get in."

Looking at the next 5 years, the growth appears to lie in prepared (second-generation) products, both in the retail and institutional markets. Address: President, Lightlife Foods Inc., P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 413-774-6001.

2451. Archer Daniels Midland Co. 1991. Annual report. P.O. Box 1470, Decatur, IL 62525. 33 p. Sept.

• **Summary:** Net sales and other operating income for 1991 (year ended June 30) were \$8,468 million, up 9.2% from 1990. Net earnings for 1991 were \$466.7 million, down 3.5% from 1990. Shareholders' equity (net worth) is \$3,922 million, up 9.8% from 1990.

"Foreign oilseeds operations were strengthened with the acquisition of a major softseed plant in Erith, U.K., and several plants in Canada. Soy protein facilities currently being added to the Europort plant in The Netherlands should be in operation by year's end and a marketing arrangement to supply Lodens Croklaan, B.V., with soy protein concentrate gives the plant a good production base to begin operations."

"ADM now operates 136 U.S. processing plants and owns, or has an ownership interest in, 34 foreign plants in seven countries. The Company 149 terminal, country, and

river grain elevators." A 2-page color photo (p. 2-3) shows "ADM's Europort plant, near Rotterdam, the world's largest soybean processing facility. Construction is underway for the addition of a vegetable oil refinery, soy protein plants and a second cogeneration unit." ADM's "oilseed processing operations operated at lower profit levels. Export margins were reduced due to heavily subsidized South American and European oilseed product sales."

"The protein specialties division expanded its position as the world's largest supplier of value-added soy proteins this year. Construction began on a facility at Europort to produce soy protein concentrates, isolated soy proteins and the specialized raw material from which these products are formulated. The facility will serve the growing demand in Europe and the USSR for food and animal feed ingredients.

"ADM will produce a line of soy protein concentrates which Lodens Croklaan will market to the animal feed industry in Western Europe. The combination of ADM's production technology and Lodens Croklaan's leadership position in the animal feed ingredient market will provide a major improvement in efficiency. Products will be supplied from the Europort facility.

"Consumer acceptance of the all-vegetable protein food item, Midland Harvest's Harvest Burger, has been encouraging and exceeds expectations. This low-fat, cholesterol-free, reduced calorie product is being sold in selected U.S. markets and in several international markets, notably England and other European Community countries, the USSR, Czechoslovakia, Finland, Mexico and Canada.

"Haldane Food Groups acquired two additional companies: Granose Foods Ltd., a pioneer in the health food industry, and Unisoya [on 21 Dec. 1990], a soya milk production company. Additional bottling capacity was installed at Saucemasters Limited when the company moved operations to a larger facility shared with Snackmasters Limited, a newly formed company manufacturing snack meals. These TVP-based products are used with either noodles or rice and are sold through supermarkets and health food stores. Genice Limited added more yogurts and non-dairy ice creams to its product range. Frozen meals from both Vegetarian Cuisine Limited and Vegetarian Feasts Limited increased their market share. Production at the leased Coventry factory was transferred to the Granose factory at Newport Pagnell, where additional land is available for further expansion."

Page 32 lists the many ADM divisions worldwide. In Europe, key soyfoods-related divisions are: The British Arkady Co. Ltd. (William Pringle, Division Director), and ADM International Ltd. (John R. Mahlich, Managing Director). Both are located in the UK. Note: The Haldane Foods Group (Peter Fitch, Managing Director), which is currently under British Arkady, will soon become an independent division. Since 1985 Peter Fitch and John Mahlich have skillfully acquired 11 of England's most

important natural-, vegetarian-, and soyfood manufacturing companies to make the Haldane Foods Group unique in the world as a professional, efficient, and innovative group with a very promising future in a rapidly growing market.

Note: In Dec. 1990, ADM started making soy protein concentrates at its plant in Europoort, Netherlands. Address: Decatur, Illinois.

2452. Archer Daniels Midland Co. 1991. Introducing Midland Harvest: The great taste of good health! (Leaflet). Decatur, Illinois. 28 x 11 cm. Catalog.

• **Summary:** This full-color dome-shaped leaflet describing the Midland Harvest products comes in the shape of a vertically-oriented rectangle that is rounded at the top. It is not a mail order catalog. Color photos (p. 1) show a Harvest Burger, Taco Filling 'n Dip, and Burger 'n Loaf. At the bottom are written: Cholesterol free. Low fat. High protein. Low calories. Dietary fiber. Microwaveable.

The two inside panels show the four frozen and four shelf stable dry mix Midland Harvest products. Frozen: Harvest Burgers in Original, Italian Style, and Taco Flavors plus Breakfast Patties–Sausage style. Shelf Stable: Burger 'n Loaf in Original, Italian Style, and Herbs & Spice, plus Taco Filling 'n Dip. “Consumers are buying healthier foods: 4 out of 10 consumers have changed their eating habits because of nutritional concerns. 98 million Americans have a cholesterol count over 200.” In these healthy products, less than 30% of the calories come from fat. “Complete marketing support: An \$18 million national television advertising campaign. Professional in-store demonstrations. Trade and merchandising allowances available. Colorful, eye-catching, free-standing POP pieces that sell, sell, sell! Newspaper ROP (Run of Press = newspaper ad), Sunday FSI (free standing insert), and demo coupons.

The back panel explains the products that are available in food service packs, by mail order, or for the retail trade, with phone numbers for the last two categories.

Talk with Lee Lensch of ADM. 1994. March 4. This promotional piece was developed by ADM for use as a handout at trade shows to give to supermarket and foodservice buyers who came by the ADM booth. This unrelated to Harvest Direct. Address: Decatur, Illinois. Phone: 1-800-637-5850.

2453. **Product Name:** Chia's Chili (Meatless; With Tempeh).

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** P.O. Box 870, Greenfield, MA 01302. Phone: 413-774-6001.

**Date of Introduction:** 1991 September.

**Wt/Vol., Packaging, Price:** 13 oz deli container.

**How Stored:** Refrigerated, 60 day shelf life.

**New Product–Documentation:** Talk with Michael Cohen. 1991. Sept. 17. This was introduced last week at the NFM

trade show in Baltimore, Maryland. Ad and Spot in Natural Foods Merchandiser. 1992. Feb. p. 24 and 38. Ad is titled “Chill out and get sloppy.” “Lightlife introduces two great new heat & eat vegetarian entrees: Chia's Chili and Classic Sloppy J. Flavor too fresh to find in a can.”

2454. **Product Name:** Classic Sloppy J. (Meatless; With Tempeh).

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** P.O. Box 870, Greenfield, MA 01302. Phone: 413-774-6001.

**Date of Introduction:** 1991 September.

**Wt/Vol., Packaging, Price:** 13 oz plastic deli container.

**How Stored:** Refrigerated, 60 day shelf life.

**New Product–Documentation:** Talk with Michael Cohen. 1991. Sept. 17. This version of Tempeh Sloppy Joe was introduced last week at the NFM trade show in Baltimore, Maryland. Ad and Spot in Natural Foods Merchandiser. 1992. Feb. p. 24 and 38. Ad is titled “Chill out and get sloppy.” “Lightlife introduces two great new heat & eat vegetarian entrees: Chia's Chili and Classic Sloppy J. Flavor too fresh to find in a can.”

2455. Nishimoto, Miyoko. 1991. The now and Zen epicure: Gourmet cuisine for the enlightened palate. Summertown, Tennessee: The Book Publishing Co. 250 p. Color photos. Index. 24 x 21 cm.

• **Summary:** This is a gorgeous, delightful vegan cookbook (though it uses honey), loaded with color photos. Most recipes, designed for entertaining, embody an atmosphere of elegance with a sense of fun, capturing the best of traditional European cuisine, offering gourmet recipes with an element of Japanese style, simplicity, and flavor. Each recipe is accompanied by a nutritional analysis, and most are remarkably low in fat.

The author is founder and owner of the Now & Zen Bakery (1838 Golden Gate Ave., San Francisco, CA 94115) which is well known for its tofu cheesecakes and other delights, and which sells dried okara. She is also a jazz vocalist and vegetarian chef. Born in Japan to a Japanese mother and an American father, she moved to Mill Valley, California, with her parents when she was age 7 and became a vegetarian at age 12. A photo on the rear cover shows Miyoko Nishimoto. She shows great virtuosity in the use of soyfoods—and wheat gluten. The section on ingredients contains excellent, detailed information on miso, nut milks and creams (almond milk and cashew milk, which the author prefers for some uses to soymilk), agar, okara, soy milk and soy cream, soy sauce, soy sour cream, soy yogurt, tamari, tempeh, tofu, frozen tofu, and pressed tofu.

Soy-related recipes include: Tofu “cheese” (p. 32). Tofu “boursin” or herb-garlic cheese ball (p. 33). Tofu “feta” cheese (p. 35). Tofu cream cheese spread with herbs (p. 36). Eggplant and tofu pâté (p. 51). Smoked tofu, mushroom, and

garlic canapés (p. 53). Tofu “mornay” sauce (p. 65). Tofu aioli (p. 82). An introduction to quick and tasty tofu cream soups is given on p. 108. Each of the following cream soups contain tofu. Cream of pumpkin soup (p. 109). Cream of corn soup (p. 110). Cream of green pea soup (p. 111).

Mediterranean eggplant and tofu gratin (p. 115). Tofu burgers suprême (p. 118). Creamy tempeh curry (p. 119). Tempeh mexicali (p. 121). Sweet and sour tofu (p. 122-23). Whole cabbage with hearty tempeh stuffing (p. 124-25). Herbed soybean casserole or stew (p. 132). Savory tempeh and vegetable stew (p. 134-35). Tofu bourguignon (p. 138-39). Homemade tofu pasta (p. 142-43). Ginger tempeh with green peppers (p. 145). Homemade gluten, Tempeh and gluten burgers, and the Great gluten turkey with dressing (p. 150-160). Tempura tofu (p. 163). Marinated tofu (p. 164). Smoky marinated tofu (p. 165). Believable bacon (with tofu, p. 166). Beans and “bacon” casserole (with tofu, p. 167). Orange-soy dressing (p. 177). Tofu sour cream (p. 179). Tofu mayonnaise (p. 180). Tofu thousand island dressing (p. 182). Tropical coconut banana ice cream or sauce (with tofu, p. 212). A different pumpkin ice cream (with tofu, p. 213). Italian cheese-less cake (with tofu, p. 216). Cashew cheesecake (with tofu, p. 217). Tofu crème (p. 218).

For a lengthy and very positive review of this book by Carol Flinders, see *Vegetarian Times* Nov. 1991, p. 86-87. Address: San Francisco, California.

2456. Gibson, Richard. 1991. Restaurants beef up vegetarian menus. *Wall Street Journal*. Oct. 15. p. B1.

• **Summary:** “Vegetarianism is in at the nation’s restaurants. From trendy cafes to traditional fast-food outlets, eating green is shaking off its bean-sprouts image and taking hold as a popular alternative cuisine. The meatless movement, nurtured by a growing cut-the-fat health consciousness, has chefs reaching for their recipe files.”

“A recent survey commissioned by the National Restaurant Association found that while only 5% of those queried regarded themselves as vegetarians, 20% said they would prefer a restaurant offering meatless items when dining out.”

“Vegetarian fare’s popularity is growing for several reasons, including greater nutrition awareness, worries about meat-transmitted diseases, the rising influence of Asian cooking, and concern over animal rights.”

An important supplier of the new market is Wholesome & Hearty Foods Inc. of Portland, Oregon. In Britain, Burger King sells a soy-based burger that accounts for about 6% of sales. Address: Staff reporter.

2457. **Product Name:** Cauldron Foods Tofuloni [Country, or Spicy].

**Manufacturer’s Name:** Cauldron Foods Ltd.

**Manufacturer’s Address:** 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL,

England. Phone: (0272) 632835.

**Date of Introduction:** 1991 October.

**Ingredients:** 1994: Original tofu (water, soya beans, calcium sulphate), hydrogenated vegetable oil, potato starch, wheat flour, rusk, maize starch, mixed cereal grains, onion, carrot, peppers, hydrolysed vegetable protein, yeast extract, salt, dextrose, ascorbic acid, herbs, spices.

**Wt/Vol., Packaging, Price:** 1 sausage per 113 gm chub pack. Retails for £0.75.

**How Stored:** Refrigerated.

**New Product–Documentation:** Spot in *SoyaFoods*. 1991. 2(2):7. “Tofuloni–The veggie salami.” Photos show both packages and labels. The product, made from a blend of smoked tofu and seasonings, was introduced in a pre-sliced form in 1989. Spot in *SoyaFoods*. 1993. 4(3):5. “Tofuloni in new chub size.” “Cauldron Foods Tofuloni is now available in 113 gm unsliced chub sizes in addition to the popular sliced version.” It comes in two flavors: Spicy and Country. A photo shows packages of the two flavors.

Label for Country flavor sent by David Greenslade. 1994. Oct. 2.5 by 4.5 inches. Green and black on white. Color photo shows round slices of Tofuloni on a plate with a slice of bread. Retails for £0.92 in Oct. 1994. Cauldron Foods Ltd is now in Portishead, Bristol.

2458. **Product Name:** Tofu Burgers [Organic Tofu & Fresh Vegetables, Savory Nut, Spicy Mixed Bean, or Curry and Coconut].

**Manufacturer’s Name:** Dragonfly Kitchen.

**Manufacturer’s Address:** 19A Riverside Buildings, Staverton Bridge Mill, Totnes, Devon TQ9 6AQ, England. Phone: (0803) 865667.

**Date of Introduction:** 1991 October.

**Ingredients:** Curry and Coconut: Okara\*, brown rice\*, tofu\*, onion\*, carrots\*, raisins, coconut, tomato puree, shoyu, herbs, spices, sea salt, sunflower oil. \* = Organic.

**Wt/Vol., Packaging, Price:** 200 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Four Labels sent by Simon and Dawn Boreham of Dragonfly Foods. 1991. Nov. 1. 3 inches diameter. Self adhesive. One color on white. “Dragonfly original recipe. With Soya bean, fibre and protein, naturally. Store below 4°C. Ready cooked. Delicious hot or cold. Heat right through. Freeze once only.”

Talk with Simon Boreham. 1999. Dec. 7. These meatless burgers are now called “Beanies” and the company has ten recipes or varieties. On 1 Jan. 1994 the company moved to its present address: 2A Mardle Way, Buckfastleigh, Devon TQ11 0NR, England. Phone: +44 1364 642700.

2459. **Product Name:** Midland Harvest Sloppy Joe Fixin’s.

**Manufacturer’s Name:** Harvest Direct, Inc. Made in Decatur, Illinois, by Archer Daniels Midland Co.

**Manufacturer’s Address:** P.O. Box 4514, Decatur, Illinois

62525. Phone: 800-637-5850.

**Date of Introduction:** 1991 October.

**Ingredients:** Soy protein concentrate [textured], vinegar powder (maltodextrin, distilled vinegar), dry onions, partially hydrogenated corn oil, modified food starch, dry red and green peppers, spices, sugar, dry worcestershire sauce, dry molasses, natural flavor, natural smoke flavor (maltodextrin, salt, natural flavors, modified food starch, corn syrup solids), garlic powder, citric acid, zinc oxide, niacinamide, ferrous sulfate, copper gluconate, vitamin A palmitate, calcium pantothenate, thiamine mononitrate (vitamin B-1), pyridoxine hydrochloride (vitamin B-6), riboflavin (vitamin B-2), cyanocobalamin (vitamin B-12).

**Wt/Vol., Packaging, Price:** 4 oz foil pouch.

**How Stored:** Shelf stable.

**Nutrition:** Original: Per 0.8 oz dry (5 servings per packet): Calories 80, protein 8 gm, carbohydrates 8.8 gm, total dietary fiber 1 gm, fat (total) 1.7 gm (saturates 0.5 gm, monounsaturates 1.1 gm, polyunsaturates 0.1 gm), % calories from fat 19, cholesterol 0 mg, sodium 165 mg, potassium 360 mg.

**New Product–Documentation:** Talk with Lee Lensch of ADM. 1991. Dec. 16. This product is sold only through ADM's direct mail company named Harvest Direct. The company sells only ADM's dry mixes. This product was introduced in Oct. 1991. The 4 oz of dry mix makes about 16 oz (1 lb) of finished product. Add water plus 4 oz tomato sauce.

Ad in Vegetarian Times. 1992. Jan. p. 16. "Harvest's got it!" "Midland Harvest now comes in seven flavors: Original, Taco, Herbs and Spice, Curry, Italian, Sloppy Joe Fixin's, and Chili Fixin's. Call Harvest Direct at 1-800-835-2867 for a free 16-page catalog."

Label sent by ADM. 1991. Dec. 17. 5.25 by 3.75 inches. Self adhesive. Reddish brown on white. "Cholesterol free. Low fat. All-vegetable protein. Microwaveable. A delicious, healthy Sloppy Joe based on a savory blend of vegetable protein concentrate and traditional Sloppy Joe flavors. The only ingredients you add are water and tomato sauce. The result is a tasty 'ground meat' type Sloppy Joe."

**2460. Product Name:** Midland Harvest Chili Fixin's.

**Manufacturer's Name:** Harvest Direct, Inc. Made in Decatur, Illinois, by Archer Daniels Midland Co.

**Manufacturer's Address:** P.O. Box 4514, Decatur, Illinois 62525. Phone: 800-637-5850.

**Date of Introduction:** 1991 October.

**Ingredients:** Soy protein concentrate [textured], spices, partially hydrogenated corn oil, dry onions, masa flour, maltodextrin, hydrolyzed vegetable protein, natural flavor, paprika, salt, dry garlic, zinc oxide, niacinamide, ferrous sulfate, copper gluconate, vitamin A palmitate, calcium pantothenate, thiamine mononitrate (vitamin B-1), pyridoxine hydrochloride (vitamin B-6), riboflavin (vitamin

B-2), cyanocobalamin (vitamin B-12).

**Wt/Vol., Packaging, Price:** 4 oz foil pouch.

**How Stored:** Shelf stable.

**Nutrition:** Original: Per 0.8 oz dry (5 servings per packet): Calories 88, protein 8.8 gm, carbohydrates 7.2 gm, total dietary fiber 1.6 gm, fat (total) 2.5 gm (saturates 0.8 gm, monounsaturates 1.6 gm, polyunsaturates 0.1 gm), % calories from fat 25.4, cholesterol 0 mg, sodium 225 mg, potassium 425 mg.

**New Product–Documentation:** Talk with Lee Lensch, 1991, Dec. 16. This product is sold only through ADM's direct mail company named Harvest Direct. The company sells only ADM's dry mixes. This product was introduced in Oct. 1991. To the 4 oz of dry mix, add water, 8 oz of tomato sauce, and 16 oz of kidney (or other) beans to make 2½ pounds of chili.

Label sent by ADM. 1991. Dec. 17. 5.25 by 3.75 inches. Self adhesive. Brown on white. "Cholesterol free. Low fat. All-vegetable protein. Microwaveable. A delicious, healthy Chili based on a savory blend of vegetable protein concentrate and traditional chili flavors. The only ingredients you add are water, tomato sauce, and kidney beans. The result is a tasty 'ground meat' type chili with beans."

**2461. Product Name:** [Tempast {Vegetarian Tempeh Spread}].

**Foreign Name:** Tempast.

**Manufacturer's Name:** Lima Foods (Marketer).

**Manufacturer's Address:** Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.

**Date of Introduction:** 1991 October.

**Ingredients:** Water, tempeh\*, sunflower seeds\*, whole meal bread\*, sunflower oil\*, miso, free range eggs, onion\*, pumpkin\*, dulse (seaweed), ume [plum] vinegar, sea-salt, herbs. \* = Organically grown.

**Wt/Vol., Packaging, Price:** 150 gm glass jar. Retail for DM 6.70 (10/91, Bremen, Germany).

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Label sent by Anthony Marrese of Bremen, Germany. 1991. Oct. 7. 9.25 by 1 inches. Paper. Black on light orange. Color photo of the spread on a slice of bread, topped with a slice of radish and cucumber. CINAB organic certification symbol. Nature et Progres organic certification symbol. Ingredients are listed in Dutch, French, German, and English.

**2462. Smoky Mountain Natural Foods. 1991. Fall/Winter 1991. Natural foods price list [Mail order catalog]. 15 Aspen Court, Asheville, North Carolina 28806. 23 p. 28 cm.**

• **Summary:** This is a "Catalogue of natural foods, body care and home products for a healthier, more natural way of life." This mail-order company, which began operation in Jan. 1991, sells products made by other companies; it does not do any manufacturing and does not have its own brand on

any products. Their specialty is macrobiotics products, and they buy their Japanese imports from Macrobiotic Wholesale Co. They sell miso (Miso Master American Miso, Mitoku Japanese miso, Traditional Foods domestic miso, and instant miso soups from Edward & Sons), black soybeans and azuki beans (organic are grown in the USA, non-organic from Hokkaido), sea vegetables, soy sauce (San-J shoyu and tamari, Mansan tamari, Sakae shoyu, Johsen shoyu), San-J teriyaki sauce and Szechuan sauce, Nasoya dressings and Nayo-naise, Natto miso chutney, Sesame miso sprinkle, Tekka condiment (jar or bag), jinenjo tekka, MMB [Mitoku Macrobiotic, a premium brand] organic farmhouse tekka, seitan, MMB traditional dried tofu, Tofu burger, scrambler, and stroganoff, Sweet Cloud sesame miso munchie, Sweet life miso candy.

John Troy is not connected to this company, nor is John Belleme; John is the wizard, and now he makes sauces from the Wizard's Cauldron. He also works with John Belleme at Traditional Foods making seitan. Address: North Carolina. Phone: 1-800-926-0974.

2463. *SoyaScan Notes*. 1991. In search of Tan Pups (Skewered Seitan Deep-Fried in a Breaded Batter), and memories of one of America's first two commercial seitan products (Interview). Nov. 18–May 24, 1992. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Talk with Joel Wollner, a clerk at the Erewhon retail store on Newbury St. in Boston in the mid-1970's. 1991. Nov. 18. Joel recalls that a man named Johnny Weissman made both Wheatmeat and Tan-Pops (or were they spelled Tan-Pups?). In the name Tan-Pops, "Tan" comes from seitan, and "Pops" may come from Popsicles, or "Pups" may be a take-off on "hot dogs."

Talk with Johnny Weissman. 1992. March 31. In 1977 there was a cheesecake company named Baby Watson, owned by two men named Peter and Kenny. John used to sell John's Wheatmeat Sandwiches at Baby Watson. One of the owners of Baby Watson had tasted a Tan Pup and liked it very much. A Tan Pup was a deep-fried seitan products on a bamboo stick. John does not know who made it (neither the person nor the company), when they started (it might have been America's first commercial seitan product), how long it was on the market, or where it was sold. But he does recall hearing that the maker moved to Maine or New Hampshire after discontinuing Tan Pups in Boston. John tasted 1 or 2 Tan Pups.

Talk with Barry Creighton in Alaska. 1992. March 9. In August 1974 he and his wife Cathy started Cable Springs Bakery as an incorporated official business in Boston. At that time (Aug. 1974) he is quite sure that a product named Tan Pups (skewered seitan deep-fried in a breaded batter) was being made in Boston. Barry thinks that Tan Pups were probably introduced 6-12 months before his bakery opened, i.e. in early 1974 or late 1973. Barry first saw Tan Pups in the

Erewhon store on Newbury St.

Talk with Lenny Jacobs of New Age. 1992. May 12. David Kailin owned and ran Crane's Call Bakery. He is now living in Seattle, Washington, doing acupuncture at his Seattle Institute of Chinese Traditional Medicine. Phone: 206-545-3530.

Talk with David Kailin, founder and former owner of Crane's Call Bakery on Queensberry St. in Boston. 1992. May 12. He (alone) owned a bakery named "Crane's Call Bakery," located on Queensberry Street in the Fenway area of Boston. He sold it to two brothers who renamed it Queensberry Street Bakery, ran it for 1-2 years, then got a grant and moved it to rural Vermont. David never made Tan Pups, and he does not remember the names of the two brothers to whom he sold the business.

Talk with Charles Kendall. 1992. May 20. Charles remembers Tan Pups (skewered deep-fried seitan in a breaded batter) as an excellent product, and thinks they may have been made by a woman out of her home as a small operation—but he is not at all sure. He tasted Tan Pups but he is not sure if he ever bought Tan Pups for "The Company Store," which he ran at the Erewhon warehouse from about 1974 to 1978.

Talk with Matthew and Helen Sandler. 1992. May 24. An excellent early product in Boston was Tan Pups, made by Nik Amartseff and his wife. It was a natural meatless hot dog made of seitan, deep-fried on a stick. Nik was one of the most creative food product developers in Boston at the time.

2464. McDermott, Ron. 1991. The use of wheat gluten in foods by Seventh-day Adventist food companies (Interview). *SoyaScan Notes*. Nov. 25, and 23 Oct. 1992. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Most of the early meat alternatives made by Seventh-day Adventist food companies were based on wheat gluten, or wheat gluten and peanuts. His recollection is that Worthington Foods first used wheat gluten in Choplets, introduced in 1941. He is sure that Choplets contained wheat gluten from the day they were launched. Before Fry-Chik, an early Worthington product containing spun soy protein fibers, introduced in about 1965, most of Worthington's products were based on wheat gluten. In 1968-70 Worthington developed a new generation of products containing wheat gluten; the first of these was Prosa (rhymes with "Sausage"). For the first time, fresh (not dried) wheat gluten was combined with spun soy protein fibers and textured soy protein concentrates to give improved texture, flavor, and nutritional value (through protein complementarity). Later the spun soy protein fiber was removed but the textured concentrate remained. Miles Laboratories, which bought Worthington in March 1970, did a lot of further development on Worthington's products; Breakfast Links, Breakfast Patties, etc. Morningstar Farms Breakfast Patties, a meatless sausage, which are an improved version of Prosa, were

introduced to the mass market in 1974, still featuring the gluten-soy combination. In 1979 Morningstar Farms Grillers (a meatless hamburger patty based on gluten and soy; the Worthington equivalent is FriPat) were also introduced into the mass market, again featuring the gluten-soy combination. More than any other company, Worthington took gluten-based products to new levels of sophistication, with improved flavor, texture, and nutritional value, by combining gluten and soy protein using proprietary techniques. In the early 1980s the gluten-soy combination came to be used in a host of Worthington's products.

Today, of Worthington's 180 products, approximately 90% contain wheat gluten. Many of the products contain a combination of textured soy protein (soy concentrates or flour or spun soy protein fiber) or soy protein isolates with the gluten. The process by which the soy and wheat are combined and the desired texture is developed is proprietary information. Whereas many companies would use only textured soy protein, Worthington prefers the soy-gluten combination for the 3 reasons given above.

The technical aspects of gluten use are interesting. In the Seventh-day Adventist (SDA) companies, there was a gradual evolution from the process requiring the washing of flour and dough (to wash the starch out, yielding fresh gluten), to the use of dry vital wheat gluten, which causes much less pollution into the sewage system.

Ron will look in Worthington's extensive files to try to find out when John Harvey Kellogg, Worthington Foods, and Loma Linda Foods first used wheat gluten in a commercial food product.

Trudy Cravens at Worthington is now developing a computerized database of their products, which they call an "elimination list." For example, if someone wanted to eliminate wheat from their diet, they could print a list of all products in which neither wheat nor gluten was an ingredient. Address: Vice President Research & Technology, Worthington Foods, 900 Proprietors Rd., Worthington, Ohio 43085-3194. Phone: 614-885-9511.

2465. Morell, Tania; Schultz, J.J. 1991. Harmonium Foods tempeh report: Prepared for Armand Asher, owner Harmonium Foods. Ithaca, New York. 66 + 15 p. Nov. 26. Unpublished manuscript. No index. 28 cm. [2 ref]

• **Summary:** This report was prepared for Armand Asher (owner, Harmonium Foods, 117 Auburn Ave., Ithaca, New York 14850), who wanted to start a tempeh company in Ithaca. The consumer study was conducted at the Greenstar Co-op, which subsequently burned down, but re-opened in Oct. 1992. The conclusion of the study was that the market for fresh tempeh in Ithaca was too small to support a tempeh shop, but that production of consumer ready tempeh products might support a small shop. Contents: I: The counseling report (p. 1-19). Executive summary. Introduction: Purpose, scope, and limitations, sources and

methods, report organization. The small market for plain tempeh: Taste of plain tempeh unappealing to consumers, usage of plain tempeh confusing to consumers. Wave of the future—Consumer ready products: Two consumer ready products, consumer ready tempeh had higher financial return over fresh tempeh. Financial analysis: Producing only the fresh tempeh for retail, producing and selling a consumer ready product, purchasing the tempeh and then producing a consumer ready product. Conclusions and recommendations.

II: The supplementary materials (p. 20-43). Contents. Marketing information (75 lb/week of tempeh is sold in Ithaca; the main retailer is Greenstar Food Co-op at 30 lb/week). Financial analysis information.

IIA: Handwritten information. Copy of original business plan. Actual consumer survey.

III: The original proposal. Executive summary. Business highlights. Proposal. Consultant skills. Appendix A: Marketing. Appendix B: Kitchen. References & sources.

A bar chart (Part II, p. 23) shows why consumers do not purchase tempeh: It has no taste 9. Do not know what to do with it 6. High cost 3. It has a strange appearance as a fungus 2. It takes too much time to prepare 1.

A bar chart on page 22 shows that 85% of the consumers polled were tofu users, 45% were tempeh users, 45% would purchase locally made tempeh over the brand they currently purchase, 20% have purchased consumer ready tempeh products (burgers, bacon, etc.). Address: 19A Gaslight Village Apt., Ithaca, New York 14850. Phone: 607-257-8438.

2466. Harvest Direct, Inc. 1991. Harvest Direct winter catalog, 1991-92: All natural products and unique gifts for the vegetarian lifestyle (Mail order catalog). Decatur, Illinois. 22 cm.

• **Summary:** The front cover shows a lady in a blue shirt against a purple background holding a plate containing a vegetarian burger with all the trimmings. Additional cover text reads: "Harvest Burgers, vegetarian gift baskets, and more! Three new flavors of Harvest Burger [Sloppy Joe Fixin's, Italian Burger 'n Loaf, and Chili Fixin's], the great taste of good health, page 3. Call 1-800-8-Flavor for home delivery! Midland Harvest, Midland Harvest Burger, Midland Harvest Burger 'n Loaf, Midland Harvest Fixin's and TVP are the registered trademarks of Archer Daniels Midland Company, and are used herein with its consent."

On the inside front cover, "A letter to our friends," from Lea Stutkins, business manager, states: "This is the first issue of a rather unconventional catalog that we hope you'll come to rely on for foods and other items that fit the health-conscious lifestyle. We specialize in gourmet vegetarian foods." Recipes for using the products are scattered throughout the catalog. Address: P.O. Box 4514, Decatur, Illinois 62525-4514. Phone: 1-800-835-2867 (1-800-8-FLAVOR).

2467. **Product Name:** Meat of Wheat Sun Burgers, Grilled Burgers, Chicken Style, Sausage Style, Hearty Original (Seitan Loaf), or Chicken Style Chili.

**Manufacturer's Name:** Ivy Foods.

**Manufacturer's Address:** Office: 7613 S. Prospector Dr., Salt Lake City, UT 84121. Phone: 801-943-7664. Fax: 801-943-7311.

**Date of Introduction:** 1991 November.

**Ingredients:** Sun Burger: Wheat gluten, brown rice, tamari, miso, onion, garlic, lemon juice, bean flour [white bean, black bean, garbanzo], yeast, flour, walnuts, vegetable oil [canola oil], xanthan gum, spices and natural seasonings.

**Wt/Vol., Packaging, Price:** 16 oz plastic bag inside a paperboard box.

**How Stored:** Refrigerated.

**Nutrition:** Per 98 gm.: Calories 221, protein 26 gm, carbohydrate 28 gm, fat 2 gm, cholesterol 0 mg, sodium 277 mg.

**New Product–Documentation:** Talk with Goldie Caughlan of Puget Consumers Co-op in Seattle. 1992. Feb. 7. The company is selling gluten-based products under two trademarks: Wheat Meat and Meat of Wheat. Ivy Foods, the maker, is a member of Ivy International. Some of the products are of excellent quality. The company, a new

company, will be showing the products shortly in Tacoma, and then at Anaheim. They were at the Anaheim show in early 1991 scoping out the market. She is not sure whether or not they have any products for sale yet. They also seem to be selling some Worthington products (Morningstar Farms line).

Talk with Mira Blue Machlis (pronounced MAK-liss) of Ivy Foods. 1992. Feb. 7. She and her husband, Mark, own this company. Mark has been in the restaurant business all his life, and his father originally owned all the Farrel's Ice Cream parlors in the northwest. Their company introduced their products in 1991 at Anaheim as Wheat Meat. The government was 9 months late in letting them know that they couldn't use that Trademark, because it was already registered. Their attorney did a trademark search and they got a copy of the trademark application and found out the person who owns the trademark. The trademark was registered in about 1982 although it states that the owner first started making the product in 1977. The owner of the trademark no longer lives where the Trademark was registered, but they have his phone number. Their company is now test marketing 5 gluten-based products in Salt Lake City and the surrounding area. And these products are available by mail order. They plan to make a gluten-based chili, which Sysco, a restaurant supply company, is now carrying. Ivy Foods, a regular business, is a member (not a division) of Ivy International, a contemplative group. "We are considering opening the company up to be a cooperative after a while. We're not in this to make money. We're in this more to set up a model business. We make all of our decisions through contemplation. We try to do things a little more consciously, and to recognize that food really is a vehicle for nurturing. This country has kind of forgotten that. When we moved to Salt Lake City we opened up a little vegetarian restaurant, the Sun Bun Café, with 2 partners. Mark started developing the Sunburger for them. It became so popular that we decided to take it to the natural foods show at Anaheim to see what the response was. The response was overwhelming. Now we are ready." Originally they considered food service operators their main potential customers, but now they hope to establish their base among natural food consumers. The little natural food store in town sells about 100 lb/week. After that base is stabilized, they plan to focus more on mainstreaming.

They have applied for a trademark on Meat of Wheat. They manufacture the products and their temporary plant will soon be moving to a new location.

Talk with Mark Machlis of Ivy Foods. 1992. Feb. 27. Most of their products (Chicken, Sausage, and 2 burgers) were first available for sale in Nov. 1991 at several stores in Salt Lake City. They now have a mail order program which allows them to ship their products in bulk as cheaply as they can put them in a store. This is good for people in outlying areas.

Products (Sun Burger, Chicken Style) with Labels

sent by Mark Machlis. 1992. March. 4.25 by 6.5 by 2.75 inches. Paperboard box. Chocolate brown, red, white, green, gold, and tan. Sun Burger: Color photo of two patties on a wooden cutting board surrounded by grains and vegetables. "Vegetarian. Gourmet grain protein." Contains three preparation hints. At the top of one side panel is a symbol of one green circle inside another. Between the two is written "Animal Free" in bold green letters. In the central circle is an illustration of a lion and a lamb." The text reads: "As citizens of the world seek ecological balance, consciously made food choices open new options for Animals and Mankind... 'The frog does not drink up the pond in which he lives' (Buddhist Proverb)."

"Ivy International seeks to assist more conscious shoppers with an easily recognizable symbol which will clearly identify a vegan food product from lacto-ovo vegetarian products. For the free brochure, 'More Conscious Nourishment,' write to: Ivy International, Brighton Star Route, Brighton, Utah 84121.

Soyfoods Center Product Evaluation: Sun Burger. Package design: Generally excellent, but the term "Wheat Meat" is a registered trademark owned by another person, and a refrigeration statement should appear more prominently. The ingredients terms "bean flour" and "vegetable oil" are ambiguous. Sensory evaluation: All liked the product (score of 8); good texture and flavor. Chicken Style: Sensory evaluation: Some liked the product (score of 8), but one person did not (2), saying it reminded her of bread. The pieces are like torn pieces of chicken.

Leaflet. "Meat of Wheat Gourmet Grain Protein." A black and white photo shows each of 4 products. "All natural ingredients. Low fat. No cholesterol. High protein. Animal free." Ingredients in other products: Chicken Style: Wheat gluten, bean flour, vegetable oil, spices and natural seasonings. Sausage Style: Same as Chicken Style. Hearty Original: Wheat gluten, tamari, onion, garlic, lemon juice, bean flour, yeast, walnuts, vegetable oil, spices and natural seasonings. In a chart titled "Nutritional Comparisons," each of 4 products is compared with its meat counterpart and a Worthington counterpart. In each case the Ivy Foods product has a lower percentage of calories from fat (9-17%).

Wheat of Meat recipes: Contains 8 recipes on the front and back of one sheet. The Chicken-Style Chili is available only for institutional and restaurant use.

Spot in Natural Foods Merchandiser. 1993. Sept. p. 76. Receive up to 20% off on Meat of Wheat Sausage Style.

Ad (1/3 page vertical, black and white) in Vegetarian Times. 1993. Sept. p. 50. "Meat of Wheat." Available in: Grilled Burgers, Sun Burgers, Chicken Style, Sausage Style, Hearty Original. They are low in fat, frozen, and ready to use. Order from your health food store or call Ivy Foods direct at 1-800-280-1313. Gives a recipe for Meat of Wheat Magnificence.

Ad in Vegetarian Times. 1993. Oct. p. 32. "Meat of

Wheat." "Sausage Style ideas: Pizza topping, manicotti & lasagne, tacos & burritos, tossed with pasta.

Ad in Vegetarian Times. 1993. Nov. p. 20. "Giving Thanks." Make a vegetarian "no Tom" turkey using Wheat of Meat Chicken Style.

2468. **Product Name:** Jaclyn's Salsa Chicken Style in Mild Salsa with Mexican-Style Organic Brown Rice, Green Beans, Corn and Organic Kidney Beans (Vegetarian).

**Manufacturer's Name:** Jaclyn's Food Products, Inc.

**Manufacturer's Address:** P.O. Box 1314, Cherry Hill, NJ 08034. Phone: 609-983-2560.

**Date of Introduction:** 1991 November.

**Ingredients:** \*Organic brown rice, vital wheat gluten, tomatoes, tomato puree, green beans, corn, \*organic red kidney beans, green peppers, red peppers, canola oil, garlic, onions, brown rice syrup, apple cider vinegar, sesame oil, sea salt, rice bran, almond butter, kombu (sea vegetable), chili powder, spices. \* = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

**Wt/Vol., Packaging, Price:** 11.5 oz (325 gm) paperboard box. Retail for \$4.45 (11/91, California).

**How Stored:** Frozen.

**Nutrition:** Per 11.5 oz.: Calories 325, protein 28 gm, carbohydrates 35 gm, dietary fiber 12 gm, fat 9 gm (polyunsaturated fat 2 gm, saturated fat less than 1 gm), cholesterol 0 mg, sodium 290 mg, potassium 410 mg.

**New Product-Documentation:** Product with Label purchased at Berkeley Natural Grocery Co. in California. 1991. Nov. 24. 7.5 by 6 by 1.25 inch paperboard box. Red, blue, green, pink, and black on tan. Color photo of the meal served on a white plate. "Vegetarian Dinner Classics. 100% natural. Low calorie. No cholesterol. Low fat. High fiber. Dairy free. Heat and serve in your oven or microwave. Do not refreeze." The main ingredient in this "wheat protein which is derived from 100% whole grain wheat. The wheat protein is blended with rice bran and almond butter to make it tasty and easy to digest. Then it is cooked in a special tamari broth flavored with poultry seasonings and cut into bite-size pieces so that its taste and texture resembles chicken."

Soyfoods Center Product Evaluation. 1991. Dec. 2. Package design: Very good. Flavor: Good, but a little too spicy. A bit too expensive.

2469. **Product Name:** Jaclyn's Sesame Chicken Style in Sesame Sauce with Seasoned Organic Brown Rice, Broccoli, Carrots and Water Chestnuts (Vegetarian).

**Manufacturer's Name:** Jaclyn's Food Products, Inc.

**Manufacturer's Address:** P.O. Box 1314, Cherry Hill, NJ 08034. Phone: 609-983-2560.

**Date of Introduction:** 1991 November.

**Ingredients:** \*Organic brown rice, vital wheat gluten,

broccoli, carrots, water chestnuts, tamari soy sauce (water, soy beans, sea salt), unsweetened pineapple juice, sesame oil, sesame seeds, brown rice syrup, apple cider vinegar, rice bran, almond butter, kombu (sea vegetable), ginger, sea salt, chives, spices. \* = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

**Wt/Vol., Packaging, Price:** 11.5 oz (325 gm) paperboard box. Retail for \$4.45 (11/91, California).

**How Stored:** Frozen.

**Nutrition:** Per 11.5 oz.: Calories 325, protein 31 gm, carbohydrates 40 gm, dietary fiber 15gm, fat 8 gm (polyunsaturated fat 2 gm, saturated fat less than 1 gm), cholesterol 0 mg, sodium 635 mg, potassium 390 mg.

**New Product–Documentation:** Product with Label purchased at Berkeley Natural Grocery Co. in California. 1991. Nov. 24. 7.5 by 6 by 1.25 inch paperboard box. Brown, blue, green, pink, and black on tan. Color photo of the meal served on a white plate. “Vegetarian Dinner Classics. 100% natural. Low calorie. No cholesterol. Low fat. High fiber. Dairy free. Heat and serve in your oven or microwave. Do not refreeze” The main ingredient in this “wheat protein which is derived from 100% whole grain wheat. The wheat protein is blended with rice bran and almond butter to make it tasty and easy to digest. Then it is cooked in a special tamari broth flavored with poultry seasonings and sliced into strips so that its taste and texture resembles chicken.”

2470. **Product Name:** Jaclyn’s Sirloin Strips Style in Tamari-Ginger Sauce with Organic Brown Rice and Oriental Vegetables (Vegetarian).

**Manufacturer’s Name:** Jaclyn’s Food Products, Inc.

**Manufacturer’s Address:** P.O. Box 1314, Cherry Hill, NJ 08034. Phone: 609-983-2560.

**Date of Introduction:** 1991 November.

**Ingredients:** Organically grown brown rice, vital wheat gluten, broccoli, carrots, red pepper strips, water chestnuts, bamboo shoots, tamari (water, soy beans, sea salt), brown rice syrup, onion, garlic, canola oil (non-hydrogenated), rice bran, almond butter, apple cider vinegar, kombu (sea vegetable), ginger, natural spices. \* = Organically grown in accordance with Section 26569.11 of the California Health and Safety Code.

**Wt/Vol., Packaging, Price:** 11.5 oz (325 gm) paperboard box. Retail for \$4.45 (11/91, California).

**How Stored:** Frozen.

**Nutrition:** Per 11.5 oz.: Calories 290, protein 27 gm, carbohydrate 29 gm, fat 8 gm (percent of calories from fat 25%, saturated fat less than 1 gm), cholesterol 0 mg, sodium 390 mg, potassium 640 mg.

**New Product–Documentation:** Product with Label purchased at Berkeley Natural Grocery Co. in California. 1991. Nov. 24. 7.5 by 6 by 1.25 inch paperboard box. Brown, blue, green, pink, and black on tan. Color photo of the

meal served on a white plate. “Vegetarian Dinner Classics. 100% natural. Low calorie. No cholesterol. Low fat. High fiber. Heat and serve in your oven or microwave. Do not refreeze.” The main ingredient in this “wheat protein which is derived from 100% whole grain wheat. The wheat protein is blended with fiber and seasonings to make it tasty and easy to digest. Then it is cooked in a special tamari broth and cut into sirloin-style strips so that its taste and texture resembles meat.”

2471. Worthington Foods, Inc. 1991. Add a Natural Touch to every meal (Ad). *Vegetarian Times*. Nov. p. 5.

• **Summary:** This full-page, color ad, with a 30 cent coupon, shows color photos of prepared Okara Patties, Harvest Bake, and Kaffree Roma (a toasted grain beverage). Address: Worthington, Ohio 43085.

2472. Anderson, Kathie Jackson. 1991. Burgers without the beef: Ecotriton Foods unveils premium meatless line. *Food Business*. Dec. 9. p. 10.

• **Summary:** Ecotriton Foods, headquartered in Langley, Washington and co-founded by Robert Davis in 1990, will unveil its complete line of six Eco-brand meatless products this month in Chicago, Illinois: the basic Burger, a spicy Mex Burger, a breakfast patty, “Italian non-meatballs,” taco filling, and pizza topping. Ecotriton is producing its products in Cincinnati Ohio, under a contract agreement with Huttenbauer. Ecotriton’s general manager is Dana Behar. The company is now developing a reformatted non-dairy frozen dessert, Frozen Nogurt.

“Davis, with a graduate degree in planetary development, a background in urban planning and a burning desire to change the Western diet, developed the original tofu hotdog in 1983. He followed with Ecotriton’s first product, Believe Ice Cream, a non-dairy dessert marketed to health food stores.”

2473. **Product Name:** The Eco Burger (3.2 oz, or 4.0 oz), The Eco Mex Burger, Eco Spheres (non-meatballs), Eco Pizza Topping, Eco Taco Filling, Eco Crumble, and Eco Breakfast Patty.

**Manufacturer’s Name:** Ecotriton Foods.

**Manufacturer’s Address:** Box 655, Langley, WA 98260-0655. Phone: (206) 221-0655.

**Date of Introduction:** 1991 December.

**Ingredients:** Eco Burger: Texturized soy protein, water, isolated soy protein, soy sauce, vital wheat gluten, modified vegetable gum, grape juice concentrate, natural flavors, organic vegetable powders (onion, spinach, carrot, garlic, celery), dry yeast, beet juice concentrate, salt, malt powder, rice bran, pea fiber, vegetable tocopherols (natural antioxidant and vitamin E source), vitamins and minerals (calcium phosphate, beta carotene, vitamin C, vitamin A, niacinamide, vitamin E, zinc oxide, iron, copper gluconate,

calcium pantothenate, vitamin D-3, vitamin B-6, vitamin B-1, vitamin B-2, vitamin B-12, folic acid, biotin, potassium iodide).

**Wt/Vol., Packaging, Price:** Eco Burger: 3.2 oz or 4.0 oz.

**How Stored:** Frozen.

**Nutrition:** Eco Burger. Per 4.0 oz: Calories 138, protein 25 gm, carbohydrate 10 gm (dietary fiber 5 gm), fat 0 gm, cholesterol 0 mg, sodium 488 mg, potassium 500 mg.

**New Product–Documentation:** Kathie J. Anderson. 1991. Food Business. Dec. 9. “Burgers without the beef: Ecotritition Foods unveils premium meatless line.” The company, co-founded by Robert Davis in 1990, will unveil its complete line of Eco-brand meatless products this month in Chicago.

Talk with Bob Davis. 1992. Nov. 2. His company, Ecotritition Foods, has a line of 7 fat-free meatless products including 3 soy burgers (which are beyond Harvest Burger), meatless meatballs, pizza topping, taco filling, and Eco Crumble (like stroganoff). He also has a fat-free hot dog on the same formulation that is much better than Lightlife Foods’ Smart Dog. This is the first fat-free line of meat alternatives—its the next step after Lite. The vegetarian products contain extra beta-carotene, an entire anti-oxidant system, mixed tocopherol system, 4 grams of fiber and rice bran, 5 organic vegetables. They are based on textured soy protein isolate bound with methyl cellulose.

He now sells his products at the University of Michigan, as well as in 35-40 restaurants. In Washington, he sells 200 burgers a day to a sit-down restaurant in a nice district. CBS-TV did a special on the company because of the good reception given the products. All the products are pre-cooked, so the chefs love them. He has a total substitution program for restaurants; you can have it with meat or with Eco-meat. Sysco now distributes the products. He started selling the products 2 years ago. He has invested about \$800,000 in the products and company, including \$20,000 on brochures, videos and labels. He has been trying to sell the company for about 2 months. He is interesting in incorporating seitan into his product line. His strong point is product development R&D, and product concept.

Labels for each product sent by Bob Davis. 1992. Nov. 3. 7 by 4 inches. Self adhesive. Black on white. Illustration of Planet Earth. “Healthy foods for a healthy planet.”

Company portfolio sent by Bob Davis. 1992. Nov. 3. Dr. Gary J. Post is the company CEO and Robert C. Davis is president. “All Ecotritition Foods products are: 100% fat free, 100% cholesterol free, low in calories, high in fiber, enriched with 5 organic vegetables, fortified with beta carotene, 100% vegetarian... Ecotritition Foods is founded on the concept of Ecology + Nutrition. All of our products meet the internally developed concept of Ecotritition which is: (1) maximizing nutrition, (2) optimizing taste, and (3) minimizing environmental impact.”

Article by David L. Lewis. 1993. *Cars & Parts*. Jan. p. 147. “Ford Country: Soyburger.” “Henry Ford, were he alive,

would be pleased by a recent *USA Today* report that a ‘meat alternative’ patty made of soy protein and rice bran, will soon find its way into supermarkets. The compound, advertised as 95 percent fat free, will be produced by Believe, Inc., which also makes a tofu hot dog.”

Talk with Robert Davis. 1993. Feb. 19. All of the above Eco products are built on a matrix/base of spun soy protein fiber, named 200E Fiber, made by Ralston Purina, and sold frozen in filaments 6-7 inches long. Robert did a lot of product development work at the Ralston Purina laboratory in St. Louis, Missouri, and he feels that the company is making a lot of 200E fiber. He imagines that it is used mostly as a meat extender. Robert is no longer working with Ecotritition Foods; Gary Post, a fairly wealthy chiropractor, is trying to keep the company alive. Ecotritition has applied for a patent on the process for making the Eco line of products, based on spun soy protein fiber.

2474. **Product Name:** Redwood Vegetarian Rashers (Tempeh Bacon).

**Manufacturer’s Name:** Redwood Company (The). Div. of JRJ Trading (Importer-Marketer-Distributor). Made in America.

**Manufacturer’s Address:** 243 The Broadway, Muswell Hill, London, N10, England.

**Date of Introduction:** 1991 December.

**Ingredients:** Tempeh, shoyu, malt syrup, sea salt, yeast extract, mixed spices, fermented red rice.

**Wt/Vol., Packaging, Price:** Retail for £1.99.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Health Food Business (London). 1992. Jan. p. 12. “Vegetarian breakfast treats with JRJ’s organic bacon.” This bacon-like product made with organic tempeh retails for £1.99. The tempeh is made from organic soybeans with red rice added to give an authentic color; red rice gives much better color retention than the usual beetroot color. Salt is also added.

Talk with Jeremy Duncan, owner of The Redwood Co. 1992. June 16. This product was introduced in late 1991. About 6 months ago the company moved to its present address: Unit 4, West Burrowfield, Welwyn Garden City, Hertfordshire, AL7 4TW, England. He owns both The Redwood Co. and JRJ Trading, which is an import company. Nowadays he no longer thinks of Redwood as a division of JRJ Trading.

Spot in SoyaFoods. 1992. Autumn. p. 5. “Tempeh alternative to bacon.” This may be England’s first vegetarian alternative to bacon.

2475. Reeve, Stewart. 1991. Fast food delight: ADM’s soy protein burger provides cholesterol-free, tasty treat. *Soybean Digest*. Dec. p. 40a.

• **Summary:** The first test market for ADM’s Midland Harvest brand Harvest Burger began in April 1990 in 7

grocery stores, 2 cafeterias, 2 restaurants, and a hospital in four cities in central Illinois. The product is based on textured soy protein concentrate, to which are added various natural flavors and seasonings. The product comes in three forms: (1) Harvest Burgers are sold as frozen 3.2 oz patties in Original, Taco, Italian-style, and Sausage-Style flavors; (2) A dry mix, named Burger 'n Loaf, is sold in Original, Herb and Spice, and Italian flavors; and (3) a taco mix named Taco Filling 'n Dip. The products have the texture of ground meat. The big selling point is that all of these products are free of cholesterol. ADM then expanded its test market to Indiana, and is now expanding to Wisconsin and Minnesota. The product manager is Lee Lensch, ADM marketing specialist, who says "If the response is anything like in Illinois and Indiana, we're planning to go nationwide."

"The product has already proven itself in an export market. ADM introduced a similar product trademarked as the Veggie Burger to the Soviet Union in October 1989 at a food trade show in Moscow. Shipped as only the dry mix, Veggie Burgers are sold in Soviet grocery stores as the mix or served in restaurants as burgers. The Petina restaurant in Moscow now sells 4,500 Veggie Burgers a day, Lensch reports.

"The Veggie Burger is tailored to the tastes of Soviet consumers. 'For example, the Soviet Union product has 10% fat content rather than the 5% the U.S. has. They're looking for calories,' he explains."

**2476. Product Name:** Harvest Dinner Pattie.

**Manufacturer's Name:** Soy City Foods.

**Manufacturer's Address:** 2847 Dundas St. West, Toronto, ONT, M6P 1Y6, Canada. Phone: 416-762-1257.

**Date of Introduction:** 1991 December.

**Ingredients:** Incl. soy mash [okara].

**New Product–Documentation:** Talk with Lorraine Guardino of Soy City Foods. 1992. Feb. 18. This product, made with soy mash (okara) comes in an oval shape and is being sold as a main course. It currently does not have a chewy texture—but the consumer does not expect it to be chewy. It was first sold in mid-December 1991.

**2477. Product Name:** [Toform Tofu Patties (With Mushrooms)].

**Foreign Name:** Toform Tofu Bratlinge (Champignon).

**Manufacturer's Name:** Amaï.

**Manufacturer's Address:** Sandweg 41, 7070 Schwaebisch Gmuend, Germany.

**Date of Introduction:** 1991.

**Ingredients:** Tofu (water, soybeans\*, calcium sulfate) 78%, mushrooms 10.6%, rolled oats\*, soy sauce, sunflowerseed oil, parsley and spices, sea salt. \* = Organically grown.

**Wt/Vol., Packaging, Price:** 2 x 100 gm vacuum pack. Retail for DM 4.50 (1/92, Germany).

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm.: Protein 11.7 gm, fat 10.8 gm, carbohydrates 8.1 gm, calories (kcal) 176 (737 kJoules).

**New Product–Documentation:** Label sent by Anthony Marrese. 1992. Jan. 13. 4 by 7.5 inches. Self adhesive. Blue, white, green, and orange on tan. "Organically grown." Exklusiv Neuform certification symbol.

**2478. Product Name:** [Whole-Grain Patties: Wheat with Mushrooms (Bulgur and Tofu)].

**Foreign Name:** Vollkorn Bratlinge (Weizen mit Champignons).

**Manufacturer's Name:** Amaï.

**Manufacturer's Address:** Sandweg 41, 7070 Schwaebisch Gmuend, Germany.

**Date of Introduction:** 1991.

**Ingredients:** Bulgur\* 38%, tofu (water, soybeans\*, calcium sulfate) 35%, mushrooms 7.6%, vegetables 16% (carrots\*, onions\*), soy sauce, sea salt, parsley and spices. \* = Organically grown.

**Wt/Vol., Packaging, Price:** 200 gm vacuum pack. Retail for DM 4.02 (1/92, Germany).

**How Stored:** Refrigerated.

**Nutrition:** Per 100 gm.: Protein 7.0 gm, fat 5.0 gm, carbohydrates 17.6 gm, calories (kcal) 143 (598 kJoules).

**New Product–Documentation:** Label sent by Anthony Marrese. 1992. Jan. 13. 4 by 7.5 inches. Self adhesive. Brown, blue, and green, on white. "Organically grown." Exklusiv Neuform certification symbol.

**2479. Product Name:** Veggie Burgers (Vegan, Frozen). Later renamed Almond Grain Burger.

**Manufacturer's Name:** Soy City Foods.

**Manufacturer's Address:** 2847 Dundas Street West, Toronto, ONT, Canada M6P 1Y6. Phone: 416-762-1257.

**Date of Introduction:** 1991.

**Ingredients:** Organic soybeans, organic soy mash, organic spelt, almond butter, green lentils, tomato powder, fresh carrots, fresh onions, organic amaranth, tapioca starch and modified tapioca starch, almonds, olive oil, sea salt, engevit yeast, soy milk, spices and seasonings, xanthan gum.

**Wt/Vol., Packaging, Price:** 4 patties 85 gm (3 oz).

**How Stored:** Shelf stable.

**New Product–Documentation:** Leaflet (glossy, color, printed in about 2002) sent by Lorraine Guardino, sales manager at Sol Cuisine. 2013. March 11. "Sol Cuisine: Second Nature has found its Sol Mate." This leaflet gives a color photo of the front of the package, nutritional information, and the ingredients. Lorraine adds a note that this product was introduced in 1991 in retail and foodservice. Lorraine also includes a current (2013) package for the Almond Grain Burger (named Veggie Burgers when introduced).

**2480. Product Name:** "Beefy" Burrito (Renamed Mexican

Tofu Burrito), and Mexican Tofu Sloppy Joe.

**Manufacturer's Name:** Soy Devine.

**Manufacturer's Address:** Box 668, Miranda, CA 95553.

**Date of Introduction:** 1991.

**New Product–Documentation:** Talk with Mara Devine. 1995. June 1. In 1995 Cajun Barbecue Style was renamed and divided into two products: Vegan Cajun Burger, and Cajun Tofu Sloppy Joe. She moved from Miranda to Arcata, California, in June 1993.

2481. **Product Name:** [Tofu, Smoked Tofu, Tofu Burgers].

**Manufacturer's Name:** Tofuhaus Eisenreich.

**Manufacturer's Address:** Steinmetzstrasse 4, 93049 Regensburg, Germany. Phone: 0941/27 01 27. Fax: 0941/29 3 59.

**Date of Introduction:** 1991.

**New Product–Documentation:** Letter from Bernd Drosihn of Viana Naturkost. 1993. Nov. (late). Tofuhaus Eisenreich makes tofu in Regensburg

Letter from Bernd Drosihn of Viana Naturkost. 1994. Feb. 14. Mrs. Eisenreich owns Tofu Eisenreich; the address, phone and fax are shown above. The company makes tofu, smoked tofu, and tofu burgers. They began business 3-4 years ago.

2482. **Product Name:** Seitan [Syrian Spice, Hungarian Peppercorn, Pepperoni Style, and Lemon Teriyaki flavors].

**Manufacturer's Name:** Vegan Epicure.

**Manufacturer's Address:** 210 Park Place, Ithaca, NY 14850. Phone: (607) 272-0432.

**Date of Introduction:** 1991.

**Ingredients:** Pepperoni: Wheat gluten, shoyu (water, soybeans), apple cider vinegar, fennel seed, spices.

**Wt/Vol., Packaging, Price:** Vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Spot in Vegetarian Journal. 1994. March/April. p. 27. Talk with Susie Gutierrez, founder and owner of Vegan Epicure. 1994. March 11. She introduced these flavors in 1991.

Product and Label for Pepperoni Style sent by Susie Gutierrez. 1994. March 14. 3.75 by 2.25 inches. Black on red. 16 oz. This is a dark brown log of seitan, 2½ inches in diameter and 7½ inches long. Also sent product and same size Label for Hungarian Peppercorn Seitan. Black on orange-yellow. 8 oz. Ingredients: Water, wheat gluten, shoyu (water, soybeans), spices, apple cider vinegar, red wine vinegar, lemon juice, black peppercorns. Each little cylinder is 1 inch in diameter and 3 inches long. Also sent product and same size label for Lemon Teriyaki Seitan. Black on blue. 8 oz. Ingredients: Water, wheat gluten, shoyu (water, soybeans), apple cider vinegar, red wine vinegar, lemon juice, spices. Each slice is 3 by 8 by 1/8 inch thick.

2483. **Product Name:** [Seitan Burger].

**Foreign Name:** Seitan Burger.

**Manufacturer's Name:** Viana Naturkost GmbH.

**Manufacturer's Address:** Neusserstr. 199, D-5000 Cologne 60, West Germany. Phone: (02233) 41323.

**Date of Introduction:** 1991.

**Ingredients:** Seitan: Wheat\*, wheat flour\*, shoyu\*, wheat gluten, ginger\*, kombu sea vegetable. \* = Organically grown.

**Wt/Vol., Packaging, Price:** 250 gm in a 350 gm jar. Or 80 gm.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Labels brought by Bernd Drosihn of Viana. 1995. March 11. Red, black, and white on orange. Paperboard. 3.5 x 2.25 inches x 2. Folded over. Stapled on top of plastic bag.

2484. **Product Name:** Tofu, Fried Soy Protein [Fried Yuba], Soy Milk.

**Manufacturer's Name:** Wen's Food Inc.

**Manufacturer's Address:** 9179-Red Branch Road, Columbia, MD 21045. Phone: 410-730-6699.

**Date of Introduction:** 1991.

**New Product–Documentation:** U.S. Soyfoods Directory. 1999. p. 45. Talk with Mr. Ting-yi Wen. 1999. May 6. The parent company of this company was started in 1987 in Taiwan. Then Mr. Wen came to Maryland and in 1991 began making the products shown above. Today he makes a host of innovative products. Tofu: Regular Tofu, Soft Tofu, Tofu Curds (*Doufu-Hwa*), Extra Firm Tofu (*Doufu-Gan*), two types of Tofu Noodles (Plain, and Spicy with Soy Sauce), Five-Spice Pressed Tofu Sheets (*Wu-hsiang pai-yeh*), and Seasoned, Rolled, Pressed Tofu Sheets (ssu-chi or suji, made from pai-yeh; season the sheets, then roll and steam).

Yuba: Crispy Soy Chicken (new name for fried yuba), plain fresh yuba (*bai dou-pi*). But he stopped making the yuba last year because: (1) It was too labor intensive; (2) Working in the hot, steam-filled room was so uncomfortable that at the end of each day he felt like a steamed dumpling. Soymilk (plain or sweetened with sugar) in ½ gallons.

Products to be introduced soon: (1) Soymilk in small single-serving cups similar to those in which yogurt is now sold (a unique packaging idea). (2) A line of soy yogurts. (3) A line of Chinese frozen entrees, such as Crispy yuba chicken with black bean sauce.

Business card sent by Ting-Yi Wen. 2001. Wen's Food Inc. makes tofu products and sauces, with Mao Pao, Kung Pao, and BlackBean flavors, plus Soy Chicken, Soy Pudding, Soy Milk, Soygurt, etc. They are still at the address above.

2485. Fukushima, Danji. 1991. Recent progress of soybean protein foods: Chemistry, technology, and nutrition. *Food Reviews International* 7(3):323-51. [29 ref]

• **Summary:** Contents: Abstract. Introduction. Chemistry: Chemical composition of soybeans (Soybean globulins

composed of four major components—2S, 7S, 11S, 15S), importance of three-dimensional structures of soybean protein molecules in food processing, influence of biologically active substances in soybeans on food processing. Technology: Traditional soybean protein foods and recent progress in their technology (soy milk {remove the hypocotyl and hull to remove off flavors; Soyasaponin A has the strongest off flavor}, tofu, kori-tofu, yuba), fermented soybean protein foods: Application of bioreactor for soy sauce production, nontraditional soybean protein foods and recent progress on their technology, recent progress on new soybean protein foods in which soybean proteins are the key material (modified abura-age, modified ganmodoki, deep fried texturized soy protein nuggets). Nutrition: Recent progress on nutritive values of soybean proteins (Soybean proteins have an amino acid score of 100 for persons more than 2 years old), physiological function of soybean proteins (they lower cholesterol levels when used to replace animal proteins). Future of soybean protein foods (Kikkoman fermented soy sauce is well on its way to becoming a universal seasoning. Tofu and tempeh also seem to have a bright future).

“The most important chemical reactions during the process of soybean protein foods are the intermolecular reactions among the residues exposed on the surface of the protein molecules through the denaturation process. In native soybean protein molecules, most amino acid residues responsible for the reactions—such as cysteine (-SH), cystine (S-S), and hydrophobic amino acid residues—are buried in the inside region of the molecule, inaccessible to water. These residues become reactable with each other through the exposure from the inside by heat denaturation during processing. The unique textures of soybean protein foods, such as tofu, kori-tofu, yuba, and texturized products produced by extruder, etc., are the results of both the intermolecular interchange reaction between the exposed -SH and S-S groups and the intermolecular hydrophobic reaction among the exposed hydrophobic amino acid residues. The exposure of amino acid residues is also important for the hydrolysis of soybean proteins by enzymes, through which soy sauce is produced, because the cleavage of the peptide bonds is carried out after binding between the active sites of the enzymes and the enzyme-specific amino acid residues exposed through denaturation.” Address: Kikkoman Corp., 1-25 Kanda Nishiki-cho, Chiyoda-ku, Tokyo 101, Japan.

2486. Homma, Gaku. 1991. Tofu, grilled tofu, and fried tofu (Document part). In: Gaku Homma. 1991. *The Folk Art of Japanese Country Cooking: A Traditional Diet for Today's World*. Translated by Emily Busch. Berkeley, California: North Atlantic Books. xii + 270 p.

• **Summary:** This is a remarkable book by a remarkable man, with many deep insights into both traditional and modern cultures in Japan and the USA; it gives a unique, authentic

view of Japanese culture, and makes liberal use of the Japanese names for things, such as food, utensils, techniques, houses, etc. He uses the Japanese words first, then explains what they mean (in parentheses) in English. Thus the book makes it easy and enjoyable to learn Japanese food-related words. Moreover, the book is brimming with interesting information about traditional soyfoods in Japan.

This record will focus on tofu: “Tofu, soybean cake—also called at the time [14th century] *shira kabe* or white adobe—was introduced by Zen Buddhist priests. Today, nearby most temples are small stands offering tofu handmade by the priests” (p. 27).

“A dish that was found on both this island [located south of Tokyo, 4 hours by boat south of Hachijō-jima] and in my home town [of Akita] was called *kayaki* or *kai yaki*. *Kayaki* means shell bake. A large scallop shell is placed over the fire and filled with fish, tofu and seasoned vegetables. Miso, soy sauce, or *shottsuru* (juice from pickling fish) are added for taste” (p. 40).

His home town, Akita, is still famous for a dish named *kiritampo*; it is white rice that has been cooked and wrapped around a wooden handle about 16 inches long. The handle is secured in the *irori* [sunken fireplace] next to the fire to sear the outer layer of rice. Then the handle is removed. The Matagi—one tribe of mountain hunters in the Owu range near Akita—packed this same *kiritampo* for their long hunting expeditions. Originally the Matagi added mushrooms they found under the autumn leaves to complete the dish. “Today we add tofu and other ingredients to make a dish that can be found in the finest traditional restaurants” (p. 42-43). Also on page 43 the author explains the origin of *sukiyaki*; *suki* means spade and *yaki* means barbecue.

In the section on vinegar and pickling: Lightly sour Chinese cabbage mixed with tofu and chopped negi (Japanese onion / leeks), simmered with mater, miso and sakekasu (rice wine lees) makes a delightfully sour dish (p. 66).

“Mame rui—Beans: The most popular product made from soybeans is tofu and I will go into tofu in greater length in the section on products used daily. Here we shall explore how to safe fresh tofu for future use.

“A block of tofu can be cut into half-inch squares and freeze-dried to make *shimidofu*. Another common name is *koyadofu*, named after Zen monks who lived on Mt. Koya near Kyoto who first discovered this process.

“We don’t need to go back this far in history to find *shimidofu*. It was common practice for farmers to hang tofu under the eaves of the house to dry. Although tofu came from China, the making of *shimidofu* is Japanese.

“The *shimidofu* available in markets today is sometimes processed with ammonia. There is a three-month shelf life for *shimidofu*. If it is too old it won’t soften again when soaked in water. Of course, it also doesn’t taste very good.

“If the temperature where you live drops below 32°

Fahrenheit for consecutive periods you can make *shimidofu* yourself. You can't make it in the freezer. You need to set it out where strong cold winds blow. Tofu turns yellow when it is freeze dried. Don't worry, this is natural."

Note 1. This is the earliest English-language document seen (April 2013) that uses the term *shimidofu* to refer to dried-frozen tofu.

"Tofu is also preserved through pickling in salt. In Japan, tofu pickled in salt is no longer available. Salt pickling is still popular in China and in other parts of Southeast Asia (p. 92).

The chapter titled "Products used daily" begins: "Tofu—Soybean Curd: Americans frequently ask me what Japanese people eat on a daily basis. Sometime I get disappointed looks when I tell them. I think they expect me to describe some strange, exotic dishes never heard of here in the United States. In the larger cities and towns of Japan today, the younger generation's diet is not so different than here in the U.S. Milk, cheese, and ham are common sights in most young family homes.

"Visiting a home in the country which continues to practice the old customs is a slightly different story. In these homes (almost stubbornly) mostly traditional foods are served. If there is a difference between the traditional households of the past and present, it is in the way the foods are procured, not the foods themselves. Instead of making most everything at home, the people of the countryside visit the grocery store. The flavors therefore are not quite as fresh and good as they used to be.

"When I was a child, the tofu peddler came by early every morning blowing his horn and yelling, 'Tofu, tofu!' in a loud voice. His bicycle was equipped with a metal washtub filled with fresh water and the tofu he had made himself that day. He also carried other products, like *age* (deep-fried soybean puff), *yakidofu* (broiled tofu), *atsu age* (deep-fried tofu cutlet), and *konnyaku* (devil's tongue yam cake).

"The tofu peddlers made tofu in larger blocks than you buy in the United States. One block was called a *cho*. You could buy a half or quarter *cho* if you wished.

"The tofu peddler was very familiar with our family and knew how much tofu or *age* we used daily. Knowing how much we needed, he filled the time with pleasantries and friendly conversation as he filled our bowl with the day's supply.

"Traditionally, the old tofu makers used the mineral *nigari* (bittern), found naturally in fresh sea water, as a solidifier during processing. The tofu found in the supermarkets is made with man-made solidifiers. The nutritional value of mass-produced tofu is rather less than tofu made in the traditional fashion. Tofu was brought to Japan by Japanese priests who went to China to study Buddhism. Today, for example, near the old temples of Kyoto there are tofu shops and restaurants that date back many, many generations.

"From its introduction, tofu was eaten by the people of the imperial courts. It was not until the Edo period (1603-1867) that tofu became popular among all classes. Since those earlier times tofu has become a major part of the Japanese diet, one of its daily foods.

"When I was a curator, I spent some time with an old man who made tofu for me in the style that was originally taught to him. I was surprised; his tofu was so hard you could tie blocks of it up with a rope and carry it. Naturally, the solidifier he used was *nigari* from fresh ocean water.

"Proverbs regarding tofu have been told for generations: something impossible is said to be 'like breaking your teeth eating tofu' or 'like picking up tofu with a pair of tongs.' A spoiled person 'has his tofu peeled.' Remarking that anyone can change: 'even tofu gets tight if cooked long enough.' I heard these proverbs on more than one occasion from my parents!

"The owner of one large tofu company in Denver told me about the first time he took a fresh tofu sample to one of the large local markets. The buyer took one bite and said, 'This is not tofu.' The new tofu maker was surprised and returned home to make another batch, believing in the traditional techniques he knew well. Again the buyer took a bite and said, 'This is not tofu, it is not sour. I have real tofu brought to me from California by truck. This tofu does not taste like the tofu I get from California.' I started laughing before he finished the story. The tofu shipped from California had begun to spoil en route. The buyer, not having anything to compare it to, thought all tofu was supposed to taste sour!

"Fresh tofu is a food high in nutritional value. However, because it has a high water content, it spoils easily. When you are buying tofu, I recommend you buy it at a store that has a good turnover rate, to make sure it is fresh. A bulging plastic cover indicates that gas is being released and the tofu is no longer fresh. After you have opened the package, submerge the tofu completely in fresh water. Tofu absorbs odors easily, so it needs to be covered. If refrigerated, tofu should last for three or four days.

"While I was running my restaurant, young mothers sometimes asked me for raw tofu for their children, but I always boiled it first. Like a sushi chef serving raw fish, it was my responsibility not to serve anything that might have spoiled" (p. 96).

Photos show: (1) Ishiusu—hand-turned stone mill grinding soybeans (p. 94). (2) Tofu products on a woven bamboo tray (1) *Yakidofu*. (2) *Ganmo*. (3) *Tofu*. (4) *Atsuage*. (5) *Koyadofu*. (6) *Age* (p. 96) (Continued). Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido and Cultural Center, Denver, Colorado.

2487. Passmore, Jacki. 1991. The encyclopedia of Asian food and cooking. New York, NY: William Morrow. 320 p. Illust. by Jan Smith. Index. 24 cm. [44 ref]

• **Summary:** The most complete book of its type seen to date (May 2010), with many helpful cross references (although sometimes flawed). Soyfoods are mentioned throughout. Unfortunately, for Chinese foods, the author does not distinguish between Mandarin and Cantonese, or between pinyin (newer) and Wade-Giles (older) styles of romanization. For some of the “Also known as” it is not clear to which of several previous entries this refers (see “Soybean”). Sometimes she gives standard transliterations (azuki, miso, tofu, yakidofu) yet at other times she writes phonetically (ah meh)—as an aid to correct pronunciation.

Ame (ah meh, Japan): A sweet jelly made from millet.

Azuki bean (*Phaseolus angularis*). Native to China; used in China since the Han Dynasty (206 BC–AD 220): An [or anko] (Japan): A sweetened paste of ground azuki beans available in smooth (koshi-an) and crunchy [chunky] (tsubu-an or tsubushi-an). Sarashi-an: A flour of ground azuki beans. Also known as hong dow (China), dried red beans, red beans [adzuki beans, aduki beans]. See also: Red bean paste, sweet.

Bean curd: Also known as dou-fu, dow foo (China); tahu (Indonesia), momen tofu, tofu (Japan); ta hu, ta hua (Malaysia); tahure ([fermented tofu] Philippines); tauhu kau (Thailand); dau hu, dau hu chung (Vietnam); bean custard, soybean cake.

Note 1. This is the earliest English-language document seen (April 2013) that uses the term *ta hu* to refer to Malaysian-style tofu.

Illustrations of: Fried bean curd, pressed bean curd. Almond bean curd (non-soy). Bean curd “brains”: Also known as doufu nao (China); taho (Philippines). “Cotton” bean curd: Also known as momen tofu (Japan). Freeze-dried bean curd [dried-frozen tofu]: Also known as koya tofu (Japan). Fried bean curd: Also known as char doufu, doufu pok (China); agedofu, atsu-age, nama-age (Japan); tauhu tod (Thailand), dau hu chien (Vietnam). Fried bean curd pouches: Also known as aburage, usuage (Japan). Gan modoki. Grilled bean curd: Also known as doufu kan [sic], gone (China); yakidofu (Japan). Instant bean curd. Okara. Pressed bean curd: Also known as doufu kan (China), taukwa, tauhu kuning (pressed yellow bean curd) (Indonesia, Malaysia); tokwa (Philippines); tauhu leong (Thailand); dau hu ki (Vietnam). Silk bean curd: Also known as kinugoshi tofu (Japan), shui doufu (China), taho (Philippines).

Note 2. The author seems to be confused about “Silk bean curd.” Japanese kinugoshi is made from relatively thick soymilk, which is “set” using a coagulant but without any separation of curds and whey. Yet on page 26 we read: “In China the name [for silk bean curd] translates as ‘water bean curd,’ It has a very smooth, delicate texture achieved by straining the coagulated liquid through fine mesh, then allowing the strained curds to settle without pressing.” This is not a description of silken tofu, but rather of Japanese regular tofu (*momen-goshi*) made without any pressing weights.

Contains a recipe for homemade “Bean Curd” plus 3 bean curd recipes.

Bean curd by-products: Bean curd skin [yuba], bean curd sticks: Also known as fu jook pin, gee jook (China), yuba (Japan), forng ta ohu [tauhu] (Thailand); rolled bean curd, second bamboo.

Fermented bean curd: Also known as foo yu, fu-ru, narm yu (China), tahoe, tahu (Indonesia, Malaysia), tausi (Philippines), bean curd cheese, Chinese cheese, pickled bean curd, red bean curd, soybean cheese.

Moldy bean curd. Bean curd cheese: See bean curd by-products (fermented).

Bean pastes and sauces: Shih and jiang from China: (1) Bean sauce (jiang) also known as taucheo or tau sa (Malaysia, Nonya and Singapore cooking), mien see [mian shi] (China), taoco [Pron. = tao-cho] (Indonesia), tuong ot (Vietnam), bean paste, brown bean sauce, yellow bean sauce. (2) Black bean sauce (a recent addition to the family of Chinese sauces. A major ingredient is puréed fermented black beans with a hint of garlic and star anise. It tastes best when freshly made). (3) Chili bean paste (in addition to chopped dried chilies, it sometimes contains fermented black beans): Also known as lat chu jeung, as lat chu jeung yau (Garlic) (China); kochujang (Korea); bean paste with chili; hot bean paste; Sichuan hot bean paste. (4) Dhwen-Jang (Korea). See also miso. (5) Hoisin sauce (China): A sweet, thick, reddish brown sauce. One ingredient is fermented soybean paste. Not to be confused with the Chinese barbecue sauce called sha cha jang. Also known as hoi sin cheung (China); barbecue sauce. (5) Soybean paste. Also known as mean see jiang (China). (6) Sweet bean paste. In this context it is not the sweet bean paste made from azuki beans, but rather a sweet, thick, dark brown sauce made of ground fermented soybeans and sugar. Its salty-sweet flavor is used in marinades and roast meats. Also known as tim mean jiang (China).

Bean sprout: Mung bean sprouts, silver sprouts (mung bean sprouts with the roots and seed pods removed), soybean sprouts (They “are large, up to 5 inches {12.5 cm} in length, a deep, almost yellow color and strong in flavor...”). Also known as: Daai dau nga choy (soybean sprout), ngunn nga choy (silver sprouts), nga choy, sai dau nga choy (mung bean sprout) (China); taugé (Indonesia); moyashi (Japan); kacang ijo, kacang djong, kacang padi (Malaysia); togue (Philippines); taun gawk (Thailand); gia (Vietnam); bean shoots.

Beijing duck sauce (recipe with ½ cup sweet bean paste). Vietnamese-style Beijing duck sauce (with ½ cup sweet soy sauce–kecap manis).

Black bean: See Fermented black bean. Black bean sauce: See Bean pastes and sauces. Fermented black bean sauce. Black soybean: See soybean.

Broad bean paste. Broad bean sauce: “The best is made in Pixian, a city in Sichuan province, where it is used instead

of soybean-based seasoning sauces.”

Brown bean sauce: See Bean pastes and sauces.

Che hau sauce (Che how, China): See Bean pastes and sauces (Hoisin). Chick-pea.

China: Has the “oldest and most well-documented cuisine in the world.” Chinese cheese: See Bean curd by-products (fermented). Chinese hot bean paste: See Bean pastes and sauces.

Dau hu (Dow hoo, Vietnam): See bean curd. Dau hu chien (Dow hoo chee-ian, Vietnam): See Bean curd, fried. Dau hu chung (Dow hoo chee-ung, Vietnam): See Bean curd. Dau hu ki (Dow hoo kee, Vietnam): See Bean curd, pressed.

Dengaku (plus recipe).

Dhwen-jang (Dwen-jang, Korea). Similar to Chinese soybean paste or Japanese akadashi miso. Also known as Korean bean paste. Doufou Kan [doufu gan], China: Bean curd (grilled, pressed). Dou-fu (Dau-fu, China). See Bean curd. Doufu nao (Daufu-nou, China): See Bean curd “brains.” Doufu pok (daufu pork, China). See bean curd, fried. Dow foo (dau fu, China): See Bean curd.

Edamame (e dah ma meh, Japan): See soy bean.

Fermented bean curd: See Bean curd by-products.

Fermented bean curd cake. See Bean curd by-products; tempe.

Fermented black beans (Shih, China). With recipe for “Fermented black bean sauce” (p. 106). Also known as dau see (China), black beans, dried black beans, preserved black beans.

Fermented red rice. Flours and thickeners: Kuzu (Japan). Mung bean flour. Soy flour (incl. kinako, which “is used in confections and to make noodles... In China, a thick, nutty-tasting noodle is made from soy flour”). Foo yu (Fu you, China). See Bean curd by-products (fermented). Fong Tao Hu (Fong tao huu, Thailand). See Bean curd by-products, bean curd sticks. Fu jook pin (Fu juk pin, China): See bean curd by-products, bean curd skin. Fu-ru (Fu yue). Gee Jook (Ji Juk, China): Bean curd sticks.

Gluten: Kau fu, kohana fu, matsutake fu, mein jin pau, nama fu, su tang, yaki fu. Also known as: Kau fu, mianjin, mein jin pau, su tang (China), kohana fu, yaki fu (Japan).

Gochujang (Korea). See also: Chili paste, chili sauce. Korean barbecue sauce.

Grilled bean curd: See Bean curd, grilled.

Hatcho miso: See miso, Hatcho. Hot bean paste. Hot black bean sauce. Inaka miso: See miso.

Japan: “Japanese cooks revel in the artistry of their craft. The Japanese love of nature is a challenge to present each ingredient as reminder of its origins: to bring nature to the table....” Regional cuisines are not of great importance in Japan; cooking methods (incl. Dengaku), salting (incl. Teriyaki), cutting and slicing techniques.

Kecap asin (Ket-chup a-seen, Indonesia): See Soy sauce, sweet and salty. Kecap cair (cha-ear, Malaysia): See soy sauce, light. Kecap hitam (Indonesia): See soy sauce,

sweet and salty. Kecap ikan (Indonesia): See Fish sauce.

Kecap manis (mah-niece, Indonesia): See Soy sauce, sweet and salty. Kecap petis (pet-is, Indonesia): See fish sauce.

Kinugoshi tofu (Japan): See Bean curd, silk.

Kochujang (go-choo jang, Korea): See Bean pastes and sauces; chili pastes.

Koikuchi shoyu (Japan): See soy sauce. Continued. Address: Author of several books on Asian cuisine.

2488. Soy City Foods vegetarian cookbook. 1991. Toronto, Ontario, Canada: The Golden Age Food, Ltd. 145 p. 28 cm. • **Summary:** Contents: Dips, spreads & sauces. Soups & salads. Side dishes. Quick & easy recipes. Harvest dinner main dishes. Tempeh main dishes. Tofu main dishes. Other main dishes. Breakfast & brunch. Desserts. Holiday recipes. Glossary. Products made by Soy City Foods: Harvest dinner patties. Falafels. Grain tempeh. Tofu. All soybeans are organically grown, and certified by OCIA.

Some history: In 1975, The Golden Age Food Limited opened the Vegetarian Restaurant in downtown Toronto. In order to produce healthy soy-based products from organically-grown soybeans, the restaurant created its own production facility, Soy City Foods. Address: 2847 Dundas Street West, Toronto, ONT M6P 1Y6, Canada. Phone: (416) 762-1257.

2489. Wasserman, Debra; Stahler, Charles. 1991. Meatless meals for working people: Quick and easy vegetarian recipes. Baltimore, Maryland: Vegetarian Resource Group. 96 p. Illust. No index. 22 cm. [10 ref]

• **Summary:** In this vegetarian cookbook, the section titled “Soy dishes” (p. 48-53) contains the following: Tofu mayonnaise dip. Fried tofu. Fried tempeh sandwiches. Spaghetti and tempeh sauce. Tofu “eggless” salad. Tofu pie and quick crust. Tofu burgers. Summer tofu salad. Curried tofu with peanuts. Tofu spinach dip. Address: Baltimore, Maryland.

2490. **Product Name:** Tofu (Plain), Savoury Baked Tofu, Soya Milk, Soy Ice Cream, and Soysage.

**Manufacturer’s Name:** Nature Island Foods.

**Manufacturer’s Address:** P.O. Box 501, Roseau, Dominica, West Indies. Phone: 809-448-3602.

**Date of Introduction:** 1991?

**New Product–Documentation:** Letter from Yolanda Bryan. 1992. Jan. 8. Lists the soyfoods they presently make.

2491. Dorow, Detlef; Hoffmann, Ralf. 1992. Update on Die Tofurei in Berlin (Interview). Conducted by Anthony Marrese in Berlin, Jan. 7. 2 p. transcript. Handwritten. Followed by a letter from Detlef Dorow on 17 Feb. 1992.

• **Summary:** In Aug. 1989 the name of the company was changed from Berliner Tofurei to Die Tofurei. In June 1991 the company moved to its present address at 2 Krefelderstr. 2

in Berlin. The original and last address was Luebbenerstr. 4, 1000 Berlin 36. The company was established 3 years ago to make tofu. The founders were Detlef Dorow, Ralf Hoffmann, and Misha Wolff. [Note: According to the magazine *Die Geschaefsidee* (1989, Dec. p. 33) this company was started in Aug. 1988 by 4 friends who liked to make tofu: Detlef Dorow [Dorow], Ralf Hoffmann, Shi-Jong Chen, and Michael Wolff [or Wolf]. The original company name may have been “Die Benjamine.” But Detlef now says that the original company name was Detlef Dorow–Erste Berliner Tofurei.] Over the years, Detlef’s friends left one by one: Michael Wolf in 1989, Shi-Jong Chen in 1990, and Ralf Hoffmann in late 1991—because of too much work and not enough money.

While at its original location, the company made Tofu, Tofu-Burger, Okara-Burger, Tofu Variationen, Mungo Sprossen Snack, Tofu Schnitzel, and Sushi-Reisroellchen. The company has also made Tempeh and Seasoned Tofu (with Vegetables, Herbs, Seaweed, or Smoked). Tempeh was discontinued after a while due to sluggish sales. Presently the company makes 200 to 400 kg/week of tofu (production varies widely), and about 250 Veggie Burgers (Tofu Burgers) each week.

The company has 3 full-time partner employees (each with equal ownership) and 2 part-time workers. Growth has been unstable. The building is about 18 by 10 meters, divided into 4 rooms. Gross sales are about DM 250,000 per year. Net worth is unknown. In Aug. 1991 the company started a restaurant at the same address as its production facility. A leaflet describing it, titled “Die Tofurei jetzt mit vegetarischer Kueche” (The tofu shop now with a vegetarian kitchen), printed black on orange, is enclosed. It serves a variety of soy-based snacks, drinks, salads, cakes (kuchen), desserts, main courses, and soups. Most are made from tofu, but tempeh and seitan, which are also on the menu, are purchased from either Viana Naturkost GmbH in Cologne, or Tofumanufaktur Hamburg.

Comments: All is not well at Die Tofurei and they may be out of business very soon for several reasons, the main one being disagreements between the partners. Detlef sees his job as working 8 hours a day, whereas Ralf and Misha feel they are working for a cause which they want to make grow. Low sales and high overhead have forced the issue to a head. Within a year of moving to their last location and having to renovate, a second move was required due to problems with the landlord. This then required a second renovation at the present location. Money for the renovations was borrowed from the bank and the company is already behind in its payments. Sales are low because (1) Their tofu prices are high (DM 7/kg wholesale) due to high overhead; (2) Several tofu companies from Freiburg, Hamburg, Stuttgart, Cologne, etc. have entered the Berlin natural-foods market; (3) Oh Tofurei, which is run by an Asian-German, has the entire Asian foods market in Berlin, including Asian

restaurants. Its tofu retails for DM 5/kg. The owner of Oh Tofurei was not willing to be interviewed. He speaks no English (only broken German) and is probably producing several hundred kg of tofu per day.

Ralf and Misha are ready to call it quits after 3 years of hard labor. Detlef wants to keep the restaurant and maybe to distribute tofu made by some other company.

Follow-up letter from Detlef Dorow. 1992. Feb. 17. “Ralf Hoffmann has just left the company, so I rule it by myself with a good worker. Ralf managed the finances for the last 6 months, but it was a big catastrophe. I hope I can reduce the damage. I have had so many problems with the company and my partner Ralf; he managed Die Tofurei for the last 6 months and I managed the “Vegetarische Kueche” restaurant. They run more or less separately. Now I am increasingly forced to make snacks (Sushi-Reisroellchen, Tofu Burgers, Gruenkern Burger, Tofu Baellchen mit Spinatfuellung, Tofu-Speiss) because our company is too small to compete with large companies. Our tofu is made mostly by hand, so it is a lot of work and not much money.” Address: Die Tofurei: Krefelderstr. 2, D-1000 Berlin 21, Germany. Phone: 030-393-0927.

2492. **Product Name:** Cauldron Foods Original 8 Tofu Bangers: Vegetable Sausages Made with Tofu.  
**Manufacturer’s Name:** Cauldron Foods Ltd.  
**Manufacturer’s Address:** 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.

**Date of Introduction:** 1992 January.

**Wt/Vol., Packaging, Price:** 8 x 50 gm bangers in a box. Retails for £1.95.

**How Stored:** Frozen.

**New Product–Documentation:** Health Food Business (London). 1992. Jan. p. 12. “New burgers and a Cauldron banger.” Note: A banger looks like an American hot dog.

Spot in BBC Vegetarian Good Food. 1992. Spring. p. 8. Shows a color photo of the front of the package.

2493. **Product Name:** Cauldron Foods 2 Tofu Burgers [Mexican, or Barbecue].

**Manufacturer’s Name:** Cauldron Foods Ltd.

**Manufacturer’s Address:** 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.

**Date of Introduction:** 1992 January.

**Ingredients:** Tofu (water, soya beans, calcium sulphate), wholegrain brown rice, sweetcorn, tomato puree, onion, wholewheat rusk, water, yeast, methyl cellulose (of vegetable origin), hydrolised vegetable protein, spices, salt, raw cane sugar.

**Wt/Vol., Packaging, Price:** 2 x 75 gm burgers in a box. Retails for £0.96.

**How Stored:** Refrigerated.

**New Product–Documentation:** Health Food Business (London). 1992. Jan. p. 12. “New burgers and a Cauldron banger.”

Label for “Barbecue” flavor sent by David Greenslade. 1994. Oct. 4 inches square by 1 inch thick. Paperboard box. Orange, yellow, black, and white. Two color photos, one of two burgers on a plate, another of a burger between buns. “Just heat to eat. Vegetable burgers made with tofu.” Cauldron is still located at 149 South Liberty Lane.

2494. **Product Name:** [Soy Burger (With Tofu, Natto, Okara & Vegetables)].

**Foreign Name:** Soja-Burghetti.

**Manufacturer’s Name:** Food for Freedom.

**Manufacturer’s Address:** Nylense [Nijlense] Steenweg 72, B-2270 Herenthout, Belgium. Phone: 014 / 51 7237.

**Date of Introduction:** 1992 January.

## SOJA-BURGHETTI

**Ingredienten:** tofu, natto (gefermenteerde sojabonen), sojavezels, havervlokken, ajuin, wortel, kruiden, zeezout.

**Ingrédients:** tofu, natto (fèves de soya fermentées), fibres de soya, flocons d’avoine, oignon, carotte, herbes, sel marin.

ten minste houdbaar tot :  
a consommer avant :

**Ingredients:** Tofu, natto, soy fiber (fibres de soya), rolled oats, onion, carrot, herbs, sea salt.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label and letter sent by Lucio de Berti, owner of Food For Freedom. 1992. Jan. This tofu burger with 10% natto was introduced in Jan. 1992. It is sold in only 2 large shops without a label because it is still being test marketed.

Label. 4 by 2 inches. Black on white. In Dutch and French.

2495. **Product Name:** Tempeh-Lettuce-Tomato Sandwich, Tempeh Burger, Bar-B-Q Tempeh, Tempeh Curry with Coconut Milk (and Rice), Dolphin Safe Tempeh Salad (Mock Tuna Salad).

**Manufacturer’s Name:** Leo Risin’ Foods.

**Manufacturer’s Address:** 1525 Rhode Island, Lawrence, KS 66044. Phone: 913-832-1521.

**Date of Introduction:** 1992 January.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter and Labels sent by Clayton McHenry, founder and owner of Leo Risin’ Foods. 1994. Feb. 22. In January 1992 Clayton named his business Leo Risin’ Foods

and set up a certified and inspected kitchen in his home at 1525 Rhode Island, Lawrence, Kansas 66044. Starting in January 1992 he produced five deli foods with tempeh for the Community Mercantile, and Clearly Nature’s Own, a natural food store in Kansas City, Missouri. The weights of and ingredients in these products are as follows (\* = organically grown): Tempeh-Lettuce-Tomato Sandwich (6 oz): Wheat bread, tempeh\*, lettuce\*, tomato, tofu mayo, sesame oil, spices. Tempeh Burger (7 oz): Wheat bun, handmade tempeh\*, lettuce\*, onion\*, tofu mayo, spicy pickle\*, mustard, hot sesame oil. Bar-B-Q Tempeh (6 oz): Wheat bun, handmade tempeh\*, rice malt sweetened barbecue sauce, red onion\*. Tempeh Curry with Coconut Milk (and Rice, 8 oz): Basmati rice, handmade tempeh\*, coconut milk, red chili, onion, cashew, green chili, spices, salt. Dolphin Safe Tempeh Salad (Mock Tuna Salad, 8 oz): Tempeh\*, Nayoanise, green onion, parsley\*, sunflower seeds, spices.

2496. O’Connell, Michael. 1992. History of Ploughshares Foods Ltd. in Glastonbury, England (Interview). *SoyaScan Notes*. Feb. 27. Conducted by Anthony Marrese in England.

• **Summary:** This company was founded in 1984 in the Essex countryside by Michael O’Connell and Fiona Bruce under the name “The Emperor Liu An’s Tofu Palace.” Liu An was the legendary inventor of tofu in China. The business was an 8-tonne mobile catering truck and kitchen on wheels which went to open-air shows and festivals; its purpose was to serve vegan

organic food (including tofu), demonstrate tofu-making, and promote veganism. They started operating the truck in Aug. 1984. Recipes prepared in the mobile restaurant in 1984/85 included tofu blueberry mock cheesecake, tofu mayo, tofu sweet cream, tofu lasagna, tofu pudding, tofu ice cream, tofu burgers, tofu gulash, and tofu pizza. In 1985/86 they launched okara steam pudding with dates, okara shepherd's pie, and okara burgers.

In Aug. 1986 the company moved to Glastonbury, started a non-mobile restaurant, and changed the company name to Ploughshares Foods Ltd. (after the Old Testament Biblical expression from The Book of the Prophet Isaiah 2:4 "They shall beat their swords into plowshares, and their spears into pruninghooks: nation shall not lift up sword against nation, neither shall they learn/study war any more").

In 1988 the restaurant introduced tofu quiche (onion and mushroom), okara veggie roll, okara tempeh, okara tempeh Bolognese/moussaka, and braised tofu in miso sauce. In 1989 they launched soya cream cheese with chives, and in 1991 okara tempeh with leaf protein added.

In 1991 the company structure changed from a partnership to a cooperative. Other current members of the co-op are Miranda Bruce, Sophie Pullinger, and Lalita Gordon Milverton.

The company was a pioneer in introducing tofu and new ways of using it to vegan restaurants. Uses included burgers, pies, dressings, creams, main dishes, salads, soups, etc. They introduced foods that were free of dairy products, wheat/gluten, and/or sugar, and developed a leaf protein product named Leafu (i.e. tofu from leaves). Their vegan cooking school was the first such school to receive the "City and Guild" qualification to those who graduate from their residential diploma course teaching vegetarian, organic, and special diet foods. The company provides a friendly working environment, as for single working parents, and is involved in the wider issues of improving society.

The main reasons for the company success are a commitment to delicious, aesthetic, nutritious food, customer loyalty, and a commitment to research, development, and innovation.

Anthony Marrese adds: "All of their products are good, and their people are especially nice. I spent about 18 months helping with the tofu production and restaurant in 1987/88." Address: 54 Roman Way, Glastonbury, Somerset, BA6 8AD, England. Phone: 0458-831182 or 835233.

2497. Productos Alimenticios Soyavyn. 1992. Productos alimenticios naturales a base de soya: Soyavyn [Natural food products based on soya: Soyavyn (Leaflet)]. Lourdes, Colón, Depto. La Libertad, El Salvador. 1 p. Feb. 19 x 13 cm. "Detail and wholesale, home delivery without re-charge."

Letter from Kris Duville of Productos Alimenticios Soyavyn. 1992. June 2. This leaflet was first printed in Feb. 1992 on the occasion of a village feast at which the company had a stand at the fair. Address: Planta Soyavyn, 2a Calle Poniente No. 2-4, Lourdes, Colón, Depto. La Libertad, El Salvador. Phone: 51-0705 or 23-3554.

2498. **Product Name:** Vegetarian Meatball.

**Manufacturer's Name:** Season's Harvest.

**Manufacturer's Address:** 52 Broadway, Somerville, MA 02145. Phone: 617-628-1182.

**Date of Introduction:** 1992 February.

**Ingredients:** Incl. tofu, brown rice, textured soy protein concentrate.

**New Product–Documentation:** Talk with Ademar Reis. 1993. Nov. 29. He introduced this product in Feb. 1992.

2499. **Product Name:** Vegetarian Bacon Bits.

**Manufacturer's Name:** Season's Harvest.

**Manufacturer's Address:** 52 Broadway, Somerville, MA 02145. Phone: 617-628-1182.

**Date of Introduction:** 1992 February.

**New Product–Documentation:** Talk with Ademar Reis. 1993. Nov. 29. He introduced this product in Feb. 1992. He buys the textured soy protein concentrate, then he adds the liquids and the dry spices.

2500. Whiteman-Jones, Michael. 1992. Soyfoods poised for growth: New mass-market interest, product development and consumer interest are driving sales higher than ever. *Natural Foods Merchandiser*. Feb. p. 18-19.

• **Summary:** Last year soyfoods were introduced to mass-market consumers by two of America's corporate giants. (1) Archer Daniels Midland Co. (ADM of Decatur, Illinois) introduced the vegeburger to show that a delicious food product could be made from soy. ADM marketing specialist Lee Lensch says the soy burger is doing very well in test markets in Indiana, Illinois, and Minnesota. Versions of the product are being advertised nationally in corporate TV spots and on local TV in test markets. Buyers who gave the products shelf space at chains such as Kroger, SuperValue and Cub Foods now report brisk sales. (2) Protein Technologies International in St. Louis, Missouri, a subsidiary of Ralston Purina, is test marketing a soy-based

beverage named First Alternative in Phoenix, Arizona.

Peter Golbitz, president of Soyatech Inc., a consulting company in Bar Harbor, Maine, notes that since the 1980s, Japanese companies (such as Nichii Co.) have invested at least \$50 million in soyfoods manufacturing plants in the U.S.

“Retail sales of soyfoods are growing in America by about 5 to 7 percent a year, increasing to about \$657 million in 1990, Golbitz says. The most rapid expansion is for soy milk, which is growing at a rate of about 20% a year, and second-generation soyfoods which are growing at a rate of about 15%... Soy milk consumption in Australia, where it is sold in grocery stores like milk, is about 10 times what it is in this country.”

Worldwide, consumption of soyfoods now averages about 1.7 kg/person/year, and is expected to rise to 2 kg or more by the year 2000. Taiwan is the world leader with 15.5 kg/capita/year of soy, followed by Japan at 11.1 kg. A world map and table (largely compiled from FAO Food Balance Sheets) shows “Soyfood consumption: Yearly average per capita (Amount of change from 1979 to 1988).” The following countries are listed in descending order of consumption in kg/capita: Korea 17.1 kg (2.4%). Taiwan 13.0 (37.0%). Japan 10.8 (6.7%). Indonesia 6.3 (57.4%). Hong Kong 3.8 (-22.0%). Saudi Arabia 3.6 (342.9%). China 3.4 (-5.6%). Paraguay 2.8 (50.0%). Malaysia 2.3 (102.2%). Thailand 1.6 (162.5%). Zimbabwe 1.6 (22.2%). United States 1.4 (33.3%).

**2501. Product Name:** Natural Touch Garden Pattie.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1992 February.

**Ingredients:** Textured vegetable protein (soy protein concentrate, wheat gluten), mushrooms, egg whites, water chestnuts, onions, corn oil, carrots, cooked brown rice, green and red bell peppers, rolled oats, calcium caseinate, black olives, soy sauce (water, soybeans, salt), corn starch, onion powder, natural flavors from vegetable sources, soy protein isolate, spices, garlic powder, celery extract.

**Wt/Vol., Packaging, Price:** 9.5 oz (269 gm) box contains 4 patties.

**How Stored:** Frozen.

**Nutrition:** Per 1 pattie (67 gm): Calories 120, protein 11 gm, carbohydrate 8 gm, fat 4 gm (percentage of calories from fat 34%, polyunsaturated 2 gm, saturated 1 gm), cholesterol 0 mg, sodium 300 mg, potassium 160 mg.

**New Product–Documentation:** See next page. Ad in Natural Foods Merchandiser. 1992. Feb. p. 27. “Natural Touch introduces something completely new in vegetarian patties. Vegetables. New Natural Touch Garden Pattie is the first vegetarian pattie with real garden vegetables.” This ad carefully avoids mentioning the main ingredient in the

product—textured soy protein concentrates—which hardly have a “natural” image.

Talk with Worthington Foods. 1992. Feb. 10. This product was introduced about 1 week ago. The tofu version of this product has been discontinued. Leaflets sent by Evelene Callahan of Worthington Foods. 1992. Feb. 11. List ingredients and nutritional information.

2502. Jacobs, Lenny. 1992. More about seitan and wheat gluten (Interview). *SoyaScan Notes*. March 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John Weissman, who may have been the first person to make seitan in America, is selling Solar Burgers in the Harvard Garage (a collection of little shops) in Harvard Square in Cambridge, Massachusetts. Lenny saw him about a month ago and thinks he can track him down. Solar Burgers are basically seitan plus some new ingredients.

Yumie Kono, who taught Lenny and others at The Seventh Inn how to make seitan, now lives in Canada. Aveline Kushi knows how to reach her. Aveline used to say that seitan was too complicated to make unless one had some special equipment, etc.

The publisher of Lenny’s first book on seitan sold about 2,500 copies; he is now working on a second edition that will be published by Avery Press. The manuscript should be ready in about 5 months, and will contain a history of seitan.

Some of the earliest seitan products in Europe were made by Jonathan in Belgium. Many are still on the market, have very attractive packaging, and are sold in most natural food stores in Belgium.

Wheat gluten is known in both Vietnam and Thailand and has its own name. Lenny has eaten it at Thai and Vietnamese restaurants in America. He knows a Vietnamese food store that sells wheat gluten in cans.

John Belleme told Lenny that Legume wants to launch a new seitan product as the entree in one of their frozen dinners made with John’s seitan. Legume’s first seitan product, named Legume Meatless Pepper Steak with Kofu [fresh wheat gluten] and Noodles, was made with seitan made by Upcountry Seitan (Sandy Chianfoni).

Lenny has heard that a lot of vital wheat gluten is made in Australia, and that some of the starch removed during the wet processing may be recovered and sold as wheat starch—but he is not sure. Address: New Age, Brighton, Massachusetts. Phone: 617-787-2005.

2503. Weissman, John. 1992. Pioneering work with seitan, Wheatmeal, and Tan Pops in America, 1974 to mid-1976 (Interview). *SoyaScan Notes*. March 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John was probably the second person to make seitan commercially in the USA. He was working in a health food store named Panacea in the middle of Manhattan in New York City. He and his girlfriend baked homemade

# Natural Touch Introduces Something Completely New In Vegetarian Patties.

Vegetables.

Natural Touch Garden Pattie<sup>®</sup> is the first vegetarian pattie made with garden vegetables. Each 100% natural pattie is bursting with bell peppers, carrots, water chestnuts, onions, mushrooms, black olives, rolled oats and brown rice.

It's as wholesome as it is delicious, with no cholesterol, just 1 gram of saturated fat and only 34% of total calories from fat per pattie.

**NATURAL TOUCH PRODUCTS ARE 100% FREE OF ANYTHING ARTIFICIAL.**

In a sandwich or as an entree, microwaveable Natural Touch Garden Pattie is just what you'd expect from the leading name in convenient all-natural vegetarian foods—a delicious part of a healthy vegetarian diet.

buckwheat-crust pies, and they could see that homemade foods sold very quickly at the store. He saw freshly made, unique foods as a potential market. On 13 June 1974 John turned 26 years old. That fall he moved to Boston and began to live with a macrobiotic couple who were his friends, Sakee (or Ronald) Israel and his wife, Fern Ross-Israel. John recalls that Fern was pregnant. [Note: Fern and Sakee had been married on 19 Oct. 1974 in West Roxbury, Massachusetts. Their first child, Kate, was born at home on 3 May 1975.] Sakee was a musician, who drove a taxi cab to make money. John was a dabbler with macrobiotics—and still is. Several months after John arrived in Boston, Fern told him that several people from the Erewhon retail store had told her that if someone were to make seitan, they thought it would sell well at the store. Fern had learned to make seitan either in a macrobiotic cooking class or from another woman in a study house. She knew seitan was hard to make, so she taught John and her husband how to make it in the form of little salty, gingery meatball-like chunks.

At the time, John had never heard of seitan before, but he does recall that an early seitan product named Tan Pups (seitan skewered on a bamboo stick and deep-fried in a breaded tempura batter) had been on the market in Boston, but was no longer; they were probably America's first commercial seitan product. John does not know who made Tan Pups nor when they were introduced. [Note: Tan Pups were introduced in March 1972 by Nik and Joanne Amartseff in Brookline, Massachusetts.] They had been sold at the Erewhon retail store on Newbury St., but had been on the market for only about 6 months. John recalls hearing that the maker moved to Maine or New Hampshire after discontinuing Tan Pups in Boston.

John was a blues musician at the time, painting houses as a source of income. John had just been let go from a house painting job and he was desperate for money. Soon in late 1974 he and Sakee, as business partners, began making seitan in their apartment at 17 Dent Street in West Roxbury, and selling it in bulk (5-10 lb of chunks) to one macrobiotic study house where Pat Murray lived. She bought 5-10 pounds at a time. (She later owned a health food store in Newburyport, Massachusetts.) For fun, as a sort of joke, they named their fledgling business Gimme Some Food Co. but after a month or two, when their products began to sell, they changed the name to the Wheatmeat Company—since in late 1974 John coined the term “Wheatmeat” to refer to their seitan. His trademark registration says he first made seitan in May 1976, but he was making it commercially before that. Within a few weeks, in late 1974, he and Sakee began selling Wheatmeat in bulk to the Erewhon retail store and then to other health food stores (such as Organic Food Cellar). It was sold refrigerated, in the form of rather salty little gingery meatball-like chunks in a large glass jar. A customer or the store clerk would lift out the chunks with tongs. By early 1975 the Wheatmeat Co. introduced “Wheatmeat

Sandwiches,” stuffed in pita bread in two flavors—one with homemade cole slaw (but no mayonnaise, using grapefruit juice instead of vinegar; Fern showed them how), another with tomatoes and lettuce; each had a sauce and was Saran-wrapped with a little paper label. John felt the sandwiches would have a broader appeal than plain macrobiotic Wheatmeat (seitan), but their main drawback was a short shelf life—only several days. Fairly soon they also began to sell Wheatmeat Cutlets in about 8-ounce polyethylene bags. Each piece was rolled flat. Later (about 1979) he introduced an unflavored, unsalted slab of wheat gluten, also labeled Wheatmeat, but with a different label and appearance (it was light tan instead of dark brown). It wasn't on the market for long because the shelf life was too short.

Next, in the spring of 1975, came Solar Burgers (although the name was not introduced until 1976). Based on information about protein combining in *Diet for a Small Planet* by Frances Moore Lappé, John began grinding cooked soybeans into the wheat gluten and selling the burger-like patties.

Then came Tan Pops, pieces of seitan that were skewered, breaded and deep-fried. In the spring of 1975, several months after they introduced the Wheatmeat Sandwiches to Erewhon, Fern recalls John and Sakee began to make Tan Pops in their home kitchen at 17 Dent Street and sell them in Boston. John only vaguely recalls making Tan Pops at Dent Street. Concerning the name of this product, John Weissman recalls (he is more than 50% sure) that he coined the name Tan Pops (based on Tan Pups, a similar earlier product, of which John had tasted one or two) after he separated from Sakee Israel, had met the owners of Baby Watson Cheesecake Co., and was working with Robert Allen. The “Tan” came from sei-tan (*tan* means “protein” in Japanese), and the “Pop” referred to something on a stick, like a Popsicle. He also recalls that many people did not like the name Tan Pops, which they said reminded them of Tampons (the female hygiene product). But he does not recall what this deep-fried skewered seitan product was named while it was made at 17 Dent St. before he named it Tan Pops. [Fern Israel is not sure when this product was first named Tan Pops, but she thinks it may have been so named from the day it was introduced; this is the only name she can recall that it had.]

In the spring of 1975, at about the time of the birth of Fern's first child, John moved out of Fern and Sakee's home, and he and Sakee went their separate ways in terms of their business; it was a very amicable separation. John had moved in with his girlfriend at 51 Oak Ave. in West Newton. At that time there was a company named Baby Watson Cheesecake Co., owned by two men named Peter and Kenny. One of the owners of Baby Watson had tasted a Tan Pup formerly sold at Erewhon (but no longer available) and liked it very much. He talked to John and suggested that, since he was already making seitan, he start deep-frying it to make a

product like the Tan Pup. Baby Watson was already carrying the Wheatmeat Sandwiches, but they thought a product like the Tan Pup would sell even better. At this point, John either developed or renamed the Tan Pop. He recalls that the Tan Pup was breaded with a typical (soggy and thin) tempura batter based on wheat flour. John developed a thick batter using coarse corn meal and sesame seeds; it became delightfully crunchy after deep frying. John and a friend, Rob Allen, were soon making the seitan and deep-frying the rectangular Tan Pops out of John's home. The Tan Pops were sold first at Erewhon and then at Baby Watson; They were incredibly successful, in part because of the innovation of dipping the seitan in the corn batter before it was fried. To make the Tan Pops, slab or steaks of seitan were cut to size (approximately 3 inches wide, 4 inches long, and 3/4 inch thick) and placed on a tray. Each was dusted with a dry mixture of wheat and coarse corn flour, then an 8-inch long stick was pushed into one end so that it looked like the famous old New England Corn Dog. Then he dipped the skewered cylinder into a seasoned batter (with cinnamon, basil, powdered garlic and onion, plus sesame seeds) and deep-fried it. He put each store's order of Tan Pops in a brown paper bag. At the store he would line one or more wooden bowls with paper towels, arrange the hot Tan Pops in the bowl like spokes on a wheel, then place them near the cash register. He was soon selling to 3 Erewhon stores, Baby Watson, and 1-2 organic food sellers, plus a few others totaling 10-12 outlets for the Tan Pops.

In the spring of 1976 John moved the kitchen to a location behind a bar in Waltham, Massachusetts. With friend Robert Allen, they introduced a new line of smaller seitan sandwiches, in hamburger-sized pita pockets. They were named after people he knew, like the "Billy Biggins," a Wheatmeat sandwich with grated carrots and tahini sauce, etc. Billy Biggins owned the bar. Then they rented space in a basement "mall" in Central Square, Cambridge, to begin a restaurant featuring Wheatmeat, Tan Pops and waffles. The developers ran away after somehow failing. John named another pee-wee sandwich the "Weymouth Whitney," after the construction manager. It contained Wheatmeat, sauerkraut, caraway seeds, and Russian dressing made with Hain eggless mayo. These little sandwiches didn't sell very well.

He also named the burger "Solar Burger" and reformulated it with TVP. Robert Allen suggested that their company might sell the Solar Burger to other, competing sandwich makers—which they did. Shortly thereafter they stopped making their own sandwiches. John also sold wheatmeat in bulk to other sandwich-makers. While at Waltham, John conceived a new company name—Vegetable Protein Company. Continued... Address: VegPro Co., 133 Nottinghill Rd., Brighton, Massachusetts 02135.

2504. Weissman, John. 1992. Pioneering work with seitan,

Wheatmeat, and Tan Pops in America, mid-1976 to 1992 (Interview). *SoyaScan Notes*. March 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: In the fall of 1976 John formally founded the Vegetable Protein Company, registered with the city of Cambridge, and moved his operation out of his home into a commercial shop in Central Square at 140 River St. in Cambridge. Robert Allen left the company to begin a new career in the field of men's clothing. In 1976-77 John tried to get a trademark for Wheatmeat but was unable to because I.T.T. (Wonderbread) owned the trademark for a bread product. With Tan Pops as the main cash product from 1976-1978, the business became a real commercial business and began to grow. Selling as many as 85 Tan Pops a day at Erewhon alone, he began to earn a modest living. For the first time, John began to use machines to help him in making his products. In 1977 he developed a portion-control method for the Tan Pops, running the seitan through a meat grinder, and forming them into cylinders, like a fat sausage, rather than the former slabs. John also began to experiment with new ingredients in the Wheatmeat and Tan Pops—such as vital wheat gluten, which he purchased from Ogilvie Ltd. in Montreal, Quebec, Canada. Other ingredients used included oat bran and oat flour mixed with wheat, whole toasted soy flour. The formula was constantly changing. At one point the main ingredients in the Tan Pop were vital wheat gluten and whole wheat flour. Neither Wheatmeat or Tan Pops were ever made entirely from vital wheat gluten.

In addition to the Wheatmeat Tan Pop, John developed and made a Tofu Pop, introducing it in the spring of 1977. He bought squares of plain pressed tofu (3 inches on a side and 3/4 inch thick) from a Chinese retail food store in Boston's Chinatown—he does not recall the company's name and he is not sure if they made the tofu or bought it from elsewhere. Later he bought tofu from Yah Kee, a Chinese tofu maker. He skewered the pressed tofu squares, coated them with his dry flour mix and corn batter, and deep-fried them. He first sold these at the very first Bread & Circus natural food store purchased by Anthony Harnett in Brookline. The product was introduced just after Anthony bought the store—but it was discontinued after a month or so, because it sold slowly; the unflavored tofu was too bland.

One day in the spring of 1979 he realized that deep-frying was unhealthy, and that day he and an employee moved his Pitco deep-fryer down to the basement, thus starting the "Vegetable Protein Museum of Natural History"—and stopped making Tan Pops. At that point he reformulated the Solar Burgers by adding TVP (they were made from a mixture of seitan and soy in various forms, incl. soynuts and TVP). He also made a TVP chili, which he thinks was called Vegetarian Chili.

In about 1978-79 John introduced another new product to salad bars around Boston. Named Smoky Soy Bits, it was a combination of TVP and gluten (produced by Ogilvie

Ltd. in Canada) made into bacon-like bits, but without hydrogenated oils or salt (he used tamari instead). It was an “all natural” product—to the extent that TVP is natural.

In Nov. 1980 John introduced Weissman’s Original Tofu Sausage, which tasted like bologna. A 6-ounce mixture of spices and tofu in a cellulose casing, it was cooked in a smokehouse. His company made it for the first 4 years and it eventually became his best-selling item. As its popularity increased, he phased out retail sales of Wheatmeat and Solar Burgers, and sold these Tofu Sausages to restaurants in bulk. After this period he invented only tofu products.

In 1983 John invented Pasta Pals, a tofu-gluten meatball. He discontinued it when Lipton Tea Inc. brought the trademark from him in late 1984. Lipton still owns the registered trademark.

In May 1984 John had to leave his food plant at 140 River Street in Cambridge. So he arranged with Michael Cohen to make the Tofu Sausage at his plant in Greenfield, Massachusetts. This was disastrous for John, since the product’s new poor quality almost ended any reputation it had left in the marketplace. But it was quite an education for John. In January 1985 he took back the product and began making it for himself again.

In the fall of 1984 John arranged with Ademar Reis, owner of Season’s Harvest (a sandwich maker who was John’s first customer for bulk-packed Solar Burgers in 1976) to have the Solar Burger made at Ademar’s shop. John also wanted him to make Smoky Soy Bits and showed him how. Reis made the products for John briefly in late 1984, however this situation did not work out for John either. But it did for Ademar, who to this day makes soy “bacon” after the manner John showed him, using textured soy flour or concentrate, and flavorings similar to or the same as those from raw material sources which John supplied to him. Reis now also makes a tofu meatball.

In 1985 John changed the company name to VegPro. He continued to make Solar Burgers and Wheatmeat, but from then on he only invented and worked on tofu products. In about 1986, based on the success of his Weissman’s Original Tofu Sausage (6 oz), he introduced a new Tofu Savvy line of products (starting with a 3-lb Boloney), each in a 2-3 lb loaf shape like a meatloaf, and sold to delis. He buys his tofu from a tofu maker in Massachusetts. With names like Tofu Salsa Savvy (bulgur and tofu), Curry (with brown rice and veggies), Spice-Seed, and Boloney, these are offshoots of the tofu sausage, but they involve a highly proprietary process that John has developed. Delis sell the sliced loaves for use in sandwiches.

In 1990 he began to test market (in one Bread & Circus store) two new types of tofu franks: Good Dogs, and Bad Good Dogs (hot & spicy), each with a registered trademark. They were only on the market for 1-2 months because they didn’t keep well—but he still feels they are excellent products. He made them himself because he doesn’t like to have them

made on meat processing machines.

Today John works as a very creative solo craftsman and a chef, still making a line of food products himself, including the Weissman’s Original Tofu Sausage (6 oz), and the Tofu Savvy line. His products are sold at about 10 outlets, including five Bread & Circus stores, plus some co-ops, restaurants, and health-food stores.

He no longer makes Solar Burgers, but someone from California is making another product with that name.

On 19 April 1988 John received federal trademark #1,485,401 for Wheatmeat. He knows of people in Utah and Pennsylvania who are using his registered trademark, Wheatmeat, illegally.

John, now age 43, is a musician, selling foods he has developed, and writing a novel. He is almost a vegetarian, but he eats some fish. Address: VegPro Co., 133 Nottingham Rd., Brighton, Massachusetts 02135.

2505. *BBC Vegetarian Good Food (England)*. 1992. Better burgers? Spring. p. 46-47.

• **Summary:** Seven percent of the people in Great Britain don’t eat meat. A taste panel rates the top ten meatless burgers in the UK. First place: Birdseye cauliflower cheese quarter pounders. 2nd place: Birdseye original vegetable quarter pounders. 6th place: Cauldron Foods savoury tofu burgers (sold at Safeway, Holland & Barrett, and leading health food shops and delicatessens). 9th place: Cauldron Foods chilli flavour tofu burgers.

2506. **Product Name:** Chinese-style Tofu, Very Firm Tofu, Pressed Tofu Sheets, Buddha’s Chicken (Chicken Roller), and Pork-Flavored Tofu Sheets.

**Manufacturer’s Name:** Orient Venture, Inc.

**Manufacturer’s Address:** 3455 Hyde Park Blvd., Niagara Falls, NY 14305. Phone: 716-285-3333.

**Date of Introduction:** 1992 March.

**New Product–Documentation:** Talk with Richard Keys, vice-president and controller. 1992. Jan. 22. This company is owned by Aaron Pomerantz, who is also president and also owns a local Chinese restaurant, the Emperor of China in Niagara Falls. A crew of about 9 Chinese advisors and workers is now assembling at the plant tofu equipment made in Harbin and supplied by the Chinese as their participation in the joint venture. The technology is not as modern as that made in Japan but all parts are stainless steel. One man is from Hi-Tech, China’s trading window to North America, and another is a representative of the city of Harbin government, as well as a translator/project manager. The company hopes to start tofu production in about 3 weeks. The tofu products may be marketed under the White Dragon brand. After that, they will be production of Chinese steamed or fried dumplings (*hundun*, *jiao*, springs rolls). Orient Venture Inc., does numerous projects with China, including importing and exporting, joint ventures and arranging joint

ventures with North American companies, etc.

Talk with Richard Keys. 1992. Feb. 25. Production of three products will start in March, perhaps under the Snow Dragon brand: Regular Tofu, Pressed Tofu Sheets, and Chicken Roller (made from Pressed Tofu Sheets). The company is looking for an American production manager. There have recently been many communication problems between the Americans and the Chinese in this venture.

2507. Elias, Marilyn. 1992. Next on the menu: Beef minus the cow. *USA Today*. April 8.

• **Summary:** The article begins: “San Francisco–Tofu that tastes like T-bone steaks and veggie burgers with intense ground beef flavor could be staples on the future U.S. menu, a scientist predicted today. The natural substance that gives beef its meaty taste has been identified and even synthesized in the lab, says researcher Arthur Spanier, U.S. Department of Agriculture. That will make the new, faux beef fare possible, he reported at an American Chemical Society meeting.

“The substance, a chain of eight amino acids, is called BMP, for ‘beefy-meaty-peptide.’ Tasters find it ‘quite meaty, very savory,’ Spanier says... Since the peptide is natural, ‘we may be able to genetically engineer cattle so their muscles have more,’ giving all beef cuts a flavor boost, he says.”

Note: This information was apparently first published by the American Chemical Society. Address: Washington, DC.

2508. *Toyo Shinpo (Soyfoods News)*. 1992. [Average household expenditures for tofu, aburaage, natto and konnyaku in Japan in 1991 by region]. April 11. p. 2. [Jap]

• **Summary:** Average per household expenditures for various soyfoods; yen figures are not adjusted for inflation. The 11 regions (chihō) are: 1. Tokyo-to. 2. Hokkaido. 3. Tohoku Chiho 4. Kanto. 5. Hokuriku. 6. Tōkai. 7. Kinki. 8. Chūgoku. 9. Shikoku. 10. Kyushu. 11. Okinawa.

Average per household expenditures for tofu are highest in Shikoku (9,045 yen, up 22.9% from the previous year). They are 2nd highest in greater Tokyo (8,218 yen, up 3.8%). They are lowest in Hokuriku (6,835 yen, down 2.0%).

Average per household expenditures for aburaage and ganmodoki (deep fried tofu pouches and burgers) are highest in Hokuriku (5,772 yen, up 3.7% from the previous year). They are 2nd highest in Kinki (5,170 yen, up 10.5%). They are by far the lowest in Okinawa (701 yen, down 0.7%).

Average per household expenditures for natto are highest in Tohoku Chiho (the northeast prefectures) (4,709 yen, up 20.6% from the previous year). They are 2nd highest in Kanto (4,133 yen, up 13.1%). They are by far the lowest in Okinawa (923 yen, down 13.5%).

2509. **Product Name:** Protoveg Burgamix with Onion and Chives.

**Manufacturer’s Name:** Haldane Foods Group.

**Manufacturer’s Address:** Howard Way, Newport Pagnell, Buckinghamshire MK16 9PY, England. Phone: 0908 211311.

**Date of Introduction:** 1992 April.

**Wt/Vol., Packaging, Price:** 330 gm foil packets. Retail for £1.69 (5/92).

**How Stored:** Shelf stable.

**New Product–Documentation:** Spot in *SoyaFoods*. 1992. Spring. p. 4. “New Flavors for Burgamix and Sosmix.” Note: Burgamix was originally developed by Direct Foods.

2510. **Product Name:** Protoveg Sosmix [With Country Herbs, or With Cheese and Onion].

**Manufacturer’s Name:** Haldane Foods Group.

**Manufacturer’s Address:** Howard Way, Newport Pagnell, Buckinghamshire MK16 9PY, England. Phone: 0908 211311.

**Date of Introduction:** 1992 April.

**Wt/Vol., Packaging, Price:** 330 gm foil packets. Retail for £1.59 (5/92).

**How Stored:** Shelf stable.

**New Product–Documentation:** Spot in *SoyaFoods*. 1992. Spring. p. 4. “New Flavors for Burgamix and Sosmix.” “Also new from Haldane is Protoveg Sosmix with Cheese and Onion which joins the existing range of Sosmix, and Sosmix with Country Herbs as a complete premix requiring only the addition of water. The meat-free sausages are made from textured vegetable protein.” Note: Burgamix was originally developed by Direct Foods Ltd.

2511. Johnson, Lawrence A.; Meyers, D.J.; Burden, D.J. 1992. Soy protein’s history, prospects in food, feed. *INFORM (AOCS)* 3(4):429-30, 432, 434, 437, 438, 440, 442-44. April. [54 ref]

• **Summary:** “This is the second part of a review that chronicles the individuals and the historical and economic factors noteworthy in the development of soy protein as food and feed ingredients.” Contents: Introduction. Early Western food uses (whole and defatted soy flour, enzyme-modified isolated soy proteins as whipping agents, whipped toppings, cereal-soy blends). Soy flour and grits. Protein concentrates and isolates (Griffith Laboratories, Central Soya Co., Mead Johnson and Co., Central Soya). Dairy analogs (Dr. Harry W. Miller, Loma Linda Foods, Mull-Soy and Borden, Vitasoy, Edensoy, Worthington Foods and Soyamel, Prosoabee and Mead Johnson, Rich Products and Chill-Zert, Tofutti). Spun fibers (Robert Boyer and the Ford Motor Co., Temptin, Worthington Foods, Bontrae, Bac\*O’s, Bac-O-Bits, Miles Laboratories, Morningstar Farms). Textured soy protein and meat analogs (W. Atkinson, ADM and TVP, General Mills and frozen Bontrae, the U.S. School Lunch Program). Nutritional advances in soy products. Today’s world soybean and soy protein production (consolidation among manufacturers of modern soy protein ingredients:

ADM, Cargill, Central Soya Co., Protein Technologies International, A.E. Staley Mfg. Co.). Future of soy protein products.

Tables show: (1) Soy meal consumption in the USA by type of animal: Poultry 41.1% of total 18.9 million metric tons, swine 27.4%, beef cattle 9.0%, dairy cattle 9.0%, other livestock 9.5%, human food 3.2%, industrial 0.5%. Thus, industrial (nonfood, nonfeed) uses for soybeans presently comprise no more than 0.5% of the protein produced from soybeans grown in the United States. (3) U.S. companies supplying protein in 1948-50 versus 1990 (industrial and edible flours, concentrates, and isolates). 23 companies then vs. 5 in 1990.

Note: Talk with Ed Milligan of EMI by phone. 1992. May 5. This article contains some misleading information. It refers to an article by Ken Becker written in 1971. In 1958-59 USDA developed a laboratory prototype of flash desolventizing. In 1959 they contacted EMI corporation in Des Plaines to commercialize the flash desolventizing system for production of light-colored, edible soybean flakes, for soy flour and grits, with a maximum PDI (protein dispersibility index). At that time Ed Milligan was just a newly hired member EMI, which undertook the project. Ed designed and installed the world's first commercial flash desolventizing system for Honeymead Products Corp. in Mankato, Minnesota, in 1960. Note that this system was used to make food, rather than feed. All but 2 systems have been used exclusively to make foods. All such systems produce a flake with a very light color and controlled PDI, whereas a DT (desolventizer-toaster) produces a golden colored flake. He is leaving for India in a few weeks to commission EMI's 22nd such unit. He has designed, installed, and started every one of the 22. Address: Center for Crops Utilization Research, Iowa State Univ., Ames, Iowa 50111.

**2512. Product Name:** Yves Veggie Cuisine Burger Burgers (Fat Free—Contains No Meat). Renamed Veggie Burger Burgers by March 1998.

**Manufacturer's Name:** Yves Veggie Cuisine.

**Manufacturer's Address:** 1138 East Georgia Street, Vancouver V6A 2A8, B.C., Canada. Phone: 604-251-1345.

**Date of Introduction:** 1992 April.

**Ingredients:** Water, onions, textured soy protein, wheat gluten, soy protein isolate, brown rice syrup solids, pea fiber, onion powder, malt extract, yeast extract, salt, tomato paste, Dijon mustard, rice flour, natural flavor, vegetable gums.

**Wt/Vol., Packaging, Price:** 2 patties in 6 oz (170 gm) paperboard box.

**How Stored:** Refrigerated or frozen.

**Nutrition:** Per patty (85 gm): Calories 83, calories from fat 0, total fat 0 gm (0% daily value; saturated fat 0.0 gm), cholesterol 0 mg, sodium 380 mg (16%), total carbohydrate 9 gm (dietary fiber 4 gm [15%], sugars 6 gm), protein 11 gm. Calcium 6%, iron 9%, vitamin C 2%. Percent daily values

are based on a 2,000 calorie diet.

**New Product—Documentation:** Ad (color, 2/3 page) in *Natural Foods Merchandiser*. 1992. April. p. 94. "Yves Veggie Cuisine." Shows packages of Veggie Wieners and Burger Burgers.

Product with Label purchased at Safeway in Lafayette, California. 1996. June. 5 by 3½ by 1 inch paperboard sleeve. Red, yellow, and black on white. Photo on front panel of a burger with grill marks atop lettuce and tomatoes below a sesame bun. "Contains no meat. Fat free."

Label sent by Yves Fine Foods, comb-bound in "Yves Veggie Cuisine US Packaging." 1998. March.

2513. Creighton, Barry. 1992. Cable Springs Bakery and recollections of Tan Pups in Boston (Interview). *SoyaScan Notes*. May 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Barry started baking while he was living in Los Angeles, California, at a macrobiotic study house run by Carolyn Heidenry. Then he moved to Boston and continued selling (out of his apartment) the baked goods he had developed in Los Angeles. He and Cathy were married about a year later on 7 Jan. 1974 then in August 1974 they started Cable Springs Bakery as an incorporated official business.

At that time (Aug. 1974) he is quite sure that a product named Tan Pups (skewered seitan deep-fried in a breaded batter) were on the market. Barry thinks that Tan Pups were probably introduced 6-12 months before his bakery opened, i.e. in early 1974 or late 1973. The Tan Pups may have been made by the Queensberry Bakery [actually they were not], which was run by two brothers (whose names Barry does not remember); it was a natural foods- rather than a macrobiotic bakery. Both his Cable Springs Bakery and Queensberry Bakery sold their products at the Erewhon retail store on Newbury Street in Boston. They were sort of competitors, and Barry first saw Tan Pups in that Erewhon store. Barry also recalls that Tan Pups were on the market when his son, David, was born on 3 March 1975. But not long after that, Queensberry Bakery went out of business, and their Tan Pups were therefore no longer available. Barry almost bought Queensberry Bakery, but after a series of negotiations decided not to. Cable Springs Bakery was sold to Bruce Berman in August 1975; Barry had owned the business for a year. Then he and Cathy went to Vermont. Cathy learned about seitan from Michio Kushi during a consultation concerning her daughter, Eliza's, broken leg. She learned how to make seitan from Kathy Bellicchi at the Beacon Hill Study House in Boston, and she learned how to make kofu (raw wheat gluten) from Lima Ohsawa's book *The Art of Just Cooking*. Cathy developed a recipe for Tan Pops in 1975 in Vermont. The best Tan Pops are made by the longer double deep-fry process that Cathy developed for seitan burger patties in Cambridge.

Today at their community in Alaska, they still make Tan

Pops on their full-moon night feasts. His daughter makes most of the Tan Pops; she learned from him and Cathy. To make double-fried Tan Pops: Make raw wheat gluten dough and cut it into large chunks (4 by 1½ by 1½ inches). Get 3 pots going on the stove: (1) A pot of oil for deep-frying; (2) A pot of boiling water; (3) A pot of broth containing 12 cups water, 1½ cups tamari, 30 thin slices of ginger, and lots of kombu. Deep-fry the chunks, dip them in the boiling water, then simmer in the broth for 1 hour. Drain and cool. Skewer chunks on chopsticks. Prepare a tempura batter containing 4 cups each corn flour, pastry flour, and unbleached white flour, 2 tablespoons sea salt; add water to mud consistency. Dip skewered chunks in tempura batter and deep-fry again. Address: Foundations Inc., HC2, Box 564-B, Kasilof, Alaska 99610. Phone: 907-262-2824.

2514. Bellicchi, Kathy. 1992. Recollections of seitan in Boston from 1970 (Interview). *SoyaScan Notes*. May 10. Conducted by William Shurtleff of Soyfoods Center.  
 • **Summary:** In Aug. 1969 Aveline Kushi had moved to Los Angeles where her youngest son, Hisao, had undergone traditional Japanese bone massage therapy. Kathy arrived in Boston in early 1970 when Aveline had just returned briefly from Los Angeles. At that time Aveline gave some cooking classes in Boston which Kathy attended, and Kathy remembers that Aveline taught how to make seitan in these classes. That was the first time Kathy had ever heard of seitan. Before that time, Kathy had lived in New York, had been macrobiotic since 1965, and had cooked with Michel Abehsera and many other macrobiotics in New York; she never heard of seitan while in New York prior to early 1970. But the Ratners chain of restaurants in New York did serve Protose Steak made of wheat gluten.

Kathy recalls that in the early 1970s seitan was considered by macrobiotics to have medicinal properties. For example, when Cathy Creighton arrived in Boston and Eliza had a broken leg, many people suggested that Eliza be fed seitan to help the leg to heal.

To make seitan back in the early days, Kathy would grind a special type of hard Minnesota wheat into flour, knead flour and water together thoroughly to make a dough, then let that dough stand under water—often for several hours. She would then further wash the raw wheat gluten, strain the starch water to separate the bran (which settled to the bottom), dry the bran on cookie sheets in an oven, and use it to make bran pickles. The starch water would be used to thicken a seitan stew—so everything was used. Most people made seitan by first deep-frying the wheat gluten, then cooking it in a tamari-ginger broth to make seitan; everyone said it had to be deep-fried first, and Tan Pops probably came from that concept. Kathy thinks that this method may have come from George Ohsawa to Herman Aihara to Aveline Kushi. To make seitan stew, chunks of seitan were simmered with chunks of onions, carrots, and other vegetables; just

before it was served, some of the starch water was added to give the stew a nice sheen and little thickness. It turned clear when added.

She remembers that Tan Pops were made by the Queensberry Bakery in Boston. Kathy does not recall the names of the two brothers who ran the Queensberry Bakery. Matthew Chait, an actor who had a cart named the Ricycle at Boston University, worked out of the Queensberry Bakery; he or Vern Verona might know more about Tan Pops. Address: 55 Meadowbrook Rd., Brookline, Massachusetts 02167. Phone: 617-734-1380.

2515. Wollner, Joel. 1992. Re: Ode to Tan Pops. Letter (fax) to William Shurtleff at Soyfoods Center, May 19. 2 p.  
 • **Summary:** “Did you ever eat a ‘Tan Pup?’ [sic, Tan Pop]. Hot? If not, you can’t imagine the ecstasy (and agony) you missed. A Tan Pop’s crusty exterior belied a succulent interior, redolent of soy sauce, garlic, and herbs. The vegetarian’s version of the famous ‘Corn Dog,’ from which their name was played, the Tan Pop was a crispy-crust, batter-fried chunk of Wheatmeal, ¼ pound, stuck on a skewer. More exotic than any blanketed hot dog, freshly cooked, steamy hot Tan Pops were so incredibly irresistible, they made many a glutton of gluten. No one, outside their maker, Johnny Weissman, of the Vegetable Protein Company, Cambridge, MA, knew the exact recipe. In the years I worked at Erewhon’s Newbury Street store, from 1977 to 1980, Tan Pops were a big hit, with a loyal following. Two mornings each week, ‘Johnny Wheatmeal,’ as we called him, brought in a batch of 50 or more steamy hot, freshly made Pops. I can still smell them today, mouth watering. We displayed them still hot in a large wood bowl at the checkout counter. I believe the store paid around 50¢ to 60¢ each, and they retailed for 75¢ or 85¢. As soon as they arrived, the store staff started in eating them, and eating too much of them. One Tan Pop was great, but rich as they were, two or more was courting belly aches. Still, there were never enough to go around, but Johnny would only complain about how difficult they were to make. I don’t know how long Tan Pops were sold at Erewhon before I started working there, nor do I know what became of Tan Pops or Johnny Wheatmeal in recent years. I remember learning that Johnny held a federal registration of the name ‘Wheatmeal.’ He also marketed Wheatmeal cutlets of several ounces each, refrigerated or frozen, plain (unseasoned) or cooked in soy sauce broth, which he sold to Erewhon and other Boston area natural food stores. As I recall, the Wheatmeal ingredients included wheat gluten and soy protein. Johnny Wheatmeal was something of a vegetable protein visionary, who experimented with many wheat and soy protein products, such as sausages. I also remember that Andrew Levine, formerly a clerk at Erewhon Newbury, used to spend a fair amount of time chatting with Johnny Weissman. You can reach Andy at Yellow Emperor in Eugene, Oregon (503)

485-6664.”

Note: To find out who developed the forerunner of Tan Pops, Joel suggests contacting Matt and Helen Sandler in Aspen, Colorado, or Hannah Bond (also known as Anne Harris) in Athens, Vermont. Both, in fact knew, that the forerunner was Tan Pups, developed by Nik Amartseff of Brookline, Massachusetts, in about March 1972. Address: Joel Wollner Associates, P.O. Box 1343, Clifton Park, New York 12065. Phone: 518-371-7014. Fax: 518-373-8337.

2516. Hall, Trish. 1992. Turkey, tuna or soy: The post-modern burger. *New York Times*. May 20. p. C1, C6. Living section.

• **Summary:** “Vegetable burgers,” which are becoming more popular, have a dual audience: those who have health concerns and those who avoid meat for other reasons. ADM has begun selling a Harvest Burger, both in frozen ready-made form and as a dry mix; 29% if its calories come from fat, about half the fat content of a regular hamburger. The burger has become so popular that Harvest Direct, a small mail order company, has begun selling it in dried form. The company has had to expand its staff to 15 people, up from only 2 people when it began 18 months ago. Surveys by ADM show that only 20% of the customers are vegetarians.

2517. Kendall, Charles. 1992. People involved with food and macrobiotics in Boston from 1971 to 1981. Memories of Tan Pups, Tan Pops, and seitan (Interview). *SoyaScan Notes*. May 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Charles lived in Boston as part of the macrobiotic community for about 10-12 years, from about July 1971 to December 1981. In 1970-71 Charles started to work for Erewhon packaging products. Then he became their roaster, roasting grains and seeds for the Erewhon cereals. At one point he left for a year and studied Sanskrit. From about 1974 to 1978, Charles worked at the Erewhon warehouse running “The Company Store,” which sold products to Erewhon employees and “friends of the community.” They could buy small quantities of Erewhon products at wholesale prices + 10%. George Crane helped to start this store. After leaving The Company Store, Charles then he went back into roasting for Erewhon.

Charles remembers Tan Pups (skewered deep-fried seitan in a breaded batter) as an excellent product, and thinks they may have been made by a woman out of her home as a small operation—but he is not at all sure. He tasted Tan Pups but he is not sure if he ever bought Tan Pups for The Company Store. He also remembers Tan Pops which his store brought from Johnny Weissman; he recalls that their quality gradually declined after he began to use gluten flour. Charlie liked Tan Pups better than Tan Pops.

People who were living in Boston during this period, who were involved with food, and who might know who created and made Tan Pups include, in order of importance:

(1) Andy Strauss, who made peanut butter cookies, and who was out delivering to all the stores. He is now studying kendo in Japan. Andy was a good friend of Sakee Israel. Try contacting him at: 4 Bentley St., Brighton, Massachusetts 02135. Phone: 617-254-7977. (2) Tyler Smith, who came back to Boston from Japan in 1973 or 1974. He worked for a while at Tao books, then took over Erewhon, was there for 12-18 months, then left. Ask Ty who ran the Erewhon retail stores on Newbury St. or in Cambridge during this time. (3) Richard Young keeps in touch with many people interested in macrobiotics and has their addresses and phone numbers in his notebooks. He now lives in his home town of Quincy, Massachusetts. Phone: 617-328-4197. (4) Hannah Bond lives in Cambridgeport, Vermont. Bruce Macdonald lives there too. (5) Matthew and Helen Sandler were in Boston from about 1969-1982. Helen was very discerning about quality and knew a lot about what foods people were making. (6) Tony Harnett who now owns Bread & Circus, but who started as a small store and purchased seitan from Johnny Weissman. (7) Ann Burns, Ken Burns’ widow, still lives at 16 Warren St, Brookline, MA 02146. Phone: 617-734-4115. (8) Victor Marin used to distribute foods in Boston. He now runs a little seaweed company (Ocean Harvest Sea Vegetables) on the coast of northern California (in Ukiah or Comptche), and harvests sea palm (Postelsia). (9) Chris Erickson, who worked at the Erewhon warehouse for many years with the roasting and nut butter line. He lived in Cambridge and is now in Kentfield, California. He arrived in Boston about 1970-71. His phone: 415-721-7249. Note: In Oct. 2004 Chris was murdered by his own son, with whom he was living in San Francisco. (10) Wendy Esko now lives on Lower Main St., Becket, MA. She is part of the macrobiotic community there. Her phone: 413-623-5645. (11) Nik Amartseff. (12) Ron Kotzsch. (13) Kazuko Awamura was a cook at the Erewhon warehouse. Address: Owner, Kendall Food Co., 46A Route 112, Worthington, Massachusetts 01098. Phone: 413-238-5928.

2518. Archer Daniels Midland Co. 1992. Third quarter report to shareholders. 8 p.

• **Summary:** One section titled “Mr. and Mrs. Dwayne Andreas host Mikhail Gorbachev family in Decatur” notes: “On Tuesday, May 5, Mr. and Mrs. Dwayne Andreas hosted a visit to Decatur, Illinois by former Soviet leader Mikhail Gorbachev, his wife Raisa, and daughter, Irina. Mr. Andreas and Mr. Gorbachev have been friends since they met about eight years ago in the Soviet Union. The Gorbachev’s had dinner, reminisced about old times and spent the night in the Andreas’ home.”

“The main purpose of Mr. Gorbachev’s ADM visit, which was arranged by Mr. Andreas for the following day, focused on the production of ADM’s brand of vegetable burgers. Already, more than 10,000 soybean-based vegetable burgers a day are being sold in Moscow. Mr. Gorbachev will

return home with hopes ADM will build a vegetable burger plant in Russia, much like the one he saw in Decatur.”

Five color photos show Gorbachev at ADM; one of these shows him and his wife, Illinois governor Jim Edgar, and Mrs. Nelson Rockefeller watching as frozen patties are being made in the vegetable burger plant. Address: Decatur, Illinois.

2519. **Product Name:** Tofu, and “Soya Sage” Soysage.

**Manufacturer’s Name:** Basically Beans “Real Food.”

**Manufacturer’s Address:** P.O. Box 170 Nimbin, NSW 2480, Australia. Phone: (066) 89 1565.

**Date of Introduction:** 1992 May.

**New Product–Documentation:** Form filled out by Simon Elenius. 1993. May 21. His company began production of these two products in May 1992. Present production is 600-900 lb/month of tofu and 250-300 lb/month of soysage.

2520. *SoyaFoods (ASA, Europe)*. 1992. Helfex ‘92. 3(2):4. Spring.

• **Summary:** “The International Health Food Exhibition, Helfex ‘92, was held at Wembley, London on 26 and 27 April. Over 160 companies concerned with health, diet, fitness and nutrition exhibited and several new soya products were launched.

“The Haldane Foods Group displayed their new range including a new Light Soya Milk, a new Soya Creem, a vegetarian cheese spread, burger and sausage mixes, and 6 new varieties of tinned products. JRJ Trading (The Redwood Company) had an interesting and tasty range of tempeh-based products including dips, spreads, patés and vegetarian rashers. Soya milks and desserts from Granovita, Haldane, Sojasun (Triballat), Vitasoy were also on display. Berrydales’ No Cream Ices, made from fresh organic tofu and soya milk, introduced their new 4-pack which will allow consumers to purchase four different ices in one pack. Plamil Foods launched a new non-dairy chocolate bar, *Martello* and Marigold Health Food, manufacturers of canned braised tofu and other delicacies, also had a stand.”

2521. *SoyaFoods (ASA, Europe)*. 1992. Soy protein burgers in Russia. 3(2):3. Spring.

• **Summary:** “The Archer Daniels Midland Co. (ADM) has been successfully marketing a soya protein concentrate patty in the Soviet Union for nearly two years and a similar product, the Harvest Burger is on test market in the US... It is estimated that one restaurant in Moscow now sells 4500 of these burgers a day.”

2522. Stoltz, Garth “Duff”. 1992. A taste of cereal. *Heritage Battle Creek*. Spring. p. 46-57. [5 footnotes]

• **Summary:** This excellent two-part article documents the history of 101 cereal manufacturing companies (makers of breakfast cereals), that started in Battle Creek, Michigan.

Part I is a history and part II is a table that lists the 101 companies alphabetically by company name. For each company is given the name, date of legal incorporation, products, and notes (such as succeeded by, dissolved, renamed, moved to, etc.).

The Battle Creek cereal boom was in its heyday during the years 1900-1905. Battle Creek became the home and center of America’s breakfast food industry primarily because of three men, all great persuaders: Dr. John Harvey Kellogg, surgeon, health evangelist, and food inventor; Charles W. Post, shrewd capitalist and hypnotic advertiser; and Will Keith Kellogg, Dr. John Harvey Kellogg’s younger brother. C.W. Post was the person most responsible for starting Battle Creek’s food “gold rush” shortly after the turn of the century, but it was Will Keith who eventually made the greatest impact on the cereal business. Some important pioneering cereal companies, listed in chronological order, are: The American Cereal Co. of Chicago, Illinois, founded in 1888, made Zest flaked cereal. As part of a conglomerate of seven cereal companies, it became Quaker Oats in 1906.

Battle Creek Health Food Co. was founded in 1895 with C.W. Post as treasurer and primary stockholder; it dissolved in 1903.

Postum Cereal Co., founded by C.W. Post, started manufacturing “Postum Cereal Food Drink” on 1 Jan. 1895, and was incorporated on 26 Oct. 1896. Other early products included “Grape Nuts Food.” The company was purchased by General Foods in 1929. General Foods was succeeded by Phillip Morris Co. in 1985, which merged with Kraft Foods to become Kraft General Foods in 1989–It is still manufacturing foods in Battle Creek.

Battle Creek Cereal Food Co., founded in 1897, made cereal coffee. It was succeeded by Cream of Cereal Co. in 1901.

The A.B. Barnum Cereal Co., founded in 1898, made Grain-O cereal coffee. It was succeeded by Grocer’s Specialty Mfg. Co. in 1902.

Battle Creek Sanitarium Health Food Co. was incorporated in 1898 (However health food products, including cereals, were manufactured in the Battle Creek Sanitarium Bakery from 1877. The foods were produced not only for the patients at the San but also for former patients who ordered the products through the mail.) The company, whose name was changed to Battle Creek Sanitarium Food Co. in 1901, made health foods, corn flakes, Granose, Granola, and Caramel Cereal Coffee. It was succeeded by the Kellogg Food Co. in 1908 (it made nut butters, cereals, and meat substitutes); the name was changed to Battle Creek Food Co. in 1921.

Sanitas Nut Food Co. was founded in 1899 by Dr. John Harvey Kellogg. It made “Sanitas” corn flakes, nut butter, and health foods. It merged with the Battle Creek Sanitarium Health Food Co. to become the Kellogg Food Co. in 1908. It began operating in July 1908 with Dr. J.H. Kellogg owning

all but 2 of its 15,000 shares of stock. Soon all the company's products were sold under the trade name "Kellogg's."

The Battle Creek Toasted Corn Flake Co. was founded in 1906 by Will Keith Kellogg, with much of the financing from C.D. Bolin, a St. Louis insurance executive; this was his first company run independently from his brother, Dr. J.H. Kellogg. It made Corn Flakes, after Will Keith convinced his brother to relinquish Sanitas' rights to the product. The company name was changed to the Toasted Corn Flake Co. in 1907, the Kellogg Toasted Corn Flake Co. in 1909, then the Kellogg Co. in 1922. The Kellogg Co. is today one of America's leading manufacturer's of breakfast cereals.

In this list of 101 cereal manufacturers we find two companies founded by Joseph and Almeda Lambert, who pioneered commercial production of peanut butter in America. No. 60 is the Lambert Nut Food Co. Date of legal incorporation: 1900. Products: Peanut butter crackers, nut products, and machinery for making nut products. Notes: Name changed to Lambert Good Food Co. in 1901. No. 59 is The Lambert Good Food Co., Date of legal incorporation: 1901. Products: Same as above. Notes: Moved factory to Marshall [Michigan] in 1902; dissolved in 1930. No. 60 is another Lambert Co. The name was changed to the Lambert Good Food Company in 1901.

An endnote (p. 57) concerning the legal date of incorporation states that "companies often existed before they actually filed legal papers. Conversely, companies filed legal papers of incorporation and then never progressed beyond that stage to manufacture a product."

Contains many photos of cereal boxes, plus J.H. Kellogg, C.W. Post, W.K. Kellogg, and the Sanitas Nut Food Co. in 1901. Illustrations (line drawings) show the Postum Cereal Company factory in 1903 and John T. McCutcheon's cartoon of 1903 from the Chicago Tribune. Founding dates are the dates of legal incorporation.

Page 5, "About the contributors," notes that the author "is the official historian and archivist of the Battle Creek Sanitarium and Seventh-day Adventist Church in Battle Creek. He is founder and president of the Adventist Historical Society and a member of the Board of Directors of the Historical Society of Battle Creek. He serves as Vice-President of the national Adventist Historic Properties and is responsible for three historic properties and the Sanitas SDA Museum Building in Battle Creek. As a result of his interest in the health food industry originated by the Seventh-day Adventists in Battle Creek, Stoltz has an extensive collection of cereal and health food company memorabilia."

Talk with "Duff" Stoltz. 1999. Jan. 23. The first 50 entries were compiled by Ross Coller, a Battle Creek historian, who gleaned them from articles of incorporation in old city newspapers. Duff compiled the remaining entries. Address: Battle Creek, Michigan.

2523. Worthington Foods, Inc. 1992. What's a tasty burger doing in a magazine like this? (Ad). *Vegetarian Times*. May. p. 3.

• **Summary:** See next page. A full-page, color ad, with a \$1.20 coupon. "Surprise? Don't be. It's Grillers from Morningstar Farms." In the top half of the page is a color photo (close-up) of a meatless burger with lettuce and sliced tomatoes, between buns. Color photos across the bottom also show the front panels of: Cholesterol Free Breakfast Patties. Cholesterol Free Breakfast Links. Cholesterol Free Breakfast Strips.

This ad also appeared in the Sept. 1992 issue (p. 5), and in the May 1993 issue (p. 29). Address: Worthington, Ohio 43085.

2524. Duville, Kris. 1992. Re: Answers to questions about soyfood products produced by Soyavynn. Letter to William Shurtleff at Soyfoods Center, June 2. 4 p. Typed, with signature on letterhead. [Eng]

• **Summary:** "I am very pleased with your interest in our products and the activities of Planta Soyavyn. It is very important for us to be in touch with other people working with soyfoods, to exchange ideas, knowledge and experience and also to stimulate and encourage each other. I find my job very challenging and satisfying, but it is not always easy to introduce new foods, even [no matter] how healthy, delicious and economic they might be, so some support from time to time is very welcome."

Most of the letter gives detailed answers to Shurtleff's questions about the company's commercial soy products. Address: Productos Alimenticios Soyavyn, Planta Soyavyn, 2a Calle Poniente No. 2-4, Lourdes, Colón, Depto. La Libertad, El Salvador. Phone: 51-0705 or 23-3554.

2525. Ponselee, Jos van de; Verfaillie, Magda. 1992. Re: History of Jonathan P.V.B.A. in Belgium. Letter (fax) to William Shurtleff at Soyfoods Center, June 6—in reply to inquiry. 2 p.

• **Summary:** Jonathan was the first company in Europe to make seitan for sale commercially. Jos van de Ponselee, the founder of Jonathan, first learned about seitan during a 9-month stay [with his wife and family] at the Kushi Institute in Boston, Massachusetts, from March to December 1976. There he tasted the seitan prepared by Aveline Kushi. He thought it would be a good meat substitute for the growing group of vegetarians in Europe. [Note: Jos was a butcher with a large meat processing operation before he became a macrobiotic vegetarian]. In Boston, he learned how to make seitan on a home scale from Tamara Uprichard. Then, at the very end of his stay in Boston, he started up medium-scale production of seitan with two Americans; he no longer remembers the name of the company or the names of his American partners. They sold seitan to macrobiotic study houses in Boston and to the Erewhon retail store.

Returning to Belgium, he founded Jonathan. The name “Jonathan” came from a famous book titled *Jonathan Livingston Seagull* [by Richard Bach, 1970. This is a parable about a seagull who loves to fly and practice flight, high and alone, for the joy of flying, while his fellow gulls are busy eating. He is eventually banished from the flock for daring to violate the earth-bound traditions of gull society. Eventually he is taken to a higher world where other gulls, like him, seek perfection and liberation from all limitations. Finally he returns to earth to tutor other outcast gulls in the art of advanced flight.]

Jos hired a man named Ludo Peeters as his first employee and they set up the business in a garage at Holleweg 53, 2180 Ekeren, near Antwerp, Belgium. The company’s first product, made entirely by hand, was plain fresh seitan. It was introduced some time in 1977. The product name on the label was simply Seitan, written in 4 languages (Dutch, French, German, and English). It was packaged in 250, 500, and 1000 gm carton dishes with a transparent plastic film lid. With seitan, the big challenge for Jos was to introduce an entirely new and valuable product to the market. Two months after introducing seitan, Jonathan started making tofu and soymilk. Ludo continued to work at Jonathan for many years, eventually becoming managing director.

On 2 Feb. 1979 Jonathan was officially registered as Jonathan P.V.B.A. (the latter abbreviation means something

like “Ltd.” i.e. a company in which the owner has limited responsibility). Also that year Jonathan introduced a fresh seitan burger, then in Jan. 1980 the company moved to its present location at Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. At the new location they introduced a number of new seitan products: Seitan Paté (Feb. 1980, sterilized), Seitan Goulash (late 1980, sterilized), and Seitan Schnitzel (1981, fresh). From 1985 on, Jonathan introduced a series of different ready-to-eat meals in which seitan was a major ingredient. Jos sold Jonathan and left on 1 April 1989. Magda started Mycelia P.V.B.A. in 1984 and kept the company small until Jos had sold Jonathan. After that they expanded Mycelia to its present size, producing 5,000 liters of mycelium daily. They are both shareholders in Mycelia. Address: Jean Bethunestraat 9, B-9040 Gent, Belgium. Phone: 91-28-7090.

2526. Chajuss, Daniel. 1992. Re: History of Hayes Ashdod Ltd., Israel. Letter to Drs. L.A. Johnson, D.J. Myers and Daniel J. Burden, Center for Crops Utilization Research, Iowa State University, Ames, Iowa, June 23. 1 p. Typed, with signature on letterhead.

• **Summary:** Daniel read with interest the article on titled “Soy protein’s history, prospects in food, feed,” by Johnson, Myers and Burden, published in *INFORM* 3(4):429 (1992). Since the article focused mainly on the production of soy protein concentrates, Chajuss would like to add some

information.

In 1963 Chajuss established and owned the first soy protein concentrate factory (Hayes Ashdod Ltd., Ashdod, Israel) which was using a counter current aqueous alcohol extraction system. A system of aqueous alcohol immersion extraction was already in use commercially by Central Soya Company (and is still used by Central Soya in the USA).

In 1966 Hayes Ashdod Ltd. introduced texturized soya protein concentrates under the brand names Hayprotex and Contex.

In 1968 Hayes started producing a special soy protein concentrate, free of trypsin inhibition and free of antigenicity, for use in calf milk replacers as a substitute of milk proteins.

In 1969 Hayes started to produce more functional and soluble soy protein concentrates, by further treatment of the aqueous alcohol extracted soy protein concentrate, for use as substitutes for soy protein isolates and for sodium caseinates in various food systems, especially in the meat processing industries.

In 1973 Chajuss sold know-how and complete engineering designs to Aarhus Oliefabrik A/S, Aarhus, Denmark, to make powdered and textured soy protein concentrates for human consumption, pet foods and calves milk replacers.

All the soy protein concentrate facilities worldwide, which were established since 1973 and which are still in operation today (including ADM {USA}, Bunge-SOGIP {France}, etc., with the exception of Central Soya's USA plants) employ Chajuss' technology and engineering designs, and are mainly based on the know-how and technology developed by Chajuss.

About 90% of the total world production of soy protein concentrates today is made by aqueous alcohol extraction. Most of the protein concentrates are used in the form of powder or grits, some are further texturized, and some are further treated to provide various "functionalities."

"A few years ago we sold Hayes Ashdod Ltd., which was renamed 'Solbar Hatzor Ltd.,' being a joint venture of the German Soya Mainz Company and Kibutz Hatzor of Israel."—Best Regards, Daniel Chajuss. Address: Managing Director, Hayes General Technology Company Ltd., Misgav Dov 19, Mobile Post Emek Sorek, 76867 Israel. Phone: (972) 8 592925.

**2527. Product Name:** Impulse Foods Organic Tempeh, Herb and Garlic Organic Tempeh, Organic Dried Tempeh, Smoky Slices (Bacon-like).

**Manufacturer's Name:** Impulse Foods.

**Manufacturer's Address:** Radnor Business Centre, Radnor Rd., Horfield, Bristol BS7 8QS, England. Phone: 0272 41690.

**Date of Introduction:** 1992 June.

**Wt/Vol., Packaging, Price:** 227 gm.

**How Stored:** Frozen.

**New Product—Documentation:** Ad in Health Food Business (England). 1992. July. p. 17. The first 2 products come in 8 oz cakes. The dried tempeh, launched in June 1992, comes in 4 oz packs. The smoky slices (organic) were launched at the same time in the same weight.

Label for Organic Tempeh sent by Anthony Marrese. 1994. May. 5 by 5 inches. Green on white. The company address is now: Islington, Workshops, Bristol BS3 1QB, England. "A delicious cultured soya bean product. Tempeh's distinctive flavor and texture make it ideal as the mainstay of a non-meat diet. After thawing, slices or cubes of tempeh can be deep or shallow fried, steamed or baked. Grey or black mould is the natural result of the culture forming its seeds and enhances the flavour of the Tempeh. The process can be likened to the blue veins in some cheeses." Sell by Aug. 1993.

Spot in Soyafoods (ASA, Europe). 1994. Spring, p. 5. "A tempeh based alternative to bacon." Smoky slices are a frozen tempeh product. A 114 gm pack retails for £1.30.

**2528. Product Name:** Lightlife Fat-Free Meatless Smart Dogs.

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** P.O. Box 870, Greenfield, MA 01302. Phone: 1-800-274-6001.

**Date of Introduction:** 1992 June.

**Ingredients:** Water, isolated soy protein, vital wheat gluten [powdered], brown rice syrup solids, salt, beet juice concentrate, koji rice extract, wheat starch (from whole wheat), natural flavors from vegetable sources, spice extracts, carrageenan, vegetable gum. All of our ingredients are 100% natural and contain no HVP, MSG, nitrates, or other additives.

**Wt/Vol., Packaging, Price:** 12 oz. vacuum pack. Retails for \$2.29 (7/92, Maryland).

**How Stored:** Refrigerated or frozen.

**Nutrition:** Per 1.5 oz.: Calories 40, protein 8.2 gm, carbohydrate 1.1 gm, fat 0 gm, cholesterol 0 mg, sodium 290 mg.

**New Product—Documentation:** Ad in Vegetarian Times. 1992. July. p. 40. "Think smart! Lightlife Fat-Free Meatless Smart Dogs. Fat-free grilling. Zero fat. Zero cholesterol. The world's first fat-free vegetarian hot dog is available now at natural food stores everywhere. Vegan. No animal ingredients." Illustration shows a hot dog sandwiched between 2 buns with a tape measure around the girth. Below the ad is a \$0.35 coupon.

This ad also appeared in the July 1993 issue, p. 79.

Talk with Lightlife. 1992. July 9. This product was introduced during the first week of June.

Label sent by Lightlife. 1992. July 6. 4.5 by 3.5 inches. Red, yellow, brown, and black on white. Illustration of a hot dog in a bun with a tape measure around the middle. Front

panel: “Zero fat. Zero cholesterol. Lightlife—Where good health tastes great. May be sold frozen 12 months after date.” Back panel: “Only 40 calories. Smart Dog is the world’s first fat-free hot dog, and the best-tasting meatless frank available at any price. Now you can enjoy authentic hot dog flavor without the fat or cholesterol. Vegan: No animal ingredients. Lightlife Foods is a member of the Business Partnership for Peace.”

Rebecca Conklin. 1995. Boston Globe. March 1. “Top dog in meatless market.” Within 3 months after Smart Dogs were launched in June 1992, they were outselling Tofu Pups, which had been the company’s first major success. A second boom had started.

2529. Lightlife Foods, Inc. 1992. Tired of the meat market? (Ad). *Vegetarian Times*. June. p. 26.

• **Summary:** A 1/3-page color ad. “Meet Lightlife Tempeh Burgers in a luscious lemon sauce. Vegetarian chili with real zip. Tofu pups that are plump and juicy. Sweet Italian sausage to top your pasta. All 100% natural. 100% vegetarian. All simply delicious. Deliciously simple to prepare. Lightlife. Where good health tastes great (TM).” A small photo shows the front of many Lightlife packages. Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001.

2530. Lustgarten, Steve. 1992. Seitan goes mainstream. *Vegetarian Times*. June. p. 21. [1 ref]

• **Summary:** “Despite its unappetizing moniker, the wheat-derived meat facsimile called seitan (pronounced SAY-tan) is riding tofu’s coattails out of vegetarian obscurity right into mainstream markets—universities, hospitals and perhaps your

local grocery store.”

John Belleme of Santa Fe Organics in Columbia, North Carolina is producing 5 richly flavored varieties of seitan. Demand is outstripping his capacity of 15,000 lb/week.

“In Salt Lake City [Utah], seitan processor Ivy Foods is negotiating with the food service at Brigham Young University—purveyors of 11 million meals annually—to supply the university with wheat gluten ‘chicken’ and ‘burgers.’ The company also recently signed an agreement to provide seitan products to a consortium of 2,000 West Coast hospitals, and its WheatMeat line is being sold in the meat department of Dan’s Foods, a Salt Lake City supermarket.

“The popularity of seitan and the wheat gluten from which it is made will be further bolstered later this year, when *Sourcebook on Wheat Gluten and Seitan* by William Shurtleff (Soyfoods Center Publishing) and *Cooking with Seitan* by [Barbara and] Leonard Jacobs (Avery Press) are published.”

A color photo shows “My hero: a seitan-stuffed submarine sandwich.”

2531. **Product Name:** Tofu [Regular, Firm, and Herb]. The Herb was renamed Garlic & Herb in July 1998.

**Manufacturer’s Name:** Small Planet Soyfoods.

**Manufacturer’s Address:** 5303 N. Myrtle St., Spokane, WA 99207.

**Date of Introduction:** 1992 June.

**How Stored:** Refrigerated.

**New Product—Documentation:** Talk with Phil Spiegel.

1992. June 4. This week he will open a tofu shop in Spokane inside a sprout shop. It will be temporary until he can build a shop in his garage on his property in Newport, Washington. He may have problems there with disposal of whey.

Talk with Phil Spiegel, owner. 1992. June 29. He started making these 3 varieties of tofu at a temporary location in early June 1992. Soon he will be moving his shop onto his property at 4452 Rocky Gorge Rd., Newport, WA 99156. Phone: 509-447-5146. The local health inspector is asking for details on his whey, its BOD [biological oxygen demand] and how he plans to dispose of it. He soon plans to introduce Soysage in two flavors: Mexican, and Italian Herb.

Form filled out and faxed by Phil Spiegel, owner. 1998. July 21. Small Planet Soyfoods, 330112 Hwy 2, Newport, WA 99156. Phone: 509-447-5146. Currently producing organic nigari tofu (15.5 oz), and four types of flavored organic tofu (garlic & herb, hot, curry, and vegetable). Started June 1992. Talk with Phil Spiegel. 1998. July 30. His company, Small Planet Foods, is a tofu company located on a 300-acre certified organic farm named Penrith Farms, which is run by his silent partner (Jim & Sherry Brewster).

The farm is also a foster farm for teenagers with serious problems; the Brewsters generally contract with the state of Washington, but sometimes private individuals also send their kids—if they can't deal with them. A good percentage of few of the kids leave in much better shape than when they arrived. Phil sold all of his tofu in bulk until July 1998, when he began packaging it. The idea for the flavored tofu—garlic & herb—was developed by Silverking in British Columbia, Canada; they shared the idea with Phil—who made some small modifications.

Labels for Firm Organic Tofu and Garlic & Herb Organic Tofu sent by Phil Spiegel. 2001. May 18. 3.75 by 5 inches. Self adhesive. “Non-GMO” logo. “Hand crafted in the Northwest by Penrith Farms, 330112 Hwy #2, Newport, WA 99156. Phone: (509) 447-5146. www.smallplanettofu.com.” A large illustration shows a river with trees and mountains.

2532. *SoyaCow Newsletter (Ottawa, Canada)*. 1992. Soya deli and fast food pilot project. 1(2):1. April/June.

• **Summary:** “Frank Daller is moving from the Toronto area to Ottawa to take the SoyaCow’s products to Ottawans. He plans to operate a SoyaCow from a busy market location to produce and sell freshly made tofu, soymilk, soy-yogurt, okara, and various value added products made from them. The business will also sell health fast foods including tofu-burgers, pita pocket sandwiches, frozen desserts, and soydrinks and shakes.

“The idea is to prove the concept in Ottawa with the intent of developing it into a franchise.”

2533. Hall, Trish. 1992. So contemporary: In search of a low-fat hot dog. *New York Times*. July 1. p. C1, C6. Living section.

• **Summary:** “Ninety-five percent of the households in this country eat hot dogs, and they indulge, on average, more than once a week, according to the National Hot Dog and Sausage Council in Westchester, Illinois... Americans consume so many hot dogs in the summer—more than five billion, according to the council—that the links, if put end to end, would circle the earth more than 15 times. The Fourth of July weekend and the Memorial Day weekend are the peak hot-dog eating times.” But hot dog sales fell 2% in 1991 from 1990, and the number of alternatives is rising.

“Some of the lower-fat dogs don’t have nitrites, a preservative that has been linked with cancer in laboratory animals, but most do...”

“Although much of the hot-dog flavor comes from spices and seasonings, the juicy chewy sensation is provided by fat. Steven Demos, president of White Wave Inc. in Boulder, Colorado, said that his company has been selling a tofu hot dog, Meatless Healthy Franks, for four years and that sales have increased by 35 percent to 40 percent each year. But the hot dogs are quite dry, a problem he

doesn’t deny. ‘We need to improve upon them,’ he said. His company will direct its efforts toward creating a better-tasting vegetarian hot dog rather than a lower-fat alternative.

“The tofu hot dogs have more fat than most people might think, as much as nine grams. Because that fat is unsaturated—it comes from the soybeans in the tofu—it is more healthful than fat from animal sources. But because it is unsaturated, it does not provide the juiciness that animal fat gives, Mr. Demos said.”

A table compares 3 brand of tofu hot dogs, each weighing 1.5 oz: (1) Meatless Healthy Franks, 120 calories, 8 gm of fat. “Unattractive exterior, dry and mealy inside.” (2) Not Dogs, 120 calories, 9 gm of fat. “Brown outside, dry inside, tastes like carrot.” (3) Tofu Pups, 92 calories, 5 gm of fat. “Blistered outside, rubbery casing, strong artificial smoke taste.”

2534. Weissman, John. 1992. Natural foods sandwich companies in and around Boston, Massachusetts (Interview). *SoyaScan Notes*. July 4. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The two main sandwich companies are Season’s Harvest (in Somerville, Massachusetts; owned by Ademar Reis, pronounced REES) and New World Natural Foods (in Brighton, Massachusetts; owned by Emily Merghart; Phone: 617-232-5973). Emily started the company herself under the name New World Enterprises in 1979, and has since run it herself. Her husband, Errol, was a dancer. The idea for the business came from a previous business that Paul Duchesne had started and left. Season’s Harvest products are distributed widely, down to New York and Connecticut, and possibly up into New Hampshire. New World sells only locally. Both use tofu and seitan in their sandwiches. New World uses seitan made by The Bridge in their sandwiches. They sell tofu burgers made by 21st Century, etc. Admar makes Bacon Bits out of TVP, a process he learned from John; then he waited 5 years and did it on his own. He also makes vegetarian burgers out of chickpeas and rice, etc. When stores such as Bread & Circus installed their own delis, it greatly hurt both of these sandwich companies. Address: VegPro Co., 133 Nottinghill Rd., Brighton, MA 02135.

2535. Peeters, Ludo. 1992. Early history of Jonathan P.V.B.A. in Belgium (Interview). *SoyaScan Notes*. July 9. Conducted by William Shurtleff of Soyfoods Center. Followed by a letter of July 29. [1 ref]

• **Summary:** Ludo started working with Jos van de Ponsseele at Jonathan on 28 Aug. 1978. He made seitan with Jos from the very first day; they were Jonathan’s only workers at the beginning and they worked in a garage at the company’s first location—Holleweg 89, 2070 Ekeren (near Antwerp), Belgium. Ludo thinks Jonathan’s first product was seitan,

followed by tofu and soymilk. Ludo thinks that the seitan was introduced before Nov. 1978. The original ingredients were water, wheat, soy sauce, soy flour or meal, salt, kombu, and ginger. The soy flour improved the flavor and nutritional value.

In 1978 Mr. Van de Pongseele moved to Holleweg 113, 2070 Ekeren. In January or February of 1980 he moved to the actual plant.

In his letter of 29 July 1992, Ludo encloses several early documents: (1) A letter written in Oct. 1977 (Jonathan was at Holleweg 89) showing that that company was selling Seitan (a vegetarian steak), Goulash (made with seitan), Tofu (*Sojakaas*), Mochi (made of sweet rice), sea vegetables, vegetable pickles, and peanut butter. (2) A price list for 1978-79 (the company is now at Holleweg 113). (3) An English-language translation of the text of a press conference held in about 1987 when the company started to make prepared meals based on seitan and tofu. Address: Goorbosstraat 20, B-2990 Wuustwezel, Belgium. Phone: +32 3-663-4532.

2536. Yamazaki, Kazuko. 1992. Early recollections of seitan (Interview). *SoyaScan Notes*. July 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Kazuko (the wife of Junsei Yamazaki) is sure that George Ohsawa coined the term “seitan” quite a while before he died in April 1966. She first became interested in macrobiotics in Japan in about 1962-63 (Showa 37-38). In about 1965 she may have seen seitan sold at macrobiotic food stores in Japan. Ohsawa Japan also sold seitan, probably by 1962-65; Marushima Shoyu K.K. may have made that seitan. She probably first heard the term “seitan” from Lima Ohsawa, who frequently taught how to make and use kofu (raw wheat gluten) and perhaps seitan in her cooking classes. The first seitan she saw or tasted was sold in little cubes or pieces that were very dark, hard, and salty. In Japan, Chinese people at one store in Aoyama, Minato-ku, Tokyo, made kofu (raw wheat gluten), and she once went there to buy some. She and Lima also tasted a delicious sausage-like product made from soybeans by the Chinese; she does not remember what it was called, but it was not called seitan. Lima Ohsawa often used that kofu in her cooking classes.

After George Ohsawa died, Lima Ohsawa traveled to Taiwan with a group of Japanese and there she met an interesting group of Taoist vegetarians. Some people in that group were very skilled at using wheat gluten in cookery. After returning to Japan, Lima invited that group of Taoist vegetarians to Tokyo. Kazuko met them in Tokyo. At that time they made a product closely resembling seitan. Later they started a business making it in Japan and began selling some to Ohsawa Japan.

One person in Japan who might well know the early history of seitan is Aiko TANAKA. She is now about 65 years year old but she began studying macrobiotics with Lima Ohsawa when she was about 18 years old. She went

to Taiwan and had a lot of contact with the group of Taoist vegetarians. Address: Route 1, Box 1333, Orland, California 95963. Phone: 916-865-5979.

2537. Shurtleff, Akiko Aoyagi; Sandler, Matthew; Okada, Yuko. 1992. Memories of the delectable gluten cutlets served at Tenmi, near Shibuya station in Tokyo, Japan (Interview). *SoyaScan Notes*. July 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Yuko Okada thinks that Tenmi first started in about 1968. By the early 1970s, a 10-minute walk from Shibuya station, it was a combination macrobiotic restaurant and food store. The restaurant was named *Tenmi* (Heaven + Flavor) and the store was named *Shizen Shokuhin Senta* (Natural Foods Center). Both were located at Sakuragaoka 4-3, Shibuya-ku 150, Tokyo. Phone: 03-496-7100. Both were still there in 1983.

The head of the restaurant (and a longtime friend of George Ohsawa), Mrs. Michi Ogawa, made one of the most delicious meatless entrees that we have ever tasted—called *Kôfu Katsu* (Gluten Cutlets). *Kofu* (raw wheat gluten) was simmered in a seasoned broth, then dipped in batter, dusted with Japanese-style bread crumbs (*panko*), and deep-fried. Crisp on the outside, succulent and juicy on the inside, it had a flavor and texture remarkably like that of a pork cutlet. It was served on a bed for thinly-sliced strands of cabbage and topped with one’s choice of a natural *tonkatsu* (pork cutlet) sauce (based on soy sauce), or a wedge of lemon.

Such a tasty cholesterol-free menu item could be a hit at almost any restaurant in the Western world—served with either of the above sauces, or with tartar sauce.

From an historical point of view, these Gluten Cutlets, made with seitan, were completely different from the typical Japanese macrobiotic seitan, which was a dark brown salty seasoning or hors d’oeuvre to eat while a person was drinking, as a yang balance for the yin of the alcohol. Address: 1. Soyfoods Center, Lafayette, California 94549; 2. P.O. Box 10277, Aspen, Colorado 81612; 3. Muso Co., Ltd., Kosei Bldg., 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. Phone: 1. 510-283-2991.

2538. *Toyo Shinpo* (*Soyfoods News*). 1992. Tôfu, aburaagé, nattô, konnyaku noki nami ni fushin: Jisshitsu de zennen dôgetsu hi 0.5% no gensho [Consumption of tofu, aburaage, natto and konnyaku in Japan from 1976 to 1991: Decreased 0.5% from the same month last year]. July 21. p. 2. [Jap]

• **Summary:** Per household consumption of various soyfoods; yen figures are not adjusted for inflation. Tofu consumption rose from 85.73 cakes costing 5,020 yen in 1976, to 86.89 costing 6,047 yen in 1980, to a peak of 90.43 costing 6,761 yen in 1983, dropping to 88.48 costing 7,337 yen in 1985, down to 83.42 costing 7,323 in 1990, down to 78.76 costing 7,699 yen in 1991.

Consumption of aburaagé and ganmo (deep-fried tofu

pouches and burgers) rose from 2,950 yen in 1976, to 3,472 in 1980, to a local peak of 4,080 in 1984, dropping to 4,057 in 1985, down to 3,898 in 1990, then rising to a recent peak of 4,253 in 1991.

Natto consumption rose from 1,034 yen in 1976, to 1,289 in 1980, to 1,655 in 1985, to 2,532 in 1990, to an all-time peak of 2,532 yen in 1991.

**2539. Product Name:** Fried Tofu, Dofu-Gan (Savory Baked Tofu, 2 types), Tofu Chicken, Fresh Soymilk (Plain Unsweetened Traditional Style).

**Manufacturer's Name:** Tofu International Ltd.

**Manufacturer's Address:** 738 Airport Blvd., Suite 6, Ann Arbor, MI 48108. Phone: 313-665-2222.

**Date of Introduction:** 1992 July.

**New Product–Documentation:** Talk with Tim Redmond of American Soy Products. 1992. May. Bruce Rose has a joint venture with a large Chinese tofu company to make tofu in Michigan.

Talk with Bruce Rose, of Tofu International Ltd. 1992. Sept. 25. All of these products were introduced in July 1992 by Tofu International Ltd., which was formerly named Rosewood Products Inc. Dofu-Gan is extra firm tofu, pressed under hydraulic presses, not water packed. Note: The Soy Plant, the ancestor of Tofu International Ltd. introduced Dofu-Gan in March 1978.

Tofu Chicken is made by cutting a cake of Dofu-Gan into a net or accordion like french fries linked together side by side. After cutting, the net is fried then simmered in a broth. It tastes great in a meatless chicken sandwich and is now sold in some local grocery stores.

2540. Martin, Claire. 1992. Regardless of poll, bland food's sales rise. *Denver Post (Colorado)*. Aug. 6.

• **Summary:** About Steve Demos and White Wave Soyfoods Inc. Photos show: (1) Worker David Kremin labeling and stacking tofu on a conveyor belt. (2) A carousel curding machine inside White Wave's tofu plant in Boulder, Colorado. Sales of White Wave tofu grew only slowly from 1977 (when Demos started the company) until 1985. But in 1985, when Demos decided to market "second-generation soy products—cooked tempeh burgers, soy hot dogs, soy yogurt... Customers literally ate it up. Sales doubled that year, and kept growing. White Wave's growth rate last year was 30 percent. (Its stock is privately held.) This year, Demos expects sales to meet or exceed \$5 million, and to produce 7 million pounds of tofu and soy products in all 50 states. The No. 1 seller? Raw tofu—despite the yuck factor. Part of the answer may be that shoppers in the United States are shifting their focus from price and convenience to health and nutrition."

Demos is now "contemplating a product [a hot dog?] that combines tofu and meat. 'The meat industry thinks that's sacrilegious. The tofu industry thinks that's sacrilegious.

I don't think its sacrilegious. It's one way to get someone to make the transition from meat to soy.' Another way is creative advertising. Inspired by the presidential campaign, White Wave marketing director Paul Chasnoff came up with a six-word publicity campaign, perfect for bumper stickers: 'I eat tofu and I vote.'" Note: These bumper stickers can be ordered from White Wave for \$2 each. Address: Denver Post Staff Writer.

**2541. Product Name:** Pita Melts (Whole Grain Pita Bread with a Filling) [Vegetable Cheesesteak {Made with Seitan}, Chili Dog {Tofu Hot Dog with Mushrooms & Onions}].

**Manufacturer's Name:** Health Is Wealth, Inc.

**Manufacturer's Address:** Sykes Lane, Williamstown, NJ 08094. Phone: 609-728-1998.

**Date of Introduction:** 1992 August.

**How Stored:** Frozen.

**New Product–Documentation:** Spot, with color photo of label, in *Vegetarian Times*. 1992. Aug. p. 83. The product comes with either of 3 fillings. "Just pop the low-fat frozen meals in the mic or cook conventionally."

**2542. Product Name:** Tofu Tempeh Burger, Tofu Vegies Burger.

**Manufacturer's Name:** Nutrisoy Pty. Ltd.

**Manufacturer's Address:** 255 Forest Road, Arncliffe 2205, NSW, Australia.

**Date of Introduction:** 1992 August.

**Ingredients:** Organic soybean (non genetically modified), water, soy sauce, sunflower oil, spices, natural nigari (magnesium chloride), culture (*Rhizopus oligosporus*).

**Wt/Vol., Packaging, Price:** 200 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label and letter (e-mail) from Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling these two products in Aug. 1992. Note: He invented this interesting Tofu Tempeh Burger.

**2543. Product Name:** Seitan Sloppy Joe (American, with Garlic), Seitan Sloppy José (Southwest, with Hot Chilies), Seitan Sloppy Giuseppe (Italian, with Fennel).

**Manufacturer's Name:** Santa Fe Organics.

**Manufacturer's Address:** 906 Locust St., Columbus, NC 28722. Phone: (704) 894-3132.

**Date of Introduction:** 1992 August.

**New Product–Documentation:** Talk with John Belleme. 1992. July 1. The labels and recipes for these products are finished. They should be on the market by August. They are based on a basic Sloppy Joe recipe that is 35-40% seitan and includes tomato-based products. To this they add several ethnic flavorings. The product is ready to heat and serve on rice, noodles, bread, a bun, etc. The latter flavoring is Italian; John is Italian on all sides going back as far as he knows. Southern Italians make a dish named Risotto, which

is ground Italian sausage with gravy and fennel over white rice. The product will be sold in a 16 oz jar but will not be retorted like the company's first and current line of products.

**2544. Product Name:** Meatless Tofu Steaks.

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

**Date of Introduction:** 1992 August.

**Ingredients:** Ingredients: Tofu (water, organically grown soybeans, nigari (magnesium chloride)), soy sauce (water, soybeans, wheat, salt), granulated garlic, granulated onion, and spices. Soybeans grown and processed in accordance with the California Organic Foods Act of 1990.

**Wt/Vol., Packaging, Price:** 6 oz (170 gm) vacuum pack.

**How Stored:** Refrigerated.

**Nutrition:** Per 3 oz.: Calories 170, protein 20 gm, carbohydrates 4 gm, fat 9 gm (saturated fat 1 gm, polyunsaturated fat 8 gm), cholesterol 0 mg, sodium 350 mg. Percentage U.S. Recommended Daily Allowance (U.S. RDA): Protein 30%, vitamin A 35%, calcium 25%, iron 25%.

**New Product–Documentation:** Vegetarian Times. 1992. Aug. p. 83. ‘Meats’ to meet. White Wave makes marinated Meatless Tofu Steaks. Label sent by Lon Stromnes of White

Wave. 1993. Feb. 26. 4 by 4.75 inches. Self adhesive. Full color: Black, red, pink, and white. Photo shows a tofu steak between buns on a plate with trimmings of onions, green peppers, cheese, and lettuce. “Contains no meat.” Leaflet (black and white, single sided, 28 cm) sent by White Wave. 1993. Feb. “Make mine meatless.” Made with organic tofu.

**2545. Dispatch (Columbus, Ohio).** 1992. Worthington Foods sued over Veggie Burger name. Sept. 1. p. 2E. Business section.

• **Summary:** “An Oregon company that makes hamburgers out of vegetables has filed a \$500,000 trademark infringement lawsuit in federal court against Worthington-based Worthington Foods Inc. Wholesome and Hearty Foods Inc. of Portland, Oregon, calls its product a Gardenburger and claims Worthington Foods has infringed on the trademark with a product called Garden Pattie, which was introduced in February” [1992].

Paul Wenner, age 45, owner of the Portland company, is a vegetarian who in 1984 “ran the Garden House restaurant in Gresham, Oregon, when his line of veggie burgers was born. He said he began making Gardenburgers commercially in March 1985 with a production run of 800 patties.”

**2546. Wu, Olivia.** 1992. If it's not junk, can it taste good? A panel of kids judges the ‘Best of Processed Foods.’ *Herald-Arlington Heights (Chicago, Illinois–Rolling Meadows Ed.)*. Sept. 10. Food section. p. 1-2.

• **Summary:** Center for Science in the Public Interest (CSPI) has recently released a list titled “Best of the Processed Foods.” All foods should contain no more than 30% of calories from fat, 10% of calories from saturated fat, etc. CSPI is a non-profit, consumer-advocacy group based in Washington, DC, best known for its efforts to reduce junk food advertising on Saturday morning TV. Soyfoods that were tasted included (1) Pizza: 1. Rice-Crust Soy Cheese. 2. Soypreme French Bread Garden Patch or WholeWheat Cheese Style. 3. Special Delivery Soya Kaas. 4. Tree Tavern Pizsoy. Tofu wieners: The kids did not like most of the tofu wieners.

Of all the many products tested, 3 of the top 5 ratings went to foods containing soy: 1. Rice-Crust Soy Cheese. 2. Special Delivery Soya Kaas. 5. Health Valley Beans & Wieners.

**2547. Rose, Bruce.** 1992. The Soy Plant was renamed Tofu International Ltd. in Feb. 1992.

Joint venture with Zhenjiang Bean Factory, a Chinese tofu company near Shanghai (Interview). *SoyaScan Notes*. Sept. 25. Conducted by William Shurtleff of Soyfoods Center.

After the birth of our daughter Amy in 1987 we found there was little time to prepare the wholesome nutritious food we normally ate. Realizing there were others like ourselves, we set up Amy's Kitchen to produce delicious, nourishing, frozen meals for health conscious people too busy to cook. We use only the finest natural and organic ingredients and prepare them with the same careful attention in our kitchen as you would in your own home. No meat, fish, poultry or eggs are ever used in any Amy's products.

• **Summary:** In Nov. 1990 (after 2½ years of negotiations) Bruce Rose (not his company, Rosewood Products Inc.) signed a joint venture agreement with a big Chinese tofu manufacturer named Zhenjiang Bean Factory, located in Zhenjiang, China, about 130 miles west-northwest of Shanghai. The purpose of the company produced by the joint venture was to manufacture fresh (unpasteurized), traditional Chinese-style tofu and tofu products in Ann Arbor, Michigan, to be sold locally. Operating out of the plant at 738 Airport Blvd. in Ann Arbor, formerly owned by The Soy Plant, they started producing small amounts of tofu in February 1992 and at that time they renamed the company Tofu International Ltd. (TIL; It was formerly Rosewood Products Inc.). They formally started tofu production in July 1992. New products, all introduced in July 1992, include fried tofu, dofu-gan (2 types, very firm, not water packed), tofu chicken, and fresh soy milk.

The new company is operating out of the same factory as that formally occupied by The Soy Plant and Rosewood Products Inc., but with different equipment; and the tofu is made in a different way. In 1987 Rosewood Products Inc., a natural foods distributor (founded in 1980 by Bruce Rose, the president) purchased the Soy Plant's assets in bankruptcy court and invested a lot of money in new equipment. Rosewood had been distributing the Soy Plant's tofu for 6 years. For the next 5 years Rosewood was also a tofu manufacturer, making typically 5,000 lb/week (sometimes as much as 6,000 lb/week) of tofu, then production began to decrease as the competition grew more intense and as Bruce found he had too much to do trying to run both a distributing and a tofu manufacturing company. So he began to look

for outside help in managing the tofu production operation. Rosewood Products Inc. still exists as the distributor of the tofu manufactured by TIL.

The Chinese are providing a team of skilled tofu production and management and production experts, equipment, and technology for making unique traditional Chinese tofu products. Presently, everyone in the plant is Chinese—they speak little or no English. Bruce does not want to compete with the “Big Boys” that sell aseptic or pasteurized tofu (Morinaga, etc.). Tofu production (especially in second generation products) has increased since the joint venture started and is now at about 3,000 lb/week—but most of this tofu is made into second generation products. Bruce has been to Zhenjiang once and visited their big factory which makes several hundred thousand kg/month of tofu.

In the near future, they plan to start making pressed tofu sheets, and Buddha's Chicken or Duck, which no other company in America is presently making. Address: Founder and President, Rosewood Products, Inc., 738 Airport Blvd., Suite 6, Ann Arbor, Michigan 48108. Phone: 734-665-2222.

**2548. Product Name:** Amy's Vegetable Lasagna (With Tofu & Soy Cheese).

**Manufacturer's Name:** Amy's Kitchen Inc.

**Manufacturer's Address:** P.O. Box 449, Petaluma, CA 94953. Phone: 707-762-6194.

**Date of Introduction:** 1992 September.

**Ingredients:** \*Organic cooked lasagna pasta (\*organic whole wheat durum flour, \*organic wheat flour, water), \*organic tomato puree, \*organic zucchini, \*organic tofu,

\*organic spinach, filtered water, Mozzarella style soy cheese (fresh soy milk made from organic soy beans and filtered water, soy oil, caseinate, fresh tofu, salt, soy lecithin, natural flavor, natural vegetable gums), onions, \*organic carrots, olive oil, sea salt, garlic, spices. \* = Organically grown/processed in accordance with the California Organic Foods Act of 1990.

**Wt/Vol., Packaging, Price:** 9.5 oz (269 gm) in paperboard box. Retail for \$3.85.

**How Stored:** Frozen.

**New Product–Documentation:** Spot in Health Foods Business. 1992. Sept. p. 88. “Italian Meal.” A black-and-white photo shows the front of the package, which says: “No cholesterol. Lactose free. With tofu & soy cheese. Organic vegetables and pasta.”

Ad in Vegetarian Times. 1993. Jan. p. 20. “Something for everyone at Amy’s.” New ethnic favorites include “Tofu Vegetable Lasagna: Made with organic vegetables and tofu in a flavorful organic tomato sauce layered between organic pasta.”

Product with Label purchased at Berkeley Natural Grocery Co. 1994. June 23. 6.5 by 5 by 1.5 inch paperboard box. Red, green, blue, yellow, and white. A color photo shows the lasagna on a white dish with a sprig of basil at one side. “No cholesterol. Lactose free. Organic vegetables, pasta & tofu. Microwave or regular oven.”

2010 March 26. Same product purchased at Diablo Foods in Lafayette, California. 9.5 oz. Retail for \$5.89. Round logo (white on green) in lower right of front panel. “No GMOs. No bioengineered ingredients.” “Contains milk protein” (in the Mozzarella style soy cheese, in the form of casein—a milk-derived protein).

2549. Archer Daniels Midland Co. 1992. Annual report. P.O. Box 1470, Decatur, IL 62525. 41 p. Sept.

• **Summary:** Net sales and other operating income for 1992 (year ended June 30) were \$9,232 million, up 9.0% from 1991. Net earnings for 1992 were \$503.8 million, up 7.9% from 1991. Shareholders’ equity (net worth) is \$4,492 million, up 14.5% from 1991. Net earnings per common share: \$1.54. Number of shareholders: 32,377.

“The last two fiscal year have been years of rapid growth and a broadening of the Company’s profit base. During this period investment in plant and equipment amounted to \$1.5 billion, consisting of \$1 billion of capital expenditures for new plants and equipment, using mostly new technology, and acquisitions of \$500 million...”

“ADM takes seriously its commitment as the ‘supermarket to the world.’ With millions of starving people in Asia and Africa, the Company has the technology, through soy milk, Harvest Burger and wheat gluten, to provide an individual with a proper level of healthy protein for as little as 12.5¢ per day.”

A 2-page foldout between pages 4 and 5 shows ADM’s

international corporate structure. In Europe, under ADM International Holdings, are British Arkady Company UK, Haldane Granose Food Group UK, and Arkady Feeds Ireland. Under British Arkady Company UK are S.I.O. France, InaNahrmittel Germany, and Happidog Petfoods UK. Under Haldane Granose Food Group UK are Genice UK, Vegetarian Feasts & Cuisine UK, Snackmasters UK, Direct Foods UK, and Saucemasters UK.

British Arkady Company—England: Manufactures, markets and distributes full fat soya flours, TVP, bakery ingredients, frozen dough products. S.I.O.—France: Manufactures and markets specialty oils and fats for food and pharmaceutical use. Soya flour millers.

Haldane Granose Food Group—England: Factories at Barrow and Newport Pagnell, manufacture and marketing health foods, dry mixers, TVP mixers, burger mixes, dry mix and frozen vegeburgers, canned vegetarian products, spreads, soya milk. Genice Ltd.—Wales: Manufactures non-dairy ice cream, soya yogurt, yogice soya cream and specialty margarines. Direct Foods Ltd.—England: Protoveg range of TVP mixers, including Sosmix and Burgamix, marketed and distributed by Haldane/Granose. Snackmasters Ltd.—Wales: Manufactures and markets a range of snackmeals. Saucemasters Ltd.—Wales: Manufactures and markets sauces, dips, spreads and relishes packed in glass jars or sachets. Vegetarian Feasts & Vegetarian Cuisine—England: Manufactures and markets frozen vegetarian meals, retailed through food shops and supermarkets.

“Haldane Foods Group is now well established as the leading supplier to the U.K. health food industry. Nineteen products were added to an already extensive sales list. Snackmasters, Ltd. experienced rapid growth in snackmeals and increased efficiency by installing fully automatic process equipment. Two products that capitalized on the growing trend toward good health were the low-fat Granose ‘Light’ soya milk and the high-polyunsaturate cholesterol-free Granose Soya Cream.

“Vegeburgers remain a market leader and three new relishes were introduced under that brand name. Granose Foods is rapidly building market share with both vegetable and TVP-based vegetarian sausages. Genice Ltd. continued to innovate with the introduction of low-fat yogice.”

Address: Decatur, Illinois.

2550. **Product Name:** Ken & Robert’s Veggie Burger (With Soybeans and Soy Cheese).

**Manufacturer’s Name:** Imagine Foods, Inc. (Marketer/Distributor).

**Manufacturer’s Address:** 299 California Ave. #305, Palo Alto, CA 94306. Phone: 415-327-1444.

**Date of Introduction:** 1992 September.

**Ingredients:** Filtered water, organic soybeans, mushrooms, brown rice, bulghur wheat, soy cheese (filtered water, organic soybeans, calcium caseinate [nonfat milk protein

derivative], canola oil, sea salt, citric acid, natural flavors, carrageenan), onions, rolled oats, sea salt, corn starch, rice starch, yam root starch, herbs, spices.

**Wt/Vol., Packaging, Price:** 10 oz (284 gm) paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per 71 gm patty: Calories 130, calories from fat 10, total fat 1 gm (2% daily value; saturated fat 0 gm), cholesterol 0 mg, sodium 260 mg (11%), potassium 330 mg (9%), total carbohydrate 26 gm (dietary fiber 3 gm [12%], sugars 1 gm), protein 5 gm. Vitamin A 0%, calcium 10%, thiamin 6%, niacin 8%, vitamin C 2%, iron 6%, riboflavin 4%. Percent daily values are based on a 2,000 calorie diet.

**New Product–Documentation:** See next 2 pages. Ad (8 by 11 inches, color) in *Natural Foods Merchandiser*. 1992. Sept. p. 4. “Freedom of Assembly.” A color photo shows an expanded blowup of the burger with all its trimmings between buns. “Freedom from cholesterol, freedom from saturated fat. And freedom from a boring diet... This healthful assemblage of whole grains, vegetables, soy cheese and seasonings is a truly amazing low-fat meal.”

Product with Label purchased at Diablo Natural Foods in Lafayette, California. 1995. Package is copyrighted 1993. Box is 7 by 6 by 1.37 inches high. Red, green, and yellow on white. Front panel is filled with a huge photo of a burger with buns and all the trimmings. “Truly Amazing. Cholesterol free and low in fat. A delicious meatless burger.” Back panel: “A delicious cholesterol free, low fat burger made without meat or eggs.”

2551. *SoyaCow Newsletter (Ottawa, Canada)*. 1992. Major health food store to open SoyaCow department. 1(3):1. July/Sept.

• **Summary:** “Rainbow Foods, the largest health food store in the Ottawa area, is committed to the SoyaCow retail concept. After fifteen years in business, they will move to larger premises in January, reopening with a department devoted to SoyaCow and its related fresh soyfoods.

“The ability to make fresh soymilk and other soyfoods on location will appeal to their existing clients and will also attract new ones. Besides the take-home foods, a small line of take-out products will be featured, including shakes, yogurts, soyburgers, and fresh juice. As the first store anywhere to do this, Rainbow will help promote this as a pilot location in a franchising concept. Other retailers will be invited for demonstrations.

“Rainbow owner Mike Kaplan became a SoyaCow believer after his first taste of its soya milk. He deemed it superior to all other products he sells in Tetra Paks [Tetra Pak cartons]. He also appreciated the freshness and the environmental benefits.”

A photo shows a “New SoyaCow Model SC20A.”

2552. Worthington Foods, Inc. 1992. Natural Touch:

Where great taste comes naturally (Ad). *Natural Foods Merchandiser*. Sept. p. 61.

• **Summary:** A full-page, color ad. “Natural Touch products are regularly promoted with 40¢ coupons in full-page, 4-color ads appearing in *Vegetarian Times*, *New Age Journal*, *Body, Mind and Spirit*, *Delicious*, and *The Utne Reader* (Over 80% of the readers of these magazines shop in natural food stores regularly).”

A large photo shows a meatless patty on a bed of lettuce on a plate. Other small photos show the front of four Natural Touch packages. Address: Worthington, Ohio 43085.

2553. Amatos, Christopher A. 1992. Worthington Foods sees healthy future. *Dispatch (Columbus, Ohio)*. Oct. 3. p. 1D. Business section.

• **Summary:** After Miles Laboratories purchased Worthington Foods (a manufacturer of meat and egg substitutes) in 1970, they installed high-speed, high-volume equipment, but they were never able to achieve the economies of scale needed to make money. According to Dale E. Twomley, Worthington Foods’ president and CEO, “They never saw black ink the whole time they owned us—12 years—and we saw a profit the first year” after the current management team bought back the company from Miles in 1982. The new setup gives Worthington much greater versatility and the flexibility to make 150 different products in one plant.

“Worthington, which earlier this year conducted its first public stock offering, is about to complete a new facility in Zanesville, Ohio, that will allow it to dramatically increase production of a new egg substitute, as well as make better use of its facility at 900 Proprietors Rd.”

“One line that will be affected by the Zanesville facility is Better ‘n Eggs, an egg substitute that Worthington is rolling out nationwide to compete with the market leader, Egg Beaters. Capacity restraints limit Better ‘n Eggs production to 5 gallons a minute at the Proprietors Road facility, Twomley said, noting that production at Zanesville will be 25 gallons a minute.

“The new facility is expected to be operating during the first quarter of 1993. Better ‘n Eggs, made up of 98 percent egg whites, complements the company’s Scramblers egg substitute, which is 80 percent egg whites. Better ‘n Eggs has zero percent fat, while Scramblers contains 3 percent.

“Worthington isn’t saying much about other plans for the new plant, but more news is expected later this month. Twomley said it will play a role in the company’s annual growth plan of 15 percent in revenues and 20 percent in net income... In 1991, Worthington’s revenues were \$70.2 million and net income was \$2.8 million, or 77 cents a share. The company’s stock, after hitting the market at \$12 a share, has been trading in the \$10 range recently. Yesterday it closed at \$10.25, up 25 cents.”

# Freedom of Assembly.

Freedom from cholesterol, freedom from saturated fat. And freedom from a boring diet. Ken & Robert's Veggie Burger offers a delicious new way to express yourself. Start with a sizzling hot meatless burger that rivals the all-American favorite. Then make your own statement in good taste.

This healthful assemblage of whole grains, vegetables, soy cheese and seasonings is a truly amazing low fat meal. You'll find Ken & Robert's Veggie Burger and Veggie Pockets in the freezer of your favorite natural foods store.

What you eat can make a difference. So speak out, organize a rally, or at least have a barbecue.

**A DELICIOUS CHOLESTEROL FREE, LOW FAT BURGER MADE WITHOUT MEAT OR EGGS**

Invite Ken & Robert to your next backyard barbecue and savor the healthful combination of low fat flavors in one great big, delicious burger. Made without meat or eggs, Ken & Robert's Veggie Burger is a truly amazing combination of whole grains, vegetables, soy cheese and seasonings. They sizzle on the grill or cook to perfection in the toaster oven or microwave.

Serve Veggie Burgers as a salsbury steak with your favorite mushroom gravy, use as a taco filling or create your own recipes.

**Directions:**

**Veggie Burgers should always be stored frozen until preparation.**

**After cooking, it is best to let Veggie Burgers set for 1-2 minutes before serving.**

Veggie Burgers may be prepared on the stove, the barbecue, in a toaster or conventional oven, or in the microwave.

**On the stove top,** add vegetable oil to a skillet and place over medium-high heat. Cook patties 4-6 minutes, turning at least once after several minutes.

**In toaster oven or conventional oven,** preheat oven to 425°F. Place frozen patties on a baking pan and cook on center oven rack for 4-6 minutes. Turn patties and heat an additional 4-6 minutes until done.

**In the toaster,** toast patties 4-5 minutes until thoroughly heated.

**To barbecue,** grill both sides thoroughly over medium-high heat for a total of 10-12 minutes, brushing with sauce before finished.

**For microwave cooking,** heat a single layer of patties on a microwave-safe dish (do not use a paper plate as burger may stick), using the following guidelines:

- 1 Patty: Heat 45-50 seconds, turn over and repeat cooking time.
- For each additional patty, add 20-30 seconds cooking time.
- Let patty set for 2 minutes before serving.

After opening, store Veggie Burgers in a well sealed plastic bag in the freezer.

**INGREDIENTS:** Filtered Water, Organic Soybeans, Mushrooms, Brown Rice, Bulghar Wheat, Soy Cheese (Filtered Water, Organic Soybeans, Calcium Caseinate (Nonfat Milk Protein Derivative), Canola Oil, Sea Salt, Citric Acid, Natural Flavors, Carrageenan), Onions, Rolled Oats, Sea Salt, Corn Starch, Rice Starch, Yam Root Starch, Herbs, Spices.

**Meets the recommendations of the American Heart Association.**

**New Product–Documentation:** Label sent by Anthony Marrese. 1994. May. The manufacturer's name and address do not appear on the product, which is imported to England by "GranoVita UK Ltd., 34/36 Bromham Road, Bedford MK40 2QD, England. Produce of Germany." Label. 2 by

5½ inches. Red, black, green, and yellow on white. An illustration shows vegetables under a tree on a grassy hillside with the moon rising. "Suitable for vegetarians. Important– Please remove skin before cooking." Best used by 10 Oct. 1992.

Note: This product may well have been made by DE-VAU-GE in Germany.

2555. Mullich, J. 1992. No beef over this meatless burger: Fast-food diners make the switch to veggie patties. *Food Business* 5(21):20. Nov. 2.

• **Summary:** Since it was launched in 1985, the Gardenburger has enjoyed a steady rise in popularity at West Coast restaurants and fast-food chains. A meatless, non-soy burger, it is made by Wholesome & Hearty of Oregon from mushrooms, onions, brown rice, rolled oats, low-fat Mozzarella cheese, dry curd cottage cheese, egg, cheddar cheese, etc.

2556. Paolucci, Danny. 1992. Work with Swan Foods Corp. in Miami, Florida. The sad story of Robert Brooks and Mary Pung, founders of Swan Foods (Interview). *SoyaScan Notes*. Nov. 5. Conducted by William Shurtleff of Soyfoods Center. • **Summary:** Danny grew up in Miami. He became a vegetarian in 1970 at age 18, and soon began to buy 10-pound bags of soybeans, which he pressure cooked. "They made me feel great." He went to practice Rinzaï Zen with Sasaki roshi in Los Angeles at Cimarron Zen Center, the city center for lay practitioners at 2505 South Cimarron St., Los Angeles, California 90018. It is the mother temple for all Sasaki roshi's centers nationwide (Mt. Baldy monastery; Ithaca, New York; Jemez hot springs, New Mexico, etc.). There he was the head cook (*tenzo*) for 18 months during 1972-74. He cooked for an average of 10 people/day and he served many recipes (such as soyburgers) based on cooked whole soybeans. He also made his first batch of tofu (curded with lemon juice) while *tenzo*; he learned from a recipe in *The Soybean Cookbook* (a blue book) by Dorothea Van Gundy Jones. When he served the tofu to Sasaki roshi, the roshi said "Not so good; it's sour." One person at Cimarron who wanted to start a tofu company as a Zen Center business was Gentei (Sandy Stewart); but he couldn't do it because the Japanese had a tight grip on the market.

After leaving Mt. Baldy, Danny returned to his home town of Miami. He worked for a while in the produce section of one of the chain grocery stores; he needed money. The idea of starting a tofu company stayed in his mind. In late 1977, when he heard that Robert Brooks and Mary Pung had been running Swan Foods for about 1 year in Miami, he went over and said he would like to work for them. He soon became their production manager—despite his complete lack of experience. Robert would pay the employees using fistfuls and huge rolls of cash. Later Danny found out that Robert was dealing drugs. The business was not making money

because no one was marketing the products, and there were far too many products. Also many of the products (including refreshing teas) spoiled very quickly due to a junky old refrigeration system that was not strong enough; even after it was replaced, the new system could not prevent widespread spoilage. Basically, they lost money every day on almost every product they made. Nobody in the company knew what they were doing; no one was “steering the ship.” Mary was working on a cookbook, that was never published. Mary and Robert were both doing a lot of new product R&D, and playing with a clam-jaw-type vacuum packager. One worker, Jimmy Wilks, was an original partner. He invested \$50,000 of his inheritance in the business and it was quickly all gone; his family never forgave him. Actually he left before Swan Foods went bankrupt because of an accident in the plant. One day, while he was working near the pressure cooker, the top blew off and he was covered with scalding-hot soy slurry. His coworkers dumped him into the cooling tank, where the water cooled him off. His burns were not that bad; he left the company more out of shock than for medical reasons. He later worked at Popeye’s Health Foods in Miami.

Danny was hired just after Wilks left to manage the plant. Danny’s stepfather, Marias, who is a financial analyst, was thinking of buying Swan Foods as it was near bankruptcy. Robert Brooks wanted \$100,000 for the company. Marias went over their books and found that they lost something like \$200,000 during the brief life of the business. Marias and Danny waited until Swan Foods went out of business. Danny bought all equipment that had not been sold. He also cleaned out the office, and kept any interesting documents—which he still has. Robert bought a moped and moved into Coconut Grove (Danny does not know whether or not Mary was with him), rented a room somewhere, and just buzzed around. “He was really wacked out.” He may have had big debts and was hiding from his debtors. Danny still has a file on Swan Foods. He may still have some product sheets and recipes.

Danny thinks that Robert and Mary were never married. Mary (who was about age 23 in 1977) got pregnant, but Robert didn’t want the baby, and wouldn’t marry her. It was a boy who they named Osland (perhaps spelled Aslan, Ausland or Auslan). They were Premmies, and devotees of Guru Maraji. Dick McIntyre of Swan Gardens was also a Premmie and is still an active devotee in Miami. Five years ago Mary contacted Danny. 3-4 years ago she was a down-and-out alcoholic living in shelters for the homeless—completely destitute. She was probably arrested in Miami many times for prostitution and drugs. What a tragedy. Danny has no idea how to reach her, but he thinks she still lives in the greater Miami area.

After Swan Foods went under, Danny, financed by Marias, started Sunshine Soy Company, Inc. (see separate interview). Address: 2219 S.W. 59th Ave., Miami, Florida 33155. Phone: 305-266-0830.

2557. *Food Business (Chicago, Illinois)*. 1992. Meatless goes mainstream. Nov. 23. \*

• **Summary:** This cover story discusses the trend toward vegetarianism among mainstream Americans. It notes that: Morningstar Farms Grillers, a meatless burger made by Worthington Foods, are sold in 95% of U.S. grocery stores and supermarkets. Sales of soyfoods are expected to top \$1.4 billion by the year 2000. In a survey of what is “in” among teens, 28% of respondents said that vegetarianism is “in,” compared with 22% a year ago. A National Restaurant Association study found that the trend toward reducing meat consumption peaked in the over-65 age group. In a 1992 poll, 12.4 million adult Americans considered themselves vegetarians, almost double the number in 1985. One in five restaurant patrons won’t even go to a restaurant unless there is a vegetarian option on the menu. One British company [Haldane Foods] sells 70 million packaged soyburgers a year in the U.K.

2558. Archer Daniels Midland Co. 1992. First quarter report to shareholders, and a report on the 69th annual shareholders meeting. Decatur, Illinois. 8 p.

• **Summary:** “Your company continues to build for the future. Last year our capital expenditures exceeded \$900 million; this year we spent an additional \$600 million. In the last three years our capital expenditures exceeded two billion dollars, and that was still well below our cash flow for the same period...”

“Ogilvie Mills of Canada was acquired, along with a joint venture partnership to operate Pillsbury’s four U.S. mills. The Ogilvie acquisition also made ADM one of the largest producers of wheat starch and vital wheat gluten, a major product for the baking industry...”

“Our oilseed crushing division purchased a canola crushing plant in western Canada, further consolidating our position as the world’s leading crusher of canola... Our crushing division now operates 45 plants, crushing soybeans, cottonseed, corn germ, flax, canola, and sunflower seed, and refines the oil in 14 refineries.

“Our edible soy protein business continues to grow. A large, ultra-modern soy protein concentrate plant was commissioned at Rotterdam [Netherlands]. Our edible soy protein business—concentrate, isolate, and soy flour products—increased 25 percent for the year. Production of Harvest Burger, our soy concentrate-based meat substitute, is selling at record levels in the U.S., Russia, and England...”

“We are in a growth industry. Feeding people is our business. Each year there are nearly 100 million more people to feed on the face of the earth...”

“We consistently lead the charts in sales per employee in our industry. People often ask me how we do so much business with so few people. My answer is that it’s our culture, central to everything we do. Every company has a

personality, just like every person. The basis of our culture, or personality, is very simple: we stay in the business we know. We concentrate on one major objective, and that is the return to our stockholders. We remain entrepreneurial, concentrating on only those matters essential to running a successful business... We keep meetings, memos, policies, and procedures to a minimum. We treat everyone as an individual, giving him or her the tools and the authority to do the job. We don't second-guess, and we don't criticize for honest mistakes."

"ADM is a company with no fixed management committees, no organizational charts, no bells, no whistles, and no gimmicks—just good pay and hard work." Address: Decatur, Illinois.

(Lite Lite Tofutti, Tofutti Cuties, Land of the Free [Non-dairy frozen desserts, free of fat and sugar, sweetened with fruit juice], Tofutti Egg Watchers, Better than Cream Cheese, Sour Supreme [Non-dairy sour cream], Premium Tofutti, Tofutti Soft Serve Mix), Sharon's Finest (TofuRella), American Natural Snacks (Soya Kaas), Great Eastern Sun (Miso Master brand misos), The Macrobiotic Wholesale Company, Turtle Island Foods, Inc. (Keep It Simple Stirfry–Diced Marinated Tempeh), Betsy's Tempeh (Tempeh), Quong Hop & Co. (The Soy Deli–9 Tofu Burgers, 3 Savory Baked Tofu, Pacific Tempeh, 3 Tempeh Burgers, 7 fresh water packed and vacuum packed tofu), MYCAL Group (natural dehulled soybean flakes).

Articles and sidebars include: "Welcome to the future: Soyfoods 2000." "Soyfoods Association names new executive director" (Virginia Messina, whose photo is shown). "Soyfoods Association mission statement." "The modern evolution of soyfoods," by Michael Whiteman-Jones and William Shurtleff (Shurtleff's photo is shown). "Unraveling the soyfoods merchandising mystery," by Michael Whiteman-Jones. "Research shows soyfoods may help prevent cancer," by Mark Messina, PhD (whose photo is shown). "Key reasons to buy soy: Environmental, nutritional, economic."

This attractive insert was coordinated by Franke Lampe and edited by Lisa Turner, both of NFM.

**2566. Product Name:** Realeat Vegebangers (Frozen Frankfurters) [Meaty Style, or Vegetable Style].

**Manufacturer's Name:** Haldane Foods Group.

**Manufacturer's Address:** Howard Way, Newport Pagnell, Buckinghamshire MK16 9PY, England. Phone: +44 908 211311.

**Date of Introduction:** 1992 December.

**Wt/Vol., Packaging, Price:** 1 lb and 1½ lb bags. Retail for £1.39 and £1.99 respectively.

**How Stored:** Frozen.

**New Product–Documentation:** Spot in SoyaFoods. 1993. Winter. p. 5. "More Vegebangers from Realeat." Two new varieties of frozen Vegebangers were launched in Dec. 1992 by Haldane Foods. Both contain no meat, but the Meaty Style products have a more meaty flavor, being made from a

seasoned blend of vegetable proteins.

2567. Whiteman-Jones, Michael. 1992. Unraveling the soyfoods merchandising mystery: Selling techniques ultimately depend on store size, location and customer demographics. *Natural Foods Merchandiser*. Dec. Soyfoods 2000 special supplement insert. p. 8-11.

• **Summary:** The views of three industry experts—Steve Demos of White Wave, John Paino of Nasoya Foods, and Peter Golbitz of Soyatech—on the best approaches to marketing soyfoods in America.

White Wave boasts gross annual sales of about \$5 million, roughly 80% of which come from natural products stores and 20% in conventional supermarkets. Demos wants to position soyfoods as a category. "Rather than integrate soyfoods with similar products—putting tofu dogs with hot dogs, for instance—he believes they should get their own section. Call it a protein case, or a healthy alternatives section, or even tack on a sign that says 'Phony foods sold here.'" Safeway, a mainstream supermarket giant, is experimenting with separate soyfoods sections in some of its stores, but most supermarkets practice integration. Natural products stores often merchandise soyfoods together in a separate section, and one such large store "can easily sell 30 to 50 times as much soyfoods as a supermarket."

Paino, who declined to reveal Nasoya's sales figures, sells soyfoods nationwide in natural products stores, supermarkets, and Asian markets. He favors integration rather than a separate protein section. He focuses on eye-catching labels, point-of-sale merchandising tools such as shelf talkers, tear-away recipe cards, and in-store demonstrations. "Nasoya built its market by merchandising tofu in the produce section and has enjoyed solid sales and growth as a result."

Golbitz, a leading industry consultant, "has surveyed stores across the country about soyfoods merchandising. His conclusion: Integration works best for some stores, separate sections better for others. The major determining factors are store size, traffic, and demographics." The answer "has to be regionalized, localized, and individualized. Supermarkets and large-format natural products stores, for instance, generally have better luck with integration." Integration helps transitional customers. "Soy milk just doesn't seem as strange when its standing next to a carton of cow's milk, he says, and the marketing power of familiarity can't be underestimated... One thing Golbitz is certain of, however, is that soyfoods sales are going to increase whether the products are merchandised in a separate section or integrated."

2568. De Vuurdoop. 1992. Weder Fisch noch Fleisch, aber lecker schmeckt's! [Neither fish nor meat, but it tastes delicious! (Leaflet)]. Volendam, Netherlands. 3 panels each side. Each panel: 21 x 11 cm. [Ger]

• **Summary:** This attractive German-language leaflet is from a Dutch company that makes tasty vegetarian foods (*vegetarische Leckereien*). They offer 8 refrigerated products including Tofu Cutlets and a Seitan Burger, plus frozen products including a Seitan Burger, Croquettes with Seitan, and Croquettes with Tofu. Address: Postfach 147, NL 1130 AC Volendam, Netherlands. Phone: 0031/2993/61152.

2569. **Product Name:** Tofu Turkey.

**Manufacturer's Name:** Fresh Tofu Inc.

**Manufacturer's Address:** 900 Line St. (P.O. Box 1125), Easton, PA 18042. Phone: 215-258-0883.

**Date of Introduction:** 1992.

**Wt/Vol., Packaging, Price:** 2.5 lb vacuum packed.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Gary Abramowitz. 2000. Nov. 30. Fresh Tofu first started making commercial Tofu Turkey in 1992. This is a vacuum-packed, refrigerated product with a 3-4 week shelf life; it is not frozen. Therefore it is sold locally and regionally rather than nationally. It is also 100% tofu, whereas competing products typically contain lots of wheat gluten. They start with a large block of tofu, then cut it to the silhouette of a turkey. They do not use a mold to shape the tofu. Then, by hand, they carve and score each Tofu Turkey with a knife to give it feather marks and other details, then it is marinated and baked for a long time to give it a nice brown skin on the outside and white “meat” on the inside. It can be cut into thin slices. It comes in a box with a rosemary-herb gravy mix. In 1992 the turkey weighed 2½ pounds (40 oz.) but they found that was too much. In 1998 the weight was reduced to 1 lb 10 oz. (26 oz.)—which is still the weight today. It feeds 4-6 comfortably. The first year (1992) the company sold several hundred, increasing to 320 in 1995, 500 in 1996, 600 in 1997, over 1,000 in 1998 (at the lighter weight), 1,500 in 1999, and over 2,000 this year (by the end of 2000). Gary is associated with PETA. Every thanksgiving they help promote his Tofu Turkeys, and he, in turn, gives away free ones.

2570. **Product Name:** Soy Burgers.

**Manufacturer's Name:** New Dawn Enterprises.

**Manufacturer's Address:** Sheffield, Tasmania. Phone: (004) 91 1663.

**Date of Introduction:** 1992.

**Ingredients:** Incl. organic tofu, okara, wheat, and spices.

**Wt/Vol., Packaging, Price:** 500 gm vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Trishala Shub. 1998. Jan. 18. In about 1992 they introduced Soyburgers, which contained tofu, okara, wheat, and spices.

2571. **Product Name:** New World Foods Vegetarian Chorizo (With Granular Tofu Curds).

**Manufacturer's Name:** Vegetable Protein Specialists

(VPS), Inc.

**Manufacturer's Address:** 2889 Trades West Rd., Santa Fe, NM 87501. Phone: 505-471-8979.

**Date of Introduction:** 1992.

**Ingredients:** Organic\* Befine (soybeans, water, calcium sulfate—a natural mineral, caramel color), whole chile pods ground with chile broth, potatoes, spices, vinegar, salt, vegetable gum. \* = Organically grown & processed in accordance with Section 26569.11 of the California Health and Safety Code.

**Wt/Vol., Packaging, Price:** 12 oz vacuum pack. Or 24 lb. foodservice pack.

**How Stored:** Frozen or refrigerated.

**Nutrition:** Per 2 oz.: Calories 64.3, calories from fat 16.7, total fat 11 gm (saturated fat 0.24 gm), cholesterol 0 mg, sodium 414 mg, total carbohydrate 9.3 gm (dietary fiber 0.83 gm), protein 4.1 gm, vitamin A 162%, vitamin C 4%, calcium 8%, iron 23%.

**New Product–Documentation:** Leaflet sent by Richard Jennings of VPS, Inc. (Vegetable Protein Specialists). 1993. Nov. 26. “New World Foods.” “Chorizo is a sausage of Spanish and Portuguese origins.” This vegetarian chorizo was created by an expert chorizero, Mr. Oscar Tavarez, from Chihuahua, Mexico.

Talk with Richard Jennings of VPS. 1993. Dec. 1. This product was introduced in 1992. A key ingredient was Rico Soy (small, firm chunks of tofu), which was renamed and trademarked Befine by Sept. 1993.

New Label sent by Richard Jennings. 1993. Nov. 29. 3 by 5 inches. Self adhesive. Black on gold. Illustration of a symbolic Aztec crow. “Low in saturated fat.” “Serving suggestions: Scramble with eggs... Makes a great breakfast burrito.”

2572. *Vegetalia*. 1992. *Recetario* [Recipe book]. Castellcir (near Barcelona), Spain. 32 p. 21 cm. [Spa]

• **Summary:** The Introduction to this handsome color booklet (which contains many color photos), was written by Salvador Sala. It states: “Thanks to you, this year in 1992 we will celebrate the 6th year of *Vegetalia*’s existence. It has not been easy to get to where we are now, but it has been very satisfying, especially for me. When, in April 1986, together with Carmen and Tomás, we decided to form *Vegetalia*, our dream was to facilitate the improvement of the quality of life, in the ecological way.”

For each of the following foods there is an introduction, a nutritional analysis, then several recipes: Seitan, tempe (a color photo shows tempeh sold in perforated plastic bags, and immersed in a broth in jars), tofu (a color photo shows tofu sold in self-sealing bags and immersed in a liquid in jars), pickles, amasake [amazake], gomasio [gomashio], and Algas Klamath (a type of sea vegetable), and Vegetalin (made with whole wheat, olive oil, sea salt, natural leavening, and sesame). Page 32 notes that the company

makes seitán, tempe, tempe estofado, tofu, tofu tres delicias, paté -de tofu y miso, etc. It also sells an large line of natural foods made by other companies, including: Soyçisse (a type of soy frankfurter). Tofume (smoked tofu). Biosoy (soymilk). Postre de Soja (Soymilk desserts, in hazel-nut/filbert, vanilla, chocolate, apricot, strawberry, and pear flavors). Soy yogurt (natural and low fat). And Vegetalia is working to help the Third World via CEPAN in Brazil.

Note: This is the earliest Spanish-language document seen that mentions amazake, which it calls “amasake.” Address: Castellcir (near Barcellona), Spain. Phone: +34 3-866 61 61.

2573. Kawakami, Kozo. 1992. *Tsurezure Nihon shokumotsushi*. 2 v [Leisurely history of Japanese foods. Vols. 1-2]. Tokyo: Tokyo Bijutsu. Illust. 21 cm. [35+ ref. Jap]

• **Summary:** Vol. 1 (vi + 151 p.) contains chapters on: Ryokutô [ryokuto] (bundô, yaenari; p. 74-76, mentions tofu. Note: Kinch 1879 says *Phaseolus radiatus subtriloba* = bundô). Ganmodoki and hiryoza [tofu burgers] (p. 85-89; 9+5 ref.). Yose-dofu (p. 89-99; 13 ref.). Itoko-ni (p. 108-10; 13 ref.; with soybeans, azuki beans and tofu). Gomashio (p. 128-30; 7 ref.).

Vol. 2 (3 + 151 + 5 p.): A color illustration titled (*Nori-zukuri no zu*), by Katsukawa Shunsen (?) on the dust jacket shows women making nori in old Japan. They are chopping freshly collected nori and drying it in sheets. Another old 3-part illustration of making nori is printed on the cover. Contents (centered on foods and treats from the sea) includes: Nori and kawa-nori (from the sea and from rivers. p. 1-5; 35 ref. 1 illust.). Asakusa nori, Kassai nori, Shinagawa nori, and other nori from the Pacific Coast and Inland Sea (*Setonai-kai*) during the Edo Period (p. 8-16, 39 ref. 4 illust.). Nori from the Japan Sea (*Nihonkai*) No. 1: Izumo nori, Uppuri nori, and Kamoji nori. Uppuri is a place near Izumo, and Kamoji is a wig-like hair filler (p. 17-20, 21 ref.). Nori from the Japan Sea (*Nihonkai*) No. 2: Kuro nori, Yuki nori, Noto nori, and Kasashima / Kasajima of Echigo nori (p. 21-24, 21 ref.). The story of river nori, Shiba river nori, Nikko nori, and Kikuchi nori (p. 25-30, 26 ref. 1 illust.). Dried frozen tokoroten (*kôri tokoroten*), made from frozen seaweed (p. 98-102, 3 ref.). Mizukara (a spicy food made from kombu, p. 103-05, 16 ref.). Musubi kombu, musubi kanpyo, and musubi sayori (musubi means “tied up in like a bow in a special way;” p. 106-10, 25 ref. 2 illust.). Musubi yamaimo (mountain glutinous yam) and musubi tofu (both tied up in a special decorative way. p. 111-14, 14 ref.). Also contains other interesting illustrations and chapters. Address: Japan.

2574. Sass, Lorna J. 1992. *An ecological kitchen: Healthy meals for you and the planet*. New York, NY: William Morrow and Company, Inc. xv + 492 p. Index. 26 cm. [35+\* ref]

• **Summary:** This excellent vegetarian (actually vegan), ecological cookbook, proves that the most environmentally sound diet is also the healthiest and, for many, the most delicious and economical. It emphasizes whole grains, fruits and vegetables, focuses on unprocessed and minimally packaged foods, use of regional and seasonal foods, efficient menu planning, and creative recycling of leftovers. Delightful quotations relevant to the book’s subject are scattered throughout.

The author’s guiding principles for cooking ecologically are: “Eat a plant-based [vegan] diet; buy organic, regional, seasonal produce whenever possible; and use nontoxic products to keep your kitchen clean.”

The chapter titled “Tofu and tempeh” (p. 217-31) contains basic information and many recipes. Other soy-related recipes include: Thai vegetable soup (with tofu, p. 39). Ten-ingredient lo mien (with tofu, p. 165-66). Triple bean maybe it’s chili (p. 186-87). Black soybeans (p. 191-92; keep the skins on by adding salt). Curried mustard greens with tofu (p. 255). Chinese-style stir-fry of kale, onions, and marinated tofu (p. 258). Tahini-miso spread (p. 315). Sun-dried tomato dip (with tofu, p. 318). Brilliant beet dip (with tofu, p. 319). Onion upside-down cornbread (with tofu, p. 323-24). Tofu whip (like whipped cream or whip topping, p. 398).

The very fine chapter / glossary “Ingredients A to Z” (p. 399-468) includes: Aduki / azuki beans, agar, almond butter, almonds, amaranth, amasake (incl. koji), arame, barley malt syrup.

Black beans—fermented (salty black beans): “Black beans, fermented (Salty black beans): A little of this Chinese specialty—small black soybeans preserved in salt—goes a long way. About 1 tablespoon adds a deliciously complex flavor to stir-fries. Chop the beans finely to disperse their flavor. If you like the taste but want to reduce the salt, soak the beans briefly in water before using. Fermented black beans last for about a year in a well-sealed jar under refrigeration.

“Bragg Liquid Aminos: This is a *very tasty* soy-sauce-like condiment made by extracting amino acids from organic soybeans. Its flavor is more winelike and complex than most soy sauces. It is salty, so sprinkle sparingly. (There is no added salt, but 125 milligrams of sodium per ½ teaspoon come from the natural sodium in the soybeans.)

“Unlike soy sauce, Bragg Liquid Aminos is not fermented, making it an ideal seasoning for those who suffer from yeast sensitivities. Delicious added to stir-fries or plain-cooked grains. It is readily available in health food stores.” Also in natural food stores.

Daikon, dulse, gomashio, hijicki / hizicki [sic, hijiki], job’s tears, kombu, kuzu (kudzu), kuzu kiri, lupins, miso, mochi, natto, nigari, nori, peanut butter, peanuts, quinoa, rice—brown, rice cakes, rice syrup, sea vegetables, tamari-roasted seeds, seitan (wheat gluten), sesame butter (tahini), sesame oil, sesame seeds, shoyu, soybeans, soybeans—black,

soy cheese, soy flakes, soy flour, soyfoods, soy grits, soy ice cream, soy milk, soynuts, soy oil, soy powder (powdered soy milk), soysage, soy sauce, soy yogurt (fermented), tahini, tamari soy sauce, tempeh, tofu, umeboshi plums, wakame, wasabi, winged beans. Note: Also contains recipes for many of these glossary items.

A color portrait photo on the inside rear dust jacket shows Lorna Sass—with a brief biography; she is a culinary historian, cookbook author, and food writer. Address: Box 704, New York City, NY 10024.

**2575. Product Name:** Organic TofuBurgers [Original].

**Manufacturer's Name:** Stow Mills (Distributor).

**Manufacturer's Address:** Chesterfield, NH 03443-0301.

**Date of Introduction:** 1992?

**Ingredients:** Organic tofu (filtered water, organically grown soybeans, natural calcium chloride nigari—a natural mineral coagulant, not a preservative), fresh carrots, rolled oats, sunflower seeds, sesame seeds, dried currants, barley malt syrup, red miso (water, rice, soybeans, salt), onion powder, garlic powder, spices, guar gum, natural orange extract, canola oil.

**Wt/Vol., Packaging, Price:** 6.5 oz (184 gm) vacuum pack. Retail for \$1.59 (7/92, Maryland).

**How Stored:** Refrigerated.

**Nutrition:** Per 3.25 oz patty: Calories 240, protein 14 gm, carbohydrate 19 gm, fat 12 gm, cholesterol 0 mg, sodium 85 mg, dietary fiber 12 gm.

**New Product—Documentation:** Product with Label purchased at Fresh Fields, Rockville Pike, Maryland. 1992. July 20. Label is 4 by 5.5 inches. Self adhesive. Dark blue, red, and black on light blue and light green. Color photo of a Tofuburger with tomato slices, onion rings, and a lettuce leaf. “All natural. Wheat free. Low sodium. Meatless. Dairy free. No cholesterol. High calcium. High protein. Stow Mills Tofu Burgers are precooked for your convenience. Please do not overcook. To prepare, just grill, fry or microwave until heated.”

2576. Lightlife Foods, Inc. 1993. Why protein from vegetable sources makes good sense: The Lightlife primer (Leaflet). Greenfield, Massachusetts. 4 panels each side. Each panel: 22 x 9 cm.

• **Summary:** Accompanying this leaflet is a glossy leaflet for Lightlife Meatless Smart Dogs, and a coupon to save \$0.30 on any Lightlife product.

This leaflet appeared in a new format in March 1995. Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001.

2577. Sharon's Finest. 1993. Sharon's Finest donates \$6,000 to Rainforest Action Network (News release). Santa Rosa, California. Feb. 19.

• **Summary:** Sharon's Finest donates 5% of its profits to

groups working to protect the world's Rainforests. Richard Rose, President, says he thinks of it as a self-imposed 'Green tax.' “To date, Sharon's Finest has donated \$10,400 to such groups in the US and Canada. and over \$74,000 in product to the Second Harvest Food Bank.”

“Sharon's Finest originated TofuRella, the first tofu-based cheese alternative, in 1987... This month marks the debut of Better Burger and Better than Meat, two new meatless and fat-free alternatives to ground beef.” Address: Box 5020, Santa Rosa, California 95402-5020. Phone: 707-576-7050.

2578. White Wave, Inc. 1993. Quick & easy recipes (Recipe cards). 1990 N. 57th Court, Boulder, CO 80301. 3 by 4 inches.

• **Summary:** These colorful recipe cards were introduced in Feb. 1993 and were available at the Natural Products Expo West at Anaheim, California. 1995. March. Each 3 by 4-inch card is printed on both sides. On the front, at the top is written “Quick & Easy Recipe.” Below that is the recipe name, a brief description of the recipe by Leonardo, White Wave Corporate Chef, and a large White Wave logo. On the back is the recipe itself.

There are cards for: Tempeh mock chicken salad. Tempeh Reuben. Lemon broil [tempeh with] pasta sauce. Almost Chinese hot & sour soup. Sizzling savory tofu steaks. Pepper tofu steak sandwich. Address: Boulder, Colorado. Phone: 303-443-3470.

2579. Janisch, Edward. 1993. Re: Work developing new products and processes using wheat gluten. Letters to William Shurtleff at Soyfoods Center, March 9 and 18. 1 p.

• **Summary:** Ed is a retired college teacher who, in recent years, has developed both processes and products which he believes produce superior products from seitan and wheat gluten. His parents are Austrian and, after dropping out of high school, he worked in the merchant marine as a cook and chief steward, for years around the world. In 1949-50 he went back to college, earning his bachelor's degree from the State University of New York (SUNY) at Buffalo, and his MS from Colgate University (in Hamilton, New York). Then he did 2 years of PhD work at Syracuse Univ. but never finished the program. At SUNY and various universities he taught social sciences, and the history of ideas. Ten years ago he and his wife became vegetarians. He feels the various books by Shurtleff and Aoyagi “should be awarded the Nobel Prize.” They guided him to a new way of life. He was also strongly influenced by the book *How to make all the “meat” you eat out of wheat*, by Nina and Michael Shandler.

In 5 minutes he can transform 5 lb of whole wheat flour, by hand, using no machines, into fresh (gum) gluten. His first breakthrough was developing a process to transform fresh gluten (gum gluten) into a 4-ounce cutlet (¼-inch thick, irregular oval in shape, like a “tonkatsu”) in 40 minutes;

made a little thinner it becomes like a veal Parmesan or schnitzel. He shapes the 4-oz. cutlet (5 inches on a side) rather than slicing it from a larger slab. Most seitan requires several hours of cooking. Everyone he has served it to has loved it. He has attended trade shows and tasted many seitan products, and he feels his is superior to them all. His texture is unique, closely resembling that of veal.

His second major development was a process that transforms dry vital gluten into a hamburger or meatball in a short time with the texture, flavor, and juiciness of meat—with an excellent nutritional profile using only natural ingredients.

He has established a company named Auspicious Foods, but as yet he has no products on the market. A 3-page typed brochure (each page is 8½ by 11 inches) has a letterhead that reads “Auspicious Foods—Naturally Delicious. Home of Seitan Supreme + Harvest Burgers.” It explains that he has developed (but not patented) the two lines of products: (1). Vital Wheat Gluten (Wheatmeal) Dry Mixes. 1.125 ounces of the dry mix, after cooking, will yield 1 Better Burger, or 4 Better Wheatballs, or 1 Better Steak/Cutlet, or 2 White Hotdogs (White Hots, Bratwurst), or 4 Breakfast Patties, or 4 Sweet and Mild Italian Patties. Each product unit contains 188 calories, 3.6 gm of “good fat” from canola oil, with 17% of the calories from fat. These products freeze very well; after freezing, microwave for 50-60 seconds. The dry mix can also be used to make Ground Wheatmeal (for use like any ground meat, e.g. as a pizza topping), or a Breaded Cutlet (Schnitzel, Parmesan; deep fried). In these, the ingredients and the process for transforming the dry mix into finished products are unique. (2) Fresh Gluten. Use to make Veggie Birds, Veggie Steak, Schnitzel—Parmesan (deep fried), or B-B-Q. The Birds and Steak have less than 10% calories from fat. Address: 3001 First St., St. Augustine, Florida 32095. Phone: (904) 824-1165.

2580. Francis, Mike. 1993. This CEO goes back to heat in kitchen. *Oregonian (Portland, Oregon)*. March 28.

• **Summary:** About Paul Wenner whose company, Wholesome & Hearty, makes the Gardenburger. He is tall, blond, and stylishly dressed. He’s got a new management team, led by president Carl Nelson. His stock has appreciated 72% in the past 8 months, and his new plant, which is up and running, is ten times the size of the old one.

2581. **Product Name:** Smart Deli: Lightlife Meatless Fat Free Slices [Old World Bologna Style, Roast Turkey Style, Three Peppercorn Style, or Country Ham Style].

**Manufacturer’s Name:** Lightlife Foods, Inc.

**Manufacturer’s Address:** P.O. Box 870, Greenfield, MA 01302. Phone: 1-800-274-6001 Ext. 114.

**Date of Introduction:** 1993 March.

**Ingredients:** Bologna: Water, soy protein isolate, wheat gluten, natural flavors from vegetable sources, evaporated cane juice, salt, granulated garlic, carrageenan, vegetable

gum, spice extracts, paprika oleoresin.

**Wt/Vol., Packaging, Price:** Paperboard sleeve around 6 oz vacuum pack. Retail for \$2.19 (1998/02, California).

**How Stored:** Refrigerated, 40 day shelf life. Or frozen.

**Nutrition:** Per 3 slices (43 gm): Calories 50, calories from fat 0, total fat 0 gm (0% daily value; saturated fat 0 gm), cholesterol 0 mg, sodium 300 mg (13%), total carbohydrate 2 gm (dietary fiber 0 gm), sugars 0 gm), protein 10 gm. Iron 30%, vitamin C 2%. Percent daily values are based on a 2,000 calorie diet.

**New Product—Documentation:** Product with Label purchased at Trader Joe’s in Concord, California. 1997. Oct. 3.5 by 5 by 1 inch. Paperboard sleeve. Green, yellow, red and gold on white. Price: \$2.19 at Trader Joe’s but \$1.99 at Safeway in Lafayette, California.

Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo East (Baltimore, Maryland). 1997. Sept. “Our hero.” Shows labels of the four different types of Smart Deli products. “Call it a hero, a hogie, a grinder, or submarine sandwich—but build it the healthy and hearty way—with Smart Deli fat-free slices. All natural and 100% vegetarian, these slices make a tasty and convenient lunch or snack for the entire family. Try all four of these mouthwatering Old World flavors.” On the back are ingredients and nutritional details on each product. The inside of the sleeve contains: A \$0.30 coupon. An invitation to “Join our Lightlife family!” and receive a newsletter, a recipe for Smart bagel melt, and a message from Chia Collins and Michael Cohen, founders. It reads: Today we all know that what we eat makes a difference in the quality of our lives. We read about it weekly in magazines; hear about it daily on the news. In the years ahead, we will come to see the humble soybean as a harbinger of good health. Since 1979, our goal at Lightlife has been to show people that there is a better way to eat; a way that is healthy and graceful for the individual as well as the planet. With your satisfaction and well being in mind, we are pleased to offer you our delicious, easy to use meatless foods.

Life is a precious gift. Take a walk today, do something for someone else, share a laugh with a friend,... and eat well!

Talk with Maggie in Customer Services at Lightlife. 1998. Feb. 25. This line of products was introduced in March 1993.

Soyfoods Center taste test of Bologna. 1998. Feb. 25. Flavor, texture, and appearance are all excellent, very much like those of real bologna.

2582. **Product Name:** Vegetable Patty.

**Manufacturer’s Name:** Season’s Harvest.

**Manufacturer’s Address:** 52 Broadway, Somerville, MA 02145. Phone: 617-628-1182.

**Date of Introduction:** 1993 March.

**New Product—Documentation:** Talk with Ademar Reis. 1993. Nov. 29. He introduced this consumer retail product,

made with textured soy protein concentrate, in about March 1993.

2583. **Product Name:** Breakfast Sausage (Veggie).

**Manufacturer's Name:** Season's Harvest.

**Manufacturer's Address:** 52 Broadway, Somerville, MA 02145. Phone: 617-628-1182.

**Date of Introduction:** 1993 March.

**Ingredients:** Incl. textured soy protein concentrate, gluten, and soy protein isolate.

**New Product–Documentation:** Talk with Ademar Reis. 1993. Nov. 29. He introduced this consumer retail product in about March 1993. The word “Veggie” is written diagonally across the top.

2584. **Product Name:** Dream Patty.

**Manufacturer's Name:** Season's Harvest.

**Manufacturer's Address:** 52 Broadway, Somerville, MA 02145. Phone: 617-628-1182.

**Date of Introduction:** 1993 March.

**New Product–Documentation:** Talk with Ademar Reis. 1993. Nov. 30. This is the same product as the original California Dream Burger but in an oval shape. His company sells this product only to Continental Airlines. The first orders were shipped to them in early March 1993. He began working on the product in Jan. 1993.

2585. Worthington Foods, Inc. 1993. Annual report 1992. 900 Proprietors Rd., Worthington, OH 43085. 16 p. 28 cm.

• **Summary:** See next two pages. This is the company's first annual report to shareholders since it went public. “Sales: Total sales reached \$75.6 million in 1992, an increase of \$6.3 million or 9% percent over 1991. Sales gains were recorded in each of the Company's four national brands.”

“Earnings: Net income for 1992 was \$2.8 million, an increase of 9.1% over 1991.”

On the inside rear cover, the Company's four product lines are described and the logo for each displayed.

“Since 1939 Worthington Foods has been owned by a growing number of investors.” “Common Stock: We successfully completed an initial public offering of 1,750,000 common shares on April 16, 1992, at a price of \$12 per share, of which 1,410,000 were sold by the Company and 340,000 were sold by selling shareholders. This provided over \$15 million of capital to the Company which was used to significantly reduce our debt and broaden our shareholder base. These accomplished objectives have strengthened the Company's financial resources which will significantly help us in achieving our aggressive growth and profit objectives for the future.” Address: Worthington, Ohio. Phone: (614) 885-9511.

2586. Worthington Foods, Inc. 1993. Form 10-K. 900 Proprietors Rd., Worthington, OH 43085. 39 p. 28 cm.

• **Summary:** This is the version of the company's annual report submitted to the U.S. Securities and Exchange Commission. Address: Worthington, Ohio. Phone: (614) 885-9511.

2587. McDermott, Ron. 1993. The effect of the work of Henry Ford and his researchers on Worthington Foods today (Interview). *SoyaScan Notes*. April 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Robert Boyer, who worked for many years with Henry Ford, brought the technology for making spun soy protein fibers (SPF) to Worthington Foods. Today, as far as Ron knows [and as far as Soyfoods Center knows], Worthington is the only company in the world making SPF. They are used in about 15-20% of Worthington's meat alternatives, and they are especially useful in chicken-like products. More specifically, they are used in about 15% of their Morningstar Farms line of products (they are not used in Grillers, Breakfast Patties, and Breakfast Links), and in about 20% of their other canned and frozen meat alternatives. A new Morningstar Farms Breaded Chicken Patty, which is in expanded test market, also contains spun soy protein fiber.

In April 1992 Worthington had their first public stock offering to finance their new plant, so their financial figures are now available. The stock is traded on the open market over the counter (OTC) under the symbol WFDS for about \$9.75 per share. The company total sales for 1992 were \$76 million. Of this, meat alternatives accounted for about two-thirds of the total sales, or about \$51 million. If SPF account for 17.5% of this, then they have a retail value of about \$8.8 million.

Most of Worthington's meat alternatives are made from a combination of wheat gluten and textured soy protein concentrate. SPF work best in simulating the texture of long muscle fibers, as are found in chicken-like products, such as chicken breast or drumsticks. They also work well to simulate fish cutlets or non-ground red meat (such as roast beef), but there is not much demand for these types of products from Worthington customers. Most beeflike forms are burgers made to simulate ground beef. Moreover plain SPF has a better, more bland and less beany flavor than soy protein concentrates, and they hold and bind other added flavors better.

Why doesn't the company use more SPF? Because they are a very expensive ingredient, and Worthington's growth is in low-tech products, both from a consumer preference and a cost viewpoint.

But Ron is quick to add that SPF have had a major impact on the overall growth of Worthington Foods that is not at all adequately expressed by the present 15-20% figure. First, “the initial impact was huge.” Before Bob Boyer came along and brought this technology from Henry Ford, Worthington was making mostly canned wheat gluten

Worthington Foods, Inc.

*Worthington Foods produces more than 150 different items to provide healthier alternatives to meat, eggs and dairy products. These food items are free of meat, animal fat and cholesterol.*

*Worthington Foods markets its products nationally under four brand names:*

*The **Worthington**<sup>®</sup> brand satisfies the preferences of consumers seeking premium quality meat substitutes. The line is sold in health and specialty food stores.*

*The **LaLoma**<sup>®</sup> brand (formerly Loma Linda Foods) complements the Worthington products by offering nutritious meat analogs to health and specialty food shoppers.*

*The **Natural Touch**<sup>®</sup> brand meets the needs of health food shoppers seeking products free of artificial additives, flavors or colors. These products are made from all-natural ingredients with minimal processing.*

*The **Morningstar Farms**<sup>®</sup> brand is the most widely available line of zero-cholesterol alternatives to processed meats and whole eggs. They are distributed nationally through supermarkets. Scramblers<sup>®</sup> and Better'n Eggs<sup>™</sup> egg products can be used in virtually all applications calling for whole, shell eggs.*

products for a very small and specialized denominational market. The first SPF products propelled Worthington into a new level of technology, the mainstream market including supermarkets, and into frozen foods. Second, the new SPF technology was a major factor in attracting Miles Laboratories, which purchased Worthington in March 1970s and took the company into the big leagues—in every area of business from accounting to quality control, from manufacturing to marketing. Third, when trying to deliver a full line of products to consumers, having meatless alternatives to chicken has given Worthington an important competitive advantage. Now that Americans consume more chicken than beef, this becomes increasingly important. Address: Vice President Research & Technology, Worthington Foods, 900 Proprietors Rd., Worthington, Ohio 43085-3194. Phone: 614-885-9511.

2588. McDermott, Ron. 1993. Increasing use of wheat gluten in foods in America (Interview). *SoyaScan Notes*. April 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ron sees the use of wheat gluten increasing in the USA. Steve Demos of White Wave is starting to use more gluten. [Note: In June 1989 White Wave launched Meatless Healthy Franks, a tofu hot dog which had wheat gluten as the third ingredient. In Sept. 1990 White Wave introduced Meatless Healthy Bologna, a tofu-based product which also had wheat gluten as the third ingredient. In Feb. 1993 White Wave launched Traditional Style Seitan, in which wheat gluten was the main ingredient.] Ivy Foods also makes some nice gluten products. There are a number of advantages of using wheat gluten and soya together. The wheat gluten often improves the texture and flavor in meat alternatives, while sometimes lowering the fat content of the combination. The soya generally reduces the cost of the combination.

About a year ago ADM (Archer Daniels Midland Co.) purchased Ogilvie (pronounced OH-gul-vee) Mills in Keokuk, Iowa. So now ADM is one of the world's largest manufacturers of wheat gluten, but most of this gluten is going into the bread baking industry. Address: Vice President Research & Technology, Worthington Foods, 900 Proprietors Rd., Worthington, Ohio 43085-3194. Phone: 614-885-9511.

2589. Leneman, Leah. 1993. 365 plus one vegan recipes: Delicious meals and ideas for every day of the year.

Hammersmith, London, England: Thorsons—An imprint of HarperCollins Publishers. 144 p. April. Index. 24 cm.

• **Summary:** Chapter 1 of this book, titled “The Vegan Dairy,” gives recipes for homemade soya milk, mock cream (from soya milk), soya flour cheese, yogurt cheese (from soya yogurt). There are also recipes for cashew or almond milk, cashew cream, and cashew cottage cheese.

Chapter 11 (p. 85-100), titled “Tofu and other Soya Foods,” contains a long introduction plus the following recipes: Home-made tofu. Tofu and onions. Sweet and

sour tofu and vegetables. Sea-flavored crisp tofu slices. Mushroom stroganoff. Tofu kebabs. Tofu casserole. Warming winter stew (with tofu). Korean-style kebabs (with tofu and miso). Tofu and green pea bhajia. Tofu ‘scrambled eggs.’ Scrambled tofu and mushrooms. Tofu piperade. Spicy tofu scramble with red pepper and tomato. Tofu knishes. Tofu and pea curry. Tofu burgers. Swiss steak (with frozen tofu). Savoury tofu ‘mince’ (with frozen tofu). Crispy fried sea-flavoured frozen tofu. Tofu goulash. Smoked tofu stew. Smoked tofu, courgette and sweetcorn risotto. Smokey duvec (with smoked tofu). Pease pudding and smoked tofu bake. Smoked tofu pasties. Steamed savoury smoked tofu pudding. Smoked tofu charlotte. Lek and smoked tofu au gratin. Smoked tofu and mashed potato cakes. Tempeh croquettes with mushroom sauce. Tempeh hash with potatoes. Indonesian-style tempeh. Tempeh stroganoff. Japanese-style tempeh kabobs. Tempeh burgers. Tempeh chilli. Mock ‘ham’ (with dried bean milk sheets [yuba]). Mock ‘chicken’ (with yuba). Mock chicken cooked Indonesian style.

Chapter 13 is entirely about sea vegetables, and a number of the recipes contain tofu, tempeh, miso, or soya milk. A number of other recipes throughout the book also use soyfoods as an ingredient. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

2590. **Product Name:** Soyboy Leaner Wiener (Fat Free).

**Manufacturer’s Name:** Northern Soy, Inc.

**Manufacturer’s Address:** 545 West Ave., Rochester, NY 14611. Phone: 716-235-8970.

**Date of Introduction:** 1993 April.

**Wt/Vol., Packaging, Price:** 12 oz.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Spot in Natural Foods Merchandiser. 1993. April. p. 48. Shows the front panel of the label, which states: “Fat free. Vegetarian. No cholesterol. No nitrates. Dairy free. Keep refrigerated or frozen.” This pre-cooked hot dog has a mild, smoked flavor and contains no preservatives.

2591. **Product Name:** Gourmet Delight Soy Burger Mix [Savory Herb, Italian Spice].

**Manufacturer’s Name:** Vegetarian Health.

**Manufacturer’s Address:** P.O. Box 11292, Chicago, IL 60611.

**Date of Introduction:** 1993 April.

**Wt/Vol., Packaging, Price:** 6 oz packet.

**How Stored:** Shelf stable.

**New Product–Documentation:** Spot in Health Foods Business. 1993. April. p. 59. “Versatile Soy.”

2592. **Product Name:** Morningstar Farms Country Crisps (Chicken-like Patties).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd.,

Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1993 April.

**Ingredients:** Textured vegetable protein (Soy protein isolate and concentrate), egg whites, wheat flour, soybean oil, corn oil, water, corn flour, salt, monosodium glutamate, natural and artificial flavors from non-meat sources, dextrose, hydrolyzed plant protein, partially hydrogenated soybean oil, sugar, spices, yeast, paprika, vegetable gum, leavening (sodium acid pyrophosphate, sodium bicarbonate), onion powder, whey, nonfat milk, corn starch, turmeric, garlic powder, corn sweeteners, niacin, iron (as ferrous sulfate), vitamin B-1 (thiamine), vitamin B-6, Red 3 for color, vitamin B-2 (riboflavin), vitamin B-12.

**Wt/Vol., Packaging, Price:** 10 oz (284 gm) paperboard box. Retail for \$2.19 (6/93, Lafayette, California).

**How Stored:** Frozen.

**Nutrition:** Per 71 gm patty: Calories 220, protein 8 gm, carbohydrate 13 gm, fat 15 gm (63% of calories from fat, polyunsaturated 11 gm, saturated 2 gm), cholesterol 0 mg, sodium 620 mg, potassium 70 mg.

**New Product–Documentation:** Product with Label purchased at Lucky Foods supermarket in Lafayette, California. 1993. June 1. 8 by 4 by 1¼ inch box. Red and black on white. Color photo of one patty on a bun and lettuce, topped by two tomato slices, with another sesame bun beside it. Morningstar Farms logo in top left corner. “Cholesterol-free. Vegetable protein patties. Contains no chicken. No animal fat. Only 220 calories. Keep frozen. Microwavable.”

2593. **Product Name:** Morningstar Farms Meatless Chik Patties (Chicken-like Patties).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1993 April.

**Ingredients:** Textured vegetable protein (Soy protein isolate and concentrate), egg whites, wheat flour, water, corn oil, soybean oil, corn flour, natural and artificial flavors from non-meat sources, salt, potassium chloride, dextrose, hydrolyzed plant protein, partially hydrogenated soybean oil, sugar, spices, yeast, paprika, vegetable gum (carrageenan), leavening (sodium acid pyrophosphate, sodium bicarbonate), onion powder, whey, nonfat milk, corn starch, garlic powder, corn sweeteners, niacin, iron (as ferrous sulfate), vitamin B-1 (thiamine), vitamin B-6, vitamin B-2 (riboflavin), vitamin B-12.

**Wt/Vol., Packaging, Price:** 10 oz (284 gm) paperboard box. Retail for \$2.19 (6/93, Lafayette, California).

**How Stored:** Frozen.

**Nutrition:** Per 71 gm patty: Calories 170, protein 8 gm, carbohydrate 13 gm, fat 10 gm (53% of calories from fat, polyunsaturated 6 gm, saturated 2 gm), cholesterol 0 mg, sodium 590 mg, potassium 200 mg.

**New Product–Documentation:** Product with Label purchased at Lucky Foods supermarket in Lafayette, California. 1993. June 1. 8 by 4 by 1¼ inch box. Dark green, light green, tan, red, and blue on white. Color photo of a patty with lettuce and tomato between two buns on right half of front panel. Morningstar Farms logo in top left corner. “Artificial chicken flavor. No animal fat. Microwaveable. Zero cholesterol. Keep frozen.”

Talk with Trudy Cravens of Worthington Foods. 1993. June 30. The Chick Patties are replacing the Country Crisps. Worthington introduced 4 new products in April 1993 as extensions of the Morningstar Farms line: Chik Patties, Prime Patties, Deli Franks (which replaces the old Deli Franks), and the Garden Vege Patties. Worthington would like them to be marketed at supermarkets and mainstream grocery stores in the frozen meat case (along with regular chicken patties, fish sticks, etc.) rather than the frozen breakfast section like most of the other Morningstar Farms products. The products are still in test market. Also in April, all other original products in the Morningstar Farms line had their labels redesigned to the new green label except for Scramblers.

Product with Label purchased at Safeway supermarket in Lafayette, California. 1994. May 18. Price: \$2.89. Frozen.

Product with Label (new design) purchased at Safeway supermarket in Lafayette, California. 1995. Aug. 17. Price: \$2.79. Frozen. 4 patties, 10 oz. Blue, white, red, and gold on green. The front pane text reads: “Chik Patties—A meatless alternative to chicken. Made with vegetable & grain protein.” The name “Chik Patties” is written in white letters on a blue band. Soyfoods Center product evaluation. 1995. Aug. 19. 1. Taste/organoleptic: Texture is excellent, flavor is too spicy. Package/label design: Excellent.

2594. **Product Name:** Natural Touch Vege Frank.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1993 April.

**Ingredients:** Wheat gluten, water, natural flavors (paprika, onion powder, garlic powder, salt, autolyzed yeast), corn oil, spices, vegetable gums (carrageenan, gum arabic, xanthan gum), natural hickory smoke flavor.

**Wt/Vol., Packaging, Price:** 12.7 oz (360 gm) plastic wrap.

**How Stored:** Frozen.

**New Product–Documentation:** Ad (full-page, color) with coupon in *Vegetarian Times*. 1993. June. p. 17. “If you’ve ever been burnt by vegetarian franks and burgers, you’ll flip over these.” Talk with Trudy Cravens of Worthington Foods. 1993. June 30. This product was launched in April 1993.

Label sent by Trudy Cravens of Worthington Foods. 1993. July 1.

2595. **Product Name:** Natural Touch Vege Burger.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd.,  
Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1993 April.

**Ingredients:** Textured vegetable protein (wheat gluten, soy protein concentrate and isolate), corn oil, egg whites, calcium caseinate, natural flavors from vegetable sources, corn starch, raisin juice, onion, soy sauce (water, soybeans, sea salt), carob, onion powder, soy lecithin, garlic powder, spices, sea salt.

**How Stored:** Frozen.

2600. Worthington Foods, Inc. 1993. First quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 4 panels each side. Each panel: 22 x 9 cm.

• **Summary:** Net sales increased \$19.6 million, up 13.4% compared with the first quarter last year. Sales increased in all four major product categories. Sales of Morningstar Farms meat alternatives to supermarkets rose 19.1%. Net income rose to \$810,000, up 26.4% compared with the first quarter last year.

“Four new Morningstar Farms meat alternative products (Prime Patties, Deli Franks, Chik Patties and Garden Veg-Patties) began shipping earlier this month into selected test markets. Importantly, these products are located in the meat case sections of the grocery stores and are the first items to be shipped in the new packaging for Morningstar Farms brand products. Four similar products are now being introduced into the natural food market under the Natural Touch brand.

“Phase I of the Zanesville, Ohio production facility is on schedule for completion later this quarter. Initial shipments of refrigerated Better 'n Eggs will begin at that time, enabling the Company to introduce this product to

the remaining 53 percent of the nation's supermarkets. Nationally, nearly all the growth in egg substitute sales for all competitors has taken place in refrigerated products in the past two years.

“On April 21, we announced that the Company has entered into an agreement with Burger King Corporation to test the Morningstar Farms Grillers product in a restaurant unit in Watkins Glen, New York.” Address: Worthington, Ohio. Phone: (614) 885-9511.

2601. Demos, Steve. 1993. New developments at White Wave, Inc. Part I (Interview). *SoyaScan Notes*. May 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** California is White Wave's second largest market after Colorado (especially Boulder and Denver). White Wave was the first company in the Western world to make a wide variety of different types of soyfoods (tofu, soymilk, tempeh, miso products, ice cream, yogurt, etc.). “It has always been my observation that White Wave is primarily in the protein category and only secondarily in the soyfoods category. Tofu has always been the ‘media grabber’ but the fact is that we are selling vegetable protein. We have always seen our great advantage in the field that we are a broad category player, so that we are trying to define the category. By defining the category, we will effectively pull such products as tofu out of their misplacements in produce into where they should be placed and merchandised, i.e. as meatlike or dairylike foods. We know we have four competitors in every product that we make. So if we have 15 products, we may be competing against 40-60 companies, whereas a company that makes only soy cheese will have only 4 competitors. We see that no one else has looked at the market the way we have.

“Very recently we have established with a leading chain in California an opportunity to merchandise soyfoods as a category. We've done this in Boulder before but as a small company with so many products, it has never jelled for us.

“We now have an executive chef, Leonardo Laudisio, working for us. I told him, ‘We're going to borrow your body and name, and make a myth out of you.’ Whatever you have in your mind for the image, his family fits it and looks it. His past is colorful. He has elevated the foods in a very special way. As he said on a TV show recently, ‘Look, forget its tofu. Just put it in with all your other foods and benefit from it.’ Wonderful approach. We've dazzled people with the tastes.

“The two of us just sort of stumbled into one another. He was based in Sausalito where he was manufacturing these veggie burgers sort of in and out of some kitchens. I believe that the man who originated the recipe was in charge of the Whole Foods Markets kitchens in the area. He inherited it by getting involved with that man. He got further involved when his daughters became vegetarians, then vegans. White Wave has become pretty aggressive as an industrial supplier of tofu to other food manufacturers who use it as an ingredient.

I would estimate that we have 85% of the market. That is, about 85% of the products that are nationally distributed and have tofu in them, contain our tofu. This push started a few years ago when we decided not to compete in the entree market and to focus mainly on the fresh foods case. Almost everything we make will go toward dated, long-shelf-life fresh food. So as not to lose the entree market, we decided to position ourselves as a supplier to companies who make vegetarian entrees containing tofu. We agreed not to compete with them, and we offered to develop proprietary formulas and recipes for them. We supply Amy's, Robert & Ken's Pockets, and all the lasagna products (Amy's, Legume). We send these people their tofu in bulk, vacuum packed, with a long shelf life.

"So when we saw the Veggie Life burger in May 1992 and learned it contained 40% tofu, we called up Mr. Laudisio and told him we were interested in selling him tofu. He accepted and we began selling it to him indirectly. His brothers have a very well known restaurant named Laudisio's in Boulder. He came into town for the Boulder Creek Festival. He met with me and asked if White Wave would be interested in making the product. I explained that we were not into contract packaging. (White Wave stopped making such products for Homestyle after they were purchased by Weider Food Co.—which has nothing to do with food or fresh food distribution; Homestyle just died. Both Robert Dolgin and David Burns needed to get out from under debts, so they had to sell the company.)"

The Veggie burger is positioned to compete against the Gardenburger (made by Wholesome & Hearty Foods in Oregon). Brown rice is the main ingredient, followed closely by tofu. Steve acquired the Veggie Life burger for two reasons. First, it was a no-cash deal; it will be paid for on the basis of an earn-out against sales of the product. Second, he was able to hire Leonardo as corporate chef and spokesperson for the company in terms of foodservice sales. On 15 May 1993 the burger hit the market with a new White Wave label that reads: "White Wave Veggie Life Burger." The retail product consists of 2 patties vacuum packed (2.5 oz), and the 3.5 ounce for foodservice. White Wave is starting a merchandising program named the "Chef Leonardo Endorsement Program." White Wave is planning many new product introductions in the next 120 days. They introduced their new meatless and all-vegan hot dog yesterday. It is still called Meatless Healthy Franks (first launched in June 1989), but the texture, color, taste, and fat content have all been improved. Tofu is still the primary ingredient (most competing brands use soy protein isolates) but the product is 96% fat free. White Wave can continue to use the term "Healthy" in their product names since they were using it prior to the new NLEA regulations. The Lemon-Kiwi Yogurt just came out. Now we're developing another burger that has nothing to do with the Veggie Life Burger; it will be made more meatlike, somewhat like the Harvest Burger, sold

frozen and using textured soy protein concentrates, and will probably not contain tofu.

Update. 1993. Dec. 19. The program that was to have involved Leonardo Laudisio did not work out. The concept was good but the personality involved could not be harnessed. He is a fine man but Steve would rather work with a less skilled/talented and highly disciplined individual than with a highly skilled, undisciplined individual. Also many problems developed relating to conflict of interest situations. "He still represents the company as corporate chef, but is definitely a figurehead role. It helps the magic and mystique of White Wave because he is a charismatic individual." Continued. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

2602. *SoyaScan Notes*. 1993. New Trend: Specialized manufacturers of tofu and tempeh become manufacturers of many types of soyfoods (Overview). May 22. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** The first soyfoods manufacturer in America to make a wide variety of different types of soyfoods was White Wave of Boulder, Colorado. They began as a tofu manufacturer in Sept. 1977, but by 1978 had introduced Soy Sannies (sandwiches with miso-tahini spread) and Soymilk (in 3 flavors). In 1979 they launched Soy Tempeh, Polar Bean (a soymilk-based soy ice cream, which they also made from Tofu Today / Tofruzen starting in 1985), Soya Rice Tempeh, Vegetarian Soysage, Tamaried Nuts, and a host of deli-type ready-to-serve tofu products such as Missing Egg Salad, Tofu Cheesecake, Tofu Cinnamon Rolls, etc. In Jan. 1989 White Wave began its move into dairylike products in a big way with Soy A Melt (a soy cheese with casein) followed in May 1991 with White Wave Dairyless (a soy yogurt in 5 flavors and the company's most successful product ever). New flavors of soy yogurt were introduced in 1992 and 1993. Note: White Wave was also the first post-1975 soyfoods company in America to grow by acquiring other companies—Soyfoods Unlimited (a tempeh manufacturer) in Dec. 1986; and Laudisio Veggie Life, a maker of veggie burgers, in March 1993.

Lightlife Foods in Greenfield, Massachusetts (named The Tempeh Works before April 1987) started as a tempeh manufacturer in Sept. 1979. In May 1984 they started to make Weissman's Original Tofu Sausage for John Weissman of the Vegetable Protein Co. In Sept. 1985 they launched Lightlife Meatless Tofu Pups (meatless hot dogs), and in Oct. 1987 they launched Lightlife Party Pups (meatless frankfurters—cocktail size Tofu Pups; Renamed Tofu Party Pups by Feb. 1988). Today Lightlife makes a wide range of tempeh and tofu products.

Sharon's Finest in Santa Rosa, California (named Brightsong Tofu from June 1978 to June 1980; Redwood Valley Soyfoods Unlimited until June 1982; Brightsong Light Foods until June 1987; Rose International until 1990)

started as a tofu manufacturer in June 1978. By Aug. 1980 they were making and selling soymilk. Their diversification began in 1984 with Mix Plus+ (a liquid mix to make tofu frozen desserts) and LeTofu (non-dairy soy ice cream in hard pack and soft serve). Related ice cream products followed. In early 1986 Richard Rose reformulated Soy-O, a soymilk yogurt for Brown Cow West. In May 1986 the company launched Fruit D'Lite (a fruit-sweetened sorbet/mousse liquid soft serve mix) in 4 flavors using isolated soy protein as the soy ingredient. The move into soy cheese began in June 1986 with Mozzarella Style Tofu-Rella (an organic tofu-based cheese analog with casein). In July 1987 the company launched Le Yogurt (a dairy-based soft-serve frozen yogurt dry mix). In Jan. 1992 they launched Heart's D'Lite (a fat-free cheese alternative in various flavors) with organic tofu and casein and tofu as the main ingredients. By 1992 Sharon's Finest was primarily a marketer of soy cheeses; they sold their cheese to many other food companies and even exported them to the UK.

2603. Machlis, Mark. 1993. New developments with seitan and gluten at Ivy Foods (Interview). *SoyaScan Notes*. May 24. Conducted by William Shurtleff of Soyfoods Center.

- **Summary:** His company now has national distribution via 28 natural- and health food distributors. Since Jan. 1993 the company has been making a profit. Ivy Foods still does about \$4,000/month in mail order business, but he is now encouraging his customers to buy from their local retail store, but many consumers who live in rural areas have no retailer nearby. Ivy Foods now sells about \$40,000 to \$50,000 a month of gluten products, so the mail order business is only about 10% of the total. He plans to continue the mail order service, and the company now has a toll-free number for mail order: 1-800-280-1313. His most popular mail order products are the 5-pack sampler (which gives you one pound of each product) and the 10-pack. So the minimum order would be \$30.00 (Five 1-lb 5 packs x \$5.95/lb including air shipping and handling). He makes more money selling direct by mail order, but he wants to support his retailers who do 9 times as much volume.

All of his retail products are frozen. To ship frozen products by mail he uses Airborne Express second day air, with the products packed in an insulated foam box (without any dry ice). The shipping cost is about \$1.00/lb. The total cost of the product, delivered to the consumer's door, is \$6.00/lb versus \$4.40 to \$5.39 at retail stores. If the customer sends the insulated box back to Ivy foods, he or she gets a free pound of product next time. The cost to ship back the box via the post office is about \$2.90. Quite a few people ship back (recycle) the foam boxes.

His two flavored dry mix products (Meat of Wheat Chicken Style, and Sausage Style, which were introduced in about May 1993) are also sold by Bob and Cindy Holzapfel of The Book Publishing Co. in Tennessee in their Mail Order

Catalog. To make these products the homemaker just adds water, kneads it, keep it in a roasting bag, then steam it.

In June Ivy Foods will run its first ad (in *Vegetarian Times*) aimed at getting consumers to buy the company's products in retail stores. In the past he has been running mail order ads. *Vegetarian Times* is the only periodical in which an ad pays for itself; a typical ad of his in *Vegetarian Times* will generate 400 calls per month.

A direction for Ivy Foods will be to sell to food manufacturers for use as an ingredient in their food products. He plans to sell to Gary Barat of Legume. In about Sept. 1992 Barat bought part of Heart and Soul; the former owner, Andy Harrison, ran into financial problems. Barat is now buying Ivy Foods' Chicken Style; he plans to come out with a meatless chicken salad and several entrees.

His latest product is a prepared Chicken Chili. He no longer has a policy of donating a certain percentage of his profits to a worthy cause. He ended up pouring nearly \$500,000 into the company during its first 2 years in business, mostly just to keep the company alive.

John Marsh (not sure of his last name), Andrew Harrison's old partner, is one of Mark's competitors. He used to be the manufacturer for Heart & Soul, with Andy Harrison in charge of marketing. John ended up leaving and starting his own company in California, which left Andy without a product. At the last Natural Foods Merchandiser trade show (Feb. 1993 at Anaheim) John introduced a sliced deli meat similar to that formerly under the Heart & Soul brand. John Belleme is not a major competitor because his prices are higher in retail stores. Ivy Foods' biggest markets are on the East Coast and in Texas. Ivy Foods does not make traditional seitan; he pre-flavors his dough before his products are steamed (not boiled in a broth). Three years ago at the Anaheim trade show he learned the key secret to financial success from some people from Worthington Foods, who came to him and said: "Don't think about rinsing your own gluten." Use vital wheat gluten. Address: Office: Ivy Foods, 7613 S. Prospector Dr., Salt Lake City, Utah 84121. Phone: 801-943-7664.

2604. **Product Name:** Lean Bean Original Flavor Burger, Mean Bean Chili Burger.

**Manufacturer's Name:** Garden Valley Foods Corporation.

**Manufacturer's Address:** P.O. Box G, Sutherlin, Oregon.

**Date of Introduction:** 1993 May.

**Ingredients:** Blackeyed, baby lima beans, red beans, rolled oats, TVP, wheat gluten, hydrolyzed oat flour, onions, green bell peppers, garlic powder, salt, parsley, black pepper.

**Wt/Vol., Packaging, Price:** 3.2 oz.

**How Stored:** Refrigerated.

**New Product-Documentation:** Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. "Garden Valley News. Dateline May 1st 1993." These two products

were “born” on 1 May 1993.

**2605. Product Name:** Meat of Wheat Chicken Style, or Sausage Style (Dry Mixes).

**Manufacturer’s Name:** Ivy Foods.

**Manufacturer’s Address:** Office: 7613 S. Prospector Dr., Salt Lake City, UT 84121. Phone: 801-943-7664. Fax: 801-943-7311.

**Date of Introduction:** 1993 May.

**How Stored:** Shelf stable.

**New Product–Documentation:** Talk with Mark Machlis of Ivy Foods. 1993. May 24. His two flavored dry mix products (Meat of Wheat Chicken Style, and Sausage Style, which were introduced in about May 1993) are also sold by Bob and Cynthia Holzapfel of The Book Publishing Co. in Tennessee in their Mail Order Catalog. To make these products the homemaker just adds water, kneads it, keep it in a roasting bag, then steam it.

**2606. Natural Foods Merchandiser.** 1993. White Wave purchases Veggie Life. May. p. 6.

• **Summary:** In March, White Wave, a soyfoods manufacturer in Boulder, Colorado, acquired the rights to manufacture Veggie Life vegetarian burgers from Laudisio Veggie Life, also based in Boulder, for an undisclosed sum. White Wave president Steve Demos said he liked the product, and felt it would be a good complement to his line. His company didn’t have a vegetarian burger and he felt he could increase its distribution dramatically. “Laudisio president Leonard Laudisio has been retained by White Wave as corporate chef to market the tofu company’s products to food service providers.”

**2607. Ornish, Dean.** 1993. Eat more, weigh less: Dr. Dean Ornish’s Life Choice Program for losing weight safely while eating abundantly. New York, NY: HarperCollins. xv + 425 p. Index. 25 cm. [300+\* ref]

• **Summary:** This outstanding book contains the basic principles of how to lose weight (the low-fat way), with recipes by a host of great chefs. It also combines weight loss and reduction of coronary risk. By America’s leading cardiologist who specializes in prevention of cardiovascular disease.

Soy-related recipes: How to cook whole soybeans (p. 98). Miso soup (p. 183-84). Baked tofu cutlets (p. 193-94). Scrambled Mexican tofu (p. 196-97). Tofu with black bean sauce (with “1 teaspoon Chinese black beans

[fermented black soybeans], lightly crushed,” p. 203-04). Tofu stew with sweet potatoes (p. 209-10). Tofu gumbo (p. 211). Spice-dusted tofu “steaks” with vegetable gratin (p. 234-35). Pasta Cardozo (with “1 cup texturized vegetable protein chunks {p. 94},” p. 269-70). Pasta with tofu, corn and saffron (p. 282-83). Tofu and miso dressing (p. 316-17). Address: M.D., Preventive Medicine Research Inst., Sausalito, California 33658. Phone: 415-332-2525.

**2608. Product Name:** Seitan: Traditionally Seasoned Wheat Gluten.

**Manufacturer’s Name:** White Wave, Inc.

**Manufacturer’s Address:** 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

**Date of Introduction:** 1993 May.

**Wt/Vol., Packaging, Price:** 8 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Lon Stromnes. 1993. Feb. 9. This product will be launched at the Natural Products West Expo in Anaheim this month. The name has

not yet been determined. White Wave aims to be a major nationwide player in the seitan industry. The product will be introduced packaged in a tofu tub, with a broth and a beautiful label. White Wave will make the seitan itself in Boulder. They will start with one flavor, then expand the line into meatless seitan pork chops, burgers, etc.

Talk with Lon Stromnes. 1993. April 14. A mock-up of this product appeared at the Anaheim show, but the product will probably not be on the market until about mid-May. Label brought by Steve Demos of White Wave. 1993. July 31. 4½ by 5¼ inches. Green, dark blue, brown, and white on turquoise. Illustration of an open-sided Japanese hut in front of a green mountain, with a moon in the upper left corner. "Sauté with ginger and tamari."

Ad (1/8 page, black-and-white) in *Natural Foods Merchandiser*. 1993. Oct. p. 22. "Devilishly good." At the bottom of the ad is a line that reads: "Traditionally seasoned 'Wheat Meat.'" In the lower right hand corner is a Vegan certification symbol and a Star K kosher sign.

Leaflet (glossy color, front and back, 15.2 x 21.7 cm). 1999. Aug. "Our new seitan package is looking better than ever! With new packaging for both our Traditional Seitan and Vegetarian Stir Fry Strips, we've made them easier to stock at the shelf and easier for customers to recognize." Color photos on the front panel (against a purple background) show the old and new packaging for both products. Seitan used to be packaged in a tub, like tofu. Vegetarian Stir Fry Strips used to be named Vegetarian Fajita Strips and vacuum packed in a tub.

**2609. Product Name:** Veggie Life Burger.

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

**Date of Introduction:** 1993 May.

**Ingredients:** Cooked rice (brown rice, water), organic\* tofu (water, soybeans, gypsum, nigari (magnesium chloride)), wheat gluten, soy sauce (water, soybeans\*, whole wheat, salt), green peppers, mushrooms, onions, carrots, sunflower seeds, oat flour, sesame seeds, granulated garlic. \* = Soybeans grown and processed in accordance with the California Organic Foods Act of 1990.

**Wt/Vol., Packaging, Price:** 3.5 oz. (142 gm) vacuum pack.

**How Stored:** Refrigerated or frozen.

**Nutrition:** Per 71 gm. patty: Calories 110, protein 5 gm, carbohydrate 16 gm, fat 3 gm, cholesterol 0 mg, sodium 210 mg.

**New Product-Documentation:** Talk with Steve Demos, president of White Wave. 1993. May 22. On 15 May 1993 the burger hit the market with a new White Wave label that reads: "White Wave Veggie Life Burger." The retail product consists of 2 patties vacuum packed (2.5 oz each), and the 3.5 ounce for foodservice.

Label sent by Leonardo Laudisio. 1993. June 15. 4 by

4.5 inches. Self adhesive. Red, black, orange, yellow, blue and white. "No meat. No eggs. No dairy."

Leaflet (single sided, green ink on yellow paper) sent by Leonardo Laudisio. 1993. June 15. "Veggie Life Burger. A healthy vegan alternative."

Leaflet (black and white, single sided, 28 cm) sent by White Wave. 1993. June 22. "White Wave Veggie Life Burger: Food service information. Pack: 48 / 3.5 oz. burgers. Ship weight: 11.0 lbs. Price: \$24.000 / case FOB Boulder, CO. Shelf life: 18 days refrigerated; 1 year frozen. Shipping: Frozen. Case dimensions. Case cube: .321. U.P.C. Kosher: Yes (Star K). Available: May 10. Then gives detailed nutritional information. Vegetarian cuisine company launches new Prime Burger, Chick'n Burger, and the new Veggie Life Burger."

Label sent by Paul Chasnoff of White Wave. 1996. May 2. 5.5 by 4 by ¾ inch. Paperboard sleeve. Dark green, green, brown, tan, and beige. Color photo of the burger on a little lettuce, topped with a sliced pickles, relish, and a bun. The product name is now: "VeggieLife: Seasoned Grain & Vegetable Patty." The ingredients in this product are very similar to those in the original May 1993 product, except that the tofu is organic. The weight is now 6 ounces instead of 5. "Cholesterol free."

**2610. Product Name:** GardenMexi, and GardenVeggie (Meatless Patties).

**Manufacturer's Name:** Wholesome & Hearty Foods.

**Manufacturer's Address:** 1416 S.E. 8th St., Portland, OR 97214. Phone: 503-238-0109.

**Date of Introduction:** 1993 May.

**Wt/Vol., Packaging, Price:** Two patties per 5-oz box.

**How Stored:** Frozen.

**New Product–Documentation:** Product Alert. 1993. May 3. Both products contain no meat, eggs, or soybeans.

2611. Laudisio, Leonardo. 1993. Biography and history of work with soyfoods, vegetarianism, and macrobiotics (Interview). *SoyaScan Notes*. June 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Laudisio is an Italian name but it is rare; based on the Latin “Laud” meaning to praise. His grandparents (his mother’s parents) immigrated to the USA in the early 1890s from Italy on a sailing ship. He had some cousins in Brooklyn, New York. When they went to Ellis Island they failed to recognize him, so they put him back on the boat and shipped him back to Italy. He had a little bakery in a little town called Vietri Sul Mare (which means “view of the sea”), a little north of Salerno, at the beginning of the Amalfi drive (going south). His grandfather returned to the USA (successfully this time) and started a small bakery under the Brooklyn bridge, making *galletta* (twice baked)—which the English call “hardtack.” They worked in Italian food and stayed deeply immersed in the Italian community. His grandfather later moved his bakery right above Redhook on 4th Ave. in Brooklyn. Leonardo was born on 2nd St. in Brooklyn in 1938.

His father’s parents immigrated to the USA separately.

His family was always poor (they had little money), so they ate meat or fish, eggs or dairy only on special occasions and in small amounts as on Sunday or Friday. They ate a lot of pasta, bread and beans. He grew up on Neapolitan cookery. His father (who immigrated to the USA independently of Leonardo’s grandfather) came from a restaurant background and owned several restaurants; his uncles were chefs on Italian cruise liners in the early 1900s. In the early days Leonard’s father made Mozzarella cheese and other food products—with his uncle. His father comes from a farming village at the foot of Mt. Vesuvius in Naples. So both families come from southern Italy around Naples.

Leonardo started working in his parents’ restaurant, Agostino, in Miami as soon as he could stand at the dish-washing sink. His father passed away when he was about 14 (1952). He supported himself (he and his 3 brothers, a sister and their mother owned a restaurant) as a chef in Miami all through high school and college. His brother developed the restaurant, Raimondo, into a famous restaurant in south Florida. In 1959 he and his brothers closed the restaurant went to Cuba to see Fidel Castro. In 1961 they again closed the restaurant and traveled around Europe in a Volkswagen bus. Eventually the family had 2 restaurants. The Agostino was run by his mother with his eldest brother; his next to oldest brother, Raimondo, who is 60 now, went to Europe, studied in Rome, got into fancier northern Italian cooking, and in 1965 he returned to the USA and opened his own

restaurant Raimondo in Florida.

In 1963 Leonardo graduated from the University of Miami with a B.A. in philosophy. In 1964 he left the USA and went to Europe to avoid the Vietnam war; he did a lot of his post-graduate work during 3 years in Europe, in Italy and Spain, where he worked as a sandal maker to support himself. He returned to the USA after he was too old to get drafted and in 1967 got his MA in philosophy from the University of Miami. Leonardo was always kind of the black sheep of the family.

In about 1965, while in Spain, Leonardo became macrobiotic together with a friend of his from Berkeley named Robert Richheimer (who was on the coordinating committee of the Free Speech Movement and had set up an alternative living scene in Spain). Leonardo, with his girlfriend (whom he met in London), went to visit him. He was living next to a French macrobiotic chef named Bernard, who was very close to George Ohsawa and who opened a macrobiotic hotel, restaurant and night club named Javea overlooking the Mediterranean between Alicante and Valencia—1 mile from the seacoast. Bernard proceeded to build a house and to start a macrobiotic school. George Ohsawa came to see the house but he never actually lived there. They had to drive to France to get brown rice. When they had leftover rice, they would make “rice cakes,” by shaping the rice and leftovers into patties, adding tamari and gomashio, then baking them. They were “heavenly.” He thought of starting a company selling them—in an era when most people had never heard of brown rice. Another of his famous foods was a bowl of brown rice with gomashio.

Leonardo was living an alternative lifestyle and eating alternative foods. Doing that in Spain at that time was pretty strange. But he began to take vegetarianism as part of his own philosophy. He and his girlfriend lived together for 2 years before they got married—in Coconut Grove, Miami on 22 Jan. 1967; they have been married for 28 years. He got his MA degree at the end of the year he got married. After earning his MA degree, he and his wife returned to Europe and lived mostly in Spain for 9 years (he was a sandal maker, collecting antiques; their 2 children—both daughters—were born in Spain) until 1977, when they returned to the USA, locating in Boulder, Colorado; there he helped a friend open a restaurant named John’s. He also attended the Naropa Institute and worked to give his two daughters an American identity. Rain, his oldest, is 22, and China Moon is 19.

In 1978 he bought an acre of land in Boulder, spent several years building houses, like an intentional community. He still was not yet in the restaurant business.

In 1981 he and his family moved to Marin (San Anselmo), where he worked for a film caterer (Chef Cornelius, catering for people who were making films) for a while, then, with his younger brother, bought Marin Fish and Poultry in San Anselmo that sold (but did not raise) fish and poultry. He did that for a year.

They were not ready to settle down so they (and his brother) returned to Europe, on a 70-foot sail boat, sailing the whole way. They lived on the boat in Europe, where they lived in Italy for 5 years. They put their kids in school in Florence for a year, then 2 years in Rome. When he returned to the USA he and his brother were arrested and they each served 2 years (about 1987-90) in jail in Lompoc, and each worked as an institutional cook while doing good time. That's when he really became a vegetarian, seeing the quality of meat that is sent to jails. He got out at age 49-50 and had a very hard time getting re-established. Both his daughters had become vegetarians by this time—Rain in 1979 and China Moon in 1987. They became vegans in 1988-89. In 1990 Leonardo got back into film catering. Also in 1990 he bought a “hot truck,” a catering kitchen truck and he began to do more and more vegetarian cooking and catering. By 1991 he was a full-blown vegetarian caterer.

He met a chef named Steve McClaine (age 32 and a chef at Millie's in San Rafael). He took his daughter, China Moon, there when she graduated from high school in Redwood City because Millie's served vegan dinners including desserts. At the time he was selling Wildwood's vegetarian tofu burgers at street fairs, the flea markets in Marin, San Rafael Farmers' Market, etc. Steve introduced Leonardo to using tofu, seitan, and tempeh in veggie burgers and other foods. Steve offered to give Leonardo a recipe he and friends on in the Boston area had developed for veggie burgers. Leonardo started making 1,000 a month but he added a significant amount of brown rice. The recipe changed a dozen times when Leonardo was involved with Steve. Leonardo had to mortgage his house, because he was spending all his time making, demoing and selling veggie (actually vegan) burgers. It became an obsession that lasted for about 2 years. His wife and daughters would travel with him during the summers, up and down the Pacific Coast. At some point he and Steve McClaine started a company, McLaud Partnership—a combination of their names. Leonardo went to a lawyer, spent \$1,000, but it never was official. Steve went back and forth, but never signed the papers. Continued. Address: c/o White Wave, Boulder, Colorado.

2612. Laudisio, Leonardo. 1993. Biography and history of work with soyfoods, vegetarianism, and macrobiotics (Interview) (Continued—Document Part II). *SoyaScan Notes*. June 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: So Steve and Leonardo worked together informally but actually. Initially the product was called simply Veggie Burgers. Starting in 1991 they had one stationary location that they rented—The Kitchens, Inc. in San Rafael, Kitchens Inc., an institutional communal kitchen in San Rafael. The name “Veggie Life” came about because Leonardo was on a list of alternative caterers for Bill Graham Performances. He worked at times with Graham.

After Graham's death on 25 Oct. 1991 in a helicopter crash accident in California, Leonardo was invited to cater the memorial service; he donated veggie burgers at the Polo Grounds. That was when he came up with the name “Veggie Life.” It took him years to develop the label, but on the early ones, photocopied at Kinkos, the address was given as The Kitchens, Inc. in San Rafael.

In Oct. 1991 Leonardo flew to Boulder with 1,000 of his veggie burger in two big Igloo coolers. He served them on the mall at an Oktoberfest festival.

In earlier days Leonardo had purchased shares in Alfalfa's market in Boulder. So he knew some influential people who were now high up in the natural foods industry. In Sept. or Oct. 1992 he sat down with Mark Retzliff and Paul Repetto and served them his veggie burgers, Italian style. He never served a regular American hamburger-type veggie burger. He always made them special, with special sauces and delicious toppings and maybe no buns. The burger was always the base. Retzliff and Repetto were so taken with these various veggie burgers they told him he was in the wrong business. “You have no business manufacturing these things. Manufacturing is just one small step in the whole process. You've got to market them! That's where the money is. You're a perfect candidate to market these veggie burgers. Plus you've got this fabulous, famous Laudisio Ristorante Italiano restaurant in Boulder that can only help you.” Mark said, “I've got a great friend in town named Steve Demos. He'll make these veggie burgers for you. I think he's looking to branch out and he private labels other products. Moreover, you can buy your tofu from him, probably cheaper than you could buy it in California.”

So Leonardo called Steve Demos and then went to meet him at the White Wave plant. Demos said he would sell him tofu for \$0.10 a pound less than what he was paying Wildwood—if he would buy roughly 1,000 lb at a time. Leonardo asked Steve if White Wave would make the veggie burgers for him. He said, “Not yet.” From that time on, Leonardo started buying the tofu for his veggie burgers from White Wave. Before long he was buying 800 to 900 lb of tofu every 2 weeks.

He flew to Boulder more than once. He also did street fairs. That is when his brother, Antonio, started to get turned on by the whole idea of these meatless burgers. Antonio put them on the menu of his restaurant and did specials with them.

In Aug. 1992 Leonardo realized he was not making enough money from his veggie burgers. With his younger brother, he had owned part of an Italian restaurant named Laudisio in Boulder, Colorado. His brother suggested that Leonardo drive his truck to Boulder (where there were lots of vegetarians). They would make the veggie burgers at the restaurant and Leonardo could work in the restaurant. His brother had financial backing to start a new restaurant, the Mediterranean. So in Aug. 1992 Leonardo drove his truck to

Boulder to start anew. Steve, who was very reluctant to take on any risk, eventually became the deli manager for the new Whole Foods Market in Mill Valley. But Leonardo had real faith in his veggie burgers. In 99% of the times when there was a competition or comparison, his would win.

In June 1992 Leonardo sold his veggie burgers at a “Creek Festival” in Boulder. Repetto and Retzloff suggested again that he talk with Demos again. So he asked Steve Demos again if he would be willing to make Laudisio Veggie Life burgers under contract. This time Steve said, “Let me look at the recipe, see how difficult it will be, then I will give you an answer.” From August 1991 to Jan. 1992 we worked on the recipe in Boulder and changed it. Leonardo was still making the burgers in California. Then late one night he got a call from California; one of his workers had put his hand too far into a machine and sliced off the tip of a finger. Leonardo had no workman’s compensation insurance. He knew he could lose his house. So he now had much more incentive to make things work with White Wave. But he had taken on a big new responsibility—for 6 months—as the project manager for development of the Mediterranean restaurant with his brother in Boulder. He has lots of energy and can work hard for long hours every day. Before long White Wave was making the burgers.

The next phase came in early 1992 at the time of the Natural Products Expo at Anaheim, California. White Wave had finally made the first run of acceptable veggie burgers. Leonardo told Steve he would like to attend the trade show at Anaheim because he wanted to start building national accounts; he would pay his own way and his own hotel but he wanted to work out of the White Wave booth. Steve said, “If you come, I want to be sure you are representing White Wave. I don’t want you to be pushing Veggie Life Burgers.” Leonardo agreed and replied. “I want to see how you run your business.” Leonardo flew out to the show with Lonnie Stromnes. He showed up at the booth in bright baggy pants, long hair, handlebar mustache, wearing strange glasses. Really colorful. He speaks fairly good French, Italian, and Spanish. So he ended up selling plenty of White Wave products—and forgot all about the Veggie Life Burger. Leonardo met a lot of people he knew well from his years of work in the field. Steve wasn’t there the first two days of the show. Pat (Steve’s partner) and Lonnie told Steve that Leonardo was doing an incredible job. He was a natural salesman. “We’ve got to see if we can get him into our company.” On the third day Steve asked Leonardo to accompany him to the produce show in San Diego. He said, “I’ll pay your way down. I know what you can do in front of vegetarians but I want to see how you handle yourself with guys who sell produce and drive trucks and have never heard of tofu.”

Leonardo greatly enjoyed working at the show in San Diego. Steve congratulated him on a fine job, then said. “I know you are a budding entrepreneur. But for you to get

to where I am, is gonna take you years and a lot of money. So I want to make you an offer. I’ll buy your company. I’ll give you royalties on the product. I want you to head up a nationwide foodservice division of White Wave and sell these esoteric products to mass market using your experience in the restaurant and the restaurant’s reputation. Please think it over.” He laid out a plan in broad strokes. Leonardo liked the idea, so he suggested to Steve that they work out the price and royalties together. “I have never worked for anyone before and I didn’t want to work for you. Just give me more of a commission. I’ll take an advance on my commission. In 6 months if it doesn’t work, I’ll give you the money back.” He said, “No, I’ll take that gamble.” Leonardo does a lot of his selling in the two family restaurants. It is the ideal setting. Television shows came in and loved the vegetarian dishes Leonardo had developed. It was a huge success. Steve Demos picked up on the idea. He said, “I want to register the trademark ‘Chef Leonardo’ and work on a program where ‘Chef Leonardo’ becomes associated with White Wave, so that White Wave not only has a corporate chef but also has a whole program of recipes that have been taste-tested in restaurants so we can play this up. We’ll be the only company that has this right now.”

30% of the menu at the Mediterranean Restaurant in Boulder is now vegetarian.

Now Leonardo travels to all kinds of foodservice organizations (restaurants, hospitals, college, university and corporate dining rooms) and makes presentations with recipes, products, nutritional facts, taste tests and prices. He knows how these people think and what their problems are. He also knows that 25% of their clients are clamoring for vegetarian food and that they’re in a bind. “The growth in this industry is mainstream and foodservice.” Address: c/o White Wave, Boulder, Colorado.

2613. Weiner, Michael. 1993. New developments with Amano and Yamashita (Interview). *SoyaScan Notes*. June 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Michael works as a consultant for Peter Joe of Sunrise Market Ltd. and with Amano Foods. He used to consult with Mandarin Enterprises in British Columbia. Now his main work is as a broker, representing various U.S. companies such as Vitasoy, Knudsen, Santa Cruz, etc. Amano still makes all of Westbrae’s organic miso. Amano is trying to construct a 60,000 square foot plant. They had a joint venture with Yamashita but it fell apart. Now Yamashita is constructing their own 60,000 square foot soy sauce plant in Oregon. The ground breaking will take place in a couple of weeks. Michael does not feel that this will be much of a threat to Amano, which plans to sell a lot of Amano products in supermarkets. The market is big and growing rapidly. Soyfoods now are given large amounts of shelf space (8-16 linear feet) in the produce section of all supermarkets in western Canada (British Columbia, Alberta, and Manitoba).

A major reason for this is that Mandarin and Sunrise have an excellent relationship with the people in charge of the produce section in western Canadian supermarkets. Initially Michael helped to establish some of these relationships; these companies got a few facings for their tofu. Then Mandarin added their tofu burgers. Then Sunrise added Yves Wieners and soy cheese. The products sold, which is proof that exposure will work. Michael was involved in trying to make the same thing happen in Ontario with the Loblaws chain, and in Quebec, but they were never allowed to give the program a try—not even in 1-2 stores.

Safeway supermarkets are so sold on soyfoods that they have developed special open-front, vertical, refrigerated “Tofu Products” cases that are placed adjacent to the produce case, but have a lower temperature. They are quite large and contain everything from soy drinks to tofu, soy cheese to meatless hot dogs. Soyfoods are very widely available on Vancouver Island.

Sunrise and Michael jointly import Mori-Nu tofu into Canada from Japan. Also Sunrise distributes some juice products for which Michael is the broker. Mori-Nu does not sell well in supermarkets because it’s retail price is too high. Address: President, New Age Marketing, P.O. Box 39590, White Rock, BC, V4A 9P3, Canada. Phone: 604-538-0127.

2614. Leiss, Richard S. 1993. History of the use of spun soy protein fibers at Worthington Foods (Interview). *SoyaScan Notes*. June 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Richard (whose last name is pronounced like “lease,” as in “to lease a house”) has worked for Worthington Foods in R&D for 28 years, from Aug. 1962 to 1968, then from 1971 to the present. He thinks that small amounts of the first commercial Worthington product to contain spun soy protein fibers were probably sold by late 1962 and definitely by 1963. These meatlike products were probably frozen at first, and then canned later. The first such product may have been the Minute Entree Fried Chicken Style in frozen form. Fri-Chik, which was canned and widely sold to Seventh-day Adventist food outlets, came a little later. The next 3 products that contained spun fibers (White-Chik, Beef Like, and Prosage) were all frozen and were introduced at about the same time (by Oct. 1963), but many Adventist food outlets did not have a frozen food case in those days so Worthington had to supply them with one. Following these, some additional products were made under the Worthington label, including Smoked Beef Style, Wham.

“When I first came to Worthington in 1962 there was a small R&D lab attached to the main food processing building; we didn’t have a research facility like we have now. I recall that a new R&D building was completed in October 1964. Prior to Oct. 1964, I recall seeing a Fried Chicken Style product, containing spun fibers, being canned. After Oct. 1964 time, we began to spin our own soy protein for the

first time using a pilot plant line in this building. Full-scale spinning of Worthington’s Fibroprotein soy fibers probably began in about 1965. Prior to that time my recollection is that Worthington purchased most of its spun protein from Ralston Purina Co.; it was manufactured in their Louisville [Kentucky] plant. But Worthington also purchased some spun soy fiber from General Mills; it was made at their James Ford Bell Research Center and was very experimental. I don’t recall the name of that product.

“In the early 1960s, about 95% of Worthington’s sales were through either the church or through stores in communities where there were heavy concentrations of Adventists. So it really wasn’t a very big thing. One very big thing for the company was the first IFT meeting it attended in Kansas City [Missouri] in about 1963 or 1964. It was the first time that Worthington had demonstrated products at a national convention, and there was a lot of interest in these products.

In 1974 the first 3 Morningstar Farms products were introduced: Breakfast Patties, Breakfast Links, and Breakfast Slices. He is quite sure that initially they all contained spun soy protein fibers. However several years after they were launched, the decision was made to remove the spun soy fibers for two main reasons: (1) Making the fibers was an expensive, high-tech process which added too much to the price of each product; (2) Worthington was concerned that if, as anticipated, the Morningstar Farms line became very popular in mainstream national markets, their one spinning line would not be able to produce enough fibers to meet the demand. The “wet spun fiber” was replaced by textured soy concentrates and vital wheat gluten to give similar textures. In 1979 four more Morningstar Farms products were launched: Grillers (meatless burgers), Breakfast Strips (meatless bacon), Luncheon Slices (a new version of the 1974 Breakfast Slices), and Leanies (meatless hot dogs). None of these 4 products contained spun soy protein fibers. Thus, for most of their commercial lives, the Morningstar Farms products have not contained spun soy protein fibers.

Worthington has always had only one line for spinning soy protein fibers—located at their plant in Worthington, Ohio. This line was set it so that a second spinning table could be added to increase its capacity, but that has never been done. Even during the years when the company had a second plant at Schaumburg, Illinois (after Miles Laboratories took over Worthington in 1970), that plant never had its own spinning line.

At one point Worthington sold its Fibroprotein spun soy protein fiber to an Adventist company outside the USA. Worthington never sold it to Loma Linda Foods. Initially Loma Linda may have purchased it from Ralston Purina or General Mills; then they got their own spinning line later, in the 1970s; they bought the equipment from Dawson Mills.

Concerning the total amount of spun soy protein fiber used in Worthington food products, it increased rapidly from

1965 to about 1975, then it fell somewhat after the first three Morningstar Farms products were reformulated in the mid-1970s—but it did not fall dramatically because the 3 products were still at the introductory stage. After the amount then stabilized, and remained fairly constant until recent years when the demand for vegetarian products has increased, and with it production of spun soy protein fibers. Today, about 15-20% of Worthington's meat alternatives contain spun soy protein fibers.

In Richard's opinion, the legacy that Henry Ford and his researchers left in terms of food uses of soybeans is mainly in the areas of soy protein isolates (especially functional isolates; the work done by Frank Calvert and Bob Boyer at Ralston Purina) and textured soy flour (the work done by William Atkinson at ADM). While spinning was certainly the most novel of the technologies, spun soy protein fibers are not nearly as important commercially as food-grade isolates and textured soy flour.

Richard remembers fondly the pioneering days when Bob Boyer had a lab next to his office at Worthington Foods. Boyer told Richard many anecdotes about the times he worked for Henry Ford and Richard wrote them down in his journal. "Bob Boyer was truly a gentleman. I really enjoyed him a lot."

Richard does not recall any commercial product containing spun soy protein fibers that Ralston Purina launched during that time. They sold all their spun fibers as such to Worthington Foods.

"I'm kind of the keeper of the archives and unfortunately a lot of material has gotten out because during the years that Worthington was owned by Miles Laboratories past history was not considered to be very important." Perhaps a record might have appeared in the *Chopletter* (an internal newsletter published by Worthington Foods). Address: Director, R&D, Worthington Foods, 900 Proprietors Rd., Worthington, Ohio 43085-3194. Phone: 614-885-9511.

2615. Clifford, Mary. 1993. Meat substitutes—from a mostly meat-eating point of view. *Vegetarian Voice* (Dolgeville, New York). June. p. 14-15.

• **Summary:** Describes and evaluates 4 canned products, 3 dry mixes, and 5 frozen or refrigerated products. Address: R.D., Roanoke, Virginia.

2616. Laudisio, Leonardo. 1993. Satisfy your vegetarian customers, and make money too! Boulder, Colorado: White Wave, Inc. 9 p. 28 cm. Unbound. Stapled in upper left corner.

• **Summary:** Contents: Introduction to White Wave, which manufactures over 30 different products. Brief biography of Laudisio, age 54. Ingredient listings for a sampling of six of White Wave products. Ingredient listings and cost analysis for six institutional-size vegetarian (actually vegan) recipes, taste-tested and cost analyzed per portion, that use White Wave products, developed by Laudisio and used at

Boulder restaurants in which he is a part owner: Meatless pepper steak sandwich. Vegetarian chile dog. Veggie Life burgers with sauteed peppers and onions. Yogurt pie. Polenta Boulder. Soy a melt pizza (cholesterol free). Address: Corporate Chef, White Wave, Inc., 1990 N. 57th Ct., Boulder, Colorado 80301. Phone: (303) 443-3470.

2617. **Product Name:** Blue Mountain Country Farm Tempeh, and Tempeh Burgers.

**Manufacturer's Name:** Naturama.

**Manufacturer's Address:** 84 Kloof St., Gardens, Cape Town 8000, South Africa.

**Date of Introduction:** 1993 June.

**Ingredients:** Tempeh: soybeans, tempeh starter. Burgers: Soybeans, tempeh starter, tamari, 100% pure apple juice, virgin olive oil.

**Wt/Vol., Packaging, Price:** Tempeh: 300 gm. Tempeh Burgers: 200 gm.

**How Stored:** Frozen.

**New Product—Documentation:** Letter from Michael Tidd, founder and owner of Naturama. 1993. July 25. "I have just begun a small-scale tempeh shop here in South Africa and I am just about to start some Amazake experiments." By using your "Book of Tempeh" "I have been able to start selling tempeh and tempeh burgers on the local market with increasing success." Letter and Labels sent by Michael Tidd. 1993. Aug. 12. He began producing tempeh and tempeh burgers on 28 June 1993. Concerning soyfoods companies in South Africa, "there are only a couple of home kitchen size tofu makers in so far as I can see whom I shall try to locate so as to send you their particulars. I think due to various reasons the wholefood movement has definitely been slow off the mark here compared to the U.S. and Europe, but nonetheless its only a matter of time before it spirals upwards."

Both tempeh Labels. 3.75 by 5.5 inches. Black ink on white paper (photocopied). Tempeh serving suggestion: "Indonesian Fried Tempeh: Thaw tempeh, soak pieces of fresh tempeh in brine (4 tsp. salt in 4 cups water) for 20 minutes. Pan fry in oil or margarine or deep fry till golden brown. Try it topped with sauce, baked on pizza or in sandwiches."

Tempeh burgers serving suggestion: "Thaw burgers then either pan fry for 3-4 minutes each side or grill for 2 minutes each side. Serve in a wheat-free roll with lettuce, tomato, and pickle."

Letter from Michael Tidd. 1994. Nov. 11. He "lived for a couple of years in South Africa until April 1994." He sold his business, Country Farm Foods, which was making tempeh and amazake in South Africa, to Bobby McLean, and he is now living in Reading, England. "I am about to have a go here in England."

Talk with Michael Tidd, who calls from Reading, England. He will soon start making and selling tempeh as

Tidd's Tempeh.

2618. **Product Name:** Greengrow 2 Vegetarian Burgers [Mild Curry M2].

**Manufacturer's Name:** Nesselbury Manufacturing Ltd.

**Manufacturer's Address:** 26 Woodlawn Park Ave., Firhouse, Dublin 24, Ireland. Phone: (01) 524384.

**Date of Introduction:** 1993 June.

**Ingredients:** Fresh vegetables, herbs, spices, okara (soya beans), vegetable oil, brown rice flour, brown rice, salt.

**Wt/Vol., Packaging, Price:** 200 gm paperboard box– Vacuum packed. Retail for £1.09.

**New Product–Documentation:** Label sent by Anthony Marrese. 1994. May. 4.5 by 4.5 by 1.25 inches. Paperboard box. Green, brown, and black on white. “Heat and eat. Free from artificial additives and preservatives. High in fibre. Low in fat.” Best before 8 June 1993.

2619. **Product Name:** Greengrow Vegetarian Soyasage (Skinless / Low Fat).

**Manufacturer's Name:** Nesselbury Manufacturing Ltd.

**Manufacturer's Address:** 26 Woodlawn Park Ave., Firhouse, Dublin 24, Ireland. Phone: (01) 524384.

**Date of Introduction:** 1993 June.

**Ingredients:** Blend of herbs and spices, brown rice flour, soya bean pulp (okara), salt, vegetable oil, soya milk, juice of carrot and onion.

**Wt/Vol., Packaging, Price:** 150 gm plastic bag. Retail for £1.09.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Label sent by Anthony Marrese. 1994. May. 2.25 by 4 inches on plastic bag 5.25 by 6.25 inches. Green and black on white. “Heat and eat. No additives. No preservatives. No artificial colour. No animal products. Suitable for freezing. Cooking instructions: Place bag in boiling water for 6-8 minutes. Shallow fry 4-6 minutes turning once.” Best before 1 June 1993.

2620. **Product Name:** Naturally Tofu–Better Than Burger? (Dry Mix).

**Manufacturer's Name:** Sovex Natural Foods, Inc.

**Manufacturer's Address:** P.O. Box 2178, Collegedale, TN 37315. Phone: 1-800-227-2320.

**Date of Introduction:** 1993 June.

**Ingredients:** Soy flour, oats, tofu powder (dehulled soybeans, calcium sulfate), garlic powder, dried onion, vegetable gum (guar gum blend), onion powder, vegetable protein, dill, parsley, basil, dried carrots, oregano, marjoram.

**Wt/Vol., Packaging, Price:** 12 oz (341 gm) paperboard carton.

**How Stored:** Shelf stable.

**Nutrition:** Per ½ cup (55 gm.): Calories 165, total fat 2 gm (3% daily value; saturated fat 0.5 gm), cholesterol 0 mg, sodium 52 mg (2%), total carbohydrate 25 gm (8%; dietary fiber 9 gm [36%], protein 20 gm, calcium 16%, iron 16%. Percent daily values are based on a 2,000 calorie diet.

**New Product–Documentation:** Ad (full page, color) in Health Foods Business. 1993. July. p. 26. Naturally Tofu–Better Than Burger? Sink your teeth into this! Also published in Natural Foods Merchandiser. 1993. Sept. p. 31.

Talk with Chris Durden of Sovex. 1993. Sept. 27. This product was launched in about June 1993. The only other products in the line are Better than Milk? and Ice Creme

Label sent by Sovex. 1993. Oct. 6. 5.5 by 8.25 by 2 inches. Paperboard box. Red, tan, white, and black. Color photo on front panel of a burger between buns with all the trimmings. On the back panel are 3 recipes and a product guarantee. To make a burger, mix the contents of this package (12 oz.) with 1.75 cups warm water and 3 tablespoons soy sauce. Mix, form into patties (24 oz. weight), and fry in vegetable oil.

2621. **Product Name:** SuperBurger (Made with Tempeh).

**Manufacturer’s Name:** Turtle Island Foods, Inc.

**Manufacturer’s Address:** P.O. Box 176, Hood River, OR 97031. Phone: (503) 386-7766.

**Date of Introduction:** 1993 June.

**Ingredients:** Aug. 1994: Certified organic soybeans (grown in accordance with Section 26569.11 of the California Health and Safety Code), brown rice, Wehani rice, wild rice, water, shoyu (soy sauce), lemon juice, onions, garlic, vinegar, starter culture (*Rhizopus oligosporus*).

**Wt/Vol., Packaging, Price:** 3 oz. patty.

**How Stored:** Frozen or refrigerated.

**Nutrition:** Per patty (85 gm): Calories 122, calories from fat 14, total fat 1.5 gm (1% daily value; saturated fat 0.5 gm), cholesterol 0 mg, sodium 339 mg (14%), total carbohydrate 15 gm (dietary fiber 8 gm, sugars 0 gm), protein 12 gm. Vitamin A 110%, calcium 8%, vitamin C 0%, iron 2%. Percent daily values are based on a 2,000 calorie diet.

**New Product–Documentation:** *Voice of the Turtle* (Hood River, Oregon). 1993. May. p. 1. “New for June: Look! In your refrigerator! Its SuperBurger.” “After 13 years of effort, we have created a new burger that is low in fat (1.5 grams per 3 oz. patty) and high in flavor.” A black-and-white photo shows the burger on a bun with trimmings.

Product with Label purchased at Berkeley Natural Grocery Co. 1994. Aug. 20. The product is now named “Superburgers.” Two 3-oz. marinated tempeh patties are sealed in a plastic pouch, and packaged inside a paperboard sleeve. “The Ultimate Vegetarian Burger Experience.” Each patty contains only 1.5 gm of fat.

2622. **Product Name:** Tofu Jerky [Spicy, or Mild].

**Manufacturer’s Name:** Cedar Springs Naturals.

**Manufacturer’s Address:** Health Zone of Temecula, 27468 Ynez Rd., Suite B-7, Temecula, CA 92590. Phone: 909-694-5488.

**Date of Introduction:** 1993 July.

**Ingredients:** Tofu (made from whole soybeans), 100%

natural soy sauce (made from sea salt), organic honey, and nature’s finest herbs and spices.

**How Stored:** Shelf stable.

**New Product–Documentation:** Talk with (call from) Donna Cochran. 1993. July 8. She is looking for a source of tofu. She wants to make tofu jerky. Talk with (call from) Donna Cochran. 1993. July 17. This product was launched commercially on 1 July 1993. She would like to send Soyfoods Center a free sample in exchange for free evaluation and consultation.

Product with Label (2 flavors) and letter sent by Michael Molver and Donna. Home address: P.O. Box 128, Winchester, California 92596. Phone: 909-926-9716. 4.25 by 5.25 folded in half over top of plastic bag. Black on beige or pink. A large illustration (line drawing) shows cedar trees growing in front of mountains and clouds. Front panel: “No beef. All natural. High protein. Low fat. No animal products. No preservatives. No cholesterol. No wheat. A vegetarian snack.”

2623. McDermott, Ron. 1993. History of the use of spun soy protein fibers by Loma Linda Foods (Interview). *SoyaScan Notes*. July 6. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Note: In about 1968 Loma Linda Foods started making meatlike products containing spun soy protein fibers. The first products were canned meatless slices (chicken-like, beef-like, turkey-like, or luncheon-like slices).

Ron started to work for Loma Linda Foods in 1973 as Director of Quality Assurance at the company’s plant in Mt. Vernon, Ohio. In 1975 he left Mt. Vernon and went to Loma Linda’s plant at Riverside, California. He thinks that Loma Linda got its first spun soy protein fibers from General Mills. Robert Boyer had licensed General Mills the rights to spin soy protein fibers, and they used these primarily to make their original line of Bontrae Products. At one point after 1973 Ron thinks that Loma Linda was purchasing spun fibers from three sources: Ralston Purina, General Mills, and Miles Laboratories—but the bulk of it came from General Mills. In about 1975-77 General Mills shut down their soy fiber spinning line and sold it to Dawson Mills. During this transition period, Loma Linda purchased a large inventory of frozen, neutralized (neutral pH) fiber from General Mills. The spun soy fiber sold by Miles Laboratories (Worthington) was called “acid tow”; it was refrigerated rather than frozen and the acidic pH prevented spoilage. Loma Linda would then adjust the pH to neutral shortly before use.

In early 1984 (according to documents Ron has in front of him), Loma Linda Foods bought a soy protein fiber spinning line from Dawson Mills. In mid-1984 the equipment was transferred to Loma Linda. Loma Linda probably started spinning their own fibers in California in late 1984 or early 1985. Loma Linda continued to spin their own fibers until the company was sold to Worthington Foods

in Jan. 1990. Worthington still owns that line of spinning equipment, which is now dismantled and unused in storage. It could be re-activated if Worthington had a place to put it and a need to make more spun soy protein fibers.

Note: A brief chronology of spinning by General Mills, Dawson Mills, and Ralston Purina Co. 1959–General Mills starts research on textured soy proteins. 1962 Oct.–Ralston Purina Co. begins to make Textured Edi-Pro, a spun soy protein fiber, at its plant in Louisville, Kentucky. 1963 Nov.–The first of many patents for spinning soy protein are issued to General Mills. 1965 Dec.–General Mills introduces the Bontrae line of spun soy protein fiber products, starting with Bac-O\*s (bacon-like bits). 1967–Ralston Purina stops spinning soy protein. 1969 June–General Mills breaks ground for major fiber spinning plant at Cedar Rapids, Iowa; It begins operation by late 1970. 1975–General Mills stops spinning, and sells its spinning technology and equipment to Dawson Mills. 1976–Central Soya now owns the Bontrae trademark, formerly owned by General Mills. 1979–Dawson Food Ingredients, a subsidiary of Dawson Mills, starts spinning soy protein fibers; Anaprime is on the market by March 1980. Address: Vice President Research & Technology, Worthington Foods, 900 Proprietors Rd., Worthington, Ohio 43085-3194. Phone: 614-885-9511.

2624. Demos, Steve. 1993. New developments with soyfoods in America (Interview). *SoyaScan Notes*. July 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Vitasoy purchased Azumaya Inc. (America's largest tofu manufacturer, and the low-price leader) in May or June 1993 for an estimated \$4-\$5 million. Azumaya did not sell their building or the land on which their plant is situated. So now Vitasoy owns two large tofu manufacturers on both coasts of the USA: Nasoya in Massachusetts, and Azumaya in California.

Mr. Yamauchi sold the rest of his ownership in House Foods & Yamauchi, Inc. to House Foods of Japan. [Note: Another industry observer states that the sale took place in about April 1993 for about \$2 million].

Bill Bolduc is now running a soymilk plant in the Midwest; he now makes Westbrae's soymilk. Steve sees the future of soymilk as being packaged in the new extended shelf life (ESL) gable-top carton and sold as a commodity for a lower price like cow's milk rather than as a specialty flavored beverage.

Anders Lindner told Steve in March that DE-VAU-GE wanted to sell their soymilk plant. He offered to sell the used plant to Steve for a good price in German marks. Steve never responded.

White Wave now makes about 100,000 lb/week of tofu (of all kinds). The company's reduced fat tofu is selling very well. Quong Hop is stating on two red-on-white stickers on their package that (1) their tofu is "The original reduced fat tofu;" and (2) "The original reduced fat-High protein tofu:

Serving size 4 oz., Fat per serving 3 gm. Protein per serving 14 gm." Lab tests run by more than one company indicate that Quong Hop's tofu actually contains far more fat.

Steve bought Veggie Life from Leonardo Laudisio much more for the name than for the product (meatless burger) or its formula.

Update: 1993. Nov. 24. Talk with Leonardo Laudisio. On about November 8-10 White Wave secured preferred vendor status from Whole Foods Markets. They now are installing their cold-storage "set" in the individual stores; one is now in the Berkeley store. At the top in large letters is written "White Wave Vegetarian Cuisine" with the oval White Wave logo in bas relief. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

2625. *Health Foods Business*. 1993. Burger King to test meatless burgers. July. p. 80.

• **Summary:** "Worthington Foods, Inc... has entered into an agreement with Burger King Corp. to test its meatless burger, Morningstar Farms Grillers, in a restaurant in Watkins Glen, New York." The Griller test began in late April. The meatless burger will be flame-broiled and used to replace a product named Bean Burger currently in a test market in the same Burger King.

2626. Worthington Foods, Inc. 1993. A delicious way to cut down on meat without cutting down on your options (Ad). *Vegetarian Times*. July. p. 29.

• **Summary:** See next page. This full-page, color ad, with a \$1.20 coupon at the lower right, shows new label designs for four Morningstar Farms meatless products: Breakfast Patties, Breakfast Links, Breakfast Strips, and Grillers. Address: Worthington, Ohio 43085.

2627. Worthington Foods, Inc. 1993. If you've been burnt by vegetarian franks and burgers, you'll flip over these (Ad). *Vegetarian Times*. June. p. 17.

• **Summary:** This full-page, color ad, with a coupon, shows two new Natural Touch products: Vege Frank and Vege Burger.

A similar ad (with a title that starts: "If your customers have been burnt...") also appeared in Natural Foods Merchandiser (July 1993, p. 71, and Oct. 1993, p. 71). Address: Worthington, Ohio 43085.

2628. Worthington Foods, Inc. 1993. Second quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. 22 x 9 cm.

• **Summary:** "The Morningstar Farms meat alternative sales increased during the first half of 1993. The reformulated lower-fat products are now beginning to appear in the retail supermarkets nationally in the new packages."

"Today we announced three additional Burger King

## A Delicious Way To Cut Down On Meat Without Cutting Down Your Options.

*Crumble up our Breakfast Patties to prepare delicious Italian dishes like lasagna.*

When you take something away, you usually have less. But the way we see it, now you have more. Because Morningstar Farms® offers you a way to eat less meat while giving you more delicious ways to enjoy your favorite meat dishes.

Made with wholesome grains and vegetable protein, these meatless foods are a healthier way to eat because they have no animal fat and zero cholesterol. Yet they taste

so much like meat, you can enjoy your favorite meals the

way you always have. Microwave them in minutes just the way they are, or use them to prepare delicious dishes for breakfast, lunch and dinner.

Morningstar Farms has the most complete line of meatless products, including Grillers®, Breakfast Links, Breakfast Patties and Breakfast Strips.

Look for them in your supermarket's frozen breakfast section.

They're a delicious way to prove that less can be more.

*With our Breakfast Links, you can still enjoy your favorite morning meals.*

*There are as many ways to top Grillers as there are to top hamburgers.*

### Make It Meatless & SAVE \$1.20

For your free Morningstar Farms recipe booklet, plus coupons worth \$1.20 for Morningstar Farms products, send a postcard to: *Meatless Favorites*, Morningstar Farms, P. O. Box 6018, Dept. VT, Worthington, OH 43085.

Limit one per family. Allow 8 weeks for delivery.

restaurants in New York State have added Grillers to their menu.”

2629. Sinclair, Dwight B. 1993. Gorilla Foods, Seitan, Santa Fe Organics, and the Gardenburger (Interview). *SoyaScan Notes*. Aug. 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Dwight is a vegetarian and his company sells only vegetarian foods. Dwight, his partner Michael Meek, and two other people incorporated Gorilla Foods in May 1993. They hooked up with John Moore of Gourmet Naturally in Los Angeles, took over his product line, and are making wheat gluten. They will soon be moving into a new plant in Oxnard. Heart and Soul, which made gluten products, went out of business.

Note: Starting in 1988 John Moore was with W.H. Et Inc., P.O. Box 37250, Honolulu, Hawaii 96837. They made a product named Holy Cow! Veg-Cuisine (Made with Seitan), whose ingredients included wheat protein, soy protein, and other vegetable proteins. A talk with Andrew Harrison, President, Heart & Soul, Common Objective Inc. 1991. Nov. 27. Heart & Soul Texas BBQ ‘Whibs’ [Regular, or Hot] was introduced in March 1989; it was made by 4 different co-packers. Other Heart & Soul products include Trim Slice Meatless Cold Cuts [Turkey Style, Roast Beef Style, Ham Style], and Heart & Soul Tofu Lasagna, and Tofu Enchilada [California, or Mexicali]. John Moore at Gourmet Naturally (5890 Black Welder St., Culver City, California 90232) started making the seitan products in about Feb. 1990. Andrew owns the company named Gourmet Naturally, which manufactures only Heart & Soul Products, including this product. Legally, Gourmet Naturally is separate from Heart & Soul, but the two will soon be merging. He has a patented process for making fresh wheat gluten, starting with vital wheat gluten. He feels that the terms “gluten” and “seitan” are both unattractive; to many mainstream Americans, the first sounds like glue and the second like the devil (Satan).

Soyfoods Center Product Evaluation. 1991. Dec.  
2. Package design: Excellent, very creative. Taste Test: Excellent flavor and texture; moist, not too spicy.

John Belleme of Santa Fe Organics is no longer making seitan. He sold his equipment to the owner of Unicorn Village (Terry Dalton) in North Miami, Florida, who started a company named something like Sensational and is making a bulk seitan at a rather low price. Note: John Belleme did shut down his company but he has not yet sold his equipment. Neither Unicorn Village nor Terry Dalton have any plans to get involved with seitan, but Steve Berne in Miami is starting a new company named New World Foods, Inc.; he will continue to make bulk seitan and he may buy Belleme’s machine.

There is a rapid growth of interest in vegetarianism. Their sales have grown 20% a year in recent years. Three of their best selling products are the Gardenburger (sold \$8.3 million in California last year), the Clif Bar, Gorilla Sauce, and Imagine Foods’ Rice Dream beverage (which Dwight thinks is the best non-dairy beverage on the market). Dwight thinks Imagine Foods’ best-selling product by far is their Rice Dream beverage, which is packaged in a large aseptic container. Its sells better than Rice Dream non-dairy frozen dessert (rice-based ice cream) because freezer space is quite limited in retail food stores. Address: Owner, Whole Food Marketing Co., 533 Airport Blvd., Suite 521, Burlingame, California 94010. Phone: (415) 579-0988.

2630. Knox Mountain Farm. 1993. “This isn’t meat?” (Ad) *Vegetarian Times*. Aug. p. 81.

• **Summary:** This full-page color ad is for Wheat Balls (a dry mix based on vital wheat gluten). “Finally a product that satisfies your desire for a truly delicious fat-free meat substitute that is moist, rich in texture and flavor with just the right amount of spice. Kids love it!... Fat free—Each 4 oz. serving has 19 grams of protein, 120 calories, and no fat.”

“One 8.5 oz box of dry mix makes 2 pounds of cooked product. And more. Because its a dry mix, Wheat Balls is a dynamic veal Parmesan, a succulent wheat loaf, or the one meatless burger you can throw on the grill that won’t fall apart.”

“Located in the foothills of the White Mountains of New England, Knox Mountain Farm is dedicated to bringing uncompromised, fat-free choices to your kitchen.” Watch for Knox Mountain Farm free recipe cards in your store along side our product. Or call us, (603) 934-9826.

Color photos show: A girl eating a burger. A pastoral New England landscape. A dish of wheat balls on spaghetti. The front of a recipe booklet.

This ad continued to appear in *Vegetarian Times* each month until at least Nov. 1993. A leaflet (glossy color, front and back) sent in 1993 is similar to the ad. On the rear is a nutritional analysis of Wheat Balls and a recipe for Unreal Veal Parmesan. Address: [Franklin, New Hampshire]. Phone: (603) 934-9826.

2631. Gemperlein, Joyce. 1993. Tofu—No bones about it: Health and environmental benefits make that bland soybean product a big seller. *Mercury News (San Jose, California)*. Sept. 15. [2 ref]

• **Summary:** Ken Nozaki’s San Jose Tofu Co. produces more than 500 blocks of fresh tofu a day—That’s protein that hasn’t been killed, plucked, scaled, boned, skinned, or tenderized. Five photos show how the tofu is made. This shop has been in operation since 1947. Nozaki, age 66, took over the shop from his uncle in 1951—at a time when the merits of tofu were generally only known to people of Asian descent. “But that has changed. By virtue of the hippie culture of the

1960s, the influx of immigrants in the last decades, and now the health and environmental movements, tofu is edging into mainstream cooking in the United States. Nonsense, you say. It is bland, yucky. It will never come close to replacing America's protein darling, beef. Probably not, but the increasing emphasis on cross-cultural cooking and on lowering cholesterol and fat in our diets has food processors introducing tofu hot dogs, tofu burgers, tofu cheese and even tofu ice cream into supermarkets that cater to the general public."

William Shurtleff discusses tofu's growth of popularity in America.

Source: Knight-Ridder/Tribune News Service, 20 Sept. 1993. Title: America's love affair with tofu getting stronger all the time. Address: Staff writer, California.

2632. Tuchman, Laura J. 1993. As vegetarianism moves mainstream, a fest comes to San Jose. *Mercury News (San Jose, California)*. Sept. 29. p. 1E.

• **Summary:** The Sixth Annual World Vegetarian Day Celebration is coming to downtown San Jose on Sunday. Many large companies are now introducing vegetarian products including Stouffer's Vegetable Lasagna, Pillsbury's Green Giant Harvest Burger. A vegetarian is one who doesn't eat meat, fish, or poultry.

2633. ADM Protein Specialties Div. 1993. Harvest Burgers. As good for your customers as they are for your sales (Ad). *Health Foods Business*. Sept. p. 37.

• **Summary:** "Cholesterol free. Low in fat. Versatile—can be fried or microwaved. High in protein... For a closer look at Harvest Burgers, stop by booth 1154 at ExpoEast in Baltimore, September 10-12." Address: Box 1470, Decatur, Illinois 62525.

2634. Archer Daniels Midland Co. 1993. Annual report. P.O. Box 1470, Decatur, IL 62525. 42 p. Sept.

• **Summary:** Net sales and other operating income for 1993 (year ended June 30) were \$9,811 million, up 6.2% from 1992. Net earnings for 1993 were \$567.5 million, up 12.7% from 1992. Shareholders' equity (net worth) is \$4,883 million, up 8.7% from 1992. Net earnings per common share: \$1.66, up 12.9% from 1992. Number of shareholders: 33,654.

New ADM products from soybeans include Soy Milk (dry mix) and Harvest Burgers (also named Veggie Burgers). Opposite a full-page color photo of soy milk being poured from a pitcher into a glass, we read: "A new line of soy-based milk products was introduced that are nutritionally equivalent to milk but less expensive to produce, allowing countries to expand their supply of needed protein at minimal cost.

"The all-vegetable protein food, Harvest Burger, is being actively marketed in the U.S. where 12% of the stores frozen

food sections stock the product.

"Haldane Food Group continues to develop as the leading U.K. supplier to the health food industry. From a well-established domestic base and with an ever increasing product range the Group's commercial thrust is extending to Continental Europe. Of the many new products introduced during the year 'Vegemince' commands attention as a direct TVP/wheat gluten non-meat alternative to ground beef. The prototype plant is fully committed to production and line extension is in progress.

"'Vegeburger' continues as a market leader with other burger products being added to the range. The realized growth and market potential for convenience foods has brought about the relocation of Snackmasters Limited to a new factory at Sibley adjacent to the Haldane site. The automated production line is currently at 60 % capacity and the introduction of new products should fill the plant within twelve months.

"Genice Limited continues to pioneer the growth of non-dairy soya based ice cream and yogurts with an increasing market share in Continental Europe... Soya milk sales remain stable and we hope to excite the market by introducing a bottled soya milk that will complement the existing Tetra pack products."

"Currently operating at 80% capacity, ADM can produce 350,000,000 Harvest Burgers a year. ADM introduced the product in 1989, and soon will be selling as many burgers as some fast food chains" (p. 19). Address: Decatur, Illinois.

2635. Neal, Mollie. 1993. Reaping the rewards of skillful marketing... While helping humanity. *Direct Marketing*. Sept. p. 23-26.

• **Summary:** The subtitle reads: "Archer Daniels Midland Co. has developed a product it believes can cure the world's hunger problem. At the same time, the business has found a novel approach to marketing the product here in the United States directly to consumers."

2636. **Product Name:** Sergeant Billet's Bacon Flavoured Bits.

**Manufacturer's Name:** Somerdale International Ltd. (Marketer).

**Manufacturer's Address:** 24 Billet St., Taunton, Somerset TA1 3NG, England. Phone: 0823 322180.

**Date of Introduction:** 1993 September.

**New Product—Documentation:** Spot in *Berrydale's Special Diet News*. 1993. Sept. p. 5. "Product Directory." This 100% vegetarian, cholesterol-free product is made from textured soya. The perfect substitute for bacon.

2637. White Wave, Inc. 1993. White Wave soyfoods food service product list (Leaflet). Boulder, Colorado. 1 p. Single sided. 28 cm.

• **Summary:** Lists six categories of products: (1) Tofu:

Vacuum pack organic hard style tofu (2/5# pouches).  
Meatless tofu steaks (2/4# pouches).

(2) Dairyless Soy Yogurt: Lemon kiwi (6/2# tubs).

Organic plain quarts (6/2# tubs).

(3) Soy A Melt Soy Cheese: Cheddar style (4/7.25# loaves). Mozzarella style (4/7.25# loaves). Monterey jack style (4/7.25# loaves). Garlic herb style (4/7.25# loaves).

(4) Meat Substitutes: Meatless healthy franks (10# cases). Meatless healthy bologna (10# cases). Vegetarian sloppy joe (19# buckets). Traditionally seasoned seitan (2/6# pouches). Diced traditionally seasoned seitan (2/6# pouches).

American soy singles. Mozzarella soy singles. (4) Meat Substitutes: Meatless healthy franks\*. Jumbo meatless healthy franks\*. Meatless healthy links. Meatless healthy bologna\*. Meatless healthy bacon. Vegetarian sloppy joe\*. Vegetarian chili. Tempeh barbecue. Traditionally seasoned seitan\*.

(5) Veggie burgers: Tempeh burger\*. Teriyaki tempeh burger\*. Veggie life burger\*. Lemon broil tempeh\*. Tempeh cutlet\*.

(6) Tempeh: Original soy tempeh\*. Soy rice tempeh. 5-grain tempeh. Wild rice tempeh. Address: 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

2639. Lowe, Frederick H. 1993. Business can breathe easier. *Sun-Times (Chicago, Illinois)*. Oct. 6.

• **Summary:** Boris Yeltsin's defeat of Russian hard-line opponents will help Midwest companies doing business in Russia. Decatur-based Archer Daniels Midland Co. sells soybean-based food products to Russia and the Ukraine. These include vegetarian burgers and soy-based milk products, according to company executive Howard Buffett, assistant to ADM Chairman and CEO Dwayne O. Andreas.

"We sell 5,000 vegetarian patties a day to a restaurant we jointly operate in Moscow. The burgers are also sold throughout Moscow at Kiosks."

2640. Lukoskie, Luke. 1993. Some history of and update on activities at Island Spring (Interview). *SoyaScan Notes*. Oct. 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** David Sucher was one of the original investors in Island Spring. He has been a close friend of Luke's for 20 years, and it was his investment that got the company going at its original location.

Luke now works half time with Island Spring; he and his wife, Suni, literally make tofu. Suni manages the people and products. Yvonne Kuperberg is still there. He lets other people run the business side of things. The company has a solid base of consumers in the northwest who support its products. Though sales are still strong, Island Spring is not yet out of the hole on the debts it incurred when the principals at Pacific Soy said "either give us complete control of the company or we're going to leave." At that time, Luke had accounts payable of \$485,000, and he lost \$300,000 in extracting the company from the position it had been in. He had raised \$110,000 before the fire with the help of Harold Hopkins, who knows a lot about capital in the Pacific Northwest.

He soon realized that the only way to get out of the \$300,000 hole was to tighten the belt at Island Spring. He cut his and Suni's salary to zero for 3 years. They got personal income from personal investments, such as 4 housing units that they rent. They have worked the debt down to \$60,000 and they are now starting to pay themselves. In one more year they will be competitive again.

Their competition is Azumaya, Nasoya (from time to time), White Wave, Ohta Tofu, Sea Asia, Boohan (of Tacoma), and Tacoma Tofu. Island Spring's main products are now tofu burgers, soymilk in quarts and half gallons, traditional firm tofu (Korean-style, water pack), and extra firm tofu (vacuum pack).

Talk with David Sucher. 1993. Oct. 20. One day Luke called David from Los Angeles, California, to ask if he could borrow (or exchange for stock) about \$1,000 to \$1,500 to buy a grinder/mill for making tofu. At the time Luke's company was in its original small building near the ocean and had not yet started commercial tofu production. At a later date Luke asked David to invest in the company, which he did; he now owns about 5% of the company's stock. Address: P.O. Box 747, Vashon, Washington 98070. Phone: 206-622-6448.

2641. **Product Name:** Farm Foods Fat Free Pizsoy [Original/Cheese Style, Garden Style, Vegetarian Pepperoni].

**Manufacturer's Name:** Farm Foods. Div. of Barricini Foods Inc.

**Manufacturer's Address:** 49 Old Bloomfield Ave.,

Mountain Lakes, NJ 07046. Phone: 201-334-0101.

**Date of Introduction:** 1993 October.

**Ingredients:** Garden Style: Organic stone-ground whole wheat flour, tomatoes, non-fat tofu mozzarella (organic soybeans, calcium caseinate [derived from non-fat milk], corn and rice starch, sea salt, citric acid, natural flavor, soy lecithin, vegetable gum), bell peppers, mushrooms, fresh yeast barley malt, garlic powder, herbs and spices.

**New Product–Documentation:** Spot in Health Food Business. 1993. Nov. p. 10. “Farm Foods acquires Original Pizsoy.”

Leaflet (black on orange) distributed at Natural Products Expo East in Baltimore, Maryland. 1993. Oct. “Farm Foods. Come taste the world’s best pizza. Fat Free Pizsoy. The naturally delicious alternative to cheese pizza.”

Two leaflets (8½ by 11 inch, black-and-white) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. “Fat Free Pizsoy Nutritional Facts.” Gives the ingredients and nutritional information on the 3 types of Pizsoy. What used to be called “Origina;” is now called “Cheese Style.”

2642. **Product Name:** Green Giant Harvest Burger (Meatless Burger based on Textured Soy Protein Concentrates) [Original, Southwestern style, Italian style].

**Manufacturer’s Name:** Green Giant Div., The Pillsbury Company (Marketer-Distributor). Made in Decatur, Illinois, by ADM.

**Manufacturer’s Address:** Pillsbury: 2866 Pillsbury Center, Minneapolis, MN 55402-1464. Phone: 1-800-998-9996.

**Date of Introduction:** 1993 October.

**Ingredients:** Original flavor: Water, soy protein concentrate, hydrogenated vegetable oil (corn, soybean, cottonseed), isolated soy protein, methylcellulose, natural flavor, salt, hydrolyzed wheat protein, malt extract, dried onion, dried garlic, spice, beet powder, autolyzed yeast, zinc oxide, niacinamide, ferrous sulfate, copper gluconate, vitamin A palmitate, calcium pantothenate, thiamine mononitrate, vitamin B-6, hydrochloride, riboflavin, vitamin B-12.

**Wt/Vol., Packaging, Price:** 12.8 oz. 4 burgers in a paperboard box. Retail for \$2.99 (5/94, California).

**How Stored:** Frozen.

**Nutrition:** Per 3.2 oz burger: Calories 140, protein 16 gm, carbohydrate 7 gm, fat 5 gm (polyunsaturated less than 1 gm, saturated 2 gm), cholesterol 0 mg, sodium 380 mg, potassium 450 mg.

**New Product–Documentation:** Spot in Health Foods Business. 1993. Oct. p. 17. “Green Giant Unveils its own Veggie Burger.”

*Soybean Digest*. 1993. Dec. p. 53. “Green Giant adds soybean burgers.”

Talk with product manager at ADM. 1994. Feb. 18. The product was launched under the Green Giant label on 1 Feb. 1994. Shipments have been made to the San

Francisco Bay area and the product should be sold at Safeway or Lucky chains now or in the near future. It may go into a supermarket either via the frozen foods section or the meat department (look in the frozen meat case, which also contains frozen fish, frozen hamburger patties, frozen entrees, etc.).

Product (3 flavors of burgers) with Label purchased at Safeway supermarket in Lafayette, California. 1994. May 18. Price: \$2.99. Frozen. Label. 8.5 by 4.25 by 1.12 inches thick. Dark green, light green, white, and yellow. A color photo shows a patty on a bun, topped with lettuce, a slice of tomato, and two onion rings, with a second bun behind them. “Healthier Eating Made Easy. 79% less fat than ground beef. All vegetable. Zero cholesterol.” On back panel: “Quit beefing! Enjoy Green Giant Harvest Burgers. Finally a burger that’s good for you!”

Talk with Green Giant consumer information person. 1995. July 31. Green Giant Harvest Burgers were launched in a ten-city test market on 4 Oct. 1993. This was expanded to about 20 cities on 15 Feb. 1994. Then they went to full national distribution in the fall of 1994.

2643. **Product Name:** Realeat VegeMince (Meatless Minced Beef).

**Manufacturer’s Name:** Haldane Foods Group.

**Manufacturer’s Address:** Howard Way, Newport Pagnell, Buckinghamshire MK16 9PY, England. Phone: +44 908 211311.

**Date of Introduction:** 1993 October.

**Ingredients:** Incl. wheat gluten, soy protein.

**Wt/Vol., Packaging, Price:** 1 lb bag. Retail for £1.99 (10/93, England). Also in 3 lb catering bags.

**How Stored:** Frozen.

**New Product–Documentation:** Ad (full-page, color) in BBC Vegetarian. 1993. Oct. p. 3. “Realeat VegeMince. Make a meal of it! New” A photo on the top half of the page shows a plate of spaghetti topped with a minced meat sauce. The text reads: “How would you like to enjoy your favorite dishes, but without meat? Well now you can. Simply use new Realeat VegeMince straight from the freezer instead of beef mince to create a wide variety of dishes with a really authentic taste and texture.” The product has the Vegetarian Society seal of approval.

Spot in SoyaFoods. 1993. Autumn. p. 5. “Haldane launches Vegemince.” This meatless blend of vegetable proteins is based mainly on wheat protein (gluten) plus some soy protein. It has been created from a new process developed by Haldane (patent pending) to give the taste and texture of minced beef. It comes pre-cooked and frozen in a 1 lb pack and provides 32 gm of protein per 100 gm.

2644. *Health Foods Business*. 1993. Green Giant unveils its own veggie burger. Oct. p. 17.

• **Summary:** “Pillsbury and Archer Daniels Midland

(ADM) announced jointly that Green Giant, a Pillsbury Division, will become the exclusive marketer of a low-fat, no-cholesterol, all-vegetable patty that has been developed by ADM. The alliance stems from what both companies perceive as a growing demand from consumers for healthful foods that provide taste and convenience.

“As part of the agreement between ADM and Pillsbury, Green Giant Harvest Burgers, an alternative to meat-based burgers, will undergo significantly expanded distribution—from 9 cities presently to over 50 percent of the United States by the end of September 1994. ADM has marketed the product selectively since its introduction in 1991, and the company approached Pillsbury to create greater grocery store distribution and higher consumer awareness.

“Green Giant Harvest Burgers will be sold in frozen form in grocery stores. The line will include four varieties—original, Southwest style, Italian style, and breakfast patties.”

**2645. Product Name:** Trim Slice Meatless Cold Cuts [Turkey Style, Smoked Turkey Style, Pastrami Style, Roast Beef Style, Ham Style].

**Manufacturer’s Name:** Heart & Soul (Manufacturer). A division of Vitafort International Corp. (Marketer).

**Manufacturer’s Address:** 1800 Avenue of the Stars, Suite 1114, Los Angeles, CA 90067. Phone: 310-552-6393.

**Date of Introduction:** 1993 October.

**Ingredients:** All flavors: Water, vital wheat gluten, isolated soy protein, natural flavor, herbs & spices, canola oil.

**Wt/Vol., Packaging, Price:** 6 oz vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** See next page. This product line was launched in Sept. 1990 by Gourmet Naturally (Manufacturer). Common Objective Co. (Marketer-Distributor); labels were sent by Andrew Harrison of Common Objective Co.

News release. 1993. Sept. “Vitafort International Corporation acquires Heart & Soul Products.

Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. “New! from Vitafort. All natural, incredibly delicious Trim Slice Meatless Cold Cuts. 98% fat free.” Made by Heart & Soul, a division of Vitafort International Corp.

**2646. Product Name:** Lightlife Savory Seitan [Barbecue Sauce, Teriyaki Sauce, or Traditional Bulk].

**Manufacturer’s Name:** Lightlife Foods, Inc.

**Manufacturer’s Address:** P.O. Box 870, Greenfield, MA 01302. Phone: (413) 774-6001.

**Date of Introduction:** 1993 October.

**Ingredients:** Barbecue: Organic stone-ground wheat flour, water, soy sauce, honey, spices, spice extracts, natural flavors, salt, potato starch, dried onion, guar gum, liquid smoke, kombu.

**Wt/Vol., Packaging, Price:** 8 oz paperboard box.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Leaflet distributed at Natural Products Expo East in Baltimore, Maryland. 1993. Oct. “New! Lightlife. Savory Seitan.”

Spot in NFM’s New Product Review. 1994. Spring (May). p. 12. A photo shows two 8 oz packages of the product (Teriyaki Sauce and Barbecue Sauce).

**2647. Product Name:** Soyboy Veggie Sizzler (Fat-Free Pre-Cooked Vegetarian Burger).

**Manufacturer’s Name:** Northern Soy, Inc.

**Manufacturer’s Address:** 545 West Ave., Rochester, NY 14611. Phone: 716-235-8970.

**Date of Introduction:** 1993 October.

**Ingredients:** Filtered water, soy protein concentrate, dried onion, wheat gluten, molasses, natural flavoring, yeast, garlic powder, spices, vegetable gum.

**Wt/Vol., Packaging, Price:** 6 oz.

**New Product–Documentation:** Spot in New Product News. 1993. Oct. 12. Gives the product’s ingredients.

Leaflet distributed at Natural Products Expo East in Baltimore, Maryland. 1993. Oct. “And you thought fat-free tasted like cardboard? Not Veggie Sizzler. We took out the fat and filled it with flavor! Introducing the world’s first fat-free burger.” Health Foods Business. 1993. Dec. The product is said to have a grilled flavor and meaty texture.

**2648. Product Name:** Trader Joe’s Vegetable Tofu Patties.

**Manufacturer’s Name:** Trader Joe’s (Product Developer-Distributor).

**Manufacturer’s Address:** P.O. Box 3270, South Pasadena, CA 91031-6270. Phone: 818-441-1177.

**Date of Introduction:** 1993 October.

**Ingredients:** Organic tofu (filtered water, whole organic soybeans [Grown and processed to the California Organic Act of 1990], natural nigari and/or calcium sulfate [naturally derived coagulants]), onions, carrots, cabbage, mushrooms, wheat pilaf, red bell peppers, tamari (water, soybeans, sea salt, grain alcohol [a natural preservative]), sunflower seeds, sesame seeds, currants, hi oleic safflower oil and/or hi oleic sunflower oil.

**Wt/Vol., Packaging, Price:** 6 oz vacuum pack retails for \$1.49 (10/93, Concord, California).

**How Stored:** Refrigerated.

**Nutrition:** Per 1.53 oz.: Calories 160, protein 10 gm, carbohydrates 12 gm, fat 8 gm, sodium 400 mg.

**New Product–Documentation:** Trader Joe’s Fearless Flyer. 1993. Oct. p. 13. “Vegetable Tofu Patties \$1.49 for package of two. Fully cooked, no eggs, no dairy. Here’s a good choice when you want to prepare a meatless meal.”

Product with Label purchased from Trader Joe’s in Concord, California. 1993. Oct. 10. 3.5 inch diameter. Black and bluish green on light blue. Self adhesive. “No dairy.

2649. **Product Name:** Better Burger.

**Manufacturer’s Name:** Woodstock Whole Earth Foods Inc.

**Manufacturer’s Address:** P.O. Box 1118, Woodstock, NY 12498. Phone: 914/679-7940.

**Date of Introduction:** 1993 October.

**New Product–Documentation:** Leaflet distributed at Natural Products Expo East in Baltimore, Maryland. 1993. Oct. “Isn’t it time for a Better Burger?”

2650. Worthington Foods, Inc. 1993. Third quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. 22 x 9 cm.

• **Summary:** Net sales are up 7.2% for the first 9 months of 1993 compared with the same period one year ago. Third quarter sales are up 8.3%. But net income (profits) are down 19.6% for the first 9 months, and down 25% for the third quarter. “Egg white prices have been the major factor for the decline in gross margins and net income during the first nine months of 1993 compared to 1992.”

“Today we announced 34 additional Burger King restaurants in New York state have added Grillers to their menu, effective in early November. Griller sales continue to be strong in the 4 test restaurants.” Address: Worthington, Ohio. Phone: (614) 885-9511.

2651. Garland, Jackson. 1993. Vegetarians’ holiday dinner solution: tofu turkey. *Lumberjack (The) (Humboldt State Univ. Newspaper)*. Nov. 17. p. 15.

• **Summary:** Gives a recipe (from *The Co-op Newsletter*) for “Tofu turkey,” that uses 5 lbs. of tofu. Address: Staff.

2652. Crooks, Salle Richards. 1993. Burger King’s experiment expands in Southern tier. *Star-Gazette (Elmira, New York)*. Nov. 23. p. 4B.

• **Summary:** Burger King has expanded the test marketing of its meatless burger, the Griller, to a total of 38 restaurants in the Elmira-Rochester area of upstate New York. Made by Worthington Foods Inc. of Ohio, the product is flame broiled and kept separate from meat products. The Griller was introduced to satisfy customers in Watkins Glen connected with the Farm Sanctuary, which rescues abused farm animals. A large photo shows a little girls eating a meatless burger and liking it.

2653. Reis, Ademar. 1993. History of his work with soyfoods, seitan, and gluten (Interview). *SoyaScan Notes*. Nov. 29. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ademar, age 46, was born on 2 May 1947 in Santos, Sao Paulo, in Brazil. In the early 1950s when Brazil

started growing more soybeans. His mother was a very well educated person and she liked to read; she also had many children and the family was rather poor, so they could not afford to buy meat, milk, or other animal products. Not far from their home was an agricultural department. His mother would send him there, and they would give him free soybeans, which he and his mother would cook or use to make soymilk.

He entered law school in Brazil in the early 1970s, but upon graduation he became an actor and had a theater group. At the time, life in Brazil was very hard and repressive due to the military government. He went against the government and he had to flee the country in June 1973. Since he had several Brazilian friends living in Los Angeles, he went to live with them there. One day while shopping at Erewhon on Beverly Blvd. in Los Angeles he learned about the East West Center.

He moved into the East West Center, a macrobiotic commune on [7357] Franklin Ave. in Hollywood, California 90028. At that point his girlfriend, Iseti, joined him from Brazil; they were married in America in Oct. 1975. First he started working as Roy Steevensz’ assistant making foods. Then in late 1973 or early 1974 he started a company named East West Cookery, where he made Soy Burgers, which he sold to many health food stores in and around Los Angeles, including the Erewhon retail store. To make the burgers he would soak whole soybeans, pressure cook them until soft, then cool and mash them for use as a binding agent. He would mix the mashed soybeans with cooked brown rice and fresh onions, parsley, and carrots. He would shape the mixture into patties, which he baked in an oven. He made the burgers in the kitchen of the big East West Center. In terms of logistics, he would wake up at 4:00 in the morning, cook the soybeans and let them cool. Later, after others had finished breakfast in the kitchen, he would shape and bake the burgers. He would put these between buns, with lettuce, tomatoes, etc. and distribute them to stores.

After several years he decided that he wanted to move to Boston to be close to Michio Kushi. He and his wife, Iseti, went to live at the Kushi macrobiotic study house in Newton, Massachusetts. In Newton he tried to support his wife (who was pregnant) and himself by doing some translation of articles from a Brazilian newspaper. After a few months, they realized they could not make a living doing translation, so Ademar decided to move to Somerville, re-activate East West Cookery, and start making Soya Burgers again—just about the same time his son was born (in October). After making the down payment on the apartment, they found themselves out of money. So they went to see Aveline Kushi (who he met when she lectured in California) at her home in Brookline. She gave him \$500 to get his business started and she put only one condition on the gift: “Don’t put too much garlic in the food.” He has kept in touch with her over the years.

The Seventh Inn made the bread for Ademar's burgers' buns. First he made the burgers out of his home in Somerville, Massachusetts, but he was caught by the Board of Health, so he had to move to a commercial kitchen.

One day a young man named David came from San Diego (where he had been a lifeguard), tasted Ademar's product, and ended up working with the company for a year. Tom was also an artist, and before he left, he drew a logo, wrote "Season's Harvest" in it, and gave it to Ademar as a present. In 1977 decided to rename his company Season's Harvest. Between the late 1970s and the early 1990s Ademar developed a line of about 20 different types of sandwiches (including Solar Burger sandwiches [with Wheatmeat made from Seitan], in 1976), many different burritos (including and a Tofu and Brown Rice Burrito, in about 1978), 20 different types of salads, and carrot juice. In about 1980 Season's Harvest introduced Tuna Salad and Chicken Salad, each containing textured soy protein concentrate; these are the only two products in his line that are not vegetarian.

Until 1987 Season's Harvest did its own distribution throughout the area (Massachusetts, Connecticut, New York, Philadelphia [Pennsylvania], etc.). Then from 1987 to 1990 the company turned over part of its distribution to a natural foods distributor named Country Barn. In 1990 Country Barn went out of business, with large unpaid debts to Season's Harvest. Ademar picked up two distributors in New York: Craig Coester and Ed Wolf.

Looking for a bigger market, in the winter of 1991 Ademar contacted a little company in Massachusetts named Idyllwild Farms, which prepares food and puts food together for major airlines. He made a presentation but nothing developed. One day Continental Airlines contacted Idyllwild saying, "Look, we're having a lot of requests for vegetarian meals, what can you come up with?" Idyllwild spent a great deal of time trying to find meals that were acceptable to Continental's headquarters in Texas, but to no avail. As a last resort, in about December 1992, they went to Ademar. He set to work modifying the Dream Burger. It was an instant hit at Continental—so they asked for more vegetarian products and a dish with mushrooms and onions. Ademar designed the Vegetable Patty. Then they wanted something for breakfast, so he made the Veggie Breakfast Sausage. The first order from Idyllwild arrived in March 1993—the last arrived on 29 July 1993. Idyllwild declared bankruptcy, and Ademar lost \$12,000 that Idyllwild owed his company. It was a small disaster. Fortunately, Ademar was able (by great good fortune) to reestablish his contact with Continental and today they are still ordering from him. Idyllwild had hidden the names of its suppliers. Subsequent soy- or gluten-related products included: Dream Burger (1991, June, to be renamed Dreamburger in 1994), Vegetarian Meatball, and Vegetarian Bacon Bits (1992, Feb.), Seitan (1992, June), Cajun Burrito (1992, Nov.), Vegetable Patty (1993, March), and Veggie Breakfast Sausage (1993, March).

Ademar is now looking for a plant or company to make his Veggie Breakfast Sausage. He met Ernie Mucke, who is a fourth-generation sausage maker and who owns a traditional sausage company named Mucke's. Ernie, who is in his late 30s, grew up working in the plant and knows every detail of the machinery. His 4-year-old son has many allergies so his wife started cooking vegetarian meals, which Ernie likes, so now he is very open to vegetarianism. Ernie's wife's brother, who had spiritual powers and lived in Arizona, was Ernie's spiritual guide. Just before he died, this spiritual guide told Ernie that someone would come into his (Ernie's) life and his sausage plant would be transformed, and he would end up making vegetarian foods. Ademar and Ernie are now working out plans together.

In about mid-1992 Sysco, America's largest food distributor, began to carry Ademar's products; he is with their Hallsmith Sysco division. About 6 months ago he also got into J.P. Food Services (Monarch); Harvard University buys his products. The last few months, in working with Protein Technologies International, ADM, and Central Soya, Ademar has learned many new things about food technology and product formulation. So now he is reformulating many of his products. Currently his best-selling products are Bean & Cheese Burrito, Hoomus [Hummus], Tabouleh [Tabbouleh], and Dream Burger—in that order. He now owns the largest natural-food sandwich company in New England—followed by New World.

Ademar has kept good records of his years of pioneering work with natural foods; his files may be able to add more detail and accurate dates and names to this story. He still uses macrobiotic principles in formulating his recipes to balance yin and yang, but he is not as strict as he used to be; he now eats tomatoes and eggplants. Address: Founder and owner, Season's Harvest, 52 Broadway, Somerville, Massachusetts 02145. Phone: 617-628-1182.

2654. **Product Name:** Tofu Turkey, and Cashew Gravy.

**Manufacturer's Name:** Daybreak Foods.

**Manufacturer's Address:** 768 18th St., Arcata, California 95521. Phone: (707) 825-7480.

**Date of Introduction:** 1993 November.

**Ingredients:** (1) Tofu Turkey: herbs, tofu, garlic, turmeric, tamari, rice flour, vegetarian nutritional yeast, salt, white pepper. Bread Stuffing: onions, celery, bread crumbs, herbs, canola oil, salt, white pepper, miso, water, bayleaf. (2) Cashew Gravy: Cashews, water, sea salt, tamari, white pepper, flour.

**How Stored:** Refrigerated.

**New Product—Documentation:** These are two separate products: Labels (Tofu Turkey, Cashew Gravy) sent by Matthew Schmit. 2002. Sept. 24. Both are pressure sensitive, green on white, 3.5 x 2.5 inches.

Talk with Matthew Schmit. 2009. March 6. Daybreak Foods is no longer in business. He sold his restaurant

Office/Fax 707-825-7480

and company to a couple in about 2004. The new owners (Paul, and his wife, Hahnelea Boehm—an ex-employee of Matthew's) continued to make the Tofu Turkey and the Gravy for the Thanksgiving and Christmas season only until 2007, and they were quite as aggressive as Bob Meeks was. They closed in the fall of 2008; they were splitting up and the restaurant got caught up in the legal battle.

2655. McCarty, Meredith. 1993. Food: A vegetarian turkey.

*Co-op Newsletter (Arcata, California)*. Nov.

• **Summary:** Gives a macrobiotic recipe for “Tofu turkey with herbed bread stuffing and mushroom gravy” [vegetarian], that uses 5 pounds of tofu and makes 16 servings. At end of article: “Thanks to Mathew Schmit, owner of The Tofu Shop” (768 18th St., Arcata, California 95521). Address: Staff.

2656. Segal, Mara. 1993. Food for thought: From the Co-Op's Spoons take-out kitchen. *Co-op Newsletter (Arcata, California)*. Nov.

• **Summary:** Gives a recipe for “Tofu turkey” [vegetarian], that uses 5 lbs. of Tofu Shop tofu. A photo shows Mara Segal in a large kitchen. “‘Spoons’ is the Arcata Co-op's own take-out kitchen, featuring ‘convenient cuisine’—delicious salads and entrees made with locally grown and organic ingredients whenever possible. Mara Segal is the kitchen manager at Spoons.

Talk with Matthew Schmit. 2009. March 6. The Tofu Shop was very close to the Arcata Co-op—which is a large organization. The Shop used to make the Tofu Turkey for the annual co-op employee Thanksgiving dinner, and give it to them so they would have a vegetarian alternative; they did that every year for years. Then Mara stepped in, started making the Tofu Turkey for her fellow employees, and adapted and improved the recipe; she never sold it. Matthew thinks she had been making it for at least several years before this article was written. Her improvement was later adopted by Bob Meeks. What she did, and what Mathew is doing now, is to mash fresh tofu, add spices and flavors, then mold and press it into a colander bowl, then put the stuffing in a hollowed-out cavity, then put more tofu over the bottom of that. Address: Staff.

2657. **Product Name:** Meatless Jumbo Franks (Hot Dogs).  
**Manufacturer's Name:** White Wave, Inc.  
**Manufacturer's Address:** 1990 North 57th Court, Boulder, CO 80301. Phone: 303-443-3470.

**Date of Introduction:** 1993 November.

**New Product–Documentation:** Talk with Lon Stromnes. 1993. Feb. 9. This product, which may be named Fat-Free Meatless Healthy Franks (Hot Dogs), will be launched in about April 1993. It will contain no eggs.

Talk with Lon Stromnes. 1993. April 14. This product will probably not be on the market until about late May. The product has been redesigned to be about 98% fat free. Also, their Meatless Healthy Franks is coming out in an improved formulation with much better texture.

Product Alert. 1993. Oct. 11. Jumbo Meatless Healthy Franks have been added to the White Wave line of refrigerated meat substitutes.

Talk with Lon Stromnes. 1994. Feb. 21. This product, called Meatless Jumbo Franks, was launched in Nov. 1993.

2658. Ruggles, Kristi. 1993. Schools put veggie burger on their menu: ADM to supply three Decatur high schools. *Herald and Review (Decatur, Illinois)*. Dec. 8.

• **Summary:** “Decatur—Students at Decatur’s three public high schools will sink their teeth into a new sort of burger today; a vegetable burger.”

ADM’s sales are picking up to The Pillsbury Co. and to the Ukraine.

“The burger is being promoted as a healthy and tasty alternative to meat.”

The British eat 70 million veggie burgers a year.

2659. Leiss, Richard S. 1993. Re: History of the use of spun soy protein fibers at Worthington Foods. Letter to William Shurtleff at Soyfoods Center, Dec. 16. 2 p. Typed, with signature on letterhead.

• **Summary:** Richard has just located a copy of the July 1962 issue of the *Worthington Chopletter*. The enclosed article is the earliest written reference he has been able to find on wet spun soy protein fibers and commercial retail products containing them. “The article does not specifically state which product was sold first, but certainly the Soyameat Fried Chicken Style, Minute Entrees Fried Chicken Style, and Minute Entrees Sliced Whitemeat Style were the first three.

He began to work for Worthington Foods in August 1962. At that time Worthington was not doing any commercial spinning of soy protein fibers. It is likely that at that time these wet fibers were being purchased primarily from the Ralston Purina Co. “Following the completion of the Worthington Foods research center in October 1964, a spinning line was set up in the pilot plant. This line was expanded so that commercial quantities of fiber were produced, probably beginning in 1965. This operation was continued until the construction of a larger manufacturing plant in 1970, at which time the spinning was relocated to the new building.

“During the same time period (1962-1968) some limited quantities of spun fiber were obtained from General Mills as well. It was my understanding that the GM fiber spinning line was located in the James Ford Bell Research Center, and I remember Worthington receiving fiber from General Mills for use in retail products. The fiber from each source [Ralston Purina and GM] was slightly different and had to be handled somewhat differently in production.

Richard is not aware that Worthington Foods ever sold wet spun fiber to Loma Linda Foods. “Certainly during the early years it was not a consideration by Worthington management because it did indeed give Worthington Foods a strong advantage over Loma Linda.”

“I have considered it an honor to have been a part of the evolution and development of the vegetarian food business in the United States. Knowing and being able to work with pioneers such as “Kelly” Hartman, Bob Boyer, “Cal”

Calvert, and Bill Atkinson have made my career something special...” Address: Director, R&D, Worthington Foods, 900 Proprietors Rd., Worthington, Ohio 43085-3194. Phone: 614-885-9511.

2660. Bria, Rosemarie Dorothy. 1993. Not dogs anyone? Meatless market goes mainstream. *E: The Environmental Magazine* 4:48. Dec. \*

• **Summary:** Includes example of meatless product by Yves Veggie Cuisine.

2661. *Food Production / Management (Baltimore, Maryland)*. 1993. Pillsbury and ADM to market Giant Green frozen Harvest Burgers. Dec.

• **Summary:** ADM has marketed this product selectively since its introduction in 1991. Harvest Burgers are presently marketed in Minneapolis, Minnesota; Chicago, Illinois; Indianapolis, Indiana; St. Louis, Missouri; Milwaukee, Wisconsin; Houston, Dallas, and San Antonio, Texas; and Louisville, Kentucky.

Pillsbury is a subsidiary of the Food Sector of Grand Metropolitan PLC, one of the largest international companies in the United Kingdom and a world leader in drinks, retailing and food. GrandMet sales are in excess of \$14,000 million. Other U.S. subsidiaries include Burger King, Carillon Importers, GrandMet Foodservice Inc., Haagen-Dazs, Heublein, the Paddington Corporation, and Pearle Inc.

2662. **Product Name:** Alpha-Omega Burger.

**Manufacturer’s Name:** Local Tofu.

**Manufacturer’s Address:** 307 Route 59, West Nyack, NY 10994-2033. Phone: 914-358-2309.

**Date of Introduction:** 1993 December.

**Ingredients:** Organic okara, flaxseed, whole wheat, barley, cornmeal, brown rice, buckwheat groats, carrots, sweet potato, cabbage, kale, parsley, collard, tofu, broccoli, soymilk, tamari, herbs, spices.

**Wt/Vol., Packaging, Price:** 8 oz.

**How Stored:** Refrigerated.

**New Product—Documentation:** Label sent by Sam Weinreb. 1996. May 21. 3½ inch diameter. Green on white. “Precooked—Steamed—Heat and eat.” Talk with Sam Weinreb, founder and owner of Local Tofu. 1996. May 27. This product was launched in Dec. 1993. Each pack contains 3 patties.

2663. *Soybean Digest*. 1993. Green Giant adds soybean burgers. Dec. p. 53.

• **Summary:** In October 1993, Green Giant, a division of Pillsbury, became the exclusive marketer of Harvest Burgers, developed by ADM in 1991. ADM has been producing the burgers in Decatur, Illinois, and marketing them in only 10 cities. Because ADM does not have the sales and distribution networks in place to handle a frozen product, the company

teamed up with Pillsbury. Pillsbury plans to dramatically expand distribution to over 50% of the U.S. by the end of 1994. Annual sales are projected to reach \$40-60 million within 3 years. So packages of frozen soy burgers are now adorned by the famous face of the Jolly Green Giant. Green Giant Harvest Burgers are sold in four varieties: Original, Southwestern Style, Italian, and breakfast. A package of four patties retails for about \$2.69. Pillsbury will target its product toward America's nearly 12 million vegetarians.

2664. Wittenburg, Bonnie. 1993. Archer Daniels Midland Company: NYSE-ADM. Minneapolis, Minnesota: Dain Bosworth. 36 p. 28 cm.

• **Summary:** Contents: Summary and recommendation: Valuation. Company profile. Operating review. Corn refining: High fructose corn syrup (HFCS), ethanol, bioproducts. Oilseed processing (soybeans, soy meal, soy oil): Edible soy proteins (soy protein concentrates, isolates, soy flour, and textured soy flour). Wheat milling. Other products and businesses. International trade: NAFTA and GATT. Financials. Recent results. Outlook and conclusion.

Index of exhibits. ADM sales by segment in 1988 and 1993 (p. 5; In 1993: Oilseed processing 50%, corn refining 28%, wheat milling 13%, other 9%). U.S. oilseed processing capacity (p. 20; ADM 28% of U.S. capacity, Cargill 25%, Bunge 16%, Ag Processors 14%, Central Soya 10%, Other 7%). World oilseed production by crop (p. 20; Soybeans account for 52% of the 227.3 million metric tons [tonnes] total). World soybean production by country (p. 20; Total 116.9 million tonnes, of which the U.S. produces 51%, Brazil 19%, Argentina 10%, China 9%, Other 11%). World vegetable oil consumption 1992 by crop (p. 21; Total 584. million tonnes, of which soybean is 30%, palm 21%, rapeseed 15%, sunseed [sunflowerseed] 14%, peanut 6%, cottonseed 6%, other 3%). Soybean meal use by livestock (p. 20; Poultry 51%, swine 27%, beef 8%, dairy cows 7%, other 7%). Largest exporters of soybean meal: 1990-1994 (tonnes in 1993/94 EC-12 8,830, Brazil 6,550, USA 4,944). Largest importers of soybean meal: 1990-1994 (tonnes in 1993/94 EC-12 13,630, Asia and Oceania 4,936, Middle East and North Africa 2,443).

This "Dain Bosworth Research Report" is "A fundamental appraisal of investment value." "ADM is so big and efficient, and its product lines are so diverse, that it can benefit from almost any positive trend impacting agriculture worldwide. ADM is believed to be the largest corn refiner, oilseed processor and flour miller in the United States... We recommend purchase of ADM shares based on our expectations of improved earnings momentum beginning in the fourth fiscal quarter of fiscal 1994."

Concerning edible soy proteins (p. 23-24): The entire U.S. meat substitute market is estimated at \$50-100 million annually today, and growing at 5-8% a year. The Green Giant Division of Pillsbury is marketing ADM's burgers under

the name Green Giant Harvest Burger. Worthington Foods of Ohio is the leader in the meat substitute category. Their Morningstar Farms burgers are precooked whereas ADM's burgers require cooking. ADM sold 70 million veggie burgers in fiscal 1993 and is now building capacity to triple production. A company named Aton, said to be one of the largest private enterprises in the Ukraine, has an agreement with ADM whereby ADM will be shipping \$100 million of soy-based food ingredients to the Ukraine by the summer of 1994.

Toepfer, which was started in Germany in 1919, handles approximately 9% of the total world grain trade and about 35% of the world trade in feedstuffs. ADM owns 50% of Toepfer; the other half is owned by 14 cooperatives from 7 countries including Gold Kist, Agway, Harvest States, AGP, etc. in the USA.

"We continue to believe that the long-term story for ADM is among the best of the companies we follow." "In our opinion, ADM is among the best positioned, best managed, and financially sound ag processing companies around" (p. 35). Address: 60 South Sixth St., Minneapolis, Minnesota 55402-4422. Phone: (612) 371-2728.

2665. **Product Name:** [Seitan Burgers (With Rice & Mushrooms, With Millet & Carrots)].

**Foreign Name:** Crocchette (ai Funghi Porcini, al Miglio).

**Manufacturer's Name:** Biolab.

**Manufacturer's Address:** Via dei Grabizio 11, 34170 Gorizia, Italy. Phone: +39 481 533522.

**Date of Introduction:** 1993.

**Ingredients:** With Rice & Mushrooms: Partially polished rice, wheat gluten (*glutine di frumento*), dried boletus mushrooms (8%), dried grated bread (*pane grattugiato*), onion (*cipolla*), garlic (*aglio*), parsley (*prezzemolo*), sunflower seed oil (cold pressed), sea salt.

**Wt/Vol., Packaging, Price:** 300 gm (2 servings of 150 gm each) vacuum packed separately, side by side.

**How Stored:** Refrigerated.

**New Product-Documentation:** Label and letter sent by Maura Ghiraldini and owner Massimo Santinelli. 1998. Dec. 5. This new (Dec. 1998) label (3½ by 5 inches) has the same pastel background for all seitan products—a stylized view of the sea and sky, with mountains on both sides and rolling hills in the foreground. At the top right is a smiling sun. At the lower left are two sunflowers; at the lower right ears of wheat. Text: "Organically grown (*prodotti dalla agricoltura biologica*)." "Ready in 5 minutes (*Pronto in 5 minuti*)."  
Refrigerate at 4°C. A small symbol shows a person recycling the container.

2666. **Product Name:** [Tofu Burgers].

**Foreign Name:** Crocchette al Tofu.

**Manufacturer's Name:** Biolab.

**Manufacturer's Address:** Via dei Grabizio 11, 34170

Gorizia, Italy. Phone: +39 481 533522.

**Date of Introduction:** 1993.

**Ingredients:** Partially polished rice, tofu (soy), onions (*cipolle*), carrots, sweet peppers (also called bell peppers; *peperoni*), bread crumbs (*pane grattugiato*), various spices (3%), sunflower seed oil, salt.

**Wt/Vol., Packaging, Price:** 300 gm (2 servings of 150 gm each) vacuum packed separately, side by side.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label and letter sent by Maura Ghiraldini and owner Massimo Santinelli. 1998. Dec. 5. This label (6 by 2.75 inches) has dark green text on a wavy red, orange, and yellow pastel background. A small blue and white oval logo states: “AgriEco Bio–Organically grown and certified (*Prodotti Biologici–Controllati e Garantiti*).” Refrigerate at 4°C. A small symbol shows a person recycling the container. This product has been discontinued.

2667. **Product Name:** Boca Burger (Meatless) [Original No-Fat, Chef Max’s Favorite, Hint of Fresh Garlic, Raw Meatless Product].

**Manufacturer’s Name:** Boca Burger Co., Div. of Energy Foods.

**Manufacturer’s Address:** 1101 Holland Dr. Suite 24, Boca Raton, FL 33487. Phone: 407-241-5030.

**Date of Introduction:** 1993.

**Ingredients:** Original flavor: “Protein from a new, delicious generation of soy with purified water, potato starch, soy fiber, dehydrated onion, natural flavors, spices, carrageenan (natural extract of an ocean plant), fresh garlic, natural malt extract.”

**Wt/Vol., Packaging, Price:** 10 oz. Four 2.5 oz patties per box.

**How Stored:** Frozen.

**Nutrition:** Per burger (71 gm): Calories 84, calories from fat 0, total fat 0 gm (0% daily value; saturated fat 0 gm), cholesterol 0 mg, sodium 227 mg (9%), total carbohydrates 9 gm (dietary fiber 5 gm, sugars 0 gm), protein 12 gm. Potassium 338 mg. Vitamin A < 2%, calcium 5%, vitamin C 3%, iron 8%. Percent daily values are based on a 2,000 calorie diet.

**New Product–Documentation:** Western Livestock Journal (Denver, Colorado). 1994. June 27. “White House menu now has new soy burgers: 4,000 in six weeks.” The meatless product is fat free and has only 100 calories per serving. Sarah Fritschner. 1994. Clarion-Ledger (Jackson, Mississippi). Aug. 24. “One burger... Hold the meat.” Max Shondor makes the Boca Burger in Florida.

Talk with Max Shondor [real name, Richard Gross]. 1994. Nov. 17. He spent two years developing this line of products, which he manufactures. Each of the first three products is available in both a packaged consumer form and as a bulk foodservice product. They do private label for all foodservice products. The Original flavor is a vegan

product. Chef Max’s Favorite contains a little Cheddar cheese and only 2% fat. Hint of Fresh Garlic is made with a little Mozzarella cheese and contains only 2% fat. They have a fourth unflavored product that is sold in bulk, 4 x 4-lb sleeves to a case, only to foodservice. It is vegan, and contains no fat; it handles like ground beef, and can be used to make burritos, tacos, burgers, meatless meatloaf, etc. They sell it to Pritikin and to Millie’s in San Rafael and her Millennium restaurant in San Francisco, California. The retail products are all pre-baked, but the bulk product is sold both raw and pre-baked. The main ingredient is ground up soybeans combined with some soy concentrates—prepared by a proprietary process. “We have the health food distributors on allotment; we are not yet able to supply all the product they want. We’re now making our products 24 hours a day, 7 days a week. We’re building a new plant that should be ready in 3-4 weeks.”

Max got involved in this kind of work about 18 years ago, when he had some natural food restaurants in Florida, where he baked pita bread sandwiches through a conveyor oven. He also had a commissary, where he made most of his products. He made a fried vegetarian burger then named the Sunburger, which he sold only at his restaurants. About 3 years ago he decided to develop a much better burger that contained little or no fat, had a texture that goes well between a bun, and has a good flavor. A few vegetarians don’t like it because they think it tastes too much like meat. His process is very original and proprietary.

Products (with Labels) sent frozen by Max Shondor. 1994. Dec. 1. Original: 8¼ by 4¼ by 1¼ inches. Paperboard box. Patties are individually sealed in a small plastic bag. Black, green, and red on white. Photo of a grilled patty below a sesame bun, and above sliced onion, tomato, and lettuce. “You won’t believe it! A revolutionary taste sensation. Meatless. No fat. No cholesterol. High protein. High fiber. 84 calories. Pre-baked, just heat. Vegan—No animal ingredients.”

Talk with Jim Corrales of Kinfolk Sprout Farms. 1995. Oct. 27. Richard Gross has changed his name to Max Shondor. He makes the Boca Burger. His phone is now 305-524-1977.

Talk with Nancy Miller at Lake Tahoe. 1998. Aug. 28. Boca Burger is a delicious veggie burger now being promoted on the radio by a gourmet chef; three flavors are sold at Diablo Foods in Lafayette, California.

Product with Label purchased at Safeway supermarket in Lafayette, California. 2000. July 2. “The Original Boca Burger. Meatless. Chef Max’s Favorite.” On the front panel, in white letters on green (1.75 by 0.87 inches) “A delicious source of good-for-you Soy. Contains 10 gm of soy protein per serving.” On one side is the full soy-heart health claim. Four patties retail for \$3.99. The main ingredients are now: Soy protein concentrate, reduced fat cheddar cheese, natural vegetarian flavors, and canola oil.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Boca Burger” (or “Boca Burgers”).

2668. **Product Name:** Exitex Blend [Fortified Rice Soy Casserole (Beef Flavor), Fortified Rice Soy Marinara (Chicken Tomato Flavor)].

**Manufacturer’s Name:** Exitex, Inc.

**Manufacturer’s Address:** 2200 Post Oak Blvd., Houston, TX 77056. Phone: 713-850-7095.

**Date of Introduction:** 1993.

**Wt/Vol., Packaging, Price:** 17.6 oz (500 gm) foil pouch.

**New Product–Documentation:** Leaflet titled “Exitex Blend: Prepackaged high protein meals” sent with Christmas Card by Roy Beery of Exitex. 1993. Dec. 13. These prepackaged high-protein meals contain textured soy protein concentrate. Color photos show the packages. Exitex: “Founded in 1985 by the late Mary Carla Weaver. Dedicated to serving the nutritional needs of the missions and humanitarian assistance communities.”

2669. Leatherhead Food Research Assoc. 1993. UK vegetarian food report. Randalls Road, Leatherhead, Surrey KT22 7RY, England. Price: £350 for members, £425 for non-members. \*

• **Summary:** “The 1992 UK vegetarian food market is estimated to be worth over £7,000 million and staple foods such as vegetables, pulses, eggs, cheese, pasta and rice dominate the market accounting for over 95% of sales. Sales of specialist vegetarian food products such as ready meals, Quorn products [made of mycoprotein or fungal protein], burgers and grills, and soya products amounted to an estimated £308 million in 1992 representing less than 5% of the total vegetarian food market. One of the most important trends in the vegetarian food industry in recent years has been the increasing involvement of the major mainstream food manufacturers in the supply of vegetarian foods, often at the expense of the specialist suppliers. The Report reviews market trends and shares, production and trade, packaging, retailing and advertising, as well as new product activity and manufacturer activities.” (Summary by *Soyafoods*, Autumn 1993, p. 4, 7). Address: Leatherhead, Surrey, England. Phone: +44 372 376761.

2670. **Product Name:** Legume Veggie Cutlet. Legume Taco Pocket.

**Manufacturer’s Name:** Legume, Inc.

**Manufacturer’s Address:** 112 Main Rd., Fairfield, NJ 07045. Phone: 201-263-1013.

**Date of Introduction:** 1993.

**Ingredients:** Tomatoes, tomato paste, water, whole wheat pasta (whole wheat flour, durum flour, water, wheat germ, bran), organic\* tofu [water, organically grown\* soybeans, magnesium chloride (nigari)], canola oil, onions, celery,

honey, parsley, garlic, spices, sea salt. \* = Grown in accordance with California Health & Safety Code 26569.11. **Wt/Vol., Packaging, Price:** 8½ oz (241 gm) plastic bag (boil-in-the bag).

**How Stored:** Frozen.

**New Product–Documentation:** Ad in Natural Food Merchandiser. 1993. p. 80. “How to win a food fight (Lesson #1). Come to Booth 219, 221, Organic Pavilion.”

2671. **Product Name:** [Bjorg Tofu Lasagna].

**Foreign Name:** Björg Lasagnes au Tofu.

**Manufacturer’s Name:** Setrab.

**Manufacturer’s Address:** E111–94538 Rungis Cedex, France.

**Date of Introduction:** 1993.

**Ingredients:** Pâte (wheat semolina\* and water), water, tomato concentrate\*, tofu\* 7.3%, carrots, tomatoes, modified starch, soya proteins, grated bread crumbs, salt, onions, sugar, seasonings.

**Wt/Vol., Packaging, Price:** 300 gm.

**New Product–Documentation:** Label sent by Heather Paine of SoyaFoods in London. 1993. Nov. 3. If you have any questions, contact Distriborg, 217 chemin du Grand-Revoyet, 69230 Saint-Genis-Laval.

2672. **Product Name:** Tesco 10 Vegetarian Sausages.

**Manufacturer’s Name:** Tesco Stores Ltd. (Marketer-Distributor). Made in Israel [probably by Tivall].

**Manufacturer’s Address:** Cheshunt EN8 9SL, England.

**Date of Introduction:** 1993.

**Ingredients:** Textured soya protein, wheat protein, sunflower oil, egg albumen, spices, flavourings, starch, salt, stabilisers (guar gum, carrageenan), vitamin C, niacin, pantothenic acid, vitamin B-1, vitamin B-6, vitamin B-2, vitamin A, vitamin B-12.

**Wt/Vol., Packaging, Price:** 300 gm paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Label sent by David Greenslade. 1994. Oct. 8.75 by 5 by 1 inch paperboard box. Dark green on light green. Color photo of ten sausages on a bed of lettuce on a plate with crocks of seasonings nearby. “Made from soya and wheat protein.”

2673. **Product Name:** Tivall Vegetarian Banger.

**Manufacturer’s Name:** Tivall.

**Manufacturer’s Address:** Kibbutz Lochamei Hagetaot, Oshrat 25220, Israel.

**Date of Introduction:** 1993.

**Ingredients:** Rehydrated soy and wheat proteins, sunflower oil, egg white, natural spices, natural flavouring, sea salt, onion, garlic, vitamin A, vitamin C, B-group vitamins (B-1, B-2, B-6, B-12, niacin, pantothenic acid).

**Wt/Vol., Packaging, Price:** 300 gm paperboard box. Retail for £2.53 (10/94, UK).

**How Stored:** Frozen.

**New Product–Documentation:** Label sent by David Greenslade. 1994. Oct. 8.75 by 5 by 1.25 inches. Dark green, light green and red on tan. Color photo of 4 bangers (like American hot dogs) on a white octagonal dish next to lettuce and one cherry tomato, all set on a wood table with red salt and pepper shakers nearby. “No preservatives. No artificial coloring. Vegetarian food products grown with nature’s goodness. Lightly smoked, shaped and textured vegetable protein.”

2674. **Product Name:** Seitan [Hot & Spicy Szechuan, BBQ Style, Mexican Chili].

**Manufacturer’s Name:** Vegan Epicure.

**Manufacturer’s Address:** 210 Park Place, Ithaca, NY 14850. Phone: (607) 272-0432.

**Date of Introduction:** 1993.

**Ingredients:** Hot & Spicy Szechuan: Wheat gluten, shoyu (water, soybeans), apple cider vinegar, Chinese peppercorns, spices, honey.

**Wt/Vol., Packaging, Price:** 8 oz. vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Spot in Vegetarian Journal. 1994. March/April. p. 27. Talk with Susie Gutierrez, founder and owner of Vegan Epicure. 1994. March 11. She introduced this flavor in 1992.

Label for Hot & Spicy Szechuan sent by Susie Gutierrez. 1994. March 14. 3.75 by 2.25 inches. Black on purple. 8 oz. These dark brown slices are 3 by 5½ by 1/8 inch thick.

2675. *Boots, Gypsy; Arthur, Mike; Hopkins, Jerry.* 1993. *The Gypsy in me! How to look younger and have more energy as you grow older.* Camarillo, California: Golden Boots Co. vi + 102 p. Illust. No index. 22 cm.

• **Summary:** Contents: Dedication and thanks. Introduction, by Charlie Fox. 1. Natural beginnings. 2. Living in nature. 3. Love and marriage. 4. Hollywood meets health nut. 5. Semi-stardom with Steve Allen. 6. Never too late to rejuvenate. 7. Exercise is a way to live. 8. Vital foods. 9. Eat and drink to your health. 10. Recipes for a healthier you. 11. Traveling through life.

In Chapter 8, titled “Vital foods,” the section on legumes includes soy milk, tofu, tempeh, and texturized vegetable protein. Here Gypsy notes that he has always been a vegetarian. Eggs and dairy products once formed a major part of his diet, but now he rarely eats those foods.

Chapter 10, titled “Recipes for a healthier you,” contains the following soy-related recipes: Scrambled tofu. Baked soy bean casserole. Tofu mushroom loaf. Tofu burgers. Soy burgers. Soya-rice flour coffee cake (with soy flour). Shakes (with seed, nut, rice, or soy milk). Many other recipes are seasoned with soy sauce. The Gypsy Boots smoothie (p. 93) calls for: 1 cup fresh apple or orange juice. 1 ripe banana. 1

tablespoon Kyo-Green. 1 date or a few raisins.

Contains many photos, both in black-and-white and color of Gypsy Boots, alone, or with family (p. iii, 19), friends, and celebrities. On the cover is a color photo of Gypsy in short pants standing barefoot on rocks in a stream. Eight unnumbered pages of color photos of Gypsy and friends on glossy paper follow page 70. This book has an unusually commercial tone. Throughout the book, Gypsy discusses the benefits of garlic supplements, wears Wakunaga’s Kyolic T-shirts in photos, and plugs Kyolic garlic quite a bit. Address: Camarillo, California.

2676. **Product Name:** Burritos brand Vegetarian Chili (With Textured Organic Soy Flour).

**Manufacturer’s Name:** Little Bear / Westbrae Natural Foods (Product Developer-Distributor).

**Manufacturer’s Address:** 1065 East Walnut St., Carson, CA 90746. Phone: 310-886-8200.

**Date of Introduction:** 1993?

**Ingredients:** Filtered water, whole organic soybeans\*, brown rice syrup (brown rice, water), tricalcium phosphate, expeller pressed organic canola oil\*, sea salt, vitamin A palmitate, vitamin D-2, riboflavin (vitamin B-2). \* = Organically grown and processed in accordance with the California Organic Foods Act of 1990.

**Wt/Vol., Packaging, Price:** 1 liter (1.06 quart) Tetra Brik Aseptic carton. Retail for \$1.89 (7/92, Maryland).

**How Stored:** Shelf stable; refrigerate after opening.

**Nutrition:** Per 8 fl. oz.: Calories 150, protein 6 gm, carbohydrate 18 gm, fat 5 gm (percent calories from fat 33, polyunsaturated fat 3 gm, saturated fat 1 gm), cholesterol 0 mg, sodium 140 mg, potassium 265 mg.

**New Product–Documentation:** Talk with Bill Bolduc. 1993. Aug. 16.

2677. **Product Name:** [Zonnatura Soya Saté {Skewered Soya Kabobs}].

**Foreign Name:** Zonnatura Soja Saté / Brochettes de Soya.

**Manufacturer’s Name:** Smits’ Reform BV.

**Manufacturer’s Address:** P.O. Box 17, NL-3880 AA Putten, Holland. Phone: (31) 3418-53869.

**Date of Introduction:** 1993?

**Ingredients:** Soy protein concentrate, powdered yeast extract, onion powder, leek powder, white pepper, salt, sugar, curry.

**Wt/Vol., Packaging, Price:** 4 kabobs weigh 100 gm.

**New Product–Documentation:** Label sent by Heather Paine of SoyaFoods in London. 1993. Nov. 3.

2678. Howard, Robert B. 1994. *Archer Daniels Midland Company. Positive Patterns (Rogersville, Missouri)* No. 23. p. 1, 5-6. Jan. 29.

• **Summary:** This is an analysis of ADM stock and its potential based on earnings and charts. The author sees a

very bright future for the company. He believes that “ADM will deliver superior returns to shareholders.” Mr. Andreas is a big-vision person who has a long range plan. Key products are lysine, tryptophan, and threonine for animal feeds, soy milk and Harvest Burgers (ADM Predicts these two products are likely to be the most important for ADM over the next 10 years), biological insecticides (ADM is the world’s largest producer), xanthan gums, and ethanol. ADM is an excellent cash generator. Every year they wisely acquire other companies, and they have an acquisition team that is second to none. They have made dozens of acquisitions during the past decade. Their balance sheet sparkles and is very straight forward and honest. ADM takes the long view. Address: Route 2, Box 248, Rogersville, Missouri 65742. Phone: 417-887-4486.

2679. Weller, Carl; Waller, Mickey “Iris.” 1994. Re: Changes at the Ford Mill in Saline, Michigan. Letter to William Shurtleff at Soyfoods Center, Jan. 28. 2 p. Handwritten.

• **Summary:** “We have all the old blueprints of machinery and buildings, old newspaper clippings as well as current news articles. The property continues to be of interest and has seen many changes since we owned it: Antiques, cider & doughnuts, small shops, furniture, and finally banquets.

“The mill has been transformed into 3 beautiful rooms, i.e. The Carriage House (which is housed in the old extraction building), the Raisin River Café (located on the basement level), and the new Henry Ford Room on the main floor of the mill... Since our retirement, our daughter, Wendy, has taken over and made many wonderful improvements—so it’s an on-going project.”

“P.S. The Ford Heritage Club has meetings in Dearborn, Michigan, and they still serve soy burgers. We are thinking of putting ‘soy’ something on our menus.” Address: 222 Liliuokalani #301, Honolulu, Hawaii 96815.

2680. Shurtleff, William; Aoyagi, Akiko. comps. 1994. Ralston Purina Co. and Protein Technologies International’s work with soybeans and soybean products—Bibliography and sourcebook, 1934 to 1993: Detailed information on 293 published documents (extensively annotated bibliography), 44 commercial soy products, 42 original interviews (many full text) and overviews, 16 unpublished archival documents. Lafayette, California: Soyfoods Center. 147 p. Subject/geographical index. Author/company index. Language index. Printed 4 Dec. 1993. 28 cm. [381 ref]

• **Summary:** The Ralston Purina Co.—originally named the Robinson-Danforth Commission Co.—was incorporated on 8 Jan. 1894 in St. Louis, Missouri. The founders, William H. Danforth (lived 1870-1955), George Robinson, and William Andrews belonged to the same church. The original capitalization was \$12,000. The company began by making horse and mule feed; their product was mixed with shovels on the floor of a back room. In March 1896 Danforth became

the president of the company and on May 26 of that year he became the majority stockholder. The next day the mill was completely destroyed by the worst tornado in St. Louis’ history. Danforth rebuilt the company and made it one of America’s largest producers of animal feeds.

Ralston Purina’s research on soybeans probably dates from the period before World War I, when the meal had to be imported from Manchuria. In 1926 the company established a 712-acre research farm at Gray Summit, Missouri, for testing all ingredients in laboratory-developed formulas. It is not clear when the company first used soybean meal in its feed products.

The company began processing soybeans in the depths of the Great Depression, probably in about 1930. By Aug. 1935 it had plants for processing soybean meal at Lafayette, Indiana, Circleville, Ohio, and St. Louis, Missouri. The company processed over 2,000,000 bushels of 1935 crop soybeans. By 1936 this soybean meal was being used in 14 products, mostly “Purina Chows,” animal feeds made by Purina Mills of St. Louis. It was sold under the famous corporate trademark, the red and white checkerboard.

By the early 1940s was the largest single consumer of soybean meal in America. By 1947 Ralston was operating at least four soybean crushing plants, located in Lafayette, Indiana; Iowa Falls, Iowa; Kansas City, Missouri, and St. Louis, Missouri. The four plants contained 23 expeller presses, had a capacity of 560 tons of soybeans per day, and a storage capacity of 3.91 million bushels of soybeans. The main product of each plant was Purina Chows.

Ralston Purina became involved with isolated soy proteins in 1958 through the acquisition of four soybean processing plants from Procter & Gamble (Buckeye Division). One P&G plant, located in Louisville, Kentucky had an industrial soy protein isolate operation built in about 1946-47 to produce industrial isolate for their Spic & Span house cleaner. During the 1950s P&G converted this plant to making industrial soy protein isolates for the paper coating industry. Production was started by Ralston Purina on 13 June 1959.

The roots of Ralston Purina’s work with edible soy protein isolates reach back to Henry Ford. In early 1960 Robert Boyer, who had become one of the world’s leading authorities on soy protein isolates while working for Henry Ford, began work as a full-time consultant for Ralston Purina. Starting that year, largely because of Boyer’s arrival, Ralston Purina began its first research on edible soy protein isolates at a new research and pilot plant at company headquarters in St. Louis. In 1961 a semi-works plant to create these products was erected at Louisville. In about September 1962 Boyer was named technical director of protein product sales in the soybean division of the Ralston Purina Co.; he worked for Ralston until his retirement in 1971. In 1962 Ralston Purina began to sell both spray-dried edible soy protein isolates (named Edi-Pro A and Edi-Pro

N) and the world's first commercial spun soy protein fibers (named Textured Edi-Pro or Fibrotein, and manufactured under patents owned by Robert Boyer). By July 1962 these fibers were being used by Worthington Foods to make a new generation of meatless meatlike products. Ralston Purina's food-grade soy protein products were sold only to the food industry, not directly to consumers.

Frank Calvert, Boyer's co-worker from the Ford Motor Co., was hired in November 1962 to head up Ralston Purina's R&D work on edible isolated soy protein in St. Louis. In 1965 Calvert was named director of soybean research, and in 1967 director of research of the protein division. Calvert is considered a visionary in soy protein research and the accomplishments of his career were honored in 1973 when the Ralston plant at Memphis, Tennessee, was dedicated to him.

By 1969 Ralston Purina had become the world's largest producer of formulated livestock and poultry feeds, with plants in over 40 states and 30 foreign countries.

By 1975 Ralston Purina employed more than 50,000 people worldwide and had sales of \$3,000 million a year.

In Dec. 1976 Dun's Review proclaimed Ralston Purina to be one of America's best-managed companies. "Besides being the world's largest producer of animal feed and pet food, Ralston Purina is also a leader in protein production and nutrition research, which have vast implications for the company's future."

A survey of U.S. and Canadian soybean processing facilities conducted in Nov. 1977 by Shearson Hayden Stone Inc. found that Ralston Purina was the fourth largest soybean crusher / processor in North America (after ADM, Central Soya, and A.E. Staley), with a capacity of 92 million bushels per year, representing 7.5% of total industry capacity.

During the late 1970s and early 1980s Ralston Purina, under R. Hal Dean (chairman) and William P. Stirtz (president and CEO), was restructured to focus on being a manufacturer of higher-margin consumer packaged goods and to move away from its inherently volatile commodity-based enterprises. During the restructuring, Ralston Purina sold a number of its core divisions that dealt with commodities and used the revenues to purchase many new companies—including Continental Baking Co., Eveready Battery Co., Jack-in-the-Box restaurant chain, Van Camp Seafood Co., Keystone all-seasons resort, etc.

On 2 Jan. 1985 Ralston Purina finalized its sale of six soybean processing facilities to Cargill. Ralston stopped operations at its seventh soybean processing plant in Memphis, Tennessee. The deal left Ralston completely dependent on outside sources for soybean products for its pet foods and other products.

In mid-1986 Ralston Purina sold Purina Mills, its U.S. animal feed business, which represented the origins of the company. The buyer, BP Nutrition, paid \$545 million for the prosperous mills. With these two sales, Ralston Purina exited

from the bulk animal feed and soybean crushing business. It still sold pet foods to consumers.

The company's 1986 annual report stated that Ralston Purina was the world's largest producer of dry dog and dry and soft moist cat foods, and was the largest wholesale baker of bakery products in the U.S. "Ralston's metamorphosis into a very attractive consumer packaged goods company is now essentially complete." During the past year the company had earned \$388 million on \$5,500 million sales.

In 1972 Ralston Purina expanded its isolated soy protein operations into Europe by forming Purina Protein Europe (PPE). This started as a marketing organization but soon expanded into a technical service organization with an Application Laboratory in the UK, first at West Haddon and then at St. Albans, Herts., not far from London's Heathrow Airport. By 1976 PPE had an office in Brussels, Belgium, and in late September, 1978, PPE opened Europe's first plant manufacturing isolated soy proteins, at Ieper (Ypres), Belgium.

Also in 1978, in America, Ralston Purina expressed its growing interest in soy protein foods by sponsoring the Keystone Conference on soy protein and human nutrition, a milestone event that brought together top researchers in the two fields and resulted in the publication of the proceedings (Wilcke et al. 1979).

Starting at about this time, Ralston Purina became the world's leading manufacturer of food-grade isolated soy proteins. On 1 July 1987 Ralston Purina Co. established Protein Technologies International (PTI) as a wholly-owned subsidiary, with 92 researchers. Today PTI continues to be the world's foremost maker of isolated soy proteins, with offices worldwide, and manufacturing plants in the USA and Belgium. PTI also makes several industrial isolates and Fibrim soy fiber.

Issued in commemoration of Ralston Purina's 100th anniversary, this is the most comprehensive bibliography ever published about Ralston Purina Co. and Protein Technologies International's work with soybeans and soybean products. It has been compiled, one record at a time, over a period of 18 years, in an attempt to document the history of these two pioneering companies. Its scope includes all known information about this subject, worldwide, from 1934 to the present.

This book is also the single most current and useful source of information on this subject, since 85% of all records contain a summary/abstract averaging 170 words in length.

This is one of more than 40 bibliographies on soybeans and soyfoods being compiled by William Shurtleff and Akiko Aoyagi, and published by the Soyfoods Center. It is based on historical principles, listing all known documents and commercial products in chronological order. It features: 30 different document types, both published and unpublished, every known publication on the subject in every language,

and 42 original Soyfoods Center interviews and overviews never before published. Thus, it is a powerful tool for understanding the development of these two companies from their earliest beginnings to the present.

The bibliographic records in this book include 293 published documents and 16 unpublished archival documents. Each contains (in addition to the typical author, date, title, volume and pages information) the author's address, number of references cited, original title of all non-English publications together with an English translation of the title, month and issue of publication, and the first author's first name (if given).

The book also includes details on 44 commercial soy products, including the product name, date of introduction, manufacturer's name, address and phone number, and (in many cases) ingredients, weight, packaging and price, storage requirements, nutritional composition, and a description of the label. Sources of additional information on each product (such as references to and summaries of advertisements, articles, patents, etc.) are also given.

Details on how to make best use of this book, a complete subject and geographical index, an author/company index, a language index, and a bibliometric analysis of the composition of the book (by decade, document type, language, leading periodicals or patents, leading countries, states, and related subjects, plus a histogram by year) are also included. The introduction contains a history of both companies. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

2681. Shurtleff, William; Aoyagi, Akiko. comps. 1994. *Wheat gluten and seitan—Bibliography and sourcebook, A.D. 535 to 1993: Detailed information on 462 published documents (extensively annotated bibliography), 363 commercial gluten and seitan products, 208 original interviews (many full text) and overviews, 104 unpublished archival documents.* Lafayette, California: Soyfoods Center. 347 p. Subject/geographical index. Author/company index. Language index. Printed 9 Dec. 1993. 28 cm. [922 ref]  
 • **Summary:** This is the first bibliography ever published about wheat gluten or seitan, and the most comprehensive book ever published on this subject. It has been compiled, one record at a time over a period of 18 years, in an attempt to document the history of these two interesting foods and food ingredients. Its scope includes all known information about this subject, worldwide, from A.D. 535 in China to the present.

This book is also the single most current and useful source of information on this subject, since 95% of all records contain a summary/abstract averaging 207 words in length.

This is one of more than 40 bibliographies on vegetable proteins being compiled by William Shurtleff and Akiko Aoyagi. It is based on historical principles, listing all known

documents and commercial products in chronological order. It features: 32 different document types, both published and unpublished; every known publication on the subject in every language—including 736 in English, 68 in German, 61 in French, 26 in Chinese, etc.; and 208 original Soyfoods Center interviews and overviews never before published. Thus, it is a powerful tool for understanding the development of gluten, seitan, and related products from their earliest beginnings to the present.

The bibliographic records in this book include 462 published documents and 104 unpublished archival documents. Each contains (in addition to the typical author, date, title, volume and pages information) the author's address, number of references cited, original title of all non-English publications together with an English translation of the title, month and issue of publication, and the first author's first name (if given).

The book also includes details on 363 commercial gluten and seitan products, including the product name, date of introduction, manufacturer's name, address and phone number, and (in many cases) ingredients, weight, packaging and price, storage requirements, nutritional composition, and a description of the label. Sources of additional information on each product (such as references to and summaries of advertisements, articles, patents, etc.) are also given.

Details on how to make best use of this book, a complete subject and geographical index, an author/company index, a language index, and a bibliometric analysis of the composition of the book (by decade, document type, language, leading periodicals or patents, leading countries, states, and related subjects, plus a histogram by year) are also included.

Introduction (p. 7-8): Gluten is a complex protein (composed of gliadin and glutenin) found mainly in wheat, but also in corn, barley and rye. It is best known for its ability to give elasticity and cohesiveness to bread, allowing it to rise. Vital wheat gluten, a cream-colored, free-flowing power, is most widely used to fortify flour and baked goods, but it also finds many other applications. One of the newest and most rapidly growing of these is its use as the main protein source in meatlike products.

Seitan is a Japanese word, coined in 1961 by George Ohsawa (Sakurazawa Nyoichi), a Japanese-born teacher of macrobiotics. He gave this name to a meatlike product developed by one of his students, Mr. Kiyoshi Mokutani. The product was first made commercially in 1962 by Marushima Shoyu K.K. in Japan. It was made by simmering raw wheat gluten in a broth, typically consisting of water, shoyu (soy sauce), kombu (a sea vegetable), and ginger. Seitan was first imported to the Western world in about 1969 by Erewhon, a macrobiotic and natural food company in Boston, Massachusetts.

The earliest publication seen that mentions the word seitan is a 34-page macrobiotic cookbook titled *Cooking*

Good Food, published in 1969 by Order of the Universe Publications in Boston. The author, whose name does not appear in the book, is Jim Ledbetter.

Since 1969, interest in and consumption of seitan in the United States and Europe has increased steadily. It continues to be used mostly as an alternative to meat and the macrobiotic community deserves much of the credit for its growing popularity. This book gives details on 104 commercial seitan products that have been developed and launched, mostly in the United States and Europe, and cites 80 published documents (including 40 cookbooks or articles with recipes) in which seitan is discussed. 73% of the published documents are written in English.

The history of gluten can be divided into various periods, a number of which are first documented in this book: Here are a few highlights.

**Early History in China:** The earliest Chinese reference seen to wheat gluten is in the *Ch'i-min yao-shu*, the world's earliest encyclopedia of agriculture, written by Chia Ssu-hsieh in A.D. 535. It describes *po to*, a type of noodle made largely from freshly-washed wheat gluten. By the Sung dynasty (960-1279) wheat gluten was being called by its present name, mien chin. It was widely used in place of meat, in various forms, by Buddhists in China. The first 17 citations in this bibliography, all published before 1600, come from China, as do 23 of the first 26 citation published before 1803.

**Discovery by Scientists in the Western World:** The earliest known reference to wheat gluten in the Western world was in 1745 in a Latin treatise titled *De Frumento* (Concerning Wheat), published in Italy. It describes how Beccari, a Professor of Medicine in the Anatomy and Chemistry Institute of Bologna, Italy, prepared a dough from wheat flour, then washed it with water to isolate the gluten. However as early as 1597 the term gluten had been used to refer to "The albuminous element of animal tissues" sometimes called animal gluten. In 1800 William Henry wrote in his book titled *An Epitome of Chemistry*: "Gluten forms the basis of the muscular or fleshy parts of animals." Numerous early observers noted that the gluten in wheat had distinctly meat-like or animal-like properties.

The first two English-language publications to mention wheat gluten appeared in 1803 in London. John Imison, in his *Elements of Science and Art* gave an excellent definition of wheat gluten. European chemists, especially those in France and Germany, took great interest in gluten, in its properties, and in the individual proteins of which it was composed. By 1900 they had issued more than 62 publications on the subject, compared with only 18 in the USA. In America, the first scientific publication on wheat gluten appeared in 1893, by Osborne and Voorhees in Connecticut.

**First Use as a Food in the West in Diabetic Diets:** In 1836 and 1841, the French scientist A. Bouchardat, while

doing research on diabetes, discovered that gluten was good for use in diabetic diets—which were supposed to have little starch. He proposed feeding diabetics with gluten bread that contained only one-sixth the starch of regular wheat bread. His proposal caught on and for the next century gluten came to be widely used in Europe and the United States mainly in diabetic diets. Many commercial diabetic food products were manufactured. 48 records in this book discuss gluten in diabetic diets.

**Seventh-day Adventists in America Discover Gluten:** The first original publication on wheat gluten in the United States appeared in 1882. It was an advertisement for Sanitarium Foods published in *Good Health* magazine. This company was located in Battle Creek, Michigan, and directed by Dr. John Harvey Kellogg, a famous Seventh-day Adventist physician who headed the Battle Creek Sanitarium. The ad mentions Gluten Wafers, Diabetic Food, and Gluten Food. The Seventh-day Adventists soon became pioneers in introducing gluten-based foods, especially meatlike products, to America. 256 records in this book relate to Adventists, including 174 commercial gluten products. In November 1929 La Sierra Industries in Arlington, California (founded and run by T.A. Van Gundy), introduced the world's first meatlike product based on wheat gluten. It was named La Sierra Soy Gluten. From this small beginning many other Seventh-day Adventist companies launched commercial meatlike products based on gluten: The two leaders were Worthington Foods (Worthington, Ohio; 67 products) and Loma Linda Foods (Riverside, California; 48 products).

**Popularization of Seitan in America and Europe:** All early seitan products in the Western world were made by members of the macrobiotic community. In America the first two commercial seitan products were introduced in Oct. 1972, made by Nik and Joanne Amartseff in Boston. Tan Pups, consisting of skewered deep-fried seitan in a breaded batter, were so delicious that just their aroma drew passers-by into the store. Piroshki (filled with seitan) were also innovative. America's third seitan product was Wheatmeat, sold as small meatball-like chunks in bulk. Its creator, John Weissman, made many of America's earliest and most innovative seitan products and he still owns the trademark on the term "Wheatmeat."

In Europe, the first three seitan products were all made by Jonathan P.V.B.A., founded and owned by Jos Van De Ponsele, who learned how to make seitan in Boston. They were Seitan (1978), Seitanburger (1979), and Seitan Pâté (1980). Since 1972 at least 62 commercial seitan products have been launched in the USA and 38 in Europe.

**The Rise of Gluten Worldwide:** Starting in the early 1960s interest in and use of gluten by cooks and food processors began to increase rapidly (see p. 335). The number of records in this book grew from 320 in the 1960s, to 476 in the 1970s, to 749 in the 1980s. In 1974 the first of

many gluten cookbooks was published by LeArta Moulton. In 1979 the International Wheat Gluten Association was founded by 11 wheat gluten manufacturers; it now has 23 members worldwide. Today most wheat gluten is sold as vital wheat gluten, and used in baked goods or to fortify flour. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

**2682. Product Name:** [Tofu Burgers: Sea Vegetables from Brittany].

**Foreign Name:** SOY Croque Tofou (algues de Bretagne).

**Manufacturer's Name:** SOY (Société Soy).

**Manufacturer's Address:** 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

**Date of Introduction:** 1994 January.

**Ingredients:** Label of Dec. 2011: Tofu\* 77.9% (water, dehulled soybeans\* 21%, coagulants: calcium sulfate, nigari), water, flakes of whole oats\*, soy sauce (water, whole soybeans\*, sea salt, *Aspergillus oryzae* culture), dried sea vegetables (dulse, nori) 1.6%, yeast extract, sea salt, parsley, bay leaf / laurel\*. \* = Organically grown ingredients. Certified by Ecocert F 32600 L'Isle Jourdain.

**Wt/Vol., Packaging, Price:** 200 gm paperboard box. 2 burgers per package.

**How Stored:** Refrigerated, 4 week shelf life at 4°C.

**New Product–Documentation:** Product with Label brought by Taro Mikuriya of the Nutrition & Santé Group (Revel, France). 2011. Dec. 14. Paperboard box. 4 by 6 by 1.5 inches. Green, blue and black on white.

Letter (e-mail) from Bernard Storup, founder of Nutrition & Nature (Revel, France). This product was first sold commercially in Jan. 1994.

**2683. Product Name:** Un-Turkey Slices.

**Manufacturer's Name:** Nature Boy Foods.

**Manufacturer's Address:** New York City, NY 10012. Phone: (212) 969-0633.

**Date of Introduction:** 1994 February.

**Ingredients:** Textured soy, soy sauce, aguar-aguar [agar-agar], arrow root, soy flour, charcoal flavor.

**Wt/Vol., Packaging, Price:** 6 oz.

**New Product–Documentation:** Label and letter sent by Susan F. Goldstein, D.O. (Doctor of Osteopathic Manipulative Medicine), 170 Great Neck Road, Suite 110, Great Neck, New York 11021. 1994. Feb. 3. Label is 3½ by 2 inches. Self adhesive. Green on white. No frills. Susan says these slices are delicious.

**2684. Product Name:** Roberts Burger [Surprise, or Hot & Spicy Surprise].

**Manufacturer's Name:** Soy Products of Australia Pty. Ltd.

**Manufacturer's Address:** 69 Power Road, Bayswater, VIC 3153, Australia. Phone: (03) 729-1738.

**Date of Introduction:** 1994 February.

**Ingredients:** Surprise: Soy grits, potato flakes, soy flour, carrot, onion and pea powders, parsley flakes, salt, lecithin granules.

**Wt/Vol., Packaging, Price:** 200 gm paperboard box.

**How Stored:** Store in a cool, dry, dark place.

**New Product–Documentation:** Box with Label sent by Paul Smith of Soy Products of Australia Pty. Ltd. 1995.

March 9. 4.5 by 6.75 by 1.375 inches. Blue, green, tan, and black on white. Color photo of a burger patty topped with sliced tomatoes and cheese on a bed of lettuce between buns. "Vegetarian. Gluten & wheat free. Just add water and your imagination. Mix packet with 1.5 cups boiling water. Makes 4-8 burgers." F.G. Roberts' Burger launched Feb. 1994.

**2685. Lensch, Lee. 1994. ADM's involvement with Midland Harvest and Harvest Direct (Interview).** *SoyaScan Notes*.

March 4. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** ADM's Soy Protein Division produces the Harvest Burger and Harvest Burger products. Harvest Direct is a separate company that has no affiliation with ADM, but that sells various food products (including ADM dry mixes) by direct mail. They buy products from ADM for their mail order business. ADM helped Harvest Direct to get started but ADM did not want to have or own a mail order company. ADM is glad they exist. They have many products in their mail order catalog that are not from ADM.

ADM also makes and sells 4 frozen products that Harvest Direct does not handle. These consist of 3 meatless Midland Harvest Harvest Burgers (Original Flavor, Taco Flavor, and Italian Style) and Midland Harvest Breakfast Patties. These were first produced in Jan. 1991, retail ready. ADM rarely sells foods retail but they have long sold some retail products in the Great Plains made by Martha Gooch / Gooch Foods (a milling and pasta company owned by ADM). The 4 Midland Harvest products was ADM's second retail line. In April 1990, before Harvest Direct was established, ADM started its first "public tasting" of the Harvest Burgers (as frozen patties) in Decatur. It took until September 1990 to get packaging for the product, and that month ADM made its first shipment, to Super Value supermarkets in Minneapolis, Minnesota, with Indianapolis being the real focus test market. So ADM sold directly to a supermarket chain, not to a food distributor. In Jan. 1991 the four frozen Midland Harvest products first really hit the grocery store shelves in Indianapolis as a test market. Since Jan. 1991 ADM has continued to expand the test market from Indianapolis to include Minneapolis, St. Louis, Chicago, Dallas, Fort Worth, Houston, San Antonio, Milwaukee, and Louisville. The purpose of this expanding test market was to see how the product would sell. As ADM saw how well it did sell, and kept getting more and more requests to expand, they expanded production and distribution. At the same time, they began to look for a company that could handle the product

better than ADM could—since ADM is not really in the retail foods business. In mid- to late 1991 Safeway in California called ADM to enquire about the product; ADM said they were not yet ready to sell Harvest Burgers in California. Finally ADM signed an agreement with Pillsbury to distribute and sell these 4 products under the Green Giant brand.

Pillsbury started with the products in October and to date they have increased their sales forecast for the year once and they are contemplating another increased forecast. Pillsbury noted: “Acceptance is quicker and wider than we anticipated which should allow us increased sales for fiscal 1994.” So ADM is back in the position it likes to be in, as a manufacturer rather than a distributor to the retail trade.

Harvest Direct is also doing very well; they keep expanding their business. Address: Harvest Burger Manager, ADM, Decatur, Illinois. Phone: 217-424-2492.

2686. Mahlich, John. 1994. History and development of the Haldane Foods Group Ltd. Part I (Interview). *SoyaScan Notes*. March 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Several people have been involved in the evolution of the Haldane-Granose Division. Archer Daniels Midland Co. (ADM, headquartered in Decatur, Illinois) bought The British Arkady Co. Ltd. about 20 years ago. At that time Arkady had been in existence in the UK for about 35 years, was a large supplier of bakery ingredients, but also was a miller of full-fat soya flour. “Arkady was in the soya business and this was the prime reason why ADM was interested in us, other than, of course, the nature and shape of our company. The original decision to buy Arkady was Dwayne Andreas’s, so Dwayne Andreas has always been there, behind everything that we have done, and usually, if not always, has basically approved any acquisition that we have made.”

After ADM bought Arkady, Arkady installed textured vegetable protein (TVP) plants in Manchester to ADM’s design. Arkady sold textured vegetable protein principally to the meat industry as part of a meat system (an analog, a sausage, etc.). They also sold some TVP to the pet food industry. Anna and Peter Roberts, the founders and owners of Direct Foods, Ltd. were buying Arkady’s TVP in bulk, then packing it into small domestic retail packs. At about that time (John does not remember whether it was the Roberts’ idea or Arkady’s idea), Arkady developed the Sosmix and the Burgamix using Arkady’s technology, and manufactured those products for Direct Foods. Because Direct Foods had become a reasonably sizeable company, and Arkady was selling them quite a percentage of their TVP, John (who was then the managing director of Arkady) and Bill Pringle (Arkady’s technical director) thought that Arkady should buy Direct Foods; that would guarantee the continuity of Arkady’s large sales of TVP to them. “We could run Direct

Foods and we would have the profit that they were making out of our product as well as our own margins.” John and Bill approached Anna and Peter, who had worked incredibly hard to build their small business and they were of an age where John felt they thought Arkady’s offer was fair and they should take the money and just retain their health food shop in Petersfield and enjoy the fruits of their years of work. So the sale was a happy event of both parties. So in March 1985 Direct Foods became the first member of what would become the Haldane Foods Group.

At that time Peter Fitch was a development chemist with Arkady. He is a food technologist by training. John asked Peter if he would become General Manager of Direct Foods. Having gotten into this business, Arkady liked what they were doing, so they began to look at other ways of adding value to textured protein. John happened to be at a health food exhibition, where he met the woman who was running a company named Vegetarian Feasts. John already knew a little about this company, and shortly after the exhibition John approached her and offered to buy her business. He saw an opportunity to put a lot of textured protein into her range of frozen meals and to add value to textured protein in that way. That purchase was completed in Feb. 1986. Peter Fitch took on the general management of that company as well, and Sonia Newhouse (the founder and former owner) became a consultant. This was a small company and it was not very profitable—but it put Arkady in the frozen food business. So they then started to make a range of frozen vegetable burgers containing vegetable protein and various grains.

John then heard about a company named Vegetarian Cuisine Ltd. which was basically doing the same sorts of things as Vegetarian Feasts. Vegetarian Cuisine had a nice factory in Coventry, whereas Vegetarian Feasts had a factory in London that was very expensive. John saw the opportunity to put the two into one manufacturing unit and to reduce costs by sharing them. So British Arkady bought Vegetarian Cuisine in 1987.

By this time Arkady was on the treadmill toward developing a “group” of companies, but they did not yet have a clear vision of the nature of this group. “It was because we were playing the game on a hand’s on basis that we saw the opportunities. But as our plans evolved, they became more and more clear.”

Next Arkady bought Haldane Foods Ltd., which owned The Regular Tofu Company. The acquisition was finalized in August 1987. Haldane Foods had the best factory and offices in the still nameless group, and it was the bigger of the companies Arkady had acquired, and the one with the better and nicest sounding name. So British Arkady coined the name Haldane Foods Group Ltd., and began to use it as the first name for the new group of companies. With each new acquisition, Peter Fitch continued to be the Director General Manager leading the Group. Sometimes it was decided to keep the past management of individual companies on board,

maybe as directorships or maybe as consultants, but in a variety of positions.

By late 1987 Arkady was getting fairly excited about production of frozen vegetable burgers. As they got into that market they found there was company named the Realeat Company, which was the dominant player in the frozen vege burger business at that time, and which had been started “by a very capable and likeable man named Greg Sams.” It seemed to John that he could advance the new Group’s cause by buying Realeat. So they approached Greg Sams and in September 1988 bought his business. That had great benefits for Arkady and the Haldane Foods Group because Realeat had no factory and no sales organization. One company was making the sachet mix, another company was selling it, another company was buying bulk mix from his sachet packer, and still another company was making it frozen; all in all a lot of people were taking a cut. So by tidying that all up and bringing it in house, Arkady had the chance to improve Realeat’s financial status. Continued. Address: The British Arkady Co. Ltd., Skerton Road, Old Trafford, Manchester M16 0NJ, England, UK. Phone: 061-872-7161. Fax: 61-873-8083.

2687. Mahlich, John. 1994. History and development of the Haldane Foods Group Ltd. Part III (Interview). *SoyaScan Notes*. March 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: Perhaps the key concept that governed the formation of the Haldane Group was adding value to soya—even though that policy was never clearly spelled out. In one sense, each company was acquired, one by one, without any overarching plan, on its own merits. Yet all companies in the group (except Saucemasters) make value-added foods from soya. The Group is fundamentally a “healthy foods” company that makes only vegetarian foods (i.e. those which contain no meat, fish, or poultry). Most of the foods are also vegan in that they contain no animal products.

The Group has bought about 13 companies and each had its own niche, name and reputation. Each company had its own brands, each of which had a reputation, and the Group has tried to keep these and promote them.

The Haldane Group could not have developed without the very strong health food market in the UK, where there are more than 2,000 health food retail shops. Equally important is the strong interest in vegetarian foods in the UK. When British Arkady bought Direct Foods in 1985, supermarkets in the UK had no space at all for healthier foods or vegetarian foods. Now they all have a separate health food section and that section is steadily growing.

Companies like Birds Eye (owned by Unilever) stand like a praying mantis and wait until the Haldane Group has built the market for Vegebürgers to such a size that they can enter the market with their own vege burger backed

by all of their marketing clout; they will try to push out competing products and steal your market. “They come into the supermarkets with their overriding discounts and they say ‘We’re already selling you £20 million. Put this product in and then you get another million pounds, plus you get a preferential discount, etc.’” This is a real concern as the Haldane Group becomes more of a force in the UK market. Fortunately there are 350 million people in the entire European Community. Moreover the Haldane Group has a bright future because they are “extremely inventive” and they have many loyal customers. They are leaders and other companies are following.

“Most all of these companies that we bought were started by devotees of healthier foods or vegetarians.” They all started small but most did not realize what a big, expensive step it is to get into food processing. So many of the companies were founded on good ideas but were crippled because their founders lacked business experience and were undercapitalized.

The various products sold by the companies in the Haldane Group are being made in five factories: the Unisoy factory (soyamilk), the Genice factory (non-dairy yogurts, ice creams, and margarine), the Haldane factory (which makes all dry mixes), and the Granose factory (which makes frozen burgers and many other non-dry products).

The Group now sells a large amount of frozen vegetarian sausages. If you make a conventional skinless sausage, you must first make it in the skin, then case harden it, then finally remove the skin. But removing the skin costs you money. So the Group has gotten a unique machine (they were the first to get it, but there are now a few others in other companies) that makes skinless sausages from the start. The machine was invented by another British company of which John used to be a director. These skinless sausages have become a big business and the product is of excellent quality. The Group plans to introduce this sausage product in new forms, such as sausage roles in pastry.

The Haldane Group is also doing a lot of private labeling for supermarket chains. The big food companies in the UK spend many millions of pounds on advertising, and they can slip in a vegetarian product under a known brand name. An example is ADM’s Harvest Burger sold under the Green Giant label in the USA, which led to a big increase Harvest Burger sales. The Haldane Group cannot afford to spend huge sums of money advertising its own brands. So they are finding that it is in their own interest to develop their own brands but at the same time to go to some of the supermarket chains and offer to make products under the supermarket’s brand. This is one way the Haldane Group can find new growth. Continued. Address: The British Arkady Co. Ltd., Skerton Road, Old Trafford, Manchester M16 0NJ, England, UK. Phone: 061-872-7161. Fax: 61-873-8083.

2688. Mahlich, John. 1994. History and development of the

Haldane Foods Group Ltd. Part IV (Interview). *SoyaScan Notes*. March 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The Group has an annual turnover (sales) of about US\$20 million. It is still looking for new business, but there are not many left to buy in the UK. The Group's UK operations are well organized and running well, with good factories, product development, distribution. Now they have decided to take their products into continental Europe. "If you can't get it right at home, you don't want to take it abroad." The Germans are the most health conscious eaters on the continent. This is a complex business because of a host of different conditions (laws, flavors, terminology, etc.) in each country, but the Group is presently trying to find its position in each of these markets. The Arkady Food Group (consisting of 7 companies that supply the baking industry with products) has manufacturing companies in Germany, France, Spain, Portugal, and Italy. Some of those are acting as distributors or agents for products from the Haldane-Granose Group. For example, in Spain, where there is a company named Arkady ADM Iberica, they have started a new division within that company called Alisana, which is selling the Haldane Group's products. But each product and its promotional materials must usually be modified for each market. Eventually, when tonnage warrants it, the Group hopes to start production in the various countries because transportation costs are very high—especially for frozen products.

Concerning possible entry into the U.S. market, John emphasizes the difference between selling commodities and selling specialties. You must think big in selling commodities and think small in selling specialties. John thinks that ADM is committed to much the same vision as he is "but their day to day work causes them to think in megatons." Yet the Harvest Burger may be changing that. ADM has recently employed Larry Cunningham to run their protein division. He has grown up in the business and he is extremely interested in the Haldane Group's activities. John thinks that as time passes ADM will embrace more and more of the activities that the Haldane Group has been involved with since its beginning. Yet John does not see a separate group, like the Haldane Group, starting in the USA. Rather he thinks that the Haldane Group has at least six world-class products, and that these will be sold in the USA. The Harvest Burger is, in fact, based on some of British Arkady's technology.

The Group has recently launched a new vegetarian product named Vegemince that John thinks has great potential in replacing what Americans call "ground beef" and what Britons call "mincemeat." Made at the Granose plant, it is based on textured vegetable proteins, including wheat gluten. "It is an extremely ingenious product that we've got patents filed for. It has an excellent texture that gives the mouth pleasure." The Group plans to sell it to other

companies that manufacture meatless products. The Group is developing many new products, even though it now has more products than he wants.

To summarize: "We have a 'healthy food' Group. We have five excellent factories. We have a good product range that's enlarging. We have some good developments coming up the line. We've got something that we can take into Europe that I think can be taken worldwide. The more successful we are, the more competition there will be. "Many people have been involved in creating this group of companies. Peter Fitch is a good source of information because he really lives the Group every day of the week. His official title is Director General Manager. Peter reports to John, who is responsible for many other companies including British Arkady (in Manchester), the European Arkady companies, 3 feed mills and a trading company in Ireland, etc. John was the Group Managing Director of ADM International Holdings, which has been restructured and is now named ADM International Ltd.; under it are British Arkady Company UK, Haldane Granose Food Group UK, and Arkady Feeds Ireland. The five-person board of ADM International Ltd. consists Dwayne Andreas, James R. Randall, Michael D. "Mick" Andreas, G. Allen Andreas, Jr., and John (the only Englishman).

"The main thing to remember is that this is all part of ADM, it has all been approved by Dwayne Andreas and the ADM board, and its very much in line with ADM's philosophy." Dwayne believes that soy products will play a key role in feeding this world. "To Dwayne, that is a mission." John hopes that the work of the many people in the Haldane Group may help Dwayne realize his dream. Address: The British Arkady Co. Ltd., Skerton Road, Old Trafford, Manchester M16 0NJ, England, UK. Phone: 061-872-7161. Fax: 61-873-8083.

2689. **Product Name:** Linda McCartney's Home Style Cooking—Meatless Entrees: Lasagna Roma.

**Manufacturer's Name:** Fairmont Foods of Minnesota, Inc.

**Manufacturer's Address:** 905 East Fourth St., P.O. Box 907, Fairmont, Minnesota 56031. Phone: 507-238-9001.

**Date of Introduction:** 1994 March.

**Ingredients:** Lasagna macaroni (durum semolina, niacin, iron (ferrous sulfate), thiamine mononitrate, riboflavin), tomatoes, water, Mozzarella cheese (pasteurized milk, cheese cultures, salt, enzymes, powdered cellulose to prevent caking), broccoli florets, cauliflower, ricotta cheese (pasteurized part-skim milk, fresh whey, cream, cheese culture, salt), carrots, tomato paste, soybean oil, wheat gluten, textured soy protein, canola oil, sugar, Parmesan cheese, (pasteurized milk, cheese culture, salt, enzymes, powdered cellulose to prevent caking), salt, mushroom base (mushrooms [sautéed mushrooms], salt, dextrose, butter, sugar, hydrolyzed soybean and wheat protein, flavoring, corn oil), egg whites, butter, vegetarian consommé (hydrolyzed

corn, soybean and wheat protein, vegetable stock, salt, disodium inosinate, disodium guanylate), dehydrated onion, natural roasted flavor (autolyzed yeast extract, salt, soybean and wheat), disodium inosinate and guanylate, mono and diglycerides, food starch modified, spice, flavoring, granulated garlic, xanthan gum, malt extract, granulated onion, butter buds (maltodextrin [from corn], modified butter oil and dehydrated butter, salt, shortening powder, guar gum, baking soda, annatto, turmeric), celery seed, dehydrated parsley, mono and diglycerides.

**Wt/Vol., Packaging, Price:** 12 oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Product with Label purchased at Safeway supermarket in Lafayette, California. 1995. April. 8 by 8 by 1.6 inches. On the front panel is a large color photo of Linda McCartney's face, in front of which is a plate of Lasagna Roma. The product is described on the front panel: "Layered lasagna with chunky marinara sauce and garden vegetables." The back of the package states that the products in this line [all introduced in March 1994] include: 7 Micro Pouch Entrees (Pasta Primavera, Pasta Provençale, Bavarian Goulash, Spaghetti Milano, Rignatoni Marinara, Chili Non-Carne, and Fattucine Alfredo), and 2 Preplated Dinners (Lasagna Roma, and Burrito Grandé).

Note: As of May 1995 the Pasta Provençale and the Rignatoni Marinara had been discontinued.

2690. **Product Name:** Linda McCartney's Home Style Cooking–Meatless Entrees: Burrito Grandé.

**Manufacturer's Name:** Fairmont Foods of Minnesota, Inc.

**Manufacturer's Address:** 905 East Fourth St., P.O. Box 907, Fairmont, Minnesota 56031. Phone: 507-238-9001.

**Date of Introduction:** 1994 March.

**Ingredients:** Incl. wheat gluten, textured soy protein, and soy sauce powder.

**Wt/Vol., Packaging, Price:** 13 oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Product with Label purchased at Safeway supermarket in Lafayette, California. 1995. April. 8 by 8 by 1.6 inches. On the front panel is a large color photo of Linda McCartney's face, in front of which is a plate of Burrito Grandé. The product is described on the front panel: "Burrito with spicy, chunky filling, vegetarian refried beans and Mexican-style corn."

2691. **Product Name:** Linda McCartney's Home Style Cooking–Meatless Entrees: Pasta Primavera.

**Manufacturer's Name:** Fairmont Foods of Minnesota, Inc.

**Manufacturer's Address:** 905 East Fourth St., P.O. Box 907, Fairmont, Minnesota 56031. Phone: 507-238-9001.

**Date of Introduction:** 1994 March.

**Ingredients:** Incl. wheat gluten, textured soy protein, and soy sauce powder.

**Wt/Vol., Packaging, Price:** 14 oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Product with Label purchased at Safeway supermarket in Lafayette, California. 1995. April. 9 by 6¼ by 1.4 inches. On the front panel is a large color photo of Linda McCartney's face, in front of which is a plate of Pasta Primavera. The product is described on the front panel: "Linguini with Garden Vegetables in creamy Alfredo Sauce." Note: "Primavera" (which comes from the Italian *alla primavera* or "in the style of springtime"), a term first used in English in 1976, refers to dishes served with a mixture of fresh vegetables.

2692. **Product Name:** Farm Foods Pizsoy Pockets [Broccoli & Cheddar, Garden Pizza, Veggie Chicken BBQ, Veggie Pepperoni, Spinach & Mushroom].

**Manufacturer's Name:** Farm Foods.

**Manufacturer's Address:** 49 Old Bloomfield Ave., Mountain Lakes, NJ 07046. Phone: 201-334-0101.

**Date of Introduction:** 1994 March.

**Ingredients:** Broccoli & Cheddar: Outer crust: Organic whole wheat flour, organic wheat flour, water, canola oil, honey, olive oil, salt, yeast, vanilla extract. Filling: Fat-free soy cheddar (organic tofu, calcium caseinate [derived from non-fat milk], corn and rice starch, sea salt, citric acid, natural flavor, soy lecithin, vegetable gum, annatto), onions, rice starch, water, nutritional yeast, corn oil, salt, garlic powder, spices.

**New Product–Documentation:** Leaflet (8½ by 11 inch, black-and-white) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. "Pizsoy Pockets: 5 Great Recipes." Each contains a tasty blend of organic grains, tofu, and vegetables. They are completely lactose and cholesterol free. The outer crust ingredients are the same for all varieties.

2693. **Product Name:** Lightlife Lightburgers (Meatless Burgers).

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** P.O. Box 870, Greenfield, MA 01302. Phone: 1-800-274-6001.

**Date of Introduction:** 1994 March.

**Ingredients:** Water, textured soy protein concentrate, tapioca starch, natural flavors from vegetable sources, soy sauce, dehydrated onions, isolated soy protein, dehydrated tofu, malt extract, beet powder, vegetable gum.

**Wt/Vol., Packaging, Price:** 6 oz (2 burgers per package).

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. "You'll sell a lot more meatless burgers—once you see the light." Introducing the Lightburger from Lightlife.

Ad (full-page color) in *Natural Foods Merchandiser*. 1994. July. Inserted between p. 72 and 73. "You'll sell a lot

more meatless burgers—once you see the light.”

Ad (½ page, color) in *Vegetarian Times*. 1994. Oct., p. 43. “Most veggie burgers taste like, well, veggies.” Contains a 30¢ coupon. A color photo shows the front of the package. This ad also ran in *Vegetarian Times* in 1997 in Feb. (p. 24) and March (p. 42).

Lightlife Foods. 1998. March. “The best tasting meatless burger at the best every day price” (8½ by 11 inch leaflet).

2694. **Product Name:** Better Than Meat (Fat-Free Meat Alternative) [Pizza Topping “Sausage,” Taco Filling “Beef,” Breakfast “Sausage” Patty, or “Hamburger” Patty].

**Manufacturer’s Name:** Sharon’s Finest (Product Developer-Marketer).

**Manufacturer’s Address:** P.O. Box 5020, Santa Rosa, CA 95402-5020. Phone: 707-576-7050.

**Date of Introduction:** 1994 March.

**Ingredients:** Water, peas, spices, yeast, vegetable gum, beet juice, organic spinach, organic carrots, food-grown vitamins and minerals (incl. anti-oxidants and beta-carotene, GTF chromium, and selenium).

**How Stored:** Refrigerated.

**New Product–Documentation:** Leaflet (8½ by 11 inch, black, purple, and green on tan kenaf paper) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. “Product information. Sharon’s Finest Healthy Alternatives.” “Better Than Meat... Advantages: Fat-free and cholesterol-free. Great for people allergic to dairy, eggs, wheat or soy. Perfect for transitional vegetarian and fat-reduced diets.”

2695. Worthington Foods, Inc. 1994. Annual report 1993. 900 Proprietors Rd., Worthington, OH 43085. 16 p. 28 cm. • **Summary:** See next page. On the cover is Worthington’s logo, slanted and in pink, against a light gray background. Total sales rose to \$79.3 million in 1993, up 3.6% from \$76.5 million in 1992. Net income was \$1.8 million for 1993, down 36% from \$2.8 million in 1992.

On the inside front cover are the “Corporate objectives” and “Mission statement.”

A “Notice of annual meeting of shareholders” (12 p.) is attached.

A table (p. 3) shows the number of shares owned by each director. The four largest shareholders are: George T. Harding IV (3.7% of common stock). Allan R. Buller (3.4%). Dale E. Twomley (2.1%). Donald G. Orrick (2.1%).

A table (p. 9) shows a summary of compensation (annual and long term). Dale E. Twomley, President and CEO, has a salary of \$190,000 + \$28,194 all other compensation.

The LaLoma brand has now been changed back to the Loma Linda brand. Address: Worthington, Ohio. Phone: (614) 885-9511.

2696. Worthington Foods, Inc. 1994. Free merchandising kit:

Over a \$50 value. No meat, one week. The Great American Meat-Out, March 1994 (Leaflet). 900 Proprietors Rd., Worthington, OH 43085. 1 p. Front and back. 28 cm.

• **Summary:** The purpose of this leaflet is to promote Worthington’s Natural Touch line of products. The word “Worthington” does not appear on the leaflet. On the front is the black silhouette of a cow standing in a red circle with a read line drawn diagonally (from upper left to lower right) through it. Across the bottom: “See reverse side for details.”

On the rear is an explanation, with photos of what the kit includes: Various numbers of cases of 8 Natural Touch products (at 15%+ discount), plus a window banner, 100 printed flyers, one cotton T-shirt, ten badges for store employees, point of sale signs for Natural Touch products, line art for use in advertising the store event, written news release, etc. Address: Worthington, Ohio. Phone: (614) 885-9511.

2697. **Product Name:** Tanpacky Vegetable Sliced Ham.

**Manufacturer’s Name:** YCM Associates Inc. (Marketer-Distributor). Made in Japan.

**Manufacturer’s Address:** 22808 Lockness Ave., Torrance, CA 90501. Phone: (310) 530-8863.

**Date of Introduction:** 1994 March.

**Ingredients:** Soybean protein, canola oil, soy sauce (soybeans, wheat, salt), honey, salt, apple cider vinegar, natural smoked flavor, natural seasoning.

**Wt/Vol., Packaging, Price:** 5.64 oz (160 gm).

**How Stored:** Refrigerated.

**New Product–Documentation:** Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. “It’s extra low cholesterol. Vegetable sliced ham. You can serve in the raw or cooked. No preservatives. No animal fat.”

2698. **Product Name:** Yves’ Original Bagel Dog, or Chili Bagel Dog.

**Manufacturer’s Name:** Yves Veggie Cuisine.

**Manufacturer’s Address:** 1138 East Georgia Street, Vancouver V6A 2A8, B.C., Canada. Phone: 604-251-1345.

**Date of Introduction:** 1994 March.

**Ingredients:** Bagel Dog: Veggie Wiener: Water, soy protein isolate, wheat gluten, tofu (water, organic soy beans, magnesium chloride), wheat starch, sea salt, ground mustard, guar gum, natural liquid hickory smoke, beet powder, paprika, brown rice syrup solids, wheat germ, spices. Bagel: Whole wheat flour, unbleached white flour, water, vinegar, yeast, malt, sea salt.

**Wt/Vol., Packaging, Price:** 4.4 oz (125 gm).

**How Stored:** Frozen.

**New Product–Documentation:** Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1994. March 10-13. “Two great ideas. A great new meal. Introducing Yves’ Original Bagel

## C O R P O R A T E O B J E C T I V E S

### MISSION STATEMENT

*Worthington Foods, Inc. is solely dedicated to producing and marketing vegetarian and other healthful foods. Worthington Foods will continue to be a leader in providing nutritionally balanced options to meat, egg and dairy products for healthful living, as it has done for more than 50 years.*

### SHAREHOLDER OBJECTIVE

To provide our shareholders with increasing value from their investment in Worthington Foods. As a 50-year-old growth company, we recognize the necessary balance between consistent dividends and additional shareholder value created through the internal use of generated profits. Our primary responsibility is to our shareholders. Strategies are elevated not just in terms of increased sales or net income, but with an eye toward enhanced shareholder value as measured by the market appreciation of our stock and its dividends. This approach emphasizes economic cash flow analysis, the company's cost of capital, return on assets and other appropriate standards in evaluating growth opportunities.

### CONSUMER OBJECTIVE

To provide our consumers with good-tasting, nutritionally sound vegetarian choices for healthful living. Virtually all of our products are cholesterol-free and contain less total fat and saturated fat than the meat, egg and dairy products they are intended to replace. With more than 150 items among our four brand lines, Worthington Foods offers a variety of high-quality, convenient products appealing to the full spectrum of health-concerned consumers. The market ranges from those desiring to reduce their intake of fat and dietary cholesterol to those seeking only vegetarian foods.

### TRADE OBJECTIVE

To provide our trade consumers with a wide assortment of healthful, high-quality products to best satisfy the needs of their shoppers, whether motivated by health or philosophical reasons. Worthington Foods' products will provide our consumers with good value at a fair price while permitting the trade to realize a competitive profit. Demand will be generated through appropriate trade promotions, consumer advertising and merchandising support. To that end, we will maintain our commitment to providing greater product offerings and increased sales volume in supermarkets, health food stores, specialty markets and food service operations, both nationally and in targeted international markets.

### EMPLOYEE OBJECTIVE

To provide our employees with challenging and satisfying employment in a pleasant working environment. Stable employment with appropriate financial rewards for outstanding work accomplishments can be expected. Personal growth and development will be encouraged, and all employees will have opportunities to be well informed and meaningfully involved in their company.

### COMMUNITY OBJECTIVE

To provide our local community and those we serve with a good corporate neighbor which practices the highest values of honesty, integrity and mutual trust. We will assume a responsible leadership role in economic, social and industry matters in which we believe we can have a positive influence on the public welfare.

### WORTHINGTON FOODS

The Company will continue to establish policy and conduct business based on the Judeo-Christian ethics and moral values upon which it was founded and has operated within for more than 50 years.

**YVES VEGGIE CUISINE**

Two great ideas.  
A great new meal.

Introducing...  
Yves' Original Bagel Dog

Yves' famous fat-free Veggie Dog, hand-wrapped in a whole-wheat bagel and baked to perfection.

\* Also available:  
Yves' Chili Bagel Dog

**Yves' ORIGINAL BAGEL DOG**

The perfect combo!

Dog. Yves' famous fat-free Veggie Dog, hand-wrapped in a whole-wheat bagel and baked to perfection." Front side shows a color photo of 3 bagel dogs. Back side gives ingredients and nutritional information.

2699. *Toyo Shinpo (Soyfoods News)*. 1994. Daizu shokuhin ga migoto ni tappuri. Kyôto eki no shôjin bentô [Abundant, delicious soyfoods in the vegetarian box lunch at Kyoto station]. April 1. p. 13. [Jap]

• **Summary:** In this box lunch, which retails for 1,000 yen at the Bullet Train line in Kyoto, there are 7 soyfoods: Seasoned, cooked rice with soybeans. Cooked and seasoned tofu burger (*ganmo*). Fried dried-frozen tofu (dusted with flour). Cooked black soybeans. Tofu shûmai (*shao-mai* steamed dumplings filled with tofu). Fried okara. Fresh yuba. Sesame tofu. An illustration shows the placement of foods in the octagonal box. With the recent boom in healthy foods in Japan, the popularity of this lunch among women has increased sharply.

2700. Graves, Cheri. 1994. Information about Cedar Lake–MGM Foods (Portfolio). Cedar Lake, Michigan. 38 inserts

• **Summary:** Inserts include: (1) Cover letter from Cheri (typed, with signature, on letterhead): "Enclosed is a package containing labels, a price sheet, nutritional information, and further information about our products. We will be working on new labels for the majority of our

products, and the new labels will have a new look along with nutritional information for each one... Enclosed is the article I mentioned to you over the telephone. I don't have the cover sheet, but the article was in the *Review and Herald*, March 1991 issue. Since that time, as I mentioned to you, Cedar Lake Foods, Inc. and MGM Brands, Inc. have formed a partnership. This took place on January 1, 1993. MGM Brands, Inc. was a Canadian company that manufactured frozen vegetable protein products in Scarborough, Ontario. I believe the company had been in business for about 10 years and was started by Graham Munroe. The partnership between the two companies allows us to offer canned and frozen products from the same location."

(2) 31 original labels or packages. Wheat gluten is usually the main ingredient. (3) Wholesale price list, effective Oct. 1, 1993 (2 p.). (4) Cedar Lake Foods nutritional information (1 p.). (5) Nutritional analysis (6 p.). (6) Recipes for using new Cedar Lake products: Quik Burger, Dinner Steaks, Vegi-Scallops, Insta-Soy Milk (3 panels each side). (7) Recipes for using new MGM products: Meatless Franks, Tofu Franks, Tofu Franks–Jumbo BBQ, Boloni Slices and Rolls, Quik Chik Rolls, Salami Slices and Rolls, Golden Burger, Breakfast Links, Sausage Roll, Samburger, Corned Beef Slices and Rolls, MGM Burger, Breakfast Strips, Vegetarian Scallups, Chicken Slices & Rolls, Golden Nuggets, Turkey Slices & Rolls, Golden Dinner Cuts, Vege-Pizza Topping (3 panels each side). (8) Three leaflets for new products. Address: P.O. Box 65, Cedar Lake, Michigan 48812. Phone: (517) 427-5143.

2701. Althoff, Susanne. 1994. Meatless muscle: Vegetarian bodybuilders bulk up just fine without the beef. *Vegetarian Times*. April. p. 69-70, 72, 74-75.

• **Summary:** Vegetarian bodybuilders include Andreas Cahling ("Mr. International," weighs 210 lb, from Cardiff by the Sea, California) and Bill Pearl (four time "Mr. Universe." He was a vegetarian when he won his titles in 1967 and 1971), Spice Williams (vegan actress and stuntwoman), and Beth M. Ley.

"Twenty-five years ago there were virtually no professional bodybuilders who were vegetarian," says James E. Wright, at editor at *Muscle & Fitness* magazine (Woodland Hills, California). "Now there are several."

A table gives typical daily menus for Bill Pearl, Andreas Cahling (incl. Tofu Burrito and Rice pudding made with soymilk), Spice Williams (10 oz. shake with soymilk, water, and soy protein powder, 8 oz. tempeh burger, 2 cups cooked TVP (textured vegetable protein)).

Pearl, age 63, is still a vegetarian but no longer competes. "Spice Williams turned vegetarian as part of a program to get her life back on track after overdosing on drugs."

Photos show the muscled bodies of (1) Bill Pearl. (2) Spice Williams. (3) Andreas Cahling.

2702. **Product Name:** Premium Vegetarian Sausages.  
**Manufacturer's Name:** Cauldron Foods Ltd.  
**Manufacturer's Address:** Units 1-2, Portishead Business Park, Portishead, Bristol, BS20 9BF, England. Phone: (275) 818448.

**Date of Introduction:** 1994 April.

**Ingredients:** Incl. tofu, vegetables, herbs, spices.

**Wt/Vol., Packaging, Price:** 250 gm chiller pack of 5. Retails for £1.19.

**How Stored:** Frozen.

**New Product–Documentation:** Spot in *Soyfoods (ASA, Europe)*. 1994. Spring, p. 5. "New vegetarian sausage from Cauldron Foods." A photo shows the package.

2703. Kevin, Kitty. 1994. *Analogs: Fabulous fakes. How five companies make the all-American burger meatless. Food Processing (Chicago)* 55(4):39-40, 42, 44. April.

• **Summary:** This article leads off the "Foods of Tomorrow" section. "Meatless burgers are going mainstream—sort of." The five companies are Worthington Foods (Worthington, Ohio—Grillers), Wholesome & Hearty Foods, Inc. (Portland, Oregon), Fantastic Foods, Inc. (Petaluma, California), Archer Daniels Midland/Pillsbury (Decatur, Illinois), Sharon's Finest (Santa Rosa, California). Green Giant Harvest Burgers are made by ADM and distributed by Pillsbury. The basic ingredient is texturized soy protein concentrate. A color photo shows four flavors of frozen Harvest Burgers. Address: Associate editor.

2704. **Product Name:** Fat-Free Meatless Smart Dog to Go!

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** P.O. Box 870, Greenfield, MA 01302. Phone: 1-800-274-6001.

**Date of Introduction:** 1994 April.

**Ingredients:** Water, isolated soy protein, vital wheat gluten [powdered], brown rice syrup solids, salt, beet juice concentrate, koji rice extract, wheat starch (from whole wheat), natural flavors from vegetable sources, spice extracts, carrageenan, vegetable gum. All of our ingredients are 100% natural and contain no HVP, MSG, nitrates, or other additives.

**New Product–Documentation:** Spot in NFM's New Product Review. 1994. Spring (May). p. 7. This is a vegetarian, soy-based hot dog wrapped in a whole wheat bagel dough. A photo shows the product and label.

2705. *Soyfoods (ASA, Europe)*. 1994. News from ADM. 5(1):2. Spring.

• **Summary:** "Hidde van der Wal has been appointed Sales Director of ADM's Protein Division. He is based at ADM Europoort and his responsibility is to promote ADM'S major brands of soya isolates, concentrates and textured vegetable proteins throughout Europe.

"ADM has recently won a \$100 million contract with a Ukraine company. ATON (a large private company) for the supply of food ingredients, including soya proteins, soya-based milk powders and 135 million servings of Harvest Burger—ADM's proprietary vegetarian burger."

2706. *SoyaScan Notes*. 1994. Tofu and vegetarianism on the popular children's television program "Where in the World is Carmen San Diego?" (Overview). April. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** This popular TV program is broadcast daily on KQEV television (Channel 9) in the San Francisco Bay Area and Northern California. One day a giant dog came into the studio and gave Greg Lee, the host, some clues. As a reward, Greg gave him a huge white bone, on which was written "Tofu Bone."

In the second round of the show, the contestants enter a station, where they receive some clues over the telephone. On the wall next to the telephone is a poster of a tofu burger—clearly labeled.

At the end of the second round of the show, the young person who wins is given a leather folder in which he or she is asked to write the name of the place where he or she would like most to go in North America. One day when Greg Lee said, jokingly, to the winner as he passed the folder: "Is this a genuine imitation leather folder?"

2707. *Vegetarian and organic food*. 1994. London: Mintel Ltd. \*

• **Summary:** This new report, which sells for £295, shows that more than 10% of the UK population is vegetarian. The figure rises to 17% among teenagers. This "dramatic growth" is due to health and ethical factors.

Since 1988, sales of meat alternatives, such as tofu and Quorn, have grown from £6.6 million to £22.5 million, and sales of organic foods have increased by a factor of five. Overall sales of vegetarian foods increased from £8.8 billion in 1988 to £11 billion in 1992.

The report also notes that women are more likely to be vegetarian than men and that London has the highest proportion of people with a mainly vegetarian diet. Address: 18-19 Long Lane, London EC1A 9HE, England, UK.

2708. **Product Name:** New World Foods Red Chile Tamales, Green Chile Stew, Chorizo, Hearty Chili (Vegetarian—With Befine).

**Manufacturer's Name:** VPS, Inc.

**Manufacturer's Address:** 2889 Trades West Rd., Santa Fe, NM 87505. Phone: 505-471-8979.

**Date of Introduction:** 1994 April.

**Ingredients:** Red Chili Tamales: Organic corn, Organic Befine (soybeans, water, calcium sulfate—a natural mineral, caramel color), organic soy fiber, organic corn meal, red chile pods ground with water, soybean oil, shoyu (water,

soybeans, wheat, salt), spices, salt.

**Wt/Vol., Packaging, Price:** 12 oz vacuum pack—Contains 4 tamales.

**How Stored:** Frozen or refrigerated.

**Nutrition:** Per 2 tamales: Calories 275, calories from fat 98, total fat 11 gm (saturated fat 1 gm), cholesterol 0 mg, sodium 365 mg, total carbohydrate 41 gm (dietary fiber 6 gm), protein 10 gm, vitamin A 25%, vitamin C 2%, calcium 26%, iron 64%.

**New Product–Documentation:** Letter and color labels for each product sent by Richard Jennings of VPS, Inc. (Vegetable Protein Specialists). 1994. Dec. 28. The first focus of New World Foods products was foodservice. Starting in 1990 the company used generic labels printed with a personal computer and label printer. In the spring of 1994 they decided to go after the retail market as well. So they developed attractive new color labels for each product. “Shortly after we started the retail venture, it became clear that our future was with Befine. So we went completely into that. We have exhibited at the IFT (Institute of Food

Technologists) in Atlanta (Georgia), and the FIE (Food Ingredients Europe) in London (4-6 Oct. 1994). Enclosed is our brochure (color leaflet) titled “Befine: The ideal meat replacer. Eating is believing!”

**Label.** 1994, spring. 5 by 4 inches. Self adhesive. Red Chile colors: Red, orange, black, blue and green on white. Color illustration of many vegetables in a circle. “Delicious. Satisfying. No cholesterol. Low fat.” Note: Befine is made from firmly pressed, crumbled tofu curds.

**Talk with Richard Jennings.** 1995. Jan. 4. They are now making Befine in Santa Fe and shipping everything they make to Holland.

**2709. Product Name:** Vegetarian Fajita Strips (Seitan).

**Manufacturer’s Name:** White Wave, Inc.

**Manufacturer’s Address:** 1990 N. 57th Ct., Boulder, CO 80301. Phone: 303-443-3470.

**Date of Introduction:** 1994 April.

**How Stored:** Refrigerated.

**New Product–Documentation:** News release from White Wave. 1994. Oct. 13. News release from White Wave. 1995. March. White Wave has added Vegetarian Fajita Strips to its successful Seitan line.

**Leaflet** (glossy color, front and back, 15.2 x 21.7 cm). 1999. Aug. “Our new seitan package is looking better than ever! With new packaging for both our Traditional Seitan and Vegetarian Stir Fry Strips, we’ve made them easier to stock at the shelf and easier for customers to recognize.” Color photos on the front panel (against a purple background) show the old and new packaging for both products. Seitan used to be packaged in a tub, like tofu. Vegetarian Stir Fry Strips used to be named Vegetarian Fajita Strips and vacuum packed in a tub.

**2710. Product Name:** Meatless Sandwich Slices [Chicken-Style, Turkey Style, or Beef-Style].

**Manufacturer’s Name:** White Wave, Inc.

**Manufacturer’s Address:** 1990 N. 57th Ct., Boulder, CO 80301. Phone: 303-443-3470.

**Date of Introduction:** 1994 April.

**Wt/Vol., Packaging, Price:** 5.5 oz vacuum packs. Retail for \$2.19 (7/94, Colorado).

**How Stored:** Refrigerated.

**New Product–Documentation:** Spot in Product Alert. 1994. June 27. “100% fat free.”

**2711. Bean Supreme Ltd.** 1994. Wholesale price list. P.O. Box 12082, 140 Hugo Johnson Dr., Penrose, Auckland, New Zealand. 2 p. May 1. 28 cm.

• **Summary:** The company sells the following soyfoods: Tofu (firm bulk and vacuum pack), Tofu Luncheon (3 flavors), Soysage, Tempeh (vacuum pack), Soymilk (Nice ‘n’ Healthy), Lite Licks Non-Dairy Frozen Dessert (6 flavors in 2 liter size, 3 of those flavors in 475 ml size, and bulk packs

of 9 liters and 16 liters).

It also sells the following non-soy foods: Biofarm organic yoghurts (3 flavors), Malabar goat yoghurt, Cyclops acidophilus yoghurt (5 flavors), Koromiko cheeses (10 flavors), Olive grove Middle Eastern foods (falafel mix, hoummus, Middle Eastern sauce, tahini), herbal teas (3 flavors), and Pacific Harvest sea vegetables (Karengo fronds, flakes, and shaker, and kelp shaker). Address: Penrose, Auckland, New Zealand.

**2712. Product Name:** Heartline Meatless [Texas Chili, BBQ Beef, Bolognese Spaghetti].

**Manufacturer's Name:** Lumen Food Corporation.

**Manufacturer's Address:** 2116 Hodges St., Lake Charles, LA 70601. Phone: 318-436-6748.

**Date of Introduction:** 1994 May.

**Ingredients:** Incl. protein, water, soy oil.

**Wt/Vol., Packaging, Price:** 16 oz jar.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Spot in NFM's New Product Review. 1994. Spring (May). p. 23. This is a line of pre-cooked, ready-to-eat meatless entrees in 16 oz jars. A photo shows the 3 products and labels.

**2713. Product Name:** Stonewall's Jerquee (Vegetarian Jerky) [Mild, or Wild].

**Manufacturer's Name:** Lumen Food Corporation.

**Manufacturer's Address:** 409 Scott St., Lake Charles, LA 70601. Phone: 318-436-6748.

**Date of Introduction:** 1994 May.

**Ingredients:** Defatted soy flour, natural flavoring (autolyzed yeast), peanut oil, soy sauce (water, wheat, soybeans, salt), garlic powder, onion powder, pepper cream, cayenne, potassium sorbate (a polyunsaturated fat added to preserve freshness).

**Wt/Vol., Packaging, Price:** 1.5 oz or 25 lb plastic bag.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** The Whole Earth Vegetarian Catalog (published by Lumen Foods). 1994. June. p. 4.

Product with Label purchased by mail order from Lumen Foods. 1995. Dec. 22. Mild. 4 by 5 inches. Plastic bag. Red and green on yellow. "A vegetable protein product. The incredible new, animal free, all natural, jerky substitute. Eat straight from the bag, or microwave for 10-15 seconds for a great, hot, sizzlin' snack! No cholesterol. Animal free." Talk with Greg Caton. 1996. Oct. This product is first deep-fried, then deoiled to remove some of the oil.

Leaflet sent by Patricia Smith from Natural Products Expo (Baltimore, Maryland). 2000. Sept. "America's best-selling vegetarian jerky." Stonewall's Jerquee now comes in 7 flavors: Original Mild, Original Wild, Spicy Chicken, Peppy Pepperoni, Teriyaki Beef, Hot Pastrami, and BBQ Beef. It is sold in eight different formats or packaging. The

company's website is soybean.com.

**2714. Product Name:** Vegetarians Choice Prime Grind.

**Manufacturer's Name:** Shiloh Farms.

**Manufacturer's Address:** -

**Date of Introduction:** 1994 May.

**Ingredients:** Tofu, organic textured soy flour, vital wheat gluten, organic brown rice, expeller pressed canola oil, water, fresh onions, corn/barley syrup, meatless broth powder, beet powder, sea salt, guar gum, lecithin, Irish moss powder, spices.

**Wt/Vol., Packaging, Price:** 12 oz chubs.

**How Stored:** Frozen.

**New Product–Documentation:** Spot in NFM's New Product Review. 1994. Spring (May). p. 30. "A totally organic and vegan meat alternative." A photo shows the product.

**2715. North American Vegetarian Society.** 1994. National vegetarian group expands focus of fast food campaign as Subway chain offers meatless burgers (News release). P.O. Box 72, Dolgeville, New York 13329. 2 p. June 27. 28 cm.

• **Summary:** "The North American Vegetarian Society has expanded the focus of the Vegetarian Express Fast Food Campaign to include Subway outlets across the country. NAVS has for several years spear-headed a consumer campaign to help urge the nation's largest fast food retailers to serve no-fat, no-cholesterol, all-plant vegetarian entrées.

"Over 140 Subway shops across Florida are now selling the No-Fat burger, a soy-based patty with 80 calories, 12 grams of protein, 5 grams of fiber and no fat or cholesterol. The burger is also marketed at Publix supermarkets under the name Boca Burger."

"Chef Rinaldo Raben of Ronieirs restaurant in Pembroke Pines, Florida, is the chief promoter of the No-Fat Burger and is the reason Subway outlets are now carrying the product." For more information, contact Jennie O. Collura at NAVS. Address: Dolgeville, New York. Phone: (518) 568-7970.

**2716. Western Livestock Journal (Denver, Colorado).** 1994. White House menu now has new soy burgers: 4,000 in six weeks. June 27. [1 ref]

• **Summary:** The Knight-Ridder News Services reported last week that the White House has purchased 4,000 "Boca Burgers" (soy burger patties) during the last 6 weeks from Energy Foods in Boca Raton, Florida. The meatless product is fat free and has only 100 calories per serving. A California heart specialist [Dr. Dean Ornish] introduced the product to the Clintons, and it is reported to be a hit.

A spokesperson for the American Meat Institute (AMI) stated in response: "Nothing will replace the American hamburger." The AMI is confident that President Clinton is still eating plenty of real hamburger too.

Note: This is the earliest document seen (Nov. 2000) concerning Boca Burgers.

2717. Worthington Foods, Inc. 1994. There's a new garden spot that won't be found in your grocer's produce section (Ad). *Vegetarian Times*. June. p. 3.

• **Summary:** See next page. This full-page, color ad, with a coupon, features Morningstar Farms Meatless Garden Veggie Patties. It also shows packages of Meatless Prime Patties, and Meatless Chick Patties.

This ad also appeared in the Feb. 1995 issue (p. 5) of this magazine. Address: Worthington, Ohio 43085.

2718. Bianchini, Gilberto. 1994. Re: Early history of tofu and seitan in Italy. Letter to William Shurtleff at Soyfoods Center, July 16—in reply to inquiry. 3 p. Typed. [Eng]

• **Summary:** “I started to make tofu and sell it officially in October 1979 in Rimini, Italy, at Via Cuoco 9 (Community Food). I first learned how to make tofu in London at the Community Health Foundation, Old Street 98, in 1976 or 1977. Then I gained additional experience in making Japanese-style nigari tofu from Centers and individuals in France and Belgium. I first visited the United States in late 1978 and early 1979. On 9 Feb. 1979 I visited you [William Shurtleff and Akiko Aoyagi] at New-Age Foods Study Center in Lafayette, California, having a good impulse in tofu pioneering, to talk about making tofu in Italy.

“In 1980 I visited a friend, Mr. Franco Pagliano, in Milan; that city had many Chinese restaurants. Mr. Pagliano had learned how to make tofu from Mr. Roland di Centa, who was supplying these Chinese restaurants with a small quantity of tofu (he made it the Chinese way, with calcium sulfate), but he was soon forced to stop production because he had difficulties producing, unofficially without the proper permits, in his apartment. It was a really good experience for me to get to know Chinese and Japanese people; Franco was very skillful and shared many secrets with me. Then after several months he called me to say that he was going to stop tofu production and that he could introduce me to his clients—which he did, including a Japanese restaurant, Suntory Italia, which had not previously accepted his Chinese-style tofu. I had contacts in Milan and met Mrs. Giovanna Mazzieri at a conference in Milan, where tofu was presented to the public and the press, together with the Italian Chefs' Association. I remember that on that occasion I first had a large number of tofu kits sold through Mrs. Mazzieri.

“I survived financially making tofu for the first couple of years. I sold my tofu to the Chinese restaurants of Milan, driving there once a week from Rimini in my small refrigerated car (280 km each way). I soon got tired of the trip, but actually I was motivated and satisfied and full of curiosity for the Chinese and Japanese atmosphere. Meanwhile, I was stopping to deliver my tofu at all of the macrobiotic and natural food shops and restaurants along

the way (in Cesena, Forlì [Forli], Faenza, Bologna, Modena, Reggio Emilia, Parma, etc.). During those years I did promotion for soyfoods, including cooking classes.

“In July 1982 I attended the Soyfoods Conference in Seattle, Washington (we met again) because of my interest in large-scale production and in making a report on soyfoods, together with a lady dietitian from Bologna (I forget her name) supported by the University of Bologna. She continued introducing the many good qualities of soyfoods to those in her field, medical doctors and nutritionists. For more information on this, contact the Sunsoy Food company in Bologna.

“After my 1982 trip to the USA (now having with me color slides, literature, and information), I developed contacts with the largest food distributing company in Italy, Coop Italia, but the people in charge believed that it was too early to distribute tofu widely in Italy—the market was not yet ready... maybe in the future. Even though they were open to innovative ideas, the negative answer was disappointing.

“I remember there was a time in 1983 when I had the luck of meeting a Japanese girl, Fusako Aoki, who was just passing through Rimini—a very rare occasion. She helped me in tofu-making classes for about 3 months, in Rimini and other cities. Meanwhile many people visited me to learn about making and selling tofu (future competitors)!

“I had enough technical skills to develop and build (mostly by myself) a stainless steel continuous open-air steam cooker (not pressurized! a secret for good tofu), a second-hand Weston (from the USA) vibrating screen, a good stainless steel hammer mill. This was really good equipment for those times, the only equipment of its kind in Italy that I knew of.

“I was in charge of everything—production, sale, promotion, and new product development. Unfortunately I was not able to grow from the individual to the team aspect of the work. I exhausted myself, ending production in June 1988. In that year I was supplying centers in cities like Rome, Firenze [Florence], Torino [Turin], Bologna, Treviso, and Ravenna—mostly in northern and central Italy. The demand was growing and it reached the point that in places like Florence, Rome, and Torino people started companies to make soyfoods. At that point, I could survive only by diversifying products, improving packaging, moving into a larger factory at a new location, and expanding the company and the number of employees.

“I could not do this, and after a project of moving in Toscana near Florence, to live and work there, I had to discontinue my activities. The other reason was that my family was growing rapidly; I had 2 children in 1985 and 1987, and I did not want to jeopardize or endanger my family's personal financial situation. Looking back, I think I made the right choice, but I feel good when someone remembers me for my good tofu. I sold my equipment at a low price to a company named Food for All in Verona,

**There's A New Garden Spot  
That Won't Be Found In Your Grocer's  
Produce Section.**

**NEW!**

**GARDEN  
VEGE-PATTIES**

There's something new at your supermarket called Garden Vege-Patties™ from Morningstar Farms®. Made with a blend of delicious vegetables—like carrots, black olives, mushrooms, bell peppers and water chestnuts— you would think they'd be next to the zucchini or bananas. However, you'd be wrong.

Because, strange as it may sound, they're actually in your grocer's frozen food section.

Quick and convenient, Garden Vege-Patties are frozen so they can be microwaved, grilled or baked in minutes. And you'll find them right beside a line of other delicious meatless products from Morningstar Farms— Prime Patties™ and Chik Patties.™ They all have zero cholesterol and no animal fat.

So look for Morningstar Farms Garden Vege-Patties in the frozen food section. If they're not there, better ask your grocer. He may have put them next to the broccoli.

**4 Only  
GRAMS of  
FAT**

then helped them with my knowledge of making and selling tofu. They are connected to the Ananda Marga Society, are supporting activities in India, and are really nice people.

“While in business, I was producing: Tofu (vacuum packaged or in bulk), tofu spreads (various flavors), tofu burgers, tofu mayo (fresh or long-life, in glass jars), seitan, seitan burgers, spreads, soymilk (sometimes, and only fresh), and various tofu desserts (fresh and perishable). I only made small batches of tempeh, for personal use and experimentation (not sold commercially) using cultures from the USA. Near the end of my activities, I produced 400 kg (and up to 600 kg) of tofu (base product); officially I had only one (maximum two) part time workers, with good help from my relatives.

“The only company (apart from the person of Mr. Pagliano) I know that made tofu before I did was the Poporoya company in Rome, which produced and sold it at his branch in Milan, the Poporoya-shop, a Japanese shop.

“People introducing soyfoods in Italy were the macrobiotic centers: Mr. Ferro Ledvinka from Rome, Mr. Alois Grassany from Bologna, and Mr. Roberto Marocchesi from Torino.

“I still see an opportunity in the future for making and selling tofu and tofu products in Rimini; this would be for me and my friends, but it would work only if it was connected with a larger project of a vegetarian cultural center. Who knows? Now I am a ‘natural wood’ carpenter.” Address: Via Cuoco 9, 47037 Rimini, Italy.

**2719. Product Name:** Realeat Fishless Fish Cakes.

**Manufacturer’s Name:** Haldane Foods Group.

**Manufacturer’s Address:** Howard Way, Newport Pagnell, Buckinghamshire MK16 9PY, England. Phone: +44 908 211311.

**Date of Introduction:** 1994 July.

**Ingredients:** Soy protein.

**Wt/Vol., Packaging, Price:** 320 gm box of four. Retail for £1.19 (7/94, England).

**How Stored:** Frozen.

**New Product–Documentation:** Spot in Soyfoods (ASA, Europe). 1994. Summer. p. 5. “Haldane launches Fishless Fish Cakes.” The product is made from a blend of vegetable proteins (including soya) and potato with a golden crumb coating. Free of all animal products and additives, they are suitable for vegetarians and vegans.

**2720. Health Foods Business.** 1994. Subway introduces all veggie sub. July. p. 50.

• **Summary:** Subway Sandwiches on Boulder, Colorado, together with White Wave, Inc. introduced its All Vegetarian Turkey Sub in April. The new sandwich is made with White Wave’s 100% fat-free and cholesterol-free meatless “turkey” slices and White Wave’s American-style soy cheese.

**2721. Lightlife Foods, Inc.** 1994. You’ll sell a lot more meatless burgers—once you see the light (Ad). *Natural Foods Merchandiser*. July. Insert glued in after p. 72.

• **Summary:** This full-page, back-to-back, color ad insert shows the new Lightburger from Lightlife. It is sandwiched between two buns, with all the trimmings on a wooden plate. Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001.

**2722. Lumen Food Corporation.** 1994. The meatless solution. Our meats are so real... some vegetarians won’t eat them! (Ad). *Vegetarian Gourmet (Montrose, Pennsylvania)* No. 10. Summer. p. 7.

• **Summary:** On this full-page color ad, a half page color photo shows two shish-kebab skewers with meatlike chunks and veggies. A hand is pulling one chunk off the end of one skewer. Heartline Meatless Meats were introduced in 1987. “For just \$19.95, we’ll send you five 8 oz. Heartline samples: Beef Fillet, Ground Beef, Canadian Bacon, Pepperoni, and Chicken Fillet. Each packet makes about one pound of ‘meat.’ In addition we’ll send you a copy of our book, *The Lumen Book*—over 240 pages, covering all the major arguments which underlie the vegetarian movement. We’ll also send you four 1.5 oz. samples of our incredible new vegetarian snack, Stonewall’s Jerquee, along with our *Whole Earth Vegetarian Catalog* with its ‘50 reasons why I am a vegetarian.’” Address: 409 Scott Dr., Lake Charles, Louisiana 70601. Phone: (800) 256-2253.

**2723. Worthington Foods, Inc.** 1994. Second quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. 22 x 9 cm.

• **Summary:** “Net sales for the first half of 1994 were \$44.4 million, an increase...” “Higher sales in the Mass Market are directly attributed to increase sales of Morningstar Farms’ meat alternative products, up 52 percent year-to-date compared to last year. The Meat Substitute total category was up 74 percent for the second quarter compared to a year ago and Morningstar Farms sales of meat alternatives were up 65 percent for the same period. Even with the increased competition in the market, Morningstar Farms continues to have a 70 percent market share in this category.”

“A new frozen burger product, *Burger Beaters*, containing only 2 grams of fat, is currently being introduced into the Foodservice market. Product shipment began in early July, 1994.” Address: Worthington, Ohio. Phone: (614) 885-9511.

**2724. Yves Veggie Cuisine.** 1994. The meatless alternative: Tasty, wholesome, and convenient (Ad). *Vegetarian Gourmet (Montrose, Pennsylvania)* No. 10. Summer. Inside rear cover.

• **Summary:** The full-page color ad features Yves Veggie Wieners and Yves Burger Burgers. The two products are shown on a plate, ready to serve, and the attractive package

for each product is displayed. "Try our complete line of products: Burger burgers, Veggie wieners, Tofu wieners, Chili dogs, Deli slices, Garden vegetable patties, Garden patties with mushrooms and fine herbs, Veggie Pepperoni. The perfect complement to today's active lifestyle." Address: Vancouver, BC V6A 2A8, Canada.

2725. Kelley, Ann J. 1994. They're meatless wonders but Harvest Burgers reap praise from taste-testers. *Florida Times-Union (Jacksonville)*. Aug. 11.

• **Summary:** Members of this newspaper's consumer panel were asked this week to prepare some Green Giant all vegetable Harvest Burgers for their families. Most of the panelists rated the product's flavor as "good." Assorted favorable comments: "I thought they were great." "You couldn't tell it wasn't meat."

2726. Winter, Ralph E. 1994. Worthington Foods says meatless meals fatten bottom line. *Wall Street Journal*. Aug. 12.

• **Summary:** Dale Twomley, president and CEO of Worthington Foods (Worthington, Ohio) says sales of meat substitutes are running more than 50% ahead of year ago. The company, which sells vegetarian foods, expects 1994 sales to top \$90 million. Last year Worthington completed a new plant to make a refrigerated egg substitute; unfortunately sales of this product inched up only 3% in the first half. Egg substitutes (both frozen and refrigerated) account for about 30% of the company's sales, and profits on them are good. Nevertheless, this year Worthington shifted major promotional resources from egg substitutes to meal alternatives. Green Giant, a unit of Grand Metropolitan PLC, also launched a big ad campaign for meat substitutes, thus boosting interest in the whole category.

Worthington recently reformulated older products to reduce fat content. The company's best-seller is Grillers, a hamburger alternative with about half the fat of a typical beef burger. Other new products are Prime Patties (air cooked, with very low fat), Garden-Vege-Patties, and BurgerBeaters (intended for restaurants, college cafeterias, prisons, and other food-service providers).

Note: In the three-star East Coast edition, this article is titled: "Worthington sees strong results in '94 as Americans shift to meat substitutes."

2727. Fritschner, Sarah. 1994. One burger... Hold the meat: Vegetarian burgers have been around for 20 years, but they're getting a second look now. *Clarion-Ledger (Jackson, Mississippi)*. Aug. 24. p. E1-2.

• **Summary:** Hillary Clinton eats meatless Boca Burgers and Bill Clinton loves them. T.G.I. Friday's has been selling vegetarian Gardenburgers since 1991, and expects to sell more than one million this year. The Morningstar Farms patty [made by Worthington Foods] has been around for 20

years. Max Shondor makes the low-calorie Boca Burger in Florida. About two years ago Burger King franchisee Dennis Kessler added the Morningstar Farms Grillers to the menu of his restaurant at Watkins Glen, New York. It became a hit immediately, selling about 200 per week in the very rural community. Vegetarian burgers were later test marketed at 38 Burger Kings in the Rochester, New York, area, but the test was stopped after two months, according to Kessler. In May, 1994, a Berkeley franchisee asked Burger King if she could add it to her menu. Her request was refused, even though the Berkeley City Council wrote a letter to Burger King's CEO in support of the vegetarian burger option. Kessler presently owns 18 Burger Kings, but only his Mount Hope restaurant near Rochester, New York, sells a vegetarian burger. Kessler says it's extremely successful, selling about 500 per week for \$1.59 each (a Burger King "Whopper" sells for only \$0.99).

One reason for the steady growth of interest in vegetarian burgers may be the growing number of vegetarians. Today there are more than 12 million vegetarians in the USA, and the number has been growing by 26% a year. Address: Louisville Courier-Journal, Kentucky.

2728. Johnson, Maria Miro. 1994. Veggie burgers. *Journal (Providence, Rhode Island)*. Aug. 24.

• **Summary:** The author and her husband tested 15 meatless burgers purchased at one local store. A table shows the name of each.

2729. Ono, Yumiko. 1994. Catering to part-time vegetarians' tastes. *Wall Street Journal*. Aug. 24. p. B1, col. 3; p. B2, col. 5.

• **Summary:** "There are only about 12 million self-professed vegetarians in America who shun all meat, but companies believe the vegetarian pitch appeals to any nutritious-conscious consumer..." More than 75% of Americans eat meatless meals twice a week, according to a survey by HealthFocus, Inc., a market research firm in Des Moines, Iowa. *Vegetarian Times*, a monthly magazine, says its circulation has doubled in two years to 340,000 in 1993, in part because part-time vegetarians started buying it. And 14 out of 67 varieties of Lean Cuisine dinners are now meatless. In April Linda McCartney, wife of rock star Paul McCartney, introduced to the USA a line of frozen dinners called Linda McCartney's Home Style Cooking Meatless Entrees. Fairmont Foods of Minnesota makes the products. Worthington Foods, of Worthington, Ohio, makes a wide variety of meatless products. And Pillsbury markets Green Giant Harvest Burgers, made by ADM. Address: Staff reporter.

2730. *Provender Journal (Eugene, Oregon)*. 1994. Member news. 11(2):7. Summer.

2732. Wang, Huei-ju; Murphy, Patricia A. 1994. Isoflavone content in commercial soybean foods. *J. of Agricultural and Food Chemistry* 42(8):1666-73. Aug. [28 ref]

• **Summary:** Isoflavones are one class of phytochemicals and are found in soybeans in large amounts. Twelve isomers of isoflavones were quantified: three aglycons and nine glucosides. Soybeans contain two major isoflavone aglycons, genistein and daidzein, and a minor one,

glycitein. In the seed, the isoflavones are present primarily as Beta-glucosides. The nine glucosides are: daidzin, genistin, glycitin; 6”-O-acetyldaidzin, -genistin, or -glycitin; and 6”-O-malonyldaidzin, -genistin, or -glycitin.

This paper gives data on the concentration and distribution of isoflavones in 29 commercial soybean foods, grouped into three types: Soy ingredients, traditional East Asian soy foods, and second-generation soyfoods. Four values are given for each product in micrograms per gram, on an “as is” basis: daidzein, genistein, glycitein, and total isoflavones.

(1) Soy ingredients: Vinton 81 90: 600, 954, 82, 1636. Vinton 8191: 240, 648, 107, 995. Green vegetable soybeans: 546, 729, 79, 1354. Soy flour: 226, 810, 88, 1124. TVP #1: 473, 707, 202, 1382. TVP #1: 484, 702, 156, 1342. Soy isolate #1: 77, 273, 115, 466. Soy isolate #2: 115, 392, 102, 610. Soy isolate #3: 122, 393, 99, 615. Soy concentrate: trace, 13, 42, 56.

(2) Traditional soy foods: Roasted soybeans: 563, 869, 193, 1625. Instant soy beverage #1: 311, 617, 109, 1037. Instant soy beverage #4: 407, 665, 111, 1183. Tofu (73% moisture): 146, 162, 29, 337. Tempeh: 273, 320, 32, 625. Bean paste (ko chu jang in Korea): 272, 245, 77, 593. Fermented tofu: 143, 224, 23, 390. Honzukuris miso (rice and soybeans): 79, 177, 38, 294.

(3) Second generation soyfoods: Soy hot dog: 34, 82, 34, 150. Soy bacon: 28, 69, 24, 122. Tempeh burger: 64, 196, 30, 289. Tofu yogurt: 57, 94, 12, 164. Soy Parmesan: 15, 8, 41, 65. Soy Cheddar cheese #1: 2, 5, 27, 34. Soy Cheddar cheese #1: 34, 40, 35, 109. Soy mozzarella cheese: 11, 36, 30, 76. Flat soy noodle: 9, 37, 39, 85.

our #1 selling product!... Look for Son of Superburger later this year. We now also private label manufacture all tempeh products in the Wildwood Natural Foods line.”

Tofu Palace Products has a new address and a toll-free phone number: Box 50085, Eugene, Oregon 97405. Phone: 1-800-600-TOFU.

**2731. Product Name:** Trader Joe’s Vegetable Croquette Entree.

**Manufacturer’s Name:** Trader Joe’s (Product Developer-Distributor).

**Manufacturer’s Address:** P.O. Box 3270, South Pasadena, CA 91031-6270. Phone: 818-441-1177.

**Date of Introduction:** 1994 August.

**Ingredients:** Tomato puree, water, soy protein, wheat gluten, enriched tubetti pasta (durum semolina flour, niacin, iron [ferrous sulfate]), thiamine, riboflavin, whole wheat flour, natural spices (no MSG), canola oil, carrageenan, [egg] albumin, onions, garlic, salt, black pepper.

**Wt/Vol., Packaging, Price:** 10 oz microwaveable sealed tray in a paperboard box. Retail for \$2.19 (8/94, Concord, California).

**How Stored:** Frozen.

**Nutrition:** Per package (284 gm): Calories 380, calories from fat 90, total fat 10 gm (saturated fat 1.5 gm), cholesterol 0 mg, sodium 650 mg, total carbohydrate 47 gm (dietary fiber 9 gm, sugars 10 gm), protein 25 gm.

**New Product–Documentation:** Product with Label purchased from Trader Joe’s in Concord, California. 1994. Aug. 14. 7.5 by 5.25 by 1.25 inches. Purple, black, and red on white. Color photo of the entree on a white dish. “No

Some manufacturers use ethyl alcohol extraction to prepare soy protein concentrates; this process removes a substantial portion of the isoflavones. The products examined for this paper which had the lowest content of isoflavones (all less than 100 micrograms per gram) were: soy cheddar cheese A 34, soy protein concentrate 56, soy Parmesan 65, soy mozzarella cheese 76, flat noodle 85.

“Proposed anticarcinogenic doses of soybean isoflavones range from 1.5 to 2.0 mg per kg of body weight per day (Hendrick et al, 1994). There are a number of soy food choices that will fit this dose requirement without the need to consume unusual amounts of these soy foods.”

Isoflavone standards and extraction of isoflavones: Authentic standards of daidzein and genistein were obtained from commercial sources (ICN Pharmaceuticals, Plainview, New York, and Calbiochem Corp., San Diego, California). Daidzein and genistein were from previous work in the laboratory (Murphy 1981). The starting material for extracting isoflavones was defatted soybean flour. It was, in turn, extracted with acetonitrile (ACN) and 0.1 N HCl [hydrochloric acid] (1:5:1 w/v/v) according to the procedure of Murphy 1981. Address: Food Science and Human Nutrition, 2312 Food Sciences Building, Iowa State Univ., Ames, Iowa 50011.

2733. Archer Daniels Midland Co. 1994. Annual report. P.O. Box 1470, Decatur, IL 62525. 42 p. Sept.

• **Summary:** Net sales and other operating income for 1994 (year ended June 30) were \$11,374 million, up 15.9% from 1993. Net earnings for 1994 were \$484.1 million, down 14.8% from 1993. Shareholders' equity (net worth) is \$5,045 million, up 3.3% from 1993. Net earnings per common share: \$1.40, down 11.4% from 1993. Number of shareholders: 33,940.

ADM's decline in profits was due largely to the great Midwestern flood of 1993 and rise in corn costs. Today ADM has 165 operating plants, 300 grain elevators, 2,000 barges, and 10,000 railroad cars. On any given day, together with affiliates in Europe, the company has 100 cargo ships on the high seas.

ADM Began processing corn in 1971, with a single wet-milling plant that had an annual processing capacity of 104,000 tons. Today ADM has an annual wet and dry corn processing capacity of 14.2 million tons. Corn is the origin of ADM's river of dextrose, from which is made HFCS, sorbitol, cornstarch, and ethanol. It is fermented to yield lysine, threonine, lactic acid, citric acid, and MSG. New products from corn fermentation scheduled for production by ADM in late 1994 include xanthan gum (a high-performance stabilizer is syrups, salad dressings, etc.), tryptophan, and vitamin C.

In recent years the U.S. government “has been providing strong incentives for farmers to grow more corn and fewer soybeans, thus turning the oilseed growing business over

to Canada, Brazil, Argentina, India and the European Union (EU)—all while U.S. acreage shrank by 10 million acres... Consumers all over the world got a major setback when trade negotiators in Paris sat around a shiny table quarreling over which one should take the biggest cut in the production of oilseeds. The result was that the United States gave up its policy of being competitive in world markets for vegetable oil and the EU agreed to drastically reduce oilseed production. French farmers, proud of their productivity, protested.” Many countries are in dire need of more cooking oil. “It was agreed that Europe would first idle several million acres and then be allowed to produce oilseeds on those acres for industrial purposes only. The result is obscene. The EU is requiring processors to take perfectly good cooking oil worth \$1.65 a gallon and turn it into diesel fuel worth perhaps 40 cents.

A sidebar on p. 13 gives ADM's views opposing the U.S. government's efforts to reduce the amount of cropland, mainly to reduce surpluses but also for soil conservation. A graph shows that world oilseed acreage has risen dramatically since 1967, while that in the USA rose slowly from 1967 to 1982, then fell thereafter.

NutriBev is a new milk alternative made largely from soy protein isolates and concentrates; it has the same nutritional value as milk but can be produced free of lactose. The Harvest Burger plant is being greatly expanded to meet the product's rapid growth in sales. “The USDA's new school lunch regulations will soon make it possible for school districts to be reimbursed for using 100% soy products such as Harvest Burger. In addition, schools will be required to reduce average fat levels in meals. A number of fat-reduced products contain ADM soy isolates. ADM's soy products are thus well positioned as extenders or a stand-alone products. Before the new regulations were announced, ADM provided testimony on the benefits of soy protein at a number of USDA hearings. We have put increased emphasis on increased soy protein research. We are also isolating some of the components in soy that are said by many scientists to inhibit cancer and some types of diabetes.” A half-page color photo shows the Green Giant Harvest Burger and its package. A new lecithin plant was fully integrated into the existing oil refinery at Europoort, Netherlands, increasing efficiency substantially.

Pages 16-18 discuss ADM's worldwide procurement network and its unique partnership with A.C. Topfer.

Page 41 shows the officers of ADM's subsidiaries and divisions: David H. Swanson is chairman of Premiere Agri-Technologies, Inc. Larry H. Cunningham is president of ADM Protein Specialties Division. John R. Mahlich is managing director of The British Arkady Co., Ltd.

Update: March 1995. The Republican congress is now downsizing the U.S. government and trying to balance the federal budget. Yet ADM is quite dependent on government subsidies, especially for their most profitable products such

as ethanol and PL-480 food products. How vulnerable does this make ADM, which is the largest manufacturer of ethyl alcohol in the world? One cannot tell from reading ADM's annual report. Address: Decatur, Illinois.

2734. Legume, Inc. 1994. Healthy vegetarian meals from Legume (Ad). *Natural Foods Merchandiser*. Sept. Insert glued in after p. 34.

• **Summary:** The full-page color ad begins: "Legume means vegetarian. Whether 'vegetable' in French, or 'bean' in English, the Legume name stands for the finest in vegetarian cuisine. And now, Legume's pledge to quality, organic ingredients, convenience and great taste comes in energy efficient, recyclable cans." A color photo shows the six products in the Legume Healthy Vegetarian line (in 15 oz cans): Chicken Style Soup, Chicken Style Chili, Beef Style Stew, Beef Style Soup, Beef Style Tamales, Italian Polenta. All products except the Polenta contain wheat gluten and miso.

Talk with Chandri Barat of Legume. 1995. Sept. This new line of canned entrees was launched in Dec. 1994. All products in the line are vegan; most products contain wheat gluten and miso. The new labels will state: "no animal products" rather than "vegan." The present terms such as "chicken flavored meat analog" will be replaced by "flavored wheat gluten (water, wheat gluten, miso," etc.). The company that makes these products is an old-fashioned, established one. The products are now starting to be sold in supermarkets, in the natural/health foods section. Address: P.O. Box 609, Montville, New Jersey 07045.

2735. Sojarei Vollwertkost GmbH. 1994. Preisliste: Handel + Gastronomie 1994/3. Gueltig ab 1. September 1994 [Price list—For the trade and gourmet shops. Prices effective from 1 Sept. 1994]. Traiskirchen, Austria. 4 p. 30 cm. [Ger]

• **Summary:** This price list lists 122 products in the following categories: Specialties in glass. Varieties of tofu. Pies or pastries (*Pasteten*). Spreads. Patties (*Laibchen*). Vegetarian sausages. Wheat cutlets. Salad sensations with Tofunaise. Soya specialties. ALSAN Reform margarine and CESAN Reform margarine (*rein pflanzlich* = contains no animal products). Sesame butter and nut butters. Specialties for the whole foods kitchen. Harald Schatz honey-wine. Ing. Bläuel—Olives and olive oil. Dr. Christian Wurm—Honey varieties. Auer—Patties (dry basis). Gehringer—Sonmland pasta and patties. Arbeitsgemeinschaft Alternativ Bäuerliche Produkte. Address: Roemerstrasse 14, A-2514 Traiskirchen, Austria. Phone: (02252) 559 01.

2736. Amerika, Mark. 1994. Genealogy of lunch: On the tofu trail. *Spec (San Francisco, California)* 1(1):29-33. Oct. [1 ref]

• **Summary:** The author, a busy vegetarian, likes easy-to-prepare rice burgers and not-dogs. In the habit of rushing his

meals, he decides to eat good food periodically throughout the day and to find out more about what he eats, where it comes from, and "what kind of work goes into the development of the very fuel that feeds my body. I decided to look into the 'genealogical' background of my favorite lunch at the Creative Cafe, one of the hipper restaurants here in Californicated Boulder... The Creative Cafe has developed a national reputation for making the best barbecued tofu this side of the Mekong Delta."

The chef and co-owner of the Cafe, Liz Cruickshank (with partner Charles Blair), tells Mark she gets all of her tofu from White Wave and she used over a ton a month. Liz feels it is important to tell Mark about the "laborintensity" of preparing his entree. Mark notes with satisfaction that the water content of tofu is very similar to that of the human body. He also notes that so-called fake hot dogs are actually real hot dogs; real hot dogs are made of ground up pigs (not dogs). Eating a "tempehburger on a warm sesame seed bun" reminds Mark of "the feeling I had as a kid who used to be rewarded for his good behavior with a trip to Wendy's or McDeath."

Mark then visits White Wave, where he finds secrecy surrounding the operation. He learns that White Wave makes about 1,400 lb/day of tofu, but the source of their soybeans is a company secret. A photo shows Mark in dark glasses next to the White Wave plant and a huge logo reading "White Wave Soyfoods."

Note: This bi-monthly "zine" is published by Matthew Jaffe in San Francisco. The title, "Spec," stands for "specific" and "speculation." Address: Editor-at-Large, Boulder, Colorado.

**Manufacturer's Address:** Units 1-2, Portishead Business Park, Portishead, Bristol, BS20 9BF, England. Phone: +44 1275 818448.

**Date of Introduction:** 1994 October.

**Ingredients:** Soya bean curd (water, soya beans, calcium sulphate), water, onion, hydrogenated vegetable oil, wholemeal rusk, egg albumen (from free range eggs), hydrolysed vegetable protein, starch, yeast extract, stabilisers (methyl cellulose), salt, herbs, fructose, spices, roast barley malt extract, wheatflour.

**Wt/Vol., Packaging, Price:** 250 gm of 5. Retail for £1.30.

**How Stored:** Refrigerated.

**New Product—Documentation:** Spot in Soyfoods (ASA, Europe). 1995. Spring, p. 5. "New sausage variety from Cauldron Foods." A photo shows the package.

Label sent by Heather Paine of SoyaFoods in London. 1995. April 18. Red and green on beige. Paperboard sleeve. Color photo of two sausages on a white plate with carrots, potatoes, and snow peas. Circled green V certification

symbol. "Approved by the Vegetarian Society."

**2738. Product Name:** Morningstar Farms Better 'n Burgers.

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd.,  
Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1994 October.

**Ingredients:** Water, textured soy protein concentrate, contains 2% or less of autolyzed yeast extract, cellulose gum, malted barley extract, corn starch, natural flavors from vegetable sources, salt, soy fiber, carrageenan, spices, soy sauce (water, soybeans, salt), garlic powder, onion powder, aspartic acid, citric acid.

**Wt/Vol., Packaging, Price:** 11 oz (312 gm).

**How Stored:** Frozen.

**New Product–Documentation:** Worthington Foods. 1995. Annual Report 1994. p. 1. This product was launched in Oct. 1994. "Our new Morningstar Farms Better 'n Burgers is the first fat-free burger to be introduced nationally. It has the highest turns per point of distribution and is available in 30% of U.S. supermarkets. In 1995, we expect to complete the national roll-out with an improved product in improved packaging."

Product with Label purchased at Safeway supermarket in Lafayette, California. 1995. Oct. 8 by 4 by 1¼ inches. Paperboard box. Red, yellow, blue, white and gold on green. A color photo shows a burger patty between two buns over a lettuce leaf, topped with a slice of onion and tomato. "Fat free. All vegetable & all natural."

First quarter financial report. A996. April. Worthington began production of Better'n Burgers and other hot-air oven products at the Zanesville, Ohio, facility on 1 April 1996.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term "'n Burgers" (or "'n Burger"), or the term "Better 'n Burgers" (or "Better 'n Burger").

**2739. Product Name:** Veggie Pepperoni (Meatless).

**Manufacturer's Name:** Yves Veggie Cuisine.

**Manufacturer's Address:** 1138 East Georgia Street,  
Vancouver, BC, V6A 2A8, Canada. Phone: 604-251-1345.

**Date of Introduction:** 1994 October.

**Ingredients:** March 1998: Water, wheat gluten, soy protein isolate, tofu (water, organic soy beans, magnesium chloride), spices, salt, wheat starch, yeast extract, etc.

**Wt/Vol., Packaging, Price:** 155 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Spot in Soyfoods (ASA, Europe). 1995. Spring. p. 5. "Veggie Pepperoni–winner of Sial d'Or." This product won a Sial d'Or prize in the delicatessen category at the Oct. 1994 Sial exhibition in Paris. The product was also selected as winner of the Canadian Grand Prix Best New Product Award in the Diet and Biological Foods category. The product is high in protein

and low in fat.

**2740. Redmond, Tim. 1994.** Soyfoods Association of America had a booth at the American Dietetics Association (ADA) annual convention (Interview). *SoyaScan Notes*. Nov. 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The annual national 3-day ADA convention, held this year in Orlando, Florida, and was attended by 9,000 registered dietitians, nutritionists, and food service operators. Two panel discussions on soyfoods were held. At the first session, Mark Messina, PhD, and Anne Patterson, R.D., gave excellent speeches on "Soyfoods in Prevention of Chronic Disease" to an audience of about 650 people in a large room at the convention. The next day there was standing room only when Dr. Stephen Barnes, Dr. James Anderson, and Dr. George Blackburn spoke on "Challenging paradigms: The case for a plant-based diet."

Many dietitians came to the Soyfoods Association booth the next day and seemed very interested in information about soyfoods. "SAA displayed a wide range of soyfoods made by member companies, along with product brochures, and sampled soy hot dogs and soymilk. SAA distributed 2,000 Soyfoods Information Kits which also contained coupons and information about SAA members' products." Those in the soyfoods industry who attended the show included Tim, Michelle Edwards (of SAA) and her new husband, and Rick McKelvey from Lightlife. Ginny Messina staffed the PCRM booth, and the Vegetarian Resource Group also had a booth. A company named Omaha Steaks (whose main product is mail-order frozen steaks) had only one product there—their soyburger. Address: Vice President of Marketing and Sales, American Soy Products, Inc., 1474 N. Woodland Dr., Saline, Michigan 48176. Phone: 313-429-2310.

**2741. Austern, R. 1994.** 'Care for a tofu burger and soya shake?' Increasingly, answer is 'Yes.' Sandoz caters to a growing appetite for soybean products. *International Sandoz Gazette*. Oct/Nov. No. 113. p. 6.

• **Summary:** "As Sandoz moved into Health Foods in the 1980s, we became more and more aware of the manifold nutritional virtues of the soybean." "Sandoz Nutrition recently inaugurated a new plant in Revel, France, solely dedicated to the manufacture of soya products." It is on the same site as Nutrition & Santé. "Soya products are carried by several of our major brands: Céréal, Gerblé, Eden-Soy, and most prominently, by Gazzoni's Lecinova brand." Color photos show: The outside of Sandoz Nutrition's new plant in Revel, France. Fourteen "soya-based products from Sandoz Nutrition's operating company, Nutrition & Santé." Note: This article is about the company Nutrition & Soja, that company's name does not appear in the article except in small letters on the side of the plant in one photo.

**2742. Lumen Foods. 1994.** It's the gift that counts! (Ad).

*Vegetarian Times*. Nov. p. 83.

• **Summary:** Photos in this full-page color ad show the Heartline Vegetarian Gift Set, which includes 3 Heartline entrees, 6 types of Heartline meatless meat, and 6 types of Cajun Jerky & Stonewall's Jerquee Snacks. It sells for \$29.50 including freight. Address: 409 Scott St., Lake Charles, Louisiana 70601. Phone: 1-800-256-2253.

2743. **Product Name:** Hempeh Burger (Soy Tempeh Burger With Hemp Seeds).

**Manufacturer's Name:** Sharon's Finest (Product Developer-Marketer).

**Manufacturer's Address:** Sharon's Finest, P.O. Box 5020 (616 Davis St.), Santa Rosa, California 95402-5020. Phone: 707-576-7050.

**Date of Introduction:** 1994 November.

**Ingredients:** Organic soybeans, water, organic brown rice, hemp seeds, onion, vinegar, Rhizopus culture. Marinade: Water, pineapple juice, soy sauce, ginger, garlic, roasted sesame oil, black pepper, spice.

**Wt/Vol., Packaging, Price:** 6 oz. (2 patties).

**New Product-Documentation:** Sample label mechanical sent by Richard Rose, CEO of Sharon's Finest. 1994. Oct. 27. Richard conceived of and has developed this unique product. "Barely legal. No THC, but hemp seeds do have essential fatty acids. Contains 10% legal hemp seeds. 5% of profits go to N.O.R.M.L. Yes, we're the HempRella "cheese" folks. To prepare: Cook it up on the grill, broiler, or pan 'till happy... Or use like meat!"

Leaflet sent by Patricia Smith from Natural Products Expo West at Anaheim, California. 1995. March. "Hemp Food: As legal as Coca-Cola, as American as apple pie." A good overview of the value of hemp as a crop. Hempeh Burger, which is a soybean and rice tempeh burger, contains 10% whole hemp seeds.

Ad (p. 18) and spot (p. 56) in *Natural Foods Merchandiser*. 1995. Sept. Spot: "Sharon's Finest introduces Hempeh Burger, made from soy/rice tempeh with 10% legal hemp seeds added. Hempeh Burger is high in essential fatty acids and GLA,... is 100% vegan, and is drug free." Ad: "Absolutely no drugs here, just wholesome, nutritious food from seeds that have been in the human diet (including Buddha's) for centuries." For more information: Sharon's Finest. (707) 576-5070. hemp@rella.com.

Talk with Seth Tibbott of Turtle Island Foods. 2001. May 15. The Hempeh Burger is now starting to sell well.

2744. *Soyfoods (ASA, Europe)*. 1994. Sunrise Health Foods. 5(3):5. Autumn.

• **Summary:** Soya Health Foods Ltd. is located at Unit 4, Guinness Road, Trafford Park, Manchester M17 1AU, England. Phone: +44 61 872 0549. Under the Sunrise brand the company has a range of soya products including natural and flavored soya drinks, vegetarian burgers, non-dairy

products such as Ice Dream (a non-dairy frozen dessert in 6 flavors), Ice Yoghert (a non-dairy frozen dessert in 2 flavors), and Carob Ices. Their spray dried soymilk powder made from pure soymilk is a suitable ingredient for use in non-dairy cheeses, tofu, yogurts, frozen desserts, etc.

2745. **Product Name:** Veggie Back Bacon. Renamed Canadian Veggie Bacon by March 1998.

**Manufacturer's Name:** Yves Veggie Cuisine.

**Manufacturer's Address:** 1138 East Georgia Street, Vancouver V6A 2A8, B.C., Canada. Phone: 604-251-1345.

**Date of Introduction:** 1994 November.

**Ingredients:** March 1998: Water, wheat gluten, soy protein isolate, textured soy protein, natural flavors, yeast extract, etc.

**Wt/Vol., Packaging, Price:** 6 oz (170 gm).

**How Stored:** Refrigerated.

**New Product-Documentation:** Spot in *Vegetarian Journal*. 1994. Nov/Dec. p. 9. This delicious, vegan, fat-free product will soon be appearing in natural food stores. Use in veggie BLT or club sandwiches.

Label sent by Yves Fine Foods, comb-bound in "Yves Veggie Cuisine US Packaging." 1998. March.

2746. Hills, Benjamin. 1994. Re: New developments at Lean Green Foods on the Big Island of Hawaii. Letter to William Shurtleff at Soyfoods Center, Dec. 1 p.

• **Summary:** "Holiday Greetings! What a year! It has seen the birth and infancy of a soyfood company determined to make a difference in the protein supply of the Pacific Rim. So far it is quite local, with color pictures of ginger teriyaki tempeh burger popping up all over restaurant tables of the Big Island to sold out accounts on Kauai. Soon I will be consulting to soy operations in the Philippines, Siberia, Italy, and India, and traveling to those places. Also exploring export possibilities to Australia and New Zealand.

"It has been a tremendous amount of work, but with daily rewards from the enthusiasm of satisfied customers. Mine are truly products to believe in..."

"I have been blessed further by the presence of a soy angel, the original in my life, Susan Wallace, from Oregon... Her ever-resent enthusiasm and support for Lean Green Foods has helped immensely in the development of my life in soy."

Update: 1997. Dec. 8. Talk with Rosie Sison, who (with a friend) recently visited Benjamin at his shop in Hilo. 1998. Dec. 8. His location is beautiful, right next to the ocean, with lagoons and waterfalls nearby. He made them some delicious tempeh dishes from his freshly-made tempeh. Address: Lean Green Foods, P.O. Box 534, Volcano, Hawaii 96785. Phone: 808-985-8563.

2747. **Product Name:** Ginger Teriyaki Tempeh Burger.

**Manufacturer's Name:** Lean Green Foods.

**Manufacturer's Address:** P.O. Box 534, Volcano, Island of Hawaii, HI 96785. Phone: (808) 985-8563.

**Date of Introduction:** 1994 December.

**Ingredients:** 1998/12: Certified organic soybeans (grown in accordance with sec. 26569.11 of the California Health and Safety Code), ginger juice, soy sauce (water, wheat gluten, soybeans), mustard, lemon juice, vinegar, fructose, sesame oil, guar gum, tempeh culture.

**Wt/Vol., Packaging, Price:** 6 oz. (170 gm) vacuum pack.

**How Stored:** Frozen.

**New Product–Documentation:** Christmas letter sent by Benjamin Hills. 1994. Dec. Lean Green Foods is now making a ginger teriyaki tempeh burger. Color pictures of it are “popping up all over restaurant tables of the Big Island to sold out accounts on Kauai.” One secret to the flavor is the 24-hour soak in cold marinade—not hot!

Label brought by Benjamin Hills. 1998. Dec. 21. 3.5 inches diameter. Self adhesive. Green on white. Logo says “Made in Hawaii.” “100% vegetarian. 2 patties—Keep frozen. Try our tempeh chili. To cook: This precooked burger may be grilled, fried or microwaved.” Address is now: P.O. Box 10562, Hilo, Hawaii 96721.

2748. **Product Name:** Alpha-Omega Burger Sandwich.

**Manufacturer's Name:** Local Tofu.

**Manufacturer's Address:** 307 Route 59, West Nyack, NY 10994-2033. Phone: 914-358-2309.

**Date of Introduction:** 1994 December.

**Ingredients:** Burger: Organic okara, flaxseed, whole wheat, barley, cornmeal, brown rice, buckwheat groats, carrots, sweet potato, cabbage, kale, parsley, collard, tofu, broccoli, soymilk, tamari, herbs, spices. On rye bread.

**Wt/Vol., Packaging, Price:** ¼ lb, in clear plastic wrap.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with Sam Weinreb, founder and owner of Local Tofu. 1996. May 27. This burger, sold between two slices of rye bread, was launched in Dec. 1994. It is based on the Alpha-Omega burger, which was launched one year earlier and uses the same label. To make it: On the first slice of rye bread, lay a slice of Chinese cabbage, spread with Tofu Mayo, and top with the burger. Top this with more Tofu Mayo, a slice of cucumber, and the final slice of rye bread.

2749. Twomley, Dale E. 1994. Special message to shareholders. 900 Proprietors Rd., Worthington, OH 43085. 4 panels. 22 x 9 cm.

• **Summary:** “Worthington Foods is experiencing rapid sales growth of meat alternative products in both the retail and the food service markets. It has become increasingly evident that, as a Company, we should focus our resources on this opportunity for growth in healthy, meatless food products and build on the position of being Number One in vegetarian foods.”

In Nov. 1994 Worthington sold its refrigerated egg substitute business and processing equipment from the Zanesville Plant for \$9,000,000. The plant was closed on Nov. 23. The company plans to open it within the next 12-18 months with capacity to produce up to \$20,000,000 in meat alternative sales. All of the net proceeds from the sale will be used to reduce debt. The sale will also open up additional processing capacity for meat alternatives at the Zanesville plant. In the meat alternative segment, Morningstar Farms currently has over 60% market share. “Our Worthington Plant will be stretched to the maximum in 1995 to fill meat alternatives orders. We expect net income will be enhanced without the refrigerated substitute business even though the transaction will reduce revenues by approximately \$8,000,000... Our refrigerated Better'n Eggs product was third in market share of this category with a 14% share. “Worthington Foods will remain a player in the frozen egg substitute category where Morningstar Farms has a 29% market share and we consider the company to be a low-cost producer. Frozen egg substitute sales of Scramblers and frozen Better'n Eggs will continue under the Morningstar Farms brand nationally where we intend to remain competitive and profitable.” The company's newest product is fat-free Better'n Burgers.

“Meat alternatives is one of the fastest growing categories of frozen foods through supermarkets in the US and we intend to become even more recognized as Number One in meat alternatives.” Address: President and CEO, Worthington Foods, Inc., Worthington, Ohio. Phone: (614) 885-9511.

2750. **Product Name:** Vegetable Bratwurst (Vegetarian).

**Manufacturer's Name:** GranoVita UK Ltd.

**Manufacturer's Address:** Ambron House, Eastfield Road, Wellingborough, Northants NN8 1QX, England, UK. Phone: +44 933 27240.

**Date of Introduction:** 1994.

**Wt/Vol., Packaging, Price:** 200 gm pack. Retail for about £1.69 (England, 11/94)

**New Product–Documentation:** Spot in Soyfoods (ASA, Europe). 1994. Autumn. p. 5. “Vegetarian Bratwursts launched by granoVita.”

2751. **Product Name:** Wonderdogs.

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** P.O. Box 870, Greenfield, MA 01302. Phone: 1-800-274-6001.

**Date of Introduction:** 1994.

**Ingredients:** Water, isolated soy protein, vital wheat gluten, natural flavors from vegetable sources, soy oil, sea salt, rice syrup solids, spice extracts, paprika oleoresin, carrageenan, vegetable gums. No Nitrites.

**New Product–Documentation:** Conklin, Rebecca. 1995. “Top dog in meatless market: Litelife's growth

has been steady. Success with vegetarian fare has swept Lightlife Foods into mainstream.” *Boston Globe*. March 1. Wonderdogs were launched in 1994 with a mild flavor, cartoon superhero mascot, and 1 gram of fat per serving; they are designed to appeal to kids’ taste buds, imagination, and nutritional needs.

Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1996. March 15. Gives ingredients and nutritional information.

2752. Malarkey, Ron. 1994. Brief history of R+R Tofu. Fold Court, Home Farm, Buttercrambe, York YO4 1AU, England, UK.

• **Summary:** Form from Soyfoods Center filled out by Ron Malarkey / Malarney. 1994. Nov. 25. He writes the company name as “R+R Tofu.” This company began making and selling soyfoods in May 1973, with regular tofu, burgers, and marinated tofu. They presently make 2,000 kg/month of regular tofu and 1,000 kg/month of organic tofu.

Note: In May 2013, when asked about the May 1973 date, which conflicts with the 1985 date on his website, he replied (through his secretary, Jo): “I have got Ron to look again at your attached form and he apologises and says 1973 should read 1983. He had made the mistake of putting down the wrong date.” Address: Buttercrambe, York, England. Phone: +44 7593 72979.

2753. **Product Name:** Nutriburger: 100% Meatless Patties. **Manufacturer’s Name:** Oberti Wholesale Foods, Inc. **Manufacturer’s Address:** San Leandro, California 94577. Phone: 510-357-8600.

**Date of Introduction:** 1994.

**Ingredients:** Soy protein concentrate, partially hydrogenated soybean oil, isolated soy protein, sugar, soy sauce powder, natural flavorings, onion, garlic, malt, hydrolyzed soy protein, autolyzed yeast extract.

**How Stored:** Frozen.

**New Product–Documentation:** Product with Label brought by Bob Gerner of the Natural Grocery Co. 1994. Label. 4 by 6 inches. Dark red, dark green and light green on white. “Delicious! No cholesterol. Low fat. Economical. Textured soy protein.”

Talk with Gary Oberti, owner. This products was introduced in about 1994. The ingredients have not changed, but the nutritional values have; the front panel should read “reduced fat,” not “low fat.”

2754. **Product Name:** Quintesse Vegetarian Tofu Casserole.

**Manufacturer’s Name:** Vegetarian World Ltd.

**Manufacturer’s Address:** 15 Holloway Drive, Wardley Industrial Estate, Worsley, Manchester M28 5NJ England.

**Date of Introduction:** 1994.

**Ingredients:** Vegetables (potatoes, carrots, onions, peas),

water, tofu (fried in pure vegetable oil), cornflour, vegetable bouillon, extract of roasted barley malt, black pepper, mixed herbs.

**Wt/Vol., Packaging, Price:** 425 gm can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Label sent by David Greenslade. 1994. Oct.

2755. **Product Name:** Quintesse Vegetarian Tofu Goulash.

**Manufacturer’s Name:** Vegetarian World Ltd.

**Manufacturer’s Address:** 15 Holloway Drive, Wardley Industrial Estate, Worsley, Manchester M28 5NJ England.

**Date of Introduction:** 1994.

**Ingredients:** Vegetables (potatoes, carrots, onions, peas), water, tofu (fried in pure vegetable oil), tomato puree, cornflour, paprika, vegetable bouillon, cider, vinegar, garlic, black pepper.

**Wt/Vol., Packaging, Price:** 425 gm can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Label sent by David Greenslade. 1994. Oct.

2756. **Product Name:** [Deli Salads: Hawaii, Garden, Mexican, Shanghai].

**Foreign Name:** Feinkostsalat: Hawai, Jardinière, Mexicano, Shanghai.

**Manufacturer’s Name:** Viana Naturkost GmbH.

**Manufacturer’s Address:** Neusserstr. 199, D-5000 Cologne 60, West Germany. Phone: (02233) 41323.

**Date of Introduction:** 1994.

**Ingredients:** Shanghai: Seitan (*Seitan*)\*, soymilk (*Sojamilch*)\*, corn oil (*Maiskeimöl*), soy sprouts (*Sojasprossen*), wine vinegar\*, corn malt (*Maismalz*)\*, paprika, wheat starch, herbs, sea salt, carob\*. \* = Organically grown.

Note: The main ingredient in Hawaii flavor is smoked tempeh, and in Garden and Mexican is soy tempeh.

**Wt/Vol., Packaging, Price:** 200 gm or 100 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Labels brought by Bernd Drosihn of Viana. 1995. March 11. 3.5 x 4.75 inches. Red, white, and black on yellow (Hawaii), or light green (Garden), or red (Mexican), or purple (Shanghai). Cardstock. 150 gm.

2757. Bloomfield, Barb. 1994. Fabulous beans.

Summertown, Tennessee: The Book Publishing Co. 143 p. Index. 21 x 18 cm.

• **Summary:** This is a vegan cookbook that focuses on cooking with whole beans. The Farm has used beans as a key part of its diet for more than 20 years.

The “Introduction” states: The more frequently you eat beans, the easier it is to digest them.” “If you pre-soak your beans, strain off the soaking water, discard it, and cook them in fresh water; it will help reduce gas.”

The section on “Cooking beans” (p. 9-10) states: “Because there are enough people whose systems don’t do well with beans unless they are cooked *very soft* (especially children and elderly people), I recommend cooking times for beans that may seem more than necessary to you.”

The “Bean cooking chart” (p. 11) says: “Use 3 cups of water for each cup of dried beans.” For soybeans: Do not cook soaked soybeans in an open kettle. No soak and pressure cook: 60 minutes. Soak and pressure cook: 45 minutes. 2 cups dry soybeans yield 4 cups cooked.

Soy related recipes: Soy nuts (p. 24). Crunchy soybean salad (p. 36). Noodle-veggie-bean casserole (p. 61). Soy stuffed peppers (p. 76). Bean sausage links (p. 81). Soy burgers (p. 85). Barbecue soybeans (p. 100). Sweet and sour soybeans (p. 104). Soybean stroganoff (p. 109). Soybeans in sweet sauce (p. 121). Tutti-fruity bars (p. 138).

A color photo on the rear cover shows Barb Bloomfield. Address: The Farm, Summertown, Tennessee.

2758. Jacobs, Barbara; Jacobs, Leonard. 1994. *Cooking with seitan: The complete vegetarian “wheat-meat” cookbook*. 2nd ed. Garden City Park, New York: Avery Publishing Group. xi + 185 p. Foreword by Nikki and David Goldbeck. Illust. Index. 26 cm. [20 ref]

• **Summary:** Contents: Acknowledgments. Foreword. Preface. Introduction. 1. A Newly discovered ancient food. 2. Making your own seitan. 3. Appetizers and snacks. 4. Sauces and marinades. 5. Soups and stews. 6. Salads and salad dressings. 7. Side dishes. 8. Elegant entrées and hearty casseroles. 9. Desserts. Manufacturers of seitan and seitan products. Mail-order distributors. Bibliography.

In the Introduction, Barbara Jacobs writes (p. 2-3): “In 1970, when we first tasted seitan, it was a tasty but exotic snack food, owing its extremely salty flavor to the fact that it was an imported Japanese specialty food, flavored for the Japanese taste. In addition to being heavily salted, this seitan was hard, chewy, and quite expensive. It was really just a snack food to be eaten while drinking beer. Unfortunately, no one involved in the natural foods movement in this country was familiar with the methods used to make this food.

“In 1971, Leonard became the head chef at the Seventh Inn, one of Boston’s first natural foods restaurants. During that time, he and I began our search for different traditional food-preparation techniques and studied with experts in all areas of cooking and baking. In March 1971 a young Japanese woman named Yumie Kono came to work at the Seventh Inn. It was Yumie who taught us how to make seitan. Even macrobiotics leaders Michio and Aveline Kushi—experts in the preparation of healthy Japanese foods—had never actually made seitan.”

In 1975 Jonathan’s Seitan Shop in Antwerp, Belgium, began to make seitan. In the mid-1970s, a seitan product named Tan Pups had become a very popular snack food. “Created in Boston, tan pups were similar to the country fair

specialty of dough-covered hot dogs on a stick. Tan pups were pieces of seitan that had been dipped in flavored batter and deep fried. Boston area natural foods stores carried these healthy snacks as staple items.”

The basic recipe for seitan (p. 20-21) involves simmering 2-2½ cups of freshly homemade wheat gluten in a “basic broth” of 4 cups water, ¼ to ½ cup natural soy sauce, a 3-inch piece of kombu (a sea vegetable), 4-6 slices (1/8 inch) of fresh gingerroot (optional), and 1 tablespoon sesame oil (optional). Address: Medfield, Massachusetts.

2759. **Product Name:** Tofu, Soymilk, Dried Tofu Curds, and Veggie Burgers.

**Manufacturer’s Name:** Harcan Kingsoya Co. Ltd.

**Manufacturer’s Address:** 33 Casebridge Court, Units 5&6, Scarborough, ONT M1B 3J5, Canada. Phone: (416) 283-8328.

**Date of Introduction:** 1994?

**New Product–Documentation:** Talk with Duff MacKinnon of the Ontario Ministry of Agriculture and Food in Guelph. 1995. March 6. Harcan makes tofu, soymilk, dried tofu curds, and veggie burgers. They have a very small plant. One partner, from mainland China, speaks excellent English. The other two partners are Canadian.

2760. **Product Name:** Wild Dogs (Tofu Hot Dogs).

**Manufacturer’s Name:** Wildwood Natural Foods of Santa Cruz, Inc.

**Manufacturer’s Address:** 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.

**Date of Introduction:** 1994?

**Ingredients:** Organically grown, expeller-pressed soybeans.

**Wt/Vol., Packaging, Price:** 6 oz.

**How Stored:** Shelf stable.

**New Product–Documentation:** Talk with Jeremiah Ridenour. 1995. Feb. 28. The slogan for this product is “take a pack home with you.”

2761. Burros, Marian. 1995. When tofu meets bun: Eating well. *New York Times*. Jan. 4. p. C1, C6. Living section.

• **Summary:** This feature story about the fast-growing popularity of veggie burgers notes that “This quintessential hippie food [the tofu burger] may be on its way to becoming the food of the masses.”

In a large table, 34 brands and varieties of veggie burgers are rated; the author’s personal taste test resulted in 13 different burgers being rated from acceptable to very good. Among her favorites: Boca Burger, Green Giant Harvest Burger, and Morningstar Farms Meatless Patties [made by Worthington Foods].

2762. Much, Marilyn. 1995. Seeds bear fruit at Archer Daniels Midland: Profits surge at huge grain processor thanks to growing sales of higher margin additives. *Investor’s*

*Business Daily*. Jan. 5.

• **Summary:** A photo shows ADM Chairman and CEO Dwayne Andreas who said that his company's business has doubled every six years for the past 20 years. In 1994 ADM had bad luck because of the great Midwest floods; earnings dropped 11% even as revenues rose 16% to \$11.4 billion. ADM's strategy is to nurture core businesses, like milling of corn, wheat, and soybeans, while expanding and upgrading products into higher margin items.

Over the past few years ADM has used new technologies to extract amino acids from corn. Today ADM is a leader in the production of amino acids like lysine and threonine, which are used as livestock feed supplements. It will soon start making tryptophan for use in livestock feeding. Andreas estimates that consumption of such value-added products is growing anywhere from 6% to 25% a year. That explains why he has invested several hundred million dollars in making these items. "This investment includes the January acquisition of Central Soya Co., one of the largest global distributors of multivitamin products." [Note: In Jan. 1994 (not 1995) a subsidiary of ADM acquired Central Soya's feed division—but not the entire Central Soya company].

Analyst David Nelson of NatWest Securities predicts that ADM's earnings overall will grow at a compound annual rate of 9% to 12% over the next 5 years as the firm reaps the benefits of its wise investments, and as agricultural trade becomes more liberalized. That's up from only 3% from 1990-1994. For example, the market for ADM fructose has exploded. ADM plans to diversify into new bioproduct categories. Long-term, Andreas plans to produce all six antioxidant vitamins from natural sources—and penicillin.

ADM's soy protein business is growing rapidly. Six years ago the company invented a new way to isolate [concentrate?] soy protein and make a product similar in taste and texture to meat. This is used as an ingredient in the Harvest Burger patties marketed at retail by Pillsbury's Green Giant.

Andreas has found that liberalization of agricultural trade through NAFTA and GATT has been of tremendous benefit to ADM and similar companies. ADM is now shipping to China vastly increased amounts of vegetable oil. "The company has shipped \$26 million of a total \$100 million order from the Ukraine for soy protein to be used in milk. And the former Soviet Union has asked ADM if it can supply it with 3 million tons of milk from soy protein in the future, says Andreas." Address: Staff reporter.

**2763. Product Name:** Celentano Vegetarian Selects Stuffed Shells Florentine.

**Manufacturer's Name:** Celentano Bros., Inc.

**Manufacturer's Address:** 225 Bloomfield Ave., Verona, NJ 07044. Phone: (201) 239-8444.

**Date of Introduction:** 1995 January.

**Ingredients:** Tomatoes, tofu (Rocky Mountain glacier melt

water, organic soybeans {grown & processed in accordance with the California Organic Foods Act of 1990}, gypsum, nigari {magnesium chloride}, cooked pasta shells (enriched semolina flour, water), spinach, water, onions, peanut oil, salt, parsley, basil, pepper, oregano, garlic.

**Wt/Vol., Packaging, Price:** 10 oz. Paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Ad in *Vegetarian Times*.

1995. Sept. A color photo shows the front label, in which each ingredient is pictured as well as listed. "All natural. Totally vegan. Non dairy. No cholesterol. 240 calories per serving."

Color photo of 3 links next to pancakes and 3 raspberries on a plate. Green Giant logo. On front panel: "81% less fat than pork sausage. All-vegetable. Zero cholesterol. 10 links."

Back panel: Have a hearty breakfast that's good for you! Questions or comments? 1-800-998-9996. A table compares the nutritional composition of 68 gm uncooked Green Giant Links and pork sausage: Fat: 5 gm vs. 27 gm. Saturated fat: 0.5 gm vs. 10 gm. Cholesterol: 0 mg vs. 45 mg. Calories: 119 vs. 280.

2770. Pillsbury Company. 1995. Like any guy, he occasionally craves a burger (Ad). *Vegetarian Times*. Jan. p. 25.

• **Summary:** The top half of this full-page color ad contains an illustration of the jolly Green Giant. The bottom half tells about Green Giant Harvest Burgers, with a photo of the package and of a burger between buns with all the trimmings. Green Giant is a registered trademark of The Pillsbury Company. Harvest Burgers is a registered trademark of ADM.

2771. **Product Name:** Vegan Cajun Burger (On a Bun), and Cajun Tofu Sloppy Joe (The Filling).

**Manufacturer's Name:** Soy Devine.

**Manufacturer's Address:** 1881 Fieldbrook Road, Arcata, CA 95519. Phone: 707-849-8430.

**Date of Introduction:** 1995 January.

**Ingredients:** Processed organic tofu [frozen], tomato sauce, onions, honey, mustard, cider vinegar, safflower oil, tamari (Westbrae), peanut butter, garlic, miso, spices (incl. paprika, cayenne, allspice).

**New Product–Documentation:** Talk with Mara Devine. 1995. June 1. Cajun Barbecue Style was first introduced in 1987. In Jan. 1995 it was renamed and divided into two products: Vegan Cajun Burger, and Cajun Tofu Sloppy Joe. The latter product is sold as a product in its own right, but also serves as the filling for the burger. She moved from Miranda to Arcata, California, in June 1993.

2772. **Product Name:** [Medley of Tofu Spreads].

**Foreign Name:** Streichkonzert.

**Manufacturer's Name:** Topas GmbH (Product Developer–Marketer).

**Manufacturer's Address:** Bollbergstr. 41, 72116 Öschingen [near Tuebingen], Germany. Phone: 07473/25515. Fax: 07473/8320.

**Date of Introduction:** 1995 January.

**Ingredients:** Incl. seitan.

**Wt/Vol., Packaging, Price:** 150 gm package.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter (fax) from Klaus Gaiser, founder of Topas. 1996. Sept. 21. This is a “concert” of 3 kinds of tofu-spreads, and the only product of his which survived the difficult year of 1995. The product consists of two very sausage-like spreads and one cheese-like spread; 50 grams of each of the three, all in one package. Nowadays it is quite a successful product.

2773. **Product Name:** [Tofu Sandwich Slices / Cold Cuts].

**Foreign Name:** Tofu-Aufschnitt.

**Manufacturer's Name:** Topas GmbH (Product Developer–Marketer).

**Manufacturer's Address:** Bollbergstr. 41, 72116 Öschingen [near Tuebingen], Germany. Phone: 07473/25515. Fax: 07473/8320.

**Date of Introduction:** 1995 January.

**Ingredients:** Incl. tofu.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter (fax) from Klaus Gaiser, founder of Topas. 1996. Oct. 8. This product, introduced in early 1995, resemble Heiler's Tofu-Pastete.

2774. **Product Name:** [Tofu-Filled Pouches (With Leeks, With Mushrooms)].

**Foreign Name:** Tofu-Maultaschen (mit Lauch, mit Champignons).

**Manufacturer's Name:** Topas GmbH (Product Developer–Marketer).

**Manufacturer's Address:** Bollbergstr. 41, 72116 Öschingen [near Tuebingen], Germany. Phone: 07473/25515. Fax: 07473/8320.

**Date of Introduction:** 1995 January.

**Ingredients:** Incl. tofu.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter (fax) from Klaus Gaiser, founder of Topas. 1996. Oct. 8. This product, introduced in early 1995, resembles a typical south German treat.

2779. **Product Name:** Natural Touch Vegan Burger (Fat Free).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Road, Worthington, OH 43085.

**Date of Introduction:** 1995 January.

**New Product–Documentation:** Ad (full-page, color)

in *Vegetarian Times*. 1995. Jan. p. 5. “Amazing but true. Natural Touch Vegan Burger. People’s choice. Includes a 50 cent coupon, features the new Natural Touch Vegan Burger. A half page photo shows a burger between buns on a plate with all the trimmings.

Spot in *Vegetarian Times*. 1995. March. p. 12. “It’s Burgertime.” This new product contains less than half the calories of a regular hamburger, no cholesterol, no fat, and no animal products.

2780. Lombardi, Joyce. 1995. Re: History of growing and using soybeans in Chad. Letter to William Shurtleff at Soyfoods Center, Feb. 4. 3 p. Typed, with signature. [Eng]  
• **Summary:** “Thank you for your response and enthusiasm for our soya work in Chad. I am forwarding your letter to people in town who are very involved in spreading the good bean throughout the land. One, an agronomist from Togo named Dr. Akintayo, has come to Chad for soy propaganda only. He has recently produced a book which will be of great interest to you, and is also very involved in training soybean trainers at the *Centre de Formation Professionnelle d’Agriculture (CFPA)*, a farm extension service launched about 6 years ago by Swiss development workers.

“It is in fact from a Swiss-Italian development worker that I got the idea, and later the seeds, for soybean cultivation in my village. I had enjoyed ginger-flavored soymilk at his villa, and had heard him extoll the soil-enriching properties of the soy bean, so when people in my village began complaining about the low rates they were getting from the state’s cotton company, I asked if they had thought about planting another cash crop, like soy. I was told it had been done in the past, but people here don’t really know how to do much with soy beyond what you call dawa-dawa, fermented sauce. So a few weeks later, after more discussions with villagers, who told our health team that famine was their biggest health worry, the *Comite de Sante de la Paix* was born. Its mission—to grow, sell, and popularize the soybean in the village of Bessada, Chad.

“As far as I can tell, the farthest back anyone can remember planting soy in our region of southeastern Chad is 10 years ago [i.e. in about 1985]. Most people credit the above-mentioned CFPA with introducing the crop here 6 years ago. From its base in town, the CFPA also has several outposts in smaller towns (i.e. Koumra) and villages (i.e. Modjibe) near, or within a 20 km radius of Bessada. Farmers report success with the crop, especially as our soil is ‘tired’ from a constant rotation of cotton, millet and peanuts. People report that one 100 kg sack fetches between 23,000–50,000 cfa (\$41-90) compared to half that for a sack of millet. The main buyers seems to be ONGs run by ex-pats [expatriates] or missions. Local buyers make dawa-dawa, or *ndi*, as it is called in the Sara language here, and several women in my village report making sojateen, or soybean coffee. However the cost, between 150-500 cfa per kg is prohibitive, and soy

# AMAZING BUT TRUE

You might be amazed to know that the new Fat Free Vegan Burger™ from Natural Touch® won this year's "People's Choice Award" for best taste. Considering it beat out burgers containing fat, we'd understand your reaction. But our vegetarian burger was chosen over others in a blind taste test conducted by the National Nutritional Food Association. And we're so sure you'll agree with the results that we're offering a money back guarantee. Either you'll love this burger or you'll get your money back. You've got nothing to lose. So take this coupon to your favorite natural foods store and try the Fat Free Vegan Burger from Natural Touch. The amazing fat-free burger with the award-winning taste.

## 50¢ OFF

**Natural Touch® Fat Free Vegan Burger.™**  
Available at Natural Food Stores.

RETAILER: Worthington Foods will reimburse you for the face value of this coupon plus 8¢ handling, provided you and the consumer have complied with the terms of the offer. Void if copied, transferred, prohibited, taxed or restricted. Customer must pay any sales tax. Any other use constitutes fraud. Cash value 1/100¢. For redemption, mail to: Worthington Foods, Inc., Lees Dept. #1660, 11560 Rojas, El Paso, TX 79936.

Worthington Foods, Inc. 259458

is still seen as a luxury food here. For comparison, millet is about 50-100 cfa/kg, and peanuts a bit less. Nonetheless, people generally know that soy is good for the body and soil, and were very interested in our collective soybean field.

“So, on July 17 1994, our rather ad hoc health team—made up of four men previously elected as village health delegates and 10 ten traditional birth attendants, old women with lined, tribal-scarred faces, canes, strong wiry hands—planted 6 kg of soybeans on a cleared ½ hectare plot, known here as a corde... Millet and cotton had been planted on our plot before, the debris cleaned away with the usual bushfire method.

“Our yield, just barely over 100 kg, was dismal. Reasons: we planted too late in the rainy season, which begins in May/June, and harvested our beans on Thanksgiving Day. Akintayo informed me that we planted the 120-day variety, which is what the CFPa has made available to folks here. Also, we only weeded twice, and very late in the game. The tribulations of collective labor as I’m sure you remember from your Peace Corps days. Third, our soil is rather sandy, and I’m told soy prefers clay and shade. Indeed, we remarked that the plants growing in the shade of a karite tree produced very well while the plants in the shade of an ndil tree produced a lot of foliage but not much bean. A farmer 7 km away reported a yield of 250 kg from 4 kg of seeds on a one-corde plot. He planted earlier and had better soil. His village has a water table of 23 meters, ours is 47.”

“So, now, the sack of beans sits in my hut, away from mice and thieves, until we move it to a communal silo with another sack we’re buying on credit. We have siphoned out some of the beans already to stage a big village-wide soybean transformation day, January 25, run by two animatrices sent by the CFPa in nearby Koumra. The two women journeyed out on their red moped to teach the health committee members, representatives from church and women’s groups, 25 total participants, to make soy milk, cheese (tofu), fried tofu, beignets (spicy tofuburgers made with the residue [okara] whose name in Japanese I saw in your Book of Tofu), cake, steamed pate with fish and tomatoes, sweet donuts, and cake. The consensus was: porridge (I forgot to mention it above), spicy beignets and cake. Those were the big hits. People were shocked that one could bake a delicious cake there under the mango tree outside our clinic. Our tools were 3-rock fires, wooden mortars, big iron cauldrons and manual labor. Perhaps Niger was the same way, but Chad has next to nothing in the way of time-saving tools. We did manage to borrow someone’s hand-cranked meat grinder to make the soy milk.

“The fallout from soyday is this: the chef du canton, in whose compound I live, wants to make our village a center for soya cake, and we plan to serve it to the US Ambassador and Minister of Health who are due out in the village next week to inaugurate our newly renovated clinic, *grâce à* USAID. New members of the health team want to launch

an infant-feeding program of soy porridge at the dispensary each Saturday or vaccination day. There is one such program started by a French doctor named Dr. Magguie Negri in a village called Bekemba, about 60 km north of here. She started the program in 1991, and reports feeding 103 children in 1993, on a continued basis. She encourages mothers to prepare the soy meals (porridge) themselves, and to aid with a community soycrop. (Paperwork to follow if I can find any).

“The infant nutrition program couldn’t come at a better time for Bessada which now finds itself in the midst of a fatal measles epidemic, compounded by the beliefs that vaccinations give AIDS and measles, and that giving meat to baby or child with measles will make her sicker.

“So, in my village, soybeans are growing fast and well, and I will leave here knowing that at least I have made a substantial contribution to the well-being of a place it seems that history has forgotten. God, it’s hard here. People scrape a living out of the sand with their bare hands.”

“So. The gospel spreads forth. Having seen the damage wrought by so many other egos and programs come here to save the Africans, plugging away for The Soybean is one of the only acts of development I really feel comfortable engaging in.

“So no, in answer to your question, soybean cultivation is not a specific Peace Corps program or govt. program here.”

“As for me, I was a Vanilla Edensoy and tahini tofuburger fan back in the States, but I never knew much about soy until now.”

Color photos taken by Joyce show: (1) Three African men weeding a field of soybeans by hand, Sept/Oct. 1994. (2) Soybean plants in Bessada growing in the shade of a Karité tree, Aug. 1994. (3) Four Africans (two in traditional dress) from the health team seated outside of Joyce’s round mud-walled house with conical thatched roof. Atop a wooden mortar are five glasses of soybean coffee on a white plate. Enclosed is a recipe for “Bessadonian soya coffee deluxe,” by Joyce. Season, if desired, with *tumba* (Arabic tea spice). It’s cheap, nutritious, and you can eat the grounds. Address: U.S. Peace Corps, B.P. 193, Sarh, Chad.

2781. Soglowek, Eli. 1995. Soglowek—Israel’s biggest meat processor has been making meatlike products for 8 years (Interview). *SoyaScan Notes*. Feb. 14. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Eli is the son of one of the owners of this family-owned business, which started processing meat in Israel 55 years ago (i.e. in 1940) and is today the country’s largest meat processor, making sausages, pizza, dough, pasta, etc. The family came to Israel from Germany. Soglowek (also spelled Zoglabeck or Zoglovek or Zoglowek) is located at 8 Ha Gatton Blvd., P.O. Box 70, Naharya, Israel—10 minute’s drive from Tivall. Soglowek started making meat

alternatives after Tivall and today they are Tivall's main competitor in Israel. The CEO of Tivall today is Gazi Kaplen, and the man who developed Tivall's products is Michael Shemer, who studied in the USA, wrote his PhD thesis in 1973 on soy protein at the University of Illinois, learned about meatlike products there, then later worked for General Mills.

Tivall started making meatlike products in 1985 and Soglowek started 1-2 years later, making their products under the brand Zoglo's mainly from textured soy protein concentrates and wheat gluten. Their main products are Veggie Burgers and Veggie Cutlets (a kind of schnitzel). They buy their textured concentrates from both ADM and Central Soya, and their wheat gluten probably in Israel. Soglowek sells some of its meatlike products in Israel, but also exports large quantities to Europe and the United States. Address: 300 East 90th St., Apt. 4B, New York, NY 10128.

**2782. Product Name:** [Lopino {Lupin Tofu} (Patties in Tomato Sauce, Natural, Indian Rolls)].

**Foreign Name:** Lopino (Suesslupineneiweiss) (Bratlinge in Tomate, Natur, Rolls indisch).

**Manufacturer's Name:** Geestland Paul E. Bremer.

**Manufacturer's Address:** An der Packhalle V, Nr. 1, 27572 Bremerhaven, West Germany. Phone: (0471) 2 60 20.

**Date of Introduction:** 1995 February.

**Ingredients:** Incl. Sweet lupins\*. \* = Organically grown (aus kontrolliert oekologischem Anbau).

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter (fax) from Bernd Drosihn. 1995. May 10. Contains copy of 2-panel leaflet and label. Leaflet's front panel states (in German): "The food with a future. Lopino is high-quality, pure protein from plants, grown in Germany, with lots of vitamin B-12." Photos in the leaflet show labels of three other Lopino food products: Natural Lopino, Lopino Patties in Tomato Sauce, and Lopino Indian Rolls. A photo shows 8 people who work at Geestland.

2783. White Wave, Inc. 1995. White Wave mission statement, company overview, list of products currently sold, and product fact sheets (News release). 1990 N. 57th Court, Boulder, CO 80301. 12 p. Feb.

• **Summary:** "White Wave's mission is to creatively lead the full integration of healthy, natural, vegetarian foods into the average American diet. Our interest is in promoting the use of foods we consider the world better off with, rather than without."

"What do you call a man who started a company in a bucket 17 years ago and grew it into an \$8 million business?" White Wave employs over 60 people and has the capacity to produce 13 million pounds of tofu per year.

White Wave has nine product lines: Tofu (4 products), baked tofu (7), tempeh (5), veggie burgers (5, four made

from tempeh), Dairyless soy yogurt (8), prepared foods–meat substitutes (8), seitan (3), heat and serve (1), and Soya A Melt soy cheese (6 flavors). Address: Boulder, Colorado. Phone: 303-443-3470.

2784. Conklin, Rebecca. 1995. Top dog in meatless market: Litalife's growth has been steady. Success with vegetarian fare has swept Lightlife Foods into mainstream. *Boston Globe*. March 1.

• **Summary:** Lightlife Foods of Greenfield, Massachusetts, has a growing line of meat alternatives which are now starting to be sold to mainstream consumers in supermarkets. What began in 1979 as a hippie food business operated out of a former car wash building has developed into a thriving vegetarian food company with 25 products and 50 employees. Company sales reached \$4.1 million in 1994, up 37% from \$3 million in 1993. And revenues are projected to be \$5.5 million in 1995. Also in 1994 Lightlife sold 1.6 million meatless hot dogs.

"Lightlife has managed to reconcile two seemingly opposite interests—the concern for healthy eating and the popularity of the All-American hot dog. President Michael Cohen and vice president Chia Collins, who are partners in life and business, see no end to the growing demand for meatless products." Lightlife markets its products as low in fat, and free of cholesterol, additives, and preservatives. They are all-natural tasty alternatives to meat. Cohen is a vegetarian and he has focused his company on vegetarian fare. "His and Collins admittedly lofty philosophical goals are to teach people healthy eating, to protect the animal world and, ultimately, to help end world hunger. Cohen summed up the goals in a simple sales pitch: 'You can eat these foods and feel good.'"

Lightlife products are beginning to elbow their way onto grocery stores, where they usually end up right next to the real thing in the meat and deli sections. Two years ago when Lightlife moved into about 600 New York and New Jersey supermarkets, their Smart Dogs were sold in the meat sections. Stop & Shop sells Lightlife's Wonderdogs (hot dogs for kids) next to regular hot dogs.

Lightlife's financial history has been a series of trips to the well. Cohen and a friend started the company (named Tempeh Works) in 1979, making only tempeh. Collins joined the company a year later. Neither she nor Cohen have formal business training nor college degrees. By 1984 Tempeh Works had outgrown the car wash building but had no cash to buy real estate. Cohen and Collins persuaded the owner of a small building near Route 2 to lease the property for a year with an option to buy. They then spent the year raising \$270,000 in loans guaranteed by the Small Business Administration and a low-interest loan from a federal community development block grant. At the same time they decided to produce more than just tempeh—focusing on familiar alternatives to meat. In 1985 Tempeh

Works changed its name to Lightlife Foods and introduced Tofu Pups, a tofu hot dog, made by another company using Lightlife's formula. The product took off and in 3 years Lightlife had to return to the well for expansion funding. This time five private and public lenders put together a \$750,000 package. Lightlife used the funds to add a hot dog factory to its building, enabling the company to make Tofu Pups in-house. As soon as this factory began operation, the company started to be profitable.

Within 3 months after Smart Dogs were launched in June 1992, they were outselling Tofu Pups, which had been the company's first major success. A second boom had started. A \$1.2 million SBA-guaranteed loan from Greenfield Savings Bank in 1993 funded Lightlife's latest expansion, which nearly tripled the size of the building from 11,000 to 30,000 square feet. Wonderdogs were launched in 1994 with a mild flavor, cartoon superhero mascot, and 1 gram of fat per serving; they are designed to appeal to kids' taste buds, imagination, and nutritional needs.

A photo shows Michael Cohen and Chia Collins.

2785. Storup, Bernard. 1995. Société Soy was acquired by Diététique et Santé in July 1993, was renamed Nutrition et Soja, and is now located in Revel (near Toulouse) in southern France. Part II (Interview). *SoyaScan Notes*. March 6. Conducted by William Shurtleff of Soyfoods Center. [Eng] • **Summary:** In August 1994 Bernard moved the company from Saint-Chamond to Revel, near Toulouse in the south of France and on 1 Aug. 1994 the company name was changed from Société Soy to Nutrition et Soja (pronounced nu-tree-SYON et so-ZHA). On the same day the name of Diététique et Santé was changed to Nutrition et Santé. Nutrition et Soja still uses *Soy* as their trademark for products sold at health food shops; this trademark is very widely known among health food consumers in France. "Remember that 'Soy' doesn't mean anything in French." The water in Revel is of excellent quality, just like the water in Saint-Chamond. In Revel, Nutrition et Soja gets its water from another natural park.

Bernard's company is now located only 500 meters from another factory owned by Nutrition et Santé that makes Gerblé brand products—such as organic cookies, cereals, etc. The Cérééal brand products are made at a factory in Annonay, 500 km from Revel.

Bernard's company moved into a completely new factory, with an integrated production line from dehulling to packaging in Tetra-Pak cartons. It is really a big installation. The company has not introduced many new products since it was acquired 18 months ago. Bernard has been working a lot with companies in Germany, Spain, the Netherlands, and Italy which have been selling soymilk made typically by Alpro in Belgium or Innoval in France. But Innoval went out of business and no longer exists. They declared bankruptcy twice, first in 1993 and again in late January 1995. In 1993

an investor bought Innoval for almost nothing, invested a little money in it, but was not able to make it survive. Nutrition et Santé bought all of Innoval's equipment (made by Alfa-Laval; it was very nice), and Bernard is now using some of this equipment (including a large, automatic Buehler dehulling system) and some of the equipment he had before in Saint-Chamond. And Bernard has been working with their former soymilk customers in hopes of becoming their supplier of soymilk. Most of Bernard's sales have always been to health food stores under the *Soy* trademark. This has not changed since the acquisition. Bernard estimates that he has at least 80% of the fresh soyfoods market in France—not including soymilk.

The soymilk market continues to grow, but there is still excess soymilk manufacturing capacity. Nutrition et Soja is now the leading soymilk manufacturer in France, and they may be the second largest in Europe after Alpro—though they are much smaller than Alpro, which sells about 25 million liters of soymilk and soy desserts each year. Alpro has five Tetra-Pak packaging lines, including one that packs in 500 ml (half liter) cartons.

Nutrition et Soja doesn't compete much with Alpro because Nutrition et Soja sells its soymilk under its own trademarks—Cérééal and Gerblé—in supermarkets all over Europe. There is not much difference between these two products, but because they used to be made by two different companies, different consumers have loyalty to each brand. For the health food market, Nutrition et Soja sells its soymilk under the BioSoy trademark, which was first used in 1990 by Société Soy.

Jean de Preneuf is still with the company, working as technical manager. Bernard is in charge of the total company Nutrition et Soja, in charge of production, administration, sales, and marketing. Bernard is very happy with his new parent company, which gives him lots of independence and responsibility, and which is doing a very good job at thinking in terms of the new integrated European market. One of the products with which Bernard is especially happy is their vegetarian sausage—which is 100% organic.

Thirteen years ago Société Soy registered and owned the trademark "tofu." But recently Bernard came to feel that this was not "fair play," so he gave ownership of the trademark to SOJAXA (pronounced so-zhak-SAA), the French soyfoods association. Address: Managing Director, Nutrition et Soja, Z.I. de la Pomme, B.P. 33, 31250 Revel (near Toulouse), France. Phone: +33 62.18.72.50.

2786. Luedtke, Bob. 1995. New developments with Minnesota Edamame and SunRich Foods (Interview). *SoyaScan Notes*. March 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** On 1 July 1994 Minnesota Edamame was transformed into SunRich Foods (officially known as SunRich LLC—Limited Liability Company—basically a

combination of a Sub-S and a Sub-C corporation). At that time Minnesota Waxy Corn Growers in Hope, Minnesota, purchased 75% of the company from Dr. Lyle Joyce, who was the sole owner, and who still maintains a 25% ownership in the company. At that time the name and the company Minnesota Edamame ceased to exist. Recently Minnesota Waxy has changed its name to SunRich, Inc.—which is very confusing since two different companies have very similar names.

Bob contracts with local growers to grow green vegetable soybeans, then he processes and freezes them at the facility in Jackson, Minnesota. He also does some marketing out of Jackson. The corporate headquarters is in Hope, Minnesota. The 1994 crop, 750,000 pounds total, was completely harvested by 1 Oct. 1994, but the demand proved to be bigger than the supply. This year, after six years of steady growth, the demand for the product took off. The company was forced to keep all the product for local retail sale and was not able to supply the demand of distributors in California and elsewhere. Next year Bob plans to contract for four to five times as much soybean acreage and product as he had this year!

When Bob began doing market research on this product he had no idea that choosing a product name and designing the package (bag) was going to be so difficult and time consuming. It took about 5 months to finalize the design, and it became very clear to Bob and others that the word “soybeans” should not be prominent on the package. “The last time most people in his area knowingly ate a soybean-based product, it was the old soyburgers, which were just this side of cardboard. That was in the early 1970s when they started using soymeal as a meat extender—primarily in the schools. Soyburger got a bad connotation.” Address: Manager, SunRich Foods (SunRich LLC), P.O. Box 223, Jackson, MN 56143. Phone: 1-800-297-5997.

2787. Hess, Albert. 1995. A brief history of Albert’s Tofuhaus (Interview). *SoyaScan Notes*. March 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Albert was one of the founders of this company in June 1983; it was originally named Tofurei Rittersheim, and located in Rittersheim, Germany. In Oct. 1985 the company moved to Tiefenthal and was renamed Tofuhaus Tiefenthal. In August 1987 the company moved for a third time, this time to Lautersheim, and was renamed Das Tofuhaus. Lautersheim is a small town in southwestern Germany in the state of Rhineland-Palatinate, a little northwest of Grünstadt. In 1989 the company, still in Lautersheim, was renamed for a fourth time to Albert’s Tofuhaus.

Albert now makes 12-15 products, especially tofu, tofu spreads, and tofu burgers. He works closely with Bernd Drosihn, owner of Viana, and some of the products sold in Albert’s catalog are made by Viana. Address: Founder

and President, Das Tofuhaus, Hauptstrasse 13, D-6719 Lautersheim, Germany. Phone: 02251-56076.

2788. Maher, Timothy J. 1995. Veggie burgers bite: When they’re good, they’re great, but so far most frozen veggie burgers are el disgusto. *Record (York, Pennsylvania)*. March 15.

• **Summary:** In the author’s opinion, the Original Gardenburger (made by Wholesome and Hearty Foods) is the best of the bunch—because it makes less of an effort to simulate meat than the other patties sampled.

2789. **Product Name:** Linda McCartney’s Home Style Cooking—Meatless Entrees: American Barbecue, Non-Carné Guisada, Traditional Stew, Tex-Mex Tostada.

**Manufacturer’s Name:** Fairmont Foods of Minnesota, Inc. **Manufacturer’s Address:** 905 East Fourth St., P.O. Box 907, Fairmont, Minnesota 56031. Phone: 507-238-9001.

**Date of Introduction:** 1995 March.

**How Stored:** Frozen.

**New Product—Documentation:** Letter from Fairmont Foods. 1995. May 25. These four preplated dinners were introduced in March 1995.

2790. **Product Name:** Gimme Lean! (Instead of Ground Meat—Fat-Free) [Beef Style and Sausage Style].

**Manufacturer’s Name:** Lightlife Foods, Inc.

**Manufacturer’s Address:** P.O. Box 870, Greenfield, MA 01302. Phone: 1-800-274-6001.

**Date of Introduction:** 1995 March.

**Ingredients:** Beef: Water, textured soy protein concentrate, tapioca starch, soy sauce, isolated soy protein, vital wheat gluten, malt extract, evaporated cane juice, beet powder, spices, natural flavors, vegetable gum.

**Wt/Vol., Packaging, Price:** 14 oz chub pack.

**How Stored:** Refrigerated, 85 day shelf life. Frozen, 1 year.

**New Product—Documentation:** See next page. Leaflet sent by Patricia Smith from Natural Products Expo at Anaheim. 1995. March. “Gimme, Gimme!” On the front is a full-page color photo of meatless meatballs on plate of spaghetti. On the rear is ingredients (for each flavor), shelf life, pack size, UPC#, and nutritional information.

Griffin Report of Food Marketing. 1995. April. p. 16. This ground beef and sausage alternative was introduced in early March. Ad in *Vegetarian Times* (full page, color). 1995. Sept. p. 82. “Gimme, Gimme!” This ad also appeared in the Oct. issue, p. 95 and the Oct. 1996 issue (p. 47) and the Nov. 1996 issue (p. 57).

2791. Lightlife Foods, Inc. 1995. Recipes for living the Lightlife: Delicious meatless alternatives to traditional American fare from Lightlife Foods, Inc. (Leaflet).

Greenfield, Massachusetts. 8 panels each side. Each panel: 22 x 9 cm.

**G**imme a hot meatball sandwich. Gimme sizzling breakfast sausages and fresh baked biscuits. Gimme a meatloaf like my mom used to make. Gimme a sausage pizza and a shepherd's pie. But don't gimme no meat, or fat, or cholesterol. Just GimmeLean!

Available in BEEF or SAUSAGE styles!

• **Summary:** In a playful, hard-to-read typeface, 16 pages of recipes using Lightlife products including Lightlife Lean Links Italian, Lightlife Fakin' Bacon, Lightlife Soy Tempeh, Lightlife Garden Vege Tempeh, Lightlife Three Grain Tempeh, Lightlife Wild Rice Tempeh, or Lightlife Savory Seitan.

On the rear inside cover: Our quality pledge. Where to find our products. Talk to us (toll-free number). Credits. Special thanks to.

On the rear cover is a new logo and the slogan "Live long. Travel light." Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001.

2792. Smith, Paul. 1995. The life and work of F.G. Roberts, naturopath, and Australia's first soyfoods pioneer. F.G. Roberts Health Food Products, and Ron Smith. Part II. Mid-1930s to 1949. Bayswater, Victoria, Australia. 6 p. March. Unpublished manuscript. Handwritten. Updated by several interviews with and letters to William Shurtleff in March 1995.

• **Summary:** Continued: It is not clear when and how F.G. Roberts first learned about soybeans and soy flour. Paul suspects that he read about Dr. Harry W. Miller (a Seventh-day Adventist doctor) and his pioneering work with soyfoods in China, starting in the 1930s. "There is definitely some connection and I believe it is highly likely that F.G. Roberts met Harry W. Miller." Or the two men may have corresponded. If Roberts visited Loma Linda, California, he would surely have visited Loma Linda Foods, which made a large range of early soyfoods: In 1922 Loma Linda introduced—Smoke (a seasoning based on roasted soy flour). 1934—Soy Mince Sandwich Spread, Soymilk, VegeCheese, Soy Bean Spread, Breakfast Cup (coffee substitute), Soy Wafers, Soybeans with Proteena and Tomato Sauce. 1936—Soy Beans (plain, canned). 1938—Gluten Burger (with soy flour). 1940—Soy Beans with Tomato, Soy Beans with Proteena, etc.

During the 1930s, F.G. Roberts and others were experimenting with soybean cultivation in Australia on a small home-garden and experimental level. An article in *Nature's Path to Health* (15 July 1936, p. 35-36) gives details. Roberts concluded: "The Soya Bean has been very successfully grown in Australia." But there were no commercial crops until the 1950s.

In 1940 Horace Roberts, the youngest son, left the company when he volunteered for service with an ambulance corps being formed in Melbourne. Serving as a non-combatant male nurse during World War II, he was sent to Singapore. With Horace's departure, F.G. Roberts' food production business began to languish; the man who had managed the plant and attended to daily details was gone. Although the company's soy products were available during the war, it continued to languish until Ron Smith entered the business in 1948.

Meanwhile, during World War II, with the clinics and college all well established and running smoothly, F.G. Roberts turned some of his time and attention to a property at Panton Hills, an outer Melbourne suburb, between Eltham and Lilydale, where a home was built; he grew fresh fruit, herbs, and vegetables, and practiced composting. This provided family, friends, and pupils from the college with a place to visit and relax. It never made the expected profit.

Shortly after World War II ended, the Roberts family received devastating news. Their youngest son, Horace, had been captured in Singapore and interned by the Japanese in Changi, their prisoner of war camp there. He had died in October 1943 in Burma (working as a forced laborer on the Thailand-Burma Railway)—unbeknownst to his family until after the war had ended. So shattered was F.G. Roberts by the death of his son that he began to lose interest in the shop and the factory. The shop and clinic in the Post Office Place was closed and the family moved to Malvern Road, Prahran. The factory continued to run indifferently while F.G. Roberts put most of his time and energy into public lectures, the college, and seeing and treating patients.

Esmæ recalls that for many years on a Thursday [sic Tuesday] night, often weekly, F.G. Roberts had addressed the public about "Health Matters" at the Athenaeum Art Gallery Hall at 188 Collins Street, Melbourne. Esmæ personally attended many of these evenings, singing, playing the piano, and on one occasion addressing the audience with a speech of her own about diet and health.

In 1946 Ron Smith first came in contact with the F.G. Roberts at the Athenaeum. Vincent Ronald "Ron" and Mabel Smith, both originally from Western Australia, had married and settled in Melbourne after World War II. Ron was born on 10 December 1918 at Boulder (near Kalgoorlie), Western Australia. Mabel was born on 16 Dec. 1919 in Bunberry, also in Western Australia. Both in their late 20s and dogged by ill health, they first attended several of F.G. Roberts' lectures and later went to him for advice and treatment. Ron, in particular, was slightly built, had worn glasses for years, and had never enjoyed really robust good health. F.G. Roberts prescribed an exercise program and made radical alterations to the Smith family diet. Almost immediately the Smith family's health began to improve. Ron's physique developed and his eyes improved to where he was able to discard his glasses for nearly 30 years. Thus began a long and ongoing association with the Roberts family.

F.G. Roberts owned Green Island, a small island just off the coast of Queensland at Mackay, near the Great Barrier Reef; you could walk across at low tide. There he built a retreat to which he took his friends and pupils to enjoy the sea air, balmy climate, and the cleansing diet of fresh tropical fruits—pineapples, papayas, bananas, coconuts, and mangoes. Ron Smith enjoyed unforgettable visits with the Roberts at Green Island several times between 1948 and 1954.

F.G. Roberts had an enormous enthusiasm and an almost

boundless capacity for work. When he got a bit tired or run down, he would switch off and head for Green Island for a few weeks of relaxation. He was good fun and good company to go away with. He would buy a case of good quality ripe oranges and, with his guests, would enjoy fresh squeezed orange juice and half a ripe pineapple (freshly sliced with a sharp machete and handed around to all present) for morning and afternoon tea. He practiced what he preached.

The Roberts presided over the prenatal and antenatal care of Mabel Smith during the birth of her two sons in 1949 and 1950 with beneficial results to both infants and mother. The Smiths became lifelong converts to Mr. Roberts' philosophy. Note: In 1995, at age 76, Ron Smith still comes to work at the company each day, and often puts in a 10-hour day as managing director of the company.

In early 1948, after several unsuccessful attempts to start his own business, Ron Smith went to work for F.G. Roberts. He worked as an employee at the factory at 40 Chapel St., St. Kilda, increasingly taking over the daily management and running of this operation—formerly the responsibility of Horace, the Roberts' son, who died in the war.

Although a great healer and publicist, F.G. Roberts was not strong in the technical aspects of food production or marketing. The factory at 40 Chapel St. was more like a cottage industry. It was small, cramped, and labor intensive; mechanical aids were either non-existent or very primitive. Output was small and most products were mixed and packed by hand.

Ron sparked the resumption of manufacturing, even though wartime rationing was still in place and obtaining permission to import anything was difficult. Paul recalls (28 March 1995): "Roberts, himself, was a dreamer, and far too preoccupied with travelling, treating patients, lecturing, and racing on to the next new idea. He lacked the patience, persistence, and stability to run a manufacturing business. His skills and interests lay elsewhere."

F.G. Roberts was an osteopath, naturopath, registered dietitian, iris diagnostician, and had several other natural healing qualifications. He studied by attending courses in the U.K. and by correspondence. He was first registered in Australia as a "Consultant Dietitian" in 1942-43. Continued. Address: Director/General Manager, Soy Products of Australia Pty. Ltd., 69 Power Road, Bayswater, VIC 3153, Australia. Phone: (03) 729-1738 or 729-3611.

2793. Smith, Paul. 1995. History of Soy Products of Australia Pty. Ltd., and the work of Vincent R. "Ron" Smith. Part V. 1980-1995. Bayswater, Victoria, Australia. 6 p. March. Unpublished manuscript. Handwritten. Updated by several interviews with and letters to William Shurtleff in March 1995.

• **Summary:** In April 1980 Ron and Mabel Smith's eldest son, Paul, abandoned his career as an architect and joined

them full time at Soy Products of Australia. Born on 23 January 1949 at Queens Road, South Melbourne, Paul had Architecture, Landscape Design, and Master of Business Administration (MBA) degrees. He had been a director of the company since Aug. 1977. In 1990 Paul became General Manager of the company following Mabel's retirement. In 1981, at the request of William Shurtleff of Soyfoods Center, Paul wrote a brief history of his company (which see). Thereafter, his interest in the company's history steadily grew, and he did extensive research on the subject. Paul is thinking about writing a biography of F.G. Roberts, so he has collected some documents about his life, including articles from *Nature's Path to Health*, published exercise regimes, iridiagnosis charts, and some recipe books. Unfortunately the company has no product catalogs from before 1985. Paul has written parts of the story and he has written an outline article in a 1985 company brochure.

Paul's human sources of information on F.G. Roberts were: His father and mother, Ron and Mabel Smith. Mrs. Gladys Hawken (F.G. Roberts' daughter). Mrs. Esmæ Noelene Jackson (1937 -; née Grimes, granddaughter of F.G. Roberts and his wife Gladys; she was reared by both of them). Grahame Newitt (1939 -; chiropractor, grandson of F.G. Roberts, and brother of Esmæ). Mr. David Evans, a naturopath who operated F.G. Roberts' clinics at Newcastle and Sydney during the 1930s. Mr. William Pruss, who worked with F.G. Roberts' brother, W.E. "Bill" Roberts in Sydney during the 1930s and 1940s. Nurse Cogan who operated F.G. Roberts' shop and clinic at Ballarat, Victoria, continuously from 1937 until her death in 1993. Numerous patients of F.G. Roberts, including Mr. Shugg (from Surrey Hills, a suburb of Melbourne), Nan Yates (diagnosed with terminal cancer in 1969 and still alive today), and Mrs. Alice Harding (diagnosed with cancer of the liver in 1939, who remarried at age 80 and died in 1987 at age 88).

The "Roberts" brand has been used continuously since F.G. Roberts commenced manufacturing in 1932 at 40a Chapel St., St. Kilda. The "Roberts" brand name applies to numerous other products, developed by Roberts in the 1930s, which have nothing to do with soybeans, e.g. "Molasses," "Alfalfa Tea," "Skin & Healing Ointment," "Vita Balm" (a heat rub), "Malted Bran," cider vinegar, etc., some of which we still manufacture and sell in addition to our soy products.

Apparently many of F.G. Roberts' personal papers and records were either dumped or acquired by Stephen (?) Newitt when Gladys Roberts Hawken sold her home to move into Corinella Retirement Village about 2 years ago. At least one complete set of *Nature's Path to Health* from July 1930 to Jan. 1947 still exists, privately owned, bound in five volumes.

Concerning old advertisements for products made by F.G. Roberts, Paul has original issues of *Nature's Path to Health* from 1935 (2 issues), 1936 (2 issues), and 1937, plus the April-May 1949 issue. He has seen later and earlier

issues, and from some of these he has been able to photocopy articles and advertisements.

In the company's archives Paul can find no product labels or brochures which predate the move to Bayswater in 1968. All existing old labels have the Power Road, Bayswater, address, but many of them were copies of earlier labels with only the address changed. Some of the artwork goes back to the 1930s and early 1950s in format and design.

Even though F.G. Roberts was baptised a Seventh-day Adventist, attended an SDA college and married a woman who became a devout member of that church, he left the SDA church for many years during the middle of his life due to a mismatch between his views and the more conservative views held by the church and its elders at that time. There was intense competition between Roberts and Sanitarium Foods, owned by the SDA church. Roberts was a proponent of Norman Vincent Peale's "Power of positive thinking, and was very critical of Sanitarium Foods' use of wheat gluten in their meatlike products, nutmeats, etc. He also felt the SDA diet was too high in starch, sugar, and gluten. Ron Smith recalls that Roberts never discussed the matter with him.

Gladys, F.G.R.'s wife, remained a staunch SDA parishioner and member of the church throughout her life, paying out of her own income to send a number of children to SDA colleges in Australia and Fiji. F.G.R. upheld his wife in her religious beliefs and works, often waiting outside in the car while she and the children attended church. Yet F.G.R. was a very spiritual / religious person judging from the memories of those who knew him, and the tone of his magazine, *Nature's Path to Health*. His granddaughter, Esmæ Jackson, was brought up in the Seventh-day Adventist religion and is still a devout, active member of the church. F.G.R. and his wife, Gladys, reared Esmæ, due to friction between herself, her mother, and her stepfather. They paid Esmæ's fees to attend the SDA college in Oxley Rd., Hawthorn (very near the 1954-1968 factory) and later Avondale College (SDA), where she studied to be a teacher. Esmæ speaks very highly of the kindness and generosity of her grandparents for paying her school fees, etc. She apparently had a very happy and secure childhood with them. Paul suspects that F.G. Roberts felt that a religious background was not important to his work and it may have alienated some potential customers. He was widely known throughout Australia, and treated many SDA patients, including several people that Paul knows who formerly worked for the company.

Since 1957, Soy Products of Australia Pty. Ltd. has operated in two parts: One part is a flour milling / commodity type operation, producing heat-treated / stabilised / debittered products including Debittered Full Fat Soy Flour and Grits (the grits come in coarse and fine mesh), Lightly Steamed Full Fat Soy Flour, Heat Treated Soy Fibre Flour (from soy hulls), Stabilised Wheat Germ, and Stabilised Wheat Bran. They also produce heat treated wholegrain rice flour, and

maize flour. The other part of the business produces specialty retail products under the Roberts' brand name for the health food, diabetic, and coeliac [celiac] markets. This product range, remaining true to Roberts' philosophy of minimally processed whole foods, continues to include such soy-based foods as Soy Compound, Gluten Free Plain Flour, Gluten Free Self Raising Flour, Soy Crunch, and Vita Elm.

They also make some vegetarian burgers. In addition, since 1963, Soy Products of Australia has supplied cleaned and bagged Australian-grown soybeans to various commercial manufacturers of tofu, soy sauce, and other soyfoods in Australia. Since the early 1970s, most of these soybeans have been grown in the Riverina area in southern New South Wales and northern Victoria.

75% of the company's annual turnover relates in some way to soybeans. About 40% of their turnover is sold under the Roberts brand name and the remaining 60% is sold as commercial commodity products. They also do a fair amount of specialist contracting for the food industry, mainly stabilising bran and wheat germ, and milling, sieving, and mixing a variety of food stuffs for human consumption. They also process rice, maize, rye, barley, oats, wheat, and other grains for internal use. They are currently testing buckwheat, lupins, and chickpeas for both internal (i.e., under the Roberts brand) and external use. They propose to use them in conjunction with soy in a variety of applications. They are moving increasingly towards making user-friendly, convenience "health" or healthy foods which meet F.G. Roberts' ideals.

The company has 6 full-time employees and also employs a pool of casuals as required. The mill is highly automated, needing only a single operator. Last year's sales figures are confidential.

As of 1995 Paul Smith is involved in all aspects of the business, including building, plant and equipment selection, design, and development, product development, packaging design, information technology, etc.

V.R. "Ron" Smith is presently the Managing Director and major shareholder of the company; his wife and son Paul own the remaining shares. His main duties now revolve around maintenance and plant installation, with some consultative input on milling, sieving, and general product development. He no longer plays an active role in the day to day running and management of the company.

An excellent 4 by 6 inch black-and-white photo sent by Paul Smith shows F.G. Roberts, dressed in a coat, tie, and hat. Address: Director/General Manager, Soy Products of Australia Pty. Ltd., 69 Power Road, Bayswater, VIC 3153, Australia. Phone: (03) 729-1738 or 729-3611.

2794. **Product Name:** [Chili con Tofu].

**Foreign Name:** Chili con Tofu.

**Manufacturer's Name:** Viana Naturkost GmbH.

**Manufacturer's Address:** Willi Graf Strasse 88, 53881

Euskirchen-Kuchenheim, Germany. Phone: (02233) 41323.

**Date of Introduction:** 1995 March.

**Ingredients:** Tofu\*, kidney beans, tomato pulp\*, vegetable oil\*, leeks\*, carrots\*, herbs\*, spices\*. \* = Organically grown (*kontrolliert biologischer Anbau*).

**Wt/Vol., Packaging, Price:** 425 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Labels brought by Bernd Drosihn of Viana. 1995. March 11. 9.62 x 4 inches. Red, white, and black on orange. Recycled paper. Ready to heat and serve (*Fertiggericht*).

2795. **Product Name:** [Seitan Ratatouille].

**Foreign Name:** Seitan Ratatouille.

**Manufacturer's Name:** Viana Naturkost GmbH.

**Manufacturer's Address:** Willi Graf Strasse 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: (02233) 41323.

**Date of Introduction:** 1995 March.

**Ingredients:** Seitan (*Seitan*)\*, tomato pulp\*, vegetable oil\*, vegetables, paprika, leeks\*, carrots\*, onions\*, wheat flour (*Weizenvollkornmehl*)\*, raisins (*Rosinen*)\*, apple cider vinegar\*, herbs\*, spices\*. \* = Organically grown (*kontrolliert biologischer Anbau*).

**Wt/Vol., Packaging, Price:** 425 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Labels brought by Bernd Drosihn of Viana. 1995. March 11. 9.62 x 4 inches. Red, white, and black on pea green. Recycled paper. Ready to heat and serve (*Fertiggericht*).

2796. **Product Name:** Philly Steak Slices (Meatless, Made from Seitan).

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 1990 N. 57th Ct., Boulder, CO 80301. Phone: 303-443-3470.

**Date of Introduction:** 1995 March.

**How Stored:** Refrigerated.

**New Product–Documentation:** News release from White Wave. 1995. March. White Wave has added Philly Steak Slices to its successful Seitan line. Use these in your favorite Philly cheese sandwich recipe.

2797. Wittenburg, Bonnie. 1995. Archer Daniels Midland Company: NYSE–ADM. Minneapolis, Minnesota: Dain Bosworth. 38 p. 28 cm.

• **Summary:** This is an updated and expanded edition of the excellent original report published in Dec. 1993. Concerning ADM management and board of directors: Chairman Dwayne Andreas is now age 77 and president James Randall is 70. It is uncertain when either will retire. Michael (Mick) Andreas, age 45, vice chairman of the board and executive vice president, is Dwayne Andreas' son and heir apparent. All operating divisions of ADM have reported to Mick Andreas for the past 3 years, and he apparently

has major input on expansion plans and capital investment. A workaholic, he “joined ADM in 1971 after receiving a bachelor’s degree in business from Northwestern University. At ADM he has worked as a commodity merchandiser in the United States and in Brussels, Belgium. He is said to love trading and he continues to keep a desk on the trading floor at ADM; it is not unusual to spot him there. Mick Andreas is past president of ADM’s soybean processing division and has generally supervised ADM’s commodity trading and marketing worldwide since 1980.” The value of his ADM stock is approximately \$108 million, compared with \$408 million for Dwayne Andreas’ stock and \$102 million for Lowell Andreas’. Address: 60 South Sixth St., Minneapolis, Minnesota 55402-4422. Phone: (612) 371-2728.

2798. Worthington Foods, Inc. 1995. Annual report 1994. 900 Proprietors Rd., Worthington, OH 43085. 16 p. 28 cm.

• **Summary:** Total sales rose to \$88.2 million in 1994, up 11.2% from \$79.3 million in 1993. Net income (profit) rose to \$4.33 million in 1994, up 141% from \$1.79 million in 1993. Both 1994 figures were new company records. On 22 Nov. 1994 the Company sold its refrigerated egg assets for \$9 million; this helped reduce debt by \$10.4 million, made available an ideal plant in Zanesville (Ohio) in which to produce meat alternatives in the future. The company kept its frozen egg products, Scramblers and Better ‘n Eggs, which hold, approximately, a 30% market share. “More important than the financial results for 1994, it was a year in which the company was repositioned for improved growth and profitability...”

Meat alternatives is the category in which the company expects to achieve significant growth in the years to come. They developed this category 20 years ago in supermarkets, and in it they have the greatest expertise and technology. During 1994 sales of Morningstar Farms meat alternatives were up 42% in supermarkets and 35% in foodservice operations. In supermarkets Morningstar Farms has maintained over 55% market share. But the company’s position as “Number one in meatless” is being challenged. The company’s new Morningstar Farms Better ‘n Burgers is the first fat-free burger to be introduced nationally. It is selling well and is available in 30% of U.S. supermarkets.

Inside the front cover is the company’s very interesting mission statement, which begins: “Worthington Foods, Inc. is solely dedicated to producing and marketing vegetarian and other healthful foods. Worthington Foods will continue to be a leader in providing nutritionally balanced options to meat, egg and dairy products for healthful living, as it has done for more than 50 years.” The “Corporate Objectives” are divided into six categories: Shareholders, consumers, the trade, employees, the community, and company policy. Address: Worthington, Ohio. Phone: (614) 885-9511.

2799. Rose, Richard. 1995. Sharon’s Finest is moving

towards hemp products (Interview). *SoyaScan Notes*. April 3. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Richard first introduced the idea of using hempseed protein in natural food products in America. His is still the only company making such products, and demand for them is growing rapidly. “Our business is moving toward hemp.” He recently published a brochure titled “Hemp Food,” that explains the many benefits of growing hemp. Many people still do not realize that hemp is not the same as marijuana; they are different plants.

Sharon’s Finest now makes HempRella (a non-dairy cheese alternative containing 5% milled hemp seeds) and Hempeh Burger (a soybean and rice tempeh burger containing 10% whole hemp seeds). The future of Hemp Foods lies in sprouting hemp seeds then processing them to make milk (similar to making soymilk from the soybean), yogurt, ice cream, tofu, cheese, meat alternatives, and the like. Address: President, Sharon’s Finest, P.O. Box 5020 (616 Davis St.), Santa Rosa, California 95402-5020. Phone: 707-576-7050.

2800. Reuter (Havana). 1995. Cuba turns to soy to curb protein shortage. *Manitoba Cooperator (Winnipeg, MB, Canada)*. April 13.

• **Summary:** Cuba’s present rationing system allows all children under 7 years of age to receive a quart of cow’s milk a day. Food Industry Minister Alejandro Roca reports that Cuba, faced with severe shortages of beef and cow’s milk, is increasing production of “protein-rich soy products such as soy yogurt, soy ice cream, and soyburgers.” Yogurt, ice cream, and cream cheese made from cow’s milk were widely available until about 1990, after which there has been a steep drop in their production. Roca said the production of yogurt made from soy milk will reach 40,000 tons this year, up from only 11,000 tons last year, with a goal of 100,000 tons by 1996. He also said that production of ice cream and cream cheese made from soy milk will be increasing.

Since the mid-1980s, soybean meal has been used in Cuba as a meat extender for the ground (minced) meat received by Cuban families under the strict system of food rationing. The official meat ration in Havana is 12 ounces every 10 days. Hamburgers extended with 30% soybean meal are sometimes available in restaurants and cafeterias.

2801. *Glencoe News (Chicago, Illinois)*. 1995. Soy-based natural foods enter the mainstream. April 20. [1 ref]

• **Summary:** Once soy-based foods were found only at health food or natural food stores. Now they are finding their way into mainstream grocery stores, as more and more Americans are recognizing the need to eat healthy. According to the Illinois Soybean Association, the main products to look for are tofu, soymilk, frozen desserts, soy flour, and analogs (like “veggie” burgers).

2802. Clark, Amy Rosenbaum. 1995. A fantastic investment [Disney and Fantastic Foods]. *Vegetarian Times*. April. p. 17.

• **Summary:** At Disneyland and Disney World Mickey Mouse and Minnie have gone meatless and are munching on veggie burgers—thanks to a new partnership between Fantastic Foods (well known of its veggie burger mixes and instant soups) and Shamrock Holdings Inc., an investment company headed by Roy Disney, nephew of the late Walt Disney.

Trefoil II, a Shamrock affiliate, has acquired a significant minority ownership in Fantastic Foods. Lloyd Greif, president of Grief & Co. (an investment banking firm based in Los Angeles, California) represented Jim Rosen, CEO of Fantastic Foods, in the transaction.

Greif says that Shamrock was enthusiastic about investing in the natural foods field, noting that “It’s not a fad, its a trend. And Fantastic Foods was growing by leaps and bounds.”

Now Fantastic Foods has introduced a frozen veggie burger that’s on the menu of a few restaurants in the Disney theme parks. The burger will also be appearing soon in supermarket freezer cases and on institution menus—and possibly even in one of the major fast-food restaurant chains. A color photo shows Mickey Mouse.

2803. *Griffin Report of Food Marketing (Rockland, Mass.)*. 1995. Lightlife Foods finds success with its meatless products on supermarket shelves. April. p. 16.

• **Summary:** In early March, Lightlife Foods of Greenfield, Massachusetts, introduced Gimme Lean, a vegetarian alternative to ground beef and sausage, packed in a sausage-shaped chub pack. The fat-free product is one of about 5 products made by Lightlife that has crossed over into the mainstream marketplace. All of the company’s 25 products are sold at natural food stores nationwide, and these stores account for about 75% of the company’s total sales.

In 1992 Lightlife Foods first targeted mainstream supermarkets (starting with Stop & Shop) with its Smart Dogs, a fat-free meatless alternative to hot dogs, based on soy protein and wheat gluten. The company’s crossover meat alternatives are now available in the New England region at Shaw’s, Edwards, Star, Shop ‘n Save, Purity, and a number of independent markets, such as Victory Markets. The company’s success proves that consumers are interested alternatives. Mr. Cohen, who has built his company’s reputation on manufacturing quality vegetarian products, projects that company sales will top \$5.5 million this year. Lightlife continues to build its foodservice business, and to service college cafeterias, private schools, and offices.

2804. **Product Name:** Soyboy Okara Courage Burger.

**Manufacturer’s Name:** Northern Soy, Inc.

**Manufacturer’s Address:** 545 West Ave., Rochester, NY 14611. Phone: 716-235-8970.

**Date of Introduction:** 1995 April.

**Ingredients:** Filtered water, soy protein concentrate, wheat gluten, okara, egg whites, potato flour, soy sauce (water, soybeans, wheat, salt), soybean oil, natural flavor from all vegetable sources, nutritional yeast, herbs and spices, onion powder, sea salt, vegetable gum, evaporated cane juice.

**Wt/Vol., Packaging, Price:** 9 oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Ad (½ page, color) in *Vegetarian Times*. 1995. April. p. 69. “Like chicken? You’ll love a bite of courage.” A chicken and a wolf with eating utensils are sitting behind a package of this product. “A perfect choice for non-vegetarians. A great choice for everyone. SoyBoy.”

2805. Omelianuk, Scott. 1995. Don’t have a cow: The new herd of virtual meats on the market are a toothsome alternative for meat lovers and vegetarians alike. *Men’s Fitness*. April. p. 37-38.

• **Summary:** Describes six soy-based meatless burgers, five meatless hot dogs, four meatless deli slices, and six other meatless products. The Soyfoods Association expects “fake-meat” sales to reach \$180 million this year.

2806. Worthington Foods, Inc. 1995. First quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. 22 x 9 cm.

• **Summary:** “Net sales for the first quarter of 1995 were up 9.3% over the same period in 1994, net income was up 79%, and earnings per share were up 75%. Morningstar Farms Breakfast Links have been reformulated to contain only 2.5 gm of fat per serving. During the second quarter of 1995 Morningstar Farms will introduce two additional “Low-Fat” products: Garden Grain Patties (containing mushrooms, rice, onions, oats, and low-fat cheeses—without any soy ingredients) with only 2.5 gm of total fat and Spicy Black Bean Burgers with only 1 gm of total fat. These two products will be companions to the successful Garden Vege Patties, now available in nearly 60% of U.S. supermarkets. They will appear under the banner “America’s Original” Veggie Burgers.

Note: America’s earliest known meatless burgers (with the word “Burger” or “Burgers” in the product name) were as follows:

Loma Linda Food Co. 1938. Loma Linda Gluten Burger (with Soy Flour).

Special Foods (Renamed Worthington Foods, Inc. in Dec. 1945). 1945. Choplet-Burger.

Loma Linda Foods. 1949. Vegemeat Burger (or Vegemeatburger).

Loma Linda Foods. 1953. Loma Linda Redi-Burger (Meatless Hamburger).

Loma Linda Foods. 1960. Loma Linda Vegeburger (Canned Meatless Hamburger). Address: Worthington, Ohio.

Phone: (614) 885-9511.

2807. **Product Name:** VegiMax: The Ultimate Veggie Burger Sub (Foodservice product).

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1995 April.

**Ingredients:** Vegetables (mushrooms, water chestnuts, onions, carrots, green and red bell peppers, black olives), textured vegetable protein (soy protein concentrate, wheat gluten), egg whites, cooked brown rice, rolled oats, corn oil, calcium caseinate, soy sauce (water, soybeans, salt, wheat). Contains 2% or less of onion powder, corn starch, salt, hydrolyzed corn, soy and wheat protein, sucrose, soy protein isolate, spices, garlic powder, dextrose, jalapeno pepper powder, celery extract.

**Wt/Vol., Packaging, Price:** 60 x 3.0 oz patties.

**How Stored:** Frozen.

**New Product–Documentation:** Worthington Foods. 1996. First quarter financial report. VegiMax is now sold to 3,000 Subway units (restaurants).

Color leaflet with note sent by Worthington Foods. 1996. May 2. This product was introduced in April 1995 by the Morningstar Farms Foodservice Division. It is pre-formed and pre-cooked; just heat and serve on a six inch bun. Only 3 gm fat. No cholesterol. Completely meatless. Excellent Hoagie, too. On the front of the leaflet is a color photo of a VegiMax patty inside a long bun, atop a bed of lettuce, sliced tomatoes, and onion rings. On the back of the leaflet the logo reads: “Morningstar Farms: Number One in Meatless. Providing healthier food alternatives, our only business for over 50 years.”

2808. *SoyaScan Notes*. 1995. America’s earliest known vegetarian / meatless burgers (Overview). May 3. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** America’s earliest known meatless burgers (with the word “Burger” or “Burger” in the product name) were as follows:

Loma Linda Food Co. 1938. Loma Linda Gluten Burger (with Soy Flour).

Special Foods (Renamed Worthington Foods, Inc. in Dec. 1945). 1945. Choplet-Burger.

Loma Linda Foods. 1949. Vegemeat Burger (or Vegemeatburger).

Loma Linda Foods. 1953. Loma Linda Redi-Burger (Meatless Hamburger).

Loma Linda Foods. 1960. Loma Linda Vegeburger (Canned Meatless Hamburger).

2809. Stoneback, Diane. 1995. Veggie burgers pass taste test with few beefs. *Call (Allentown, Pennsylvania)*. May 3.

• **Summary:** After an informal taste test at the Morning Call

newsroom last week of three kinds of vegetarian burgers available in local supermarkets, 20 of 23 tasters said they'd readily eat the veggie burgers again. "But only 13 of the 20 said they'd eat the veggie burgers instead of regular hamburgers."

Morningstar Farms Better 'n Burgers was rated the best. The Gardenburger ranked #2, and Green Giant's Harvest Burgers came in last. Address: Food Editor.

2810. Nicholls, Walter. 1995. Foraging: Burgers without the beef. *Washington Post*. May 17.

• **Summary:** There are two basic kinds burger alternatives: Those designed to taste like beef and those which are simply a vegetarian patty. True vegetarians often prefer the latter. The author found that alternative burgers are grilled or sautéed in a nonstick skillet with lots of good stuff piled on top. He did a taste test, and rated the many brands into three categories: Exceptional: Boca Burgers (Chef Max's Favorite, Fresh Garlic, Original), Morningstar Farms (Garden Veggie Patties, Grillers; [made by Worthington Foods]), Wholesome and Hearty Foods (Gardenburger, GardenMexi).

Acceptable: Amy's (Organic California Veggie Burger), Green Giant (Harvest Burgers), Ken & Roberts (Veggie Burger), Morningstar Farms (Better 'n Burgers), Natural Touch (Garden Grain Pattie), Yves Veggie Cuisine (Burger Burgers).

Forgettable: Lightlife (American Grill, Light Burgers), Mudpie (Veggie Burgers), Soy Boy (Courage Burger, and Veggie Sizzler), Woodstock Whole Earth Foods (The Better Burger), Yves Veggie Cuisine (Vegetable Patties). Photos show packages of the three Exceptional brands. Address: Washington, DC.

2811. *New York Times Magazine*. 1995. Healthy hemp burgers: Food science. May 28. Sunday.

• **Summary:** The Hempeh Burger, introduced last month by Sharon's Finest, a California health food company, won't get you high and is supposed to be healthy. It "does contain cannabis seeds but from a nonhallucinogenic part of the plant. This kind of cannabis is known as hemp."

"It has been illegal to grow marijuana in the USA since the 1937 Marijuana Tax Act." Address: Box 5020, Santa Rosa, California 95402-5020. Phone: 707-576-7050.

2812. Allen, Andrea Horwich. 1995. Can isoflavones give soy mainstream acceptance? *Food Product Design*. May. p. 20-21.

• **Summary:** Researchers now believe that a family of phytochemicals present in soy, called isoflavones, may actually reduce the risk of atherosclerosis by preventing the formation of plaque on artery walls. One isoflavone, genistein, which is present only in soy, also fights cancer by inhibiting the growth of cancer cells. Genistein appears to mimic the effects of estrogen so that the body produces

less of that hormone, thus reducing the risk of estrogen-dependent cancers, especially breast cancer. One study of Japanese men suggests that those who eat a diet high in soy protein have a lower incidence of prostate cancer.

Representatives from Morinaga Nutritional Foods, Westbrae, and Pillsbury Green Giant are trying to take advantage of the new discoveries by educating their customers. The FDA seems unlikely to be ready to approve a soy-related health claim such as "Includes your daily intake of soy." ADM, who makes the Green Giant frozen burgers, is said to retain Mark Messina, PhD, as a consultant. A large photo shows a carton of WestSoy Low Fat Soy Drink (Vanilla). Address: Assoc. Editor.

2813. **Product Name:** St. Michael Vegetable Burgers.

**Manufacturer's Name:** Marks and Spencer p.l.c.

**Manufacturer's Address:** Baker St., London, England.

**Date of Introduction:** 1995 May.

**Ingredients:** Water, fresh onion, soya protein, vegetable oil, vegetable fat, breadcrumbs, hydrolysed plant protein, reconstituted egg white, yeast extract, dextrose, salt, vegetable bouillon (contains nutmeg), wheat protein, herbs, thickener, carrageenan, lactose, malt extract, spices, flavour enhancer 635.

**Wt/Vol., Packaging, Price:** 227 gm paperboard box. Retail for 100 pence.

**How Stored:** Refrigerated.

**New Product-Documentation:** Label (package) sent by Heather Paine of Soyafoods in London. 1995. Aug. 8. Use by May 10.

2814. *Natural Way (Rye Brook, New York)*. 1995. Veggie good news: Candlestick Park, home of the San Francisco Giants baseball team, sells 300 to 500 tofu wieners at every game. May.

• **Summary:** The title is the full story.

2815. *Packaged Facts*. 1995. The meat and dairy alternatives market. New York, NY: Packaged Facts. xii+ 162 + 42 + 6 p. May. 28 cm.

• **Summary:** In 1994 retail sales of these products reached an all-time high of \$286 million, and these sales are projected to top \$660 million in 1999. This very interesting report can be ordered from Packaged Facts, 625 Avenue of the Americas, New York, NY 10011. Phone: 212-627-3228. Price: \$2,150. The authors were Sarah and Peter Starr, though their names do not appear in the report. The product director was David Lumis.

Contents: Part I: The products. Scope of the report (Vegetarian products sold as meat or dairy alternatives, products not covered), history of the industry (an emerging market, part of the vegetarian movement, soybeans—an ancient food of Asia, soybeans arrive in the new world in the 18th century, Kellogg family starts health foods

industry, makes first meat analogs, Seventh-day Adventists and others produce tofu and meat alternatives in the 1920s, Henry Ford early proponent of soybeans, meat analogs commercially developed in the United States in the 1940s, non-dairy beverages, growth of “Americanized” meat and dairy analogs booming), product definition (foods used to replace meat or dairy products, description of ingredients—tofu, tempeh, soymilk, okara, soy protein concentrates and isolates, textured vegetable protein, wheat gluten and seitan), product categories (three main categories of meat and dairy alternative products, meat alternatives, dairy alternatives, prepared meals), government regulations (the FDA and FTC, NLEA labeling considerations {went into effect in May 1994, making the USA the world’s first country to have mandatory nutrition labeling}), soy protein allowed in meat products without special labeling, bovine growth hormone), industry associations (the Soyfoods Association of America, the American Soybean Association, the Vegetarian Awareness Network).

Part II: The Market. Introduction (Retail sales of meat and dairy alternative products by category—1989-94—graph, retail sales of dairy alternatives products by segment—1989-94—graph), market size and growth (market is difficult to monitor, 1994 retail sales estimated at \$286 million, dairy alternatives surpass \$142 million, meat alternatives soar to \$132 million, prepared meals grow steadily to over \$12 million, estimated retail sales of meat and dairy alternative products by category—1989-1994—table, growth in milk substitutes segment leveling off but still in double digits, cheese alternatives segment also experiences slight slow-down in 1994, non-dairy desserts—a slow-growth segment, estimated retail sales of dairy alternative products by segment—1989-1994—table), factors in market growth—overall market (maturing population and interest in nutrition, new dietary guidelines, medical community accepts plant-based diet, studies show vegetarian diet equals a healthier—longer life, soy might help to prevent heart disease and cancer, consumers now approve of vegetarian diets, increased demand for vegetarian foods, youth adopts meatless meals, exposure through foodservice, mass market begins to support meat and dairy alternatives, products in wider distribution, innovative new products, improved technology equals better taste, increased funding for soyfoods through foreign capital, pricing continues to limit market, image—taste and texture still a problem), factors in market growth—meat alternatives (concern about health hazards of meat, fat calories targeted by labeling law, an alternative to chicken and fish, ecological and social considerations will propel meatless meals, meatless meals difficult to handle by foodservice), factors in market growth—dairy alternatives (milk substitutes enter dairy case, awareness of lactose intolerance on the rise, taste profile limits acceptance, cheese alternatives—are they healthier?, projected retail sales of meat and dairy alternative products

by category—1994-1999—graph {p. 34}, projected retail sales of dairy alternative products by segment—1994-1999—graph {p. 35}), projected market growth (overall market to reach \$662 million in 1999, meat alternatives and prepared meals to lead growth, projected retail sales of meat and dairy alternative products by category—1994-1999—table, growth of milk substitutes and other dairy alternatives expected to slow somewhat by 1999, projected retail sales of dairy alternative products by segment—1994-1999—table), market composition (meat alternatives will outsell dairy alternatives, share of sales by product category—meat and dairy alternatives—graph, soy-based ingredients most frequently used in meat-like products, protein ingredients used in meat-like products by number of products made with ingredient—1990-1992—table, bulk of dairy alternative sales from milk substitutes, share of sales by product segment—1989 vs. 1994—graph, sales by retail outlet, share of sales by retail outlet—meat and dairy alternatives—1994—graph).

Part III: The marketers. The marketers (About 30 significant marketers—most small, major companies move into the market, meat alternatives—other mass-market players, meat alternatives—natural foods players, the leaders in milk substitutes, cheese alternative market leaders, the leaders in non-dairy desserts, prepared meals market leaders, selected marketers and brands of meat and dairy alternative products—chart), market and brand shares (mass-market leader Worthington Foods challenged by ADM/Pillsbury Green Giant Harvest Burger, wholesome and hearty growing fast, Boca Burger boogies by the Bystanders, marketer and brand shares of meat alternative products sold through supermarkets—1993 vs. 1994—table, natural foods sales of meat alternatives more fragmented, Worthington is leader in natural foods stores, White Wave and Lightlife hold second and third place, estimated marketer and brand shares of meat alternative products sold through natural foods stores—1994—table, many small regional players capture local markets, Eden Foods leads in milk substitutes, estimated marketer and brand shares of milk substitute products mass-market and natural foods stores—1994—table, Imagine Foods’ Rice Dream is leading rice beverage, other vegetable beverages, Tree of Life’s Soya Kaas holds leading share of cheese alternatives market, estimated marketer and brand shares of cheese alternative products sold through natural foods stores—1994—table, Tofutti holds top market share in frozen desserts, Fairmont Foods establishes lead in supermarkets, marketer and brand shares of prepared meals sold through supermarkets—1994—table, natural foods prepared meals—many brands and no one leader), competitive situation—overall market (marketers compete primarily through new product introductions, growth through mergers and acquisitions). Continued.

2816. Packaged Facts. 1995. The meat and dairy alternatives market (Continued—Document part II). New York, NY:

Packaged Facts. xii+ 162 + 42 + 6 p. May. 28 cm.

• **Summary:** Contents: Continued from p. vi. Part III: The Marketers. Competitive situation—meat alternatives (Worthington pioneers Seventh-day Adventist vegetarian market, Miles Laboratories acquires Worthington—places Morningstar Farms in mass market, tofu drives natural foods market, soy frank marketers exploit tofu opportunities, tempeh—another meat alternative ingredient gains interest, wheat-based alternative seitan expands presence, Worthington places tofu patties in natural foods stores—changes hands again, Wholesome and Hearty develops foodservice distribution, meatless burger market heats up, patty competition fierce in natural foods arena, ADM/Pillsbury alliance brings soy burgers to mass market, Worthington fights back, category differentiates in the early 1990s, soy attacked by soy-free burger companies, meat alternative marketers cut the fat, low-fat sausages and franks, tightly targeted vegetarian fun foods and snacks, mass-market companies introduce ground meat analogs, natural product companies follow suit, Wholesome and Hearty seeks retail growth, others seek lucrative foodservice market), competitive situation—milk substitutes (early market limited to ethnic community, Edensoy a big hit—Vitasoy responds, new lines introduced, competition—domestic manufacturing and larger containers bring down soy beverage prices, flavors and packaging distinguish early products, Westbrae introduces first low-fat soymilk, fortification has become key selling point, Eden’s fortified product suits strict vegetarians, new package sizes expand market, re-closable—easy to pour, rice beverages—line extensions grab shelf space, Wholesome and Hearty’s almond beverage, 100% organic products, a fresh—new market—some products shift to dairy case, mass-market interest), competitive situation—cheese alternatives (Seventh-day Adventists start category, first natural foods cheese alternative, Soyarella, not dairy-free, handful of marketers compete on price in natural foods arena {Soya Kaas, TofuRella by Brightsong / Sharon’s Finest, Cemac Foods, Galaxy Foods, White Wave}, new products parallel dairy-based mass market, a move toward lower fat and fat-free, seeking the most melt-able cheese, Sharon’s finest finds innovative ingredients, marketers target vegan market), competitive situation—non-dairy desserts (Tofutti dominates, dairy-free puddings—one major player {Imagine Foods sells a rice-based non-dairy pudding}, non-dairy yogurt has yet to catch on—but White Wave’s Dairyless, a non-dairy soy yogurt, seems to be the only major natural foods brand in this category), competitive situation—prepared meals (flavored tofu and seitan expanded into meals, Legume is early innovator, cheese alternatives in prepared meals, other companies dive into prepared meals, action has been in natural foods, supermarket products have not succeeded), competitive profiles (The Archer Daniels Midland Co.—Grand Metropolitan PLC—Pillsbury division partnership, Amy’s Kitchen Inc., A&A Amazing

Foods Inc., Boca Burger Co.—Sun Foods, Eden Foods Inc., Fairmont Foods of Minnesota Inc., Fantastic Foods Inc., The Hain Food Group Inc., Imagine Foods Inc., Lightlife Foods Inc., Sharon’s Finest, Tofutti Brands Inc., Vestro Natural Foods Inc., Vitasoy—USA Inc., White Wave Inc., Wholesome and Hearty Foods Inc., Worthington Foods Inc., Yves Veggie Cuisine Inc.), marketing trends (updated packaging, burger market segmenting into natural and mass market, Worthington—a master at working both markets, hamburger look-alikes crossing back into natural foods, veggie patties crossing into mass market, nostalgia—creating brand loyalty, marketers expanding into other categories, moving into the frozen breakfast section, retail displays, pushing into new distribution channels), new product trends (new—improved packaging, light and healthy, product names emphasize healthy, fat-reversal—mass-market burger-substitutes gaining fat, ground meat alternatives, new flavors and varieties—many gourmet and upscale, ethnic—especially Mexican and Southwestern, convenience, technology produces better mimics, mixing soy with grains and other ingredients, mainstreaming health foods, natural ingredients preferred—organic even better, selected new product introductions—meat and dairy alternatives—1994-March 1995—chart), advertising expenditures (most advertising not measured, specialty magazines are preferred medium, radio is another alternative, little consumer advertising, Worthington outspends competition, ADM-Pillsbury spends millions to launch Harvest Burger in 1994, Eden Foods targets mass market, Fantastic Foods’ first major spending), advertising positioning (good health is overlying theme, and fat is prime concern, vegetables are a solution to a bad diet, milk substitutes advertised to lactose-intolerant market, highlighting a sense of the familiar, foods children love, traditional burger images used to woo mass market, vegetarian appeal used for meatless patties, organic is important feature in natural foods, examples of consumer advertising), consumer advertising (consumer promotions not heavily used, money-off coupons from several companies, new lines offer more generous rebates, recipes and books educate consumers, in-store promotions—the White Wave Center, marketers join forces in advertorial, sponsoring sports events—a healthy fit, 25 years of earth day, non-profit tie-ins, Turtle Island’s recycling program, other types of promotions, examples of consumer promotions), trade advertising and promotions (three key trade publications, trade ads also used as consumer ads, trade ads scheduled to run in convention issues, trade ads announce growing business, editorial promotions, reaching retailers, example of trade ads). Continued.

2817. Packaged Facts. 1995. The meat and dairy alternatives market (Continued—Document part III). New York, NY: Packaged Facts. xii + 162 + 42 + 6 p. May. 28 cm.

• **Summary:** Contents: Continued from p. x. Continued

Part IV: Distribution and retail. Distribution (Two distinct channels, mass-market products—warehouse delivery used most, natural foods products—-independent distributors used most, distributors offer wide range of services, direct buying, several large distributors dominate health food channel, margins for the two channels differ, brokers support marketers' sales efforts, marketers' sales forces work with brokers), at the retail level—natural foods stores (the leading outlet—natural foods stores, soy-based products the heart and soul of natural foods store, products sold in several locations, stores adding refrigerator and freezer space, margins, product price comparison, meat alternatives—table, milk substitutes—table, cheese alternatives—table, frozen non-dairy desserts—table, prepared meals—table, in-store demos are top promotional activity, an increase in store advertising, examples of retail promotions), at the retail level—mass market (most products not in mass market, store placement of meat alternatives varies, store-within-a-store, increased selection and space, targeting the vegetarian consumer, margins, warehouse clubs, *Cergro* pricing data).

Part V: The consumer. Consumer use—soyfoods (About 25 million U.S. adults use soyfoods, natural foods shoppers more likely to purchase soy products, demographics of meatless burger consumers, use by type—tofu and soy burger use most common, other types of soyfoods used by about 2% of consumers, types of soyfoods eaten five or more times in the past year—table), the vegetarian consumer (what is a vegetarian, 12-22 million vegetarians and growing, small number of strict vegans, meat restrictors—a broader target of 77 million, who are vegetarians, demographic characteristics of vegetarians—table), consumer attitudes (main reason for choosing vegetarian foods, most important reason for becoming a vegetarian—table, concern about health higher among semi-vegetarians, most important reason for choosing vegetarian foods—table, cholesterol-fat primary health concerns, primary health concern when becoming a vegetarian—table, grocery store shoppers more influenced by doctor's orders, health also key reason given by restaurant diners, fat—salt—fiber and cholesterol top health concerns for meatless burger consumers, environment pollution tops list of other social concerns of vegetarians, vegetarians considered nutrition advisors, a slow transition to vegetarianism, attitudes about meat alternatives, room for improvement on taste, consumers have a positive image on soy, more interest in soymilk from natural foods shoppers).

Appendix I: Examples of consumer and trade advertising and promotions [photocopies of ads]. Appendix II: Addresses of selected marketers.

Scope of the report: This is a study of vegetarian foods made to resemble meat and dairy products and sold at retail, mostly through supermarkets and health and natural food stores. These products include meatless burgers and luncheon slices, soymilk and rice milk, cheese alternatives, non-dairy desserts (usually non-dairy ice creams), and prepared

vegetarian meals containing meat and dairy alternatives as major ingredients.

Products not covered: (1) Bulk and packaged tofu, unflavored tempeh—However products such as tofu- or tempeh burgers are covered. (2) Margarine, non-dairy creamer, non-dairy whip toppings, and egg substitutes. Although the first three of these categories are alternative to dairy products, they have become well accepted in the American diet and are not necessarily purchased by consumers wishing to avoid dairy products. "Also, the sheer size of these categories—each of which is many times larger than the overall meat and dairy alternatives market—would drastically skew the market numbers and trend information away from the products that are the focus of this report. For similar reasons, egg substitutes are also excluded."

2818. Packaged Facts. 1995. Retail sales of meat alternatives: 1989-1994 (in million dollars) (Document part). In: Packaged Facts. 1995. *The Meat and Dairy Alternatives Market*. New York, NY: Packaged Facts. 162 + 42 + 6 p. See p. 17, 19, 51-52. May. 28 cm.

• **Summary:** A graph (p. 17) shows that sales of meat alternatives (in million dollars) rose from \$69.8 in 1989 to \$85.7 in 1991 to \$115.5 in 1993 and \$131.6 in 1994. The average annual sales growth for this period was 13.6%. In the past two years, however, sales of meat alternatives have increased by 15.2 and 18.0%.

Concerning the accuracy of these figures, page 19 notes that sales in these markets are difficult to quantify because a large share of retail dollar volume moves through natural foods stores, where sales are mostly untracked, and because various information sources define meat and dairy alternatives products differently. Therefore these "estimates are based on information provided by Soyatech, Inc., the Soyfoods Center, Information Resources, Inc., the natural foods trade, and various manufacturers."

A table (p. 51) shows the market shares of major manufacturers of meat alternatives sold through supermarkets (NOT including natural food stores) in 1993 and 1994. The 1994 market shares were as follows: Worthington Foods 64.5% (Morningstar Farms brand 63.8% and Natural Touch brand 0.7%). ADM/Pillsbury 21.8% (up from only 8.0% in 1993). Wholesome & Hearty Foods (Garden products) 7.9%. Yves Veggie Cuisine 2.1%. Sun Foods (Boca Burger) 1.4%. Other 2.3%. Source: Information Resources, Inc.; Packaged Facts.

A second table (p. 52) shows estimated market shares of major manufacturers of meat alternatives sold through natural food stores in 1994: Worthington Foods 30.4% (Natural Touch, Loma Linda, Worthington brands). White Wave 9.8%. Lightlife Foods 6.5%. Yves Veggie Cuisine 5.8%. Wholesome & Hearty Foods (Garden products) 4.8%. Fantastic Foods (Nature's Burger) 3.9%. Sun Foods (Boca Burger) 3.0%. Other 35.8%. Source: Packaged Facts.

Wholesome & Hearty Foods (Portland, Oregon): In March 1985 this company introduced the Gardenburger, a non-soy vegetarian patty into natural foods restaurants and college cafeterias. Foodservice remains Wholesome & Hearty's core business and accounts for about 70% of the company's sales. Today, over 22,000 foodservice outlets offer the company's various meatless patties (p. 59). In 1992 Wholesome & Hearty began an aggressive drive to introduce its Garden products line into retail stores—both natural foods and mass market.

2819. Benko, Laura B. 1995. Vegetarian foods find success in mainstream. *Los Angeles Times*. June 6. p. D1, D11.

• **Summary:** Thirty years ago Paul Wenner became a vegetarian. Ten years ago (in 1985) he founded Wholesome & Hearty Foods, and recently his company (located in Portland, Oregon) sold its 100-millionth Gardenburger, a vegetarian burger, now sold at 31,000 restaurants and food service outlets nationwide.

Fantastic Foods of Petaluma, California, is another vegetarian food company, founded 20 years ago. Director of marketing Larry Tsai says, "Our time has come." The company sells Nature Burger patties to Disneyland, as well as to some Ralphs, Hughes, and Lucky supermarkets.

A graph from Information Resources Inc. shows retail sales of meat substitutes from Jan. 1992 to mid-1995. They have roughly tripled, rising from \$2.1 million to \$6.67 million. A pie chart from *Vegetarian Times* magazine shows that Americans avoid meat consumption mainly for because of health concerns (53%), followed by concerns for animal rights (17%), the environment (14%), social and religious (9%), and other (7%).

2820. Sheeler, Jim. 1995. Tofu giant "beefs up" vegetarian cuisine: A new acquisition and "Meat of Wheat" adds new flavor and texture to Boulder's White Wave Inc. *Camera (Boulder, Colorado)*. June 6.

• **Summary:** This week White Wave, long renowned as Boulder's tofu giant, announced that it had acquired Ivy Foods of Salt Lake City, Utah, the largest producer of seitan products in America, known for its line of "Meat of Wheat" products. These products will now be manufactured, marketed and distributed from White Wave's two huge plants in Boulder. Financial details of the acquisition were not disclosed.

Besides its best-selling Chicken Style Wheat Meat, Ivy Foods also markets Grilled Burgers Wheat Meat and Sausage Style Wheat Meat. A "Meat of Wheat" version of sliced turkey is being sold at three Subway Sandwich shops in Boulder and at a ten-store chain in Los Angeles, California. "Vegetarians love it." According to company president Steve Demos, White Wave has grown 300% in the last five years, with revenues/sales of nearly \$8 million in 1994, projected to rise to \$9.5 million in 1995. Demos expects to outgrow

the company's two huge factories by 1997. Demos is also expensing his staff. He hired away the resident "Dr. Tofu" [Jonathan Gordon] from Kraft Foods—yes the man actually has a PhD in tofu.

Note: This is the earliest English-language document seen (Feb. 2005) that contains the term "Meat of Wheat." Address: Camera staff writer.

2821. Rosch, Leah. 1995. Meatless burgers and hot dogs: Are they better for you? *Glamour*. June. p. 38.

• **Summary:** Four people from *Glamour* magazine taste tested nearly two dozen nationally available veggie burgers and hot dogs, comparing them with widely available hamburgers and lower-fat franks. Most faux burgers and dogs are lower in calories and fat than their meaty counterparts. They also contain no dairy, eggs, or animal by-products. "Their chief ingredient is soy protein. Soy burgers provide about half to three quarters of the protein in a comparable serving of cooked ground beef, but they have fewer calories, less saturated fat and a fair amount of fiber. Compared with the real thing, tofu dogs have twice the protein and less fat. They don't contain nitrites (a preservative used in traditional franks that has been linked to cancer), but they often contain as much sodium as regular hot dogs—or even more."

All tasters enhanced the flavor with their favorite condiments. The three veggie burgers that were liked best were: (1) Boca Burger—Hint of Fresh Garlic (97 calories, 1 gram of fat per patty); (2) Boca Burger—Chef Max's Favorite (110 calories, 2 gm of fat); (3) Green Giant Harvest Burgers (140 calories, 4 gm of fat). The top hot dog: Morningstar Farms Meatless Deli Franks (110 calories, 7 gm of fat each [made by Worthington Foods]).

2822. Soyfoods Association of America. 1995. A consumer profile of the soyfoods shopper. San Francisco, California. 100 p. \*

• **Summary:** Contents: Executive summary. Overview.

1. U.S. population—Awareness of soyfoods: Number of consumers who have heard of soyfoods (most have heard of tofu, few have heard of tempeh), demographics of soyfood-aware consumers (consumers under age 60 more aware of soyfoods, soyfoods-aware consumers are more affluent, greater number of Easterners but awareness is nationwide, more likely to be married).

2. Soyfoods consumers—Demographics: Use of soyfoods (about 26 million soyfoods consumers—15 million eat tofu, consumers who use one kind of soy product more likely to use another type), demographics (younger households and baby boomers, household incomes skew higher, more than two-thirds are college-educated, employed in white-collar professions, women in soyfoods households less likely to be in clerical jobs, men working full-time—some self-employed, busy women in a variety of employment situations, one-third

of soyfoods consumers have children at home, most in the east—proportionately more in the west, proportionately more in pacific, live in areas of greater population density, living the American dream, mostly home-owners).

3. Soyfoods consumers—Shopping and eating patterns: Frequency of eating types of soyfoods (most eat soyfoods infrequently, soy cheese used more frequently, regular users use soyfoods—especially soymilk—a lot, consumers of one type use other types more), where consumers buy soyfoods (groceries/supermarkets stores of choice for tofu, natural foods store shoppers more dedicated soyfoods consumers, meat substitutes purchased in mass-market, other soyfoods in natural foods stores, soymilk customers split between grocery and natural foods, miso popular in Asian stores), future purchase plans (more than 6 million consumers plan to use soyfoods more, soy hot dog—cheese and frozen dessert consumers most enthused about eating more soyfoods), the soyfood shopper’s diet (seek low-fat/cholesterol/sodium/sugar foods, health interests vary by types of soy products tried), other red meat alternatives (most list fish and poultry as red meat alternatives, vegetarian foods favored by consumers of specific soy products).

4. Soyfoods consumers—Attitudes about soyfoods: Attributes of soyfoods (a positive opinion of soyfoods’ health benefits—consumers approve less of taste and ease-of-use, soymilk and soy hot dog consumers most likely to agree that soyfoods are healthy, few consumers have negative health image of soyfoods, soy products users believe in soyfoods’ special nutrients, soyfoods easier to use than public thinks, familiarity breeds affection, users of various soy products see cost savings, those who use specific soy products—especially tempeh—cannot find them where they shop, consumers of various types do not feel soyfoods are a problem for allergies), importance of organically grown (more than one-third of soyfoods consumers seek organically grown, attitudes about organic stronger among users of specific products).

5. Soyfoods consumers—Sources of product information: Where consumers first learned of soyfoods (word of mouth is primary source, promotion works for packaged products), why consumers first began to eat soyfoods (novelty and health are the prime motivators, soymilk consumers more concerned about specific health and lifestyle issues—soy burger consumers seeking low-fat meat substitutes), why consumers currently eat soyfoods (consumers less sure why they currently eat soyfoods, tofu—soymilk—and soy burger consumers more likely to have specific reasons), familiarity with health connections (consumers unfamiliar with some of soyfoods’ health benefits—familiar with soyfoods’ link to cholesterol and heart disease, both users and interested non-users aware of link to cholesterol and heart disease, core consumers not well-informed about other health benefits), sources of information (magazines and newspapers most common source of health information).

6. U.S. population—Why consumers aren’t eating more soyfoods: Who is interested in eating more types of soyfoods (consumers would like to try new soyfoods), what would get consumers to eat more soyfoods (taste and lack of cooking suggestions are barriers to use, soy hot dog consumers seeking lower prices—soymilk shoppers seeking more outlets—tofu consumers want recipes, rural—southern and consumers seek lower cost—more affluent seek better taste).

7. Children and soyfoods: How often children eat soyfoods (among soyfoods households—two-thirds of kids age 2-12 eat these products, households with children age 2-12 eat more soy burgers—soymilk, children age 13-18 more likely to be infrequent soyfoods consumers, households with older children tend to choose same products as soyfoods consumers overall), children’s attitudes about soyfoods (children’s attitudes toward soyfoods are mixed—many parents cannot speak for their children).

8. The tofu shopper: Ways consumers use tofu most often (tofu use most often in stir-frys), why consumers eat tofu (consumers say they eat tofu because it is healthy), what influences brand choice (price—freshness and taste), why consumers aren’t eating more tofu (tofu consumers are looking for new ways to use tofu), demographics (most tofu users are 30-59—those 60 and over avoid it, higher household incomes, tofu household heads are highly educated and have executive jobs, household size and marital status similar to average American, concentrated in more populated areas—East and West coasts).

9. The soymilk shopper: Ways consumers use soymilk most often (most often used as a beverage), why consumers use soymilk (non-specific health features and convenience attract soymilk users), what influences brand choice (freshness, quality, taste drive soymilk sales), why consumers aren’t using more soymilk (cost and availability hinder use), demographics (younger households use soymilk, more affluent households, education and occupation, more multiple-person households, more Westerners and those in mid-size MSAs).

10. The soy-based meat alternatives shopper: Why consumers use soy-based meat alternatives (because they are healthier), what influences brand choice (taste and price), why consumers aren’t buying/using more soy-based meat alternatives (cost, unfamiliarity, taste and availability hinder use, cost and availability factors are higher among users of specific products), demographics (soy burger users and interested non-users are younger, household income somewhat higher among meat alternatives users, college educated and graduates, white collar employees, two person households for some products—soy burgers mirror U.S. population, soy bacon use higher in East—burgers higher in central region, variations by types of products used).

11. The soy-based dairy alternatives shopper: Why consumers used soy-based dairy alternatives (for health reasons), what influences brand choice (taste primarily),

why consumers aren't buying or using more soy-based dairy alternatives (cost an unfamiliarity hinder use), demographics (older and more affluent, educated and professionally employed, smaller size households—more singles, live in moderately populated areas, more concentrated in east and west).

12. Other soyfoods shoppers—Soy flour, tempeh, and miso: Demographics (soy flour consumers older—miso consumers most affluent, soy flour, tempeh and miso found in educated households, occupation status similar to other soyfoods shoppers, smaller households and more singles use tempeh, more soy flour users in low-density areas, east and west coasts for miso and tempeh).

Methodology. Questionnaire. Continued. Address: One Sutter St., Suite 300, San Francisco, California 94104. Phone: 510-935-9764.

2823. Soyfoods Association of America. 1995. A consumer profile of the soyfoods shopper. II. Methodology of collecting information. San Francisco, California. 100 p. \*  
 • **Summary:** This survey was conducted by Market Facts, Inc., a market research firm based in Chicago, Illinois. Project directors for this report were Tim Redmond (American Soy Products) and Peter Golbitz (Soyatech, Inc.). Fieldwork was done by Sheri Hoffenberg (Market Facts). Analysis and Report: Sara M. Starr and Peter Starr (Starr Track). Price: SAA members \$475. Nonmembers: \$975.

The survey was conducted in two parts. In the first part a questionnaire was mailed to 20,000 people in the Market Facts database. Of these, 17,715 people mailed back responses, and of these 15,168 were completed and usable. Three questions related to soyfoods: 1. Have you ever heard of: Ten types of soyfoods are listed—Tofu, soymilk, soy flour, tempeh, miso soup stock paste, soy burgers, soy hot dogs, soy bacon or breakfast sausage, soy cheese, and soy frozen desserts. The respondent is asked to check those that he or she has heard of. 2. Which of these ten soyfoods have you eaten 5 or more times in the past year? The same list is repeated and the consumer is asked to check as indicated. 3. "I would eat more soyfoods if... (1) They were more accessible where I shop for food, (2) I knew better what to do with them, i.e. recipes, (3) I was better informed on the health benefits; (4) I thought they tasted good; (5) They were less expensive. Check all that apply.

Part II. From the 15,168 people who mailed back completed and usable responses to part I, 750 people were chosen to participate in a follow-up survey, which consisted of a 4-page questionnaire containing in-depth questions about consumption of and attitudes toward ten different types of soyfoods, purchasing motivations and patterns, and questions about children's attitudes toward soyfoods. The sample was divided into 3 groups. A questionnaire was mailed to a representative sample of 626 people (anyone who indicated they had eaten soyfoods at least 5 times in

the past year). An over-quota sample of 67 soymilk users and 57 respondents who indicated that they were soy cheese users. This was done in order to ensure enough completed questionnaires among people who used soymilk and soy cheese. To ensure the sample quality, consumers were again asked about their use of various kinds of soyfoods. Consumers who responded affirmatively to using at least one kind of soyfoods were retained in the mail survey sample. Address: One Sutter St., Suite 300, San Francisco, California 94104. Phone: 510-935-9764.

2824. *Tufts University Diet and Nutrition Newsletter*. 1995. Between the buns: franks and burgers get a grilling. 13(4):3-6. June.

• **Summary:** Regular frankfurters and burgers, made from pork or beef, leave much to be desired from a health viewpoint. However: "When it comes to vegetarian hot dogs, our tasters found them surprisingly repellent... Most have an unnatural burnt orange color as well as a rubbery texture. As for flavor, many taste like unseasoned soy. Comments ranged from 'gross,' to 'awful, awful, awful,' to 'inedible.' We couldn't find a single brand worth spending good money on.

"We didn't find the options for veggie burgers much better. Several had a cardboard-like texture. And, like the meatless hot dogs, many of the vegetarian burgers left behind a distinctly unpleasant aftertaste. We did find a few tolerable selections, however: Natural Touch Garden Vege Patties, Natural Touch Okara Patties, SoyBoy Okara Courage Burger, and Wholesome and Hearty Gardenburger. Still, we think our own vegetarian Tex-Mex Bean Burger beats these hands down (see p. 4)." Most of the veggie burgers contain only about 25% as much fat as regular hamburgers. A table shows the weight, calories, fat content, saturated fat and sodium content of many different types of frankfurters and about 9 burgers (both regular and vegetarian).

2825. Webster, Donovan. 1995. Green days: How I became a vegetarian for one trying month and changed my life and health forever. *Men's Health*. June. p. 116-20.

• **Summary:** The author struggled through a vegetarian diet for one month, losing 9 pounds and the roll of fat around his belly. He ate quite a few meat alternatives. When it was over he felt like he was "on the horns of a dilemma. Vegetarianism had, obviously, been good for me—and it hadn't been that difficult. Yet I also knew that, long term, the carnivorous pleasures of meat-based life would drag me back into the darkness of their cave. So I struck myself a bargain. For two months out of every year, one in the spring and one in the fall, I would be a vegetarian. The rest of the year I'd eat meat when I wanted to, but I'd still endeavor not to do it all the time."

A sidebar by Greg Gutfeld titled "The Meatless Market" begins: "Time was, a vegetarian had to make do with sprouts, tofu, and voting for McGovern. But new to the supermarket

shelves are numerous meatless items mimicking our favorite animal-derived pleasures—even things like hot dogs, hamburgers, bacon and deli meat.” The following products were tasted and are evaluated as “Hey, not bad”:

Worthington Chik Stiks, Worthington Stripples, Garden Gourmet Vege-Nuggets, Boca Burger (the best liked), Worthington Stakelets, Lightlife Fat-Free Meatless Smart Dogs, Garden Mexi Patties.

The rest were “No, thanks, we’ll pass”:

Worthington Meatless Salami, Natural Touch Lentil Rice Loaf, Yves Veggie Tofu Wieners, Yves Veggie Pepperoni, Lightlife Italian Lean Links, Lightlife Organic Three Grain Tempeh, Bearitos Vegetarian Chili.

2826. Chajuss, Daniel. 1995. The meat alternatives industry and market in Israel (Interview). *SoyaScan Notes*. July 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The three major manufacturers of meat alternatives in Israel are Tivall (Tivol), Soglowek (also spelled Zoglabeck or Zoglovek or Zoglowek), and Shamir Food Industries Ltd. Daniel estimates that Tivall has about 50% of the Israeli (non-export) market, followed by Soglowek (35%), and Shamir (15%). Shamir’s products are being sold under the label of Dreizin Food Industries Ltd. About 500 tons/month of products made by these three companies are being sold now in Israel—a huge amount. Most (but not all) of these products contain soy. Tivall has been making these products the longest and Shamir is the most recent entrant into the market. Why do Israeli consumers buy these products? Many buyers do not follow a kosher diet. They like these as convenience products, as natural foods (which they aren’t really), and as vegetarian products. Daniel would guess that about 5% of Israelis are vegetarians. There are some villages of American Seventh-day Adventists in Israel near the Sea of Galilee that are completely vegetarian. Vegetarians automatically keep kosher.

Daniel believes that Tivall can trace its origins to the work of two men: Dr. Michael (Micha) Shemer, who earned his PhD at the University of Illinois at Urbana-Champaign in 1973, and Saul Katzen, who was the first person to make meat alternatives from extruded soy flour in patty form. Saul’s main problem was that his products were made from soy flour, which led to problems of taste (the main problem), antigenicity, and some intestinal gas. Saul bought his soy flour (the fines from non-toasted white flakes sifted out prior to alcoholic extraction) from Daniel’s company, Hayes Ashdod Ltd. Saul had extrusion equipment (Wenger X-25 and X-200), so Daniel urged Saul to buy soy protein concentrates (made by Daniel’s company) instead of soy flour, and run the concentrates through his own extruder. But Saul felt that soy flour was less wasteful and less expensive. Daniel believes that the use of soy flour led Saul’s company into bankruptcy. Daniel was very sad about this bankruptcy, and for a long time before it happened, Daniel gave Saul

a lot of soy flour free of charge. After Michael Shemer left the University of Illinois, he went to work for Miles Laboratories, which had purchased Worthington Foods. Then he returned to Israel and worked for Miles on a citric acid project. When Michael was fired by Miles in the late 1970s, he joined an Israeli company name Pedco, which made many kinds of food products. Michael taught Pedco how to make meat analogs. Tivall, a company which is located on a kibbutz in northern Israel, bought Pedco in 1984; Tivall was established and incorporated for the sole purpose of purchasing Pedco and its activities; Tivall was not engaged in any activity and did not operate prior to its purchase of Pedco. Tivall had plenty of start-up capital and the now has a lot of money, most of which they have earned making meat alternatives. A daughter company of theirs used to make surimi-like products, but now they are separated.

Dr. Shemer was granted several Israeli and international patents on his process which uses reducing agents (or ss-cleaving agents) to soften gluten. Daniel believes that Tivall is no longer using the Shemer patents; rather they are using a 1956 Hartman/Worthington patent—which is now in the public domain. Thus Shamir can now also use that patent.

To make meat alternatives, Tivall now starts with wheat gluten and adds a reducing agent (such as sodium sulfite) to make the gluten soft. Or ascorbic acid can be used; its low pH softens the gluten. A 1956 patent issued to Warren Hartman and assigned to Worthington Foods describes how to soften gluten by adding soy flour or soy protein. Shamir wants to add soy protein concentrate (SPC) to wheat gluten to soften it. Tivall maintains that SPC is a reducing agent—but Daniel is certain that soy flour is a reducing agent, but regular SPC is not; its NSI [nitrogen solubility index] is 3-6. Dr. Shemer has testified that Tivall is the world’s largest manufacturer of meat alternatives and that it was the world’s first company to make meat alternatives using wheat gluten and soy protein, but it is well known that Worthington Foods made such products long before Tivall. To help resolve its dispute with Tivall, Shamir hired Dr. Noam, who is a chemist and a patent lawyer. Daniel assisted Dr. Noam—which did not please the people at Tivall.

Shamir is located in the Barkan Industrial Zone (P.O. Box 5), M.P. Ephraim 44820, Israel (Phone: +972-3-936-4159. Fax: +972-3-936-4160); this is in central Israel, far from Tivall. Shamir’s basic business is making prepared foods, especially salads, for both consumers and catering (foodservice). They are a relatively small company and they have had a line of meat alternative products on the market for about 3 years—on a very small scale. They make meatless hamburger-like patties (with or without breading; with breading is called “vegetarian schnitzel”), sausages (frankfurters), and some non-soy main dishes based on vegetables—such as peas and corn. These products are similar to those made by Worthington.

Soglowek, a rich and powerful company, is located at 8

Ha Gaton Blvd., P.O. Box 70, Naharya, Israel—10 minute's drive from Tivall. When Soglowek began to compete with Tivall in the meat alternatives market, Tivall's prices dropped significantly. Address: Managing Director, Hayes General Technology Company Ltd., Misgav Dov 19, Mobile Post Emek Sorek, 76867 Israel. Phone: (972) 8 592925.

2827. Jost, Rick. 1995. First brats, now burgers—tofu firm grows. *Des Moines Register (Iowa)*. July 17.

• **Summary:** Tim Beeler, president of Bee-Lor Inc. of Oskaloosa (in southeast central Iowa) worked with vice-president Jerry Lorenzen of Fremont, Iowa, to develop the Brato Dog (a combination of tofu and pork) a couple of years ago. Initially this product was called just Bratos, but they changed the name to help them penetrate the East and West Coast markets. Lorenzen is a soybean geneticist and Beeler is a hog raiser.

Now they are developing the Beeler Burger, a frozen combination of tofu and beef, which they hope will be showing up in health food stores and some supermarkets in 30 to 45 days. "Tofu is a cheese-like product of soybeans that is low in calories, cholesterol, fat—and flavor. Lorenzen noted that soybeans also contain genistein, a plant estrogen that some researchers say will become part of a new classification of anti-cancer substances."

Beeler, who has personally conducted a lot of in-store demos, notes that "Tofu has not been a readily accepted product at this point in time in the Midwest. When you tell people that this is made with pork and tofu, people would say 'Ew, tofu?' It just sounds so weird they wouldn't taste the product." So Beeler has changed his approach. Now they simply demonstrate Brato Dogs as a new product. Only after customers have tasted it, do they tell them that it contains tofu. "The idea is to try to sell people food that is healthful without trying to change their tastes." Brato Dogs typically sell for about \$1 per pound more than regular hot dogs (Brats). The company plans to soon roll out two new flavors of Brato Dogs—chili and cheddar cheese, and a spicy version.

2828. Stoneback, Diane. 1995. Veggie burgers enter mainstream market. *Sun-Times (Chicago, Illinois)*. July 19.

• **Summary:** "Can America's love affair with the all-beef patty be shaken? It won't be easy, but the Jolly Green Giant may be big enough to do the job." A large photo shows packages of Green Giant Harvest Burgers (meatless) in three flavors: Southwestern Style, Italian Style, and Original Flavor. The caption: "When mighty Green Giant introduced its Harvest Burgers into supermarkets, it signaled vegetarian burgers' entry into Middle America's diet." Address: Food Editor, Morning Call (Allentown, Pennsylvania).

2829. **Product Name:** Harvest Direct Protean (Dry Mix—Alternative to Ground Meat) [Original Flavor, Taco Mix, Cheeseburger Flavor, Garden Herb Flavor, Chili Mix, Italian

Flavor, Grill Flavor, Barbecue Mix, Sausage Flavor].

**Manufacturer's Name:** Harvest Direct, Inc.

**Manufacturer's Address:** P.O. Box 4514, Decatur, Illinois 62525. Phone: 800-637-5850.

**Date of Introduction:** 1995 July.

**Ingredients:** Taco mix: Soy protein concentrate, textured soy flour, tomato powder, corn starch, dehydrated onion, modified oat flour, maltodextrin, spices and spice extractives, hydrolyzed soy protein, salt, onion powder, garlic powder, paprika (for color), malt extract, caramel color, natural flavor, cocoa powder, citric acid.

**Wt/Vol., Packaging, Price:** 4 oz foil pouch.

**How Stored:** Shelf stable.

**New Product—Documentation:** Talk with Monty Kilburn, Catalog Director of Harvest Direct. 1996. Sept. 17. These products, made by Harvest Direct (not by ADM), were introduced in July 1995 and now are sold to health food stores nationwide. Leaflet (color, 8½ by 11 inches) sent by Monty Kilburn. 1996. Sept. 18. The front shows color labels of the 9 products. The back gives a general description of the products. "New product features: Fat free. Cholesterol free. Vegetarian. Complete dry mix. Just add water. New foil pack. Nine great flavors."

Sample products with Labels of Taco Mix and Barbecue Mix sent by Harvest Direct. 1997. March 11. 5¼ by 7½ inches. Foil pouch. 4 oz (113 gm). A color photo on the front panel shows the prepared recipe. "Fat free. Cholesterol free. The all-vegetable alternative to meat."

2830. Worthington Foods, Inc. 1995. Second quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. 22 x 9 cm.

• **Summary:** Net sales for the first half of 1995 were \$43.8 million, an increase of 9% over the same period last year after adjusting for the sale of the refrigerated egg substitute assets. Net income for the first 6 months of 1995 was \$2,421,000, up 72%. The sale of meat alternatives in the mass market has been strong during the first half of 1995. "Category sales [nationwide, all manufacturers] of meat substitutes increased 38% during the second quarter and by 50% during the first half of 1995.\* We are aggressively working to gain national distribution for these new products during the first half of 1995..." \* Note: Statistics on nationwide category growth are based on scanner data supplied by Information Resources, Inc., the world's leader in this field.

In 1994 Worthington decided to place less resources in the egg substitute business and more resources in the meat alternative business. "This has turned out to be a sound strategic decision in that frozen egg substitute category sales are significantly declining, while the meat substitute category sales are significantly increasing. Two years ago our sales for egg substitutes (frozen and refrigerated) were about equal to sales of meat alternatives in the mass market. Currently,

our egg substitute business is less than one-third of our meat alternative sales to supermarkets.” Address: Worthington, Ohio. Phone: (614) 885-9511.

2831. Benedetti, Jef. 1995. Soy report generates calls to Worthington Foods, but little stock movement. *Daily Reporter (Columbus, Ohio)*. Aug. 7. [1 ref]

• **Summary:** A study by James W. Anderson published last week in a medical journal touting the advantages of soy protein in reducing blood cholesterol has generated many phone calls to Worthington Foods, and a lot of interest from the consumer and investment communities. Ron McDermott, the company’s vice president of research and technology, says that 80% of worthington’s food products contain soy protein. The company markets meatless products under four names: Morningstar Farms, Worthington, Loma Linda, and Natural Touch. In 1994 the Morningstar Farms line was the best seller, with almost \$56 million in sales, according to the company’s 10-K filing.

In April William Blair & Co. in Chicago published a “buy” recommendation on the company’s stock, noting that roughly one-half of Worthington’s sales are to individuals seeking to reduce their intake of fat and cholesterol.

An Associated Press story about Anderson’s study stated that he received \$5,000 from Protein Technologies International, which makes soy protein, to help pay for the work. “Anderson told the AP that he believes 20 grams of soy protein a day, substituted for animal protein, could be enough to help lower blood cholesterol.”

Patty House of Ohio State University wrote a report titled “From Farm Lands to Shoppers Hands” stating that the average American consumes six gallons of soybean oil per year in such forms as cooking and salad oil, margarine, shortening, and prepared salad dressings.

2832. Rubin, Rita. 1995. An oats disciple now turns to tofu: Seeking cholesterol salvation in a soyburger. *U.S. News and World Report* 119:73. Aug. 14. [1 ref]

• **Summary:** James Anderson, whose former research on fiber has earned him the sobriquet “Dr. Oat Bran,” recently published an influential article in the *New England Journal of Medicine*. It showed that consumption of soy protein can lower cholesterol levels. This article summarizes his study, adding that Anderson likes tofu. Last week he recounted that he has enjoyed tofu scramble, tofu stir-fry, tofu and vegetables, and tofu burgers.

2833. Shapiro, Laura; Springen, Karen. 1995. Health: Oh, boy! Pass me the soy! *Newsweek* 126:60. Aug. 14. [1 ref]

• **Summary:** “Hippies were right: Tofu really is good for you.” A study by Dr. James Anderson published last week in the *New England Journal of Medicine* reported that people who ate soy products significantly lowered their levels of bad cholesterol and slightly raised their levels of “good”

cholesterol. Anderson, an endocrinologist at the University of Kentucky, says it would be “great” if Americans consumed about 30 grams of soy protein a day. That’s about half the recommended daily allowance of protein for most people, and the equivalent of about 12 ounces of tofu or two soyburgers. Cookbook author Deborah Madison says that soy doesn’t deserve its “yecch” reputation. She likes to add one part soy flour to three parts wheat flour when making bread or pancakes, or frying a breaded tofu cutlet. Though tofu has a very mild flavor, the “health results have plenty of zip.”

A photo shows two soybeans in a pod, with the caption: “Bean power: In pod.”

2834. Quinn, Catherine. 1995. Feast on soy—It’s practical and easy. *Soy Connection (The) (Chesterfield, Missouri—United Soybean Board)* 3(3):2. Summer. [4 ref]

• **Summary:** “Lowering cholesterol levels, possible cancer prevention—good reasons to recommend that our Lipid Research Clinic patients eat more soyfoods. But, resistance can be strong. In short, we’ve found soyfoods in the current forms lack features familiar to most Americans... We generally find tofu is the most commonly recognized form of soy.” Most die-hard soy resisters love tofu in desserts—such as Tofu Chocolate Mousse Pie and Cranberry Tofu Dessert (see *The Soy Connection*, Volume 3, Issue 1). “Many patients are pleasantly surprised with the convenience and taste of tofu lasagna, tofu tortellini and tofu burger casserole mix for chili or meatloaf.” Address: M.S., R.D., nutritionist with Washington Univ. School of Medicine, Lipid Research Center, St. Louis, Missouri.

2835. **Product Name:** Snap Action Vegetable Jerky. Renamed Spice of Life Meatless Jerky in Oct. 1995.

**Manufacturer’s Name:** Spice of Life Meatless Meats.

**Manufacturer’s Address:** Van Nuys, California. Phone: 818-342-6573.

**Date of Introduction:** 1995 August.

**Ingredients:** Heartline Meatless Meats, spices and seasonings.

**How Stored:** Shelf stable.

**New Product—Documentation:** Talk with Pam Montanaro of Soy Cubano! (Global Exchange) in San Francisco. 1995. Nov. 1. Spice Williams Crosby has just introduced a meatless jerky and a line of meatless meats. She is feeding abused children and homeless people in the Los Angeles area.

Talk with Jackie Padgette. 1995. Nov. 1. She is Spice’s twin sister. The jerky is ready to eat, and has a sort of a Cajun flavor. Kids love it.

2836. **Product Name:** Spice of Life Meatless Meats [Beef, Ground Beef, Mexican Beef, Teriyaki Beef, Chicken, Chicken Mince, Italian Sausage, Pepperoni, Smoked Ham, Unflavored, Unflavored Mince].

**Manufacturer's Name:** Spice of Life Meatless Meats.

**Manufacturer's Address:** Van Nuys, California. Phone: 818-342-6573.

**Date of Introduction:** 1995 August.

**Ingredients:** Heartline Meatless Meats, spices and seasonings.

**Wt/Vol., Packaging, Price:** 8 oz., 5 lb, and 25 lb packs; retail for \$2.99, \$15.95, and \$79.95 (11/95, California).

**How Stored:** Shelf stable.

**New Product–Documentation:** Talk with Pam Montanaro of Soy Cubano! (Global Exchange) in San Francisco. 1995. Nov. 1. Spice Williams Crosby has just introduced a meatless jerky and a line of meatless meats.

Talk with Jackie Padgett. 1995. Nov. 1. She is Spice's twin sister. This is a small family-owned company. These are dry products that must be reconstituted by boiling in water for a few minutes. They have a shelf life of one year. Bragg's amino acids are used for the flavoring. She is feeding abused children and homeless people in the Los Angeles area. The products have been in restaurants and health food stores for the last few months. They are sold at only 4-5 health food stores. Spice is an actress and stuntwoman, and has been a vegan for many years. She has a monthly column in Ms. Fitness, where she writes on veganism etc. She feeds about 1,000 homeless people each year at very little cost using her products in meatless meals. She got involved in this years ago when she was a musician. She decided to turn her life around, so she started. She had been registered nurse (who cared for elderly people when she was younger) and medical transcriber. She found that one of the best ways to do good things for your mind is to treat your body right. So she went gung ho in her research, and became a vegan. She uses a lot of soy products, and has been a real pioneer in this area for 15-17 years. She has written a booklet titled "Sixty reasons why The Spice of Life will improve your life, your world, and your workout." She mentions the environment, personal health, ethics, spirituality, history and recent epidemiology. She also has lots references.

Spice of Life Total Fitness Catalog. 1995. Nov. 4 panels. Lists prices for the many flavors in retail packs and institutional packs. Send orders to Lumen Foods, 409 Scott Street, Lake Charles, Louisiana 70601.

Talk with Greg Caton, president of Lumen Foods. He uses a slightly different formula when making these products for Spice of Life. In place of soy sauce he uses Bragg's Aminos, which is HVP supplied by A.E. Staley Mfg. Co. in Decatur, Illinois.

2837. **Product Name:** Naturally Tofu Drinks, Tempeh Burger, Vegetarian Chili, Meatless Healthy Bologna, Vegetarian Sloppy Joe.

**Manufacturer's Name:** Wellwide International Ltd. (Importer).

**Manufacturer's Address:** Room 2905 Wah Yin House,

Wah Kwai Estate, Hong Kong. Phone: 852/2549-1173.

**Date of Introduction:** 1995 August.

**New Product–Documentation:** Listing in '95-96 Soya Bluebook, p. 100. The company is an importer. Contact Della Leung, Director.

2838. Archer Daniels Midland Co. 1995. Annual report. P.O. Box 1470, Decatur, IL 62525. 42 p. Sept.

• **Summary:** Net sales and other operating income for 1995 (year ended June 30) were \$12,671 million, up 11.4% from 1994. Net earnings for 1995 were \$795.9 million, up 64.4% from 1994. Shareholders' equity (net worth) is \$5,854 million, up 16% from 1994. Net earnings per common share: \$1.47, up 65.2% from 1994. Number of shareholders: 34,385.

On the cover is an American flag and a photo of President John F. Kennedy with the famous quotation from his 1961 inaugural address, "Ask not what your country can do for you—ask what you can do for your country." ADM contributed \$6.5 billion last year to America's balance of trade.

On page 3 are graphs showing rising global consumption of soybean meal and vegetable oils from 1964 to 2004, and lysine from 1975 to 2004. For lysine, the equivalent of ten more ADMs will be needed in the next 10 years, for vegetable oil 5 more ADMs, and for soybean meal one more ADM.

On pages 4-5 is a speech delivered by President Eisenhower in 1953 urging the USA to export more food and fewer weapons. Ike's program [Public Law 480 or Food for Peace] resulted in \$50 billion in exports to needy countries from 1954 to 1994.

"While the whole of ADM's business can be divided into families of products and services, virtually all can be summarized in a single thought: value-added." ADM makes peanut oil at a mill in Augusta, Georgia. "Soybean oil: Our Europort facility in the Netherlands remains the world's busiest soybean processor, while in the United Kingdom plans are underway to install a new state-of-the-art vegetable oil refinery and packaging plant at Erith [on the River Thames about 13 miles east of the center of London]. Crushing and refining operations are also being modernized in Hamburg, Germany. These terminals give us access to the three most important rivers in Europe—the Rhine, Elbe and Danube—all the way to the Black Sea" (p. 7).

ADM makes vitamin E from soybean oil distillate. With the completion of a new state-of-the art facility in Decatur, Illinois, ADM has begun to make distilled monoglycerides from soybeans (p. 9).

"BioProducts: ADM BioProducts traditionally introduces at least one new fermentation product each year: in the past year the newcomer was xanthan gum for both food and industrial applications. In 1996 ADM BioProducts expects to add ascorbic acid (vitamin C), astaxanthin and

biotin to a lineup that includes monosodium glutamate, sorbitol, citric and lactic acids and their salts. ADM's vitamin C will be produced in a brand-new world-class facility in Decatur. Other products planned for the near future include penicillin, vitamin B-12 and beta-carotene.

"Amino acids for the feed industry remain a major focus of ADM BioProducts. Units to produce threonine and tryptophan are now in full production. This, along with our interest in a methionine plant, makes ADM the only company offering all four leading amino acids: lysine, methionine, tryptophan and threonine" (p. 13).

Isolated soy protein: Construction of increased isolate capacity has begun at Europort (Netherlands) and in the USA. "Low nitrite ProFam 781 was successfully introduced into the European infant formula market during the past year. The Pacific Rim and former Soviet Union are growing markets for isolates." Harvest Burgers: "Since the beginning of our joint venture with Pillsbury 46 million Harvest Burgers have been sold under the Green Giant label... In Europe Harvest Burger products are now being carried by a German supermarket chain with over 2,300 stores. Another German firm is introducing a line of Harvest Burger frozen entrees that will eventually be marketed in seven EC countries" (p. 15).

"Other soy-based foods: Work is underway on a soy-based dry mix that is the nutritional equivalent of milk. This product would be distributed at little expense wherever starvation exists or powdered milk is too expensive. The product has a shelf life of over a year, requires no refrigeration and is made by adding water.

"A similar product is being developed as a milk alternative for North America. This flavored cholesterol-free product would be carried in the refrigerated dairy section of supermarkets and would appeal to the lactose-intolerant (31% of Americans) and other health-conscious consumers. A frozen dessert version of this product is also being developed. In the United Kingdom Haldane Foods offers the soy-based Vege Mince, Vege Bites, Vege Steaks, yogurt and 'pot noodles'" (p. 15). A full-page color photo (p. 14) shows rich soymilk being poured onto a bowl of cereal and fruits.

"Cogeneration is an efficient low-cost source of energy and steam and is the source of power for our seven largest plants in the U.S., the U.K., Ireland, Germany, and the Netherlands. Our cogeneration system is decades ahead of most U.S. technology, and offers substantial savings over traditional power sources. The key is ADM's fluidized bed technology which enables the cogeneration plants to run on an unusual mixture of high-sulfur coal, discarded tires and limestone" (p. 21).

"Note 11—Antitrust investigation and related litigation: The Company, along with a number of other domestic and foreign companies, is the subject of a grand jury investigation into possible related crimes in the food additives industry. The investigation is directed towards

possible price-fixing with respect to lysine, citric acid and high fructose corn syrup. Neither the Company nor any director, officer or employee has been charged in connection with the investigation."

Stephen Yu, managing director of ADM Asia Pacific, Ltd. is unrelated to the Stephen Yu who was a tofu pioneer and founder of Victor Food Products, Ltd. (of Toronto, Ontario, once Canada's largest tofu manufacturer). Address: Decatur, Illinois.

2839. *Bluebook Update (Bar Harbor, Maine)*. 1995. Bright future forecast for soyfoods: SAA study profiles shopper, provides demographics. 2(3):1, 4. July/Sept. [1 ref]

• **Summary:** The first truly in-depth analysis of the U.S. soyfoods consumer has been recently published, commissioned by the Soyfoods Association of America. The 125-page report, replete with tables and graphs, shows that nearly 15 million Americans are presently eating tofu, and 10 million are consuming soy burgers. The study details the uses of soyfoods, provides consumer demographics, and analyzes shopping patterns. Even among non-consumers of soyfoods, awareness is high. The majority of Americans have heard of at least one type of soyfood. The best known is tofu, available at nearly every supermarket in America, and recognized by 75% of those polled. Some 55% are familiar with soymilk and more than 50% have heard of soy burgers. Approximately 80% of soyfoods consumers say that they will continue to eat the same amount or more in the future—which looks bright.

2840. **Product Name:** [Breaded Tofu Cutlets (With Garden Herbs, Goat Cheese and Nuts, Salmon and Dill)].

**Foreign Name:** SOY CroustiSoy (aux Herbes Potagères, Fromage de Chèvre et Noix, au Saumon et à l'Aneth).

**Manufacturer's Name:** Nutrition & Santé S.A. (Formerly SOY / Société Soy).

**Manufacturer's Address:** B.P. 33, Z.I. de la Pomme, 31250 Revel (near Toulouse), France. Phone: +33 62 18 72 50.

**Date of Introduction:** 1995 September.

**Ingredients:** Garden Herbs: Fresh tofu\* 73.5% (water, soybeans), palm oil\*, grated bread crumbs\*, tapioca, spinach greens\*, pot herbs\* 1.5% (parsley\*, chives\*, tarragon\*), unrefined sea salt, safflower oil\*, natural aromas, garlic\*, pepper\*, lemon concentrate. \* = Organically grown products 89.8%. Certified by Ecocert 31 076 Toulouse Cedex.

**Wt/Vol., Packaging, Price:** 200 gm paperboard box, 2 cutlets per pack.

**How Stored:** Refrigerated, store at 4°C.

**Nutrition:** Per 100 gm: Calories 213 (885 kJ), protein 10.4 gm, carbohydrate 7.8 gm, lipids/fats 15.6 gm.

**New Product—Documentation:** Letter from Bernard Storup with 3 Labels. 1995. Sept. 8. This new product is just being introduced now. Paperboard box. 4 by 6 by 1.5 inches.

Garden Herbs: Yellow, dark green, brown, white, and black

or light green. Color photo of a cutlet on greens on a white plate, and a piece of it on a fork. On the front panel are the Soy logo (white on dark green), and the Nature & Progress organic certification symbol. On two sides are two different "Recycle" symbols/roundels.

2841. Parr, Jan. 1995. Under the (veg) influence. *Vegetarian Times*. Sept. p. 22.

• **Summary:** Several national restaurant and food-service chains are adding veggie burgers, sometimes even complete vegan meals, to their menus. Some 500 Subway sandwich shops nationwide are serving Wholesome and Hearty's Gardenburger Subs; other outlets are serving or testing the Morningstar Farms' Vegimax burger Denny's restaurant chain is testing two Morningstar Farms Garden Veggie Patties in two markets. Note: Morningstar Farms' products are made by Worthington Foods.

What is driving the trend? Consumer demand, aggressive marketing by the meatless burger companies, and convenient product packaging.

2842. Pillsbury Company. 1995. Great summer grilling! Like any guy, he occasionally craves a burger (Ad). *Vegetarian Times*. Sept. p. 20-21.

• **Summary:** This ad appears on two facing pages. On the left side of the left page is a tall one-third page ad titled "Great summer grilling!" A color photo shows a package of Green Giant Harvest Burgers, with a recipe for Primavera Picnic Patties, using 4 Harvest Burgers. The full right pages is devoted to the ad (which first appeared in this magazine in Jan. 1995) titled "Like any guy, he occasionally craves a burger."

2843. **Product Name:** NewMenu VegiBurger.  
**Manufacturer's Name:** Vitasoy (U.S.A.) Inc. (Marketer-Distributor). Made in South San Francisco by Azumaya.  
**Manufacturer's Address:** P.O. Box 552, Brisbane, California 94005. Phone: 1-800-848-2769.

**Date of Introduction:** 1995 September.

**Ingredients:** Water, textured soy protein concentrate, tapioca starch, natural flavors (from vegetable sources), soy sauce, dehydrated onions, isolated soy protein, tofu powder (soybeans, magnesium chloride), guar gum (a vegetable gum).

**Wt/Vol., Packaging, Price:** 6 oz (170 gm).

**How Stored:** Refrigerated.

**New Product-Documentation:** Ad (½ page color) in *Natural Foods Merchandiser*. 1995. Sept. p. 127. "Our fast food has great taste and wholesome nutrition." Large color photos show each product with Label.

Talk with Vitasoy. 1995. Sept. 6. These products are just now starting to appear in stores. They are made by Azumaya in South San Francisco.

Leaflet sent by Vitasoy. 1995. Sept. 8. Lists the

ingredients and nutritional composition of the VegiBurger and VegiDogs.

2844. **Product Name:** NewMenu VegiDogs.  
**Manufacturer's Name:** Vitasoy (U.S.A.) Inc. (Marketer-Distributor). Made in South San Francisco by Azumaya.

**Manufacturer's Address:** P.O. Box 552, Brisbane, California 94005. Phone: 1-800-848-2769.

**Date of Introduction:** 1995 September.

**Ingredients:** Water, isolated soy protein, wheat gluten, natural flavors (from vegetable sources), salt, brown rice syrup solids, spice extracts, paprika oleoresin, carrageenan, guar gum (a vegetable gum).

**Wt/Vol., Packaging, Price:** 8 VegiDogs in a 12 oz pack.

**How Stored:** Refrigerated.

**Nutrition:** Per 1.5 oz (1 link): Calories 45, calories from fat 0, total fat 0 gm (0% daily value; saturated fat 0 gm), cholesterol 0 mg, sodium 170 mg, total carbohydrate 1 gm (dietary fiber 0 gm, sugars 0 gm), protein 9 gm.

**New Product-Documentation:** Ad (8½ by 11 inch, page color) in *Natural Foods Merchandiser*. 1995. Sept. p. 127.

• **Summary:** This is a full-page color ad for Morningstar Farms Veggie Burgers. This ad also appeared in the Nov. 1995 issue (p. 3), in the June 1996 issue (rear cover) and in the May 1998 issue (p. 5) of this magazine.

2848. Albertson, Ellen. 1995. Super soy: The newest miracle food. *Self*. Oct. p. 148-151, 204. [1 ref]

• **Summary:** The subtitle continues: "Okay. One more time. Scientists are telling us they've found the nutritional Holy Grail, a simple food that prevents heart disease and cancer. Do we believe them? Yes!"

"Soy may be so effective that it actually crosses the line from nutritional to medicinal."

This article begins with a summary of the meta-analysis by Dr. James Anderson published in the *New England Journal of Medicine* (3 Aug. 1995). It reported soy in the diet can significantly lower high cholesterol." It also notes that: (1) "Genistein, a powerful natural chemical unique to soy," may stop the growth of cancer cells. (2) The natural estrogens in soybeans may "help alleviate postmenopausal symptoms." In Japan, where soy is typically eaten daily, there is no word for "hot flashes."

Photos and definitions of various soyfood products are given: Tempeh, soy flour, tofu, textured vegetable protein, soy milk. A section titled "15 delicious ways to add soy to your diet," gives serving suggestions for these and other soyfoods at breakfast, lunch, snack, and dinner.

1995 CHRISTMAS

# Tofurky™

with Drumettes and Gravy  
A Delicious Vegetarian Holiday Feast!

**WHAT IS TOFURKY?** Tofurky is a pre-baked vegetarian roast. It consists of three parts: stuffed tofu roast, tempeh drumettes and mouth watering golden gravy. Each Tofurky is 100% vegan, easy to serve and is the perfect main course for any holiday gathering.

**HOW DO WE MAKE IT?** We season tofu, fill it with a hearty stuffing of cranberries, walnuts and seasoned organic bread cubes. Tofurky is then hand sculpted, basted with a ginger-tamari sauce and pre-baked to a golden brown perfection.

**HOW ABOUT THE TEMPEH DRUMETTES?** Included in your Tofurky are eight Drumettes, a dark filet made of grated organic tempeh, tvp (textured vegetable protein), wild rice, cranberries and carrots, seasoned and carved into yummy shaped drumsticks.

**IS THERE MORE?** To top it off, we've included a Golden Mushroom Gravy packet. This meatless gravy is the perfect rich, full flavored Tofurky topping.

**HOW MANY DOES IT SERVE?** Tofurkys include 1 three pound stuffed tofu roast, 8 tempeh drumettes and 16 ounces of golden gravy. Tofurky heats up in less than an hour and will easily feed 8 hungry adults.

**IS TOFURKY HEALTHY?** Not only is our Tofurky delicious, it's also good for you! Filled with organic ingredients, dairy free, high in protein, zero cholesterol, nutritious and kids love it, too.

**WHO MAKES TOFURKY?** Tofurky is a joint effort between two natural foods manufacturers from the Pacific Northwest — The Higher Taste of Portland and Turtle Island Foods of Hood River, Oregon.

**WHERE CAN I BUY IT?** Tofurky is available by special order through your local natural foods store or call the numbers below.

THANKS GIVING 1995

# Tofurky™

*The Delicious, Vegetarian Holiday Alternative*

Searching for a hearty and satisfying vegetarian centerpiece for your holiday feast? Look no further — **Tofurky** is here! This original and delicious creation of Hans and Rhonda Wrobel of The Higher Taste has developed an enthusiastic and loyal group of fans throughout the Portland metropolitan area. Now for the first time, we are offering this product to a regional audience on a limited basis for all those seeking a healthy, meatless meal for the holidays.

**Tofurkys** consist of seasoned organic tofu filled with a hearty stuffing of cranberries, walnuts and herbed organic bread crumbs. Each **Tofurky** is honey basted and prebaked to a golden brown perfection. The tender, baked tofu can be sliced easily into attractive, pie shaped wedges. In addition, each **Tofurky** comes with 4-3 ounce "Drumettes" made by Turtle Island Foods of Hood River, Oregon. These dark fillets are made from grated organic tempeh, tvp, wild rice, carrots and seasonings carved into a drumstick shape! Covered with our own Chanterelle-Nutritional Yeast Gravy (recipe included in every box), this gourmet creation will give your vegetarian guests the satisfying meal they deserve.

Best of all, because **Tofurkys** are prebaked, they are ready to serve in less than an hour's prep time. So this holiday season spend the day with your family and friends and then celebrate the earth's abundance with this fabulous, cholesterol free feast. Make this your easiest and tastiest holiday ever!

***Tofurky is available on a special order basis from this store. Ask store personnel for an order form today!***

Talk with Seth Tibbott, founder and owner of Turtle Island Foods. 1996. Nov. 1. See interview titled "History of Tofurky." Talk with (call from) Seth. 1996. Nov. 5. Tofurky will appear on the Today Show on Nov. 12 (Tuesday morning TV).

Leaflet #1 or "rack card" (3 5/8 by 8½, color) titled "Tofurky: A delicious vegetarian holiday feast." Tells all about the product in a question and answer format. Leaflet #2 (8½ by 11 inches), printed black on gray, titled "Tofurky! The meatless stuffed tofu roast." "Tofurky! consists of 3 pounds of basted and baked organic tofu in a 9-inch pie pan filled with a herbed, whole wheat bread crumb" stuffing. "The tender tofu slices can be cut into 8 generous servings."

Press release. 1996. Oct. 20. "Will that be turkey or Tofurky?"

Box with Label sent by Seth Tibbott. 1996. Nov. 6. The outer box is 13¼ by 10½ by 3¼ inches. Printed red on cardboard color. New weight: 5 lb 15 oz. "The original Tofurky: A delicious vegetarian feast. 100% vegan. Cooks in minutes. Serves 8. Keep frozen or refrigerated. 1% of all sales from this product to Farm Sanctuary Adopt a Turkey Program." The inner box is white. The label is printed black on white. Net weight: 2 lbs. 12 oz. On the label are printed two logos and addresses, and a UPC. The Higher Taste, 2402 SE Belmont Ave., Portland, Oregon 97214. Turtle Island Foods, Inc., PO Box 176, Hood River, Oregon 97031. Vegetarian Journal. 1996. Nov/Dec. p. 8. "Tofurky."

Dinner with Bob & Pattie Gerner to test and give feedback on Tofurky 97. 1997. May 10. A delicious sliceable roast, made mostly of gluten and tofu, may replace the former marinated baked tofu. The roast ingredients are: Water, vital wheat gluten, organic tofu, natural vegetarian seasoning, wild rice blend, shoyu soy sauce, fresh onions, granulated garlic, tomato sauce, molasses, sea salt.

Talk with Seth in early 1997. He sold 800 Tofurky in 1995 and 4,000 in 1996.

2853. Voisin, Jean-Luc. 1995. Dairy like soyfoods in Africa: Evolution & perspectives. Paper presented at the Third Bi-Annual SoyAfrica Conference. 5 p. Held 3-5 Oct. 1995 at Johannesburg, South Africa. Organized by Aproma.

• **Summary:** Contents: Foreword. The existing plants. Dairylike foods in Africa—The weak points: The soyfood itself, and the size of the project. The best "compromise": The end products, the size of the plant and investment. Feasibility of a soy yoghurt plant—an example. Conclusion.

During the last 20 years the author has spent most of his time in the study and establishment of more than 30 food processing plants for the private sector throughout Africa (mainly for the milk, fruit, and soya industries) from the smallest (US\$100,000 investment) up to the biggest (more than US\$15 million) on behalf of small European companies

and multinationals. In 1987, while visiting dairy plants in Nigeria, he noticed that all but one had been forced to stop operations because of lack of powdered milk—whose price had quadrupled from \$0.50/kg to \$2.00/kg within a very short time. Today the price is about \$3.00/kg.

At this time he realized that powdered soymilk could be used in place of powdered cow's milk, so he worked with a French company to design and manufacture a soya milk processing machine (named Agrolactor) which made 250 liters/hour of soymilk. They tried to promote this machine in Africa. The first one used commercially was installed in Nigeria in 1990; since then they have installed 7 other plants throughout Africa. The demand for soya processing is steadily increasing, however during the past 5 years these projects have faced many difficulties.

The seven existing plants (with the company name in parentheses) are: (1) 1989—Congo (Agricongo). This was the first project to use the Agrolactor. Agricongo used the machine for research and development. They sold it this year (1995) to a dairy plant in Brazzaville for soy yogurt production. (2) 1990—Lagos, Nigeria (Uncle Soyo): A private Indian investor. After 3 extensions and an aggressive marketing policy, this company was selling more than 300,000 units per day of soydrinks (pouches), soy yogurt, and ice cream. After very good results and profitability, the plant has now been moved to India. (3) 1992—Ivory Coast (Cebon): This plant had planned to process pineapple juice and soy drinks, but in the end only pineapple juice was commercially successful. (4) 1993—Burundi (Vispe): This Italian NGO is still working in Bujumbura, producing soy milk and baked goods. (5) 1994—Cape Verde (*República de Cabo Verde*) (Benali): A private company is producing soydrinks and fruit juices (from imported concentrate); today 80% is from fruit. Note: This is the earliest document seen (Aug. 2009) concerning soybeans in Cape Verde. This document contains the earliest date seen for soybeans in Cape Verde (1994) (one of two documents). The source of these soybeans was France (See Duchatel 1997). Even earlier, sometime between Sept. 1946 and 30 June 1960, the Cape Verde Islands received 1 shipment of 2,007 lb of Multi-Purpose Food.

(6) 1995—Cairo, Egypt (Sesco): This private company, in a joint venture with Actimonde, is manufacturing soy yogurt. After 3 months of production the break-even point has already been reached (50% of normal capacity, i.e. 20,000 cups/day). (7) 1995—Nigeria: A second plant in Suleja (50 km from Abuja) was installed for a parastatal company; the soydrinks are expected to be launched this month.

The end products: European soyfoods companies are now very creative in research & development. During the last 2-3 years many new products, with better taste and packaging, have been introduced to European food stores, including supermarkets. The author estimates that the sales of the 7 French, Belgian, and Swiss soyfoods companies

he knows have increased by approximately 30% every year since 1990! Four groups of products have been the most successful in Europe: 1. Soymilk, packaged in aseptic long-life cartons and sometimes mixed with flavors or fruit juice. 2. The dessert products—soy yogurt (Soyourt) and ice cream. 3. Tofu burger. 4. The dried products—biscuits and energy bars. For the African market, consumer taste tests conducted in 12 countries show that the most acceptable product is soy yogurt, which is very close to the traditional sour milk consumed by many African people. Dried products (energy bars) are also well accepted, and they are easily distributed and stored. Soymilk (whether flavored or plain) is not appreciated and tofu is too sophisticated at present.

In Africa, up until now, all of the soyfoods projects known by the author, have been developed on a relatively small scale with an investment of less than \$1 million. Because this size plant involves too many problems, it is now believed that a plant with an investment of approximately \$2 million represents the best compromise between production capacity, the market possibilities, profitability, and management capability. An example of the cost breakdown for a soy yogurt plant on this scale is given.

**Conclusion:** There is no doubt today that dairylike soyfoods are becoming one of the most interesting solutions to nutritional problems facing the growing populations of Africa. In order to realize this potential, the food industry must develop technologies and end products suites to the purchasing power and tastes of African consumers. Those products must be followed up by a strong marketing program. For the success of such medium- and small-scale commercial ventures, it is important that linkages be established between the private investors, NGO's, and International Organizations. Address: Food Engineer, Managing Director, Actimonde, International Business Park, Batiment Athena, 74160 Archamps, France. Phone: +33 50.31 56.40.

**2854. Product Name:** Meat of Wheat [Beyond Chicken Patties, Beyond Turkey, or Beyond Roast Beef].

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 1990 N. 57th Ct., Boulder, CO 80301. Phone: 303-443-3470.

**Date of Introduction:** 1995 October.

**How Stored:** Frozen.

**New Product—Documentation:** Spot in *Vegetarian Journal*. 1995. Sept/Oct. p. 10. "Meat of Wheat." These three new vegetarian protein products are all fat free, frozen, and ready to use. They contain no animal products or cholesterol.

2855. Worthington Foods, Inc. 1995. Finally, a low-fat breakfast worth getting up for (Ad). *Vegetarian Times*. Oct. p. 3.

• **Summary:** See next page. This full-page, color ad is for Morningstar Farms Scramblers and Breakfast Links. A large

photo shows the links with an omelet and hash browns on a white plate. The name of the company (Worthington) does not appear in the ad.

This ad also appeared in the Dec. 1995 issue (p. 3) and the Nov. 1996 issue (p. 3) of this magazine. Address: Worthington, Ohio 43085.

2856. Worthington Foods, Inc. 1995. Third quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. 22 x 9 cm.

• **Summary:** Net sales are up 10.9% for the first 9 months of 1993 compared with the same period one year ago. Third quarter sales are up 14.6%. Even better, net income (profits) for the first 9 months of 1995 are up 68.6%, and for the third quarter are up 63.0%. Sales of Morningstar Farms meat alternatives are up 23.9% for the year to date. The market share of Morningstar Farms meat alternatives sold through retail supermarkets has remained constant for the past 9 months at approximately 50%. Better'n Burgers are now available in approximately 66% of all retail supermarkets. "In terms of unit sales per point of distribution, Better'n Burgers continue to out-pace our other meal alternative products."

Foodservice sales were up 31.9% for the first 9 months of 1995 when compared to 1994. "Sales for the third quarter of 1995 were up over 43.2% as a result of increased authorization from restaurants, correctional facilities, and other foodservice operations." Address: Worthington, Ohio. Phone: (614) 885-9511.

2857. Williams-Crosby, Spice. 1995. Work with veganism and textured soy protein products (Interview). *SoyaScan Notes*. Nov. 1. Conducted by William Shurtleff of Soyfoods Center. [1 ref]

• **Summary:** Age 43, Spice was born on a ranch in North Hollywood. Her father was a physician, so she grew up in a medical family and has a background in medicine. She was a musician and is now a stuntwoman who can pick up men weighing 300 pounds. But 17 years ago she overdosed on drugs, so she decided to make major changes in her life, starting with her diet. She got interested in Shelton's food combining and became a vegan.

In Southern California is a home and shelter named Penny Lane for neglected and abandoned kids. Once each year she puts on a show there, funded by the state. She feeds a delicious vegan meal to 500 people; the main course is a soy entree made by Greg Caton—a variation of his Heartline meats containing no wheat low in sodium. She has been doing this show for the last 9 years; the meal has been vegetarian since the beginning and vegan for the last 7 years since Greg started. In addition, once a year she feeds 1,000 homeless people in Los Angeles, with a meal featuring meatless Cooked Italian Sausage—which costs only \$115 total.

*Finally, a low-fat breakfast  
worth getting up for.*

You didn't think a low-fat, cholesterol-free breakfast like this would ever see the light of day. So start your day off right with Morningstar Farms® fat-free Scramblers®. And our Breakfast Links, Patties or Strips that are free of meat and animal fat. Just heat and serve. Remember, when you help yourself to Morningstar Farms, you really are helping yourself. Look for them in your grocer's frozen breakfast section.

*The change will do you good.™*

She is best known for her role in Star Trek IV; she attends conferences where people know her as the only vegan Klingon in the universe. Spice is married to Gregory Crosby, a film writer/producer, who is the eldest grandson of singer/actor Bing Crosby. They were blessed with their first child, Luke Gregory Crosby, born on 1 Feb. 1995. In August 1995 she introduced her first commercial soy product, a textured soy protein, initially named Snap Action, but now named Spice of Life Meatless Jerky. It is delicious in tacos, enchiladas, and meatless chili. Address: The Spice Co., 15445 Ventura Blvd., #115, Sherman Oaks, California 91403. Phone: 818-909-0052.

2858. Buskirk, Audrey Van. 1995. A different drumstick. *Willamette Week (Oregon)*. Nov. 10.

• **Summary:** “Only in Oregon... Two Oregon vegetarian outlets joined forces to produce Tofurky. The ‘bird,’ created by The Higher Taste, a Portland vegetarian caterer, is made with seasoned organic tofu, filled with a stuffing of cranberries, walnuts and bread crumbs, basted with a honey, ginger and tamari sauce and baked until golden. It comes with four ‘dark meat drumettes’ made by Hood River’s Turtle Island Foods, a soy foods manufacturer, with grated organic tempeh, wild rice and carrots shaped into drumsticks. Think this sounds great? Awful? Taste it for yourself this Saturday, Nov. 11, between 11 and 4 pm, at Food Front, 2375 NW Thurman St.”

A large cartoon shows a mother serving a turkey on a platter to her husband and son, seated—with knives and forks upraised—at the table.

2859. Timberman, Polly. 1995. Soy be it! Tofurky provides a holiday feast for vegetarians. So what if its flat? There’s a stuffed creation just waiting for vegetarians to add the gravy and cranberry sauce. *Hood River News (Oregon)*. Nov. 15. IIA. Kaleidoscope section.

• **Summary:** Tofurky is a joint venture between Portland’s The Higher Taste (a vegetarian sandwich maker and caterer) and Hood River’s Turtle Island Foods (a soy-foods manufacturer whose primary product is tempeh). Formerly located in Husum, Washington, Turtle Island later moved to the Graf building in Hood River’s Diamond complex.

Vegetarians now have a centerpiece for their Thanksgiving dinner. “Looking for a way to make this happen, [Seth Tibbott, president of] Turtle Island, scouted its customers. The company found that Hans and Rhonda Wrobel of The Higher Taste had developed a product, Tofurky, that had been marketed in Portland to a growing band of followers for the past two years. Turtle Island added its own touch, several tempeh drumettes, and is marketing the Tofurky package to stores. Two sizes are available.” “Six thousand drumettes were formed in Portland last week for inclusion in Tofurky packages. Directions are included for a mushroom gravy that Tibbott says pulls the whole thing

together.”

A sidebar titled “Why vegetarian?” discusses the ethical, world hunger, nutritional, and other reasons people choose this diet. Note: This is the earliest article seen that mentions Tofurky.

2860. Twomley, Dale E. 1995. Re: Stock split and growing acceptance of Worthington’s meat alternatives. Letter to shareholders, Nov. 28. 1 p. Typed, with signature.

• **Summary:** On Nov. 27, 1995, the Board of Directors declared a five-for-four stock split on common shares of Worthington Foods, Inc. The board has also declared a dividend of 3 cents per share.

“On November 6, 1995, the Company announced that several restaurant chains had begun serving some of our Morningstar Farms’ Veggie Burgers. Denny’s is now serving our low-fat Garden Vege Patties in all 1,500 restaurants nationwide. Chilli’s, with over 400 restaurants, has just introduced Morningstar Farms’ Spicy Black Bean Burger under the menu title of ‘Bandito’s Vegetarian Bean Burger.’

“Additionally, the recent approval from International House of Pancakes, Marie Callender’s, and hundreds of Subways (VegiMax) of Morningstar Farms Garden Vege Patties in various forms makes it clear that meatless products are quickly becoming a regular part of menus in restaurants throughout the nation. More and more restaurants are turning to the Morningstar Farms brand of Worthington Foods, the world’s largest producer of meat alternative products and marketer of ‘America’s Original Veggie Burgers.’” Address: President and CEO, Worthington Foods, Inc., 900 Proprietors Rd., Worthington, Ohio 43085. Phone: (614) 885-9511.

2864. Kayte, Lillian. 1995. Thanksgiving’s new tradition: Finally—a satisfying meatless holiday with all the trimmings. *Vegetarian Times*. Nov. p. 41-48.

• **Summary:** The recipe for “Thanksgiving No-Turkey ‘Turkey’” (p. 45) calls for seitan and yuba.

A glossary includes definitions of seitan (“A chewy high-protein food made from boiled or baked wheat gluten”) and yuba (“The film that develops from heating soymilk. Available in dried form in Chinese and Japanese groceries”).

2865. *Soyfoods* (ASA, Europe). 1995. U.S. soyfoods sales approach \$1.4 billion. 6(3):2. Autumn.

• **Summary:** Sales of soyfoods in the USA have increased more than 350% in the past decade, with more than 2,000 new soyfood products introduced, according to a report commissioned by the Soyfoods Association of America. Sales for 1995 are expected to be \$1.4 billion. The report found that nearly 15 million Americans are currently eating tofu, and 10 million are consuming soy burgers. Most people who buy soyfoods also consume poultry and fish.

2866. *University of California, Berkeley Wellness Letter*. 1995. Oy, soy: here comes the hype. 12(2):1-2. Nov.

• **Summary:** This is an excellent critique of the article by Dr. James Anderson on the ability of soy protein to lower blood cholesterol, published in the *New England Journal of Medicine* (3 Aug. 1995, p. 276-82). Some recent news reports would make you think that soy was a “magic bullet.” However there is a danger it may go the way of oat bran. “Remember oat bran? The rise and fall of oat bran was a textbook case in how *not* to think about nutrition.” Interestingly Dr. Anderson, an expert on fiber, was a leading proponent of oat bran in the 1980s and the author of a similar meta-analysis on oats.

In short, the Anderson study “found that substituting soy protein (in a wide variety of forms) for some or all animal protein resulted in an average drop of 9% in total blood cholesterol, and a 13% drop in LDL (“bad”) cholesterol. There was no significant effect on HDL (“good”) cholesterol, which is a plus, since HDL usually fall when the total number drops.” But there were some serious problems in the study: (1) Anderson’s analysis raises more questions than it answers. This is not new research, but rather a meta-analysis of previous studies on soy protein. The meta-analysis can be a powerful tool, however this one is flawed. The main problem is that the focus supposedly is *soy protein*, yet the 38 studies analyzed actually used a wide range of compounds: various kinds of isolated soy protein and textured soy protein. Some of the soy compounds were 95% protein, some much less. Some diets contained everything in the soybean, including fiber and certain potent phytochemicals, such as isoflavones.

“In other words, we still don’t know if soy protein itself lowers cholesterol, as claimed.” Part of the effect may be due to the soluble fiber, which is well known to lower blood cholesterol and is found in many plant foods besides soybeans. “What’s needed is a study that feeds highly purified soy protein (just the amino acids) to humans—and it hasn’t been done. Such a study, using rats, found that the isolated soy protein did *not* significantly lower cholesterol, compared to animal protein. In light of this, don’t be surprised if next week the headlines read ‘Soy protein does *not* lower cholesterol after all.’”

(2) Not everyone would benefit, even if soy protein does prove effective. Most of the reported drop in cholesterol (and LDL) occurred in people with very high levels (over 335 mg/dl), which dropped by 20% on the soy-based diet.

(3) A person would have to eat a lot of soy protein. The above results were obtained when people ate an average of 47 grams of soy protein a day. Eating only 25 gm a day cut the drop in half. One cup of soymilk has 4 to 10 gm of protein; 4 ounces of tofu has 8 to 13 gm; 3 ounces of soy burger contains 18 gm. So to get 47 gm of soy protein you would have to drink about 7 cups of soymilk or 1 pound of firm tofu.

(4) Adding soy to a poor diet won’t do the trick. In nearly all the studies, soy protein replaced half or even all of the animal protein, which is usually high in fat and dietary cholesterol.

(5) Not all soy products are equally effective in lowering blood cholesterol. In addition, some contain lots of fat (albeit unsaturated) and calories. Some foods claiming to contain soy actually contain little of it. “Even those that contain the same amount of soy protein often have very different levels of fiber and/or other phytochemicals, and may have very different effects on cholesterol.”

2867. *Vegetarian Journal* (Baltimore, Maryland). 1995.

Burger King offers tomato sandwich on white bread. 14(6):5. Nov/Dec. [3 ref]

• **Summary:** A reader wants to know more about the “Spicy Beanburger” that Burger King offers in England. The editor notes that Taco Bell offers many vegetarian/vegan options, and we should all support their efforts. Kimberly Miller of Burger King states that her company, which has more than 6,400 restaurants in the USA, did test a meatless burger, “The Griller” [made by Worthington Foods] in 38 restaurants for six months in Rochester, New York, in late 1993 and early 1994 to see if it would appeal to American customers. “Overall, consumer reaction to the product was mixed; it did well in some restaurants, poorly in others.”

2868. **Product Name:** Tofu Balls with Organic Spaghetti (Vegetarian).

**Manufacturer’s Name:** Gloria’s Kitchen.

**Manufacturer’s Address:** P.O. Box 2071, Burlingame, CA 94011-2071. Phone: 650-579-0638.

**Date of Introduction:** 1995 December.

**Ingredients:** Organic\* spaghetti noodles (organic\* semolina wheat flour, water), textured vegetable protein (soybean flour), tofu, bread crumbs, parsley, shiitake mushrooms, organic\* carrots, celery, onion, sea salt, expeller pressed canola oil, sauce (tomatoes, tomato puree, celery, organic\* carrots, filtered water, stewed tomatoes, extra virgin olive oil, garlic), natural herbs and spices.

**Wt/Vol., Packaging, Price:** 12 oz (340 gm) paperboard box. Retail for \$4.39 (1999/04, Lafayette, California).

**How Stored:** Frozen.

**New Product–Documentation:** Product with Label purchased at Open Sesame, Lafayette, California. 1999. April 20. 7.25 by 5.25 by 1.75 inch paperboard box. Red, white, black, green, and yellow. Large photo of the prepared product, showing the balls, tomato sauce, and spaghetti. Front panel text: “Vegetarian. Vegan. All natural. Low fat. Microwave or conventional oven.” Back panel: “The Gloria story—who’s cooking in the melting pot. As a vegetarian and ethnic food lover, I have always found it difficult to find quick, healthy nutritional entrees. It seemed like the only place I could find good vegetarian food was in restaurants...”

Talk with company representative. 1999. April 23.

Gloria Shih started this company in late 1995. During 1996 they introduced 14 products, and by 1997 they had 27 products, including 20 entrees and 7 soups. Soyfoods Center taste test: Fair. These meatlike balls contain very little tofu; perhaps they should be called “Soy Balls.”

2869. Oppenheimer & Co., Inc. 1995. Worthington Foods, Inc.: Restructured, refocused and ready for growth; Attractive small-cap dominates segment growth; 50% upside potential; Initiating coverage, added to special research series list. New York, NY. 10 p. Dec. 20.

• **Summary:** A very positive assessment of the financial

potential of Worthington Foods, America’s largest publicly traded natural foods manufacturer. Contents: Investment conclusion. Investment highlights: Divestiture [or refrigerated egg business] focuses operations on growth categories, new products, category growth and expanded distribution should drive top line, projecting 15% revenue growth and faster EPS [earnings per share] growth, discounted valuation provides 50% upside to our \$23 price target.

Company description: A leader in natural foods industry with distribution muscle, retaining frozen egg substitute segment for strategic reasons. Growth drivers: Category dominance in rapidly growing segment, benefiting from growth in natural foods industry, new products and expanded distribution, expect more new products in 1996, foodservice building an impressive base. Earnings drivers: Volume growth will be major contributor to earnings, bringing production in house from co-packers will benefit margins, margin expansion should propel earnings growth faster than sales, capacity expansion [at Zanesville facility] prepares for growth, price increase should offset rising commodity costs. Management: Stable management becoming increasingly market oriented. Financials: Earnings up sharply this year, expect continuing earnings strength in 4Q and 1996, strong balance sheet, board declares 5-for-4 stock split. Valuation: Worthington shares appear undervalued on several measures, target price of \$23 represents 50% upside. Risk factors. Our quarterly EPS estimates from 1994 to 1997. Price chart. Annual data. Balance sheet. Address: New York.

2870. **Product Name:** [Wheaty {Seitan Cold Cuts} (Sausage-like, Ham-like)].

**Foreign Name:** Wheaty.

**Manufacturer’s Name:** Topas GmbH (Product Developer-Marketer).

**Manufacturer’s Address:** Bollbergstr. 41, 72116 Öschingen [near Tuebingen], Germany. Phone: 07473/25515. Fax: 07473/8320.

**Date of Introduction:** 1995 December.

**Ingredients:** Incl. seitan.

**Wt/Vol., Packaging, Price:** Five slices of 20 gm each.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter (fax) from Klaus Gaiser, founder of Topas. 1996. Sept. 21. He describes this product, which he developed and which is his best-seller. It was launched in late 1995. It is manufactured by another company.

2871. **Product Name:** [Vegetini: Soy Protein Preparation for Vegetarian Patties].

**Foreign Name:** Vegetini: Préparation aux Protéines de Soja pour Galettes Végétales–Ligne “S”.

**Manufacturer’s Name:** Biosoja.

**Manufacturer’s Address:** 8, route de Merxheim, 68500

Issenheim, France.

**Date of Introduction:** 1995.

**Ingredients:** Soy proteins, dehydrated vegetables (potatoes, onions, carrots), wheat gluten, bread crumbs, barley flakes, wheat, oats, spices, soy fiber, pea fiber, vegetable oil, hydrolyzed vegetable protein, sea salt, garlic powder.

**Wt/Vol., Packaging, Price:** 200 gm.

**How Stored:** Shelf stable.

**New Product–Documentation:** Label sent by Heather Paine of Soyafoods in London. 1995. Aug. 8. 5 by 7 by 1.4 inches. Paperboard box. Use by 2 Dec. 1995. Green, white, and light brown on yellow and green. Color photo shows two fried patties (one cut in half, with half on a fork) surrounded by carrots, green peas, cherry tomatoes, and lettuce. A little sign inserted on a toothpick into one of the patties reads: “100% vegetarian (*végétal*). Rich in protein and in fiber.”

2872. Singh, N. Irabanta; Devi, A. Umabati. 1995. Fermentation prospects of two phylloplane bacteria in traditional *hawaijar* made from boiled soybean (*Glycine max* L.). *J. of Food Science and Technology* 32(3):219-20. \*  
**• Summary:** Note: “Phylloplane” refers to surface of a leaf considered as a habitat, esp. for microorganisms.

Hawaijar, an indigenous fermented soybean food of Manipur in the north-eastern hills of India, is traditionally consumed as a fish substitute.

“Fermentation prospects of these two bacteria showed that *Bacillus subtilis* was more suitable than *Xanthomonas* sp. in terms of appearance, texture, odour, flavour and acceptability for the preparation of Hawaijar, a fermented soybean food.” Address: 1. Aerobiology, Microbiology and Plant Pathology Lab., Dep. of Life Sciences, Manipur Univ., Canchipur 795 003, India.

2873. **Product Name:** Organic T-Nugget (Vegetarian Tofu Nuggets).

**Manufacturer’s Name:** Sol Cuisine.

**Manufacturer’s Address:** Mississauga, Ontario, Canada. Phone: 905-502-8500.

**Date of Introduction:** 1995.

**New Product–Documentation:** Leaflet (printed in 2004)

sent by Lorraine Guardino of Sol Cuisine. 2013. March 11. A small color photo shows the front of panel of this product’s package. It weighed 10 oz, 280 gm. “Cubed, marinated and baked. Wheat & gluten free. Certified organic. Kosher.”

E-mail from Lorraine Guardino (in reply to a request for more information about this product). 2013. March 14. “Tofu Nuggets: First made for our own Vegetarian Restaurant. 1995 or 96 (uncertain). Then added to our foodservice offering (only had a very few customers). Put into small see through packages in about 1996 and sold through the small retail section of our restaurant. Continued making on a small scale until approximately 2006. Sold only in the Toronto area. Very labor intensive product to make. Cube tofu, marinate, coat and bake, cool and package. The name never changed.

“Mysterious customer story: We were contacted by a chef (cannot remember his name) who had heard about our tofu nuggets and wanted to try them. He was in Los Angeles and I sent a sample to the airport. He picked them up there. Would not say who they were for. He began ordering a small case every couple of months (approx. 10 lbs). I packed with ice packs and took to the airport (cannot remember any address, I believe I just dropped them at the cargo area). The only thing he every told me was that he did not want anyone to know who they were for. We all thought that was very interesting and it was clear money was not an issue. (They were a nice product when cooked properly they were outstanding. However, a lot of people would over heat etc...)”

2874. **Product Name:** SuperBurger [Low Fat Original, Smoked, TexMex].

**Manufacturer’s Name:** Turtle Island Foods, Inc.

**Manufacturer’s Address:** P.O. Box 176, Hood River, OR 97031. Phone: (503) 386-7766.

**Date of Introduction:** 1995.

**Ingredients:** Sept. 2006 Smoked: Certified organic soybeans\* (grown in accordance with Section 26569.11 of the California Health and Safety Code), brown rice\*, wild rice\*, water, shoyu (soy sauce), lemon juice, garlic, apple cider vinegar, culture (*Rhizopus oligosporus*).

**Wt/Vol., Packaging, Price:** 3 oz. patty.

**How Stored:** Frozen or refrigerated.

**New Product–Documentation:** Leaflet brought by Patricia Smith from Natural Products Expo at Anaheim. 1996. Sept. “Superburgers: The Ultimate Vegetarian Burger Experience.”

Letter (e-mail) from Seth Tibbott, founder of Turtle Island Foods. 2012. Oct. 23.

2875. Albert’s Tofuhaus. 1995. The white side of life... und seine Vielfalt! [The white side of life—and its diversity!]. Lautersheim, West Germany. 10 p. Manufacturer’s catalog and price list. 28 cm. [Ger]

**• Summary:** Contents: Listing of products by category.

Description of individual products by category, with prices,

weights, and order number. Map and ordering information.

The products and their categories are: Tofu products (natural, smoked, marinated, etc.), fried products, spreads for breads, pasteten, salads, sauces, grilled products (hot dogs, made by Viana), products made from wheat (tempeh, seitan, skewered seitan, made by Viana), pasta products, full-fat soy flour. On the cover is a cake of tofu, with a laughing face and two arms held out to the sides. The company logo is adapted from *The Book of Tofu* by Shurtleff & Aoyagi.

Two sheets of the company's letterhead are enclosed in the catalog. Address: Hauptstrasse 13, 67308 Lautersheim, West Germany. Phone: 06351-43718.

2876. Carper, Jean. 1995. Stop aging now! The ultimate plan for staying young and reversing the aging process. New York, NY: HarperCollins. xi + 354 p. Index. 24 cm. [189\* ref]

• **Summary:** A solid and reliable popular book on aging and its retardation.

A table titled "Omega-3 fatty acids in plants" (p. 188) gives the five best sources as flaxseed oil (53.3 gm per 100 gm), canola oil, walnut oil, butternuts, and wheat germ oil. Five medium-good sources are soybean oil (6.8), Persian English walnuts, green soybeans, roasted soybean kernels, oat germ, and purslane (0.9).

One entire chapter titled "Asian secret to long life (Why you need soybeans to stop aging)" (p. 189-98) is entirely about soyfoods and soybeans. Its contents: Introduction. The drug that makes soybeans special (genistein, a potent antioxidant with strong anticancer activity). The alarming facts (most soybeans grown in the USA are exported or fed to pets and agricultural animals. "The Japanese, who hold the world's record for longevity, eat about an ounce of soy per day. Americans eat too little to measure. Americans have four times more fatal breast cancer and five times more prostate cancer than Japanese"). How the soybean can prevent aging: Prevents breast cancer, blocks prostate cancer, saves arteries, regulates blood sugar, builds strong bones, how much? Japan's antiaging soup (miso soup). Antiaging strategy: How to feed your cells more antiaging soy. Where to get more antiaging agents in soy foods (table shows mg of isoflavones genistein and daidzein per serving of 8 different soyfoods; the average is 40 mg).

"Eat soybean foods" is also part of an "Antiaging diet strategy" (p. 311-12).

This book also recommends a vegetarian diet (p. 179-81). It cites two major studies and contains this quotation: "If we—that is society—switched to a vegetarian diet, atherosclerotic coronary artery disease which accounts for most heart disease would vanish"—William Roberts, M.D., editor-in-chief of the *American Journal of Cardiology*. The book also gives four reasons why vegetarians age more slowly.

On the inside rear dust jacket is a portrait photo and

brief biography of Jean Carper. An author, she also writes columns for *USA Weekend* and King Features Syndicate. She was formerly an award-winning medical correspondent for CNN. Address: Washington, DC, and Florida.

2877. Fuhrman, Joel. 1995. Fasting and eating for health: a medical doctor's program for conquering disease. New York, NY: St. Martin's Press. xiv + 255 p. Index. 22 cm. [280 ref]

• **Summary:** "Those familiar with the scientific research on fats, including extracted plant fats such as olive oil and soy oil, know that fats increase our risk of cancer. Vegetable fats are processed foods that interfere with the normal function of our immune system and contribute to obesity and chronic disease.

"When individuals change from an animal-food-based diet to a vegetarian diet, but then eat mostly processed foods such as low-fat pizza, tofu dogs,... refined cereals and grains, pasta and bread as the primary source of their calories, the diet is still inadequate" (p. 29).

Recent evidence suggests that proteins in soybeans aggravate the symptoms of lupus (p. 160). Address: M.D., Belle Mead, New Jersey.

2878. Lo, Eileen Yin-Fei. 1995. From the earth: Chinese vegetarian cooking. New York, NY: Macmillan. 326 p. Illust. (calligraphy by San Yan Wong; illustrations by Claudia Karabaic Sargent; instructive diagrams by Jackie Aher). Index. 24 cm.

• **Summary:** The first chapter, "Foods of the earth" begins (p. 1): "Two days of every month, the first and the fifteenth, were special in the Cantonese household of my grandmother, the small and autocratic woman I always knew as Ah Paw, which means 'my mother's mother.' She was a Buddhist, and on those days she would eat only vegetables, then retire to the couch in her salon to finger her wooden beads and pray to her ancestors,..."

"This was not only a monthly ritual. In the time of the Lunar New Year she would follow her practice of not eating meat, not consuming anything that had lived, for the first fifteen days of the New Year. And she would honor all of the birthdays in our family the same way."

Page 4: At Chinese weddings, "small, round, flat cakes of dough, filled with either sweetened lotus seed paste, black bean paste, or red bean paste, were presented by the groom's family to that of the bride. These cakes are called *lo paw*, which translates as 'wife's cakes'..." "Small steamed buns filled with sweet black bean paste and shaped like peaches are given to people observing their 65th birthdays."

Page 5: "It is also believed that foods have innate characters, ranging from hot to very cold. Soybeans are considered sweet, with a warm character, but when cooked they are said to become hot... Many people to this day eat foods that they believe balance their bodily systems between heat and cold, dryness and moisture, sweetness and

sourness.”

The Chinese kitchen (glossary) (p. 7-20) includes: Bean curd, fresh (doufu, tofu). Bean curd, dried [dried bottom yuba]. Bean curd cakes [doufu-gan]. Bean curd skins, fresh [fresh yuba]. Bean sprouts (mung or soybean). Black beans, fermented (fragrant, preserved in salt). Five-spice seasoning (Often used to flavor dried soybean cakes). Hoisin sauce (“A thick, chocolate-brown sauce made from soybeans, garlic, sugar, and chilies”). Oils (Peanut oil is the favorite of the Chinese kitchen). Red beans [azuki]. Sesame oil. Sesame seeds, black or white. Sesame seed paste (tahini). Soy sauce (“This comes in light and dark varieties. The light soys are usually taken from the top of the batches being prepared, the darker soys from the bottom. Both are made from soybeans, flour, salt and water.” Her favorite brand is Yuet Heung Yuen, made in Hong Kong).

Recipes for fermented black [soy] beans: Romaine lettuce with black beans (p. 70-71). Vegetarian chicken with black bean sauce (p. 190). Steamed clams with black beans (Buddhists are allowed to eat clams, mussels, and oysters, p. 231). Sole with black beans (p. 238). Fresh rice noodles with black beans (p. 258-59).

One very interesting chapter is titled “Daufu and the traditions of Buddha” (p. 169-233). Surprisingly the next chapter, “The occasional fish,” includes fish or shellfish in every recipe!

About the author (from inside rear dust jacket): “A former IACP-award winner, Eileen Yin-Fei Lo was born in a suburb of Canton, China, called Sun Tak, and later lived in Hong Kong. In 1959 she moved to the United States and in the early seventies began teaching Chinese cooking. Since 1976 she has worked on the cooking and nutrition staff of the China Institute of America in New York City, where she teaches regional Chinese cuisine.

“The author of several cookbooks, she also frequently writes on food and restaurants for publications including The New York Times, Gourmet, and Travel & Leisure. She has developed recipes for Food & Wine; is the Asian Authority on the masthead of Food Arts, for which she writes Master Class articles; and has consulted with Four Seasons Hotels and also Shun Lee restaurants in New York. Eileen lives in Montclair, New Jersey.” Address: Teacher of Chinese cooking and cookbook writer, Montclair, New Jersey.

2879. Sass, Lorna J. 1995. Lorna Sass’ complete vegetarian kitchen: Where good flavors and good health meet. New York, NY: Hearst Books. xiv + 492 p. Index. 26 cm. [35+\* ref]

• **Summary:** First published in 1992 as *An Ecological Kitchen: Healthy Meals for You and the Planet* (William Morrow—which see). This innovative vegan cookbook offers 250 cholesterol-free recipes. It features a complete glossary of wholesome ingredients for stocking the vegan pantry (no meat, dairy, or eggs). Address: New York City.

2880. **Product Name:** [Spicy Hot Tofu Hot Dogs].

**Foreign Name:** Tofu Knacker–Picoso.

**Manufacturer’s Name:** Albert’s Tofuhaus.

**Manufacturer’s Address:** Hauptstrasse 13, D-6719 Lautersheim, West Germany. Phone: 06351-43718.

**Date of Introduction:** 1995?

**How Stored:** Shelf stable.

**New Product–Documentation:** Label brought by Albert Hess of Albert’s Tofuhaus. 1995. March 11. 2.5 by 4 inches. White and black on green. An illustration shows a large personified cake of tofu, with smiling face and arms held out. This product is made for Albert by Viana.

2881. Zibart, Eve. 1996. The very fertile vegan field.

*Washington Post*. Jan. 26. p. N24. Weekend section.

• **Summary:** The article begins: “It’s not unusual anymore for non-vegetarians to eat at such green hot spots as the Health Zone, Food for Thought or Planet X (which is turning into the caterer-of-choice for veggie and vegan alternative rock types). Likewise, it’s easier and easier for vegetarians to find foods they like at new nutrition-conscious restaurants such as Felix, Greenwood, etc.—as well as at mainstream spots.

Today, more and more restaurants are offering vegan dishes, which contain no animal products whatsoever. A vegan diet precludes not only meat, poultry and seafood, but dairy products, eggs, butter, lard and other animal fats, cream sauces, cheese, etc. Yet that still leaves plenty of room for fine dining.

Most Asian cuisines (except Korean and Filipino) limit the use of dairy products and eggs. Malik, a downtown Thai restaurant, has a dozen vegetarian / vegan entrees, “including several featuring that heart-healthy favorite tofu” in various sauces such as red curry, black bean sauce, and peanut curry.

The Vegetable Garden in Rockville is the only wholly vegan Chinese restaurant in the area, although most Chinese eating places have a good variety of choices. The key words are “mock” and “Buddha.” Mock chicken and mock pork are nicknames for tofu and other soy-based meat alternatives. The word “pork” sometimes refers to seasoned tempeh dishes. Since Buddhists are also vegans, correctly labeled “Buddhist delights” contain no animal products.

Most Japanese restaurants offer hot or cold tofu and “lightly salted soybean pods called edamame.”

Ends with a directory of ten restaurants in the Washington, DC, area that offer a good selection of vegetarian or vegan dishes.

2882. Golbitz, Peter. 1996. Meat alternative sales sizzling: Consumer concern about fat intake and the environmental consequences of meat products is prompting the rising sale of meat alternatives. *Natural Foods Merchandiser*. Jan. p. 26.

• **Summary:** A graph shows retail sales of meat alternatives

in million dollars from 1985 to 1995, and projected to 1999—based on a two recent reports by Soyatech Inc. (contains data to 1994) and Packaged Facts. Sales have grown from \$44 million in 1985 to \$94 million in 1990, to \$180 million in 1995, to a project \$376 million in 1999.

Since the early 1990s, the market for meat alternatives has not only continued rapid growth but has now shown health signs of segmentation and product differentiation. One leading veggie burger company promotes its product as “soy free and delicious.” Others flag soya content by using the word “tofu” in their product name.

According to a report published recently by the Soyfoods Association of America (SAA), 78% of Americans have heard of tofu, 57% have heard of soy burgers, and 46% are aware of soy hot dogs. The study concludes that this widespread awareness is due to tofu being available in nearly every supermarket and the fact that 77% of consumers purchase tofu in these stores.

Perhaps the most amazing findings in the SAA study are that an estimated 26 million Americans consume soyfoods and 15 million people eat tofu five times or more a year, making it the most popular soyfood in America (not including soy sauce which is a condiment). Soyburgers were the second most popular, having been consumed by 6% of the U.S. population during the past year.

The SAA study also found that consumers who enjoy one type of soyfood are more likely to use another type. For example, nearly 70% of consumers who consumed soyburgers stated that they also ate tofu. Address: President of Soyatech Inc., Bar Harbor, Maine.

2883. Lukin, Anne. 1996. Tempeh temptations: Festive vegetarian dishes for the holidays. *Ontario's Common Ground Magazine (Canada)* Winter 1995/96. p. 16, 18-19.  
 • **Summary:** An introduction to tempeh, with five recipes. Tempeh makers in Ontario include Noble Bean (uses organically grown soybeans) and Soy City (in Toronto, Lorraine Guardino). A photo shows six tempeh products (packages and front panel labels) made by Noble Bean: Tempeh, Quinoa Tempeh with Sesame, Tempeh with Sea Veggies, 3 Grain Tempeh with Soy, Tempeh Burger, Tempeh.

2884. *Natural Foods Merchandiser*. 1996. Worthington Foods expands mainstream ventures. Jan. p. 10.  
 • **Summary:** Worthington Foods has “entered agreements with Denny’s, Chili’s, International House of Pancakes, Marie Callender’s and Subway, to offer its Morningstar Farms meatless burgers, made from either soy or black beans.”

2885. *Vegetarian Times*. 1996. Veggie invasion: Meat and dairy alternatives. Jan. p. 20.  
 • **Summary:** Vegetarian products are gaining ground on supermarket shelves. A table titled “Meat and dairy

alternatives” shows current and projected retail sales for each year from 1994 to 1999: 1994—\$286.4 million. 1995—\$347.3 million (up 21.2%). 1996—\$416.5 million. 1999—\$662.1 million.

2886. **Product Name:** Morningstar Farms Ground Meatless: All Vegetable Burger Crumbles.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1996 January.

**Ingredients:** Textured vegetable protein (wheat gluten, soy protein concentrate), water. Contains 2% or less of autolyzed yeast extract, natural flavors from non-meat sources, modified food starch, black malt powder, salt, corn starch, garlic powder, sucrose, onion powder, soy sauce (water, soybeans, salt, wheat), tomato powder, spices, vitamins and minerals [niacinamide, iron (ferrous sulfate), vitamin B-1 (thiamine mononitrate), vitamin B-6 (pyridoxine hydrochloride), vitamin B-2 (riboflavin), vitamin B-12 (cyanocobalamin)].

**Wt/Vol., Packaging, Price:** 16 oz roll (chub pack). 12 rolls per case.

**How Stored:** Frozen.

**New Product—Documentation:** Worthington Foods news release. 1995. Nov. 23. “Ohio company introduces new fat free ground meat alternative.” Suggested retail price is \$2.99. The product “can be used as a healthy addition to any favorite family meal such as chili, spaghetti sauce, lasagna, and is perfect in casseroles and soups. First shipment is set for Jan. 2, 1996.” “Fat is still the primary issue when it comes to consumers’ nutritional concerns. Over 60% of all consumers report the reduction of fat in their diet is their number one nutritional concern. More than 100 million American adults are now watching their fat intake. Two out of three grocery shoppers, according to the FMI [Food Marketing Institute], indicated that low-fat, fat-free labels are extremely important in their product purchasing decisions.”

Worthington Foods. 1996. First quarter financial report. In Jan. 1996 Worthington introduced Morningstar Farms Ground Meatless, which is a fat-free, cholesterol-free precooked vegetable burger product that can be used in items such as chili, spaghetti, pizza, casseroles, and other recipes. Trade response has been positive.

Product profile sheet sent by Worthington Foods. 1996. May 2. Sheet dated Dec. 1995. “Description: Ground Meatless is a savory blend of textured vegetable protein with the versatility to be used like browned ground beef in all your favorite recipes. Precooked for convenience, Ground Meatless burger crumbles are fat free and do not experience shrinkage like beef.” Second quarter financial report. 1996. Aug. “The introduction of MSF Ground Meatless continues and 39% national distribution has been achieved.” New product description sheet sent by Worthington Foods. 1996.

Aug. 22. An illustration shows the package. "Fat free. Precooked. Use like cooked ground beef in chili, spaghetti, pizza." A table compares the nutritional composition of Ground Meatless and ground beef (100 gm): Cholesterol: 0 vs. 48 mg. Total fat: 0 vs. 11.5 gm. Saturated fat: 0 vs. 4.5 gm. Calories: 60 vs. 160.

Holly McCord. 1996. *Prevention*. Oct. p. 56-57. A Prevention taste panel liked this product very much when it was used in place of ground beef in Sloppy Joes. "Taste and texture excellent. Pretty darned close to ground beef. 8.5 mg isoflavones per ½ cup."

2887. Goel, Vindu P. 1996. Columbus company feasts on a meat-free market. *Plain Dealer (Cleveland, Ohio)*. Feb. 25. p. 1-1, 3-1.

• **Summary:** Worthington Foods has gradually moved into the mainstream as a growing number of Americans look for healthier alternatives to beef and sausage. Worthington makes three different meatless burgers. Several national restaurant chains, including Subway and Dennys, sell Worthington's Low-Fat Garden Vege-Patties.

"Worthington Foods controls about 58% of the meat alternative category nationally," and it had sales of \$91 million in 1995, up 13% over 1994. Address: Plain Dealer Bureau.

2888. Hagler, Louise. 1996. *Soyfoods cookery: Your road to better health*. Summertown, Tennessee: The Book Publishing Co. 160 p. Illust. Index. 21 cm. Introduction by Mark and Virginia Messina.

• **Summary:** Contents: Foreword, by Louise Hagler. Introduction, by Mark Messina and Virginia Messina: Introduction, soybeans—a powerhouse of nutrition, soy and cancer (soybeans—a phytochemical factory, genistein and non-hormone cancers, soy and cancer treatment, isoflavones in the diet), soyfoods and heart disease—beyond cholesterol, soyfoods and bone health, soyfoods and kidney disease, menopause, perspective on soyfoods, about the Messinas. Basic soyfoods (glossary): Whole soybeans, fresh green soybeans, soymilk, okara (soy pulp), soymilk powder, soy protein concentrates, soy protein isolates, tofu, freeze-dried tofu, tempeh, textured vegetable protein, miso, soy flour or grits, yuba or bean curd stick or sheet, natto, soy sauce, soy oil, soy lecithin, convenience soyfoods (frozen soyburgers, frozen tamales and burritos, frozen soy hot dogs or wieners, frozen fat-free soy ground meat replacement, frozen soy pizza, tempeh burgers, frozen tofu lasagne, stuffed shells, manicotti, tortellini or ravioli, frozen soy breakfast links or "sausages" or tempeh "bacon," "ground" tofu, meatless chili mixes, meatless burger mixes, soy "cheeses," eggless soy mayonnaise, tofu salad dressings, soy ice creams, frozen pot pies, frozen pocket breads, instant miso soup, eggless soy cake, quick bread, pancake and waffle mixes, liquid soy coffee creamer, smoked or baked tofu). Feeding babies

and children soyfoods. Breakfast, brunch & bread. Whole soybeans. Sauces, spreads, dips & dressings. Soup & salad. Main dishes. Desserts. Drinks & yogurt.

No dairy products or eggs are used; honey is called for in some recipes. Optional microwave instructions are sometimes included. Address: Summertown, Tennessee. Phone: 615-964-3571.

2889. Ornish, Dean. 1996. *Everyday cooking with Dr. Dean Ornish: 150 easy low-fat high-flavor recipes*. New York, NY: HarperCollins Publishers. xix + 344 p. Index. 24 cm. [6 ref]

• **Summary:** This is Dr. Ornish's 4th book. Recommends low-fat vegetarian meals. Organized into 45 seasonal menus with "recipes that use inexpensive, commonly found ingredients and follow easy time-saving steps."

The opening chapter, "Choices made easy," has the following contents: Why I wrote this book (in response to thousands of letters he receives each year). Delicious and nutritious. Low fat, high flavor (He has commissioned some of America's most celebrated chefs to work within his guidelines and see what they can create. Dr. Ornish and his team have "trained the chefs at the White House, Camp David, the Navy Mess, and on *Air Force One* who cook for President and Mrs. Clinton. We've learned what works"). Beyond heart disease (to improving the quality of your life right now; you will feel so much better!). Good nutrition is easy (If you drink, limit it to one drink per day. "Reducing salt is a good idea for everyone, but its most important if you have high blood pressure, kidney disease, or heart failure") The Life Choice Program ("which also includes moderate exercise, stress management training (stretching, breathing, meditation, visualization, and relaxation techniques), smoking cessation, and psychosocial support... this is a diet and lifestyle program based on (1) the joy of life, not the fear of death, and (2) choice, not coercion"). Why a plant-based diet? ("Cholesterol is found only in animal products, which also tend to be high in saturated fats"). Eat more complex carbohydrates, weigh less. Why 10 percent fat? (recommends 10% of calories from fat. The average American diet has about 40% of its calories from fat. You can eat nonfat dairy, egg whites, but no added oil). Why so little cholesterol? (Your dietary requirement for cholesterol is zero). What is the cause? (His program addresses the cause of the problem rather than trying to get rid of the symptoms). Big changes are easier than small ones (First, you fell so much better so quickly. Second, your palate adjusts quickly so that you prefer low-fat foods. Fat is an acquired taste, not one of the four basic tastes).

Soy related recipes: Vegetable broth ("Experiment with salad dressings made with soft tofu or nonfat yogurt," p. 18-19). Roasted onions (For heightened taste, use soy sauce, Japanese miso, etc., p. 22). Supermarket tips and traps ("Tofu is sometimes in the produce section, sometimes in the dairy case." Take it from the dairy case if you have a choice; the

colder temperature keeps tofu fresher, p. 35). Miscellaneous (“Soy milk in aseptic cartons has a long shelf life before its opened. Use it as a cholesterol-free alternative to nonfat cow’s milk,” p. 39). How to cook legumes (Soybeans contain about twice as much protein as other beans and are a good source of omega-3 fatty acids. Their protein is complete protein, and has been shown to lower blood cholesterol levels. For smart ways to incorporate more soy foods into your diet, see p. 313. Two servings a day {½ cup each} from the legume group are ideal, p. 41). Section on “Meat substitutes” (p. 56-57) mentions soy protein, wheat gluten, tofu, etc. “One of the most popular meat substitutes is Textured Vegetable Protein, or TVP.” It is made from defatted soy flour and is sold in various flavors and shapes. “The Boca Burger ‘No Fat Original’ used in some recipes in this book is made from defatted soy protein...” The section on Miso (p. 57) notes that it “adds nutty flavor to soups, stews, and dressings.” The section on tofu (p. 58) describes the many types, their uses and nutritional value. Creamy coleslaw (with “Creamy tofu dressing,” p. 164-65).

The section on “Commonly asked questions about the Reversal Diet” (p. 306+) has a subsection titled “Since soy products are high in fat, how much can I have?” which begins (p. 313): “Soybean products have no cholesterol and supply essential fatty acids and are an exception to the guideline of no more than 3 grams of fat per serving. However use good judgment... a good rule of thumb is to stay within 4 ounces tofu or 2 cups soy milk per day. Soy milk—the rich creamy product of soybeans ground with water—is an excellent cholesterol-free alternative to cow’s milk. It is available plain and flavored, in a range of fat contents.”

“Will I get enough protein on the Reversal Diet?” (p. 314-15) begins: “Americans tend to be overly concerned about getting enough protein. In fact, meat eaters tend to get too much. Eating too much protein, especially animal protein, can increase your risk of cancer, diabetes, and heart disease... and may lead to osteoporosis.”

“Where do I get protein on the Reversal Diet?” (p. 315) begins: “The body’s protein requirement is about 50 grams per day for women and about 60 grams for men.” “Good sources include beans and peas, including soy milk and tofu.”

On the same page under “combining proteins”: “(The soybean is the only plant food with enough of all the essential amino acids to be considered a complete protein).”

The recipes in this book were developed by Janet Fletcher, Jean-Marc Fullsack, and Helen Roe. The Boca Burger is called for in many recipes (p. 57, 177-78, 194-95, 237-38). Address: M.D., President and Director, Preventive Medicine Research Inst., 900 Bridgeway, Suite One, Sausalito, California 94965; Asst. Clinical Prof. of Medicine, School of Medicine, Univ. of California, San Francisco. Phone: 415-332-2525.

2890. The Mail Order Catalog. Spring-summer 1996. Catalog of books and food. 1996. P.O. Box 180, Summertown, TN 38483. 24 p.

• **Summary:** The book section of this mail order catalog contains listings for an excellent selection of vegetarian and vegan cookbooks, plus books on food nutrition & health, alternative healthcare, women’s healthcare, native Americans and their cultures, and animal rights.

The vegetarian food products section offers TVP granules and chunks, Response textured soy protein concentrates (misleadingly called “Response TVP flakes”), Harvest Direct vegetarian broth, and Protean, instant gluten flour (regular or flavored), seitan “chicken” or “sausage” mix, Mori-Nu silken tofu, Soja instant soy beverage, organic low-fat soy milk powder, Red Star nutritional yeast, Beano, and tempeh starter. Address: Summertown, Tennessee. Phone: 800-695-2241.

2891. Value Line, Inc. 1996. Worthington Foods [Financial report]. New York, NY. 1 p. Feb. 9. 28 cm.

• **Summary:** A concise, detailed financial analysis of Worthington Foods as of 9 Feb. 1996. Address: 220 E. 42nd St., New York, NY 10017-5891. Phone: 1-800-833-0046.

2892. **Product Name:** PrimeBurger: Fat Free & Vegetarian.

**Manufacturer’s Name:** White Wave, Inc.

**Manufacturer’s Address:** 1990 N. 57th Ct., Boulder, CO 80301. Phone: 303-443-3470.

**Date of Introduction:** 1996 February.

**Ingredients:** Wheat gluten, textured soy protein concentrate, hydrolyzed oat flour, granulated onion, soy sauce (water, soybeans, wheat, salt), autolyzed yeast extract, granulated garlic, natural vegetable flavors, caramel color, cellulose, pectin, yam flour, carrageenan, potato starch, spices, calcium ascorbate (a vitamin C source), calcium lactate (from beets).

**Wt/Vol., Packaging, Price:** 6 oz (170 gm) paperboard box.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Holden McClure / White Wave news release. 1996. Feb. “White Wave beefs up its vegetarian burger line. Vegetarian cuisine company launches new Prime Burger, Chick’n Burger, and the new Veggie Life Burger.” A refrigerated packet of two burgers sells for \$1.99 to \$2.49.

Talk with Dana Jacobi of New York City. 1996. Jan. 18. She just tasted the PrimeBurger and thought it was “awesome.” Better than Boca Burger.

Label sent by Paul Chasnoff of White Wave. 1996. May 2. 5.5 by 4 by 3/4 inch. Paperboard sleeve. Dark red, light red, brown, tan, and beige. Color photo of the burger on a little lettuce, topped with a slice of tomato, onion, and a bun. “100% meatless summertime fire-grill flavor.”

Leaflet (13.5 x 20.5 cm, glossy color) sent by White

**Primal Urge.**

**Fire-grill flavor you can sink your teeth into.**

Out of nowhere, it hits you. You're hungry for a great burger. We've got 3 quick ways to satisfy that urge.

The new WhiteWave Prime Burger.™ Our new Chick'n Burger.™ And our classic grain & fresh vegetable Veggie Life Burger.™ Great vegetarian burgers to meet your prime craving.

**WHITE WAVE**  
Vegetarian Cuisine

Ask your distributor for the Full Line of White Wave Vegetarian Cuisine for your Dairy Case.

Wave. 1997. June "Primal urge." On the front is a color photo of the front of the package. On the rear: "Three hot new Burgers from White Wave." Prime Burger, Chick'n Burger, Veggie Life Burger.

2893. **Product Name:** Chick'n Burger: Fat Free & Vegetarian.

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

**Date of Introduction:** 1996 February.

**Ingredients:** Water, wheat gluten, brown rice, bean flour, dehydrated vegetables (onions, celery, spinach, parsley, carrot, garlic), wheat starch, soy sauce (water, soybeans, wheat, salt), lemon juice concentrate, xanthan gum, green chili peppers, canola oil\*, dried yeast, spices. \* = Adds a negligible amount of fat.

**Wt/Vol., Packaging, Price:** 6 oz. paperboard box.

**How Stored:** Refrigerated.

**New Product-Documentation:** Holden McClure / White Wave news release. 1996. Feb. "White

Wave beefs up its vegetarian burger line. Vegetarian cuisine company launches new Prime Burger, Chick'n Burger, and the new Veggie Life Burger." A refrigerated packet of two burgers sells for \$1.99 to \$2.49.

Label sent by Paul Chasnoff of White Wave. 1996. May 2. 5.5 by 4 by 3/4 inch. Paperboard sleeve. Orange, brown, tan, and beige. Color photo of the burger on a little lettuce, topped with a slice of cucumber, tomato, a bun. "Lightly seasoned meatless patty."

Leaflet of White Wave products. 1996. March. The names of Veggie Burger products are given as "Prime Burger, Chick'n Burger, Veggie Life Burger, Tempeh Burger, Teriyaki Tempeh Burger, Lemon Broil Tempeh."

Leaflet (13.5 x 20.5 cm, glossy color) sent by White Wave. 1997. June "Primal urge." On the front is a color photo of the front of the package. On the rear: "Three hot new Burgers from White Wave." Prime Burger, Chick'n Burger, Veggie Life Burger.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term "Chick'n Burger" (or "Chick'n Burgers").

2894. Tibbott, Seth. 1996. Strong growth at Turtle Island Foods, Inc. (Interview). *SoyaScan Notes*. March 1.

Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Turtle Island has benefited strongly from the rapid growth of interest in meat alternatives. The company's best-selling product is the Superburger, which is sold mostly at natural- and health food stores. During 1995, sales for all Turtle Island's products were up about 30-35% over 1994, and in 1994 they were up about 20% over 1993. Address: Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon

97031. Phone: (503) 386-7766.

2895. Michaels, Daniel. 1996. Poles find tofu duck, other health foods hard to swallow: Food fight pits blood sausage against meatless tripe; 'One boiled dish a day.' *Wall Street Journal, European Edition*. March 27. p. 1, 7.

• **Summary:** Hilarious! The novel idea of healthy living is gradually catching on in Poland, especially among the younger generation of skate-boarding kids who equate healthy with hip. And they are starting to eat soy burgers, "Slavic Tofu," and other soyfoods, and to become vegetarians. But the diet of most Poles over age 30 is terrible, with lots of fatty sausages and other meats, which may be why they die at a younger age, have more heart attacks, and are in poorer health than most Europeans. And things are getting worse since market-oriented reforms put meat back in once-empty butcher shops. Address: Staff reporter.

2896. Reichl, Ruth. 1996. Adventurous Asian cuisine. *New York Times*. March 29. p. C1.

• **Summary:** To dine on real Asian food, look for real Asian restaurants. They are easy to find. "As New York's Asian population has grown larger and more affluent, the demand for authentic Asian food has grown. Hundreds of New York restaurants now cater to a clientele with no need for menus written in English and no desire for food translated into American.

Until the Immigration and Nationality Act of 1965 (also called Hart-Celler Act, signed into law on Oct. 3 by President Lyndon Johnson; it became law on 1 July 1968), which increased Asian immigration to the United States, "most Chinese food in America was a bad parody of Cantonese cooking." But since then, we have increasingly had the opportunity to sample the real thing.

Shanghainese cuisine includes "mock duck made of tofu."

Taiwan: To eat in Taiwan helps to understand the many cultures that have passed through this island. In the 1600s, settlers from Fukien [Fujian] arrived from the mainland, bringing their food with them. The Japanese occupied the island for 50 years (1895-1945) leaving their mark in the form of sushi, sake, and a unique lightness. Finally the Kuomintang came to the island (1949 to present), bringing people from all of China's provinces. "Modern Taiwanese food blends all of these influences."

Only a few restaurants in New York serve authentic Taiwanese food. "David's Taiwanese Gourmet in Elmhurst [Queens] serves typical Taiwanese dishes like... fried fermented bean curd (a definite love or hate proposition)."

2897. Barr, Susan Lerner. 1996. Shopping smart: Where's the beef? Not here. Meatless burgers offer flavor without the fat. *Shape*. March. p. 58, 60.

• **Summary:** Gives the weight, calories, grams of fat, and

milligrams of fat in numerous meatless burgers. "Our top picks in the taste and texture departments were Hint of Garlic Boca Burger and the Morningstar Farms Spicy Black Bean Burger.

Page 60 presents all of this information for ten commercial meatless burgers and flavors. Address: M.S., R.D.

2898. **Product Name:** Direct Foods Chicken Burgamix. **Manufacturer's Name:** Haldane Foods Group. **Manufacturer's Address:** Howard Way, Newport Pagnell, Buckinghamshire MK16 9PY, England. Phone: +44 1908 211311.

**Date of Introduction:** 1996 March.

**Ingredients:** Soy protein.

**Wt/Vol., Packaging, Price:** 300 gm box. Retails for £1.89 (4/96, England).

**New Product–Documentation:** Spot in Soyfoods (ASA, Europe). 1996. Spring. p. 4. "New products from Haldane Foods Group." This is the latest addition to the Sosmix / Burgamix range of dry mixes in resealable boxes.

2899. **Product Name:** Direct Foods Natural Soya Mince, and Natural Soya Chunks.

**Manufacturer's Name:** Haldane Foods Group.

**Manufacturer's Address:** Howard Way, Newport Pagnell, Buckinghamshire MK16 9PY, England. Phone: +44 1908 211311.

**Date of Introduction:** 1996 March.

**Ingredients:** Soy protein.

**Wt/Vol., Packaging, Price:** 175 gm sachet. Retails for £0.75 (4/96, England).

**How Stored:** Shelf stable.

**New Product–Documentation:** Spot in Soyfoods (ASA, Europe). 1996. Spring. p. 4. "New products from Haldane Foods Group." These dry mixes are available in sachets.

2900. O'Connor, Amy. 1996. Native Foods: It's not a mirage. *Vegetarian Times*. March. p. 112.

• **Summary:** Tanya Petrovna is chef and owner of Native Foods, which opened in Palm Springs in May 1995. She makes her own tempeh, seitan, and textured vegetable protein. Popular items include the Jerk Burger, a spicy grilled seitan steak marinated in Jamaican spices, Japanese-style Yakisoba made with stir-fried buckwheat noodles, and the Moby Dick, a flash-fried seitan fish sandwich.

2901. White Wave, Inc. 1996. White Wave's mission statement and company overview (Leaflet). Boulder, Colorado. 1 p. Single sided. 28 cm.

• **Summary:** White Wave's mission is to creatively lead the full integration of healthy, natural, vegetarian foods into the average American diet.

"Our interest is in promoting the use of foods we

consider the world better off with, rather than without.' Steve Demos, president of White Wave.

White Wave company overview:

"Founded in 1977 as a tofu company by President Steve Demos, White Wave, Inc. has grown to become one of the largest soyfoods manufacturers in the United States and a leader in the vegetarian foods industry. White Wave's reputation for quality, consistency and innovation has led its sales to grow 20% annually over the last six years. This success has positioned Demos as an award-winning 'entrepreneur' and White Wave as an award-winning small business.

"With its \$1.5 million expansion in 1994, White Wave currently has the capacity to produce 2,000 pounds of tofu per working hour every day. That's one-quarter million pounds per week, and thirteen million pounds per year.

"Over the last few years, White Wave has gone 'Beyond Tofu' (TM) and taken a leadership position in the development of the vegetarian cuisine market with the introduction of its new Vegetarian Cuisine Centers (TM), located in supermarkets and natural food stores across the country. Not only do The Centers showcase White Wave's ever-growing product line, but they offer an easy way for shoppers to learn more about their vegetarian eating and cooking options.

"White Wave's introduction of Silk (TM) as the first nationally distributed, refrigerated soy beverage illustrates White Wave's further commitment to expanding its line with truly innovative products. The recent introduction of a new line of three vegetarian burgers—White Wave Prime Burger, Chick'n Burger, and re-introduction of the classic Veggie Life Burger, along with the 1995 acquisition of 'Meat of Wheat' line of seitan products from Ivy Foods of Salt Lake City, Utah, are the company's latest, successful moves to increase its market share in the meat alternatives category.

"White Wave produces tofu, tempeh, seitan, soy beverages, and a wide variety of easy to prepare meat and dairy replacement foods, including White Wave Silk, Meatless Jumbo Franks, Tempeh Burgers, Vegetarian Fajita Strips, Traditionally Seasoned Seitan, Vegetarian Sloppy Joe, Soy A Melt soy cheeses, and Dairyless soy yogurts. The primary ingredient for White Wave's tofu and tempeh products is soybeans. The company uses approximately 2

million pounds of soybeans per year.

"The majority of White Wave products are cholesterol-free and lactose-free, as well as certified Kosher-Parve by Star K. White Wave is dedicated to producing wholesome, natural foods without artificial ingredients, preservatives or additives.

"Employing over 65 people, White Wave's two Boulder, Colorado plants manufacture foods for distribution in the refrigerated and frozen sections of natural food stores and supermarkets throughout North America." Address: 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

2902. White Wave, Inc. 1996. White Wave products—as of 3/96: Featured in White Wave Vegetarian Cuisine Centers (Leaflet). Boulder, Colorado. 1 p. Single sided. 28 cm. March.

• **Summary:** Leaflet (8½ by 11 inch, printed black on blue) sent by Patricia Smith from Natural Products Expo West. 1996. March. Lists all of White Wave's products, grouped by category, as of March 1996.

Tofu (reduced fat, hard style, soft style).

Baked tofu: "Snack'n Savory Tofu (TM)" and a line of International Baked Tofu: "Oriental-style, Italian-Style, Thai-Style, and Mexican Style."

"Tempeh: Original Soy Tempeh, Soy Rice Tempeh, Five Grain Tempeh, Wild Rice Tempeh, Sea Veggie Tempeh.

"Veggie Burgers: Prime Burger, Chick'n Burger, Veggie Life Burger, Tempeh Burger, Teriyaki Tempeh Burger, Lemon Broil Tempeh.

"Dairyless (TM) Soy Yogurt: Raspberry, Key Lime, Strawberry, Lemon, Blueberry, Banana Strawberry, Peach, Vanilla, Lemon-Kiwi, Apricot-Mango, Organic Plain in 6 oz. and Quarts.

"Dairyless Soy Beverage: White Wave *Silk*.

"Sandwich Slices: Turkey-Style Sandwich Slices, Chicken-Style Sandwich Slices, Roast Beef-Style Sandwich Slices, Bologna-Style Sandwich Slices, Pastrami-Style Sandwich Slices.

"Meat Substitutes: Meatless Veggie Franks, Meatless Jumbo Franks, Meatless Veggie Links.

"Seitan: Traditionally Seasoned Seitan, Vegetarian Fajita Strips, Vegetarian Philly Steak Slices, "Meat of Wheat" (TM) Chicken Style Wheat Meat, Meat of Wheat Grilled Burgers Wheat Meat, Meat of Wheat Sausage Style Wheat Meat, Meat of Wheat Beyond Chicken Patties, Meat of Wheat Beyond Turkey, Meat of Wheat Beyond Roast Beef.

"Heat & Serve: Vegetarian Sloppy Joe.

Soy A Melt Soy Cheese: Cheddar Style Soy A Melt, Fat Free Cheddar Style Soy A Melt, Mozzarella Style Soy A Melt, Fat Free Mozzarella Style Soy A Melt, Garlic Herb Style Soy A Melt, Monterey Jack Style Soy A Melt."

Note 1. A new, very similar list was issued in June 1996. "Chicken-style Seitan" had been added, and 3 Meat of Wheat

products and one flavor of Soy A Melt (Monterey Jack) had been discontinued.

Note 2. A new, less similar list was issued in Sept. 1998—after sales of Silk soymilk were skyrocketing. The following had been discontinued:

“Veggie Burgers: Prime Burger, Chick’n Burger, Veggie Life Burger, Teriyaki Tempeh Burger.

“Sandwich Slices: Roast Beef-Style Sandwich Slices, Bologna-Style Sandwich Slices.

“Meat Substitutes (all): Meatless Veggie Franks, Meatless Jumbo Franks, Meatless Veggie Links.

“Seitan: All 6 Wheat of Meat products were discontinued but Vegetarian Sloppy Joe had been moved in from the “Heat & Serve” category (which then disappeared).

Four types of tofu were added: Extra Firm Style, Tidal Wave (firm), Hard Water Pack, Hard Vacuum Pack. Address: 1900 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

2903. Worthington Foods, Inc. 1996. Annual report 1995. 900 Proprietors Rd., Worthington, OH 43085. 16 p. 28 cm. • **Summary:** Total sales rose to \$91.1 million in 1995, up 13.4% from \$88.2 million in 1994. Net income (profit) rose to \$5.231 million in 1994, up 20.8% from \$4.33 million in 1994. Gross margins improved from 37% in 1994 to nearly 40% in 1995. All three of these 1995 figures were new company records.

Sales of Morningstar Farms (MSF) meat alternative products in retail (supermarket) stores grew by 27% in 1995, increasing by 37% in the 4th quarter alone. The MSF Breakfast Links, now a low-fat product with only 2.5 gm of total fat, has become the best-selling meat alternative product in U.S. supermarkets.

“Foodservice was another bright spot for the Company in 1995. Led by sales agreements which came late in 1995 with over 4,000 new restaurants, including Subway, Denny’s, Chili’s, Pizzeria Uno, and Marie Callender’s, total Foodservice sales increased during the fourth quarter by 43% with sales up 35% for 1995. The strong broker and distributor network assembled in 1994 is starting to pay returns.”

By the beginning of the second quarter 1996 the Zanesville plant will start producing meat alternative products.

Note: Talk with George Pfau, stock and bond broker at PaineWebber (San Francisco, California). 1996. April 23. The company’s growth in sales and profits from 1991 to 1995 has been good but not spectacular. Dale Twomley, president & CEO, is age 56. William Kirkwood, executive VP and chief financial officer, is age 47. Allan Buller, chairman of the board, is age 78. Their earnings per share fell each year from 1991 to 1993. They haven’t raised their dividend for years: it has been \$0.10 per share since 1992. In Dec. 1995 Oppenheimer wrote a very positive report about

Worthington.

Talk with Joan Lieb of Worthington Investor Services. 1996. 1996. April 23. Two underwriters took the company public: William Blair & Co. (Chicago, Illinois) and The Ohio Co. (Columbus, Ohio). The initial public offering (IPO) was in Dec. 1992; the stock opened at \$12.00. Oppenheimer, which has done several more reports since their first one in Dec. 1995, is completely objective and has nothing to gain if Worthington stock rises. Address: Worthington, Ohio. Phone: (614) 885-9511.

2904. **Product Name:** Just Like Ground! (Fat Free–Meatless) [Original, Italian]. Renamed Veggie Ground Round by March 1998.

**Manufacturer’s Name:** Yves Fine Foods. A subsidiary of Yves Veggie Cuisine, Inc.

**Manufacturer’s Address:** 1138 East Georgia Street, Vancouver, BC, V6A 2A8, Canada. Phone: 604-251-1345.

**Date of Introduction:** 1996 March.

**Ingredients:** Water, textured soy protein, textured wheat protein, natural flavor, soy sauce, malt extract, rice starch, wheat germ, oat bran, salt, tomato paste, onion powder, yeast extract, evaporate cane juice, garlic powder, carrageenan, vitamin B-1 (thiamin hydrochloride), vitamin B-2 (riboflavin), vitamin B-3 (niacinamide), vitamin B-6 (pyridoxine hydrochloride), vitamin B-12 (cyanocobalamin), calcium pantothenate, vitamin D-3, reduced iron, zinc oxide.

**Wt/Vol., Packaging, Price:** 12 oz (340 gm). Retail for \$2.99 (1997/04, Lafayette, California).

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Ad (full-page, color) in Natural Foods Merchandiser. 1997. March. p. 99.

“Introducing Just Like Ground! Our new premium meatless ground round.” “Use *Just Like Ground!* in recipes calling for ground meat–pasta sauces, Shepherd’s pie, lasagna, Sloppy Joe’s, and much more. Made from 100% vegetable sources, *Just Like Ground!* is ready to use and available in two delicious flavors, Original and Italian.”

This ad also appeared in Vegetarian Times. 1997. May. Inside rear cover.

Product with Label purchased at Safeway (Lafayette, California). 1997. April 27. Red, yellow, and black on white. “Fat free. Contains no meat.” Soyfoods Center taste test. 1997. May 1. Has a rather strong smell and taste of dog food—which comes from textured soy flour.

Label sent by Yves Fine Foods, comb-bound in “Yves Veggie Cuisine US Packaging.” 1998. March. In Original and Italian flavors.

2905. Tiamzon, Ma. Florideliz D. 1996. Institutional mechanisms for an effective soybean technology transfer in the Philippines. In: Alex Buchanan, ed. 1996. Proceedings of the Second International Soybean Processing and Utilization Conference: 8-13 January 1996, Bangkok, Thailand.

Bangkok, Thailand: Printed by Funny Publishing Limited Partnership. Distributed by The Institute of Food Research and Product Development, Kasetsart University. xviii + 556 p. See p. 450-53.

• **Summary:** “The Soybean Development Program (SDP) was launched by the Philippine Council for Agriculture, Forestry and Natural Resources Research and Development (PCARRD)–Department of Science and Technology (DOST) in 1983 and later renamed as the Accelerated Soybean Production and Utilization Programme (ASPUP).” The goal of the program is to contribute to community development and improved nutrition.

Lists ASPUP’s four main goals related to vertical integration of soybean production and small-scale soybean processing of soybeans for food and animal feed in six regions of the Philippines (in Luzon and in Mindanao) where soybean is grown.

A second list shows six strategies used by ASPUP to attain these goals. The last strategy reads: “(6) Create new markets and promote the use of soybean-based food products like ice cream, soy curd [tofu], soy cheese, soya milk, soy burgers and others as part of the daily diet.” Address: National Program Leader, Accelerated Soybean Production and Utilization Programme (ASPUP) and Supervising Science Research Specialist, Crops Research Div., Philippine Council for Agriculture, Forestry and Natural Resources Research and Development (PCARRD), Los Baños, Laguna, Philippines.

2906. Worthington Foods, Inc. 1996. First quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. 22 x 9 cm.

• **Summary:** Net sales for the first quarter of 1996 rose 16% over the same period in 1995, net income rose 21%, and earnings per share rose 18%. The Zanesville \$9 million capital expansion project was completed and contract manufacturing arrangements (which contributed to reduced gross margins during the past 3 quarters) have been terminated. Worthington began production of Better’n Burgers and other hot-air oven products at the Zanesville, Ohio, facility on 1 April 1996.

Morningstar Farms Prime Patties are now available as a low-fat item. The total fat content has been reduced to only 2 gm and the flavor and texture have been improved to be even more “hamburger like.” They are now in production and will begin to appear on supermarket shelves in the coming weeks.

In Jan. 1996 Worthington introduced Morningstar Farms Ground Meatless, which is a fat-free, cholesterol-free precooked vegetable burger product that can be used in items such as chili, spaghetti, pizza, casseroles, and other recipes. Trade response has been positive.

“Foodservice sales continue to grow rapidly as a result of new accounts, which included 4,000 restaurant units added during the fourth quarter of last year.” Worthington

VegiMax is now sold in about 1,500 Subway units. “Sales to Chili’s have been brisk and Denny’s sales are also improving.” Address: Worthington, Ohio. Phone: (614) 885-9511.

2907. Roller, Ron. 1996. How American Soy Products (ASP) disposes of the okara resulting from making Edensoy (Interview). *SoyaScan Notes*. May 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** ASP is the largest manufacturer of soymilk in North America. Located in the rural city of Saline, Michigan (population 6,500; about 9 miles south of Ann Arbor), they are bounded on the south and west by diversified agricultural land. The ASP plant produces about 1,000 lb/hour of okara, which contains on average 80% water (range 78-82%) and 6.7% protein. The okara comes out of a high-speed decanter. 100 lb of dry soybeans yields 75-100 lb of okara. Ron has an arrangement with one farmer, who owns two large trucks, who comes to the plant each night in one of the trucks, leaves it under the okara spout, and drives the full truck away. These two trucks are used only for hauling okara. ASP pays this man a significant amount of money (which is confidential) each year to haul the okara; in fact Ron estimates that the money may be of more value to the farmer than the okara itself. Ron estimates that this farmer composts about 90% of the okara and adds the remaining 10% to feed for his milk cattle. Cattle are pretty sensitive to a change in their diet, and the wet okara is hard to mix. Ron believes it would be much more difficult and expensive to dispose of okara from a city plant than from his in the countryside.

All of the okara must be hauled away regularly every day. This is the most important thing! The operation must be organized and the person doing the hauling must be reliable. If he missed even one day, it would be a nightmare! The okara piles up so fast and Ron would have no idea of what to do with it. The local dump wouldn’t take it. The okara freezes in the winter and ferments (putrefies) in the summer.

The amount of okara that ASP produces each year is steadily growing, so Ron is now doing research and planning for the future. The best option appears to be drying the okara then selling it as an ingredient in organic livestock or pet feeds—but they have not yet found a dependable outlet, and dependability is—again—the key. With a dependable outlet, Ron believes they could pay for the drier and make money on it. They have also looked at pelletizing. Drying requires both a large initial investment in a continuous process operation (ideally made with stainless steel so the dried okara would be food grade) and use of a large amount of energy to remove all that water. On a moisture free basis, okara contains 34% protein (of very high quality) and 49% carbohydrates. Okara with 10% moisture (a realistic figure after drying) contains 32% protein and 37% carbohydrates. Outlets for dried okara in food might include use in a burger, in breads and muffins, etc. Worthington Foods has made

their Natural Touch Okara Patties since March 1984; okara is the 4th ingredient in order of predominance. Northern Soy has made Soyboy Okara Courage Burger since April 1995; okara is the 3rd ingredient. Many companies make Soysage. Address: President, American Soy Products, 1474 N. Woodland Dr., Saline, Michigan 48176. Phone: 313-429-2310.

2908. D'Aguiar, Marlon. 1996. New developments at Country Farmhouse Soya Products (Interview). *SoyaScan Notes*. May 20. Conducted by William Shurtleff of Soyfoods Center. [Eng]

• **Summary:** Marlon started making and selling tofu in 1985. He started teaching himself the processes in 1983-84. He believes that Country Farmhouse Soya Products was the first company to make tofu commercially in Jamaica. *Tofu and Soymilk Production* and *The Book of Tofu* by Shurtleff and Aoyagi helped him out somewhat over the years. In the beginning he gave away a lot of tofu "to get our people to know it. Our people have always liked it. Our Soy Scream Ice Cream, launched in about 1985, is our favorite product. It was made using hand-cranked wooden buckets. It is still sold in both soft serve and hard packs." Marlon has launched about 10 soy products since 1985—Tofu, Soy Scream Ice Cream, Mayonnaise (based on soymilk and sold to the foodservice), soy ice cream sandwich, soy flour, soy burgers (launched in about 1987 and renamed Veg Middles in about 1994), soymilk (made to order only).

Right now he is working on expanding the company, but it is difficult because of limited finances and resources. The vision is still high and open. Country Farmhouse Lifeline is the parent association and a community operation; Country Farmhouse Soya Products is an offshoot, and a limited liability company. "We went into soyfoods as part of a whole social program named Country Farmhouse Lifeline, which is a local community program whereby local people get together to shape their lives and bring about sustainable life. It was not started just as a business. Our wider program involves alternative sources of energy and more sustainable living." Marlon has worked with Plenty USA and they have helped him mostly with contacts, plus some technical advice—Not much help with product development. There are no other companies now making soyfoods in Jamaica. One company named Nature Treats started in about 1993, but they went out of business about 2 years later; she is trying to sell him her equipment. He is a Rastafarian, and the Lifeline was spun out of that concept—not so much from the religious perspective but from a social and cultural perspective. Most Rastafarians are vegetarians and his interest in tofu and soyfoods grows in part out of his interest in vegetarianism. They have used the okara and whey from their company to generate energy (methane) that is run back into the plant—though it is not established now.

Talk with Annie Liu from Miami, Florida. 1999.

Feb. 16. The tofu made by Country Farmhouse is very hard. In Jamaica, there is a dish named Solomonogondi, that is traditionally made with pickled mackerel; Country Farmhouse makes a vegetarian version with tofu—that is delicious. Their ice cream is also delicious. Address: Affiliate of the Country Farmhouse Lifeline, 12 Faulkner Ave., Duhaney Park, Kingston 20, Jamaica. Phone: 809-933-4617.

2909. Kuhn, Mary Ellen. 1996. Soy in the spotlight: Disease-fighting benefits may change the image of the once-lowly bean. *Food Processing (Chicago)*. May. p. 52-53, 55, 58.

• **Summary:** This is a cover story; on the cover is written: "Unlocking the secrets of soy," with four large color photos. The article begins: "What a difference a couple of decades make." Twenty or 30 years ago, most foodservice operators and consumers used soy with hesitation, sometimes scornful comments. "Today, however, the once-maligned soy protein has a much better image, thanks to a fast-mounting stack of research data suggesting it may help prevent and treat high blood cholesterol, cancer, osteoporosis, and symptoms of menopause." And this good news has begun to reach health and nutrition professionals. With better products on the market, "soyfoods marketers may soon be dealing with a new generation of mainstream consumers who—far from spurning soy-based products—actively seek them out.

"Much of the current soy research is focused on isoflavones, a unique class of phytoestrogens or plant hormones found primarily in soy protein." The main soy isoflavone is genistein. Now soyfoods manufacturers are starting to take isoflavone content into consideration when they formulate, label, and promote their products. The isoflavone content of unprocessed soybeans can vary considerably among varieties, years, and place of harvest. Heat treatment does not appear to significantly reduce isoflavone content, but an alcohol wash (used with most soy protein concentrates and isolated soy proteins) removes most isoflavones in the product. The well-known Supro brand of isolated soy proteins are not subject to an alcohol wash, which helps preserve their isoflavone content.

Rick McKelvey, president of the Soyfoods Association of America, has attended the American Dietetic Association show for the past two years. Last year, most of the questions he heard were: "What is this soy stuff that I'm hearing about?" This year's questions concerned the level of isoflavones in specific products. "This shows how far we've come in the past year," he observes.

ADM, which could easily extract isoflavones from soybeans and sell them has decided not to do so. Jerry Weigel, PhD, who is ADM's vice president of corporate nutrition and regulatory affairs thinks it is probably not legal to sell isoflavones because they do not have GRAS (Generally Recognized as Safe) status or food additive status. Few soyfoods marketers are presently publicizing the isoflavone or genistein content of their products or making

specific health or disease-prevention claims.

William Helferich, PhD, an associate professor at Michigan State University's Department of Food Science and Human Nutrition, has been studying dietary phytoestrogens in laboratory animals for 3 years. He has found that "genistein can stimulate estrogen-responsive breast cancer-cell growth in cultured cells and in animals implanted with these cells. He believes that women at risk for estrogen-dependent forms of breast cancer should not consume high levels of phytoestrogens." Most researchers are concerned about consumers taking isoflavone supplements or pills. Yet such products are now on the market and they acknowledge that some consumers will be attracted to them, instead of simply increasing the level of soyfoods in their diet, eating a healthful, balanced diet, and living and healthy lifestyle. Photos show: A jar of Morningstar Farms Roasted Soy Butter (soynut butter) which will be introduced this spring. Jan Remak, president of marketing for Vitasoy U.S.A.

One sidebar, titled "Probing the soy/health connection," discusses the research of Dr. James Anderson and Mark Messina, PhD. "Scientists theorize that phytoestrogens in soy might help compensate for the loss of hormonal estrogen women experience at menopause."

Another sidebar, "Boom times for the bean," notes that starting soon after the research study by Dr. James Anderson was published in August 1995, many soyfoods companies experienced a substantial increase in sales. Peter Golbitz notes that "After years of steady 10% to 15% annual growth, soyfood sales have soared by about 30% in the past year... Many marketers of meat and dairy analogs are reporting sales increases of more than 100%." A 1995 study by the Soyfoods Association of America found that 75% of Americans have heard of tofu, 55% of soymilk, and 50% of soy burgers. Golbitz adds that in Australia, where soymilk based on soy protein isolates is widely available, per capita soymilk consumption is at least three times what it is in the USA. Vitasoy has adopted a niche-market approach to selling its soymilk; it adjusts the amount beany taste according to the taste preferences of each market. Address: Senior Editor.

2910. Lightlife Foods, Inc. 1996. We don't just make the best vegetarian hot dog in the world—We make all three of them (Ad). *Vegetarian Times*. May. p. 24.

• **Summary:** A full-page color ad. The three products are: (1) Tofu pups. (2) Smart Dogs. (3) Wonderdogs—For kids only.

The company says it was inspired in 1982 to create "America's best and favorite hot dog—Tofu Pups."

This ad also appeared in the June issue, p. 12. Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001.

2911. **Product Name:** Vegetarian Request: French Country Stew, Moroccan Lentil Stew, Tuscan White Bean Stew, Penne Pasta Bolognese, Thai Tofu, Vegetable Croquette

Dinner, Traditional "Meatloaf" Dinner.

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** P.O. Box 870, Greenfield, MA 01302. Phone: 1-800-274-6001.

**Date of Introduction:** 1996 May.

**Ingredients:** No. 5—Thai Tofu- With garden peas and peanut sauce over pasta.

**Wt/Vol., Packaging, Price:** 12 oz paperboard box.

**How Stored:** Frozen.

**New Product—Documentation:** Leaflet sent by Patricia Smith from Natural Products Expo at Baltimore, Maryland. 1996. Oct. One the front is a color photo of each product. On the rear is given for each: Ingredients. Nutritional information. UPC. Units per case. Shelf life frozen. The following contain soy or seitan: 1. Seitan. 4. Soy protein concentrate and isolate. 5. Tofu and soy sauce. 6. Soy sauce. 7. Soy protein concentrate, soy sauce, and [vegetarian] worcestershire sauce.

These products were first sold commercially in May 1996.

2912. **Product Name:** Vege Hot Dog, Vege Sausage, Vege Sausage Curried, Vege Party Franks, Vege Henchen, Vege Herb, Vege Smoke, Vege Garlic, Kaiser Royale, Notchicken Nuggets, Notfish Nuggets, Vege Kabana, Notburgers, Notdogs, Notbacon, Notpepperoni, Vege Chicken, Vege Ham, Notchicken Breast Fillets, Notfat Burger.

**Manufacturer's Name:** Longa Life Vegetarian Products.

**Manufacturer's Address:** 6 Binary St., Yatala (near Brisbane), QLD 4207, Australia. Phone: +61 7 3807-2433.

**Date of Introduction:** 1996 May.

**Ingredients:** Blend of cereals and soya fibre.

**Nutrition:** Per 100 gm.: Energy 906 Kjoules, protein 16.2 gm, dietary fibre 4.5 gm, sodium 270 mg, potassium 800 mg.

**New Product—Documentation:** Spot in Soyfoods (ASA, Europe). 1996. Spring. p. 4. "Soya products 'down under.'" "Longa Life Vegetarian Products is producing NotChicken and NotFish Nuggets, meat and fish free nuggets manufactured from a blend of cereals and soya fibre... The products are wheat and yeast free and are suitable for lacto-ovo vegetarian and Halal [like kosher for Moslems] diets." They contain less than half the fat of regular chicken and fish nuggets.

Letter from Graeme W. McDougall, managing director, Longa Life Vegetarian Products Pty. Ltd. 1996. His company now makes 20 vegetarian meat alternatives. Inserts include "Dietary information" on each (vegetarian, vegan, egg-free, dairy-free, halal, low gluten, yeast free), "Ingredients," "Longa Life Buddhist Vegetarian Products" (free of onions, garlic, leeks, etc.), About the company ("Longa Life is a foundation member of 'The Vegetarian Development Association of Taiwan'"). It has distributors in Singapore / Malaysia and Hong Kong. They have a website ([www.ozlink.com/longalife](http://www.ozlink.com/longalife)) and an e-mail address ([longalife@](mailto:longalife@)

longalife.com.au). Six-panel full color leaflet of products and recipes (each panel 11 cm square). Two large (30 cm, one side) glossy color sell sheets for Notburgers and Notdogs. Two smaller sell sheets (21 cm, both sides) for Notfish Nuggets and Notchicken Nuggets, and for Notbacon and Notpepperoni. All are very artistically done.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “Notburgers” (or “Notburger”).

Natural Products Expo. at Anaheim, California. 1997. March. Sent by Patricia Smith. Color leaflets (15 by 21 cm) for: Notbacon, Notpepperoni, Notchicken Nuggets, Notfish Nuggets.

2913. Raymond, Jennifer. 1996. *The peaceful palate: Fine vegetarian cuisine*. Revised ed. Calistoga, California: Heart & Soul Publications. 159 p. Illust. Index. 28 cm. [5 ref]

**Summary:** A vegan cookbook, with a substantial section on vegan nutrition. Contains 11 tofu recipes and 1 recipe for tempeh sandwich.

Contents: Acknowledgements. Introduction (most Americans eat too much protein and far too much fat). Choosing food for optimum health. Protein. Calcium. Protein myths and facts. Putting fat in its place. Cutting the fat. Dairy products and eggs (why each is cruel to animals; soy and rice milks are excellent alternatives to cow's milk; tofu

can be scrambled in place of eggs. Five good books about factory farming. Contact information for three organizations “working to end the horrors of factory farming”). A note about sweeteners. Coking dried beans. Equipping your kitchen. Stocking your pantry for healthful eating. What to eat when you don't eat meat. Foods which may be new to you [glossary] (includes aseptically packaged tofu, barley malt, low-sodium soy sauce, mirin, miso, Nayo-naise {eggless, dairyless, cholesterol-free mayonnaise}, non-dairy frozen dessert, non-dairy yogurt, reduced-fat tofu, rice milk, rice syrup, seitan, silken tofu, soy milk, Spectrum Natural Spread {similar to soft margarine but made without hydrogenated fats}, tempeh, textured vegetable protein {TVP}).

“Until he extends the circle of his compassion to all living things, man will not himself find peace”—Albert Schweitzer.

Recipes: Breakfasts. Breads. Sandwiches. Salads & salad dressings, etc. A portrait photo (p. 159) shows Jennifer Raymond. “She works as a chef and nutrition specialist with Dean Ornish, M.D. in his ‘Open your heart program,’ teaching patients how a delicious, easily prepared vegetarian diet can reverse heart disease.” “Her first cookbook, *The Best of Jenny's Kitchen*, was published by Avon books in 1981 and was followed closely by her television series *Cooking Naturally!* Jennifer lives in Calistoga, California, with her husband Stephen Avis and their five dogs.”

The tofu and tempeh recipes are: Scrambled tofu (p. 27). Missing egg sandwich (p. 42). Tempeh salad sandwich (p. 44). Tofu, lettuce & tomato sandwich (TLT, p. 45). Broiled tofu (p. 48). Pasta with creamy tofu (p. 109). Lasagna (with tofu, p. 113). Tofu burgers (p. 125). Tofu croquettes (p. 126). Tofu pot pie (p. 127). Tofu cream frosting (p. 148). Tofu cheesecake (p. 150).

Talk with Jennifer Raymond. 1996. May 30. The new enlarged edition was available on 2 May 1996. There are new recipes and with each recipe is a nutritional analysis. The book is still available from the author, as well as nationwide because it is distributed by The Book Publishing Company in Summertown, Tennessee. She is now working closely with Dr. Dean Ornish, and adds: “He is at the center of where things are happening related to vegetarianism, diet, and health. His work has had a more profound impact on the way that the medical profession and people in general view vegetarianism than that of almost any other person. It has allowed vegetarianism to turn a really big corner.” Address: 1418 Cedar St., Calistoga, California 94515. Phone: 707-942-2180.

2914. **Product Name:** Morningstar Farms Prime Patties (Low Fat–Reformulated).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1996 May.

**Ingredients:** Textured vegetable protein (soy protein concentrate, wheat gluten), egg whites, calcium caseinate, natural and artificial flavors from non-meat sources, autolyzed yeast extract. Contains 2% or less of modified food starch, sucrose, hydrolyzed soy protein, onion powder, soy protein isolate, salt, potato starch, yam flour, partially hydrogenated soybean and cottonseed oil, caramel color, cellulose gum, soy extractives, maltodextrin, ascorbic acid, lactic acid, disodium guanylate, vitamins and minerals [niacinamide, iron (ferrous sulfate), vitamin B-1 (thiamine mononitrate), vitamin B-6 (pyridoxine hydrochloride), vitamin B-2 (riboflavin), vitamin B-12 (cyanocobalamin)], spices.

**Wt/Vol., Packaging, Price:** 11 ox paperboard box.

**How Stored:** Frozen.

**Nutrition:** Per patty (780 gm): Calories 110, calories from fat 20, total fat 2 gm (3% daily value; saturated fat 0 gm), cholesterol 0 mg, sodium 300 mg (13%), potassium 170 mg, total carbohydrate 5 gm (dietary fiber 3 gm [12%], sugars less than 1 gm), protein 19 gm. Vitamin A 0%, calcium 6%, thiamine 40%, niacin 6%, vitamin B-12 60%, vitamin C 4%, iron 15%, riboflavin 20%, vitamin B-6 20%. Percent daily values are based on a 2,000 calorie diet.

**New Product–Documentation:** Worthington Foods. 1996. First quarter financial report. Morningstar Farms Prime Patties are now available as a low-fat item. The total fat content has been reduced to only 2 gm and the flavor and texture have been improved to be even more “hamburger like.” They are now in production and will begin to appear on supermarket shelves in the coming weeks.

Photocopy of label sent by Worthington Foods. 1996. May 2. Below the product name is written: “87% less fat than hamburger. Big juicy burger taste. Vegetable & grain protein patties. Low fat.”

2915. **Product Name:** Garden Vegetable Patties (Fat Free).

**Manufacturer’s Name:** Yves Fine Foods, Inc. A subsidiary of Yves Veggie Cuisine, Inc.

**Manufacturer’s Address:** 1138 East Georgia Street, Vancouver, BC, V6A 2A8, Canada. Phone: 604-251-1345.

**Date of Introduction:** 1996 May.

**Ingredients:** Water, vegetables (onions, carrots, peas, corn, green beans, red pepper, squash, water chestnuts), organic brown rice, organic rye, textured soy protein, tomato paste, mustard, brown rice syrup solids, yeast extract, wheat gluten, soy protein isolate, sesame seeds, pea fibre, onion powder, garlic powder, paprika, carrageenan, gum arabic, salt, spices, natural flavor, citric acid.

**Wt/Vol., Packaging, Price:** 6.0 oz (170 gm). Retail for \$2.19 (1997/04, Lafayette, California).

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Product with Label purchased at Safeway (Lafayette, California). 1997.

April 27. Red, yellow, and black on white. “Fat free. No preservatives.” A color photo on the front panel shows one patty atop other vegetables on a plate. The side panel states: “100% vegetable protein. Cholesterol-free. Great taste (kids love them). Products are pre-cooked.” Use by: July 26, 1996.

Product with new Label purchased at Safeway (Lafayette, California). 1998. Feb. 8. Product name: Garden Vegetable Patties. Grayish-green, red, and black on white. A different color photo on the front panel shows a bun covering the lower right corner of one patty, with a cherry tomato and lettuce in the upper right. “All natural. Fat free. Cholesterol free. 100% vegetable protein. Preservative free. Contains no meat.” 2 patties weigh 6 oz (170 gm). Price: \$2.19. **Ingredients:** Water, vegetables (onions, carrots, peas, corn, green beans, red peppers), textured soy protein, rye flakes, wheat gluten, brown rice, tomato paste, dijon mustard, vegetable gum, yeast extract, pea fiber, evaporated can juice, onion powder, salt, carrageenan, paprika, spices, garlic powder, citric acid.

Label sent by Yves Fine Foods, comb-bound in “Yves Veggie Cuisine US Packaging.” 1998. March. Same as that purchased at Safeway Feb. 1998.

2916. Shrieves, Linda. 1996. Red hot passion: Lean hot dogs help Americans continue a long love affair. *Chicago Tribune*. June 12.

• **Summary:** The hot dog has been an American institution since the start of the 20th century.

In 1992 Healthy Choice introduced one of the first low-fat hot dogs on the market. Since then there has been an explosion of low-fat vegetarian hot dogs. One example is the Vegi-Dog from Nasoya. Address: Orlando Sentinel.

2917. Gardenburger Inc. 1996. Why is Paul so famous? (Ad). *Sierra (Sierra Club, San Francisco, California)* 83(4):25. July/Aug.

• **Summary:** The top third of the ad shows an illustration of Paul [Wenner], wearing a chef’s hat / toque, standing on a pedestal, and holding up a Gardenburger on a plate. Eight cows are bowing to him around the pedestal. Paul is famous because he “invented a new wonder food. Gardenburger. The burger with no meat. They are so tasty truck drivers love them. And construction workers. And millions of people all over the world... Paul’s fame has taken a strange turn in a pasture near Omaha.”

In the bottom right corner is a color photo of a Gardenburger package. To its left is the slogan: “Gardenburger. Eating good just got great.”

2918. **Product Name:** Green Giant Harvest Burgers for Recipes: Prebrowned all vegetable protein crumbles.

**Manufacturer’s Name:** Green Giant Div., The Pillsbury Company (Marketer-Distributor). Made in Decatur, Illinois, by ADM.

**Manufacturer's Address:** Pillsbury: 2866 Pillsbury Center, Minneapolis, MN 55402-1464. Phone: 1-800-998-9996.

**Date of Introduction:** 1996 June.

**Ingredients:** Water, soy protein concentrate, isolated soy protein, methylcellulose, malt extract, corn starch, salt, natural flavor, autolyzed yeast extract, maltodextrin, dextrose, beet powder, dried onion, spice, dried garlic, modified corn starch, corn syrup solids. Vitamins and minerals: zinc oxide, niacinamide, ferrous sulfate, copper gluconate, vitamin A palmitate, calcium pantothenate, thiamine mononitrate, vitamin B-6 hydrochloride, riboflavin, vitamin B-12.

**Wt/Vol., Packaging, Price:** 12 oz printed plastic bag.

Retails for \$3.09 (Dec. 1996, California).

**How Stored:** Frozen.

**Nutrition:** Per 2/3 cup (about 61 gm): Calories 90, calories from fat 0, total fat 0 gm, cholesterol 0 mg, sodium 270 mg (11%), potassium 370 mg (11%), total carbohydrate 5 gm (dietary fiber 4 gm, sugars <1 gm), protein 14 gm. Vitamin A 0%, niacin 15%, vitamin B-12 15%, zinc 35%, copper 10%, calcium 8%, vitamin C 0%, iron 10%, riboflavin 6%. Percent daily values are based on a 2,000 calorie diet.

**New Product–Documentation:** Product with Label purchased at Safeway Supermarket in Lafayette, California. 1996. Dec. 15. Label. 10 by 7¼ inches. Dark green, light green, white, yellow, and red. A large color photo shows the crumbles being poured into a skillet of tomato sauce. "Use instead of browned ground beef. Fat free. Zero cholesterol. Good source of fiber. 12 ounces goes as far as 1½ lb. ground beef. 2/3 cup frozen crumbles equals ¼ cup ground beef, browned and drained.

Talk with Nicole, customer service representative from Green Giant. 1996. Dec. 19. This product was introduced in June 1996.

2919. Harvest Direct, Inc. 1996. Harvest Direct: Food you can live with [mail order catalog]. Knoxville, Tennessee. 16 p. 27 x 16 cm.

• **Summary:** Contents: Salad dressings. Meals in a minute (Fantastic Foods). Ground meat alternatives (Protean–The versatile replacement for ground meat, Harvest Direct). Soups, spices, condiments. TVP. Ribs, tofu & tofu meals (Fantastic Foods, Mori-Nu, Arrowhead Mills). Meat Alternatives (Worthington Foods, Fantastic Foods). Soup & meal cups. Beans & Beano. Pasta & sauces. Breads & baked goods. Substitutes for sugar, eggs & fat. Dairy alternatives. Baby foods. Glassware. Gift baskets.

On the cover are nine round, dark brown patties arranged in a circle on a blue and white plate. In the center is a sliced red grapefruit, with a strawberry at its center, blueberries scattered around the periphery, and one sprig of celery. Address: P.O. Box 988, Knoxville, Tennessee 37917. Phone: 1-800-835-2867.

2920. Kuhn, Mary Ellen. 1996. Courting crossover vegetarian consumers: Sales of meat, dairy alternatives skyrocket as companies boost taste appeal. *Food Processing (Chicago)* 57(6):26, 31-32. June.

• **Summary:** Crossover consumers (also called semi-vegetarians or transitional eaters) are those who are not vegetarians but who are reducing their intake of animal products for a variety of reasons. To reach this market, meat and dairy alternatives must taste good.

A sidebar titled "Bringing macrobiotics to the masses," shows and discusses the Kushi Cuisine line of 25 products. Address: Senior Editor.

2921. **Product Name:** [Meatless Salami, Salchichah Sausages, Hamburger, and Chorizo Spicy Sausages].

**Foreign Name:** Salami Especial de Soya, Salchichahs, Hamburguesa, Chorizo de Soya.

**Manufacturer's Name:** UFIESA–Division of Productos Nutrisoya.

**Manufacturer's Address:** Factory: Av. de los Restauradores No. 149. Office: C/33 No. 9 A, Villa Carmen Este, Santo Domingo, Dominican Republic. Phone: (809) 590-3418.

**Date of Introduction:** 1996 June.

**Ingredients:** Salami: 60% tofu, 30% gluten, 7% oats, 2% flaked corn, 1% binders and natural spices. Chorizo: Exactly the same ingredients as Salami.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter and leaflets from Leonidas Radhames Ubiera, president of Ufiesa-Nutrisoya. 1997. Jan. 20. "Our company began to operate on September 1, 1995 without experience and too little equipment." Leaflet #1. Green and red on white. "Consuma productos Nutrisoya para su alimentacion una joya. 100% natural. Puros e integrales de soya. Tofu-queso. Leche, lista para tomar. Yogourt. Salami. Salichas. Hamburguesa. Chorizo."

Letter from Leonidas Radhames Ubiera. 1997. March 10. Gives the date that each of the company's products were introduced, and basic ingredients. These four products were introduced in June 1996. The first 3 are made from tofu and gluten. The chorizo is made from 85% tofu, 10% gluten, and 5% other ingredients. UFIESA is an abbreviation/acronym for Ubiera & Fortunato Import-Export, S.A. Talk with José Fortunato in New York. 1997. April 15. These four meatless products are all ready to heat and serve; they are not dry mixes.

Labels for Salami and Chorizo sent by Jose Fortunato. 1997. April 18. 3½ by 3 inches. Self adhesive.

2922. Washam, Cynthia. 1996. The incredible, edible soybean: Soy, doctors, say, can help prevent cancer and heart disease, and even lower blood cholesterol. *E: The Environmental Magazine*. June. [4 ref]

• **Summary:** "Step aside, beta carotene. Take a back seat, complex carbs. The hottest new nutrients are 'isoflavones,'

natural compounds credited with preventing everything from heart disease and cancer to osteoporosis and hot flashes. The principal source of isoflavones? Foods made with soybeans, such as soy milk, soy burgers, and tofu.” Address: 2425 N.E. Gardner Lane, Jensen Beach, Florida 34957.

2923. **Product Name:** Chicken-Style Seitan.

**Manufacturer’s Name:** White Wave, Inc.

**Manufacturer’s Address:** 1990 N. 57th Ct., Boulder, CO 80301. Phone: 303-443-3470.

**Date of Introduction:** 1996 June.

**Ingredients:** Incl. seitan.

**Wt/Vol., Packaging, Price:** 18 oz. plastic tub.

Recommended retail price: \$3.19 to \$3.99.

**How Stored:** Refrigerated.

**New Product–Documentation:** News release (on White Wave letterhead) from Holden McClure. 1996. June.

“What came first, the chicken or the wheat meat? White Wave introduces its new Chicken-Style Seitan.” “Boulder, Colorado (TofuTown U.S.A.). June 1996. White Wave is clucking with excitement as we expand our meat alternative line with the launch our new Chicken-Style Seitan. No, it’s not molded into the shape of a chicken. It just looks and tastes like it... without the feathers (or meat, that is). Chicken-Style Seitan joins White Wave’s line of Seitan or “wheat meat,” which features such products as Traditionally Seasoned Seitan, Fajita Strips, Philly Steak Slices, and Vegetarian Sloppy Joe.

“This will be one of the biggest new product introductions to date for the company,” stated Steve Demos, President of White Wave. ‘Because of the way people are eating today, this is an absolutely easy transition away from chicken to vegetable protein.’

“With the taste, texture and appearance of chicken, White Wave Chicken-Style Seitan can be used in a variety of ways. Diced up in a chicken salad recipe, it will become a summer favorite. It’s great grilled or barbecued like a chicken breast, or used in a stir fry, pasta dish, salad, soup, or casserole. Packed with protein, Chicken-Style Seitan is a flavorful, chewy addition to any vegetarian meal. Sold in a refrigerated tub like traditional Seitan, Chicken-Style Seitan comes in a broth similar to chicken soup. This broth can be thickened with arrowroot to make a great stir fry sauce.

“White Wave Chicken-Style Seitan and other seitan products are some of the best available sources of “healthy” protein. They are fat free and cholesterol free. They are Vegan (containing no animal products) and kosher-parve products...”

2924. **Product Name:** Morningstar Farms Veggie Burger Kit [Garden Grille, or Southwestern].

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1996 June.

**Wt/Vol., Packaging, Price:** 9.5 oz (268 gm) paperboard box.

**How Stored:** Shelf stable.

**New Product–Documentation:** Worthington Foods.

Second quarter financial report. 1996. Aug. “Veggie Burger Kits have just started appearing in a few produce sections of supermarkets. It is too early to determine the sales potential of this product, but it has generated a lot of interest with newspaper food editors.”

Talk with Joan Lieb of Worthington Foods. 1996.

Aug. 22. This product was introduced on 1 June 1996. Two product description sheets sent by Worthington Foods. 1996.

Aug. 22. (1) “Create healthy profits! Grow impulse sales in your veggie patch.” The products are sold in a Prepack Shipper Display Case, including 48 units. This is meant to be placed near the high-margin pre-cut vegetables. The text on the case reads: “Fat free. Create your own fresh veggie burgers in minutes! Just add fresh veggies.” The text on the front of the package reads: “Ready in minutes. Just add fresh veggies. Makes 4 servings.” Note: The words “Dry mix” do not appear. (2) “Veggie Burger Kit: Garden Grille & Southwestern.” Talk with Trudy of Worthington Foods.

1996. Oct. 3. (1) This is a dry mix. (2) Each box contains two packages; one contains soy protein granules and one that contains flavors and binders. The box does not contain any buns. (3) The consumers mixes the contents of the two packets, adds water, makes a patty. Then has to supply their own buns and vegetables. Note: This literature is extremely unclear and confusing on what this product is. Nowhere in the literature or on the front of the package is the information provided by Trudy given.

2925. Conover, Kristen A. 1996. Food. *Christian Science Monitor*. July 25.

• **Summary:** Discusses: Paul Wenner, Gardenburger, Max Schondor, Boca Burger. McDonald’s will open in India later this year with their veggie burger: chunks of vegetables is a mashed potato base, deep-fried and served on a bun with lettuce, tomato, and eggless mayonnaise. Meanwhile, Burger King’s Spicy Bean Burger has been well received in Britain.

2926. **Product Name:** Spicy Beanburger Mix.

**Manufacturer’s Name:** Haldane Foods Group.

**Manufacturer’s Address:** Howard Way, Newport Pagnell, Buckinghamshire MK16 9PY, England. Phone: +44 1908 211311.

**Date of Introduction:** 1996 July.

**Ingredients:** Textured soy protein.

**Wt/Vol., Packaging, Price:** 150 gm sachet. Retail for £0.95 (7/96, England).

**New Product–Documentation:** Spot in Soyfoods (ASA,

Europe). 1996. Summer. p. 4. "Six new products from Haldane Foods." This meatless product is suitable for catering and fast-food outlets. A black-and-white photo shows the package.

**2927. Product Name:** Granose Meatless Steak & Onions.  
**Manufacturer's Name:** Haldane Foods Group.  
**Manufacturer's Address:** Howard Way, Newport Pagnell, Buckinghamshire MK16 9PY, England. Phone: +44 1908 211311.

**Date of Introduction:** 1996 July.

**Ingredients:** Textured soy protein.

**Wt/Vol., Packaging, Price:** 400 gm can. Retails for £1.19 (7/96, England).

**New Product–Documentation:** Spot in Soyfoods (ASA, Europe). 1996. Summer. p. 4. "Six new products from Haldane Foods." This product is made with VegeSteak. A black-and-white photo shows the package.

**2928. Product Name:** Granose Meatless Bolognese Balls.  
**Manufacturer's Name:** Haldane Foods Group.  
**Manufacturer's Address:** Howard Way, Newport Pagnell, Buckinghamshire MK16 9PY, England. Phone: +44 1908 211311.

**Date of Introduction:** 1996 July.

**Ingredients:** Textured soy protein.

**Wt/Vol., Packaging, Price:** 400 gm can. Retails for £1.49 (7/96, England).

**New Product–Documentation:** Spot in Soyfoods (ASA, Europe). 1996. Summer. p. 4. "Six new products from Haldane Foods." This product is made with VegeMince. A black-and-white photo shows the package.

**2929. Product Name:** Granose Meatless Frankfurters.  
**Manufacturer's Name:** Haldane Foods Group.  
**Manufacturer's Address:** Howard Way, Newport Pagnell, Buckinghamshire MK16 9PY, England. Phone: +44 1908 211311.

**Date of Introduction:** 1996 July.

**Ingredients:** Textured soy protein.

**Wt/Vol., Packaging, Price:** 400 gm can. Retails for £1.49 (7/96, England).

**New Product–Documentation:** Spot in Soyfoods (ASA, Europe). 1996. Summer. p. 4. "Six new products from Haldane Foods." A black-and-white photo shows the package.

**2930. Soybean Quarterly (Nebraska Soybean Board, Lincoln, Nebraska).** 1996. Boomers and the bean. 2(3):3.

• **Summary:** The first wave of Baby Boomers turned 50 this year. This is an important market to watch because households headed by people aged 45 to 54 spend more on almost all products and services than any other age group, according to *The Official Guide to Household Spending*.

In their titled *Segmenting the Mature Market*, Carol Morgan and Doran Levy argue that the 50-plus age group falls into 3 distinct categories in terms of dietary habits and attitudes about food: (1) The Nutrition Concerned segment (which comprise 46% of the over-50 population) shows the strongest commitment to healthful eating; the prepare most of their own meals. This group is most likely to seek food products containing soy for health reasons. (2) The Fast and Healthy segment (38% of the total) are extremely interested in convenience foods, i.e. in speed. Less interested in reading food labels, they would be attracted by microwaveable soy entrees, soy burgers and hot dogs, etc. (3) The Traditional Couponers (only 16% of the total) are most concerned with saving money; they are strongly committed to using coupons. Low-cost soyfoods will appeal to them.

**2931. Hizer, Cynthia.** 1996. The versatile vegetarian: Veggie hot dogs hit home run in taste league. *Atlanta Constitution (Georgia)*. Aug. 29. p. H14. Food section.

• **Summary:** In March, the Vegetarian Society of Georgia held a "Feel Good Festival" with a series of tastings. Hot dogs were tasted "as is"—without adding ketchup, mustard, relish, or bun. Here are the winners, in descending order of preference (i.e., with the favorites listed first): 1. Yves Veggie Cuisine vegetarian frank. This wiener was also designated best veggie dog by *Self* magazine and the *San Francisco Chronicle* last year. 2. Yves Veggie Cuisine tofu frank. 3. Natural Touch vegetarian frank. 4. Light Life Wonder Dog. 5. Soy Boy Not Dogs. 6. Light Life Smart Dog (fat free). 7. Light Life Tofu Pups ("This has been the leader in sales for years and, in fact, was the first vegetarian hot dog to be served at Candlestick Park"). 8. Wholesome and Hearty Garden Dog (Made with wheat gluten, no soy). Address: Georgia.

**2932. Comstock, Sharon L.** 1996. Barbecue veggie style. *Shape*. March. p. 58, 60.

• **Summary:** An overview of the subject. Most of the people who eat meatless burgers are not vegetarians; they are looking for a healthy product.

**2933. Product Name:** Oh, my dog! (Meatless Hot Dogs).  
**Manufacturer's Name:** Quong Hop & Co. (Exclusive distributor).

**Manufacturer's Address:** 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

**Date of Introduction:** 1996 August.

**Ingredients:** Water, soy protein isolate, wheat gluten, tofu (water, organic soybeans\*, magnesium chloride), yeast extract, brown rice, syrup solids, wheat starch, canola oil, wheat germ, mustard powder, salt, beet powder, nutritional yeast, rice syrup, grape juice concentrate, natural flavors, carrageenan, spices. \* = Grown and processed in accordance with the California Organic Foods Act of 1990.

**Wt/Vol., Packaging, Price:** 9.5 oz (275 gm) vacuum pack. Retail for \$2.99 (1998/92, Lafayette, California).

**How Stored:** Refrigerated.

**Nutrition:** Per 1 link (46 gm): Calories 60, calories from fat 10, total fat 1 gm (2% daily value; saturated fat 0 gm), cholesterol 0 mg, sodium 360 mg (15%), total carbohydrate 2 gm (dietary fiber 0 gm, sugars 1 gm), protein 10 gm. Iron 6%, calcium 2%. Percent daily values are based on a 2,000 calorie diet.

**New Product–Documentation:** Talk with Bob Gerner of Berkeley Natural Grocer. 1996. Sept. 3. About one month ago Quong Hop introduced this meatless hot dog. He thinks it is the best-tasting one on the market.

Product with Label purchased at Safeway Supermarket in Lafayette, California. 1998. Feb. 15. Red, blue, and brown on white. A line drawing shows a brown dog standing on its hind feet. “Perishable. Keep refrigerated.” Back panel: “Three ways to enjoy! Steam for 3 minutes, or barbecue for 4 to 5 minutes over a medium flame, or microwave for 2 minutes in a little water.”

2934. Worthington Foods, Inc. 1996. Second quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. 22 x 9 cm.

• **Summary:** Net sales for the second quarter of 1996 rose 20% over the same period in 1995, net income rose 46%, earnings per share rose 43%, and gross profit improved one full percentage point, as a percentage of net sales, to 39.1%. Sales of meat alternative products in the Supermarket and Foodservice categories increased 34% and 48% respectively. Foodservice sales were up at Subway units, and the Chili’s and Denny’s restaurants. Nationwide, the meat alternatives category is growing at about 32% a year. During the most recent quarter the company began full operation of its Zanesville, Ohio facility and eliminated contract manufacturing agreements. A second shift was added at Zanesville and 3 additional shifts are being added at the Worthington plant.

The introduction of MSF Ground Meatless continues and 39% national distribution has been achieved. Veggie Burger Kits have just started appearing in a few produce sections of supermarkets. “Three new MSF Low-Fat Breakfast Sandwiches are currently being introduced in selected markets. These hand-held sandwiches are ready for heat-and-run.”

Sales to natural food stores increased 32%. “Recently we converted all of our sales to natural food stores to a national broker network that we manage... Last month three new products were introduced to this market—the Natural Touch version of Spicy Black BeanBurger, Roasted Soy Butter that tastes like peanut butter with 31% less fat, and a cappuccino version of our coffee substitute, Kaffree Roma.” Address: Worthington, Ohio. Phone: (614) 885-9511.

2935. **Product Name:** Morningstar Farms Breakfast Bagel Sandwich [Scramblers–Pattie–Cheese].

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1996 August.

**Ingredients:** Breakfast patty: Textured vegetable protein (wheat gluten, soy protein concentrate and isolate), egg whites, sodium caseinate, modified food starch, soybean oil...

**Wt/Vol., Packaging, Price:** 5 oz (146 m) paperboard box. Retail for \$2.19 (1997/05, Lafayette, California).

**How Stored:** Frozen.

**New Product–Documentation:** Worthington Foods. Second quarter financial report. 1996. Aug. “Three new MSF Low-Fat Breakfast Sandwiches are currently being introduced in selected markets. These hand-held sandwiches are ready for heat-and-run.”

Talk with Joan Lieb of Worthington Foods. 1996. Aug. 22. This product is scheduled to be introduced in Sept. 1996.

Talk with Trudy at Worthington Foods. 1996. Oct. 3. This product is sold frozen, mostly to grocery stores—not to restaurants or foodservice. Worthington started shipping in early August.

Product with Label purchased at Safeway supermarket in Lafayette, California. 1997. May. 4. Price: \$2.19. Sold in the “Breakfast Foods” freezer section. Paperboard box. Red, yellow, blue, and orange on green. A color photo shows the product on a white plate with kiwi slices. “Low fat.” Soyfoods Center taste test. 1997 May 4. The flavor is okay, but the product seems overpriced.

2936. Highman, Jay. 1996. Worthington’s policy on licensing technology to other companies. Thoughts on building a plant overseas. New Web page under development (Interview). *SoyaScan Notes*. Sept. 3. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Worthington does not license technology to other corporations, mainly for two reasons: (1) There are many top secret techniques used in the technology, and, (2) The company is focusing all of its resources (money and attention) on keeping up with demand in the domestic market. They do a large export business, to countries such as Taiwan and the United Kingdom. Not much is exported to Australia because Sanitarium Foods makes similar products there.

Worthington is not considering construction of an overseas plant (as in England) because the domestic market is their first priority. “We’re having a hard time keeping up with demand.” Jay thinks there is a big market in the UK, and there could be a long-term opportunity there. Roughly 60% of the reason for not looking overseas is related to money and the other 40% would be the loss of focus from trying to do two things at once.

Worthington is developing a web page; Jay is in charge

of it. He would have a cross-link with Soyfoods Center. Address: Senior Manager of Marketing and Sales for the specialty markets, Worthington Foods, 900 Proprietors Rd., Worthington, Ohio 43085. Phone: 614-885-9511.

2937. Kilburn, Monty. 1996. A brief history of Harvest Direct (Interview). *SoyaScan Notes*. Sept. 16 and 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Harvest Direct Inc. is a separate mail order company that has never been owned or even partially owned by ADM. Originally Harvest Direct was established as an arm of Jones and Thomas, an advertising firm in Decatur, Illinois, that did work for ADM (such as ADM's annual report). Jones and Thomas developed the first Harvest Direct Catalog. In 1993 Jones and Thomas sold Harvest Direct to Roger Kilburn (Monty's father), who had been President of ADM's Soy Protein Division. Roger was kind of tired of working for a big corporation; he wanted to do something that was a little more flexible, where he didn't have to wear a suit to work every day.

In May 1995 ADM notified Harvest Direct that they were planning to remove the hydrogenated oil from their dry-mixed products; they planned to change only the ingredient listing and add one line asking consumers to add oil at home—more oil than was contained in the original product. Kilburn thought that this might confuse long-time customers, so he asked ADM if they would be willing to just continue the old formulation and private label the product for Harvest Direct—which had spent years promoting ADM's products. ADM had private labeled frozen burgers for Pillsbury's Green Giant but they refused to private label for Harvest Direct. ADM has also private labeled many of their other products, such as flours and oils. Kilburn's main concern that he had used his own money to promote ADM products for years, yet ADM was free at any time to sell these same products to Harvest Direct's competitors. So Kilburn decided to stop buying ADM's mixes, and instead buy only textured soy protein products (he now uses 3 types of textured concentrates and flours) from ADM and start making the mixes himself. He also decided to devote more energy to promoting the Harvest Direct brand and not promoting ADM—which wasn't too happy with this change.

After Kilburn had developed his own line of products, he had a taste panel test conducted at the University of Kentucky; the new Harvest Direct products were preferred to the former ADM products. By May or June 1995 Harvest Direct was selling the new line of products it was formulating, blending, and packaging "in house."

In Nov. 1995 Kilburn moved the company to Knoxville, Tennessee, where his son and daughter-in-law, Monty, and his wife, lived. Roger lives in southeastern Kentucky, which is about 1 hour's drive from Knoxville. Monty now handles the catalog side of the business and Roger handles the food manufacturing and other things. In July 1995 they introduced

their own line of Harvest Direct "Protean" vegetarian burger mixes, which they are now marketing to health food stores across America. They have plans to manufacture an increasing percentage of the products they sell. An article was published in *Backpacker Magazine* on the advent of the company. Address: Catalog Director, Harvest Direct Inc., 505 West Deport Ave., Knoxville, Tennessee 37917. Phone: 1-800-835-2867.

2938. Lumen Foods. 1996. Our meats are so real... some vegetarians won't eat them! (Ad). *Time*. Sept. 16. Special women's section.

• **Summary:** On this full-page color ad, a half page color photo shows two shish-kebab skewers with meatlike chunks and veggies. A hand is pulling one chunk off the end of one skewer. "Incredible texture... hearty... so satisfying and filling!"

"Genistein & Cancer Prevention: Each 2 oz. serving of Heartline contains no less than 40 mg. of isoflavins [sic, isoflavones], of which 12 mg are 'free' genistein, a strong anti-cancer agent and subject of more than 200 recent studies. To educate the public about genistein... we will send you a FREE booklet entitled "Soy Protein: Your Key to Better Health," written by Dr. Suzanne Paxton, P.D., a world-renowned phytopharmacologist... Just call our toll-free number. Dr. Paxton is the first authority to widely publicize the benefits of soy protein to post menopausal women, in addition to its known benefits in reducing the risks of cancer and heart disease." Also discusses "Soy Protein & Cholesterol."

Send just \$19.95 plus \$3.00 shipping for an introductory package of Heartline Meatless Meats, "containing our Beef, Ground Beef, Chicken, and Pepperoni styles—enough to make one pound each. (Note: You may specify Regular or Fat Free variations). In addition you'll receive two of our popular Cajun Jerky snacks and two 1.5 oz. samples of Stonewall's Jerquee—both made from soy protein. You'll also receive our Tenth Anniversary edition of the Lumen Book—over 240 pages of valuable information about vegetarianism, with over 300 scientific research sources and 60 easy-to-use recipes. And lastly, you'll get out popular *Whole Earth Vegetarian Catalogue*. So order today!" Phone orders: (800) 256-2253. Online users—Visit our Web Site at <http://www.lumenfds.com>.

Talk with Greg Caton. 1996. Oct. 3. This full-page ad cost \$21,000 but it only went out to the 1 million women readers.

Note: This is the first full-page ad seen for soyfoods in one of America's leading magazines (circulation 4 million). Address: 409 Scott Dr., Lake Charles, Louisiana 70601. Phone: 318-436-6748.

2939. Gaiser, Klaus. 1996. Re: Update on work with seitan and tofu in Germany. Letter (fax) to William Shurtleff at

Soyfoods Center, Sept. 21. 3 p. Typed, with signature on letterhead. [Ger]

• **Summary:** Klaus founded Topas GmbH in April 1993. Originally the name stood for TO-fu + PA-sta, but after late 1996, as Klaus developed more and more seitan products, it came to mean TO-fu + PA-sta + S-eitan. Klaus sold his company Yamato Tofuhaus [in April 1989] to a firm named Huegli. With the money from the sale he purchased a 300-year old oak-framed farmhouse (with a 2,000 liter fountain in the old vault cellar) for himself, his wife, and 5 children. For the next three years he stayed on to manage Yamato Tofuhaus, but by the end of 1992 he found the work unsatisfying so he left and decided to start another health food business of his own. In the meantime, Huegli bought Heiler, Germany's biggest reform food wholesale company. Heiler was also dealing with tofu, so together Huegli and Heiler sold quite a lot of tofu and tofu products—about 2 metric tons per week of tofu convenience foods by 1992 and maybe another ton of tofu and tofu-varieties such as smoked tofu. Nowadays their annual sales are not that high; Klaus has no exact statistics, but he would estimate they are about two-thirds of 1992 levels.

In early 1995 Klaus tried to find a place for his company in the tofu market again, but he soon realized his place had been taken. “The German health food market was and is so flooded with tofu products that you just have to come with a real big bang to awaken any interest of the retail shop owners in a new tofu product. They just don't see any reason for selling the 23rd variety of tofu-burger and the 17th variety of tofu-spread.”

Klaus then remembered an old recipe that used wheat gluten. He saves each and every product development experiment in his computer and has about 800 by now. The gluten was colored with red fermented rice (*beni-koji*, made with *Monascus purpureus*) and thus was very meat-like. In fact, when spiced, it so resembled a sausage that he first thought it was too daring to offer such a product to vegetarians. This product turned out to be the basis for his new business. He called it “Wheaty” and started selling it as a cold cut in late 1995. Since that time, monthly sales have gone up and up. “A mere joy.” He could sell much more if he had enough money for costly advertisements, etc. Now his company is selling seven products, based mostly on seitan, with some tofu. Other companies are now starting to try to imitate his most successful product, Wheaty. Klaus believes that seitan has a very bright future in Germany, yet in a new form. The traditional lumps of gluten cooked in soy sauce have not been able to electrify large portions of the population. So Klaus has “re-invented seitan” to resemble familiar German meat products. “And this is the most effective way to convince a greater number of ‘normal’ people of the value of a vegetarian diet.”

One serious problem is that red-fermented rice made with *Monascus purpureus* is not allowed as a food ingredient

in Germany; there was a recent ruling by a German court of law. Moreover, as a food coloring, it is classified as a “food additive” so it needs an “E-number” from EC bureaucracy in Brussels, Belgium,—which it has not yet gotten. This is a pity, since it is the only natural heat-resistant meat color, as well as an excellent flavor enhancer, source of vitamin B, and cholesterol reducer. If it were legal, it could be made by Karl Selg-Mann, who is Germany's only manufacturer of soy sauce and miso.

Talk with Klaus by phone. 1996. Sept. 21. He presently does not own a factory; he finds other food companies to make his products. Klaus speaks almost perfect English. He hitch-hiked in England and Scotland in 1975, then lived for a year in China in 1976, arriving 3 days after Mao Tse-dong died [Note: Mao died in Sept. 1976]. The BNN (*Bundesverband Naturkost und Naturwaren*), a German organization promoting organic foods, has established regulations concerning wheat gluten; originally they said it could only be made from whole wheat. But they found that was too expensive so now they allow the use of 10% by weight of vital wheat gluten. Address: Founder and owner, Topas GmbH, Bollbergstr. 41, 72116 Öschingen [near Tuebingen], Germany. Phone: 07473/25515. Fax: 07473/8320.

2940. Sheridan, Margaret. 1996. Is tofu ready for the big leagues? *Los Angeles Times*. Sept. 26. p. H8, H10, H11.

• **Summary:** The article begins: “Tofu, the spongy off-white soybean cake that spells B-O-R-I-N-G for so many people, is about to get a marketing makeover. Slick packaging, toll-free consumer hotlines, new products, and a blitz of cookbooks created by chefs rather than earnest vegetarian activists are some of the strategies tofu companies plan to use to bring tofu into the mainstream.” A number of second generation tofu products found in supermarkets, and forthcoming cookbooks are listed.

“But some advertising and marketing professionals say that's not enough.” The author talks with many such people who dislike tofu for various reasons: “Tofu is a joke... Tofu is a sissy. Bland, white, boring. It needs to take a stand. Become something. And that name! Its terrible.” “Tofu goes against the American palate... Very little in American food, except baby food or gelatin, has that texture. Even buying tofu is alien. What else do you buy floating in water? And Americans love convenience. Bean curd is anything but. It's not an open-and-eat product.” “I buy tofu but it just sits there, floating in my refrigerator. It makes me feel stupid and guilty. What do you do with it? I end up tossing it out.” Hinoichi is America's largest tofu manufacturer. In March 1997 the company plans to move from its present 50,000 square foot plant in Los Angeles to a facility three times that size in Garden Grove. Harry Tanikawa, Hinoichi sales manager, notes that tofu and soy have been helped by good research and press from the medical community. He adds:

“When you see fast-food places such as Panda Express in the shopping malls adding more tofu items to the menu, when you can buy a tofu hot dog at Dodger Stadium, you know tofu has arrived.” Note: Dodger Stadium is a major league baseball park in Los Angeles.

Worthington Foods has experienced a sales rush in meat alternatives; the category went from nothing four years ago to \$150 million a year. The company’s best-selling items, sold under the Morningstar Farms brand, are breakfast patties, sausage links, garden burgers, and spicy black bean burgers—according to Don Burke, executive vice president of sales and marketing. The people who buy Worthington products are “the masses, people who want to cut down a little on meat and saturated fat. Most are aging baby boomers who want taste, convenience, and a health benefit.”

Tofu “recipes for the mainstream” include: Red flannel hash. Mushroom scrambler. Tofu-stuffed French toast. Tofu slaw. Tofu citrus shake. Tofu cheesecake (p. H11).

The article ends with two sidebars: 16 “Tofu do’s and don’ts.” Soy food: Its many looks (p. H11)—Defines different soyfoods: Tempeh, miso, textured vegetable protein (TVP), soy milk, soy flour, soy cheese, soy sauce, tamari. Address: Times staff/food writer.

2941. Archer Daniels Midland Co. 1996. Annual report. P.O. Box 1470, Decatur, IL 62525. 44 p. Sept.

• **Summary:** Net sales and other operating income for 1996 (year ended June 30) were \$13,314 million, up 5.1% from 1995. Net earnings for 1996 were \$695.9 million, down 12.6% from 1995. Shareholders’ equity (net worth) is \$6,145 million, up 5.0% from 1995. Net earnings per common share: \$1.27, down 9.3% from 1995. Number of shareholders: 35,431.

On the cover of the report is color illustration of a stylized family farm. ADM now has a Web site at <http://www.admworld.com>. The American farmer is the most efficient and most productive in the world. “One American farmer feeds 212 people... In 1996, the U.S. will export \$65 billion worth of agricultural products, approximately 10% of which are exported by ADM and its affiliates, helping to generate over \$100 billion in economic activity and about one million jobs. The productivity of the farmer can help ensure world peace... Thanks to the 1996 farm bill, U.S. farmers will be able to respond to market conditions instead of government orders” (p. 4-5).

Soy protein is a fast growing area for ADM. Currently ADM is building plants in Decatur, Illinois, and Europoort, Netherlands, to make improved soy protein isolates. “Isoflavones are another exciting area. Isoflavones are trace components in plants (particularly soybeans) that are believed to have positive health effects. This is a promising new area, so this research group is seeing its share of exciting developments. Programs are in place to purify these components for future production” (p. 6).

“Natural-source vitamin E: ADM produces this antioxidant from soybeans and other oilseeds. Research shows that natural-source vitamin E is 36% more potent than synthetic vitamin E” (p. 6).

“ADM value-added products from soybeans: (1) Derived from soy protein: Concentrates, isolates, isoflavones, TVP\*, flour/grits, soy milk, Harvest Burgers\*, Harvest Burgers for Recipes\*, NutriBev\*; (2) Derived from soybean oil: Vitamin E, lecithin, distilled monoglycerides, mono- and diglycerides, sterols.” \* = Registered trademark (p. 7). Note: Each of these products is discussed in detail on pages 13-14.

“Isoflavones: Soybeans contain isoflavones, powerful phytochemicals that appear to be able to block the multiple processes that lead to cancer, heart disease, and other chronic degenerative diseases” (p. 12).

“Value-added products from soybeans:... Vegetarians have long been using soy as a protein source, but in light of the mounting evidence that soy foods have significant health benefits, Americans from all walks of life are trying to incorporate soy into their diets... Every day, ADM plants worldwide process over 2.6 million bushels of oilseeds, and with value-added soy products gaining in popularity in a number of industries, these products will continue to be in demand” (p. 13).

These soy products include: (1) “Distilled monoglycerides, derived from soybeans or other oilseeds, are used primarily as emulsifiers or as starch complexing agents in a variety of food applications. ADM monoglycerides are often used in baked goods, confections, extruded products and margarines to bring about or enhance desired characteristics” (p. 13).

(2) “Isoflavones: A relatively new area of interest is isoflavones (part of a group of substances called phytochemicals). The two predominant isoflavones found in soybeans are genistein and daidzein. Researchers at ADM and around the world are conducting studies that strongly suggest that isoflavones have significant health benefits. ADM is scaling up research and processing for the future production of this product” (p. 13).

(3) Lecithin: “Interest in lecithin has escalated worldwide due to recent research investigating its health benefits. Lecithin is most recently being touted as a nutraceutical, since the linoleic acid in lecithin is believed to possess health benefits. Expansions have been completed in both the Windsor (Ontario, Canada) and Europoort (Holland) facilities. Improvements are scheduled for the Hamburg, Germany plant and construction is progressing on the new deoiled lecithin plant in Decatur, Illinois. As the leading producer of lecithin, ADM is positioned to meet the world’s growing demand.”

(4) Natural-source vitamin E: “An antioxidant, vitamin E is reported to help protect cells from free radical damage, the type of damage that can lead to an array of degenerative diseases. A study in the *Lancet* [a prestigious British medical

journal]... concluded that a dime's worth of natural-source vitamin E could reduce heart attacks by 75% when taken daily by those with bad hearts. The *New England Journal of Medicine* reported that postmenopausal women who ate a moderate amount of foods rich in vitamin E cut their chance of heart disease by almost two thirds." In order to keep up with the rising demand, ADM is increasing its natural-source vitamin E plant capacity by fifty percent. ADM is one of the world's largest producers of natural-source vitamin E and also processes products that are good sources of vitamin E, including corn, canola, soy, sunflower, and peanut oils... By 1997, we will have the capacity to supply 300 million people with the current recommended daily allowance of vitamin E."

(5) "Soy protein: One of ADM's most important and versatile value-added products is soy protein. With increasing evidence of health evidence associated with soy foods, an increasing demand for soy protein products seems likely. To meet this rising demand, ADM is expanding its soy concentrate and isolate plants in Decatur, Illinois, and Europoort, Holland... Soy protein is finding success abroad in the consumer marketplace. In Canada, soy frozen desserts are being sold at Safeway grocery stores under the Lucerne Dairy label. In the U.K., a new soy milk plant is under construction to meet demand for a good tasting nutritious non-dairy beverage [probably made from isolated soy protein]. In Europe, VegeMince, VegeBites and VegeSteaks are being introduced by Haldane Foods, an ADM subsidiary. German consumers will be introduced to Frosta Medallions, soy protein and vegetable frozen patties available in four varieties." A large color photo shows a package of Green Giant Harvest Burgers for Recipes (p. 15).

"ADM European Overview: ADM owns the three largest tidewater oilseed plants in the world. They are located in Erith [on the River Thames just east of London], England; Rotterdam, Holland; and Hamburg, Germany."

Page 37 discusses "Antitrust investigation and related litigation." Address: Decatur, Illinois.

2942. **Product Name:** Morningstar Farms Breakfast English Muffin Sandwich [Scramblers-Pattie, or Scramblers-Pattie-Cheese].

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1996 September.

**Ingredients:** Breakfast patty: Textured vegetable protein (wheat gluten, soy protein concentrate and isolate), egg whites, sodium caseinate, modified food starch, soybean oil...

**Wt/Vol., Packaging, Price:** 5 oz (146 m) paperboard box. Retail for \$2.19 (1997/05, Lafayette, California).

**How Stored:** Frozen.

**New Product-Documentation:** Worthington Foods. Second quarter financial report. 1996. Aug. "Three new MSF Low-

Fat Breakfast Sandwiches are currently being introduced in selected markets. These hand-held sandwiches are ready for heat-and-run."

Talk with Joan Lieb of Worthington Foods. 1996. Aug. 22. This product is scheduled to be introduced in Sept. 1996.

Talk with Trudy at Worthington Foods. 1996. Oct. 3. This product is sold frozen, mostly to grocery stores—not to restaurants or foodservice. Worthington started shipping in early August.

Product (Scramblers-Pattie) with Label purchased at Safeway supermarket in Lafayette, California. 1997. May. 4. Price: \$2.19. Sold in the "Breakfast Foods" freezer section. Paperboard box. Red, yellow, blue, and orange on green. A color photo shows the product on a white plate with kiwi slices. "Low fat." Soyfoods Center taste test. 1997 May 4. The flavor is okay, but the product seems overpriced.

2943. Gaiser, Klaus. 1996. Re: Brief history of Topas and its products. Letter (fax) to William Shurtleff at Soyfoods Center, Oct. 10. 3 p. Typed, with signature on letterhead. [Ger]

• **Summary:** Klaus founded Topas GmbH in April 1993, but did not really start to sell tofu products until September of that year. At that time he sold to Heiler (A Reform food wholesaler, purchased by Huegli in 1990): 4 kinds of Tofu Burgers (Oriental, Pikant, mit Gartengemuese, mit Sauerkraut), two kinds of Tofu Rolls (actually sausages; Natur, mit Kräutern), 5 kinds of Tofu Pastete, and 3 kinds of Tofu Spreads. To Huegli he sold: 3 kinds of that stone-hard, dry Tofu-Pastete (in 1.5 kg blocks; mit Broccoli, Gärtnerinnen Art {with Broccoli, carrots, and peas}, and Holsteiner Art), as well as 3 kinds of Tofu Burgers (mit Linsen {lentils}, Oriental {because of some curry}, and piquant {similar to Oriental}; all came in large packages of about 40 pieces per package). He had to re-develop all of these, because they had been on the market before, but the supplier suddenly stopped supplying them and he had left that firm by the end of 1992; by the spring/summer of 1993 he was ready for competition with Heiler/Huegli. He made a big mistake thinking his future lay in supplying Huegli/Heiler with the products they needed instead of starting to build up his own brand name and fame in the market.

Klaus did not make any of these products himself; He found a company to produce them for him (which was not easy) and after having taught the staff there how to make everything, he just bought all the products and sold them to Huegli and Heiler. But for reasons that are confidential, this arrangement did not work out.

So starting in early 1995 he tried again to sell tofu products under the Topas label to the health food market. He introduced two types of tofu pouches, tofu cold cuts, and a blend of tofu spreads. Only the last product survived. Finally he realized that the real opportunity lay in making meat alternatives from seitan. Address: Founder and owner, Topas

GmbH, Bollbergstr. 41, 72116 Öschingen [near Tuebingen], Germany. Phone: 07473/25515. Fax: 07473/8320.

2944. Longa Life Vegetarian Products Pty. Ltd. 1996. United States Products: Dietary information and product information (Leaflet). Yatala, QLD, Australia. 1 p. Single sided. 28 cm.

• **Summary:** This photocopied black-and-white leaflet gives dietary, nutritional, and ingredient information on the following products: Notchicken, Notham, Notbacon, Notpepperoni, and Notchicken Nuggets. All are vegetarian and free of MSG. The first two are vegan, egg free, and dairy free. All are Halal (like kosher for Moslems). Two contain less than 0.3% gluten. In the first two products, the main ingredient is wheat gluten; in the others it is soy protein.

The U.S. distributor for these products is: United Specialty Foods Inc., 2475 Bransford Ave., Nashville, Tennessee 37204. Phone: 615-269-7476. Talk with Don Michalenko, founder and head of United Specialty Foods. 1997. April 4. He was with Worthington Foods for 8 years as national sales manager for their natural foods line. Longa Life Foods started about 10-12 years ago by a man who was a butcher, who became a Seventh-day Adventist and a vegetarian. People encouraged him to start line of meatlike vegetarian products. The managing director is an entrepreneur and the butcher is still one of the partners. Address: 6 Binary St., Yatala (near Brisbane), QLD 4207, Australia. Phone: +61 7 3807-2433.

2945. **Product Name:** UnTurkey [Meatless Turkey Made from Seitan and Yuba].

**Manufacturer's Name:** Now & Zen, Inc.

**Manufacturer's Address:** South San Francisco, California. Phone: (415) 695-2805.

**Date of Introduction:** 1996 October.

**Ingredients:** Nov. 1998: UnTurkey—Water, vital wheat gluten, yuba (soybeans and water), bread crumbs (organically grown sprouted wheat berries\*, etc.), onions, celery, carrots, nutritional yeast, soy sauce (soybeans, wheat, salt, water), expeller pressed canola oil, white wine, garlic, salt, spices. Gravy: Water, unbleached wheat flour, expeller pressed canola oil, soy sauce (soybeans, wheat, salt, water), nutritional yeast, white wine, garlic, onion, salt, spices. \* = Organically grown and processed in accordance with the California Organic Foods Act of 1990.

**How Stored:** Frozen or fresh.

**New Product—Documentation:** See next page. Sinzinger, Keith. 1997 “Tempeh turkey heads east: Vegetarian innovations.” *Washington Post*. Oct. 8. Miyoko Schinner, founder of Now & Zen restaurant in San Francisco, first prepared a seitan-based bird one Thanksgiving. Later she published a recipe for her UnTurkey, then began selling it at her restaurant several years ago. Last year she sold about 1,000 UnTurkeys in the Bay Area, and is hoping for sales of 10,000 this year.

Fully cooked – just heat and serve  
Serves 2 – 4.

## The Great UnTurkey

*Let One of Now & Zen's featherless friends  
be the centerpiece of Your Holiday table!*

**This impressive creation is completely vegan and offers 5 solid pounds of boneless eating (enough for 8 hungry adults)! Made of delicately flavored, tender seitan, dressed in a delectable "skin" made from yuba (beancurd skin), stuffed with a savory bread stuffing and accompanied by a quart of delicious gravy, this innovative creation will delight vegetarians and non-vegetarians alike. This frozen "unbird" comes fully cooked, and needs only reheating to be enjoyed!**

650 794-0980

in 1996 or 1997. In 1998 it was sold frozen in two sizes: 7 pounds (5 lb of stuffed UnTurkey + 2 lb of vegan gravy) or 4 pounds (3 lb of stuffed UnTurkey + 1 lb of vegan gravy).

2946. United Soybean Board. 1996. National report on consumer attitudes about nutrition. Seattle, Washington. 8 p. Oct. 28 cm.

• **Summary:** This report, commissioned by USB, was conducted by an independent research firm. It included telephone interviews with 1,000 consumers and primary household shoppers of all ages throughout the USA. They were asked a series of up to 23 questions. The standard margin of error for the study is  $\pm 3.2\%$ .

Popularity of soy products: A bar chart shows the following, listed in descending order of popularity. The first number indicates the percentage of the population who are familiar with each product; the second number indicates the percentage of those who are familiar with the product that have tried it. Tofu—76% of Americans are familiar with tofu, and 53% of these have tried tofu. Veggie burger—69% / 53%. Soybean oil—65% / 28%. Soy milk—58%—35%. Infant formula [soy-based]—53% / 36%. Soy protein—42% / 32%. Soy flour—41% / 30%. Miso—17% / 58%. Tempeh 14%—45%.

“How healthy are soy products? 40% of the population acknowledge that soy has positive health attributes. Half of those believe soy is a high protein source. 13% of the respondents cited soy as an option for lactose intolerance, 13% as a low fat food and 11% as a cholesterol reducer.”

Consumer concern and confusion about nutrition terms: Trans fatty acids—37% of the population are familiar with the term; 38% of those who are familiar are concerned about trans fatty acids; 51% of those who are familiar are confused about trans fatty acids. Hydrogenation: 36% are familiar, 39% of those are concerned, and 46% of those are confused. Address: 190 Queen Anne North, Seattle, Washington 98109. Phone: 1-800-TALK-SOY.

2947. Wholesome & Hearty Foods, Inc. 1996. Wholesome flavor and hearty sales (Leaflet). Portland, Oregon. 2 p. 28 cm.

• **Summary:** This leaflet (8½ by 11 inches, black on tan) gives details (incl. ingredients and nutritional information) on three Gardenburger products: The Original, Veggie Medley, and Zesty Bean. Address: 975 S.E. Sandy Blvd., Portland, Oregon 97214. Phone: 1-800-636-0109.

2948. Worthington Foods, Inc. 1996. Who says a fat-free burger has to taste like one? (Ad). *Vegetarian Times*. Oct. p. 3.

• **Summary:** This full-page, color ad is for Morningstar Farms Better ‘n Burgers—Fat Free. A large photo shows a meatless burger between buns with all the trimmings, next to an ear of corn on a plate. “Now you can enjoy a big, juicy

burger and hold the guilt, when you try Morningstar Farms Better ‘n Burgers. Because they’re all vegetable. And all natural. All that’s missing is the fat. Bake them. Microwave them. Or throw them on the grill. And they’ll satisfy your burger craving. Remember, when you help yourself to Morningstar Farms, you really are helping yourself. Look for them in your grocer’s freezer.” The name of the company (Worthington) does not appear in the ad.

This ad also appeared in the Feb. 1996 issue (rear cover) of this magazine. Address: Worthington, Ohio 43085.

2949. Worthington Foods, Inc. 1996. Third quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. 22 x 9 cm.

• **Summary:** Net sales are up 20% for the first 9 months of 1993 compared with the same period one year ago. Third quarter sales are up 22.5%. Even better, net income (profits) for the first 9 months of 1995 are up 38.5%, and for the third quarter are up 44%. Gross profit for the third quarter was 40.2% of net sales.

Foodservice sales increased 47.5%, the fifth consecutive quarter with sales increases over 40%. The company has introduced 16 new products during the first nine months of 1996. The board declared a four-for-three share split to be distributed on 6 Dec. 1996. The board also approved a \$11.5 million capital expansion at the Zanesville plant. A second production line will be added “to produce hot-air oven veggie burgers.” Address: Worthington, Ohio. Phone: (614) 885-9511.

2950. Worthington Foods, Inc. 1996. Natural Touch. 900 Proprietors Rd., Worthington, OH 43085. 4 panels. 28 cm. Undated.

• **Summary:** This color catalog shows each of the products in Worthington’s Natural Touch line, which now contains about 17 products. For each product there is a color photo of the label, a brief product description, ingredients, and Nutrition Facts. “Veggie Burger Kits” are included in this latest catalog. Inserted into this catalog are large (8½ by 11 inch) single-sided product sheets for Vegan Crumbles, Veggie Burger Kits, and Roasted SoyButter.

On the front of the catalog, in large letters, is a “Purity Pledge: Natural Touch products are completely free of anything artificial... no artificial additives, colors, flavors or preservatives... you have our word on it.”

Talk with marketing rep at Worthington Foods. 1997. May 14. This catalog was printed in late 1995. When asked if these products now contain genetically engineered soybeans he says “I don’t know. Talk to Ron McDermott.” Address: Worthington, Ohio. Phone: 1-800-628-3663.

2951. **Product Name:** Natural Touch Vegan Burger Crumbles, or Vegan Sausage Crumbles (Fat Free). **Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd.,  
Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1996 October.

**Ingredients:** Vegan Burger Crumbles: Textured vegetable protein (wheat gluten, soy protein concentrate), water, contains 2% or less of autolyzed yeast extract, natural flavors from non-meat sources, modified food starch, black malt powder, salt, corn starch, garlic powder, sugar, onion powder, soy sauce (water, soybeans, salt, wheat), tomato powder, spices,...

**Wt/Vol., Packaging, Price:** 1 lb roll (chub pack).

**How Stored:** Refrigerated.

**New Product–Documentation:** Leaflet (glossy color, single sided, 8½ by 11 inches) sent by Patricia Smith from Natural Products Expo East. 1996. Oct.

2952. **Product Name:** Veggie Pizza Pepperoni.

**Manufacturer's Name:** Yves Fine Foods, Inc., a subsidiary of Yves Veggie Cuisine, Inc.

**Manufacturer's Address:** 1638 Derwent Way, Delta (Vancouver) V3M 6R9, B.C., Canada. Phone: 604-251-1345.

**Date of Introduction:** 1996 October.

**Ingredients:** Oct. 1996: Water, wheat gluten, soy protein isolate, spices, tofu (water, organic soy beans, magnesium chloride), yeast extract, salt, mustard powder, evaporated cane juice, wheat starch, rice starch, beet powder, guar gum, natural liquid smoke, carrageenan.

**Wt/Vol., Packaging, Price:** 155 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Leaflet sent by Patricia Smith from Natural Products Expo East. 1996. Oct. On the front is a large color photo of “Veggie Pizza Pepperoni: A new generation of pizza toppings.”

On the rear: “Fat free–No cholesterol. No nitrates.” Detailed nutrition facts. And ingredients. Yves Veggie Cuisine, Inc. is now located at Delta (Vancouver), B.C., Canada V3M 6R9. Phone: 604-525-1345.

Spot in *Vegetarian Journal*. 1997. Nov/Dec. p. 15. “Veggie Pepperoni. Yves Veggie Cuisine has introduced Veggie Pizza Pepperoni, a fat-free vegetarian pepperoni topping for pizzas.”

2953. **Product Name:** Jumbo Veggie Dog (Meatless).

**Manufacturer's Name:** Yves Veggie Cuisine, Inc.

**Manufacturer's Address:** Delta (Vancouver), B.C., Canada V3M 6R9. Phone: (604) 525-1345.

**Date of Introduction:** 1996 October.

**Ingredients:** Water, wheat gluten, soy protein isolate, tofu (water, organic soybeans, magnesium chloride), yeast extract, Sucanat (granulated sugar cane juice), mustard powder, wheat starch, garlic powder, onion powder, salt, paprika, rice flour, beet powder, carrageenan, natural flavors, natural liquid smoke, spices.

**How Stored:** Refrigerated.

**New Product–Documentation:** Leaflet sent by Patricia Smith from Natural Products Expo East (Baltimore, Maryland). 1996. Oct. On the front is a large color photo. “Make room for the hot & spicy Jumbo Veggie Dog (It's big!).”

On the rear: “Fat free–No cholesterol. No nitrates.” Detailed nutrition facts. Ingredients.

Label sent by Yves Fine Foods, comb-bound in “Yves Veggie Cuisine US Packaging.” 1998. March. There are now two flavors: Hot & Spicy, and regular. Both are in a 15.9 oz (450 gm) package.

2954. Tibbott, Seth. 1996. *History of Tofurky* (Interview). *SoyaScan Notes*. Nov. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** King Harvest Natural Foods was a vegetarian sandwich company, deli, and juice shop in Portland, Oregon. They made a fresh “Tofurkey Sandwich”—which was just tofu, slightly browned, maybe marinated in some turkey-like seasoning, with some trimmings. In 1980, when Seth started delivering his tempeh to stores in Portland, he first saw this sandwich, which he enjoyed eating in Portland-area stores. That was when he first heard the word “Tofurkey.” In about 1982-83 King Harvest discontinued their Tofurkey Sandwich; they never made it again, though they are still in business making other sandwiches and food products.

The ancestor of Tofurky was created in 1991 by Hans and Rhonda Wrobel of The Higher Taste—one of Seth's customers—a caterer and food manufacturer in Portland, Oregon, with a little deli; they make tempeh & lettuce sandwiches and tofu sandwiches. They started making a vegetarian stuffed Tofu Roast with gravy for their customers at Thanksgiving. They sold about 30 units the first year, 1991, largely to a local audience—including Seth. It was tofu in a pie pan with stuffing in the middle, then another layer of tofu on top. It was basted and baked, and tasted good—but it sold for \$30. Seth saw this as a meat alternative that had potential at Thanksgiving. The vegetarian recipes for making mock turkey are too long and complicated for the typical cook.

Seth wanted to use the name “Tofurky” (which he coined) for his new product idea. But before he did, he called the folks at King Harvest and asked them if they had a trademark on or any other rights to the name. They said “No.” He then asked them for permission to use that name. They said “Fine—”No problem”—in part because they hadn't made the product for more than ten years.

In October 1995 Turtle Island, together with The Higher Taste (in an informal and unwritten joint venture), introduced the first “Tofurky.” Higher Taste made the product's centerpiece, a dome-shaped layer of marinated tofu with a whole wheat stuffing inside. Seth had been developing a tempeh burger that tasted more like turkey than burgers, so

# Tofurky™

## A Delicious Vegetarian Holiday Feast

Whether you are seeking to offer a meatless option for a portion of your holiday table or are planning a complete vegan feast, we think Tofurky will satisfy and amaze all who try it.

**WHAT IS TOFURKY™?** Tofurky™ is a pre-baked vegetarian feast designed to be the delicious centerpiece of your holiday meal. It consists of four parts: 2 pounds Organic, Specially Seasoned, Baked Tofu; 8 Hearty Tempeh Drumettes; 15 oz. Heavenly Golden Mushroom Gravy; and 1½ pounds Moist Cranberry-Walnut Stuffing. Each Tofurky™ is 100% vegan, cooks in less than 30 minutes and tastes FABULOUS!

**HOW DO WE MAKE IT?** We season Premium Island Spring Extra Firm Tofu with a special flavor blend made with all natural, vegetarian ingredients. Then we marinate and bake the tofu to golden perfection. The taste is unique and speaks to taste buds you never knew existed! There is nothing remotely similar to this anywhere on the market.

**HOW ABOUT THE TEMPEH DRUMETTES?** Included in your Tofurky™ are the unique Drumettes, a dark filet made of grated organic tempeh, tvp (textured vegetable protein), organic wild rice, cranberries and carrots, seasoned and carved into yummy shaped drumsticks.

**IS THERE MORE?** To tie together the two distinct flavors of the Baked Tofu and Tempeh Drumettes, we have added

generous helpings of Golden Mushroom Gravy and Cranberry-Walnut Stuffing. The rich gravy and hearty stuffing are the perfect full-flavored complement to the Tofu and Tempeh.

**HOW MANY DOES IT SERVE?** Tofurkys™ are designed to feed, satisfy and amaze 8 hungry adults.

**IS TOFURKY™ HEALTHY?** Not only is our Tofurky™ delicious, it's also good for you! Filled with organic ingredients, dairy free, high in protein, zero cholesterol, nutritious and kids love it, too.

**WHO CREATED TOFURKY™?** Tofurky™ was created in 1991 by Hans and Rhonda Wrobel of the Higher Taste, a gourmet vegetarian catering company in Portland, Oregon. In 1995 Turtle Island Foods, an innovative soyfoods producer in Hood River, Oregon added the drumettes and has been helping to market the product to a national audience.

**WHAT ARE THE INGREDIENTS IN TOFURKY™?**  
**TOFU:** organic tofu\*(water, certified organic soybeans\*, calcium sulfate, nigari), natural vegetable based flavor.

**DRUMETTES:** textured soy protein (soy flour and water), organic soy tempeh\*(certified organic soybeans\*, water, apple cider vinegar, culture), grated carrots, organic wild rice\*, malt extract, natural vegetarian flavor, dried cranberries, vegetarian worcestershire sauce, isolated soy protein, carrageenan, herbs and spices.

**GOLDEN MUSHROOM GRAVY:** water, nutritional yeast, expeller pressed canola oil, unbleached flour, chopped fresh mushrooms, diced onion, shoyu soy sauce (water, soybeans, wheat, salt), herbs and spices, non dairy lactic culture.

**CRANBERRY-WALNUT STUFFING:** water, celery, organic whole wheat bread cubes\*, onion, expeller pressed canola oil, walnuts, cranberries, vegetable stock, garlic, poultry spice, non dairy lactic acid culture, hot sauce (tomato, water, vinegar, spices), salt, citric acid.

\*grown in accordance with Section 26569.11 of the CA Health & Safety Code

**HOW MUCH DOES IT COST?** Tofurky™ retails for anywhere from \$29.99 to \$37.99 in natural food and grocery stores. It can be sent via Federal Express anywhere in the Continental US for \$49.95 plus \$7.00 handling

**THAT SOUNDS LIKE A LOT, IS IT WORTH IT?** Yes! Remember, Tofurky™ is prebaked and ready to serve 8 people in minutes. It adds up to around \$5.00 a pound, which is an average cost for high quality prepared natural foods. Also, 1% of our net sales supports the Farm Sanctuary's Adopt a Turkey Program (call 888 SPONSOR for details).

### WHERE CAN I BUY IT?

Tofurky™ is available by special order through your local natural foods store or call (888)TOFURKY for information on buying Tofurky™ via mail order.

Turtle Island Foods, Inc. The Higher Taste

he got a drumstick form (Holomatic) and started making tempeh drumsticks. He added four of these to the Higher Taste Tofu Roast, and included a recipe for Nutritional Yeast Gravy. Turtle Island, which had good distribution for its tempeh, was responsible for marketing and distributing the product. Seth test marketed it as a frozen product in 24 natural food stores and co-ops on the West Coast; it retailed for \$24.99 to \$27.99 and weighed 2 lb 12 oz. There was also a 2 lb 4 oz size. Seth sent out some press releases and product attracted extensive local media coverage. No products were sold by mail order. Most natural food stores (such as Nature's), to which Seth introduced the product enthusiastically, predicted that it would never sell. But Seth had a strong belief in it. Somebody at the Puget Consumers Co-op (PCC) in Seattle, Washington, took the product, even though they doubted it would do well. Then "it caught fire" at the PCC's seven upscale stores in Seattle. They had to install a special telephone line—a Tofurky Hotline—for all the Tofurky special orders they were getting. Turtle Island did demos in PCC stores which further stoked the demand. After Thanksgiving, Turtle Island was flooded with calls and letters ("fan mail") from happy customers who said things like "Wow! I've been waiting 20 years for this." Usually food manufacturers only hear from customers when they are upset. "The customers believed in the product more than the savvy retailers—who had completely missed this niche." Feedback cards were included in every product, and this feedback indicated that the gravy (originally created by The Farm in Summertown, Tennessee, but greatly improved on by Seth) was what made the product delicious, but consumers wanted the gravy itself—not just the recipe—included with the product. In 1995 about 800 Tofurkys were sold, mostly at Thanksgiving but some at Christmas (with gravy).

Realizing that the product had real potential, Seth contacted a lawyer and registered "Tofurky" as a trademark. This year (1996) the tofu is made by Island Spring in Vashon, Washington. When extra firm tofu was seasoned then baked, it froze quite well. The tofu is sent out in 8-oz blocks (each 3½ by 5 by ¾ inches)—not in the shape of a turkey or drumsticks. The drumettes are a little spicier, and come with cranberries, wild rice, carrots. This year the product is frozen but they are also test marketing it refrigerated. Several West Coast distributors carry the product. Now the whole package weighs 5 lb 15 oz; the wholesale price is \$24.95 to \$25.60, so it retails for about \$33-\$36. Last week, Seth sent out 50 press releases to print, radio, and TV sources. This year (1996) more than 800 have been sold already, and Seth expects total sales to reach 2,000 to 3,000. The 1996 ingredients in the Golden Mushroom gravy are: Water, nutritional yeast, expeller pressed canola oil, unbleached flour, chopped fresh mushrooms, diced onion, shoyu, herbs, spices, non-dairy lactic acid culture. Note: This gravy is delicious! Note: The following number of Tofurkys were sold: 800 in 1995, 4,000

in 1996, 15,000 in 1997, 45,000 in 1998, and an estimated 55,000 to 59,000 in 1999.

Who coined the word Tofurky? Seth didn't, though he was the first to spell it in that way, without an "e"—for two reasons: First, it was the right number of letters for a phone number. And second, he spelled it wrong the first time he wrote it and then kept repeating his mistake. Most people who hear the word for the first time spell it "Tofurkey" so Seth has had to purchase a second Internet domain name spelled "Tofurkey.com." Seth was also the first to register the name (by any spelling) as a trademark.

But at least four other people and groups probably coined the word "Tofurky" before Seth coined "Tofurky." (1) Jeremiah Ridenour believes that he coined it many years ago. (2) Peter Golbitz sent Seth a photo showing him with long hair and some Tofurky he made. (3) King Harvest Natural Foods in Portland, Oregon (see above). (4) A group of Rastafarians, black from inner-city Tacoma, Washington, had developed a very delicious barbecued tempeh, so Seth was exploring a co-packer arrangement.

After the first Tofurky season, when they heard on the news that Seth made Tofurky, they sent him a flaming e-mail saying it was bad karma for him to rip them off because they had invented the word "Tofurkey." They refused to shake Seth's hand. They now took him to be the white devil, so he left under that cloud. Jeremiah and Peter were friendly about it, but Jeremiah likes to joke with Seth about how Seth owes him several million dollars in royalties for use of his name "Tofurky." Seth now sometimes jokingly calls his business "Tofurky Island."

Leaflet (glossy color, 21.5 x 9.2 cm) sent by Patricia Smith from Natural Products Expo West. 1997. March. "Tofurky: A delicious vegetarian holiday feast." Explains Tofurky using a question and answer format.

Update on the original Tofurky, sold at Thanksgiving 1995. E-mail from Seth Tibbott to W. Shurtleff in reply to questions. 1. Yes, the golden box with brown text was the original box at Thanksgiving 1995. "We sold 500 of these then." Turtle Island did all the marketing and distribution for Tofurky that first Thanksgiving. The Higher Taste made the stuffed tofu roast and the nutritional yeast gravy. Turtle Island made the drumettes. The Golden mushroom gravy was in a sealed pint plastic container with a lid. All retailers sold the Tofurky frozen. The word "Feast" was first used in the name of the product printed on the box in about 1996. "The stuffed roast was originally made by the old hippy method: Season tofu, line colander with cheese cloth, add tofu, smash cavity in middle with fist. Add stuffing into cavity. Flip onto baking pan. Bake. The next year we went to Luke Lukoskie of Island Spring tofu on Vashon Island, Washington state. He made a custom turkey flavored baked tofu which went into a box with gravy, stuffing and drumettes. I have this box and will photo and send. The next year we teamed up with Mark Machlis of Meat of Wheat who had perfected these roasts

and they were injected into roast nettings. Will send you photos of this box as well. This was the first year of the basic formula which has remained the same basically though we have tweaked the process to make a better textured roast.

When Seth and Turtle Island left The Higher Ground to make Tofurky on their own, there were no hard feelings; they are still friends. Hans and his wife, Rhoda are great cooks and even better people and their business is still doing very well in Portland. They did not care for the Tofurky name but advocated for “Stuffed Holiday Roast” but they really had only a local market that they served in Portland and we were able to use Turtle Island’s distribution system, brokers and connections to launch the product on the West Coast and eventually throughout the USA. Address: Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: 541-386-7766 OF.

2955. Holin, Fae. 1996. Roundup Ready beans stir environmental boycott. *Soybean Digest*. Nov. p. 5.

• **Summary:** Jeremy Rifkin, president of the Foundation on Economic Trends, is leading this boycott in the USA and Europe of Monsanto’s genetically engineered (transgenic) Roundup Ready soybeans by asking consumers to boycott foods in which these soybeans appear unlabeled—such as Green Giant Harvest Burgers, Similac infant formula, and McDonald’s french fries (which may be fried in soybean oil).

Both the European Union and Japan recently approved the use of Roundup Ready soybeans in feed and food. “And one of Europe’s largest soybean processors, Oelmuhle Hamburg AG [in Germany], says it will begin importing and processing genetically modified U.S. beans this fall, despite Greenpeace protests.”

“Roundup Ready soybeans are being harvested for the first time this year from nearly 1 million acres. That’s predicted to increase tenfold next year.”

2956. **Product Name:** [Tofu, Tempeh, Soymilk, Soyshakes / Smoothies, Soysages].

**Foreign Name:** Tofu, Tempeh, Soymilk, Soyshakes / Smoothies, Soychicha.

**Manufacturer’s Name:** Organica-ecotienda.

**Manufacturer’s Address:** Xicotencatl 653-18, Col. Centro, Veracruz, VER 91700, Mexico. Phone: 29-31-30-83.

**Date of Introduction:** 1996 November.

**New Product–Documentation:** Letter and form filled out by Pat Hayward. 2000. Aug. 25. This company, managed by Pat Hayward and Claudia Gutierrez, makes and sells the above five soyfood products, which they introduced in Nov. 1997. Production of each in kg/month is as follows: Tofu 50. Tempeh 2. Soymilk 40. Soyshakes/Smoothies 40. Soychicha 10.

2957. Moore, John. 1996. New developments at Wholesome & Hearty Foods, Inc. (Interview). *SoyaScan Notes*. Dec. 2.

Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John is head of research and development at Wholesome & Hearty Foods in Oregon. His background and major interest is in wheat gluten. Wholesome & Hearty is now introducing its first soy burger, and is no longer making only non-soy products.

Michael Meek was a superb marketer; he was largely responsible for making the Gardenburger so widely available. He is now riding around America on a motorcycle, communicating regularly with John via e-mail. Address: Wholesome & Hearty Foods, 1005 S.E. Washington St., Portland, Oregon 97214. Phone: 503-796-0109.

2958. Holin, Fae. 1996. Getting sneaky with soy: How to use tofu without a family strike. *Soybean Digest*. Dec. p. 23, 27. In “Soyfoods Special Report” section.

• **Summary:** Describes how registered dietitian Anne Patterson slowly introduced tofu to her family, starting with desserts. She and her husband, Jim, own corn and soybean acreage in Illinois. Jim “doesn’t really like to see white tofu,” so Anne always disguises it—as by putting it in lasagna in place of ricotta cheese, or in other baked or main dishes to reduce the amount of oil or eggs used. She notes that the new lite or low-fat tofus are excellent. Also describes how to use tempeh, soy flour, soy beverage (soy milk) and TSP (TVP). Her family also likes the commercial soy burgers now widely sold in mainstream grocery stores.

Contains recipes for: Strawberry tofu fruit dip. Tofu basil pasta sauce on fettuccine.

2959. House Foods America Corporation. 1996. Hinoichi products (Leaflet). Los Angeles, California. 1 p. Single sided. 28 cm.

• **Summary:** This single-sided leaflet (8½ by 11 inches) shows a photo and gives a brief description of each of the company’s products, which fall into four categories: (1) Tofu: Regular tofu, 19 oz, water pack. Shelf life, refrigerated: 34 days. Regular tofu, 14 oz. Soft tofu (kinugoshi), 14 oz. Extra soft tofu, 14 oz. Firm tofu, 19 oz or 14 oz. Yaki tofu (broiled tofu), 9 oz. (Japanese label only)

(2) Age: Agé French fried tofu pouches, 6 pack (1.5 oz each). Oagesan 4-pack tofu pouches (1.1 oz each; Japanese label). Atsuage tofu cutlet (5 oz, Japanese label). Jumbo atsuage tofu cutlet (9 oz, Japanese label). Tofu fritter, large (Ganmodoki, 3 = 2.5 oz.). Tofu fritter, small (Ganmodoki, 8 = 2.5 oz.).

(3) Konnyaku: 6 products, incl. 3 Shirataki yam noodle [thin konnyaku noodles].

Natto: Natto fermented soybeans, 4 oz. Mamekozo natto fermented soybeans, 5.4 oz.

A separate but similar sheet shows foods made in Japan by House Foods and sold by House Foods America Corporation. These include Mabo Tofu Sauce (Medium hot or hot), Wasabi (horse radish paste), *Shichimi togarashi*

(red pepper mix), *rayu* (hot sesame oil), *Mugicha* (barley tea), stew mixes (beef or cream), and several curry sauces. Address: 526 Stanford Ave., Los Angeles, California 90013. Phone: (213) 624-3615.

**2960. Product Name:** Itsujo Vegetarian Health Food [Ham (Bacon Flavor, or Chicken Flavor) or Vienna Sausage (Bacon Flavor, or Chicken Flavor)].

**Manufacturer's Name:** Hwa Yuan Foods Co., Ltd.

**Manufacturer's Address:** 329, Chi-Li 2nd St., Kwan-Lien Industrial Area, Taichung port, Taiwan, R.O.C. Phone: (04) 639-3118.

**Date of Introduction:** 1996.

**Wt/Vol., Packaging, Price:** Ham (both flavors) in 500 gm or 1100 gm.

**New Product–Documentation:** Leaflet (8½ by 12 inch, color, single sided) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1997. March. “Low fat! Low cholesterol! All vegetarian.” A large color photo shows each of the products sliced on a white plate, with vegetables. Small color photos show each of the packaged products. These products are imported to the USA by Tony Chu, All Vegetarian Inc., 9649 Remer Street, S. El Monte, CA 91733; his business card is stapled to the leaflet.

**2961. Product Name:** [Tofu & Seitan Sausage].

**Foreign Name:** Brat-Knacky.

**Manufacturer's Name:** Topas GmbH (Product Developer-Marketer).

**Manufacturer's Address:** Bollbergstr. 41, 72116 Öschingen [near Tuebingen], Germany. Phone: 07473/25515. Fax: 07473/8320.

**Date of Introduction:** 1996.

**Ingredients:** Incl. tofu, seitan.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter (fax) from Klaus Gaiser, founder of Topas. 1996. Sept. 21. This is a sausage to be fried or grilled, made from tofu and seitan.

**2962. Product Name:** [Smoked Wheaty {Seitan Cold Cuts} (Sausage-like, Ham-like)].

**Foreign Name:** Wheaty vom Rauch.

**Manufacturer's Name:** Topas GmbH (Product Developer-Marketer).

**Manufacturer's Address:** Bollbergstr. 41, 72116 Öschingen [near Tuebingen], Germany. Phone: 07473/25515. Fax: 07473/8320.

**Date of Introduction:** 1996.

**Ingredients:** Incl. seitan.

**Wt/Vol., Packaging, Price:** Five slices of 20 gm each.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter (fax) from Klaus Gaiser, founder of Topas. 1996. Sept. 21. He describes this product, which he developed. It is manufactured by another

company.

**2963. Worthington Foods, Inc. 1996. Morningstar Farms: Number one in meatless (Portfolio). Worthington, Ohio. 4 inserts. Glossy color. 28 cm.**

• **Summary:** See next page. This portfolio was produced by the Morningstar Farms Foodservice Division. The inserts are: (1) Garden Vege Patties: The veggie burger with the best taste—Bar none! (2) Meatless / IQF Pizza Crumbles: So good, so convenient, and so much lower in fat, calories, cholesterol. (3) Morningstar Farms meatless restaurant guide (Shows most of the restaurant chains at which Morningstar Farms products are served, by region as follows: National. East, Southeast, Southwest, Midwest, Central, West). (4) Spicy Black Bean Burger: Knock-your-socks-off flavor and only 1.5 grams fat.

On the inside front cover is a full-page photo of Grillers and this text: “Entrees: Pre-cooked and frozen. No waste.” On the inside rear cover and fold-over portfolio flap are listed all Worthington-made foodservice products. Most are Morningstar Farm brand but a few are Natural Touch—but the brand is not given here. For each is given the name, a brief description, product number, case pack, case weight, and usually color photo of the prepared product. The products are: Breakfast Links. Breakfast Patties. Breakfast Strips [like bacon]. Garden Vege Patties. Crispy Patties. Garden Grain Patties. Spicy Black Bean Burger. Eggrolls. Okara Patties. Breaded Cutlets. Lentil Rice Loaf. Deli Franks. Better'n Burgers. VegiMax. Address: Worthington, Ohio.

**2964. Klingel, Brigitta. 1996. Neue vegetarische Rezeptideen. Tofuschnitzel, Gemueseburger & Co. Vegetarische alternativen zu Fisch, Fleisch und Gefluegel [New vegetarian recipe ideas. Tofu cutlets, vegetable burger & Co. Vegetarian alternatives to fish, meat, and poultry]. Munich, Germany: München Südwest Verlag. 95 p. Illust. (color photos). 21 cm. Series: Ernæhrungs-Ratgeber. [Ger]\***

**2965. Van Dolson, Bobbie Jane; Van Dolson, Leo R. eds. 1996. Seventh-day Adventist encyclopedia, 2nd rev. ed. 2 vols.: Harry Willis Miller (1879-1977). Hagerstown, Maryland: Review and Herald Publishing Assoc. See vol. 2, p. 71-72.**

• **Summary:** A good, detailed biography of Dr. Miller. “In later years Harry Miller worked seriously with the soybean. He made products that were tasty and practical. These included “vegeburgers,” “wieners,” and soy cheese [tofu]. His crowning accomplishment, however, was a tasty, affordable, nutritious soy milk, which literally saved the lives of many Chinese babies. Before his death Miller saw his grain-and-soybean-based foods adopted as alternatives to meat all over the world.

“In his 90s Harry Miller continued as a consultant to the World Health Organization and the Food and Agriculture

# Garden Vege Patties™

The Veggie Burger With The  
Best Taste... Bar None!

Organization of the United Nations, and still made frequent trips to eastern Asia.” Address: Washington, DC.

2966. Jacobi, Dana. 1997. Re: Delicious tofu and pressed tofu sheets made at Soo Chow, a Chinese restaurant in New York City. Letter (fax) to William Shurtleff at Soyfoods Center, Jan. 8. 1 p. Typed, without signature.

• **Summary:** This restaurant, located at One Chatham Square, in Chinatown, New York City, recently began serving tofu they claim to make themselves. “It certainly tastes fresh and has a wonderful texture. It is fine like a silken tofu but holds together like a soft regular tofu, but without any graininess or rubbery quality.” They sell this tofu, and also use it in preparing dishes like bean curd with shrimp.

A woman at the restaurant also makes a pressed tofu sheets [called *pai-yeh* or *ch'ien-chang* in Chinese]; each sheet is about ¼ inch thick and elastic. Originally Dana thought these were fresh and tender yuba. These sheets are used in only one dish sold at the restaurant, and are not sold separately.

Yuba (the thin, firm kind that is used to make “vegetarian duck”) is also used in at least one dish at this restaurant—Buddha’s Delight—together with the “homemade” tofu, enoki and shiitake mushrooms, shining noodles, Chinese vegetables, and a bit of seaweed. Some yuba can also be found in Chinatown stores, mostly refrigerated or frozen and not very good. The most frequent way one sees it served is in “vegetarian-duck.” Address: New York City.

2967. Brandt, Laura. 1997. The soy story: Making healthy taste better. *Food Formulating (Chilton’s)*. Jan. p. 46-47.

• **Summary:** The subtitle reads: “The recent news about soy’s health benefits is good. Getting Americans to incorporate soy into their diets is another matter. Improved soy ingredients make it easier for formulators to create new soy foods with better taste and texture.” Researchers that two isoflavones in soy, genistein and daidzein, provide many of the nutritional benefits, probably because they have properties similar to the hormone estrogen. “Several studies on peri- and post-menopausal women who consumed soy protein showed promising results toward alleviating menopausal symptoms and increasing bone density and bone mineral content. Soy supplementation (containing phytoestrogens) has been suggested as an alternative to still-controversial hormone replacement therapy.”

Central Soya now has a new, improved soy protein concentrate, Soyarich B. The number of U.S. vegetarians has more than doubled in the last decade to more than 15 million. For the consumer of soy burgers, taste and texture are more important than fat content.

Beverages are an easy way for consumers to add soy protein to their diets. Protein Technologies International makes Take Care, a high protein beverage powder based on Supro brand isolated soy protein. PTI’s latest isolate

product is Health Source, a refrigerated non-dairy, nonfat beverage that will be test marketed this spring. It will also be made into yogurt-style desserts. These will contain the daily requirements for calcium and vitamin C. Address: Technical Editor, Radnor, Pennsylvania.

2968. **Product Name:** Vege-Deli Vegetarian Slice of Life (Meatless Pepperoni) [Original, Zesty Italian, Hot n’ Spicy] and (Meatless Salami) [Original].

**Manufacturer’s Name:** Green Options, Inc.

**Manufacturer’s Address:** P.O. Box 881781, San Francisco, CA 94188-1781. Phone: 1-888-473-3667.

**Date of Introduction:** 1997 January.

**Ingredients:** Wheat protein [vital wheat gluten], water, nutritional yeast, soy oil, yeast extracts, natural liquid smoke, salt, spices, garlic powder, onion powder, citric acid.

**Wt/Vol., Packaging, Price:** Pepperoni: 10 oz. vacuum sealed chub pack. Salami: 3 lb for foodservice.

**How Stored:** Shelf stable, 6 month shelf life.

**New Product–Documentation:** Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1997. March. “For guilt-free pleasure, reach for a Vegetarian Slice of Life.” “95% fat free. No cholesterol. Vegetarian. Tastes great.” A photo shows packaged and sliced meatless sausages.

Talk with Mark Koperweis of Green Options. These products were launched in Jan. 1997. His company manufactures the products in San Francisco using vital wheat gluten. He bought the rights from Jerry Grotepas, owner or Dirk’s Gluten Works of Kamas, Utah. Jerry now works as a product developer for Green Options. Jerry first launched the product in Utah 4-5 years ago.

2969. Sullivan, Cheryl; Rhodes, Kathy. 1997. *Simply soy: A variety of choices*. Williamsburg, Virginia: Virginia Soybean Association. 118 p. Undated. Illust. Recipe index. 26 cm.

• **Summary:** Contents: Introducing soyfoods into your diet. The healthful soybean. Exploring soyfoods: Dried soybeans, fresh green soybeans, soy milk, tofu, textured soy protein, soy flour, soy grits, tempeh, miso, soy meat analogs. Where to find soy products. Nutrient information. Recipes: Breakfast, beverages, breads, appetizers & snacks, salads, soups, sandwiches, side dishes, main dishes, desserts.

Talk with Susan Haller of the Virginia Soybean Assoc. 2000. Nov. 9. This undated book was published about 3-4 years ago.

Talk with Cheryl Sullivan. 2002. Aug. 12. She wrote this booklet for the Michigan Soybean Promotion Committee; it was published in about Jan. 1997. It was never sold and is now available online at [www.soyfoods.com/SimplySoy](http://www.soyfoods.com/SimplySoy). Address: 1. M.A., R.D., Sullivan Nutrition Inc.; 2. PhD, R.D., Preventive Cardiology Program, Univ. of Michigan; c/o 151 Kristiansand Drive, Suite 115 E & F, Williamsburg, Virginia 23188. Phone: (757) 564-0153.

2970. Susman, Franz. 1997. Plans to build a wheat gluten factory in Slovenia (Interview). *SoyaScan Notes*. Jan. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Franz and investors plan to build a wheat gluten factory in Slovenia that will make 5,000 kg/day of gluten to be sold throughout Eastern and Western Europe. It will be cooked in large vessels. A large new starch factory in East Germany now produces 100,000 tonnes of vital gluten per year. That is as much as all other factories combined. Franz's company, named Dule (pronounced DUH-lay), will buy vital wheat gluten from that starch factory. He is also working to establish in Slovenia a task force for the study of gluten and soya combinations. He is also working with a company in Luxembourg, and a man named Huenermann, a German.

He ordered the bibliography on wheat gluten from Soyfoods Center and found it to be "enormously useful. It would not be possible to make our big factory without this book."

Update: 1998. March 30. The factory is not yet in operation, but it is progressing. The company will make vegan sausages containing wheat gluten and soy and sell them under the brand name Slovit. The price will be below that of typical meat sausages. Address: Slovenia.

2971. Behling, Ann. 1997. Soy product looks, tastes like chicken. *Soybean Digest*. Mid-Feb. p. 63.

• **Summary:** Fu-hung Hsieh, a University of Missouri scientist, has made a tasty meat analog product from soybeans with the taste, texture and appearance of chicken breast meat. The main ingredients are soy protein, soy flour and a bit of wheat starch. The product could be for sale commercially in a couple of years.

2972. **Product Name:** Chicken-Free Nuggets (Meatless).

**Manufacturer's Name:** Health Is Wealth, Inc.

**Manufacturer's Address:** 1051 Sykes Lane, P.O. Box 440, Williamstown, NJ 08094. Phone: 609-728-1998.

**Date of Introduction:** 1997 February.

**Ingredients:** 1999/08: Water, soy protein isolate, textured soy protein concentrate, potato starch, sea salt, granulated onion, dehydrated celery, spices, carrageenan, garlic powder, natural gum arabic, natural flavor, natural spice oils. Breaded with: Unbleached stone-ground whole wheat flour, fructose, yeast, sea salt, salt. Battered with: Water, yellow corn flour, corn starch, sea salt, spices, canola oil. Browned [deep-fried?] in soybean oil.

**Wt/Vol., Packaging, Price:** 12 oz paperboard box. Retail for \$4.59 (1999/08, Lafayette, California).

**How Stored:** Frozen.

**New Product–Documentation:** Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1997. March. A color photo shows the product Label. "Completely meatless. A soy

protein product. Stone ground whole wheat breaded. 100% vegetarian and vegan." Soy bean oil is one of the ingredients. Note: Many of the "natural" products sold by this company are made from real chickens, pigs, and cattle.

Product with Label purchased for \$4.59 at Safeway supermarket in Lafayette, California. 1999. Aug. 15. Sold in the frozen food case. 12 oz paperboard box. White and yellow on a dark green and black background. Color photo of five nuggets, with one broken in half to show the inside. "Reduced fat: 92% less fat than chicken nuggets. 100% vegetarian and vegan. Completely meatless. A soy protein product. Stone ground whole wheat breaded." "Distributed by Val Vasilef, Health is Wealth Products, Inc., 1051 Sykes Lane, Williamstown, New Jersey 08094."

Talk with Mike at Health is Wealth. 1999. Aug. 16. These nuggets were introduced in Feb. 1997; they are deep-fried in soy oil. Typical chicken nuggets are high in fat because they contain chicken skin ground up with the white chicken meat. The skin adds flavor and reduces cost; white chicken meat has very little flavor. This company was started about 20 years ago. Val Vasilef, who was Mr. America in the 1960s, teamed up with a guy who had a food company. Until 1990 all of their products were meat based. Now their meatless products are the fastest growing part of the business. They have 31 SKUs. Their three best-selling soy products are Chicken-Free Nuggets, Chicken-Free Patties (introduced Nov. 1997), and Munchees. Their newest soy product is Pierogi (also Pirogi), made of potato with a blend of soy cheese and cheddar cheese.

Soyfoods Center taste test: Good texture and package design but much too spicy for our tastes.

2973. Mangels, Reed. 1997. Vegetarian Journal's guide to breakfast "meats." *Vegetarian Journal (Baltimore, Maryland)*. Jan/Feb. p. 24-25.

• **Summary:** A large table gives a nutritional comparison of breakfast meats and meat alternatives in three categories: Bacon (2 alternatives), Canadian bacon (1), and sausage (9). The meatless meat alternatives are made from tofu, tempeh, and textured soy protein concentrate and wheat gluten. Address: Ph.D., R.D.

2974. **Product Name:** Soy meat Mealmaker (Formerly Cajun BBQ Style and Vegan Cajun Burger) [Original Spicy Flavor].

**Manufacturer's Name:** Soy Devine.

**Manufacturer's Address:** 1388 Haight St., Suite 222, San Francisco, CA 94117. Phone: (415) 339-8045.

**Date of Introduction:** 1997 February.

**Ingredients:** Organic nigari tofu\*, organic tomato sauce\*, fresh onion, filtered water, mustard, organic brown rice syrup\*, organic apple cider vinegar\*, Bragg Liquid Aminos, organic miso\*, organic peanut butter\*, fresh garlic, non-irradiated spices. \* = Grown in accordance with the

California Organic Foods Act of 1990.

**Wt/Vol., Packaging, Price:** 14 oz (392 gm) plastic tub. Wholesales for \$3.00. Bulk price (4 lbs. minimum): \$3.00/lb.  
**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Call from Martha Devine. 1997. Jan. 16. She left Arcata in April 1996 and is starting this month to make products in San Francisco in a new kitchen. She buys her tofu from Quong Hop. This product, which was launched in Jan. 1995 as Vegan Cajun Burger (On a Bun), has been renamed and repositioned.

Photocopy of Label sent by Martha Devine. 1997. Feb. 3. This product will be coming soon. Label: Top–3½ inches diameter. “Healthy delicious fast foods. A vegan diet is kinder to animals, people & the environment.” “Use meatless Soy meat Meal-Maker to replace the beef, pork, chicken, turkey, tuna, or sausage in dishes like: burritos, chili, enchiladas, nachos, tacos, tamale pie, tostadas, shepherd’s pie, lasagna, spaghetti, hero subs, sloppy joes, rice or noodle casseroles, or your own favorites! Pre-cooked. Delicious ‘as is’ or just heat & eat! Soy is joy.” Note: Mara changed her name back to Martha (her name at birth) in Dec. 1995.

2975. *Soybean Quarterly* (Nebraska Soybean Board, Lincoln, Nebraska). 1997. The New Weight Watchers frozen entrees. 3(1):5.

• **Summary:** Textured vegetable protein and soy protein concentrates are found in several of The New Weight Watchers frozen entrees, such as Grilled Salisbury Steak and Gravy, Swedish Meatballs in Cream Sauce with Noodles, and Spaghetti and Meat Sauce. Color photos show the labels of the 3 products. These weigh in at only 250-290 calories per dinner, with only 6-9 gm of fat per serving. For more information contact: Rosemary Pennington, quality assurance, Weight Watchers Gourmet Food Company, P.O. Box 10, Boise, Idaho 83707-010. Phone: (203) 407-3713.

2976. **Product Name:** Morningstar Farms Chik Nuggets.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1997 February.

**Ingredients:** Textured vegetable protein (soy protein concentrate and isolate), egg whites, wheat flour, water, corn oil...

**Wt/Vol., Packaging, Price:** 10.5 oz (298 gm) paperboard box. Retail for \$2.95 (1998/03, Lafayette, California).

**How Stored:** Frozen.

**New Product–Documentation:** Worthington Foods. First quarter financial report. 1997. April. Three new Morningstar Farms products were introduced into selected U.S. markets starting on 17 Feb. 1997: Chik Nuggets...

Product with Label purchased at Safeway supermarket in Lafayette, California. 1998. March 22. It is sold in the “Breakfast Foods” freezer. 8 by 4 by 2.5 inches. Paperboard

box. Blue, yellow, red, and white on green. A color photo shows many nuggets on a white plate around a bowl of red dipping sauce, with a sprig of parsley. “Vegetable and grain protein nuggets. 75% less fat than chicken nuggets.” A new slogan (registered trademark) appears on both sides: “The change will do you good.” On the back panel a table compares meatless Chik Nuggets with meat chicken nuggets: Cholesterol: 0 vs. 45 mg. Total fat: 4 vs. 17 gm. Saturated fat: 0.5 vs. 4 gm. A small logo on the back has a leaflike green “V” inside the circular words “Suitable for vegetarians.”

Note: By 26 April 1998 the price at Safeway had increased to \$3.19 from \$2.95. By March 10 1999 the price had increase to \$3.59. The package has been redesigned with the new Morning Star farms logo to create a brand “umbrella.” The front panel text now reads: “75% less fat than chicken nuggets. See Nutrition Information for Sodium Content. Veggie nuggets.” Soyfoods Center taste test. The texture and flavor are very good but these Chik Nuggets are much too salty! Four nuggets contain a whopping 670 mg of sodium, or 28% of the recommended Daily Value.

2977. Wight, Karen James. 1997. Work with tempeh and tofu at Homeland Foundation in Australia (Interview).

*SoyaScan Notes*. March 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Karen arrived at Homeland Foundation in Australia in either late December 1981 or early 1982 (she no longer has her passport from that era). She lived in Australia for 6½ months, during which she lived at Homeland Foundation for 3½ months. Homeland was located at Upper Thora, in the Bellingen Valley, about 40 miles inland from Coffs Harbour, near the east coast of New South Wales. The area was incredibly lush, green, and fertile.

She left southern California in August 1981 (after leaving a professorship at UCLA), spent 2 months in Hawaii studying body work, then flew to Sydney (the capital of New South Wales), arriving in about October 1981. She met Jonathan Gordon at a community in a hotel just outside of Sydney, where they stayed for about a month. Then they stayed at a community in Victoria for about 1 month. They spent Christmas in Melbourne—where the only thing offered to eat was meat. Then they went directly to Homeland. They wanted to go there because Jonathan had been to Findhorn (a spiritual community in northern Scotland), and he knew some of the Findhorn people who had started Homeland.

Karen is sure the company that made tofu, tempeh and sprouts (mainly alfalfa and mung bean sprouts; no soy sprouts) had a name (but she cannot remember what it was) because they sold products commercially outside the community in order to earn income for Homeland Foundation. The equipment was new and gorgeous; the sprouting room was very modern, sanitary, and well organized. The company made good use of the okara—a by-

product from making tofu; they used it to make delicious okara granola and soysage. These two products were consumed mostly in the community and by friends; they were not sold.

Karen has no idea when Homeland was established or when they started to make tempeh and tofu. She would guess they had been making and selling soyfoods for at least a number of months, and perhaps a year or two. She thinks it is fairly likely that they were making tempeh by January 1981. They had clearly built it into a very productive and well-organized operation. Karen is quite sure that they started making tempeh after tofu production was well established.

The tofu and tempeh were made in the same small room, but each was made by different people; Karen made tofu more than tempeh. They made tempeh in an incubator that was the size of a refrigerator—about 30-40 pounds at a time, approximately twice a week. Tofu was made daily. Only soy tempeh was made. They may have learned both the tempeh and tofu processes from one of the many people who came regularly from Findhorn. The various people who were head of the community had all been to Findhorn. Karen remembers getting up at 2:00 in the morning to make tempeh. She wishes Jonathan would write a book about spirituality, service, cooking, and food. Address: 2333½ Rodriguez Rd., Santa Fe, New Mexico 87501. Phone: 505-982-4765.

**2978. Product Name:** Let's Do Lunch.

**Manufacturer's Name:** Edward & Sons.

**Manufacturer's Address:** P.O. Box 1326, Carpinteria, CA 93014.

**Date of Introduction:** 1997 March.

**Ingredients:** Apple cider vinegar\*, tamari\* (water, wheat, soybeans, salt), molasses\*, filtered well water, wheat syrup\*, salt, tamarind\*, ginger root\*, lemon juice concentrate, garlic\*, spices\*, xanthan gum, shiitake mushrooms\*, citrus extracts\*, spice extract\*, natural smoke flavor.

**Wt/Vol., Packaging, Price:** 5 oz, 10 oz, and 8.5 oz bottle.

**How Stored:** Shelf stable.

**New Product–Documentation:** Sell sheet (8½ by 11 inch, black on light gray) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1997. March. "Lunch is ready!" It consists of natural Ham Style Meatless Slices, Monterey jack cheese, wheat crackers made with organic flour, and natural chocolate raisins—all packed in a lunch box and ready to go.

**2979. Product Name:** Hain Pure Foods Vegetarian Classics: Hawaiian Nuggets Served with Pineapple & Basmati Rice.

**Manufacturer's Name:** Hain Food Group (Marketer-Distributor).

**Manufacturer's Address:** Uniondale, New York.

**Date of Introduction:** 1997 March.

**Ingredients:** Water, soy protein, wheat gluten, basmati

rice, spice, natural flavor, pineapple juice concentrate, diced pineapple, tomato paste, apple cider vinegar, carrageenan (from seaweed), egg white powder, expeller pressed soy and canola oils, wheat bran, honey, turmeric (for color).

**Wt/Vol., Packaging, Price:** 10 oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Product with Label purchased from Berkeley Natural Grocery Co. 1997. May.

**2980. Product Name:** Meat Free Tender Deli Cuts (Fat Free) [Hickory Smoked Turkey Flavor, Peppercorn Chicken Flavor, Honey Smoked Ham Flavor].

**Manufacturer's Name:** Soyco Foods. Div. of Galaxy Cheese Co.

**Manufacturer's Address:** 2441 Viscount Row, Orlando, FL 32809. Phone: 800-441-9419.

**Date of Introduction:** 1997 March.

**Ingredients:** Hickory Smoked Turkey: Soy beverage (filtered water, isolated soy protein, organic tofu\*), rice & tapioca maltodextrins, maltodextrin, rice protein, carrageenan (sea weed gum), sea salt, xanthan gum, Florida Crystals (unbleached sugar), natural flavorings, citric acid, acetic acid.

**Wt/Vol., Packaging, Price:** 6 oz. for 6 singles.

**How Stored:** Refrigerated.

**New Product–Documentation:** Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1997. March. The front panel states: "Individually wrapped meat slices for maximum freshness. Enjoy the flavor of meat again. All natural. Vegetable based. 100% meat free." A color photo shows the front of each package and label. The back panel states: "Enjoy the great taste of meat with Soymage Meat Free Deli Cuts." Note 1. These are slices of soy cheese that are flavored and colored like meat. The company is trying to present its cheese alternative as a meat alternative—somewhat deceptively we believe. Note 2. Galaxy Cheese Co. has been publicly traded for the past 5-7 years. The symbol on Nasdaq is GALX. They have done 7-8 stock offerings and sold about \$40 million worth of stock. Much of the stock is said to be sold to non-U.S. citizens and as private placements to sophisticated investors.

**2981. Springhill Farm Foods, Inc.** 1997. Hearty & Natural—Products and prices. Minneapolis, Minnesota. 7 p. 28 cm.

• **Summary:** Catalog (black-and-white, photocopy) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1997. March. Lines include Natures Best, Tree of Life West, and Stonecrest Natural Foods. Most products contain soy protein; all are vegetarian. A spot in Healthy and Natural Product News (March 1997; Vol. 4, Issue 2) shows their Hearty & Natural "Veggie Chicken" prepared patties. Address: 9220 Isanti Street NE, Minneapolis, Minnesota 55449. Phone: 612-785-8845.

2982. Taifun-Produkte. 1997. Tofu-Würstchen. Tofu-Clipper [Little Tofu Sausage. Tofu Clipper (Leaflet)]. Freiburg, West Germany. 1 p. each, Front and back. 30 cm. [Ger]

• **Summary:** Two leaflets from Taifun Naturkost. The “Little Sausages” leaflet is printed black and gray on yellow paper. The Tofu-Clipper is printed black and gray on pink. Tofu Clipper comes in 3 flavors: Flamingo, Shiitake, and Village. Address: Bebelstrasse 8, 79108 Freiburg, West Germany. Phone: 0761 / 15210-0.

2983. **Product Name:** Nature’s Ground (Meatless Hamburger) [Chubs, or Sausage Links; Mexicana Pepper, Italian Herb, or California Savory].

**Manufacturer’s Name:** Vegetarian, Inc.

**Manufacturer’s Address:** 405 Allerton Avenue, South San Francisco, California 94080. Phone: 1-888-328-4543 (toll free).

**Date of Introduction:** 1997 March.

**Ingredients:** California savory: Water, textured soy protein concentrate, vital wheat gluten, isolated soy protein, dry molasses, tomato paste, nutritional yeast, natural grill flavor, sea salt, soy sauce, dried tomato, basil, spices, modified vegetable gum, natural sodium lactate.

**Wt/Vol., Packaging, Price:** 14 oz chub.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1997. March. “Nature’s Ground Meatless–The tasty alternative to ground beef.” “Zero fat. All natural. Meat free. Great taste.” A photo shows a man holding a burger with a woman’s face next to his.

Talk with Robin Lucky, consultant and national sales manager. 1997. May 22. This product was launched on 1 April 1997. It is a ground meat alternative sold in chub packs. Taste tests show it is the best on the market. The soy ingredient is tofu powder [sic, it is actually textured soy protein concentrate; the product contains no tofu]. Talk #2 with Robin Lucky. 1997. This product is now being distributed by Frieda’s and Melissa’s. Safeway is considering carrying it.

Products (3) with Labels sent by Elite Foods, Inc., 489 Cabot Road, South San Francisco, CA 94080. Phone: 415-871-0826. 1997. June 12. Soyfoods Center Taste Test of Italian Herb. 1997. June 12. The product comes in a sausage-shaped chub pack about 6 inches long and 2 inches in diameter. The texture is mushy; it cannot be cut. The color is brown. Thus, the shape and color give it the striking and unappetizing appearance of a large, fresh–guess what! The first whiff of aroma reminds us of dog food. It is also too spicy for our tastes. A poor, embarrassing product! Talk with Robin Lucky. 1997. July 7. California Savory outsells the other two flavors 2 to 1. Ground beef is now widely sold in this chub pack. A leader in the meatless category, and a

similar product, is Gimme Lean.

2984. Viana Naturkost GmbH. 1997. Preise und Neues [Prices and new products]. Euskirchen, Germany. 28 p. 30 cm. [Ger]

• **Summary:** This impressive, stylish/classy color catalog from Biofach, March 1997, consists of two parts. The 20-page smaller format (26.5 cm) black-and-white insert gives the prices of all products for 1997. The larger color catalog describes new products. The price list contains the following product categories: Basic and seasoned tofu products. Fresh tofu spreads. Tofu hot dogs. Wheat gluten products. Tofu cutlets. Tempeh. Seitan. Burgers and snacks. Spreads in glass jars. Soy sauce and miso products (organic shoyu, organic tamari, barley miso, brown rice miso). Fresh patés. Deli salads. Soya mayonnaise (Vianaise). Rice drink. Noodles. Fresh pasta stuffed with tofu fillings (Tortellini, Maultaschen). Frozen products (incl. Chili con tofu and spring rolls). Sprouts (11 types & products, not incl. soy sprouts). Spreads from Noka. Canned products (*Konserven*). Address: Willi-Graf-Str. 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: 02251-9446-0.

2985. Worthington Foods, Inc. 1997. Annual report 1996. 900 Proprietors Rd., Worthington, OH 43085. 20 p. 28 cm.

• **Summary:** See next page. Total sales rose to \$109.1 million in 1996, up 19.8% from \$91.1 million in 1995. This is the first time the company’s sales have topped the \$100 million mark. Net income (profit) rose to \$7.393 million in 1996, up 41.3% from \$5.230 million in 1995. Earnings per share rose to \$0.83 in 1996, up 38% from \$0.60 in 1995.

The company’s statements of mission, vision, and values are a model of good sense, good judgment, and traditional values. “Our mission–Worthington Foods is solely dedicated to producing and marketing vegetarian and other healthful foods.

“Our vision–We envision ‘veggie burgers’ becoming a billion dollar mainstream food category within the next ten years, with our Company continuing to be the leader.

“Our values–More than just an organization to make money, Worthington Foods holds, without compromise, our core values summarized in G.R.I.P. Good taste–good nutrition. Respect for our employees. Integrity is more important than profits. People are whole beings.” Each is explained briefly.

“The increased sales were primarily driven by Morningstar Farms meat alternative products in retail supermarkets and foodservice operations.”

“For each of the past seven quarters, retail sales of Morningstar Farms meat alternatives have exceeded sales of prior year quarters by 25 percent, while foodservice sales grew at a rate exceeding 40 percent for the past year.”

“Worthington Foods introduced a record 21 new products this year. All of these products meet our criteria for

W O R T H I N G T O N F O O D S

1 9 9 6 A N N U A L R E P O R T

Allan R. Buller

Dale E. Twomley

new products: Good taste, low or reduced fat, and convenience.”

Note: The 21 new products are: Morningstar Farms (MSF) fat free ground patties. MSF low fat prime patties. Two MSF veggie burger kits (Garden grille, and Southwestern). Roasted SoyButter [soynut butter] (MSF & Natural Touch). Natural Touch spicy black bean [non-soy] burgers. Three low fat Worthington products (Low fat FriChik, Low fat Veja Links, and Low fat Chili). Natural Touch vegan burger & sausage crumbles. Kaffree Roma Cappuccino. Foodservice pizza and burger crumbles. Three MSF breakfast sandwiches (Scramblers, sausage & cheese on English muffin; Scramblers & sausage on Enlace muffin; Scramblers, sausage & cheese on bagel). Three MSF refrigerated meat case products (Low fat prime patties, Spicy black bean

burgers, Garden veggie patty).

“*Chik Nuggets*, an absolutely delicious chicken-like nugget with 75 percent less fat than nuggets made of real chicken, was introduced in February, 1997” (p. 2).

“Worthington Foods is the world’s largest company dedicated solely to the manufacture and marketing of vegetarian foods and other healthful items. Since its start in 1939, Worthington Foods has become the market leader in quality and innovation in the rapidly growing \$250-million category for meat alternatives” (p. 4).

“Over the past five years, Worthington Foods’ sales to Foodservice accounts have been the Company’s fastest growing market. Posting sales gains of more than 40% in 1996, our Foodservice sales topped \$12-million” (p. 7).

Color photos show: (1) The packages of 6 Morningstar Farms meatless products plus Fat Free Scramblers (cover). (2) Portraits of Allan R. Buller and Dale E. Twomley (p. 2). Five Natural Touch and three Worthington canned products.

A “Notice of annual meeting of shareholders” (23 p.) is attached. Address: Worthington, Ohio. Phone: (614) 885-9511.

2986. **Product Name:** Smoky Tempeh Strips (Marinated, Vegetarian): Fakin’ Bacon.

**Manufacturer’s Name:** Lightlife Foods, Inc.

**Manufacturer’s Address:** P.O. Box 870, Greenfield, MA 01302. Phone: 1-800-274-6001.

**Date of Introduction:** 1997 April.

**Ingredients:** Soy tempeh (organic soybeans, water, brown rice, tempeh culture), water, soy sauce, vinegar, honey, spices, beet powder, natural vegetable flavor, salt, natural hickory flavor.

**Wt/Vol., Packaging, Price:** 6 oz (170 gm) vacuum pack. Retail for \$1.99 (1998/02, Lafayette, California).

**How Stored:** Refrigerated or frozen.

**Nutrition:** Per 3 slices (57 gm): Calories 80, calories from fat 25, total fat 2.5 gm (7% daily value; saturated fat 0.5 gm), cholesterol 0 mg, sodium 230 mg (9%), total carbohydrate 6 gm (dietary fiber 1 gm, sugars 0 gm), protein 8 gm. Calcium 9%, iron 5%, vitamin A 2%, vitamin C 1%. Percent daily values are based on a 2,000 calorie diet.

**New Product–Documentation:** Product with Label purchased at Safeway supermarket in Lafayette, California. 1998. Feb. 22. Price: \$1.99. The product is a marinated cake of tempeh, about 2½ by 7½ inches, cut lengthwise into thin slices. The bold name at the top of the back panel is “Fakin’ Bacon.” Label: 4 by 9 inches. Plastic shrink wrap. Red, yellow, and white on brown. Front panel: “Low fat. Cholesterol free.” Back panel: Lightlife Fakin’ Bacon has no cholesterol, 90% less fat than bacon, 60% less sodium, and no nitrates!

2987. *Might (Canada)*. 1997. Tracking Dead fans through the world without Jerry: Things to do in Telluride when Jerry’s Dead. No. 15. March/April. Music section.

• **Summary:** This article is written for fans of the rock group Grateful Dead, whose famous and beloved guitar player Jerry Garcia died on 9 Aug. 1995. “Things to do in a parking lot, any parking lot... Eat tempeh burgers... Eat veggie burritos.”

2988. Raymond, Jennifer. 1997. Fat free & easy: Great meals in minutes! No added fat. No cholesterol. No animal ingredients. Calistoga, California: Heart & Soul Publications. 152 p. Recipe index. 26 cm.

• **Summary:** A very useful vegan cookbook. Contents: Introduction. Health consequences of high-fat diets. How much fat should you eat? Calculating your fat intake. Sources of fat in food. Fats are not created equal. Tips for cutting the fat. Meeting your protein needs. Problems with excess protein. Protein myths and facts. Salt. Menu planning and menu ideas. Stocking your pantry. Ingredients that may be new to you. Recipes: Breakfast foods, breads & muffins, sandwiches, sauces & spreads, salads & dressings, soups & stews, vegetables, grains & side dishes, main dishes, sweets.

In this book, all recipes that would typically call for milk (such as smoothies or pancakes), call for “soy milk or rice milk.” Many recipes are seasoned with soy sauce. Other soy-related recipes include: Scrambled tofu (p. 33). Missing egg salad (with tofu, p. 47). Creamy cucumber dip (with tofu, p. 49). Cucumbers with creamy dill dressing (with tofu, p. 61, 66). Holiday tofu roast (p. 113). Truly terrific tacos (with

Boca Burgers, p. 119). Tofu cheesecake (p. 133). Chocolate tofu pudding (p. 136). Creamy prune pudding (with tofu, p. 139). A photo (p. 151) shows Jennifer Raymond, her husband Stephen Avis, and their five dogs. Address: 1418 Cedar St., Calistoga, California 94515. Phone: 707-942-2180.

2989. **Product Name:** Nature's Ground (Meatless Hamburger) [Chubs, or Sausage Links; Mexican, Italian, or California Savory].

**Manufacturer's Name:** Sinclair Group (The) (Product Developer-Marketer).

**Manufacturer's Address:** 533 Airport Blvd., Suite 521, Burlingame CA 94010.

**Date of Introduction:** 1997 April.

**New Product–Documentation:** Talk with Robin Lucky, consultant. 1997. March 31. This product will be launched on 1 April 1997. There will be 6 SKUs; the three links will be like large sausages that can fit between hot dog buns. Dwight Sinclair is head of this new company. She now works as a consultant but hopes to join the company.

2990. Worthington Foods, Inc. 1997. First quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. 22 x 9 cm.

• **Summary:** Net sales for the first quarter of 1996 rose 8.8% over the same period in 1995, net income rose 44%, and earnings per share rose 40%—to \$0.21 per share. Three new Morningstar Farms products were introduced into selected U.S. markets starting on 17 Feb. 1997: Chik Nuggets, Burger Crumbles for Recipes, and Sausage Crumbles for Recipes. Garden Grain Patties have now been reformulated to contain portabella mushrooms and are now called Garden Grille.

At the Annual Meeting of Shareholders in April, the number of authorized shares of common stock was increased to 30 million. Address: Worthington, Ohio. Phone: (614) 885-9511.

2991. Mack, Heidi. 1997. Tofu doesn't have to be yucky: Disguise it, change its texture, and you might even fool Godzilla. *Christian Science Monitor*. May 8. p. 14.

• **Summary:** During the past few years, the number of soy products available to consumers “has grown phenomenally.” They include soy yogurt, soy ice cream, soy milk, tofu turkey and pastrami, tofu salad dressing and mayonnaise, soy flour, vegetarian Philly steak and Sloppy Joes, tofu dogs, tofu burgers, and soy cheese.

The author, a vegetarian for 15 years, admits a genuine dislike of tofu. However she discovered that freezing it for at least a week, to transform its soggy texture, squeezing the water out of the tofu by hand, and then marinating it, made all the difference. Now she makes Tofu Taco Meat using frozen tofu instead of meat, and her family likes it in tacos, burritos, chili, spaghetti, and taco salad. Friends and family no longer stop at McDonalds on the way to her house.

Contains recipes for Barbecued tofu, Barbecue sauce, Spicy peanut tofu, and Tofu taco meat.

2992. Burros, Marian. 1997. Trying to get labels on genetically altered food: Eating well. *New York Times*. May 21. p. B8.

• **Summary:** In December 1996, Whole Foods Market (WFM), the largest natural foods supermarket chain in America, sent a letter to more than 400 of its suppliers asking if their products contained genetically engineered ingredients. About 75% of the suppliers have not yet responded—According to Margaret Wittenburg, quality assurance director of WFM; she wrote the letter. More soybeans are genetically engineered than any other food crop. “They [most Americans] have no idea what foods on their supermarket shelves contain genetically engineered ingredients because the Government does not require those products to be labeled. A small but growing movement of people is pushing for that to change.”

“Europeans have been quicker than American to react to transgenic food... In Austria and Luxembourg genetically engineered food is banned. Most observers suggest that Europe's response is so much more intense because of the European experience with mad cow disease.”

“There are signs that the consumer movement is gaining momentum. Nebraska and Maine are considering legislation for labeling. Mothers for Natural Law, a nonprofit consumer advocacy group, has begun a public awareness campaign. The group, which is affiliated with the Natural Law Party, which promotes transcendental mediation, wants to collect a million signatures on a petition asking the Food and Drug Administration to require testing and labeling of transgenic foods.”

The article then asks how widespread transgenic foods are in U.S. supermarkets. “[The *Times*] asked Genetic ID, a company in Fairfield, Iowa, that tests foods for genetically engineered ingredients, to test four soy-based baby formulas and eight other products made with soy or corn. The infant formulas—Carnation Alsoy, Similac Neocare, Isomil and Enfamil Prosobee—all tested positive. Eden Soy milk tested negative. Morningstar Farms Breakfast Links and Morningstar Farms Better 'n Burgers, Betty Crocker Bac-os Bacon Bits, all soy-based products, also tested positive. And so did three corn-based chips—Fritos, Tostitos Crispy Rounds and Doritos Nacho Cheesier.”

2993. Tibbott, Seth. 1997. The tempeh market in the United States (Interview). *SoyaScan Notes*. May 29. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** A total of about 55,000 lb/week of tempeh is now made in the USA, compared with 34,700 lb/week in Jan. 1984 (based on a Soyfoods Center survey, published in *Soyfoods Industry and Market*, 5th ed.). This is the result of a major phone survey that Seth has just completed; he

interviewed each of the major U.S. tempeh makers by phone, on the condition that their individual production figures would not be revealed—only the aggregate. Seth plans to present this information at a tempeh conference in Bali, Indonesia, on July 17. Seven U.S. companies make more than 1,000 lb/week of tempeh. The top 3 manufacturers are Lightlife Foods, White Wave, and Turtle Island (in that order). Of these three, Turtle Island has experienced the greatest percentage growth since 1984. The next four are Quong Hop, Surata Soyfoods, Northern Soy, and Cricklewood. In 1984 the four largest tempeh makers had 63% of the U.S. market (by weight); now they have 84%. The best-selling type of product is soy tempeh in an 8-oz package; it sells even better than tempeh burgers.

The average retail price of an 8-oz package of tempeh in the USA is \$1.81. Shurtleff suggests that Seth compare this with the price in Indonesia. The yearly per capita income in Indonesia is \$560 compared with \$18,690 in the USA. The U.S. figure is 33.37 times as large as the Indonesian. Dividing \$1.81 by 33.37 we see that if tempeh sold for 5.42 cents per 8 oz in Indonesia, it would be the same relative price as tempeh in the USA.

In terms of packaging, 80% of the tempeh in America is vacuum packed—even though most manufacturers admit that vacuum packaging lowers the product quality by imparting a slightly bitter flavor and less desirable texture. Seth's company is one of the few that does not vacuum pack its tempeh.

By product type, there are: 13 different burgers on the market, 9 soy tempehs, 6 multi-grain tempehs (soy plus several cereal grains), 5 bulk soy tempehs, 4 soy & brown rice tempehs, 2 soy & sea veggie tempehs, 2 soy & wild rice tempehs, 2 soy & millet tempehs, and 2 sloppy joe tempehs.

Seth plans to take his family to the Conference in Bali (he will be there July 11-20; the conference ends July 15), and then to travel to Malang to study how tempeh is made there. They will leave Indonesia on July 29. Address: Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: (503) 386-7766.

2994. Bean Supreme Ltd. 1997. Price list with sale. Auckland, New Zealand. 1 p. Single sided. 30 cm.

• **Summary:** Effective 20 June 1997. Black on yellow. The products are listed in categories except for the first, which is soyfoods. For each is given the product name, weight, price, barcode, outer, and price. Tofu bulk organic. Tofu firm vacuum pack. Tofu firm vacuum pack organic. Tofu soft Asian. Tempeh vacuum pack. Tempeh fr. frozen. Soysage. Luncheon [Traditional, Cajun, Smoke]. Tempeh patty frozen. Meatfree sausage.

Soymilks: Soyplus 1 liter. LiteLicks [soy ice cream] (Honey Vanilla, Wildberry, Maple Walnut, Chocolate, Fruit Fiesta, Almond Fudge, Bulk packs) (9 or 16 liters).

Biofarm yoghurts (5 flavors). Malabar goat yoghurt.

Olive Grove: Falafel mix, hoummus, Souvlaki sauce, tahini.

Koromiko cheese (11 types, of which the first 4 are vegetarian). Koromiko wax selection (private bin). Pacific Harvest: Agar, kelp and karengo granules, fronds, or flakes. Address: Box 12082, 140 Hugo Johnson Dr., Penrose, Auckland, New Zealand. Phone: 64 09 579 0592.

2995. **Product Name:** Orange Peel Soy Chick with Organic Brown Rice (Vegetarian).

**Manufacturer's Name:** Gloria's Kitchen.

**Manufacturer's Address:** P.O. Box 2071, Burlingame, CA 94011-2071. Phone: 650-579-0638.

**Date of Introduction:** 1997 June.

**Ingredients:** Organic\* brown rice, textured vegetable protein (soy bean flour), garlic, vinegar, soy sauce (water, wheat, soybeans, salt), orange juice, granulated cane juice, lemon juice, orange peel, sesame seeds, cornstarch, organic\* whole wheat flour, expeller-pressed canola oil, cayenne pepper, natural herbs and spices.

**Wt/Vol., Packaging, Price:** 10 oz (284 gm) paperboard box. Retail for \$4.39 (1999/04, Lafayette, California).

**How Stored:** Frozen.

**New Product—Documentation:** Product with Label purchased at Open Sesame, Lafayette, California. 1999. April 20. 7.25 by 5.25 by 1.75 inch paperboard box. Red, white, black, green, and yellow. Large photo of the prepared product, showing the balls, with glaze and sesame seeds on a bed of brown rice. Front panel text: "Vegetarian. Vegan. All natural. Low fat. Microwave or conventional oven." Back panel: "The Gloria story—who's cooking in the melting pot."

2996. Harvest Direct, Inc. 1997. Harvest Direct: Food you can live with. Early summer 1997 [mail order catalog]. Knoxville, Tennessee. 31 p. 27 x 16 cm.

• **Summary:** Written large at bottom of front cover: Soyfoods. Vegetarian foods. Vegetarian barbecue. New meatless pepperoni. More special sales items. Address: P.O. Box 988, Knoxville, Tennessee 37917. Phone: 1-800-835-2867.

2997. **Product Name:** Tofu-Mexi Patties: 2 Baked.

**Manufacturer's Name:** Tofu Shop Specialty Foods Inc.

**Manufacturer's Address:** 100 Ericson Ct., Suite 150, Arcata, CA 95521. Phone: 707-822-7409.

**Date of Introduction:** 1997 June.

**Ingredients:** Tofu (filtered water, organic whole soybeans\*, nigari), fresh jalapeño peppers, carrots, cilantro, garlic, soy sauce (water, organic soybeans\*, organic wheat\*, salt), lime juice, arrowroot powder, sunflower seeds, celery, green onions, distilled vinegar, chili powder, cumin, salt. \* = Grown according to CA Natural Foods Act of 1990.

**Wt/Vol., Packaging, Price:** 6 oz. vacuum packed.

**How Stored:** Refrigerated.

**New Product—Documentation:** Two Labels sent by

Matthew Schmit. 2002. Sept. 9. The product was introduced in June 1997. Label #1 of June 1997. 3 inches diameter. Self adhesive. Red, black, and white on yellow. "Perishable, keep refrigerated. Good source of protein. Low in saturated fat. Cholesterol free. Illustration of an adobe pueblo overlooking waves and two stylized native American animals (rabbit and squirrel).

Label #2 of Oct. 2002. "Mexi Patties: Baked Tofu." Red and orange-yellow on white. 3 inches diameter. No adhesive. A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff with a tree arching overhead. "Good source of protein. Low in saturated fat. Cholesterol free."

2998. **Product Name:** Stir Fry (Meatless, Made from Seitan) [Italian Style, Thai Peanut, Chick'n & Herbs, Mexican Fajita Strips].

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 1990 N. 57th Ct., Boulder, CO 80301. Phone: 303-443-3470.

**Date of Introduction:** 1997 June.

**Ingredients:** Mexican Fajita Strips: Wheat gluten, water, soy flour, garbanzo bean flour, soy sauce (water, soybeans, wheat, salt), granulated garlic, xanthan gum, spices, lime juice concentrate, honey, natural liquid hickory smoke.

**Wt/Vol., Packaging, Price:** 6 to 8.75 oz paperboard box.

**How Stored:** Refrigerated.

**New Product–Documentation:** Leaflet (13.5 x 20.5 cm, glossy color) sent by White Wave. 1997. June. "Five great reasons to eat at home." A photo shows four colorful packages of Stir Fry. "The fifth reason? How about a delicious meal in minutes? White Wave's new marinated vegetarian seitan entrees."

# Now your soy set can be as effective as it is appetizing.

## Introducing Lightlife's "Eating Healthy Can Be Soy Easy" Merchandising Program

As many as 120 million people are on meat restrictive diets...and just about everybody else wants to cut cholesterol and fat. Soyfoods, for many of these people, are becoming one of their basic food groups. These consumers are spending more of their food dollar in the produce department and that's why a Lightlife soy set in your produce section makes sense...and sales. **Only Lightlife** provides a fully integrated, complete merchandising system...the first to combine a full line of convenient, ready-to-cook soy based foods, high visibility P.O.P. graphics, and consumer information

to educate consumers about the health benefits of soy.

As a leading producer of meatless soy based products, Lightlife delivers satisfying flavor through an entire line of mouthwatering vegetarian replacements for hot dogs, burgers, sausage, luncheon meats, ground meat, and tempeh.

Put a full Lightlife soy set in your produce section...where eating healthy is in style. All you have to do is get ready for healthier sales.

**WHY LIGHTLIFE? PROVEN CATEGORY LEADER ■ MERCHANDISING SUPPORT ■ NO SPOILAGE**

of food that is convenient, cholesterol-free, low in fat of fat free, and made entirely from vegetable sources. Now our 'Veggie Lifestyle' is catching on—and its happening in *your* produce section.

“Yves Veggie Cuisine leading the way in creating food for a new generation.”

3006. Yves Veggie Cuisine. 1997. Introducing Just Like Ground! Our new premium meatless ground round (Ad). *Vegetarian Times*. July. p. 65.

• **Summary:** A full-page color ad. This new fat-free product comes in Italian and Original. Address: Vancouver, BC V6A 2A8, Canada.

3007. **Product Name:** [Soya Burger, and Soya Barbecue]. **Manufacturer's Name:** Zographos-Dietetic Products SACI. **Manufacturer's Address:** 32 Chris. Smyrnis Str., 185 40 Piraeus, Greece. Phone: +30 (0)1 422-0320.

**Date of Introduction:** 1997 July.

**How Stored:** Shelf stable.

**New Product–Documentation:** Spot (with two large photos of products and packages) in *Soyfoods*. 1997. Summer, p. 5. “Greek company launches soya products.” The Soya Burger retail pack contains (in dry form) one sachet of textured soya mince and one sachet of vegetable mix. Mix, add water, shape into patties, then fry or bake. The Soya Barbecue pack contains one sachet of soya chunks, one of spices, and one of skewers. Reconstitute, season, and roast.

3008. Tobar, Hector. 1997. A world of surprises at Tofu Festival: Little Tokyo event includes twists on dishes from burgers to chocolate mousse that belie the food's bland image. *Los Angeles Times*. Aug. 10. p. B3, B7. Metro News section.

• **Summary:** The article begins: “To the uninitiated, tofu is synonymous with bland. It comes in funny white blocks that float in water. All by itself, it doesn't taste like much. But the people attending the Tofu Festival in Little Tokyo this weekend know better. They'll tell you what with some imagination and expertise—and a lot of spices—tofu is a culinary delight.” More than 20,000 people were expected at the event, on Saturday and Sunday. Twenty-six restaurants served up a variety of tofu dishes. One favorite dish was the tofu cheesecake offered by Ryo Sato, the chef *de cuisine* and owner of Chez Sateau restaurant in Arcadia. The exact recipe is secret but the ingredients include tofu (50% of total), cream cheese, sour cream, egg, and lemon juice.

Talk with Margaret Endo of Little Tokyo Service Center. 1997. Sept. 10. This year's Tofu Festival was much bigger and better than the first one last year. Close to 20,000 people attended; roughly 70% of these were Asian Americans (with the majority of those being Japanese-Americans, but with also many Chinese- and Korean-Americans), and the remaining 30% were Caucasian-Americans. Pat Greenberg

was very involved. A new edition of *The Four Seasons of Tofu* cookbook was prepared for the festival, and about 1,000 copies were sold. Address: Times Staff Writer.

3009. Brody, Jane E. 1997. Diet may be one reason complaints about menopause are rare in Asia. *New York Times*. Aug. 27. p. B10. Health section (Natl).

• **Summary:** A table (from the scientific journal *Obstetrics and Gynecology*) shows the content of phytoestrogens (in milligrams) in various soyfoods: Roasted soybeans 165.2. Textured vegetable protein 138.2. Green soybeans 135.4. Soy flour 112.4. Tempeh 62.5. Tofu 33.7. Tofu yogurt 16.4. Soy hot dog 15.0. Soy noodles (dry) 8.5.

3012. Mangels, Reed. 1997. Vegetarian Journal’s guide to lunch “meats.” *Vegetarian Journal (Baltimore, Maryland)*. July/Aug. p. 28-29.

• **Summary:** “Lunch meats are a food which many health conscious people decide to give up long before they give up chicken or fish. These products are often loaded with fat saturated fat, and sodium as well as containing nitrates, substances which have been linked to cancer.” However vegetarian lunch “meats” are expensive.

A large table gives a nutritional comparison of breakfast meats and meat alternatives in eight categories: Bologna-style (4 alternatives), chicken-style (2), corned-beef style (1), ham-style (2), pepperoni-style (2), roast beef-style (2), salami-style (2), and turkey-style (3).

The meatless meat alternatives are made from tofu, tempeh, and textured soy protein concentrate and wheat gluten. Address: Ph.D., R.D.

3013. *GMF–Genetically Modified Foods Market Intelligence (Genetic ID, Fairfield, Iowa)*. 1997. DuPont next big player in ag biotech. No. 12. Sept. 1. p. 1.

• **Summary:** “In a bid to join Monsanto and Novartis in the top tier of developers of new genetically engineered crops, Wilmington, Delaware-based DuPont Co. is building a biotech food empire through acquisitions.

“DuPont has acquired a 20% stake in seed producer

Pioneer Hi-Bred International of Des Moines, Iowa, which will give it a marketing outlet for its new seeds that are genetically engineered for special nutritional attributes. Pioneer had previously turned down purchase offers from Monsanto.

“As part of a strategy to create a vertically integrated structure to deliver its products, DuPont is also acquiring the Protein Technologies International (PTI) unit of Ralston Purina Co. PTI is a leading producer of soy protein powders that are ingredients in a wide range of nutritional products from infant formula to soy burgers. PTI will be the vehicle for processing and selling DuPont’s soybeans engineered to contain altered nutritional components such as proteins and fats.

“The *Wall Street Journal* of August 25 reported that some Wall Street analysts are now expecting an alliance between Monsanto and Archer Daniels Midland Co. to process Monsanto’s genetically modified crops into food products.”

3014. Bean Supreme Ltd. 1997. Soybeans—why the fuss! Soyplus [soymilk]. Hot health tips. Smart Meatfree Sausages (Leaflet). Auckland, New Zealand. 1 p. Back to pack. 30 cm.

• **Summary:** This brochure introduces all the soyfood products in the Bean Supreme line / range: Small photos show: Tofu (chub pack). Soyplus soymilk (in Tetra Pack cartons). Tofu Luncheon. Lite Licks nondairy frozen dessert. Meatless Sausages. Address: New Zealand.

3015. Blank, Dennis. 1997. Kroger features organics. *Organic Food Business News (Altamonte Springs, Florida)* 9(9):3. Sept.

• **Summary:** The Kroger Co., a 2,000 store supermarket chain based in Cincinnati, Ohio, is introducing a 16-foot-long Vegetarian Market section in 39 of its stores in Illinois, Indiana, and Kentucky. The new section, located next to the regular produce department, features organic fruits and vegetables, as well as organic processed foods such as organic rice cheese and soy hot dogs. Address: Publisher-Editor.

3016. Lightlife Foods, Inc. 1997. Eating healthy can be soy easy (Brochure). Greenfield, Massachusetts. 12 p. 22 cm.

• **Summary:** On the cover of this full-color, glossy brochure is a color photo of a meatless burger (between buns, with onion, tomato, and lettuce), a hot dog (in a bun, with a bead of mustard on top), and a plate of stir-fried tempeh with veggies. In the background are rolling soybean fields. In the foreground are three pods of green vegetable soybeans, and 15 whole dry soybeans.

Contents: Ten reasons to include soyfoods and soy protein in your diet (p. 2-3): 1. You will be in good company. 2. Lower your cholesterol. 3. Lower your risk of cancer. 4. Menopausal symptoms. 5. Soyfoods are nutritious. 6. A

quality protein source. 7. Save our precious resources. 8. A variety of alternatives and greater availability. 9. Better quality. 10. Soyfoods are “in.”

Glossary of common vegetable protein foods (p. 4-5): Tofu, tempeh, meat analogs, soymilk, soy cheese, soy flour, soy protein, textured vegetable protein (TVP), seitan, miso. A table shows each Lightlife product, serving size, and grams of soy protein (soy tempeh has the most at 24 gm per 4 oz serving, followed by Gimme Lean at 18 gm per 4 oz).

Products (with a brief definition of each) and mission statement (p. 6-7): Smart dogs. Tofu pups. Wonderdogs (The first low-fat vegetarian hot dog just for kids). Smart deli slices (fat free). Foney baloney (Kids love it). Lean links sausages. Gimme lean (fat free). Marinated smoky tempeh strips (“Fakin’ Bacon”). Fakin’ bacon bits. Marinated tempeh “grilles” (soy tempeh patties in Tamari, Lemon, and Barbecue flavors). Lightburgers (fat free). Lightsausages (fat free). Tempeh (in 5 varieties—Soy, Three Grain {millet, brown rice, barley}, Garden Vegetable, Quinoa-Sesame, and Wild Rice), Savory seitan, Vegetarian request (100% vegetarian, all-natural entrees). A color photo shows many products in their packages.

Getting started (p. 8-10; how to use key products). About Lightlife (since 1979). Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001 Ext. 129.

3017. **Product Name:** Lightsausages (Fat-free, 100% Vegetarian).

**Manufacturer’s Name:** Lightlife Foods, Inc.

**Manufacturer’s Address:** P.O. Box 870, Greenfield, MA 01302. Phone: 1-800-274-6001.

**Date of Introduction:** 1997 September.

**Ingredients:** Water, textured soy protein concentrate, tapioca starch, soy sauce (water, wheat, soybeans), spices, soy protein isolate, natural flavors (from vegetable sources), salt, evaporated cane juice, wheat gluten, barley malt, beet powder, vegetable gum.

**Wt/Vol., Packaging, Price:** 6 x 1.2 oz patties.

**How Stored:** Frozen.

**New Product–Documentation:** Leaflet sent by Patricia Smith from Natural Products Expo East. 1997. Sept. “Wake up to the light.” “What better way to start the morning than with a sizzling breakfast sausage and a steaming stack of waffles or pancakes.” A color photo shows the meatless sausages next to waffles.

3018. Sinzinger, Keith. 1997. Tempeh turkey heads east: Vegetarian innovations. *Washington Post*. Oct. 8.

• **Summary:** Until recently, when a roasted bird has been the centerpiece of a holiday feast, vegetarians have either cried fowl, settled reluctantly for side dishes, or perhaps even compromised their principles. But this year several West Coast entrepreneurs are expanding distribution of their

“turkey alternatives” eastward. Precooked, stuffed, and sliceable dishes, they contain no animal ingredients, but have a taste, texture, and appearance much like the real bird.

Rhonda Wrobel of Portland, Oregon, offered samples of Tofurky—a tofu and seitan roast—at the Natural Products Expo in Baltimore, Maryland, last month. Wrobel and her husband Hans, a former banquet chef in New Jersey, invented Tofurky in the early 1990s, and have improved their formula each year. This year they have downsized Tofurky to a 26-ounce roast with a stuffing of rice, bread, and sunflower seeds, intended to serve 3 or 4 people. Their company, Turtle Island Foods, is anticipating nationwide retail sales this year of 15,000 to 20,000, up from about 5,000 last year.

Miyoko Schinner, founder of Now & Zen restaurant in San Francisco, first prepared a seitan-based bird one Thanksgiving. Later she published a recipe for her UnTurkey, then began selling it at her restaurant several years ago. Last year she sold about 1,000 UnTurkeys in the Bay Area, and is hoping for sales of 10,000 this year. Address: Washington Post staff writer.

3019. Archer Daniels Midland Co. 1997. Annual report. P.O. Box 1470, Decatur, IL 62525. 44 p. Oct.

• **Summary:** Net sales and other operating income for 1997 (year ended June 30) were \$13,853 million, up 1.05% from 1996. Net earnings for 1997 were \$337.3 million, down 45.8% from 1996. Shareholders’ equity (net worth) is \$6,050 million, down 1.5% from 1996. Net earnings per common share: \$0.66, down 45% from 1996. Number of shareholders: 33,834. ADM spent \$1,127 million on additions to plant in 1997, compared with 801 million in 1996 and 658 million in 1995.

On the cover of the report is color illustration of a purple planetary globe. James R. Randall, who has been President of ADM for the past 22 years, has retired but continues advise the company. At ADM’s website (admworld.com) a counter displays the world’s population, now at 5.859 billion. “Every second of every day, the world gains 3 new mouths to feed.” “The earth’s population is projected to double in the next 50 years, hitting ten billion by the year 2050. Yet there will be no increase in the land available for growing food” (p. 5).

In the section titled “Discover the benefits of ADM’s health products” (p. 6-7) are subsections on natural vitamin E, lecithin granules, soy protein, and isoflavones. The latter section states: “Isoflavones are special compounds called phytochemicals that occur naturally in soybeans. (Phytochemicals are different from vitamins or nutrients, but are thought to have and impact on health.) The two main types of isoflavones are genistein and daidzein. ADM is currently constructing the world’s largest plant to make isoflavones in concentrated form.

“Initial research indicates that isoflavones may work in several ways to fight a range of diseases, including heart

disease and cancer. They may also help relieve menopause symptoms, promote bone health and protect against osteoporosis.

In addition to the concentrated products, ADM makes a number of soy products that are naturally rich in isoflavones, such as soy milk, soy flour and Harvest Burgers products.”

More than 100 million Green Giant Harvest Burgers have been sold (p. 19). The section on Haldane Foods (p. 20), a large producer of vegetarian foods in England, shows a half-page color photo of their products. It states: “A recent survey shows that 5.4% of the U.K. population is vegetarian and almost half are now actively eating less meat.” ADM has just completed a fourfold increase in the capacity of its plant in Newport Pagnell—which produces many of these products.

Sales of oilseed products in 1997 increased 10% to 8.9 billion (p. 24). ADM sold its British Arkady bakery ingredient business (p. 25). Among the corporate officers, G. Allen Andreas is President and CEO. Address: Decatur, Illinois.

**3020. Product Name:** Tempeh Drumettes: Delicious Vegan Protein from the famous Tofurky.

**Manufacturer’s Name:** Turtle Island Foods, Inc.

**Manufacturer’s Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031.

**Date of Introduction:** 1997 October.

**Ingredients:** Textured soy protein (soy flour and water), soy tempeh (non-genetically modified soy beans grown without chemical fertilizers, herbicides or pesticides, water, apple cider vinegar, starter culture), grated carrots, wild rice, malt extract, natural vegetarian flavor, dried cranberries, vegetarian Worcestershire sauce, isolated soy protein, carrageenan, herbs and spices.

**Wt/Vol., Packaging, Price:** 12 oz (340 gm)—4 drumettes.

**How Stored:** Frozen.

**Nutrition:** Per 3 oz (85 gm): Calories 105, calories from fat 14, total fat 2 gm (3% daily value; saturated fat 0.5 gm), cholesterol 0 mg, sodium 380 mg (16%), total carbohydrate 11 gm (dietary fiber 4 gm [16%], sugars 2 gm), protein 11 gm. Calcium 2%, iron 2%. Percent daily values are based on a 2,000 calorie diet.

**New Product—Documentation:** Product with Label sent by Seth Tibbott, owner of Turtle Island Foods. 1997. Dec. 13. 8 by 6 by 1 inch. Paperboard box. Orange, black, green and white on peach. Color photo shows four baked drumettes on a bed of lettuce with cherry tomatoes. “Low fat. Cholesterol free.” One circular logo shows three soybeans in an open pod with 3 non-soy leaves in the background. Two of the soybeans are golden yellow, the third is a miniature Planet Earth. Across the top of the logo is written: “The Wide World of Soy.” Across the bottom: “Have you had your soy today?”

**3021. Product Name:** Tofurky ‘97: A Delicious Vegetarian Holiday Feast.

**Manufacturer’s Name:** Turtle Island Foods, Inc.

**Manufacturer’s Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. Phone: 1-888-TOFURKY (863-8759).

**Date of Introduction:** 1997 October.

**Ingredients:** Each Tofurky includes: (1) 26-ounce tofu roast, seasoned and stuffed: Water, vital wheat gluten, tofu (water, soybeans, calcium sulfate), white beans, garbanzo beans, natural vegetarian flavor, canola oil, tamari, spices, lemon juice, calcium lactate from beets, salt. Stuffing: Brown rice, wild rice, bread cubes (whole wheat, water, salt, yeast), onion, celery, natural vegetarian flavor, sunflower seeds, roasted garlic powder, seasoning; (2) 4 Drumettes: Textured soy protein (soy flour and water), soy tempeh (non-genetically modified soy beans grown without chemical fertilizers, herbicides or pesticides, water, apple cider vinegar, starter culture), grated carrots, wild rice, malt extract, natural vegetarian flavor, dried cranberries, vegetarian Worcestershire sauce, isolated soy protein, carrageenan, herbs and spices. (3) Golden Mushroom Gravy: Water, nutritional yeast, expeller pressed canola oil, unbleached flour, chopped fresh mushrooms, diced onion, shoyu soy sauce (water, soybeans, wheat, salt), herbs, spices, non-dairy lactic culture.

**Wt/Vol., Packaging, Price:** 3 lb 4 oz (serves 4).

**How Stored:** Frozen.

**New Product—Documentation:** Product (without box) and color poster sent by Seth Tibbott. 1997. Dec. 13.

Full-color glossy leaflet (8½ by 11 inches). 1997. Oct. “We have it! Tofurky—A delicious vegetarian holiday feast” (which see). Box with Label sent by Seth Tibbott. 1997. Dec. 24. This is a very attractive and well-designed box, 10 by 6.5 by 4 inches deep. The top is covered with a color photo of Tofurky, sliced in half, served on a plate, with tempeh drumettes, a gravy boat to the right, and a basket of fruits in the upper left. A snipe across the upper left corner states: “100% vegan.” In the lower left is written: Contains: Specialty seasoned stuffed tofu roast. 4 hearty tempeh drumettes. Heavenly golden mushroom gravy. Keep frozen. Net weight 3 lbs. 4 oz. (1474.4 gm). In the lower right corner is a circular logo 1½ inches in diameter. Across the top is written: “The Wide World of Soy.” Across the bottom: “Have you had your soy today?” In the middle are three soybeans in pod; the two end ones are yellow and the middle one is a tiny Planet Earth. Behind them are three soybean leaves. On the back are three sets of ingredients and nutrition facts for: Drumettes, Golden mushroom gravy, and Stuffed tofu roast. On one end is information about Farm Sanctuary (Watkins Glen, New York); Turtle Island donates 1% of the gross sales from Tofurky to the Farm Sanctuary’s Adopt-A-Turkey program. One side states that “The Wide World of Soy” is a line of natural soyfoods: Tofurky, Tempeh Drumettes, Vegetaballs, and Now Burgers. “Today, soyfoods are receiving renewed interest from scientists and

Whether you are seeking to offer a meatless option for a PORTION of your dinner guests or are planning a COMPLETE VEGETARIAN FEAST, Tofurky will satisfy and amaze all who try it.

**WHAT IS TOFURKY?** Tofurky is a pre-baked vegetarian feast designed to be the delicious centerpiece of your holiday or everyday meal. It consists of three parts: 1 Specially Seasoned, Sliceable Tofu Roast filled with Wild Rice Stuffing, 4 Hearty Tempeh Drumettes, and 11 ounces of Heavenly Golden Mushroom Gravy. Each Tofurky is 100% vegan, cooks in less than 30 minutes and tastes FABULOUS!

**HOW DO WE MAKE IT?** Tofurky is a unique combination of Tofu and Vital Wheat Gluten. By combining these two traditional natural ingredients, we have created a product with a revolutionary texture. The tofu adds moisture and tenderness to the sliceable wheat gluten and creates a subtle, satisfying "roast." Seasoned with natural vegetarian flavors and pre-cooked in our ovens, the taste will please and satisfy herbivores and carnivores alike. There is nothing remotely similar to this anywhere on the market.

**IS THIS DIFFERENT THAN LAST YEAR'S TOFURKY?** Yes. We listened carefully to all of the feedback on last year's Tofurky and spent a good portion of the year developing, taste-testing and redeveloping this year's Tofurky to make this feast the very best ever.

**HOW ABOUT THE TEMPEH DRUMETTES?** Included in your Tofurky are the unique Drumettes, a dark filet made of grated soy tempeh, tvp (textured vegetable protein), wild rice,

nutritionists from their supply of isoflavones, a unique type of phytoestrogen (a plant chemical)."

Update: Talk with Seth Tibbott of Turtle Island. 1998. Nov. 18. Last year they sold 15,000 Tofurkys; this year

they have already sold 35,000 and expect to sell 50,000 by Dec. 31. The media coverage this year has been even more amazing than last year. White Wave has dropped its tempeh burgers (incl. Lemon Broil) because its tofu business is growing so fast.

3022. Turtle Island Foods, Inc. 1997. We have it! Tofurky—A delicious vegetarian holiday feast (Leaflet). Hood River, Oregon. 2 p. Front and back. 28 cm.

• **Summary:** The text at the bottom front reads: "As seen on: ABC (Good Morning America), NBC (Today Show), and CBS (This Morning)." On the front is a full-color photo (on a blue background) of a Tofurky sliced in half, on a bed of lettuce with sliced carrots, on a silver plate, with the drumettes and gravy in a silver gravy boat. In the upper left is a basket with a sunflower, pumpkin, pear, and cherry tomatoes.

On the back is a detailed description of the product: "After three years of product development, testing and listening to customers... We've taken tofu and blended it with vital wheat gluten to create a savory, sliceable roast filled with our own meatless stuffing." Tofurky includes two levels of promotional support. "Option #1: Vegan Super Holiday Demo. Order 25 mixed cases of Tofurky and Tempeh Drumettes plus 3 cases of any size Rice Nog by Grainaissance Natural Foods and receive a \$60 demo of Tofurky, Tempeh Drumettes and Rice Nog." "Watch for upcoming blurbs in November Bon Appetit and New Woman magazines. In addition we will again be sending out over 750 press releases to major US media organizations. In-store posters and brochures available at no cost. 1% of all gross sales of Tofurky go to the Farm Sanctuary's Adopt A Turkey Program." Suggested retail price: \$19.95 to \$24.95. Address: P.O. Box 176, Hood River, Oregon 97031. Phone: 1-800-508-8100.

3023. United Soybean Board. 1997. National report on consumer attitudes about nutrition. Seattle, Washington. 8 p. Oct. 28 cm.

• **Summary:** This fourth annual nationwide survey, commissioned by USB, was conducted in July 1997 by an independent research firm in Seattle, Washington. Random telephone interviews were completed with 1,000 consumers. The sample error ranges as  $\pm 3.2$  percentage points at the 95% confidence level.

Contents: Concern about nutrition. Changes in eating habits: Percentage of consumers making dietary changes due to nutrition concern, specific dietary changes, reasons for dietary changes. Nutrition and dining out. Menu selection and shopping habits due to nutrition concerns. Media sources and nutritional information. Consumer perceptions of soy products. Consumer concern and confusion about specific nutrition terms: Percentage of population familiar with term—Soy protein, saturated fats, polyunsaturated fats, trans fatty

acids, hydrogenation.

Consumer perceptions of soy products: 1. 59% of Americans acknowledge that soy is healthy. 2. Soybean product trial usage is reaching relatively high levels among nutrition-conscious consumers. Approximately 70% of consumers very concerned with nutritional content indicate they have tried some type of soy product. 3. The perception of healthfulness is a primary driver of soy product trial and use. Among consumers who have tried soy products, 68% indicated soy is healthy. 4. One in three consumers who eat soy products about once per week indicated that a magazine or newspaper article influenced them to include soy in their meals. 5. Among consumers who indicate usage of soy products, tofu and soy burgers are the products most frequently incorporated into their diets.

3024. Rosenthal, Lara. 1997. The new Thanksgiving dinner: Gravy, but turkeys not invited. *Wall Street Journal*. Nov. 26. • **Summary:** The article begins: “Watch out, Butterball! The tofu turkeys are coming. Vegetarians, tired of eating bean roast and stuffed pumpkin while the nation’s carnivores dine on fowl every Thanksgiving, are finding new ways to be included. They and their guests will consume an estimated 26,000 ‘alternative turkeys’ made of tofu and other plant products this year, four times as many as in 1996.”

While that is only a tiny percentage of the 67 million real birds eaten in the USA on Thanksgiving and Christmas, the companies that make faux turkeys are struggling to meet demand—even though the vegetarian turkeys are generally more expensive than their traditional counterparts. Indeed tofu turkeys have come a long way since they made their debut in the mid-1990s.

Three alternative turkeys are profiled: (1) The Tofu Turkey, made by Fresh Tofu Inc. of Easton, Pennsylvania. (2) Tofurky, made by Turtle Island Foods, Inc. of Hood River, Oregon. (3) Unturkey, made of seitan (wheat gluten) by Now & Zen of San Francisco, California.

Tofu turkeys can ease the strain in families split by gastronomic differences—as when one or more of the kids or guests are vegetarians. In gatherings of vegetarians they can fill an emotional void—served with cranberry sauce, mashed potatoes, green beans, and candied yams.

3025. **Product Name:** Chicken-Free Patties (Meatless). **Manufacturer’s Name:** Health Is Wealth, Inc. **Manufacturer’s Address:** 1051 Sykes Lane, P.O. Box 440, Williamstown, NJ 08094. Phone: 609-728-1998. **Date of Introduction:** 1997 November. **Ingredients:** 1999/08: Water, soy protein isolate, textured soy protein concentrate, potato starch, sea salt, granulated onion, dehydrated celery, spices, carrageenan, garlic powder, natural gum arabic, natural flavor, natural spice oils. Breaded with: Unbleached stone-ground whole wheat flour, fructose, yeast, sea salt, salt. Battered with: Water, yellow corn flour,

corn starch, sea salt, spices, canola oil. Browned [deep-fried?] in soybean oil.

**Wt/Vol., Packaging, Price:** 12 oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Talk with Mike at Health is Wealth. 1999. Aug. 16. Their Chicken-Free Patties (introduced Nov. 1997) are just like their Chicken-Free Nuggets but in the form of a patty or burger.

Leaflet (3 panels each side, front and back, glossy color, 28 cm). Sent by Patricia Smith from Natural Products Expo West. 2000 March. Shows about 32 products.

3026. *Natural Foods Merchandiser*. 1997. Gardenburger sells 300 million. Nov. p. 27.

• **Summary:** The Gardenburger has grabbed a record 32% of the market in the frozen veggie burger category, according to its manufacturer, Wholesome and Hearty Foods of Portland, Oregon. In the last 8 months, its market share has increased by 20%, and its distribution is now at 65% nationwide. These increases are largely the result of nationwide marketing campaigns that include advertising, consumer samplings, and couponing.

In an attempt to increase marketing and public awareness, the company is considering changing its name to Gardenburger Inc. A special meeting of shareholders was held on Oct. 17 to discuss and vote on this matter.

3027. Susanto, Tri; Sawitri, Meita; Widaryanti, Eni. 1997. Research on the utilization of tempe as raw material in the production of milk and tempe sausage. In: Sudarmadji, Suparmo and Raharjo, eds. 1997. *Reinventing the Hidden Miracle of Tempe: Proceedings, International Tempe Symposium, July 13-15, 1997, Bali, Indonesia*. Jakarta, Indonesia: Indonesian Tempe Foundation. xi + 280 p. See p. 125-132. [7 ref]

• **Summary:** To produce good quality tempeh sausage: Cut and grind fresh tempeh to yield 100 gm. Add 3.5% egg white, 2.5% wheat flour, 10 ml water, 1 gm garlic, and spices. Mix well, then mix in 40 gm vegetable oil, fill into a casing, and steam at 100°C. Cool and serve. Contains 17.3% protein.

To make tempeh milk: Dice fresh tempeh, steam for 3 minutes, add 2 parts boiling water, grind, and extract the soymilk. Filter the milk and mix in a 0.08% agar (to reduce sedimentation) plus 4% skim milk and 7% sugar. Heat to 90°C for 5 minutes, filter, bottle, pasteurize at 90°C for 15 minutes, and cool. This soymilk contains 3.25% protein. Address: Research Centre on Traditional Foods, Brawijaya Univ., Malang, Indonesia.

3028. **Product Name:** Vegetarian Sausage [Extra Chewy Breakfast Style, Reduced Fat Breakfast Style, Extra Chewy Chorizo, Reduced Fat Chorizo], and Vegetarian Pâté.

**Manufacturer’s Name:** Twin Oaks Community Foods.

**Manufacturer's Address:** 138 Twin Oaks Rd., Louisa, Virginia 23093. Phone: 540-894-5126.

**Date of Introduction:** 1997 November.

**New Product–Documentation:** News release. 1997 Nov. “Twin Oaks Community Foods introduces vegetarian sausage and pâté: All natural, delicious and health promoting.” They will be delivered to on Monday, Nov. 17. All the new products use 100% natural ingredients and all contain some organically produced ingredients. “The main ingredients of the sausages are organic textured soy flour, wheat gluten, and water. The main ingredients of the pâté are organic whole oat flour, and organic okara, the fiber from the soybean. The pâté contains enough whole oat flour to qualify for the new FDA health claim for Oat: ‘soluble fiber from whole oat flour, as part of a low saturated fat, low cholesterol diet, may reduce the risk of heart disease.’” For more information contact Jon Kessler.

3029. **Product Name:** SuGee (Vegetarian Chicken) [Creamy Shanghai Style, or Hickory Smoke Peking Style].

**Foreign Name:** Su-ji.

**Manufacturer's Name:** CAMS Foods Inc. (Importer-Distributor).

**Manufacturer's Address:** Yorba Linda, CA 92886. Phone: 714-NL.

**Date of Introduction:** 1997.

**Ingredients:** Creamy: Rehydrated soybean curd, water, isolated soy protein, soy oil, sesame oil, fructose, salt, hydrolyzed vegetable protein, autolyzed yeast extract, natural flavors, spices.

**Wt/Vol., Packaging, Price:** 8 oz (226 gm) paperboard box.

**How Stored:** Refrigerated.

**New Product–Documentation:** Package with Label brought by Bob Gerner of Berkeley Natural Grocer. 1997. July 2. 2 by 2 by 5 inches. “Soy-based vegetarian delicacy. All natural. No preservatives. Wheat free. All vegan. No MSG. Keep refrigerated.” An the box are the Chinese characters for “vegetarian chicken.”

On the package is a toll-free Hotline (1-800-LA-SUGEE) which has been changed to a number which is incorrect. There is no listing for the company in Yorba Linda, California.

3030. **Product Name:** Meatless Burger, Meatless Chili, Meatless Taco Filling (Dry Mixes).

**Manufacturer's Name:** Second Nature (Product Developer-Marketer).

**Manufacturer's Address:** 461 Manning Ave., Suite 300, Toronto, ONT, Canada, M6G 2V6. Phone: 1-800-370-8004 www.2ndnature.ca.

**Date of Introduction:** 1997.

**Ingredients:** Burger: Soy protein concentrate, dehydrated onion, cellulose gum, salt, tomato powder, garlic, carrageenan, spices, flavour, caramel color, beet powder.

**Wt/Vol., Packaging, Price:** 140 gm (4.9 oz).

**How Stored:** Shelf stable.

**New Product–Documentation:** Leaflet (glossy, color, printed in about 2002) sent by Lorraine Guardino, sales manager at Sol Cuisine. 2013. March 11. “Sol Cuisine: Second Nature has found its Sol Mate.” This leaflet gives a color photo of the front of each package, nutritional information, and the ingredients. Lorraine adds a note that these three products were introduced in 1997.

3031. **Product Name:** Southwestern Wild West Tofu Burgers.

**Manufacturer's Name:** Wildwood Natural Foods of Santa Cruz, Inc.

**Manufacturer's Address:** 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.

**Date of Introduction:** 1997.

**Ingredients:** 1997: Wildwood Tofu (filtered water, organic soybeans grown in accordance with the California Organic Foods Act of 1990, nigari {magnesium chloride} or calcium sulfate {natural firming agents}), corn, onion, kale, dried tomato, garlic, jalapeño pepper, ginger, cilantro, parsley, spices, salt, Fruitrim (fruit juice, natural grain dextrins), rice flour, garlic & onion powders, safflower oil.

**Wt/Vol., Packaging, Price:** 6.5 oz vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1988, and made at Wildwood's plant in Santa Cruz.

3032. Emmons, Didi. 1997. Vegetarian planet: 350 big-flavor recipes for out-of-this-world food every day. Boston, Massachusetts: The Harvard Common Press. xii + 564 p. Illust. by Melissa Sweet. Index. 24 cm.

• **Summary:** This hefty vegetarian cookbook contains 350 new and exciting innovations on recipes from around the world. Didi is described as “a bold new talent!” and her book is a Beard Award nominee. Soy-related recipes include: Miso soup (p. 113-14). Thai tofu with red curry sauce over coconut-scallion rice (p. 213-15). Frozen soybeans [green vegetable] (p. 263). Many Chinese markets sell these in their freezer sections. “Packaged in Taiwan, they look a lot like lima beans, but they are delicate in flavor and especially high in protein. I keep them in my freezer and add them by the handful to various dishes, just as I would add peas or snow peas.” The names and pages of recipes to which they can be added are given.

Mu shu tofu (p. 360-63). Cooking with tofu (p. 361, including description of varieties and serving suggestions). Cooking with legumes (incl. azuki beans and soybeans, p. 368-69). Tofu and pumpkin seed burgers. Also contains many recipes using sea vegetables. Address: Chef at Pho République (a French-Vietnamese Bistro), Cambridge, Massachusetts.

3033. Hogan, David Gerard. 1997. *Selling 'em by the sack: White Castle and the creation of American food*. New York, NY: New York University Press. x + 199 p. See p. 99, 100, 107. [261\* ref]

• **Summary:** A fascinating book, very well researched and written. White Castle, a regional restaurant chain, was founded in 1921 in Wichita, Kansas—at a time when Americans were hesitant to eat ground beef after Upton Sinclair's 1906 novel *The Jungle* had publicized the poor sanitation practices of the meat packing industry. It became the first American hamburger fast food restaurant chain.

It made the hamburger a U.S. institution and launched the fast-food industry.

In the chapter “White Castle goes to war,” the section titled “Victory coffee without the coffee” (p. 98-100) states that coffee was in short supply during World War II only because consumers, in the early summer of 1942, fearing it would be rationed, “fulfilled their own prophecy of scarcity by clearing grocery shelves and hoarding coffee in their cupboards.” Rationing was imposed a few months later.

White Castle first considered extending the existing coffee supply by adding “chicory or soy meal.” Eventually most wholesale roasters added 6-8% chicory to their mix, which did not alter the flavor much. White Castle soon accepted this “chicoried” coffee at most Castles in the chain.

They also tried a variety of other hot drinks to help make up the coffee shortage, such as Postum (an extract from roasted wheat bran flavored with molasses)—but it was quite expensive.

White Castle also considered and tested, but ultimately rejected, other coffee substitutes such as “Soykee, a soy derivative sold by Battle Creek Food Company; Soyfee from Cubbison Company; and Kofy Sub, another soy-based substitute” [made by Dr. Jackson Foods in Toronto, Ontario, Canada]. The only coffee substitute that White Castle considered seriously was Breakfast Cup, sold by Loma Linda Foods of California in 12-ounce packages; it was made from soy, bran, fig, wheat, and honey, but was eventually considered too expensive.

Since meat was also scarce during the war, White Castle also searched for alternatives to their hamburgers—and even considered meatless alternatives. Battle Creek Foods of Michigan offered the most varieties. Special Foods of Columbus [sic, Worthington] Ohio, made Numete, based on peanuts and corn flour. Many companies made a soy burger, while Loma Linda Foods made Vegelona (from soybeans, tomatoes, onions, and peanuts) and Proteena (from soy, tomato juice and yeast extract). Central Soya Co. made soya flour, which White Castle considered using as a meat extender. But there is no evidence that White Castle ever mixed its hamburger meat with any extender.

Brief story of Betty Crocker: The first company to pioneer a corporate hostess for image making was General

Mills in 1921—though at the time the company was named Washburn, Crosby, and Company, it “was becoming frustrated with the growing negative publicity about the white bread made from its bleached Gold Medal Flour. White bread was being denounced as having no nutritional value and being full of additives. In response the company created the popular yet fictional gray-haired ‘Betty Crocker,’ who was portrayed to the public as both an expert on nutritional issues and the ideal role model of the feminine and organized homemaker.” The program began with just one secretary signing this pseudonym to all public relations correspondence, but quickly expanded. Address: Assoc. Prof., American History, Heidelberg College [Tiffin, Ohio].

3034. Katzen, Mollie. 1997. *Vegetable heaven*. New York, NY: Hyperion. xv + 223 p. Illust. (Color by Mollie Katzen). Index. 27 cm.

• **Summary:** A handsome vegetarian cookbook. Soy-related recipes include: Vietnamese salad rolls (with firm tofu, p. 11). Kung pao lettuce cups (with firm tofu, Northern Chinese, p. 13). Eggflower soup with pasta shells (with firm tofu, p. 32). Potato soup with rosemary and roasted garlic (with silken tofu, p. 33). Coconut-lemon grass soup (with firm tofu, p. 43). Baked coated nuts sweet or savory (with soy sauce, p. 57). Basic soyburgers (with cooked soybeans and tofu, p. 76). Green beans and tofu in crunchy Thai peanut sauce (with firm tofu, p. 103). Magic carrot flans (with milk or soymilk, p. 122). Scalloped potatoes three variations (with milk or soymilk, p. 130). Sandwiches to write home about (with firm tofu, p. 136). Buckwheat soba with squash, smoked tofu, and basil (with smoked tofu and miso, p. 144). Tiny pasta stew (with firm tofu, p. 151). Horseradish aioli (with silken tofu, p. 168). Peanut-chile [chili] dressing (with soy sauce, p. 174). Homemade butterscotch pudding (with milk or soymilk, p. 194). Pumpkin mousse with gingersnap crumbs (with silken tofu, p. 196). Bittersweet chocolate-banana mousse (with silken tofu, p. 197).

A color photo on the rear cover shows Molly Katzen. Address: California.

3035. Nabben, Alexander. 1997. *Kochen und Backen mit Tofu: Vegetarische Rezepte ohne tierisches Eiweiss [Cooking and baking with tofu: Vegetarian recipes without animal protein]*. Darmstadt, Germany: Pala-Verlag. 139 p. Illust. Recipe index. 21 cm. [Ger]

• **Summary:** Contents: Tofu—versatile and healthful. The soybean: Cultural history, production, the world and the soybean, nutritional value of soybeans, soyfood products (soy sauce, miso, tempeh, okara, soy coffee, soynuts, soy sprouts, modern western soy protein products—soybean flour, flakes, textured soy flour, soy protein isolates, defatted soybean meal, industrial soy products), genetically engineered soybeans. Tofu. Tips, tricks, and useful information. How to make soymilk at home. How to make

tofu at home. Tofu recipes and marinades. Raw foods and salads. Dressings. Sauces. Soups. Main dishes. Soufflés. Pasta. Patties / burgers. Spreads. Party snacks. Cooking and baking. Desserts and sweet delicacies (*süsse Leckereien*). Ice cream. Address: Weigandufer 38, 12059 Berlin, Germany. Phone: 30 / 6808 0686.

3036. Rombauer, Irma S.; Becker, Marion Rombauer; Becker, Ethan. 1997. *The joy of cooking*. New York, NY: Simon & Schuster / Scribner. xiv + 1136 p. Illust. Index. 24 cm.

• **Summary:** Soy-related subjects include (\* = recipe): Soy sauce butter\* (p. 77). Asian black bean sauce\* (with “3 tablespoons preserved black beans” [fermented black soybeans], p. 83). Japanese wasabi soy sauce\* (p. 83-84). Ginger soy sauce\* (p. 84). Soy and sherry marinade\* (p. 85). Description of miso soups and their role in the Japanese diet (p. 107-08). Light-colored miso soup with simmered vegetables and dark-colored miso soup with sautéed vegetables and Mongolian Hot Pot—a miso soup based dish\* (p. 108). Ginger soy vinaigrette\* (p. 238).

One long chapter is titled “Beans and Tofu” (p. 270-294). Lentils with spinach and soy sauce\* (p. 280). The section titled “soybeans” (p. 287) discusses their nutritional value, health benefits (“They contain substances thought to help prevent breast and other cancers, as well as Omega-3 fatty acids, which reduce the risks of heart disease”), how to cook yellow and black soybeans, how to dry-roast [to make soynuts], many ways of processing, soy milk, okara, fermented black beans, soy sauce, tamari, miso, soy cream cheese, soy sour cream, and soy cheese. There are also substantial subsections describing the following soyfoods: (1) Soy milk, including a recipe for making it at home (p. 287-88). (2) Tofu, including silken tofu, cottage tofu, frozen tofu, sauteed or fried tofu, and smoked tofu (p. 288-89). Recipes containing tofu include: Szechuan spiced tofu, Southeast Asian curried vegetable stew, Smoked tofu burgers, and Brown rice tofu salad with orange sesame dressing (p. 289-90; the latter recipe calls for toasted sesame oil and adzuki beans, with smoked tofu being optional). (3) Tempeh, including recipes for Moo shu tempeh and Szechuan-style “hacked” tempeh. (4) About soy protein, describing textured vegetable protein and textured soy concentrate, with recipes for Dinner loaf Tex-Mex style and Lion’s head (p. 292). This is followed by a subsection describing seitan and with recipes for Root vegetable and seitan stew, and Seitan kibbe (p. 293-94).

Asparagus with mustard miso\* (p. 343-44). Baby bok choy with soy ginger sauce\* (p. 349). Steamed scallops or shrimp with soy sauce\* (p. 513). Grilled or broiled whole red snapper with ginger soy vinaigrette\* (p. 548-49). Small fish, fillets, or steaks poached in soy sauce\* (p. 555-56). Chinese soy-braised chicken\* (p. 601-02). The chapter titled “Know your ingredients” (1059-87) includes short descriptions of

bean sauce, Hoisin sauce, miso, nori, salted and fermented black beans, sesame oil, sesame paste, soy sauce, tamari, tonkatsu sosu (dark spicy sauce based on soy), wakame, wasabi, vinegars from fruit and grains, margarines (mentions trans fatty acids, but not soy), and shortenings (p. 1065-69).

Subjects related to vegetarianism include: Discussion of vegetarian diets (positive and accurate, in Chapter 1, p. 3). List of vegetarian side-dishes and main courses in this edition (27 recipes, p. 20). Vegetarian chili\* (p. 283). Dairy-free chocolate cake\* (vegan, p. 932). Ultra-orange cake\* (vegan, p. 932-33).

Irma Rombauer (the grandmother of Ethan Becker) first wrote the *Joy of Cooking* in 1931, “when domestic help was fast becoming a thing of the past and women all over the country were once again heading to the kitchen.”

Note: This cookbook was written by a committee of experts, put together by Maria Guarnaschelli. Many controversies and clashes of opinion arose out of this arrangement. Address: 3. Cockaign, Cincinnati, Ohio.

3037. Gardenburger, Inc. 1998. Natural selection (Ad). *Nation’s Restaurant News* 32(3):17. Jan. 19.

• **Summary:** This full-page color ad, targeted at restaurateurs, states that Gardenburger is “the #1 selling meatless patty” in the USA. Color photos show four other products, each ready to serve: (1) Gardenburger Tuscan, with tomato basil spread and fresh parmesan [Parmesan] cheese on foccacia bread. (2) Gardenburger Olé, with avocado and salsa fresca in a warm tortilla wrap. (3) Gardenburger Bistro, between two buns. (4) Gardenburger Pita. “Join the Garden Club for scrumptious new serving suggestions, promotional ideas and point-of-sale materials. Call 1-800-636-0109, ext. 1211, or visit our Website at [www.foodshow.com](http://www.foodshow.com).”

This ad also appeared in the 2 March 1998 issue (p. 99) of this magazine.

3038. Greenberg, Patricia; Hartung, Helen Newton. 1998. *The whole soy cookbook: 175 delicious, nutritious, easy-to-prepare recipes featuring tofu, tempeh, and various forms of nature’s healthiest bean*. New York, NY: Three Rivers Press (Crown Publishers / Random House). ix + 221 p. Illust. Index. 24 cm.

• **Summary:** Contents: Acknowledgments. Introduction. All about soy: Health benefits of soy (reduces the risk of heart disease, lowers the risk of breast cancer, eases the symptoms of menopause, protects against prostate cancer, prevents digestive disorders {when using whole soybeans or soy products containing high levels of fiber}, eliminates the problem of lactose intolerance, prevents the problems of milk allergy, beneficial in diabetic diets), cooking with soy products (meat analogs or meat substitutes {soy sausage, soy bacon, hamburgers and hot dogs}, miso, okara, soy cheese, soy milk, soy sour cream, soy yogurt, soy flour, whole soybeans, soybeans–green, soybeans–roasted, tempeh,

textured vegetable protein (TVP), tofu & silken tofu; Soy-based foods (containing little or no protein): Egg replacers, soy margarine, soy mayonnaise, soybean oil, soy sauce) how to get optimum nutrition from soy (protein, carbohydrates, fat, cholesterol, fiber, sodium), nutrition information. Sample menus (for 3 meals a day, 7 days a week). Recipes: 1. Appetizers, dips, and spreads. 2. Salads and vegetables. 3. Brunch and breads. 4. Pizza and sandwiches. 5. Soups and stews. 6. Main dishes. 7. Pastas and grains. 8. Desserts.

This books contains almost 200 delicious and easy ways to add that essential 25 grams of soy protein to your diet. These recipes (each of which includes a nutritional analysis) are based on more than ten years of experience and experimenting (p. 2). Address: P.O. Box 10853, Beverly Hills, California 90213. Phone: (310) 474-4539.

3039. Denby, Leo. 1998. History of Sheffield Seitan in Vermont (Interview). *SoyaScan Notes*. Feb. 3. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Sheffield Seitan is a very small company that makes natural seitan directly from wheat—without using vital wheat gluten. The company was started in 1979 by Don & Karen Smith in Wheelock, a tiny remote town in Vermont. They started in a log cabin which had been built by Frank and Phyllis Head, and which was available when the Heads went on a long trip to Mexico in about 1977. (The year is firm because one of the Head's daughters was born in Mexico on 2 May 1977.) The cabin had no electrical power and was accessible only by a road through the adjacent town of Sheffield. They had a post office box in Sheffield, so they often gave their address as Sheffield. Don worked as a chef, both were interested in macrobiotics, and they learned how to make seitan when they worked for Erewhon in Boston, Massachusetts. Their seitan was all hand-made and fresh—because they had no refrigeration. Their first product (introduced in 1979) was the Wheat Puff, which was a version of the Tan Pop that was sold at the Erewhon retail store in Boston; each Wheat Puff was quite large (about 5 oz), made of seitan on a stick and deep fried in a tempura batter. Their second product was named Wheat Meat Burger, a seitan patty introduced in about 1980. They sold most of these Burgers to a restaurant in Concord, New Hampshire, where they were used in sandwiches. The rest were sold to delis and natural food stores. Leo still has the labels from this Burger. Then the Smiths moved to the town of Newark, Vermont, but they kept their original business name, Sheffield Seitan. Now they made the seitan in a food preparation place that was closed at night, which was when they used it. They built their own home. In 1981 they moved themselves and their business back to Wheelock, to South Wheelock, where they were sharing space and their equipment with a baker named Leigh Pierce. She used to make a bread called Gentle Wind, and had a pretty good business going. Don's brother, Ron Smith, would deliver her

bread, and he would also deliver the Wheat Puffs to the same stores, which were health food stores and food co-ops across the state of Vermont.

Leo and his wife Christina bought the company in 1981, when it was located in South Wheelock. At that time the Smiths were heading to Arkansas, with plans to live in a macrobiotic community [Mountain Ark]. Leo thinks they had 1 or 2 children; not long after leaving Vermont, he thinks Don and Karen separated. Karen lived for a while in Fayetteville, Arkansas, but has remarried (last name Harple) and now lives in Pennsylvania (Phone: 717-466-6050); Don Smith is presently in Thailand. Sheffield Seitan wasn't making any money at the time. At that time there was a homeopathic/alternative directory named Earth Star, located in Temple, New Hampshire. The owners of the directory allowed Sheffield Seitan free advertisement space in exchange for delivery (once a month) of their directories to the health food stores and food co-ops along the way.

Leo decided to try to use the directory to expand into the frozen food market, by making full cooked, frozen seitan. The idea worked well, so in 1983 they started to make a patty called the Seitan Wheat Meat Pounder, whose weight is given as 1 pound plus. Each one weighs slightly more than a pound. It is 1 inch thick and 6 inches in diameter—much bigger than a typical burger. Nobody else makes such a patty. It can be sliced very thin into strips or cut into chunks for kabobs. Eventually they turned the delivery over to UPS and now they are going through a distributor named Associated Buyers based in New Hampshire.

In about 1985 they introduced Wheat Meat Balls, which were about 1 inch in diameter and weighed about ½ ounce each. But it was too labor intensive to try to roll all the little balls then cook them in broth—so they dropped the idea. In about 1986 they launched Seitan Wheat Meat Pieces, which are the 3-ounce patties that have been cut into finger strips.

In about Leigh Pierce decided to get out of the baking business—which she had been doing for about 10 years. So the Denbys had to find a new location, because they were sharing the shop that was built onto her house. The Denbys owned the mixer (an old 80-quart Hobart) and they were getting a very good rate on the rent because she used their mixer.

So in 1990 they moved Sheffield Seitan to Lyndon. Leo built their house, then designed a shop adjoining their house—which several contractor friends constructed. They had to have electrical power brought in. The company now makes: (1) The Wheat Puffs (about 600 every week), but the size is now smaller and they have no label. (2) Seitan Wheat Meat Burger (3 oz.) sold in three different packaging sizes: 2 patties, 4 patties, and 6 patties. They are also sold in two different packages: A simple poly bag with a twist and a label, or a deli tub. (3) Seitan Wheat Meat Pounder. and (4) Seitan Wheat Meat Pieces. Today they make about 300 lb/week of seitan, which is used to make all four products. They

also make some custom products. About half is sold via mail order to buyers groups, meditation retreats, colleges, and the other half is delivered to retail stores. Address: Owner, Sheffield Seitan, Box 1, Lyndon, Vermont 05849. Phone: 802-748-3327.

**3040. Product Name:** Gardenburger–Hamburger Style Veggie Patties (With Soy) [Regular, or With Cheese].

**Manufacturer's Name:** Gardenburger Inc.

**Manufacturer's Address:** 1416 S.E. 8th St., Portland, OR 97214. Phone: 1-800-636-0109.

**Date of Introduction:** 1998 February.

**Ingredients:** Incl. soy protein.

**New Product–Documentation:** Talk with Mr. Lige Weill of Vegetarian Awareness Network. 1998. Feb. 25. Gardenburger Inc. has just come out with a new Gardenburger that contains soy. He thinks they are doing this to compete with the Boca Burger.

News release by Gardenburger. 1998. Oct. 20. “Daily news of soy’s health benefits rocketing sales of soy-based veggie patties: Gardenburger Hamburger Style Fat Free Veggie Patties become nation’s favorite soy patties.” States that this patty was introduced in Nov. 1997. Note: It was not available in stores until about a year later. Yet the release adds that since November 1997, “Gardenburger has sold more than \$10 million worth of soy patties. They are among the few such products available at supermarkets nationwide.” “According to A.C. Scantrack data, sales are up 45% from a year ago and 69% in the last month.”

Talk with Heidi in consumer affairs at Gardenburger, Inc. 1998. Nov. 25. The company’s new soy-based line was introduced this month and is just now getting into retail stores. It complements the popular grain-based line. The two products in the line are Gardenburger–Hamburger Style–Regular or With Cheese. Formerly this company promoted their products as being “soy-free.”

**3041. Indiana Soybean Board.** 1998. Indiana soyfoods locator guide: A guide to finding soyfoods in the supermarket and health food store. Lebanon, Indiana: Indiana Soybean Development Council. 48 p. 28 cm.

• **Summary:** This is the first edition of this Guide. On the cover is a paper grocery bag resting on a bed of soybeans and chock full of foods: Veggie Slices (soy cheese), soynut butter, veggie burger, tofu, soymilk, soy flour, plus carrots, celery, and cooking oil. Contents: Food pyramid. Soyfoods descriptions–Meat the Bean: Introduction, green vegetable soybeans (edamame), hydrolyzed vegetable protein (HVP), infant formulas–soy based, lecithin, meat alternatives (meat analogs), miso, natto, nondairy soy frozen desserts, soy cheese, soy fiber (okara, soy bran, soy isolate fiber), soy flour, soy grits, soy protein concentrate, soy protein isolate (isolated soy protein), soy protein–textured (textured soy protein, textured soy flour), soy sauce (tamari, shoyu,

teriyaki), soy yogurt, soybeans, soymilk–soy beverages, soynut butter, soynuts, soybean oil & products, sprouts–soy, tempeh, tofu & tofu products, whipped toppings–soy-based, yuba. A taste for health–Scientists are learning about soy’s health benefits: Heart disease, osteoporosis, menopause, cancer, isoflavones. Soyfood icon chart. Soyfood facts & recipes: Meat alternatives, soybean oil, textured soy protein, whole soybeans, soy flour, soymilk, tofu. Composition and nutrient content of soyfoods. Soyfood conversion charts: description of one serving of soyfoods, guide to modifying recipes, soyfoods substitution chart. Mail order soyfood companies. Soyfoods Web site packed with information. Soy cookbooks. Soy resource books. 1-800-talksoy. Soyfoods market search map; where to find soyfoods in the supermarket (a two page color layout of a supermarket displaying where soyfoods are located). Soybeans... they’re in almost everything. Finding soyfoods at the supermarket (store listings by county). Address: Indianapolis, Indiana 46205-1744. Phone: 1-800-275-7679.

**3042. Worthington Foods, Inc.** 1998. Improve your image as a couch potato. Snack on something healthy (Ad). *Vegetarian Times*. Feb. p. 3.

• **Summary:** See next page. This is a full-page color ad for Morningstar Farms Chik Nuggets (reduced fat). The slogan reads: “The change will do you good.” Address: Worthington, Ohio 43085.

**3043. Walden, Graceann.** 1998. Oh boy–Its soy! Diner skips meat. *San Francisco Examiner*. March 27. p. 4.

• **Summary:** About Michael’s American Vegetarian Diner, 2650 Telegraph Ave. (at Derby), Berkeley. Phone: 510-548-0600. The owner, Michael Fikaris, has been a vegetarian for 15 years and a meditation instructor. Soy-related dishes include: Patty of textured soy protein, meat alternatives made out of soy, and chili with textured soy protein. Fikaris sells a promotional T-shirt with the slogan “Eating at a Higher Consciousness.”

**3044. Demos, Steve.** 1998. New developments with soymilk and other soyfoods at White Wave. Part II (Interview). *SoyaScan Notes*. March 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Sales of White Wave’s baked tofu are growing at 38% a year, while plain tofu is growing at 18-21% a year. White Wave is the leader nationally in the baked tofu category, with more than 60% of the market share. Plain dairy yogurt in America still outsells dairy yogurt with fruits and flavors, but it was the fruit yogurts that introduced consumers to the plain product. Baked tofu seems to be playing the same role with respect to plain tofu. White Wave is about to invest very heavily in the automation of baked tofu. If a company’s plant capacity is 250,000 units per week, it makes much more sense to produce baked tofu at

*Improve your image

something healthy.*

Nuggets™ let you snack away without the guilt. If you like the taste of regular chicken nuggets, you'll love our nuggets. Just heat and serve. Great tasting, meat free, quick, easy and healthy. Remember, when you help yourself to Morningstar Farms, you really are helping yourself. Look for Chik Nuggets in your grocer's freezer.

No, not the garnish, the nuggets. Go on, help yourself. With 75% less fat per serving than regular chicken nuggets, Morningstar Farms® Chik

*The change will do you good.™*

\$1.80/unit instead of block tofu at \$0.70/unit. White Wave is trying to turn the tofu market from block to flavored, in order to gain market share and position—in exactly the same way the company has been trying to turn the soymilk market from aseptic to refrigerated.

One key question concerning baked tofu remains unanswered? How do consumers eat it? Steve thinks they are eating it in the car on the way home from the store as a salted snack food—or perhaps on sandwiches. Until White Wave can be sure of how it is used, they don't want to commit to positioning it against some other product—such as cheese or meat.

White Wave's first goal was to establish its products in the refrigerated dairy section. Whereas many companies still sell tofu to the produce section, White Wave never sells to the produce section any longer. Everything is refrigerated, controlled temperature during distribution and sale. Only rarely does a White Wave product end up being sold in any produce section; they are usually sold in the juice cooler or in the dairy section. 80% of White Wave's revenues come from the natural foods sector, and in natural foods stores all White Wave products are in the dairy section—as part of their shelf-set program, which has been very effective in establishing a beachhead in the refrigerated section. Around that now Lightlife and Yves each have their own sections. So the vegetarian category is emerging, usually located in the store around dairy cheeses, milk, yogurt, and eggs.

The most interesting insight Steve has gained in the last few years is the one that says consumers are picking four product categories that they want to see in supermarkets. So White Wave has been reducing the number of products it offers; it has dropped hot dogs, sausages, all burgers except tempeh burgers and lemon broil. The company is actively evaluating what consumers want and where they want to find it in the store. One new program will be to give consumers a free half-pint carton of Silk asking them to “Try this—It's the new milk.”

Steve is very happy with Silk's sales performance over the past two years. “It's been exceptional, but it cost \$400,000 just to launch the product.” According to data from SPINS, during the May-June 1997 period, the market shares for soymilk brands in the U.S. natural foods market were as follows: Westbrae 34%, Edensoy 32%, Vitasoy 16%, and Silk 7%. Silk's share is now 10%. Sales of Silk grew by 170% during the past year. The soymilk market grew by 21% during the same period, Edensoy grew at 30%, Rice Dream dropped 0.4%, and the rice beverage market contracted by 0.2%.

Tree of Life (which does not share its sales figures with SPINS) is no longer the biggest natural foods distributor in the USA. United Naturals is now the biggest (after they bought Stow Mills) with sales last year of \$650 million vs. \$520 million for Tree. United Naturals also owns Mountain People's Warehouse, Mountain People's Northwest (which

was NutriSource), Rainbow-Chicago (Illinois), Rainbow-Denver (Colorado), Cornucopia, and Cornucopia-Atlanta (Georgia).

ConAgra is trying again to get into the natural foods industry. They recently tried to buy one big privately owned natural foods manufacturer, and were turned down! ConAgra launched a new “Advantage 10” line of frozen entrees (many of which contain gluten products) that is backed by Dr. Dean Ornish. White Wave is supplying them with some of these gluten products. ConAgra had a huge presence at the Anaheim show—yet they don't understand how natural foods shoppers think and see the world. Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301.

3045. Bertran, Magda. 1998. Pioneros de la soja en España: Locos por la macrobiótica [Pioneers of soya in Spain: Crazy about macrobiotics]. *Vital*. March. p. 66-69. [Spa]

• **Summary:** This is the story of a community of about 20 adults and children who live in southeastern Spain, just north of Barcelona, in Moianés, near the towns of Castellergol and Castellcir. Tofu, tempeh, veggie burgers, and other soyfoods (*derivados de la soja*) form an important part of their diet. Members of the community have created new food companies such as Vegetalia and Natursoy, and become pioneer soyfood processors in Spain. More recently, Luz de Vida has started to import high-quality natural products into Spain.

“The history of the production of soyfoods has diverse origins, according to the version of the protagonists. It can be said that it started about 20 years ago in the little village of Tavertet, due to the efforts of Josep M. Villagrassa, a person who was crazy about macrobiotics (*un “loco por la macrobiótica”*). We must also remember the pioneering work of Javier Arozena [sic. Arocena] and his company Zuaizto (*Arbolito*) in Vasco region.

In addition, two couples who were also “crazy,” Joan Mateu and Lluïsa Playà, and Josep Maria Clapés and Sandra Cano, came together to share a house and experiences in La Floresta (Barcelona). Lluïsa (along with others) was running the restaurant Macrobiotic Zen, the first macrobiotic restaurant in the city of Barcelona, while in the kitchen Joan was preparing tofu for the restaurant, helped by Sandra and Josep Maria. The latter also worked as a homeopathic doctor. Lluïsa maintains that the first tofu manufactured in Spain was made in 1978, in the kitchen of that house named La Floresta.

Little by little the production of tofu grew, and Joan started to make seitan for the first alternative food shops that were created in Barcelona, and then throughout Spain. Address: Spain.

3046. Boca Burger. Inc. 1998. Add variety and profit to your menu with the first Great Tasting meatless burger! 401 North Michigan Ave., Chicago, Illinois 60611.

• **Summary:** Sell sheet (8½ by 11 inch, front and back, glossy color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 1998. March. On the front is a photo of a restaurant “Menu: Burgers and sandwiches.” The first item is Boca Burger. “Indulge in the ultimate burger experience... without all the guilt!!

On the rear: What is Boca Burger? Why Boca Burger? Gives nutritional information for the three Boca Burger flavors: Chef Max’s Favorite. Original Vegan. Hint of Fresh Garlic. The first ingredient in each is “Protein from soy with purified water.” On both front and back is “The Original Boca Burger” logo. Address: Chicago, Illinois.

3047. Gardenburger, Inc. 1998. Annual report 1997: Going from niche to mainstream. 1411 Southwest Morrison St., Suite 400, Portland, OR 97205. 29 p. 28 cm.

• **Summary:** Net sales (in million dollars) have grown dramatically in recent years: \$13.34 in 1993, \$24.45 in 1994, \$36.82 in 1995, \$40.53 in 1996, and \$56.83 in 1997 (up 40% over 1996). However in 1997 for the first time the company suffered a loss in net income (\$1.393 million). In Nov. 1997 the company successfully introduced its first two soy-based Gardenburger flavors—Hamburger Style and Hamburger Style with Cheese. They completed the hiring of a new senior management team. The big news in manufacturing was securing a new plant in Clearfield, just north of Salt Lake City, Utah, that went on-line in early 1998. It was last used by Heinz to make frozen foods sold under the Weight Watchers and Budget Gourmet names. In May 1998 Gardenburger will launch its first-ever national TV advertising campaign. On 31 Dec. 1997 (according to AC Nielsen Scantrak data) the market share of the frozen veggie patty market is: Worthington 43%, Gardenburger 25%, and Green Giant 15% (p. 11).

“In January 1996 the Company completed the acquisition of Ojai, California-based Gorilla Foods, Inc., a privately held developer and manufacturer of wheat protein-based, meatless food products, including the Garden Dog.”

Accompanying the annual report is an announcement of the Annual Meeting of Shareholders and Proxy Statement (17 p.). Lyle G. Hubbard joined the Company in April 1996 as President and CEO. Prior to this he spent 15 years with the Quaker Oats Company in Chicago, Illinois.

“Paul F. Wenner founded the Company in 1985 as a sole proprietorship and acted as its Vice President from the date of its incorporation until December 1989, when he became the Company’s President, Chief Executive Officer and Chairman of the Board. In 1994, Mr. Wenner relinquished his duties as President and in 1995 relinquished his duties as Chairman of the Board, at which time he held the title of Founder, Senior Chairman of the Board of Directors and Chief Executive Officer. In April 1996, Mr. Wenner became Founder, Senior Chairman of the Board and Chief Creative Officer. In 1997, he relinquished the title of Senior Chairman

of the Board, but remains a Director of the Company. From 1980 through 1984, he owned and operated the Garden House Restaurant and Gourmet Cooking School (the “School”), where he developed the Gardenburger veggie patty. The School was affiliated with Mt. Hood Community College’s evening educational curriculum. Mr. Wenner graduated from Mt. Hood Community College in Portland, Oregon in 1973, with two Associate of Arts degrees.”

(p. 5). Wenner is the largest owner of the company’s common stock, with 20.0% of the outstanding shares. Lyle Hubbard is No. 2 with 2.8%. Address: Portland, Oregon.

3048. **Product Name:** V.G. Burger [Original, Spicy, Freedom].

**Manufacturer’s Name:** IQ Foods.

**Manufacturer’s Address:** 5201 Thatcher Rd., Downers Grove, IL 60515 (P.O. Box 577397, Chicago, IL 60657-7397). Phone: 630-434-7170.

**Date of Introduction:** 1998 March.

**Ingredients:** Original and Spicy: Millet, carrots, spinach, mozzarella cheese, bread crumbs, mung bean sprouts, lentil sprouts, soy bean sprouts, whole wheat flour, sesame seeds, tahini, eggs, onions, soy sauce, unrefined safflower oil, spices.

**Wt/Vol., Packaging, Price:** 4 x 2.5 oz = 10 oz meatless patties.

**New Product—Documentation:** See next page. Leaflet sent by Patricia Smith from Natural Products Expo at Anaheim. 1998. March. “V.G. Burger: Open wide.” On the front of the leaflet is a photo of the burger, with trimmings, between two buns.

On the rear we read that V.G. Burger stands for “Vegetable Goodness.” “V.G. Burgers are delicious, meatless alternatives that don’t compromise on taste.” The ingredients for each flavor are given. [www.iqfoods.com](http://www.iqfoods.com).

3049. Livesey, Bruce. 1998. Great moments in marketing. *Profit: The Magazine for Canadian Entrepreneurs*. Feb/March.

• **Summary:** About Yves Potvin, “Agriculture and Food Entrepreneur of the Year for B.C., 1997.” The key to his early success was convincing grocers to move his meatless soy-based wieners from the meat department into the produce department. The move led to a doubling in sales and eventually led to his products being carried by major supermarket chains across Canada, fueling 40% annual growth to 1996 sales of \$25 million.

3050. **Product Name:** Nature’s Highlights (Gluten-Free, Yeast-Free, Rice Crust) [Pizza–Soy Cheese Style, Tostada–Soy Cheese & Vegetarian Bean].

**Manufacturer’s Name:** Nature’s Highlights, Inc.

**Manufacturer’s Address:** P.O. Box 3526, Chico, CA 95927.

3051. Worthington Foods, Inc. 1998. Annual report 1997. 900 Proprietors Rd., Worthington, OH 43085. 20 p. 28 cm.  
**• Summary:** Net sales rose to \$117.9 million in 1997, up 8.1% from \$109.1 million in 1996. Net income (profit) rose to \$8.006 million in 1997, up 8.3% from \$7.392 million in 1996. Earnings per share (diluted) rose to \$0.67 in 1997, up 6.3% from \$0.63 in 1996. “Worthington Foods’ grocery market share of meat alternatives exceeded 55%, approximately the same as it was at the end of 1996.” The introduction of Morningstar Farms Chik Nuggets–the first “finger food” in this line–was a major success and has already become one of the company’s top selling products. “The test market sales of Morningstar Farms refrigerated products in the meat case provided convincing evidence that this concept is one we must aggressively pursue during 1998 and beyond. Accordingly, we are beginning a rollout of five refrigerated products in other selected markets, supported with increased advertising and sales personnel.” Three of these items are in “modified atmosphere packaging” or MAP. A large color photo shows these five products: Garden Veggie Patties, Quarter Prime, Spicy Black Bean Burger, Chik Nuggets, and Breakfast Patties. Morningstar Farms’ America’s Original Veggie Dog, under development for two years, is already on the shelves of 15% of U.S. supermarkets. “Seventeen new items–nearly all low-fat or fat free–were introduced into the grocery, specialty and foodservice markets during 1997.”

Includes an 11-page “Notice of Annual Shareholders Meeting.” Address: Worthington, Ohio. Phone: (614) 885-9511.

3052. **Product Name:** Natural Touch Okara Pattie [58% Less Fat Than Original].

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: (614) 885-9511.

**Date of Introduction:** 1998 March.

**Ingredients:** Textured vegetable protein (wheat gluten, soy protein concentrate), egg whites, okara (cooked soy pulp), corn oil, potato flour, autolyzed yeast extract, contains 2% or less of sea salt, onion, vegetable gum (guar and carrageenan), spice, paprika, celery extract, turmeric.

**Wt/Vol., Packaging, Price:** 9.5 oz (255 gm) box contains 4 patties.

**How Stored:** Frozen.

**Nutrition:** Per 1 pattie (64 gm): Calories 110, protein 11 gm, carbohydrate 4 gm, total fat 5 gm (calories from fat 45,

polyunsaturated 3 gm, saturated 1 gm), cholesterol 0 mg, sodium 360 mg, potassium 170 mg.

**New Product–Documentation:** See page after next. Ad (full page, color) in Natural Foods Merchandiser. 1998. March. p. 27. “Lower fat okara pattie: Natural Touch.”

**INGREDIENTS:** TEXTURED VEGETABLE PROTEIN (WHEAT GLUTEN, SOY PROTEIN CONCENTRATE), EGG WHITES, OKARA (COOKED SOY PULP), CORN OIL, POTATO FLOUR, AUTOLYZED YEAST EXTRACT, CONTAINS 2% OR LESS OF SEA SALT, ONION, VEGETABLE GUM (GUAR AND CARRAGEENAN), SPICE, PAPRIKA, CELERY EXTRACT, TURMERIC.

**N**ow you can enjoy the great taste of Okara Pattie with 58% less fat. Also, Okara Pattie contains 10 grams of soy protein which has been shown to contribute to the reduction of cholesterol in the blood. Enjoy the healthy benefits of soy in the great tasting Okara Pattie... now with less fat.

**Worthington Foods, Inc.**  
A PUBLICLY TRADED COMPANY

package. Retail for \$2.19 (1999/12, Lafayette, California).

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Yves Fine Foods, comb-bound in “Yves Veggie Cuisine US Packaging.” 1998. March. Product is named “Veggie Deli Slices.” 5.5 oz (155 gm).

Product with Label purchased at Safeway supermarket in Lafayette, California. 1999. Dec. 5. 4.75 by 3.75 inches. Vacuum pack. Light blue, blue, yellow, black, red, and green on white. Color photo of folded deli slices in a sandwich (whole wheat bread with sesame seeds) with trimmings. A box in the center of the label boldly proclaims on a yellow background: “Made with heart healthy soy protein. Diets low in saturated fat and cholesterol that include 25g of soy protein per day may reduce the risk of heart disease. One serving of this product [4 slices = 62 gm] provides 6.25g of soy protein. \* Proposed FDA product claim as of October 1, 1999.” Also on the front panel: “Soy–With naturally occurring isoflavones. Fat free. No preservatives. Cholesterol free.” The back panel states: “Printed on recycled paperboard with vegetable based inks.” UPC indicia.

3055. **Product Name:** Veggie Breakfast Links.

**Manufacturer’s Name:** Yves Fine Foods, Inc.

**Manufacturer’s Address:** 1638 Derwent Way, Delta (Vancouver) V3M 6R9, B.C., Canada. Phone: (604) 525-1345.

**Date of Introduction:** 1998 March.

**Ingredients:** Water, wheat gluten, soy protein isolate, yeast extract, etc.

**Wt/Vol., Packaging, Price:** 7 oz (200 gm) paperboard box.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Yves Fine Foods, comb-bound in “Yves Veggie Cuisine US Packaging.” 1998. March. Ad (full-page, color) in *Vegetarian Times*. 1998. April. p. 9. “Enjoy breakfast to your heart’s content.” A large color photo shows 3 of the links. A large logo for Yves Veggie Cuisine is superimposed on the photo near the top. In the lower right corner is a color photo of the front panel of the “Veggie Breakfast Links–Fat-Free.”

3056. **Product Name:** Veggie Chili Dogs.

**Manufacturer’s Name:** Yves Fine Foods, Inc.

**Manufacturer’s Address:** 1638 Derwent Way, Delta (Vancouver) V3M 6R9, B.C., Canada. Phone: (604) 525-1345.

**Date of Introduction:** 1998 March.

**Ingredients:** Water, soy protein isolate, wheat gluten, spices, etc.

**Wt/Vol., Packaging, Price:** 9.7 oz (275 gm) paperboard box.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Yves Fine Foods, comb-bound in “Yves Veggie Cuisine US Packaging.”

1998. March.

3057. Yves Veggie Cuisine, Inc. 1998. U.S. packaging (Portfolio). 1638 Derwent Way, Delta (Vancouver), BC, V3M 6R9, Canada. 14 inserts.

• **Summary:** This is a spiral bound collection of the packaging for all 14 of Yves’ products that have U.S. labels. Each product is a meat alternative, and each is manufactured and packaged by Yves Fine Foods, Inc., a subsidiary of Yves Veggie Cuisine, Inc., Delta (Vancouver), BC, Canada V3M 6R9. The fat-free products are: Veggie Breakfast Links, Veggie Chili Dogs, Tofu Wieners, Veggie Wieners, Jumbo Veggie Dogs (Regular, Hot & Spicy), Veggie Ground Round (Original or Italian), Veggie Pizza Pepperoni, Veggie Pepperoni, Canadian Veggie Bacon, Veggie Deli Slices, Garden Vegetable Patties, Veggie Burger Burgers.

On the back of each label is a message from Yves Potvin, president and founder, which begins–“Bonjour! My name is Yves...” His first name is pronounced like the “Eve” in “Christmas Eve.” “I founded this company in 1985 with a vision of creating a new generation of food to meet the needs of the health conscious consumer: A consumer who wants to cut down on fat and cholesterol without compromising on quality or taste. Today, I am proud to offer you a full line of healthy, convenient and tasty food made from 100% vegetable sources.”

“In this edition, I would like to bring to your attention our new packaging. We have made it easier for you to choose your favorite Yves Veggie Cuisine products. All our wieners are in the purple packages, our burgers are in green, our slices are in blue and our ground round products are in red packages...A brand new look with the same great taste you have come to expect from us. And before I forget, all our products are now certified Kosher.” Address: Delta (Vancouver), BC, Canada. Phone: 604-525-1345.

3058. Richards, Bill. 1998. Gardenburger bets the (soybeans) farm on the last ‘Seinfeld.’ *Wall Street Journal*. April 13. p. A1, A6.

• **Summary:** This humorous article paints Lyle Hubbard, the company’s new CEO, as irresponsible and fairly reckless in his “go-for-broke” “shoot the moon” splurge-style marketing strategy. Gardenburger plans to spend \$1.5 million on a spot during the last episode of Seinfeld, NBC’s wildly popular sitcom. This spot is the centerpiece of a \$14 million, five-week blitz of TV ads promoting the company’s meatless burgers. These ads will air about 1,500 times over 5 weeks in May and June but only about two dozen of the ads will appear on network television in prime time. The rest will be on inexpensive cable, late at night, or on syndicated shows. The campaign has gobbled up nearly all the company’s cash. A preview of the ads, which poke mild fun at veggie burgers, considered them unimpressive.

Marketing experts doubt the strategy will work. Donald

Burke, executive vice president of marketing and sales at Worthington Foods, says that only 8% of Americans have ever tasted a veggie burger. One TV spot is not a good way to change people's perceptions. He notes that Gardenburger unsuccessfully tried another ad campaign several years ago to launch a meatless hot dog called Garden Dog—the product has since been abandoned.

Paul Wenner started the company in 1985 “selling meatless patties made from leftovers at his vegetarian restaurant in Gresham, Oregon. The restaurant flopped, but Mr. Wenner kept peddling the veggie burgers out of his van, under the name Wholesome & Hearty Foods. After then company went public in 1992, its stock rocketed to \$30 from \$3 on rumors that burgers bigs like McDonald's were planning to sell the meatless patties. It crashed after rumors proved untrue.” The shares now sell for \$12.75 on the Nasdaq Stock Market. An illustration (dot-style) shows Lyle Hubbard. Address: Staff reporter.

3059. Worthington Foods, Inc. 1998. America's Original Veggie Dog: We're teaching an old dog new tricks (Ad). *Nation's Restaurant News*. April 27. p. 56. Address: Worthington, Ohio 43085.

3060. Amy's Kitchen Inc. 1998. Amy's organic vegetables Texas Veggie Burger: Not just another veggie burger (Ad). *Vegetarian Times*. April. p. 33.

• **Summary:** The burger is made from high protein soy and organic grains and vegetables. A large color photo shows the burger on a plate, between buns sprinkled with sesame seeds, plus all the trimmings. Address: P.O. Box 449, Petaluma, California 94953. Phone: 707-578-7188.

3061. Soyfoods Association of America. 1998. Soyfoods once a day for life! (Special advertising section). *Vegetarian Times*. April. 12-page color insert after p. 58.

• **Summary:** Contains large color ads by Nasoya (tofu and TofuMate), Morningstar Farms (Chik Nuggets), Eden Foods (organic black soy beans) Vitasoy (creamy original natural soy drink), Westbrae (Westsoy soymilks), Westbrae (Vigoraidd nutritional drink), Sno Pac (frozen Sweet Beans—organic green vegetable soybeans), and GeniSoy (soy protein bars). On the rear cover are additional small ads (each with a logo) for Lightlife Foods, Lisanatti, Monsanto, Soyco Foods—Div. of Galaxy Foods Co., Soyfoods Association of North America, and United Soybean Board.

Interspersed with the ads is advertorial text and “Soy facts.” The text on page 1 begins: “Miracle food. Health insurance in a pod. Nutritional powerhouse. The bean supreme. Nutritionists, physicians, researchers, chefs, and food experts of all kinds are raving about the healthfulness and great taste of soyfoods, and it's no wonder; soy truly is a nutritional and culinary gift from nature.

“Soyfoods are delicious, convenient, and versatile.

At breakfast, soy can make an appearance in the form of soymilk, scrambled tofu ‘eggs,’ or soy ‘sausages.’ A soy shake or veggie burger makes a great lunch. Try a tempeh stir-fry, or perhaps a creamy tofu dessert.

“So dig in... with the huge variety of soyfoods available at your local natural foods store, it's easy to get your daily intake of soy, and reap the many benefits of the bean supreme.”

The inner contents: Food as medicine. Heart health. Fighting cancer. Menopause? What menopause? Strawberry smoothie. Protein punch.

Soy cooking tips (p. 4): Easy ways to incorporate soy into your baking: Use soy flour in your baking. Be aware that soy flour contains no gluten, and therefore yeast breads will not rise without the addition of some gluten-containing flour. About ¼ cup of soy flour per cup of unbleached white flour is recommended for breads, pastas, and pastries. In place of olive oil, try adding a few ounces of Nasoya Silken Tofu and a dash of lemon juice to mashed potatoes. Try mashing miso into your root vegetables in place of butter. When adding miso to dishes, add roughly 1 tablespoon per four servings. Add GeniSoy Natural Vanilla Soy Powder to your baked goods such as muffins or pancakes. Buy Eden Organic Soybeans in a can and use them the same way you would any other canned bean: over rice, with pasta, in stir-frys, etc.

It's not only what you eat; its also what you don't eat. Making healthy eating taste great. Soy fact: soybeans were traditionally considered one of five sacred crops in China.

No time to cook? Try these quick ways of getting soy in your diet.

Strong bones... a matter of calcium retention. Miso.

Soy fact: there is no word for “hot flash” in Japan. Soy beverage.

Miraculous tofu. So soy convenient. Soy fact: Western culture discovered tempeh through the Dutch colonization of Indonesia. Soy fact: tofu was unknown to most people in the United States until Chinese immigrants came to this country in the 1800's. Tofu.

Tempeh. By the handful. Soy fact: miso was developed in China about 2,500 years ago. Where to find it. Address: Washington, DC.

3062. Fischer, Bruno. 1998. Leading soyfoods manufacturers in Germany (Interview). *SoyaScan Notes*. May 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The biggest soyfoods company in Germany is probably Noelke (Nölke), which is a big, private meat-processing company with four plants throughout Germany. Their headquarters is in the Osnabrueck area (Osnabrück, 30 miles northeast of Muenster). Their products, which are mostly meat alternatives (especially sausage alternatives) are marketed under the Eden brand in Reform Houses. No. 2, DE-VAU-GE (pronounced day-fau-GAY, whose Granovita brand is very popular), also makes many meat alternatives,

such as links (sausages).

No. 3 is Life Food GmbH in Freiburg (Taifun brand). No. 4 may be Huegli, but they are not really a soyfoods manufacturer. They did buy Soyastern, Yamato, and Horst Heiler, and they sell products under those three brands—not under the Huegli brand.

No. 5 is Albert's Tofuhaus; he produces a lot of bulk tofu for other companies. No. 6 is Viana. The others are fairly small. Geestland started with soy then tried to introduce Lupino (made from Lupins), but the Lupins was not very successful. They are a regional tofu plant, a little bigger than Christian Nagel in Hamburg. Svadesha still exists, but they have been sold to non-soy people, who are fiddling around. They are quite regional and don't make very much soy at present.

TKW (pronounced TAY-kah-vay) has an unusual history. They are a branch of a machinery manufacturing company. They were asked to make a tofu plant, but their customer went bankrupt. So rather than letting the equipment just stand idle, they decided to make tofu. TKW was owned by two brothers who didn't get along very well with each other. So one went into making tofu and the other stayed with the making machinery. "They still seem to do something, somewhere, for somebody. I think they are more into the bulk tofu business."

Henselwerk in Switzerland is not a soyfoods manufacturer. In fact, they don't process any foods; they bottle lecithin, package texturized protein, etc. Soyastern doesn't exist any more; the factory was closed but Huegli still uses the Soyastern brand. Address: Im Auel 88, 53783 Aetorf, Germany. Phone: 49-2243-4021.

3063. Morgan, Miriam. 1998. Students says yes to school veggie burgers. *San Francisco Chronicle*. May 13. Food section. p. 2.

• **Summary:** In the Palo Alto Unified School District (California), food service officials are wondering if they should offer veggie burgers on next year's school lunch menu. So third graders sampled and rated four brands of burgers, chosen for their availability in institutional and retail packages. The winner: Wildwood Tofu Veggie Burgers! Followed by Green Giant Harvest Burger, Gardenburger, and Quong Hop Soy Deli Original. Address: Staff writer.

3064. *SoyaScan Notes*. 1998. Lightlife Foods' new presence at Safeway supermarket in Lafayette, California: Meatless Turkey in March coupon book, and Meatless hot dogs demoed May 15 (Overview). May 18. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Safeway is the biggest supermarket chain in California. Lightlife is a relatively small manufacturer of soyfoods and meat alternatives located in Greenfield, Massachusetts.

In the *Safeway Club Savings Guide* (like a coupon book,

p. 13) for March 1998, Lightlife's Smart Deli Sliced Turkey or Baloney were listed for \$1.49 (savings of up to \$0.50). "See store for additional Club Savings on Smart Deli Dogs."

On Friday, May 15, Lightlife's Smart Dogs (meatless hot dogs) were being demoed by a lady from Five Star, a professional demo company, at Safeway in Lafayette. Each link was cut crosswise into about 4-5 pieces and kept in a steamer on a table. One portion was served on a toothpick to each person who requested it, with or without mustard. After Bill Shurtleff and his son, Joey, tried a sample, they said. "These are great! You know, they contain no cholesterol." The very friendly black woman who was doing the demo replied: "That's right, and they are also fat free. I love 'em."

3065. Hainer, Cathy. 1998. Oh, 'soy' wonderful! Shucking its hippie image, the bean goes mainstream. *USA Today*. May 29. p. 08.D. Final edition.

• **Summary:** "Over the years, soy products, particularly tofu, have been derided as weird hippie food. But now the soybean is a nutritional star, and baby boomers are integrating soy products such as miso and tempeh into their upscale cooking."

Also discusses miso, tempeh, soynut butter, tofu burgers and soy cheeses.

3066. **Product Name:** [Fresh Tofu, Marinated Tofu, Smoked Tofu, Fresh Seitan, Marinated Seitan].

**Foreign Name:** Svjezi Tofu, Marinirani Tofu, Dimljeni Tofu, Svjezi Seitan, Marinirani Seitan.

**Manufacturer's Name:** Annapurna.

**Manufacturer's Address:** Poljanicki, Prilaz 12, 10000 Zagreb, Croatia.

**Date of Introduction:** 1998 May.

**Ingredients:** Marinated tofu: Soybeans, water, nigari, shoyu. Smoked tofu: Soybeans, water, nigari, natural smoke.

**Wt/Vol., Packaging, Price:** Marinated: 280-350 gm vacuum packed in plastic bags. Sells for 50kn/kg. Smoked: 200-250 gm in plastic bags. Sells for 60kn/kg.

**How Stored:** Refrigerated.

**New Product—Documentation:** Talk with Vlatka Kuzmic. 2001. Dec. 12. She and her husband started making tofu officially in Feb. 2001, but unofficially about 2-3 years earlier. They learned how from Susanna Ciceli, a macrobiotic friend.

Letter (fax) from Vlatka Kuzmic. 2001. Jan. 12. They started to sell Fresh Tofu, Marinated Tofu, and Fresh Seitan in May 1998. Marinated Seitan was introduced a month later. The tofu was made with regular soybeans (not organic) and nigari (white/refined flakes). Smoked tofu was introduced in Sept. 1998.

Kuzmic, Vlatka. 2002. "Brief history of Annapurna and work with tofu in Croatia." Letter to William Shurtleff at Soyfoods Center. 1 p. Gives key dates.

Labels sent by Vlatka. 2002. March.

Letter (e-mail) from Vlatka Kuzmic. 2006. July 11. This tofu was (and still is) smoked in a smoke house; no smoke flavor is added.

3067. Sams, Gregory. 1998. *Uncommon sense: The state is out of date*. London: Chaos Works. 191 p. Illust. No index. 21 cm. [Eng]

• **Summary:** An extremely interesting and creative book. On the rear cover is a photo of Gregory Sams and this brief biographical sketch: “Gregory Sams pioneered the introduction of natural foods to the UK—opening Seed macrobiotic restaurant in 1967 at age 18, Ceres grain store in the Portobello Road two years later [1969] and Harmony Foods (now Whole Earth Foods) soon after, as well as being closely involved with Harmony magazine and Seed, the Journal of Organic Living. He conceived and launched the original VegeBurger in 1982, developed it for six years, then moved out of food and into fractals, founding Strange Attractions—the world’s only shop dedicated to chaos theory (London 1990).” Address: 2 Trevelyan Gardens, London NW10 3JY, England.

3068. *Travelin’ Light (Lightlife Foods, Greenfield, Massachusetts)*. 1998. It was twenty years ago today... or thereabouts. Spring/Summer. p. 1-2.

• **Summary:** This is a nice history of the Tempehworks / Lightlife Foods. “In the late 1970s, in the hill towns of western Massachusetts, a unique mix of socially responsible, alternative lifestyle cottage industries were springing up. Frances Moore Lappé’s influential book *Diet for a Small Planet* had just come out, articulating the benefits of a non-meat-based diet on both personal and planetary health. A founding partner in one of America’s first natural foods tofu companies, Laughing Grasshopper Tofu, Michael was often asked by customers if anyone was producing tempeh. Sensing opportunity, Michael set out on his own to learn the craft of making tempeh and start a very small business. Initially called Tempehworks, the business was born in early 1979 in an abandoned car wash and soy tempeh was the sole product.

“When Chia Collins joined Tempehworks in 1980 there was no business plan and little structure to the organization. Chia’s talents were an immediate asset to the upstart company.”

“In the early years of the company, tempeh was still an unusual and unknown food and vegetarian diets were not common or well understood. Struggling to pay the bills, Chia and Michael suddenly realized that utilizing tempeh alone to accomplish their mission of converting people to a plant based, rather than meat based diet would take a tremendous amount of consumer education—far beyond the company’s meager budget for such marketing activities. Their innovative solution to this dilemma was marketing products that were already familiar to their customers while

still bearing the benefits of protein from plants. Enter, meatless alternatives to America's favorite foods: hot dogs and hamburgers.

"So, in 1984 the company changed its name to Lightlife Foods, moved to a larger location (this time a retired trucking terminal) and Tofu Pup hit the market. A delicious vegetarian hot dog made from tofu, Tofu Pups were an immediate success and Michael and Chia knew that they were onto something big. Vegetarian products were here to stay and the two soy entrepreneurs were more determined than ever to make Lightlife the leader in the field. In 1988 the company took a leap of faith, and with considerable support from the local community, received financing to expand its operations to meet the growing demand. Tofu Pups were soon followed by Smart Dogs, the first fat-free hot dog (and today, the country's best-selling meatless frank) and Smart Deli Slices, Lightburger and more."

Old black-and-white photos show: (1) Michael Cohen holding a jar of tempeh starter Culture, 1980. (2) Employees of the Tempehworks circa 1980. (3) Making tempeh at Tempehworks circa 1980. (4) Chia look over a tray of tempeh, 1981. (5) Chia Collins at her desk in 1985. (6) Michael Cohen on the phone at his desk, 1986. (7) The Tempehworks chorus line, 1987. (8) Three people Lightlife booth at Natural Products Expo, 1995. (9) Nine people Lightlife booth at Natural Products Expo, 1997. Address: Address on envelope: P.O. Box 870, 74 Fairview Ave., Greenfield, M 01302.

**3069. Product Name:** Tofurky Deli Slices [Hickory Smoked, Original Style, or Peppered].

**Manufacturer's Name:** Turtle Island Foods, Inc.

**Manufacturer's Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. Phone: 1-888-TOFURKY (863-8759).

**Date of Introduction:** 1998 May.

**Ingredients:** Hickory Smoked: Water, vital wheat gluten, tofu (water, soybeans grown without herbicides, pesticides, or chemical fertilizers {and calcium sulfate coagulant}), white beans, garbanzo beans, natural vegetarian flavor, expeller pressed canola oil, shoyu (water, soy beans, wheat, salt), spices, lemon juice, calcium lactate from beets, salt. No nitrates or MSG.

**Wt/Vol., Packaging, Price:** 5.5 oz (156 gm) vacuum pack. Retail for \$2.49 (2002/03, Lafayette, California).

**How Stored:** Frozen or refrigerated.

**Nutrition:** Per 1.5 oz (43 gm) serving.: Calories 120, calories from fat 15, total fat 1.5 gm (2% daily value; saturated fat 0 gm), cholesterol 0 mg, sodium 286 mg (12%), total carbohydrate 14 gm (dietary fiber 2 gm [8%], sugars 0 gm), protein 13 gm. Calcium 2%, iron 7%. Percent daily values are based on a 2,000 calorie diet.

**New Product-Documentation:** See next page. Leaflet (8½ by 11 inches, color) sent by Seth Tibbott. 1998. Published in

May. "The famous Tofurky. Now available in Deli Slices." The product comes in two flavors: Original and Hickory Smoked. The back contains information on ingredients, nutrition facts, and quotes from satisfied consumers.

Postcard (color, 4 by 6 inches) sent by Seth Tibbott. 1998. "New! Tofurky Deli Slices. 100% vegan. Low fat." The text on the back reads: "Now you can enjoy the great taste and texture of the Famous Tofurky all year long!" Talk with Seth Tibbott. 1998. Nov. 18. Original and Hickory Smoked were introduced in May 1998. The Hickory is smoked in a real smoke house. Product with Label sent by Seth Tibbott. 1998. Dec. 16. Both flavors. 5 by 8 inches. Hickory Smoked is black, yellow, red and white. Original style is Red, black, white, and yellow. At top of front panel: "Low fat. 100% vegan." At bottom: "Tastes great cold or hot."

Product (Hickory Smoked) with Label purchased at Safeway supermarket in Lafayette, California. 2002. March 11. Product evaluation: Excellent taste, texture, and packaging.

Letter (e-mail) from Seth Tibbott. 2009. Jan. 25. Peppered Deli Slices were first sold commercially in Sept. 1998.

3070. Yves Veggie Cuisine. 1998. Yves Veggie Cuisine: Enjoy breakfast to your heart's content (Ad). *Vegetarian Times*. May. Inside rear cover.

• **Summary:** This is a full-page color ad for Yves Veggie Breakfast Links (fat free). "These links taste just like the real thing but they're good for the heart. That's because they have no fat, no cholesterol, and they're made of soy protein." Address: Vancouver, BC V6A 2A8, Canada.

3071. Winter, Ralph E. 1998. Worthington says rival's ad campaign lifted sales of its own meat-free foods. *Wall Street Journal*. June 19. p. B4A.

• **Summary:** Gardenburger Inc., a rival maker of veggie burgers and meat replacements, recently launched a 5-week, \$14 million TV advertising barrage, which included a spot on the last episode of "Seinfeld." While Gardenburger's sales skyrocketed, so did those of other makers of veggie burgers. Gives figures for the sales increases of both companies.

3072. **Product Name:** [Tofu, Soymilk, Tofu Cheesecake, Tofu Cheesecake with Apples, Tofu Pie with Bananas, Tofu Mayonnaise, Mushroom Quiche with Tofu, Soymilk with Oats & Natural Sugar, and Tofu Burgers].

**Foreign Name:** Tofu, Leche de Soya, Cheesecake, Cheesecake de Manzana, Mayonesa de Soya, Torta de Championes con Tofu, Avena Helada con Leche de Soya, Hamburguesa de Tofu.

**Manufacturer's Name:** DeliSoya-Delikatessen.

**Manufacturer's Address:** Calle 78 No. 12-03, Santafe de Bogotá, Colombia. Phone: 346-2178 (OF) or 610-1210

# The Famous ***TOFURKY***

**Now Available in  
DELI SLICES**

(HM).

**Date of Introduction:** 1998 June.

**How Stored:** Refrigerated.

**New Product–Documentation:** Letter from Nestor and Cecilia Santacruz. 1998. Sept. 8. “We started on June 26 in Bogotá (Colombia) a small scale manufacture of soyfoods products, tofu and soymilk, that we distribute personally and sell in a place called ‘Delisoya’ (see address above). Your books are a permanent source of inspiration. We also prepare ‘cheesecake,’ *mayonesa de soya*, and *hamburguesa de soya*. Our shop is not located in a place of much public influence but the response to it has been very stimulating and we are very encouraged.”

Letter and forms filled out by Nestor and Cecilia Santacruz. 1998. Oct. 14. They started and own Delisoya, which is located in northern Bogota. They do not have labels for their products. Each week they make, on average, 96 cakes of tofu (500 gm each) and 25 liters of soymilk. They used to deliver tofu to a store named *El integral* and to a restaurant named Caliz, but not they reserve all of their small production for their soya deli. Some Japanese housewives are starting to come to Delisoya to purchase tofu. Nestor and Ceci reserve one day each week to deliver tofu to others at their homes. The foods served each day at Delisoya are shown on a menu board. They occasionally make other foods besides those shown above, so that people can try them and see what can be done with tofu—for example *Torta de champiñ con tofu* (Mushroom quiche with tofu). Turnovers—Tofu, vegetables and spices wrapped in a crust. Sandwiches—Whole wheat bread, tofu, and vegetables. Soymilk with oat and natural sugar (*panela*).

**Ingredients—Tofu burgers:** Tofu, onion, carrot, parsley, oregano, salt & pepper. Whole wheat bread, lettuce, fresh vegetables. Price: \$2.500 each. Source: Mrs. Bernadette Kikuchi (wife of Tomio Kikuchi). Cheesecake (plain or with fruits): Tofu, tahini, lemon, oil, raisins, brown sugar, vanilla, salt, okara granola. Price: \$15.000 pesos each. Refrigerated. Source: *The Book of Tofu* (p. 150; Ten Speed Press ed.). Tofu mayonnaise: Soymilk, tofu, lemon, oil, salt. Price: \$1500 pesos for 125 gm glass jar. Soymilk, tofu, lemon, oil, salt.

Letter from Cecilia and Nestor Santacruz. 2000. Sept. 12. “As for questions (Bill’s letter of 16 Nov. 1999) about our products: 1. *Torta de Champiñoes con Tofu*: It is more like a quiche and can be named ‘Mushroom quiche with tofu.’ 2. In hot places in Colombia we like to drink *avena helada* which is a drink made of milk (dairy) with powdered (instant or cooked) oat, sugar and cinnamon in a blender and cooled for freshness. We make it with soy milk and it tastes as well. 3. It is Hamburguesa de Tofu. I was wrong saying Hamburguesa de Soya. 4. In 1998 we had plain Cheesecake and Cheesecake de manzana (Tofu cheesecake with apples) and Tofu pie with bananas. We still use apples a lot in pies, drinks with soymilk but have introduced other fruits that are easily available such as mulberry, agraz, guayaba, curuba

etc. We make pumpkin pie with Tofu too. We like to vary the repertoire because the same people come to see us often. 5. Yes, we use okara granola in all the different types of pies. We love it instead of bread crumbs and crusts made of wheat, etc. We plan to increase using it in the near future. 6. It is \$15,000.00 pesos (or 7.00 U.S. dollars approx.). One dollar is \$2,200.00 approx. Our money is so devalued that the least coin is of 20 pesos but no one wants it because it doesn’t have any commercial value. 7. It is ‘Tofu mayonnaise’. In 1998 we referred a lot to soy because it is a much better known word than Tofu. A 125 gm [of Tofu Mayonnaise] used to cost 1,500 pesos but now it is 2,500 pesos.”

3073. *Vegetarian Times*. 1998. I can’t believe it’s not turkey: The name Tofurky may be funny, but its taste sure isn’t. June. p. 18.

• **Summary:** The name “Tofurky” was designed to be amusing, but the flavor is no laughing matter—it’s great. Tibbott, age 46, donates 1% of the company’s \$1.2 million gross income to the Adopt-a-Turkey program run by Farm Sanctuary, an animal welfare group. Contains a brief history of Turtle Island Foods, which takes its name from Native American Folklore. During 1997 Turtle Island Foods saw a 196% increase in sales over the previous year. Color photos show: (1) Seth Tibbott, with beard and glasses. (2) Sliced Tofurky. Note: Seth Tibbott’s name is misspelled as “Tibbot” throughout this article.

3074. Brewster, Elizabeth. 1998. Veggie burgers, post-Seinfeld. It’s no joke: Sales are sizzling. *Food Processing (Chicago)*. July. p. 58.

• **Summary:** After Gardenburger ran a half-minute ad in the final episode of Seinfeld, sales of their veggie burgers leaped to nearly \$2 million, from 368,000 in the same week a year ago. Sales of all brands of veggie burgers totaled \$3.8 for the week ending 23 May 1998, up dramatically from \$1.8 million for the same week in 1997. Address: Managing Editor.

3075. *CaliforniaCare News (Blue Cross of California)*. 1998. I’m soy excited: It’s not just tofu anymore. Summer.

• **Summary:** “Soy foods come from the soybean.” They are turning up everywhere in many forms: Vegetable oil, soy flour, “tofu (soybean curd), soynut butter—a peanut butter alternative that’s lower in fat, soy milk, yogurt, cheese, and frozen desserts (good dairy substitutes for the lactose intolerant), meat substitutes, such as soy burgers and soy hot dogs (especially good for those trying to cut down on red meat).

“A healthy choice: Many soy foods are high in protein. Two exceptions are soybean oil, which is high in fat, and soy sauce, which is high in sodium.

“Soybeans also contain a chemical that is similar to the female hormone estrogen. Researchers say this chemical

may help prevent and treat some cancers, heart disease, and osteoporosis. It can also relieve the hot flashes associated with menopause.”

To learn more, call the United Soybean Board at 1-800-Talk-Soy (825-5769).

A color illustration (cartoon) shows a group of singing soy products: green vegetable soybeans in the pod, soy cheese, soy flour, and a soy hot dog in a bun. Address: 21555 Oxnard St., Woodland Hills, California 91367.

3076. Gardenburger, Inc. 1998. Second quarter financial report 1998. 1411 Southwest Morrison St., Suite 400, Portland, OR 97205. 11 p. 28 cm.

• **Summary:** This unconventional quarterly report consists of: (1) A letter to shareholders outlining the results of recent huge advertising expenditures. “Gardenburger’s first national television advertising campaign that began on May 4 and was highlighted by a 30-second spot on the last episode of ‘Seinfeld.’ The Seinfeld spot created a tremendous amount of public awareness for Gardenburger including stories in *The Wall Street Journal* and a piece on the NBC Nightly News with Tom Brokaw.

“Since the start of 1998, the veggie patty category in the retail grocery channel has grown 61 percent. Gardenburger has captured about 75 percent of this growth while our nearest competitor, Worthington Foods, has captured about 15 percent... As a result, Gardenburger’s share of the veggie patty category has grown steadily, and stands at approximately 50 percent as of the date of this report.”

(2 p). (2) A news release titled “Gardenburger reports 91% rise in net sales during second quarter to \$25.7 million.” However, during the most recent second quarter, Gardenburger lost \$6.240 million, compared with a loss of \$1.371 last year. (3) Balance sheets. (4) Three graphs using A.C. Nielsen scanner data. Graph #2 shows unit share of the veggie patties market from 3 Jan. 1998 to 4 July 1998. On Jan. 3 the market shares of three major products were as follows: Worthington (incl. Morningstar Farms, Loma Linda, Natural Touch, and Worthington): 42%. Gardenburger 27%. Harvest Burger 16%. Only July 4 the market shares were: Gardenburger 50%. Worthington 27%. Harvest Burger 10%. Graph #3 shows the unit market share of total meatless. On Jan. 3, veggie patties had 51% of this market and all other meatless products had 49%. On July 4 veggie patties had 70% and all other meatless products have 30%. Address: Portland, Oregon.

3077. Leading Edge Group. 1998. The U.S. health and natural food market: Past performance, current trends, and strategies for the future. 2171 Jericho Turnpike, Suite 200, Commack, NY 11725. 330 p. July. Price \$1,995.00. Illust. 29 cm. \*

• **Summary:** Three past editions of this report have been published by Business Trends Analysts, Inc. (BTA), which

is located at the same address as The Leading Edge Group. BTA is the parent company. Since it was founded 20 years ago, it had published reports under two brand names, each of which has a different style. Business Trends Analysts Reports tend to contain mostly secondary research, with an abundance of charts and graphs, and less text and analysis. Leading Edge Reports are conducted by a person with a specialty in that area. The report contains much more primary research and in-depth analysis, and is roughly twice as expensive. This report was conducted by Melina Laverty.

Chapter 5 of this report is titled “Soyfoods and alternative meat products: Market dynamics.

Overall report—Contents: 1. Executive summary. 2. Overall market dynamics (including Soyfoods). 3. The market for soy foods. 4. The market for herbal teas. 5. The market for dairy foods. 6. The market for grains and cereals. 7. The market for frozen foods. 8. The market for snack foods. 9. The market for groceries. 10. The health food consumer. 11. The health/natural food store industry. 12. Competitor profiles. 13. Industry directory. Address: Commack, New York. Phone: 516-462-2410.

3078. Zind, Tom. 1998. Making the case for soy: Soy protein merges into the fast lane as a functional food ingredient. *Food Processing (Chicago)* 59(7):31-32. July. Foods of Tomorrow section.

• **Summary:** Soy protein is getting more attention in the budding functional foods/nutraceuticals arena in large part because of the isoflavones in soy which have many health benefits. A number of companies have developed isoflavone-rich extracts—such as Novasoy from ADM. Big companies like General Foods and Nabisco are now working with soy and see a bright future ahead. ConAgra Frozen Foods is promoting soy in its Advantage\10 line, recommended by Dean Ornish, M.D. A color photo shows the front of one package. ADM markets a powdered soy drink named Nutribev and is test marketing a soy-based frozen dessert, named Dairylike, in Southern California. Protein Technologies International says it has found new scientific evidence that soy isoflavones can control cholesterol.

3079. Galeaz, Kim. 1998. Build on better health with soyfood guide pyramid. *Soy Connection (The) (Jefferson City, Missouri)* 6(3):4-5. Summer. [4 ref]

• **Summary:** Page 4 shows the full-page “Daily Soyfood Guide Pyramid” containing six different food groups. Page 5 describes how soyfoods can be used in each group, including soy flour, green soybeans, soymilk, soy cheese, soy yogurt, tofu, meat alternatives (incl. soy burgers), roasted soynuts, soynut butter, and soy oil. Address: RD.

3080. Worthington Foods, Inc. 1998. Second quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. 22 x 9 cm.

• **Summary:** Net sales for the second quarter of 1998 rose 14.8% over the same period in 1995, and net income rose 16%. Address: Worthington, Ohio. Phone: (614) 885-9511.

3081. Boca Burger, Inc. 1998. Even die-hard meat lovers have a hard time telling the difference between a real hamburger and a meatless Boca Burger (Ad). *Vegetarian Times*. Sept. p. 9.

• **Summary:** This full-page color illustration shows five Amazon piranhas in a gold fish bowl looking with big eyes—and teeth—at two Boca Burgers, between sesame buns with all the trimmings, just outside their bowl. At the top of the ad is written in small letters “(Amazon Piranha—*Serrasalmus rhombeus*).” Below the illustration: “Not only do Boca Burgers taste great, they’re also low in fat and calories.” The company logo states: “The Original Boca Burger—You Won’t Believe its Meatless.” At the very bottom of the ad: “For stores that carry Boca Burgers, visit [www.bocaburger.com](http://www.bocaburger.com).” Address: 1660 N.E. 12th Terrace, Ft. Lauderdale, Florida 33305. Phone: 954-524-1977.

3082. Ginsberg, Beth; Milken, Mike. 1998. The taste for living cookbook: Mike Milken’s favorite recipes for fighting cancer. Santa Monica, California: CaP CURE. Distributed by Time-Life Books. 118 p. Illust. Index. 26 x 27 cm. [2 ref]

• **Summary:** This is a gorgeous, low-fat vegetarian cookbook in which about half the recipes use soy as a major ingredient. It is loaded with color photos (many full page), playful graphics, and good advice. Many desserts contain more than 2 cups of natural cane sugar—Healthy? Note: 100% of the proceeds from this book are used to fund prostate cancer research. The book is available at bookstores nationwide, or it can be ordered by dialing toll-free 1-877-884-5433 (LIFE).

Contents: Introduction, by Michael Milken. Preface, by Beth Ginsberg. Four nutritional principles of CaP CURE to fight prostate cancer and other hormonal cancers: (1) Limit dietary fat to 15% of total energy intake (calories). (2) Eat 5 or more fruit and vegetable servings per day. (3) Consume 25 to 35 grams of dietary fiber a day. (4) Consume 40 to 60 grams of soy protein a day. “Americans have a five times higher incidence of prostate cancer than people living in Asia and eating a traditional diet. Soups. Exercise. Entrees. Soy and soybeans. Sandwiches and sides. Cruciferous vegetables. Breakfasts and shakes. Desserts. Healthy pantry. Afterword, by Donald S. Coffey, PhD, President of the American Assoc. for Cancer Research and Professor of Urology, Oncology, Pharmacology and Molecular Sciences, Johns Hopkins Hospital, Baltimore, Maryland: We are what we eat, how does food cause or protect us from cancer (ROS = reactive oxygen species), how did we lose our way?, how did our diet change (“The great apes were primarily vegetarian, consuming great quantities of vegetables that are high in fiber”), what should we do? About CaP CURE.

Soy-related recipes include: French onion soup (with

soy cheese and soy sauce, p. 20). Broccoli potato soup (with grated nonfat cheddar-style soy cheese, p. 22). Shiitake miso soup (with silken tofu and low-sodium tamari sauce, p. 22). Taco salad with a chili lime dressing (with 1½ lb fat-free soy meat, p. 26). Chinese roasted tofu salad (p. 33).

Note. This is the earliest English-language document seen (April 2013) that contains the term “roasted tofu;” it refers to grilled tofu.

Orange ginger dressing (with white miso and tamari, p. 33). Chef’s salad with miso shallot dressing (and Soy Deli Slices, p. 34-35). Thousand island dressing (with tofu, p. 34-35). Chopped vegetable salad (with 1 cup edamame, p. 36). Teriyaki tofu bowl with Chinese vegetables (p. 40). Tofu dog casserole with a pretzel crust (p. 42). Soy and Soybeans (with a sidebar on “understanding tofu,” p. 44-45). Lasagne with “soysage” (with fat-free vegetarian sausage, silken tofu, and soy cheese, p. 46). Spinach cannelloni with fresh tomato sauce (plus soy milk and low-fat tofu, p. 48-49). Vegetable fritatta with roasted tomato salsa (and 2 lb tofu, p. 54-55). Enchilada pie with ranchero sauce (and 1 lb soy cheese). Greek spinach pie in a phyllo nest (with tofu, p. 61; remake of spanakopita). Homemade vegetable pizza with soy cheese (p. 62-63). Vegetable reuben (with tempeh bacon strips, p. 68). Tofu egg salad sandwich (p. 72). New Deli (fat-free hot dog, p. 75). VLT with herb mustard (and fat-free tofu bologna slices, p. 76). Broccoli in soy cheese sauce (p. 78-79). Fruit shake (with soy protein isolate, p. 84). Blueberry banana multi-grain pancakes (with soy milk, p. 87). Strawberry shortcake (with soy milk, p. 96). Carrot cake (with silken tofu, p. 100-01). Devil’s “fool” cake with cocoa frosting (plus silken tofu in the cake, p. 104). Tofu cheesecake with fresh berry topping (p. 106-07). Banana cream pie (with 3 cups vanilla soy milk, p. 108). Old fashioned chocolate pudding (with 2 cups cocoa soy milk, p. 109). Maple flan (with 2 cups soy milk, p. 110). Address: CaP CURE, 1250 4th St., Suite 360, Santa Monica, California 90401. Phone: 310-458-2873.

3083. Goldbeck, Nikki; Goldbeck, David. 1998. The healthiest diet in the world: A cookbook and mentor. New York, NY: Dutton (Penguin/Putnam Inc.). xiii + 561 p. Sept. Illust. General index. Recipe index. 25 cm. [840+\* ref]

• **Summary:** This is an excellent book, with a wonderful title that lives up to its promise. Both authors are real professionals, with 25 years in the field. Contains extensive information about the importance of a wholefoods, natural foods diet, with plenty of fresh fruits, vegetables, beans, and soyfoods as sources of the many recently-discovered phytochemicals, which offer promising health benefits. The authors are fans of soyfoods, which are featured in both the text and recipes throughout the book.

In Part I, “Goldbeck’s Golden Guidelines,” No. 5 is “Super Soy Foods” (p. 14-15) which encourages readers to “Make soy foods a regular part of your diet.”

Part II is the recipe section, titled “In Nikki’s kitchen: Healthiest diet recipes.” The main soyfoods used in recipes are tofu (48 recipes!), tempeh (15), soy milk (14), miso (8), soybeans, whole dry (3), and soy flour (2). This book contains so many soy-related recipes that we cannot possibly list all of their names. So here are two samplers of such recipes to give a feeling of their diversity, extent, and inviting names. (1) Salad dressings and salads: Creamy miso-mustard coleslaw (p. 178). Tofu mayonnaise (p. 190). Creamy tofu Russian dressing (p. 191). Creamy tofu ranch dressing (p. 191). Lemon-tahini dressing (with soy sauce, p. 192). Creamy miso-mustard dressing (p. 193).

(2) Tempeh recipes: Tempeh strips (p. 31). Tempeh breakfast links (p. 32). Baked Italian tempeh (p. 38). Tempeh burgers (p. 39). Skewered tempeh with orange-nut crust (mini kebabs, p. 61). Maple-pecan tempeh (p. 98). Baked corn-tempeh hash (p. 98-99). Picadillo (Latin American sloppy Joes with tempeh, p. 99). Tempeh mushroom stew (p. 100). Asian grill (with marinated tempeh, p. 101). Tempeh kebabs (p. 102). Shish kebab in a bag (p. 103). Tempeh-bean chili (p. 114-15).

In Part III, “Mentor,” one entire chapter is dedicated to soyfoods (“5. In praise of soybeans,” p. 408-29). The contents of that chapter: Introduction. Soy’s special assets. The phytochemical furor. Protein plus. Soy fiber. Vitamins and minerals. Soy concerns. Soy food selection (incl. Western-style dairy and meat alternatives; soy cheese, soy ice cream, “soy-based imitation meat”). Stick with traditional soy foods: Tofu, tempeh, soy milk, soy nuts, whole soybeans (incl. edamame or green soybeans), soy sprouts, soy flour, soy grits, soy sauce, miso, okara (soy fiber), natto. Soy for health: Introduction, cancer (breast, prostate, and other hormonally influenced cancers), heart disease, diabetes, osteoporosis, women and soy, infant feeding. Nikki’s dialog boxes: Mixing and matching soy protein. Just because they call it “milk”: Nondairy vs. dairy. The question of salt. How to acquire your anti-cancer soy intake. Twenty-five grams of soy protein a day?

Soybeans are also mentioned in Chapter 6, “The beauty of beans” (see p. 431, 434). The 43-page bibliography of current scientific information on the health benefits of foods is worth the price of the book.

In the chapter titled “Controversial carbohydrates” is a long section about the glycemic index of foods titled “G-Force: A new perspective on carbohydrates” (p. 280-89); it includes a 6-page table showing G-force [glycemic index] ratings for individual foods. “Foods with a high G-Force [55 and above, bad] raise blood sugar levels quickly; this is usually matched by a rapid rise in insulin. Foods with low G-Force cause blood sugar levels to rise gradually, in which case insulin is usually released more evenly.” Foods that tend to have a high G-Force are: Desserts and sweets (doughnut 108, graham crackers 106), foods made from refined flours (baguette 136, bagel 103, white wheat bread 100), sweet and

refined breakfast cereals (puffed rice 132, Cornflakes 119, Cheerios 106), sugars (maltose 150, glucose 137, sucrose 92). Foods groups that tend to have low G-force are: Fruits (apple 54, apple juice 58, orange juice 63, but watermelon 103), legumes (soybeans 25, chickpeas 47), dairy products (yogurt 20, milk 46). vegetables (non-starchy). Address: Woodstock, New York.

3084. **Product Name:** Smart Deli Sticks (Meatless, Fat Free): [Pepperoni, or Three Peppercorn].

**Manufacturer’s Name:** Lightlife Foods, Inc.

**Manufacturer’s Address:** 153 Industrial Boulevard, Turners Falls, MA 01376. Phone: 1-877-SOY-EASY (877-769-3279).

**Date of Introduction:** 1998 September.

**Ingredients:** Pepperoni: Water, wheat gluten, soy protein isolate, natural flavors (from vegetable sources), evaporated cane juice, yeast extract, salt, soy sauce (water, soybeans, wheat, salt), paprika oleoresin, black pepper, soy oil.

**Wt/Vol., Packaging, Price:** Paperboard sleeve around 12 x 6 oz vacuum pack chubs.

**How Stored:** Refrigerated, 40 day shelf life. Or frozen.

**New Product–Documentation:** Leaflets (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo East (Baltimore, Maryland). 1998. Sept. 9-13. “Stick with It!” “Sticking to a healthy diet in these fast-paced times can be difficult. That’s why, when you need a quick snack, grab Lightlife’s new meatless Smart Deli Sticks. They satisfy your snack cravings with classic taste without sticking you with all that fat and cholesterol. Try both flavors.”

Spot in Whole Foods (Jan. 2000). Comes in Pepperoni and Soyami.

3085. Marandino, Cristin. 1998. Would you like tempeh with that? *Vegetarian Times*. Sept. p. 16. [1 ref]

• **Summary:** Mark Tsai, a 53-year-old Taiwanese immigrant, owns a fast-food restaurant in Covina, California. A devout vegetarian, he bought a Tastee Freez franchise in 1984, but 9 years ago he converted it to an all-vegetarian menu—and renamed it Tastee Covina. His chili is made with crumbled tempeh, his hot dogs are all soy, and his burgers all start with “veggie.” A color photo shows the front of the restaurant.

3086. Soyatech, Inc. 1998. *Soya & Oilseed Bluebook 1999*: The annual directory of the world oilseed industry. Bar Harbor, Maine: Soyatech. 424 p. Sept. Comprehensive index. Internet address index. Brand name index. Advertiser index. 28 cm.

• **Summary:** The Bluebook has a new title (see separate “serials” record). On the cover is a rectangular [Mercator projection] map of the world made of the different oilseeds now included in the Bluebook: Soya, corn, cottonseed, canola, rapeseed, sunflowerseed, palm kernel, palm, coconut, and peanut. The inside front cover and first page contain full

page color ads from Lucas Meyer, “The Lecithin People” and “Edelsoja: The Protein People.” On the back cover is a color ad from ADM promoting their vitamin E.

The Foreword begins: “The next millennium is just around the corner. A new age, perhaps, in which increased interdependence and trade are coupled with the free flow of information. A new era where the efficient utilization of the Earth’s resources is a key factor in all activities of business and daily life.

“One of Soyatech, Inc.’s founding principles is the dictum that, ‘the world would be a better place if it used its agricultural resources more efficiently—for food, for animals and as a renewable industrial product source.’ We continue to see this as a primary goal of our publication and information services.”

The Bluebook’s new title “more aptly describes the directory’s continuing evolution to encompass the expanding field of plant-based proteins and oils.”

Another new section, near the front of the book, titled “Translations of oilseed terminology” (p. 9-15), includes over 300 terms related to oilseeds translated from English into German, French, Spanish, and Portuguese.

Note: This is the earliest English-language document seen (Nov. 2014) that contains the term “plant-based proteins” (or “plant-based protein”). Address: 318 Main St., P.O. Box 84, Bar Harbor, Maine 04609. Phone: 207.288.4969.

3087. Spice of Life. 1998. “For a delicious, nutritious protein snack try my ‘Spice of Life’ Meatless Jerky”—Spice Williams-Crosby (Ad). *Vegetarian Times*. Sept. p. 107.

• **Summary:** This full-page 3-color ad has as its background many “Meatless” symbols (a steak in a circle with a diagonal line across it). A small photo by the ad slogan shows actress Spice Williams-Crosby. “For more information call 818.909.0052 or check out our web site at: [www.Spice-of-Life.com](http://www.Spice-of-Life.com). My personal guarantee! If you try my Spice of Life Meatless Jerky and you don’t feel that its one of the best

snacks you’ve ever tasted, I will gladly refund your money. Every cent.”

3088. **Product Name:** Tempeh Burger.

**Manufacturer’s Name:** Sun Foods Ltd.

**Manufacturer’s Address:** 115 McCormack St., Toronto, ON M6N 1X8 Canada. Phone: 416-766-8214.

**Date of Introduction:** 1998 September.

**New Product–Documentation:** Letter (fax) from Jon Kessler of Sunergia Soyfoods. This new product was shown at the Natural Products Expo East at Baltimore, Maryland (Sept. 9-13). The company president is Harry Ha. Fax: 416-766-8309.

3089. **Product Name:** Veat Vegetarian Nuggets, Fillet, Breast, Gourmet-Bites (Made from Textured Soy Protein).

**Manufacturer’s Name:** Veat Gourmet. Made in Taiwan.

**Manufacturer’s Address:** Importer: Veat Gourmet, 836 B Southhampton Road, No. 281, Benicia, CA 94510. Phone: 1-888-321-8328 (toll free).

**Date of Introduction:** 1998 September.

**Ingredients:** High fiber texturized soy protein, soy oil (expeller pressed), whey protein, potato starch, unrefined evaporated cane juice, spices, sea salt.

**Wt/Vol., Packaging, Price:** 10.5 oz. paperboard box. Retail for \$4.69 (1999/04, Lafayette, California).

**How Stored:** Frozen.

**New Product–Documentation:** Product with Label purchased at Open Sesame in Lafayette, California. 1999. April 20. 6 by 6 by 1.75 inch paperboard box. White, green, yellow, and black on blue. A color photo shows the product used in a vegetarian shish-kebab. “Veat—The next generation of soy protein. Pre-cooked. Heat & serve.” On the back is a recipe for Marinade next to a color photo of two shish-kebab skewers on a plate with rice.

Soyfoods Center taste test. 1999. May 23. The cooking instructions are all wrong. Texture is excellent but the product is too dry without a marinade. Talk with company

owner in Benicia, California. 1999. May 3. These four products were launched in Sept. 1998. The fillet is like fillet of salmon, the breast like chicken breast, the nuggets like chicken nuggets, and the bites like chunks of pork. The company owned by George Weissman and his son, Ariel.

Leaflet (3 panels each side) sent by Patricia Smith from Natural Products Expo West. 2000. March. Shows the front panels of four Veat products, incl. Veggie Breast, Veggie Nuggets, Veggie Bites.

3090. McDermott, Ron. 1998. Thoughts on Gardenburger's recent spate of advertising for meat alternatives (Interview). *SoyaScan Notes*. Oct. 7. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** "Gardenburger" is a great product name, and this advertising campaign has done a lot to build awareness of the category, as well as of the Gardenburger line of products. This has helped all companies in the category, including Worthington. As this category continues to grow, Worthington's goals are to have the widest variety of products (which it now has), the best quality, and the most innovative products. Address: Vice President Research & Technology, Worthington Foods, 900 Proprietors Rd., Worthington, Ohio 43085-3194. Phone: 614-885-9511.

3091. Black, Pam. 1998. Is soy the recipe for what ails you? *Business Week*. Oct. 26. p. 162-E18.

• **Summary:** The soybean gained prominence as a health food in the 1970s. Now even former junk-bond king Michael Milken is "promoting soy's potential to fight prostate cancer..." During the past decade, scientists have discovered estrogen-like active substances named isoflavones or phytoestrogens which may be responsible for "soy's health effects."

Researchers have proven that soy has cardiovascular benefits, primarily by lowering low-density lipoprotein, or LDL ("bad cholesterol"). The mechanism is not clear; the soy may keep LDL from being oxidized to form plaques that clog arteries. Soy increases flexibility of the arteries, which stiffen and harden with age. Thomas Clarkson, professor of comparative medicine at Wake Forest University School of Medicine (Winston Salem, North Carolina) emphasizes that some amount of soy protein must be consumed for the phytoestrogens to exert cardio-protective benefits. Isoflavone pills alone will not be effective. Scientists recommend consuming 30 to 60 mg of isoflavones per day with 7-10 gm of soy protein. A table shows good sources of soy protein, plus their content of isoflavones (mg) and protein (gm): Solgar Iso-Soy powder (1 oz) 103 / 12. GeniSoy natural protein powder (1 oz) 74 / 24. White Wave baked tofu (3 oz): 52 / 19. White Wave tempeh (3 oz) 47 / 18. Edensoy original drink (soymilk, 8 oz) 41 / 10. Soyboy Not Dogs (1.5 oz per dog) 35 / 7.

Soy's effects on cancer are less conclusive; most

researchers doubt that soy is harmful. Soy has great appeal to women approaching or past menopause. Nutritionists think soy phytoestrogens may be safer than Premarin—which may increase the risk of breast cancer.

"And for those of you who've always turned up your noses at tofu, there is good news: Soy is available in such guises as hot dogs, burgers, cheeses, and ice cream."

3092. Dwyer, Steve. 1998. A lean, mean, meatless machine: Rising stars—Gardenburger. *Prepared Foods*. Oct. p. 12-13.

• **Summary:** An excellent, very positive article about how Lyle Hubbard has used \$17 million in national ads to build Gardenburger (of Portland, Oregon; 200 employees, \$58 million in sales) into a thriving company, and move its product from the health food market into the mainstream. Typical consumers think that veggie burgers don't taste good, so the ads focused on the message that they are fun, tasty, and can even satisfy consumers spiritually. Gardenburger spent its first big ad money last May—\$1.5 million for a spot on the last episode of "Seinfeld," which was watched by 104 million people. The ad had the second highest recall among consumers of the 28 ads that ran during the show.

The company is riding a wave toward healthier eating; sales of meat alternative products grew at a compound growth rate of 49.5% between 1992 and 1996. Recent figures show that sales of veggie burgers are growing at 60% a year in supermarkets, and that Gardenburger has captured 85% of that growth. During the last year, Gardenburger's sales have risen 240% and its retail market share has jumped to 54% from 24%.

Everyone knew that Gardenburger's ad campaign was risky. One fear was that big competitors such as Worthington Foods and Boca Burger might benefit from the ads more than Gardenburger. But that did not happen.

Hubbard spent years as an executive at Quaker Oats Co., where he ran the \$500 million convenience food retail division. In 1994 Quaker Oats set its sights on Gardenburger, and assigned Hubbard to explore possible acquisition. Hubbard soon realized that the company had a niche-type product that appeared ready to go mainstream. It reminded him of what happened at Quaker with rice cakes and Gatorade. About a year later Hubbard left Quaker and was chosen in April 1996 to lead Gardenburger. He soon stripped the product line down to include just meatless burgers—dropping the company's breakfast sausage and gluten-based frankfurter. Though Gardenburger is still not making a profit, Hubbard predicts the growing cash flow will generate profits in 1999. Two photos show Lyle Hubbard. Address: Business editor.

3093. **Product Name:** Meatless Meat-Balls.

**Manufacturer's Name:** Elite Foods.

**Manufacturer's Address:** 489 Cabot Road, South San Francisco, CA 94080. Phone: 1-800-376-5368.

**Date of Introduction:** 1998 October.

**Ingredients:** Water, textured soy protein, modified gluten, pressed canola oil, natural flavors, salt, bread crumbs, autolyzed yeast, vegetable gum, sugar, spices, garlic powder, dehydrated onion, egg yolk solids, nonfat dry milk powder, parsley flakes.

**Wt/Vol., Packaging, Price:** 16 oz. reclosable plastic bag.

**How Stored:** Frozen.

**New Product–Documentation:** Talk with Robin Lucky of Elite Foods. 1998. Sept. 16. In March 1977 a company named Vegitarian, Inc. (based in South San Francisco) launched a product named Nature's Ground, a meatless hamburger sold in chubs, or sausage links. That company and product were not successful; now both have been folded into Elite Foods. The product will appear next month at Raley's in a different form, as frozen Meatless Meat-Balls, in a one-pound blue and red plastic bag. She will hand-deliver a sample as soon as the product is on the market. Leaflet (8½ by 11 inch, color) sent by Robin Lucky of Elite Foods. 1998. Oct. 14. "The world's first 100% meatless meatball. Tastes great! Low fat. Cholesterol free." A photo shows the package and front panel.

3094. United Soybean Board. 1998. National report: Consumer attitudes about nutrition, 1998/1999. Seattle, Washington. 8 p. Oct. 28 cm.

• **Summary:** This fifth annual nationwide survey, commissioned by USB, was conducted in July 1997 by an independent research firm in Seattle, Washington. Random telephone interviews were completed with 1,028 consumers. The study's margin of error is ±3.2 percent and has a confidence level of 95%.

Contents: Nutrition concern and habits. Dietary changes in eating habits. Grocery and dining choices. Media sources and nutritional information. Nutrition terms and consumers' level of concern: Fat (73%), saturated fat (73%), trans fatty acids (42%). Concern about hydrogenation and trans fatty acids: 82% consider *trans* fatty acids to be either somewhat or very unhealthy. But only 28% consider margarine to be unacceptable. Consumer awareness and perception of soy products. Consumers' willingness to pay more for healthy foods. Consumer perceptions of genetically modified food and labeling. Consumer perceptions of cooking oil.

Consumer awareness and perception of soy products: 1. 67% of consumers believe soy products are healthy, up from 59% in 1997. Those with a college education are most likely to perceive soyfoods as healthy (75%). 2. 67% of consumers have tried soy products. 3. 15% of Americans eat soy products at least once a week. Although females are more health conscious than males, more males (19%) eat soy products once a week as compared to 13% of females. 4. Among soy products, tofu and soy veggie burgers continue to receive the highest level of trial among consumers (38%). 67% of consumers have tried a soy product. 5. Consumers

most often include soy products in their diet of word-of-mouth (38%) from friends, family, or other acquaintances. Magazine and newspaper articles (23%) are also influential factors in deciding to include soy products in the diet. 6. The strongest factor driving trial of soy products is education level. Those with a college education are significantly more likely to have tried soy products than consumers with less than a college education. 7. While an increased number of consumers perceive soy products as healthy, usage is not increasing at the same rate. This may be a function of several factors: (a) Lack of understanding of different soy products available. (b) Lack of understanding of how one incorporates soy into cooking and the diet. (c) Lack of availability of soy products. (d) Negative attitudes and perceptions toward soy products due to factors such as taste and texture.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at [www.soyconnection.com/health\\_nutrition/pdf/](http://www.soyconnection.com/health_nutrition/pdf/).

3095. Worthington Foods, Inc. 1998. Third quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. 22 x 9 cm.

• **Summary:** Net sales increased 21% to \$35 million for the third quarter vs. 29 million a year ago. Net sales are up 18% for the first 9 months of 1998 compared with the same period one year ago. "Despite Gardenburger's concentrated efforts in the veggie burger category, including a \$17 million TV campaign, 5 national FSI drops in Sunday newspapers, and very aggressive trade support for shelf space and retail price reductions, Morningstar Farms Veggie Burger sales for the past nine months are up over 13 percent. However, the veggie burger category is only 40 percent of Morningstar Farms meat substitute business! The other 60 percent of our meat alternative business has increased nearly 40 percent during the past 3 quarters."

"On October 16, 1998, Worthington Foods, Inc., closed on the purchase of the Harvest Burger brand of meat alternative products from the Archer-Daniels-Midland Company (ADM). The purchase price of \$9.3 million was paid with 488,750 shares of common stock from Worthington Foods, Inc., approximately 4.1 percent of the outstanding shares of stock... Sales of Harvest Burger branded meat alternative products have been approximately \$15 million over the past 12 months with approximately 8 percent market share. Now sold under the Green Giant brand, the Harvest Burger Original has the 3rd highest sales-per-point of distribution of all burgers. These same Harvest Burger products will begin appearing under the Morningstar Farms brand beginning January 1, 1999. Foodservice sales were up 34% for the third quarter of this year compared to 1997 and increased 37% for the first nine months of the year." Address: Worthington, Ohio. Phone: (614) 885-9511.

3096. **Product Name:** Morningstar Farms Harvest Burgers

[Original Flavor, Southwestern-Style, or Italian, plus pre-cooked Crumbles for Recipes].

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd.,  
Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1998 October.

**Wt/Vol., Packaging, Price:** 4 Corn Dogs weigh 10.0 oz (284 gm). Paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Worthington Foods annual report. 1999. March. p. 4-5. On 16 Oct. 1998 Worthington purchased the Harvest Burger product line from ADM. As part of the agreement ADM continues to produce the Harvest Burgers—previously marketed by Pillsbury under the Green Giant label—at its Illinois plant. A color photo shows the label.

3097. Worthington Foods; Morningstar Farms. 1998. Meatless menu innovations: We played with our vegetables and look what happened! #1 in meatless (Ad). *OnSite (Special Section to Nation's Restaurant News)* 1(2):69. Sept/Oct.

• **Summary:** See next page. This full-page color ad, targeted at restaurateurs, states: “Consumer requests to ‘make mine meatless’ at breakfast, lunch, and dinner skyrocket. Restaurants are attracting new customers with low-fat, great-tasting vegetarian meal options.

“National surveys show: 80% of the nation’s restaurants see vegetarianism as: A fast growing business, a profitable menu option, and appealing to all age groups. 27% of all the country’s restaurants will serve a veggie burger this year...”

Six color photos show prepared vegetarian dishes: “Sausage Style Recipe Crumbles. Breakfast Patties, Links & Better ‘n Eggs, America’s Original Veggie Burgers, America’s Original Veggie Dogs, Burger Style Recipe Crumbles, Chik Nuggets.” Slogan: “Try Morningstar Farms. We are ‘a cut above the rest.’ #1 in Meatless.”

3098. Ghiraldini, Maura. 1998. Biolab and Italy’s other major tofu manufacturers (Interview). *SoyaScan Notes*. Nov. 9. Followed by a fax. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The two largest tofu manufacturers in Italy are Soyalab and La Fonte de la Vita, but they are both owned by The Key Group, which bought them 4-5 years ago. The Key Group is the largest in Italy in biological (organic) foods.

Biolab, which started in June 1992, is the third largest. The founder and owner is Massimo Santinelli, now age 34; they also make various types of seitan. Biolab is distributed by some of Italy’s bigger distributors of biological (organic) food: Ecor, Probios, Baule Volante, Mustiola, and La Fenice. Biolab presently has 7 employees; all ingredients are from biological agriculture (organically grown).

The company now makes the following products:

Seitan: Natural, with spices, smoked, and grilled. Tofu: Natural, smoked, “Mediterranean” (with carrots, olives, etc), erbe (with herbs), and grilled. Soymilk. Rice milk. Burgers with seitan: Rice & mushrooms, millet & carrots, millet & pepper, wheat (spelt/farro) & aubergine (eggplant). Address: Via dei Grabizio 11, 34170 Gorizia, Italy. Phone: +39 481 533522.

3099. Reuters (Washington, DC). 1998. Tofurky, Unturkey give vegetarians good reasons to utter holiday thanks. *Japan Times*. Nov. 16.

• **Summary:** For the 2 million vegetarians living in the United States, Thanksgiving is for the birds. They prefer to dine on Tofurky (from Turtle Island Foods, Inc., Hood River, Oregon) or Unturkey (from Now and Zen, San Francisco, California). Seth Tibbott of Turtle Island expects to sell close to 50,000 Tofurky meals this year by Christmas; sales of the product have tripled every year since it was introduced in 1994. Robin Kaufer of Now and Zen says they have sold 20,000 Unturkeys, up from 5,000 in 1997 -the first year they were available in stores. Previously they were sold only in a restaurant.

3100. Eliot, Jan. 1998. Stone Soup: Thanksgiving and Tofurky. *Oregonian (Portland, Oregon)*. Nov. 23. Sunday.

• **Summary:** The little girl, Holly, asks: “Are aunt Joan’s friends bringing ‘Tofurky’ again?” Holly thinks aunt Joan and the people and things she brings on Thanksgiving are weird. The mother shouts: “It doesn’t matter. It’s about family.”

3101. Auerbach, Jon G. 1998. Exit the entree: What is turkey day without the bird? Some find it more pleasant dining on pheasant, boar, woodcock or Spaghettios. *Wall Street Journal*. Nov. 25. p. A1, A6.

• **Summary:** Although 91% of Americans are expected to eat a turkey this Thanksgiving, many now prefer alternatives to the traditional bird. One man serves ostrich fillets instead, with a dash of soy sauce. “Nationally, People for the Ethical Treatment of Animals [PETA] is promoting Tofurky, a meatless, soy-based (not basted) turkey alternative.” According to USDA statistics, turkey production in the USA is expected to drop by 5% this year to about 5.2 billion pounds.

Why do Americans eat turkey at Thanksgiving? In part because a well-documented Pilgrim feast in 1621 included turkey. But animal scientists say turkey really caught on because they could breed big birds with lots of meat—leading to an affordable feast.

What do Americans dislike about turkey? It takes all day to cook, ties up the whole kitchen, and the dark meat (such as the legs) cooks more slowly than the white meat (the breast); so on a big bird, the breast may be dry by the time the legs are cooked. Address: Staff Reporter.

# Meatless Menu Innovations™

We played with our vegetables and look what happend!

- Consumer requests to “make mine meatless” at breakfast, lunch and dinner skyrocket. Restaurants are attracting new customers with low-fat, great-tasting, vegetarian meal options.
- National surveys show:
  - 80% of the nation’s restaurants see vegetarianism as: A fast growing business, a profitable menu option, and appealing to all age groups.
  - 27% of the country’s restaurants will serve a veggie burger this year.
- Worthington Foods, Inc. offers the widest variety of great-tasting, low-fat, precooked, meatless meal options in foodservice today.
- Thinking vegetarian? Try Morningstar Farms, the country’s #1 consumer brand for meatless. Enjoy the benefits of great breakfast, lunch, and dinner products while taking advantage of high consumer demand.

#1 in Meatless

3102. Hauser, Susan G. 1998. Tofurky: Vegetarian nirvana. *Wall Street Journal*. Nov. 25. p. A6.

• **Summary:** Tofurky tycoon Seth Tibbott, of Hood River, Oregon, has sold about 35,000 alternative Thanksgiving feasts so far this year. Address: Staff Reporter.

3103. Watson, Traci. 1998. Vegetarians trade bird for the curd: Demand for tofu turkeys 'unbelievable,' creator says. *USA Today*. Nov. 25.

• **Summary:** About Seth Tibbott and Tofurky.

3104. Cowley, Geoffrey; Underwood, Anne; Springen, Karen; Davis, Alisha. 1998. Cancer & diet: Can you eat to beat malignancy? A controversial diet book is just one sign of the revolutionary new thinking about food and health. *Newsweek*. Nov. 30. p. 60-66. [3 ref]

• **Summary:** This cover story discusses the many phytochemicals in foods which may reduce risk of various cancers. On the cover is a huge fork piercing a piece of broccoli. The cover text reads: "Eating to beat the odds: What you need to know." On the top half of page 60 is a large color photo of a "low-risk dinner," ready to serve on a table. One of the three portions on the plate is a mixture of beans and tofu cubes. An arrow points to this portion; the caption reads: "The fiber in beans fights colon cancer. And the genistein in tofu appears to pack a disease-preventing wallop." On the facing page (61) is a "high-risk dinner" with advice to omit the grilled steak, french fries, cheesecake, soda, butter on white bread, and salad dressing. The article overstates the health benefits of soy and gives no scientific references for its many glowing assertions.

By 1986 laboratory researchers were already discovering many new chemicals in foods; in test tubes these obscure compounds were showing remarkable ability to disrupt the formation of tumors. Some expert oncologists believe that the future of cancer prevention is food. Yet the cancer death rate in America is roughly the same today as it was in 1970. Americans die of breast, colon, and prostate cancer at five to 30 times the rate of people in many parts of the world. Take breast cancer: The death rate in Thailand and Sri Lanka is 2-5 per 100,000 women; in the USA it is 30-40 per 100,000.

A comprehensive analysis published last year by leading cancer researchers concluded that "poor eating habits account for a third of all cancer—roughly the same proportion attributed to smoking." A spate of brash new books, some by physicians, argue that anyone can eat to reduce cancer risk. They offer specific advice, "from eating the right fats to upping your intake of soy." The best selling of these how-to books is *The Breast Cancer Prevention Diet*, by Dr. Bob Arnot, a nonpracticing physician who covers health and medicine for NBC. It now tops the *New York Times* best-seller list. But Fran Visco of the National Breast Cancer Coalition calls it "incredibly irresponsible." All these

new books offer medical advice that is not backed by solid scientific evidence.—And so does this Newsweek article! But interesting questions arise: "Should we live on cheeseburgers until the case for soy burgers is seamless?" Most experts answer "no." If people who eat in accordance with what we know today, cancer rates would definitely drop.

A sidebar titled "Eating to beat the Big Four" gives three statistics on each of America's four leading malignancies: Estimated number of U.S. cases this year, percentage of Americans diagnosed during their lifetime, and potential reduction through diet and lifestyle. Prostate cancer: 184,500 / 17% / 10-20%. Breast cancer: 180,300 / 14% / 33-50%. Lung cancer: 171,500 / 7% / 90-95%. Colon/rectal cancer: 95,600 / 6% / 66-75%. "Breast cancer risk may be lowered by eating soy foods." "Weapons against colon cancer include calcium and fiber."

Tumors arise through a three-step process: initiation, promotion, and progression. Preliminary evidence suggests that compounds found in particular foods can interfere with each of these steps. A two-page sidebar shows each step graphically. (1) Initiation occurs when something alters a cell's genetic makeup, causing it to divide more than it should. The most common cause of such DNA damage is oxygen, from highly reactive oxygen molecules called free radicals. They steal electrons from other molecules, setting off a chain reaction that can damage DNA. Food tips: Antioxidants help neutralize free radicals. Garlic contains allyl sulfides which help limit the production of cancer-causing phase I enzymes, which are produced in the liver and break down procarcinogens. Cruciferous vegetables (such as broccoli) boost production of protective phase II enzymes that cart away chemical debris. (2) Promotion occurs when the damaged cell (a precancerous lesion) multiplies out of control to create a tumor. It soon sends out a network of blood vessels to deliver nutrients and oxygen necessary for further growth. Food tips: Tumor cells seem to grow less aggressively on low-fat diets than on high-fat. But Many experts now agree that, for cancer, the type of fat is as important as the amount. Some types of polyunsaturated fats are protective, others probably harmful. Omega-3 (alpha-linolenic) fatty acids may thwart tumor growth, whereas omega-6 (linoleic) fatty acids may promote it. "Trans fats: Artificially processed polyunsaturates, they are the worst for heart disease, and one study linked them to increased breast-cancer risk. Found in packaged snacks" [and many margarines]. "Soy products contain... isoflavones, which act as weak estrogens, and leave less room for strong ones. One color photo shows cubes of tofu, with the caption "Soy may protect reproductive tissues." Another shows estrogen receptors on the surface of a cell. (3) Progression occurs when the tumor (a mass of rapidly dividing cells) builds itself a blood supply and starts to invade surrounding tissues. The body's own estrogen promotes fast growth of breast cells in women. "Tumor cells release growth factors that

promote the development of new blood vessels a process known as angiogenesis.”

A sidebar shows four cancer survivors and their diets: Any Grove of Intel, a prostate cancer survivor, has a daily glass of orange juice with green-tea extract and soy protein. Mike Milken is also a prostate cancer survivor. “A soy fanatic, he eats tofu dogs, ‘not-meat’ loaf, and soy cheese,” plus smoothies spiked with vitamins. Christine Pirello, hostess of PBS’s ‘Christina Cooks,’ was diagnosed with leukemia in 1983. She went macrobiotic, loading up on brown rice, cabbage, tofu, and beans, with no dairy or animal products, except for fish.

On page 66 is a long section of text on soy: “Soy foods are another good bet, especially if you’re worried about breast or prostate cancer. One of the strongest promoters of reproductive tumors is estrogen. Women exposed to high levels of the hormone—through early menstruation, late childbearing, late menopause, or obesity—suffer far more than their share of breast cancer. Soy contains weak estrogens, or isoflavones, which compete with the full-strength hormone for access to cells. Isoflavones bind with cell receptors that would normally attract the body’s own estrogen, but the growth signal they deliver is only one thousandth as strong. That means less cell division and, presumably, less risk that a small lesion will become cancerous. No one has tested that assumption in a controlled clinical trial, but population studies suggest that tofu, tempeh, and soy milk could have some of the same benefits as the prescription drug tamoxifen, without the side effects. Chinese women on high-soy diets had only half the breast cancer incidence of women on low-soy diets.” Soy also contains “compounds known as Cox-2 inhibitors, which can impede the growth of new blood vessels.” At least in a test tube, tumor cells doused with Cox-2 inhibitors stop producing growth factors that trigger growth of blood vessels.

This is another article about “magic bullets.” But the big, new message from Newsweek seems to be their realization that low-fat plant-based diets can reduce one’s risk of cancer—as well as heart disease, stroke, and obesity. The article ends: “The real gamble is to stick with fast food [or a standard American diet] and assume you’ll be all right.”

Note: This is the earliest (and only) English-language document seen (April 2003) that uses the term “soy fanatic.”

3105. *Newsweek*. 1998. Perspectives: Tofurky. Nov. 30. p. 23. Typed, without signature.

• **Summary:** This is a page of quotable quotes. “Since we didn’t have the anatomy to limit us, we decided everyone can get a drumstick.”

Source: “An unnamed employee at Turtle Island Foods, which makes Tofurky, a stuffed roast made from tofu and wheat gluten, with gravy and four drumsticks.” Note: The drumsticks are made from tempeh.

3106. *Nutrition Business Journal* (San Diego, California). 1998. Haldane leads U.K. market for vegetarian and non-dairy foods. 3(10/11):26. Oct/Nov.

• **Summary:** The Haldane Foods Group is owned by agribusiness giant Archer Daniels Midland Co., based in Decatur, Illinois. ADM group vice president Larry Cunningham says Haldane has revenues of under 50 million British pounds, from sales of 350 products sporting such well-known brands as Vegemince (the company’s brand leader; a soy-based minced meat alternative), Realeat, Direct Foods, Dietburger, So Good, and Hera.

The *Linda McCartney* line of vegetarian foods, launched in 1991, has become a leader in its category, with retail sales of about 50 million pounds in 1998. Haldane’s newest line, launched in April, is *Linda McCartney’s Dairylike*, non-dairy desserts developed by Haldane and marketed under a licensing agreement to use the Linda McCartney brand name. The line includes cultured and frozen vegan desserts which are free of lactose and cholesterol and fortified with calcium and minerals. Haldane is promoting the new Dairylike line using national TV and print ads. ADM is test marketing Dairylike in Southern California under the name Dairyless.

About one-third of Haldane’s sales come from products made by third party manufacturers such as Asda and McVities.

During the last year Haldane has faced two big challenges: (1) In the spring of 1998 EU food labeling legislation required companies to stop using the term “soya milk” or “yoghurt” or any misspelling of it. Haldane reformulated, renamed, and relaunched its line of non-dairy products. (2) In Sept. 1998 a EU regulation which came into effect requiring products containing genetically modified soy protein to be labelled appropriately. Haldane guaranteed that all its soy products are GMO-free, made from identity preserved soybeans.

Haldane’s “Realeat Survey,” now in its 15th year, studies attitudes toward meat eating in the British Isles. Each survey is conducted by The Gallup Organization. The 1997 Realeat Survey showed that a record 5.4% of the British population now chooses a vegetarian diet, up 20% over 1995. Thus, Britain now has more than 3 million vegetarians. And 14.3% of the population no longer eats red meat—over 8 million people. Many Britishers avoid red meat because of fear of BSE or Mad Cow Disease. In the 1995 Survey 7% mentioned BSE as their main health concern; this figure rose to nearly 22% in the 1997 survey. The 1998 Survey showed that 13% (over 7 million people) never or almost never eat dairy products. Today roughly half of the British population is actively reducing consumption of meat, especially red meat, and one-third is doing the same with dairy products.

3107. *Soyfoods* (ASA, Europe). 1998. Tivall resource pack for UK schools. 9(3):3. Autumn.

• **Summary:** “Tivall produces a school resource pack on

vegetarianism proving useful tips on how to achieve a balanced diet as a vegetarian.

“The pack includes information about the company and its products; some useful facts about vegetarianism; posters, factsheets and worksheets.

“For more information about the pack contact Tivall Europe BV, 106 London St, Reading, Berks RG1 2SJ, UK. Phone: +44 (0) 118 958 3040, fax: +44 (0) 118 939 1226, e-mail: chptiv-UK.demon.co.uk.”

3108. *Soyfoods (ASA, Europe)*. 1998. New look and new products for Tivall. 9(3):5. Autumn.

• **Summary:** Tivall, which produces branded and private label products for the UK and continental Europe, has redesigned its packaging. The company has a 17% market share of the frozen vegetarian soya market. The Vegetarian Pieces are both new products for Tivall, based on wheat and pea protein, is the form of textured protein fibers (FVP–Fibrous Vegetable Protein). A photo shows the front panel of seven Tivall brand products: Vegetarian Pieces [Beef Style, or Chicken Style], Vegetarian Nuggets, Vegetarian 4 Burgers, Vegetarian 4 Schnitzels, Vegetarian 8 Frankfurters, and Vegetarian 20 Cocktail Sausages. Contact: Tivall Europe BV, 106 London St., Reading, Berks RG1 2SJ, UK. Note: Tivall is based in Israel.

3109. Ghiraldini, Maura; Santinelli, Masimo. 1998. Re: History of Biolab of Gorizia, Italy. Form filled out and returned to William Shurtleff at Soyfoods Center, Dec. 5. Form dated Nov. 20. 3 p.

• **Summary:** This company history form, sent by Soyfoods Center, was filled out by Maura who got the information by interviewing Massimo on Nov. 20. The company was founded in June 1992 by Massimo Santinelli. That same month they started to make and sell soyfoods commercially. The original purpose was contributing to the development of biologic (organic) agriculture and the production of good vegetable [plant-based] food so that a growing number of people are involved in consuming proteins from wheat or soy. The company address has not changed; the phone number was previously 0481-32261.

**Milestones:** 1992–Several months after opening, Biolab found its first distributor, Gea, from Treviso. 1994–Massimo’s father, Piero, joined his son at Biolab. Now he has become essential to the company’s work and is the “seitan master.”

**Firsts:** “Unlike other companies, we aim at producing vegetarian food that tastes good to Italian consumers, who are not always vegetarian, and who like to use tofu or seitan in a Mediterranean diet. So a growing number of people will come closer to meatless diets, without losing the pleasure and health that the Italian way of cooking gives.”

**Reasons for success:** “The good taste of our seitan. And, of course, the help of our distributor, which has grown bigger

in the same way we have.”

**Soyfood products history:** Introduced during 1992 and still sold–Tofu, Smoked tofu, Pickled tofu, seitan, smoked seitan. Discontinued: Pickled seitan, Sauce with seitan and tomato, Tomato sauce with olives and capers, Tomato sauce with mushrooms. Introduced in 1993 and still sold: Seitan burgers with millet and carrots, Seitan burger with rice & mushrooms. Discontinued: Tofu burgers, Tofu & seitan kebabs on skewers (very good but too laborious). Introduced in 1994: Grilled tofu, Grilled seitan, Tofu with herbs, Tofu Mediterraneo (carrots, capers, corn, olives), Seitan slices (for making sandwiches). Introduced in 1997: Risolight (rice milk), Roast of seitan. To be introduced in 1999: Seitan burgers with millet & pepper, Seitan burgers with wheat “farro” & aubergine [eggplant].

**Present production of various product categories:** Tofu (all types) total: 380 kg/week. Seitan (especially regular seitan and grilled seitan): 500 kg/week. Risolight (rice milk): 1,200 bottles/week. The company’s three best-sell products in descending order of dollar value: Seitan Naturale 300 kg/week. Tofu Naturale 250 kg/week. Risolight 1,200 bottles.

The company now employs 7 people including the owners (including 2 in management and 5 in production). Last year net sales were 700 million lire. Over the past 2-3 years sales have grown at about 30% a year. The net worth of the business is about 105 million lire. The present building has about 100 square meters for production and 20 square meters for office space. Massimo is the sole owner of the business. Address: Via dei Grabizio 11, 34170 Gorizia, Italy. Phone: +39 0481 533522.

3110. **Product Name:** Soft Soy Sausage [Sunflower Breakfast, or Betterwurst].

**Manufacturer’s Name:** Sunergia Soyfoods.

**Manufacturer’s Address:** P.O. Box 1186, Charlottesville, VA 22902. Phone: 804-970-2798.

**Date of Introduction:** 1998 December.

**Ingredients:** Sunflower breakfast: Organic okara soybean fiber (water, organic soybeans), water, organic whole oat flour, organic tamari soy sauce (water, organic soybeans, salt), organic sunflower seeds, spices (allspice, coriander, whole fennel seed, black pepper, sage), organic onion flakes, organic whole brown mustard seed. Organic content: 98%.

**Wt/Vol., Packaging, Price:** 10 oz. (340 gm). Chub pack. Retail for \$3.29.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Jon Kessler, founder and owner of Sunergia. 1999. March 16. Talk with Jon Kessler. 1999. March 21. These products were introduced in mid-December 1998.

into effect. However the regulation exempts foods which contain no soy protein but do contain soy oil or soy lecithin. Sept.–Imagine Foods of Palo Alto, California, the natural foods leader in nondairy beverages, launches Soy Dream, the company's first soy product. They support the product with an extensive and very creative advertising campaign.

Sept.–Protein Technologies International starts to offer certified non-GMO soy protein isolates.

Oct.–The Hain Food Group (which owns Westbrae) has announced that it will start to label some of its products as GMO-Free (i.e. free of genetically modified / engineered organisms). It has developed a “Pure Food” logo and a “Just Say No to GEOs” slogan.

Oct. 16–Worthington Foods purchases the Harvest Burger product line from ADM; by agreement, ADM will continue to make the Harvest Burgers at its Illinois plant.

Nov. 1-2–Conference titled “Estrogen, phytoestrogens and cognitive function” held in Seattle, Washington (organized by Mark Messina), largely to learn more about the research of Lon White on tofu and dementia/Alzheimer's disease.

1998 Dec. 31–DE-VAU-GE acquires Bruno Fischer GmbH, which sells bottled soymilk; both companies are located in Germany.

Major trends: (1) The steady expansion of genetically engineered Roundup Ready soybeans. This year an estimated 30% of America's soybean acreage was planted to genetically engineered soybeans. This is one of the hottest and most controversial stories in most countries of the world—except the United States, where it gets unbelievably little media coverage. (2) The hype about the health benefits of soyfoods continues to increase. There are definitely some health benefits, but the exaggerated statements that now routinely appear in articles and advertisements go far beyond what can be supported by scientific evidence. The media seems intent on making as much money as possible as it whips up the story of soy's health benefits. The bigger the story it becomes, the more money they can make later debunking it. (3) The natural foods industry is changing into a supplements industry because of the higher profit margin on supplements. Many consumers are being misled into thinking that supplements are more important than healthy foods in determining good health. (4) Among commercial soy products this year, the ratio of supplements to foods has increased sharply.

Areas of potential danger on the horizon: (1) Lon White of Hawaii and his data on tofu and dementia/Alzheimer's disease. (2) Young girls discovering that overdoses of soy isoflavones could be useful in growing breasts, then publicizing that information using the Internet and World Wide Web. (3) The danger that the media will start to debunk its own hyped story of the health benefits of soy. (4) The concern that the FDA health label claim for soy will not include traditional soy products—such as tofu and soymilk—

which contain too much fat. Therefore manufacturers will be tempted to add soy protein isolates to raise the protein to a level that will trigger the health claim.

3114. **Product Name:** Soy Sausage [Spicy Italian].

**Manufacturer's Name:** Sunergia Soyfoods.

**Manufacturer's Address:** P.O. Box 1186, Charlottesville, VA 22902. Phone: 804-970-2798.

**Date of Introduction:** 1998 December.

**Ingredients:** Textured soy flour, vital wheat gluten, water, red cooking wine, shoyu soy sauce (water, organic soybeans, salt), red wine vinegar, natural canola oil, paprika, dry ground sweet corn, organic whole oat flour, garlic, natural smoke flavor, cayenne pepper, spices.

**Wt/Vol., Packaging, Price:** 10 oz. (340 gm). Chub pack. Retail for \$3.29.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Jon Kessler, founder and owner of Sunergia. 1999. March 16. Talk with Jon Kessler. 1999. March 21. These products were introduced in mid-December 1998.

3115. **Product Name:** [Meatless Diced Veal].

**Foreign Name:** Pfannen Geschnetzeltes: Vegetarisches Pfannengericht nach Kalbfleisch-Art gewuerzt.

**Manufacturer's Name:** Viana Naturkost GmbH.

**Manufacturer's Address:** D-54578 Wiesbaum / Vulkaneifel, Germany.

**Date of Introduction:** 1998 December.

**Ingredients:** Tofu (Water, soybeans\*) (32%), whole wheat flour\*, wheat gluten\* (24%), sunflowerseed oil\*, soy sauce (water, soybeans\*, wheat\*), thickener (carob flour\*, guar seed flour), seasonings\*, sea salt. \* = Organically grown.

**Wt/Vol., Packaging, Price:** 200 gm pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Color package sent by Bernd Drosihn. 2004. Nov. 15. Size: 10 by 17.5 by 3.5 cm. Paperboard box. Red, black, yellow, orange, and green on beige. Color photo of the dish, ready to eat, on a white plate. This meat alternative, ready to heat and serve, was introduced in Dec. 1998.

3116. **Product Name:** The Original Gardenburger: Veggie Patties (Restaurant Size 15 Pack).

**Manufacturer's Name:** Gardenburger, Inc.

**Manufacturer's Address:** 1411 SW Morrison St., Suite 400, Portland, OR 97205.

**Date of Introduction:** 1998.

**Ingredients:** 1998: Mushrooms, cooked brown rice, onions, mozzarella cheese (milk, culture, salt, vegetable enzyme, annatto), rolled oats, cottage cheese curd (nonfat milk, culture, vegetable enzyme), egg whites, bulgur wheat, sea salt, garlic, autolyzed yeast, tapioca, starch, spices, natural flavor, vegetable gum, annatto (less than 0.1%).

**Wt/Vol., Packaging, Price:** 15 patties, 5 lb 3 oz (1.43 kg) plastic bag.

**How Stored:** Frozen.

**Nutrition:** Per patty (3.4 oz = 97 gm): Calories 180,, calories from fat 35, total fat 4 gm (6%), saturated fat 1.5 gm, polyunsaturated fat 0.5 gm, monounsaturated fat 2 gm, cholesterol 15 mg (5%), sodium 400 mg (17%), total carbohydrate 25 gm (8%), dietary fiber 7 gm (27%), sugars 1 gm, protein 11 gm. Calcium 10%. Vitamin A 2%.

**New Product–Documentation:** Product with Label purchased at Costco discount store. 1998. 7 5/8 by 14½ inches. Green, red, yellow, and black. Color photo of a Gardenburger on a bun with lettuce and tomato. “All natural. Restaurant size. New 15 pack! Same great taste. Precooked and frozen.”

3117. **Product Name:** Smart Deli Jumbos (The Big Dog).

**Manufacturer’s Name:** Lightlife Foods, Inc.

**Manufacturer’s Address:** 153 Industrial Boulevard, Turners Falls, MA 01376. Phone: 1-877-SOY-EASY (877-769-3279).

**Date of Introduction:** 1998.

**Ingredients:** Water, soy protein isolate, wheat gluten, evaporated cane juice, salt, yeast extract, soy sauce (water, soybeans, wheat, salt), granulated garlic, carrageenan, spice extract, natural flavors from vegetable sources, vegetable gum, natural smoke flavor. No nitrates. No MSG.

**Wt/Vol., Packaging, Price:** 13.5 oz.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Leaflet (8½ by 11 inch, color) by Lightlife Foods. 1998. “Smart Deli Jumbos: The Big Dog.” A large color photo shows a big hot dog between buns with a wavy bead of mustard along one side. Front: “When it comes to all-natural ballpark franks, you don’t argue with The Big Dog.” On the rear are ingredients, shelf life, pack size and nutritional facts.

3118. **Product Name:** Vegetable Burger, Spicy Bean Burger, Meatless Burger (Frozen).

**Manufacturer’s Name:** Second Nature (Product Developer-Marketer).

**Manufacturer’s Address:** 461 Manning Ave., Suite 300, Toronto, ONT, Canada, M6G 2V6. Phone: 1-800-370-8004 www.2ndnature.ca.

**Date of Introduction:** 1998.

**Ingredients:** Original Burger: Water, soy protein concentrate, sunflower oil, dehydrated onion, cellulose gum, organic lemon juice, salt, tomato powder, garlic, spices, malt.

**Wt/Vol., Packaging, Price:** 364 gm (12.8 oz).

**How Stored:** Shelf stable.

**New Product–Documentation:** Leaflet (glossy, color, front and back, printed in about 1998) sent by Lorraine Guardino, sales manager at Sol Cuisine. 2013. March 11. “Try our 3 new favorite burgers!” In both English and French. On

the front is a color photo of the front of each box with the accompanying text: Vegetable Burger (“A blend of 6 organic vegetables”), Spicy Bean Burger (“Tex-Mex vegetarian burgers”), and Meatless Burger (“Great tasting vegetarian burgers”). At bottom of page: “Second nature: Second to none!” On the rear is nutritional information about each product, ingredients, and packing and shipping information.

Leaflet (glossy, color, printed in about 2002) sent by Lorraine Guardino, sales manager at Sol Cuisine. 2013. March 11. “Sol Cuisine: Second Nature has found its Sol Mate.” This leaflet gives a color photo of the front of each package, nutritional information, and the ingredients. Lorraine adds a note that these three products were introduced in 1998. Lorraine also includes a current (2013) package for the Original Burger (named Meatless Burger when introduced), and for the Spicy Black Bean Burger (named Spicy Bean Burger when introduced), and for the Sweet Curry Vegetable Burger (named simply Vegetable Burger when introduced; the name was changed in 2012). The main ingredients now are filtered water, soy protein concentrate, organic sweet corn, organic peas, organic carrots, etc.).

3119. **Product Name:** Morningstar Farms MeatFree Corn Dogs: America’s Original Veggie Dog Batter Dipped on a Stick.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1998.

**Ingredients:** Incl. sugar, soybean oil, corn syrup solids, hydrolyzed corn, soy, and wheat protein, brown sugar, soy flour, spices, soy protein isolate.

**Wt/Vol., Packaging, Price:** Four Corn Dogs weigh 10.0 oz (284 gm). Paperboard box. Retail for \$3.29 (1999/04, Lafayette, California).

**How Stored:** Frozen.

**New Product–Documentation:** Worthington Foods annual report. 1999. March. p. 4-5. “Frozen corn dogs make up one of the industry’s top performing frozen food categories, and Morningstar Farms *MeatFree Corn Dogs* are positioned to challenge for category leadership. Made with our own *America’s Original Veggie Dogs*, this product could become the company’s number-one seller per point of distribution in the near future.”

A color photo shows the label.

Product with Label purchased at Safeway supermarket in Lafayette, California. 1999. Paperboard box. 8 by 5 by 1.5 inches. Golden brown, red, yellow, white and blue on a green background. Regular price: \$3.29 for a package of 4; on sale for \$2.69. A photo shows three Veggie Dogs on a white plate. “67% less fat than meat corn dogs.” On the back is a small circular logo with a green “V” inside. “Suitable for vegetarians.” A table compares gives a nutritional

comparison of Meatfree Corn Dogs and Meat Corn Dogs (per 1 link/dog): Cholesterol 0 / 15 mg. Total fat: 4 / 12 gm. Saturated fat: 0.5 / 3 gm. Soyfoods Center taste test. Excellent flavor and texture; a little sweeter and spicier than we would prefer.

3120. **Product Name:** Morningstar Farms Harvest Burgers.  
**Manufacturer's Name:** Worthington Foods, Inc.  
**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.  
**Date of Introduction:** 1998.  
**Wt/Vol., Packaging, Price:** 12.0 oz (340 gm). Paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Worthington Foods annual report. 1999. March. p. 4-5. "Through an innovative partnership with Worthington Foods, Hard Rock Café restaurants around the world now serve this delicious, all natural blend of sauteed vegetables, grains, and roasted nuts. And the same great co-branded product is in supermarket freezers across the U.S." A color photo shows the label.

3121. **Product Name:** Morningstar Farms Buffalo Wings.  
**Manufacturer's Name:** Worthington Foods, Inc.  
**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.  
**Date of Introduction:** 1998.  
**How Stored:** Frozen.  
**New Product–Documentation:** Worthington Foods annual report. 1999. March. p. 4-5. "A 'fun food,' great for kids and adults alike, these spicy vegetarian drumettes prepared from vegetable and grain protein were an instant success in 1998."

3122. **Product Name:** Morningstar Farms Chik Nuggets (Refrigerated in MAP format).  
**Manufacturer's Name:** Worthington Foods, Inc.  
**Manufacturer's Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.  
**Date of Introduction:** 1998.  
**How Stored:** Refrigerated.  
**New Product–Documentation:** Worthington Foods annual report. 1999. March. p. 5. "After successfully test marketing three refrigerated items in "modified atmosphere packaging" (MAP) in 1997, we introduced two additional products in the MAP format in 1998, Chick Nuggets and Breakfast Patties. MAP products are sold in the grocer's meat case, introducing a new consumer to Morningstar Farms products... Morningstar Farms now offers five MAP products in 9,000 supermarkets—and demand is growing."

3123. **Product Name:** Morningstar Farms Breakfast Patties (Refrigerated in MAP format).  
**Manufacturer's Name:** Worthington Foods, Inc.  
**Manufacturer's Address:** 900 Proprietors Rd.,

Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1998.

**How Stored:** Refrigerated.

**New Product–Documentation:** Worthington Foods annual report. 1999. March. p. 5. "After successfully test marketing three refrigerated items in "modified atmosphere packaging" (MAP) in 1997, we introduced two additional products in the MAP format in 1998, Chick Nuggets and Breakfast Patties. 3124. Burnham, Trudie. 1998. Innovative soy cooking. Freedom, California: The Crossing Press. 95 p. No index. 15 x 18 cm.

• **Summary:** Contents: Preface. Introduction. Appetizers, snacks, and side orders. Salads. Dressings and toppings. Main dishes. Beverages. Desserts and treats.

The introduction begins: "Let's face it. In a society like ours, obsessed with fast, low-fat food, tofu is the ultimate answer." This is a "user-friendly guide to a soya-based vegetarian diet. Many recipes are vegan, or use a minimum of dairy foods.

The glossary of ingredients includes kelp, kudzu, lecithin, mirin, miso, nutritional yeast, oils (use expeller pressed), sea vegetables, seeds (Sunflower, pumpkin, poppy and sesame are used for eating; alfalfa, radish, red clover, and fenugreek are for sprouting), slippery elm powder, soy milk, soy sauce, soysage, sweeteners, tahini, tempeh, tofu, umeboshi plums, vinegars.

"Missing egg salad: I invented this and word seemed to travel fast and wide, because I saw it in a California deli a year later with the same name." Address: New Zealand.

3125. National Securities Corporation. 1999. Equity research: Galaxy Foods Co. Marietta, Georgia. 4 p. 28 cm.  
 • **Summary:** Rating: Strong buy. Sector: Healthy food manufacturing. Description: Makes cheese & soy-based foods. Galaxy will trade at the pre-split price until the effective date of Feb. 12, 1999. Galaxy stock is now trading at \$0.63 before the reverse split on Feb. 12. Stock price adjusted for 1:7 reverse split: \$4.38. 52 week range: \$8.97 to \$2.41. Shares outstanding: \$9.2 million. 3-months average daily volume: 25,000 shares. Market capitalization: \$40.3 million. Insider ownership: 41%. Book value per share: \$1.26.

Note: In this reverse split a shareholder will receive 1 share for every 7 shares previously owned. This will boost the value of each share in order to enable the stock to keep its NASDAQ listing thereby enhancing shareholder value. "Shareholders will vote on the reverse split on Feb. 11."

In retail sales, gross margins soared to 35.9% compared with 29.1% last year.

Comparable peer group valuation analysis. A large table shows the comparable companies: Gardenburger, Hain Food, Horizon Organic, Lifeway Foods, International Yogurt, Worthington Foods, and Galaxy Foods. For each company is given: (1) Current price of the stock (Hain is #1 at \$21.88). (2) 1998 estimated revenue in million dollars (Hain in #1 at \$145.0). (3) 1998 estimated earnings per share (Worthington Foods is #1 at \$0.81). (4) 1999 estimated earnings per share (Worthington Foods is #1 at \$0.99; Galaxy is \$0.65). (5) Growth rate (Horizon Organic is #1 at 42%; Galaxy is 30%). (6) Price to earnings ratio 1998 estimate (Horizon Organic is #1 at 200.0). (7) Price to earnings ratio 1999 estimate (Gardenburger is #1 at 48.4; Galaxy is a scant 6.7). Address: 2441 Viscount Row, Orlando, Florida 32809. Phone: (407) 855-7485.

3126. Yves Veggie Cuisine, Inc. 1999. Great taste. More choice (Leaflet). Delta (Vancouver), BC, V3M 6R9, Canada. 1 p. Jan. 28 cm. Front and back.

• **Summary:** Yves now offers four different fat-free veggie burgers. A small color photo shows the front panel of each tray: Veggie Burger Burgers (regular and family pack). Black Bean & Mushroom Burgers. Garden Vegetable Patties. A large color photo shows one grilled burger below a sesame bun with all the trimmings.

Note: The ingredients are not given. Address: Delta (Vancouver), BC, Canada. Phone: -.

3127. Soyfoods Association of North America. 1999. Soyfoods sales soar with increased consumer acceptance (News release). Washington, DC. 2 p. Feb. 15. 28 cm.

• **Summary:** During the past year, sales of soymilk grew 53% in supermarkets and 24% in natural food stores, according to recent data from SPINS. Retail sales of soymilk reached \$161 million in 1997, and are projected to reach \$300 million by the year 2000 according to Soyatech, Inc. (Bar Harbor, Maine).

Sales of tofu last year reached \$43 million in natural food stores and \$37 million in supermarkets. This increase in tofu sales is being sparked by a variety of new baked, flavored, and smoked tofu products, and these categories are growing 12% faster than unflavored tofu products, according to SPINS data.

Meat alternatives are also experiencing very rapid growth, with sales last year growing 53% in supermarkets and 20% in natural food stores, according to SPINS. The fastest growing product in this category is the meatless deli slices, sales of which grew by more than 100% last year. Total sales of meat alternatives should reach \$325 million this year, with an estimated 62% of that total coming from supermarkets—according to Soyatech. Address: 1723 U Street, N.W., Washington, DC 20009. Phone: 202-986-5600.

3128. Jacobi, Dana. 1999. Re: Upcoming TV program on

soy. Oprah Winfrey interviewed Dr. Bob Arnot about his book on breast cancer. Letter (fax) to William Shurtleff at Soyfoods Center, Feb. 24. 1 p.

• **Summary:** A friend of Dana's in the TV production business told her that the news magazine 20/20 is working on a feature on soy. It is expected to air in several months.

Last fall TV star Oprah Winfrey had Dr. Bob Ornot on her show to discuss his new book on breast cancer. The program turned into an extended commercial for Boca Burgers in particular and for eating soyfoods in general. Boca Burger has a video of the show and should know the exact date. Address: New York City.

3129. Boca Burger, Inc. 1999. Even a die-hard meat lover has a hard time telling the difference between a real hamburger and a meatless Boca Burger (Ad). *Vegetarian Times*. Feb. p. 51.

• **Summary:** This full-page color illustration shows a Venus flytrap in a pot, scratching its head with one leaf, looking at a Boca Burger and (apparently) a real hamburger, between sesame buns with all the trimmings. At the top of the ad is written in small letters "(Venus flytrap—*Dionaea muscipula*). Below the illustration: "Not only do Boca Burgers taste great, they're also low in fat and calories." The company logo states: "You Won't Believe its Meatless: The original Boca Burger" At the very bottom of the ad: "For stores that carry Boca Burgers, visit [www.bocaburger.com](http://www.bocaburger.com)." Copyright 1998 Boca Burger, Inc. Address: 1660 N.E. 12th Terrace, Ft. Lauderdale, Florida 33305. Phone: 954-524-1977.

3130. ConAgra Foods, Inc. 1999. Help yourself! New. Exceptional taste and powerful nutrition. Advantage 10 (Ad). *Vegetarian Times*. Feb. p. 61.

• **Summary:** This full-page color ad is for Advantage 10, a line of all natural vegetarian meals and snacks with only 10% or less calories from fat. The line is endorsed by Dean Ornish, M.D., a widely "respected physician, nutrition specialist, and best-selling author." Photos of the front panel of the packages of five products in the line are shown: Roasted Vegetable Pizza (Without Cheese). Caribbean Sweet 'n Sour, Veggie Burger, a nutrition bar, and a fruit smoothie.

For more: [www.advantage10.com](http://www.advantage10.com). Manufactured by Golden Valley Foods, Inc., Edina, Minnesota. Copyright 1998 by Golden Valley Foods. The name of ConAgra Foods, Inc., which owns the Advantage 10 brand, does not appear on this page.

20-panel brochure sent by Patricia Smith from Natural Products Expo West. 2000. March. Now includes 3 oven-roasted pizzas plus various other new products.

3131. Lamp, Greg. 1999. Soyfoods health claim nears FDA okay: Heart-risk labeling should boost soybean demand. *Soybean Digest*. Feb. p. 68.

• **Summary:** Funds from the soybean checkoff helped

generate the research and information that was submitted to the FDA. The process began in 1995 with financial assistance from the Illinois Checkoff Board and the United Soybean Board (USB). Roughly \$1 million in soybean checkoff funds were invested in the project. “A coalition to develop the soy health claim involved ASA [American Soybean Association], USB, state checkoff boards and industry partners, such as Protein Technologies International, Central Soya and the Archer Daniels Midland Company.”

An estimated 20% of all Americans (54.2 million adults) have high blood cholesterol levels—over 240. ASA predicts that if each of these people consumed 25 grams (less than 1 ounce) of soy protein each day, annual demand for soybeans would increase by more than 55.2 million bushels.

Consumption of U.S. soybeans in the United States now totals about 1.2 billion bushels a year.

A color photo shows two 3-shelf racks of American foods. Those on the left rack already contain soy protein: Mori-Nu Tofu, Take Care, GeniSoy bars, Harvest Burgers, Galaxy Veggie Slices, SoNice soymilk, Edensoy, Morningstar Farms [Worthington Foods] meat alternatives, etc. Those on the right rack are foods with potential to have soy protein added: Cream of Wheat, Raisin Bran, puddings, Snackwell’s cookies, etc.

3132. Nutrisoy Pty. Ltd. 1999. Nutrisoy: Fitness food (Sell sheet). Botany, New South Wales, Australia. 1 p. Feb. Front and back. 30 cm.

• **Summary:** A large color photo on the bottom half of the front panel shows the company’s tofu and tempeh products. Three paragraphs above that are titled: Nutrisoy. Tofu. Tempeh.

The back is titled “Nutrisoy products range.” A color photo shows each of the company’s products, by category. Plain and pre-marinated tofu: Plain Firm Tofu, Tofu Vegies, Tofu Tempeh, Tofu Herbs. Pre-cooked tofu and tofu burger: Tofu Spicy, Tofu Teriyaki, Tofu Vegies Burger, Tofu Tempeh Burger. Tofu deserts and silken tofu: Tofu cups in strawberry, apricot, mango, and tropical flavors. Silken tofu. Tempeh and tempeh burger: Plain Tempeh. Seasoned Tempeh. Mildly Spiced Tempeh. Tasty Tempeh (marinated in ginger and soy sauce). Tempeh Burger.

An attached, 1-page product list, gives the name and weight of all the company’s products, including those under special or private labels such as Soyco, Nutal, and a few Indonesian names. They also sell hommus (hummus), chickpea veg. burger, spirulina juice, and berry juice.

Letter from Tony Wondal of Nutrisoy. 2007 Aug. 3. This leaflet was published in Feb. 1999. Address: 15 Hannon St., Botany NSW 2019, Australia. Phone: +61 2 9316 5171.

3133. **Product Name:** Nature’s Chef Soyburger [American Style Soy Bean].

**Manufacturer’s Name:** Seenergy Foods Limited.

**Manufacturer’s Address:** 121 Jevlan Dr., Woodbridge, ON L4L 8A8, Canada. Phone: (905) 850-2544.

**Date of Introduction:** 1999 February.

**Ingredients:** Vegetable broth (filtered water, onions, celery, mung beans, carrots, parsley, sea salt, crushed, tomatoes, garlic powder, onion powder, ground black pepper), textured vegetable protein (soy protein concentrate, caramel color, carrageenan, natural flavor, sea salt, soy fiber, garlic, dehydrated onion flakes, caramel color, spices).

**Wt/Vol., Packaging, Price:** 14 oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** “Nature’s Chef presents: Veggie burgers of the world” (Ad). This 1/3 page, vertical color ad shows four products: (1-2) Greens, Grains & Beans Low Fat Burger (Fajita or Wild Curry). (3) Falafel Low Fat Burger. (4) So Delight Fat Free Burger (Soy Bean). For more info call 1-800-609-7674.

Leaflet (8½ by 11 inches, front and back, color) sent by Patricia Smith from Natural Products Expo West. 2000. March. “Nature’s Chef—Burgers of the World.”

3134. Mahy, Dixie. 1999. Work at Now & Zen Bakery (Interview). *SoyaScan Notes*. March 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** For 25 years Dixie Mahy was head of the San Francisco and a teacher in the San Francisco school system. She has long eaten a vegan diet. When she retired, she invested much of her retirement funds in Now & Zen, a company founded and run by Japanese-American Miyoko Schinner which had a vegan restaurant and a bakery that made delectable vegan cakes, cookies and other desserts. One of their best-selling products in recent years (also made at their factory) has been their UnTurkey, a meatless turkey based on seitan, with a yuba skin. New products may include a Barbecue UnRibs, and a breast of UnChicken. She is now on the company’s board of directors, and she is learning a lot about business and money. The company started on a shoestring and they are still running on a shoestring. Unfortunately, last year, in June 1998, they had to close the Now & Zen restaurant, because they could not keep both the restaurant and factory running at the same time. Part of the reason is that Miyoko now has two little girls.

Now & Zen supplies various vegan products (including chocolate chip cookies and cinnamon rolls) to United Airlines. Address: Now & Zen, Inc., 665 22nd St., San Francisco, California 94107. Phone: 415-695-2805.

3135. Johnson, Eve. 1999. When is a hot dog not a hot dog? The soybean veggie version may be healthier, and it doesn’t have a ‘dark side’ like a classic wiener. Or does it? *Georgia Straight (Vancouver, BC, Canada)*. March 11-18. p. 49.

• **Summary:** There are now two Yves Kitchen restaurants in Vancouver. Stylish, even chic, they are “the world’s first soy-based fast-food restaurant chain.” Yves on Eleventh, in

Vancouver, specializes in veggie hot dogs. But are veggie wieners really healthy? That depends on how you feel about eating foods made from genetically engineered soybeans. Yet served with all the trimmings, “Yves veggie dogs taste just like the happy-times wieners of your childhood.” Moreover they are healthier, with almost no fat, half the sodium, and more protein than meat wieners.

Yves Potvin comes from Sherbrooke, Quebec. At age 28, and already a chef, he started making veggie hot dogs upstairs from a Dave-on-Meat store in Vancouver. Now he employs about 220 people in a brand new corporate headquarters in Delta, a suburb just south of Vancouver. Each week the company makes 125 tonnes of soy-based meat alternatives. 30% of that is consumed British Columbia; the rest is exported to the USA or the rest of Canada. Four photos show Yves on Eleventh.

3136. Instituto Colombiano de Bienestar Familiar. 1999. Alimentación a base de soya y germinados [Foods based on soya and sprouts]. Bogota, Colombia. 51 p. 22 cm. [Spa]  
 • **Summary:** Contents: Full-page black-and-white photo of Andres Pastrana Arango (current president of Colombia) with his wife and three children. The family as the basis of development. The soybean (*El frijol soya*). Recipes—each with basic nutritional information per serving. Dairylike products (*Lácteos*): Basic homemade soymilk, homemade tofu (two methods, each curded with lemon juice), cream cheese, soy yogurt, soy kumis. Meatlike products (*Cárnicos*): Soy burgers (made with ground cooked soybeans—masa de soya cocoda), etc. Baked goods (*Harinas*). Drinks, desserts, and salads (*Bebidas, postres y ensaladas*). Soups, special dishes, and others (*Sopas, especiales y otros*): Incl. soy mayonnaise, pizza with soya.

Note 1. The color photo on the cover of this saddle-stitched book is copied from the Canadian Soyfoods Directory (Nov. 1997). Note 2. Letter from Cecilia and Nestor Santacruz of Delisoya, Bogota, Colombia. 1999. April. This booklet is the successor of one titled *El Cambio es Andres* [Andres stands for change] published in late 1997. They liked the earlier edition better because it contained recipes for whole foods such as brown rice and whole wheat flour, and no meat or dairy products. Quite a few of the recipes in this more recent book call for the use of meat. Address: Bogota, Colombia.

3137. Quong Hop & Co. 1999. Soy for life: The benefits of eating soy products (Leaflet). South San Francisco, California. 5 panels each side. Each panel: 15.3 x 10.2 cm.  
 • **Summary:** Leaflet (glossy color) sent by Patricia Smith from Natural Products Expo West. 1999. March. On the front panel is a tofu burger under a bun on a light orange plate. At the bottom; The Soy Deli.

Contents: The power of soy foods (anti-cancer, osteoporosis, coronary heart disease, menopausal symptoms,

lactose intolerance). Tips for cooking with tofu. Additional recipes. Coupons for Soy Deli Baked Tofu and Nigari Tofu. A photo on the rear cover shows many of Quong Hop’s soy products. Soymilk (2 flavors). Tempeh burgers. Tofu burgers. Baked tofu (4 flavors). Soy tempeh. Nigari tofu. Hot dogs.

“Master tofu makers since 1906: In 1906, Sing Hau Lee established Quong Hop, the oldest tofu shop in America. He brought with him his family’s tofu-making secrets.” Address: 161 Beacon St., South San Francisco, California 94080. Phone: 415-761-2022.

3138. Worthington Foods, Inc. 1999. Used to be “hearty” and “healthy” was a contradiction in terms (Ad). *Vegetarian Times*. March. p. 3.

• **Summary:** This full-page color shows a dish on a plate (it looks like lasagna) prepared with Morningstar Farms Recipe Crumbles. At the lower left are two packages of low-fat Recipe Crumbles: Burger Style and Sausage Style. The slogan below the company logo is: “The change will do you good.” Address: Worthington, Ohio 43085.

3139. Worthington Foods, Inc. 1999. Annual report 1998: Celebrating 60 years, 1939-1999. 900 Proprietors Rd., Worthington, OH 43085. 20 p. 28 cm.

• **Summary:** For the fifth consecutive year, Worthington Foods has achieved record earnings and record sales. Net sales rose to \$139.5 million in 1998, up 18.2% from \$117.9 million in 1997. Net income (profit) rose to \$8.021 million in 1998, up 0.2% from \$8.006 million in 1997. Earnings per share (diluted) fell to \$0.66 in 1998, from \$0.67 in 1997. Gross profit as a percentage of net sales increased to 43.2% in 1998 from 41.3% in 1997. Foodservice sales rose nearly 33% in 1998 compared with the prior year.

Contains a nice, full-page story honoring Allan R. Buller—visionary, leader, and friend, who steps down after 53 years of service to the company. When he arrived in Dec. 1945 “the company had sales of less than \$250,000 and had only recently moved its manufacturing from a two-story white frame house to a newly-built plant. Distribution consisted largely of mailing its most popular product, gluten-based *Choplets*, to households across the country at a price of three cans for a dollar.” In the 1950s he helped to make “Worthington the first company in the world to offer frozen vegetarian foods.” The company reached its first million-dollar sales year in 1960. In 1982, at age 65, Buller withdrew his retirement savings and refinanced his house to further the pursuit of his lifelong dream. “To make healthful vegetarian foods readily available to mainstream consumers.” He and a handful of other investors—including Dr. George Harding IV and James Hagle—raised \$9.5 million to buy back the assets of Worthington Foods from Miles Laboratories. “The deal closed on Friday [in October]; and the reorganized company—with Buller as president—started production the next Monday without missing a single order or shipment.” Buller retired

as president of Worthington Foods in 1986, when Dale Twomley was named to the post. He became chairman of the board in 1989; now, a decade later, he steps down from that post, succeeded by Twomley. He joins other fellow Worthington visionaries, Jim Hagle and George Harding, in seeing a brilliant future for vegetarian foods. “‘When I was growing up, vegetarianism was accepted largely on faith,’ he recalls. ‘But today, we have strong scientific evidence to support the benefits of this dietary approach. That can only mean a continually growing market for our products.’”

“Morningstar Farms (including *Harvest Burgers*) leads the meat alternative market category in supermarkets across the U.S., capturing a 52% market share. As the only brand with meat alternative products for every meal occasion, Morningstar Farms continues to provide customers with the largest variety of products and tastes.

“Shoppers can find the Morningstar Farms brand in more than 96% of the nation’s supermarkets. The line now includes more than two dozen frozen and refrigerated food items to replace whole eggs and processed meats. Most of these meat alternatives are made from high quality soy protein,...”

New products introduced during 1998 include MeatFree Corn Dogs (batter-dipped on a stick), MeatFree Buffalo Wings (a fun food, great for kids, spicy vegetarian drumettes), and Hard Rock Café Veggie Burgers (a partnership with Hard Rock Cafe restaurants worldwide), and Morningstar Farms Harvest Burgers (On 16 Oct. 1998 Worthington purchased the Harvest Burger product line from ADM; by agreement, ADM will continue to make the Harvest Burgers at its Illinois plant). Two new refrigerated products were introduced in “modified atmosphere packaging” (MAP): Chick Nuggets and Breakfast Patties. MAP products are sold in the grocer’s meat case.

Color photos show: Dale E. Twomley. Allan R. Buller. Three new product labels. An aerial view of Worthington’s manufacturing facility at Zanesville, Ohio.

Includes a 27-page “Notice of Annual Shareholders Meeting.” Address: Worthington, Ohio. Phone: (614) 885-9511.

3140. Santacruz, Cecilia; Santacruz, Nestor. 1999. Tofu and other soyfoods in Colombia (Interview). *SoyaScan Notes*. April 1. Conducted by William Shurtleff of Soyfoods Center. [1 ref]

• **Summary:** In June 1998 Cecilia and Nestor started the earliest known non-Asian tofu shop in Colombia that focused on traditional, hand-made tofu and made delicious products from tofu. Named Delisoya, it is located in a residential part of Bogota (the country’s capital) high in the Andes mountains of Colombia at 8,500 feet altitude. They visited Soyfoods Center from Salinas, California, after being given an excellent tour of the Wildwood Natural Foods soyfoods plant in Santa Cruz. The main things they learned

at Wildwood: (1) They can make a large amount of very tasty tofu using an open-top, stem-injection system (without pressure). Nestor would like to get this same kind of system. (3) Their many creative tofu products are delicious; the baked (not fried) tofu burgers were especially interesting. (3) The shop was very clean and sanitary.

Ceci speaks good English, since she lived for a year in Tennessee (with “Ami”) during her high school years. This is the third time they have been to the USA.

Ceci and Nestor were both born in Colombia—Ceci on 3 December 1949 and Nestor on 28 Aug. 1955. They both attended the Colombian National University (*Universidad Nacional de Colombia*) where they studied chemistry and graduated in 1982. They were married that same year, shortly after graduation. Nestor got a job in Bogota with Canta Claro, a company that operates soybean crushing plant. They made animal nutrition products from the soybean meal and various foods from the soy oil. Ceci also worked for Canta Claro for 2-3 years in quality control, then she left and worked with her family who owns a small hotel about 150 km (93 miles, 4 hours by car) outside of Bogota. She also spent more time cooking and doing things she enjoyed, alone and with her mother (who has her own foundation and is a very civic-minded person). In 1992 Nestor and Ceci met a macrobiotic group named *Escuela de Educación Vitalicia* (The Life and Vitality Education School) run by students of Tomio Kikuchi, a well-known teacher of macrobiotics who lives mostly in Brazil; this group had been in Bogota since 1985. Later in 1992 Nestor left his job at the soybean crushing plant and began to work as an administrator in Ceci’s family hotel. Slowly their lives began to change. In June 1993 they traveled to Brazil to attend the annual winter seminar by Tomio Kikuchi. They found him to be an excellent teacher and, at age 70, a man of remarkable vitality. Bernadette Kikuchi is Tomio’s wife. Through her cooking lessons in Colombia and Brazil, in their school, they first made contact with Oriental cooking and foods. Through them they came to know about brown rice and tofu for the first time, 7 years ago. “They are remarkable human beings who left a deep impression on us.”

In early 1996 Nestor and Ceci bought some tofu from a Chinese man in Bogota; it was quite hard and the flavor was not very good, so they started to make their own tofu. In late 1996 Nestor and Ceci began to pursue their interest in soyfoods more actively. They saw an article somewhere about Peter Golbitz of Soyatech in Maine, so they wrote him and he sent them a free copy of the 1996 *Soya Bluebook*. In that book they saw a Takai advertisement for tofu and soymilk equipment. Takai sent them a catalog and there they saw the address of Soyfoods Center—from which they ordered several books, including *The Book of Tofu* and *Tofu & Soymilk Production*.

They found that there were already two companies in Bogota that made tofu and other products. Named Hosanna

and Sabyi, they each opened in about 1996-97, and were run by Colombians (non-Asians), but their focus was on products such as sausages made with tofu and soy flour, or pimento-flavored tofu, their tofu was not hand-made, and both Nestor and Ceci found the tofu to be very hard and not tasty. So in June 1998 Nestor and Ceci opened Delisoya. There they made traditional handmade tofu and soymilk, plus several tasty second generation soy products such as cheesecake, soy mayonnaise, and soy burgers. The interior is very attractive with a large deli case stretching across the room, and a list of products and prices written by hand on a blackboard on the wall. They gave Soyfoods Center three color slides showing the above views. This is a business with a philosophy and a social mission. They want to teach local people about the goodness of soyfoods and how to use them (including the okara), and they want the shop to eventually serve as a school where other Colombians can learn to make tofu, soymilk, and other soyfoods. Recently the International Monetary Fund (IMF) has demanded that Colombia quickly open its economy to foreign goods. The influx of cheap products has had a drastic effect, creating very high unemployment and widespread suffering. Nestor and Ceci are working to alleviate this crisis.

The soybeans used to make tofu at Delisoya are all grown in Colombia, at Cali, the capital of Valle de Cauca department at 3,327 ft, in western Colombia, bisected by the Cauca River. "Valle" is pronounced "Balle" in Spanish. There is a big Japanese community living in Cali, the area where the first Japanese settled in Colombia many years ago. Another center of soybean production in Colombia is Palmira, a city at altitude 3,000 feet, in Valle de Cauca department, in western Colombia, near the Cauca River. It is about 15 minutes by car from Cali, but 8 hours by car from Bogota.

Nestor now makes a little more 100 lb of tofu per week; more precisely, he makes about 100 cakes, each weighing 500 gm. He and Ceci are looking for a larger plant near their home in Bogota. He knows a lot about machines and mechanic, so he will make some of the equipment. At the plant they will hire people they know—who are simple and nice.

Ceci and Nestor are interested in translating *The Book of Tofu* into Spanish. They are trying to gain support for the project from Japanese cultural organizations in Colombia, such as JAICA (Japan International Cooperation Agency), and JETRO (Japan External Trade Organization). JAICA is Japanese governmental organization which assists developing countries, including financial support for some projects requested by local people. They send experts in various fields (such as agriculture, earthquakes, etc.) and also send local people to Japan for training. Ceci has a friend, Mrs. Tanaka, who is the wife of the president of JETRO in Bogota.

During the last presidential campaign in Colombia,

soybeans were featured by the candidate who won (in June 1998), Pres. Andres Pastrana. In about Sept. 1997 his political campaign published a booklet titled "El Cambio" which means "Change!" It is said that the president's wife, Nohra Puyana de Pastrana, took the idea from people working with soyfoods in Caldas—a department in west central Colombia. Currently, soyfoods are promoted by the *Instituto Colombiano de Bienestar Familiar* (Colombian Institute for Family Well-Being). This institute, which has its headquarters in Bogota but branches in many Colombian cities, now offers free soyfoods cooking classes and printed information (incl. recipes and nutritional facts).

The Colombian government has been studying soyfoods for at least 20 years. The first major organization to do this was the *Instituto de Investigaciones Tecnologicas* (IIT—Institute for Technological Investigations). It existed 20 years ago but ceased operations about 10 years ago. Their purpose was to help industry develop and market new products. Their first soy product was Incaparina [production began in 1963], followed by Bienestarina [first manufactured in Jan. 1976]. IIT made soymilk and targeted local people.

One soy pioneer in Colombia was a man named Joaquin Molano, who was a chemist, is now age 90, and who founded Fundacion del Rio Magdalena. Address: Founders and owners of Delisoya, Calle 78 No. 12-03, Santafe de Bogota, Colombia. Phone: 346-2178.

3141. Turner, Kimberly. 1999. Pair produces 'animal-friendly' sausage. *Observer* (Charlottesville, Virginia). April 14-20. Business section.

• **Summary:** Jon Kessler and his partner, Janus Raphaelidis started Sunergia Soyfoods. They now make meat-free sausages. A photo shows the two.

Note. Jon says this article contains many mistakes.

3142. Conquergood, George. 1999. History of work with soyfoods and vegetarianism. Part I. 1976 to 1994 (Interview). *SoyaScan Notes*. April 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** George was born on 1 Dec. 1946 in Toronto, Ontario, Canada. He went to high school in Toronto but did not graduate, and he never attended college. "I attended the school of hard knocks." He dropped out of high school at age 15 he began to work full-time. At age 17 he went to work for a textile firm until he was age 20. Then he started his own business in the fields of textiles and clothing. In 1967 he married Wendy Lynn Richardson—who was born on 27 Sept. 1948. In 1973 he received knowledge from Guru Maraji (via Guru Charanan) in Toronto, became his disciple, traveled throughout the United States and (in 1973) to the Houston Astrodome [in Texas] with Guru Charanan, and started a vegetarian diet and vegetarian restaurant. In 1977 he was one of the founding partners of Jolly Green Garden, a vegetarian restaurant in Toronto. He called it "Guru Maraji's

restaurant” because many of the employees and customers were disciples of Guru Maraji. There he first got involved with soyfoods. He bought tofu and used it to make various products, such as patties, dressings, etc., which were served in the restaurant. George has been involved with soyfoods for more than 20 years, starting in Toronto.

In early 1979 George and his family moved to southern Alberta. He went to work for the Canadian federal government helping a group of native Blackfeet people there. He set up a company named Pe-Kun-nee Garments that manufactured textiles (garments), put 300 women through a training program, and ran it (with the title of General Manager) for about 4 years. George still has the full-beaded outfit and feathers that he got from the Blackfeet people he helped.

In 1984 George and his family moved to Saskatoon, Saskatchewan, where he started a computerized embroidery business. His wife and three children still run this as a family business. Today his company is one of the top software development firms in North America for computerized embroidery. He worked for a company named Jeffrey E. McPherson, headquartered in Nottingham, England, with North American offices in Greensboro, North Carolina and in Canada; George worked for the North Carolina company. They held the worldwide distribution rights for an embroidery machine made by a Japanese company named Barudan (pronounced buh-ROO-dun) who pioneered the electronic embroidery machine from Japan. The ancient Jacquard looms, which were programmed with punch cards, originated in Switzerland [sic]—which is why we refer to “Swiss embroidery.” [Note: The French inventor, Joseph-Marie Jacquard (lived 1752-1834) invented the Jacquard loom at Lyons, France, in 1801 and was awarded a patent and medal by Napoleon in 1804]. The Japanese copied these looms. George was a salesman for their equipment, and he developed a collection of baseball caps because he was one of the first people to sell caps—whether it be importers of blank caps or embroiders of finished caps. George even called himself Captain Capman. He went around and set up embroidery companies to whom he sold his embroidery equipment (from Barudan in Japan) all over western Canada. George was one of the first people to embroider a baseball team insignia direct onto the blank hat—replacing the old crest that was stuck on the hat. It was much classier, and now it's the only way they do it.

In 1992 he started another gourmet vegetarian (actually vegan) restaurant, this time named Sweet Carrot Café, located at 702 14th St. East, Saskatoon, Saskatchewan S7N 0P7. Actually, George bought the building for his embroidery business, then opened up a corner of one building on the corner as a lunchroom for his staff. It was an historical building, with three buildings in one. George bought an espresso machine for his lunchroom. Passersby thought it should be a coffee shop. George lined the walls of his

lunchroom with his collection of embroidered baseball caps. He soon converted the lunchroom into a coffee bar, which he named it Caps Coffee Bar. A popular menu item was Cappuccino! There was a grand piano in the dining room. It was probably the only vegetarian or vegan restaurant ever to be written up in *Where to Eat in Canada*—two years in a row. In those days most people thought of vegetarian restaurants as places where hippies with beards and long hair sat on picnic benches and ate granola bars. Most people were afraid to eat in such places, so George made his restaurant into a fine dining room. One of the main focuses of George's life since the 1970s has been vegetarianism; his wife is a vegan and teaches tai-chi. In the restaurant George made his own tofu, soymilk, and related products, such as spreads, dressings, etc. In the early days, he made these products in the old fashioned way. The firm nigari tofu was very good tasting but the soymilk had a pronounced beany flavor. He was so busy, and making all these foods was such a chore, that he began looking for other technologies to expand his production. One day in early 1992, at about the time Raj Gupta started publishing his *SoyaCow Newsletter*, a young lady from the United Way in Ottawa came into the restaurant and commented on his organic tofu sandwich. She also tried his soymilk and told him about a soymilk making machine named the SoyaCow, developed by a company named ProSoya in Ontario. George asked for more information and the lady sent him a copy of the newsletter. George immediately phoned Raj Gupta, the inventor of the machine, and was on the next airplane to Ottawa. He ended up buying the only small SoyaCow (SC-20) Raj had. Articles about George, his stylish restaurant, and his new SoyaCow appeared in two early issues of the *SoyaCow Newsletter* (Jan/March and April/June 1993—Vol. 2, Nos. 1 and 2). He used the SoyaCow to make soymilk, which he sold at his restaurant—starting in early 1993. This was the first commercial soymilk ever produced by a SoyaCow. He sold the soymilk in 1 liter glass bottles, with the SoyaCow logo printed directly on the glass on each bottle. He and Frank Daller developed the bottle. So the name of the soymilk was “SoyaCow” and it was sold in seven flavors—including maple, chocolate, vanilla, original, chocolate-peanut butter, and nog (a delicious eggnog alternative made only at Christmas). Dusty Cunningham and Lorne Broten were both patrons of George's vegetarian restaurant in Saskatoon. A romance soon developed and they were called the “love birds.” George was thinking about opening a winery in his restaurant. Since Lorne was an accountant, George started working with him on a business plan for the winery in about 1994. George liked Lorne and hired him as his bookkeeper and accountant for his two businesses—embroidery and vegetarian restaurant.

Soon, within his restaurant (which consisted of three buildings in one), George converted his Caps Coffee Bar into the SoyaCow Health Bar Deli, where he sold at least

five soy products, both as part of the menu and for takeout: Soymilk (in six flavors), soy ice cream (many flavors, always changing), soy yogurt (several flavors), tofu, and Soyanaise. He also carried Yves Veggie Cuisine. He used his car to deliver some of the soymilk he made to three local stores; he never delivered his other soy products from the restaurant. He carried the glass bottles in milk crates. Continued. Address: Vice-president Operations, International ProSoya Corp., 312-19292 60th Ave., Surrey (Vancouver), BC, V3S 8E5 Canada. Phone: 604-541-8633.

3143. Dickerson, Marla. 1999. Small business—Healthier diet feeds bottom line: Entrepreneur’s lifestyle change spurs profitable line of Mexican fare. *Los Angeles Times*. April 28. p. C6-7.

• **Summary:** In 1980 Mark Roth had founded El Burrito Mexican Food Products Inc. to satisfy the growing demand in Southern California for Latino Foods.

But Mark owes his latest innovation to his cardiologist. In 1992, after Roth underwent heart bypass surgery, his doctor told the 60-year-old entrepreneur that he should stop eating the breakfast of eggs and chorizo (a fat-laden sausage) that he enjoyed three times a week. He had learned to love chorizos in his days as the owner of a supermarket in El Monte that catered to Latino customers.

So he did what a good entrepreneur would do; he came up for a meatless chorizo that looked and tasted like the real thing.

A large photo shows Mark at a production line in Industry, California. Today soy-based meatless foods make up 30% of his sales.

Note: As of Sept. 2000, his other products include SoyTaco and SoyLoaf.

3144. Sanitarium Health Food Co. 1999. Soy healthy: From the goodness of soy beans (Leaflet). Wahroonga, NSW, Australia. 2 p. April. Front and back.

• **Summary:** This attractive full-color leaflet is folded into 4 panels. The front shows the packages of 8 “Soy Healthy” brand vegetarian meat alternatives, nestled in a bed of lettuce and surrounded by green. Below the products: “Soy has never been so easy.” The inside left panel discusses: Soy protein and phytoestrogens. Sunflower oil/Canola oil. Iron. Vitamin B-12. Fibre. The inside right panel gives detailed information on five frozen and five chilled Soy Healthy products. Frozen: Original soy burgers. Country-spiced soy burgers. Tender soy medallions. Tender soy schnitzels. Tender flaked soy fillets. Chilled: Original soy slice. Garlic & herb soy slice. Smoked soy slice. Soy sausages. Soy fillets.

The back panel lists suitability for specific diets: Reduced saturated fat / Cholesterol free. Vegetarian (lacto-ovo). No added preservatives. No added MSG. No artificial colours. For more information: [www.sanitarium.com.au/](http://www.sanitarium.com.au/) Soy. Plus three toll-free numbers. From the company’s

“Nutrition Education Service.” Address: 146 Fox Valley Rd., Wahroonga, NSW 2076, Australia.

3145. Soyatech; Senechal, Jorgenson, Hale & Co. 1999. The North American soyfoods market: A multiclient study. 318 Main St., P.O. Box 84, Bar Harbor, ME 04609. April. \*

• **Summary:** The price of this market study is \$9,500 before 18 Dec. 1998 and \$12,500 thereafter. The study will be completed in early April 1999 and presented shortly thereafter at the Marriott Camelback Resort in Scottsdale, Arizona.

Soyatech was founded in 1984 [sic, Jan. 1987]. Address: Bar Harbor, Maine. Phone: 207-288-4969.

3146. **Product Name:** Morningstar Farms Meat Free Buffalo Wings: Spicy Vegetarian Drumettes.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1999 April.

**Ingredients:** Textured vegetable protein (soy protein concentrate and isolate), egg whites, enriched wheat flour...

**Wt/Vol., Packaging, Price:** 17-18 Wings weigh 10.5 oz (298 gm). Paperboard box.

**How Stored:** Frozen.

**New Product—Documentation:** Label sent by Worthington Foods. 1999. April.

3147. **Product Name:** Morningstar Farms Meat-Free Mini Corn Dogs.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1999 April.

**Ingredients:** Wheat gluten, water, enriched wheat flour...

**Wt/Vol., Packaging, Price:** 14 Mini Dogs weigh 10.0 oz (284 gm). Paperboard box.

**How Stored:** Frozen.

**New Product—Documentation:** Label sent by Worthington Foods. 1999. April. With new banner headline.

3148. **Product Name:** Morningstar Farms Meat-Free Stuffed Sandwiches [Pepperoni Pizza Style, Ham & Cheese Style, Burger & Cheese Style].

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 1999 April.

**Ingredients:** Burger & Cheese Style: Water, unbleached wheat flour, textured soy protein concentrate, cheddar cheese...

**Wt/Vol., Packaging, Price:** 2 Stuffed Sandwiches weigh 9.0 oz (255 gm). Paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Labels sent by Worthington Foods. 1999. April. With new banner headline.

3149. Worthington Foods, Inc. 1999. Morningstar Farms is getting a lot of attention. Please plan accordingly (Brochure). Worthington, Ohio. 4 p. 28 cm. [2 ref]

• **Summary:** Compares Morningstar Farms (MSF) and Gardenburger (GB) products. Contents: (1) New packaging: New logo to create brand “umbrella.” (2) Widest variety: A graph titled “Brands by unit volume” based on AC Nielsen data from 26 Dec. 1998 shows that Morningstar Farms has never lost its lead. Gardenburger peaked in July 1998 than fell sharply. Morningstar peaked at the same time but fell only slightly. (3) Great taste. A table (based on Nielsen data from 20 March 1999) shows unit volume of the top ten MSF and GB products. Eight of the top ten are MSF. The top four are MSF Breakfast Patties, MSF Breakfast Links, GB Original, and MSF Grillers. (4) Category Leader: “Morningstar Farms #1 in Meatless for the past 25 years.” About 8% of U.S. households consume MSF products and 7.5% consume GB. But MSF households purchase at a 3-times higher rate.

The rear cover discusses MSF’s “New advertising campaign.” Targets 75% of women between ages 15-54. Created 1.5 billion impressions. Uses TV and magazine ads plus many types of coupons.

Four inserts show: Ad slicks of two national TV ads: “Surprise-a-guy.” and “Surprise-a-gal.” Three full-page color ads. Address: 900 Proprietors Rd., Worthington, Ohio 43085.

3150. Yves Veggie Cuisine. 1999. Yves Veggie Cuisine: Recipe cards. Vancouver, BC, Canada.

• **Summary:** This is a full-page color ad for Yves Veggie Breakfast Links (fat free). “These links taste just like the real thing but they’re good for the heart. That’s because they have no fat, no cholesterol, and they’re made of soy protein.” Address: Vancouver, BC V6A 2A8, Canada.

3151. Gardenburger, Inc. 1999. Annual report 1998: Bullseye. 1411 Southwest Morrison St., Suite 400, Portland, OR 97205. 26 p. 43 cm.

• **Summary:** This is a strange-looking, unconventional tabloid size annual report, apparently designed to hide the company’s huge losses. Net sales (in million dollars) have grown dramatically in recent years: \$40.53 in 1996, \$56.83 in 1997, and \$100.12 in 1998 (up 76% over 1997). However the company lost \$1.393 million (in net income) in 1997, increasing more than 7-fold to a loss of \$10.042 million in 1998. Also in 1998 working capital, shareholders’ equity, and gross margin all fell significantly, while current liabilities rose more than four-fold. The price of the common stock finished 1998 at 13.75, about the same level as in the first quarter.

But last year was a brand-building year. Gardenburger

spent \$146 million on media advertising and expanded consumer awareness of the brand from 22% to 42% in the process. Brand awareness before 1998 ad campaign: Gardenburger 22%, Harvest Burger 22%, Morningstar Farms 15%, Boca Burger 5%. Awareness after 1998 campaign: Gardenburger 42%, Harvest Burger 24%, Morningstar Farms 16%, Boca Burger 4%. Gardenburger is the number one veggie burger on grocery shelves and in restaurants. “Largely due to our advertising and product placements, the veggie burger category grew 57% in 1998 to \$134 million in the grocery channel, and we captured 80% of that growth. Our January grocery channel market share stood at 51%, compared to 24% for our nearest rival” [Worthington Foods, plus Boca Burger 11% and Harvest Burger 7%]. Gardenburger is also the No. 1 brand in the natural foods channel. Address: Portland, Oregon.

3152. **Product Name:** Veggie Turkey Slices, and Veggie Ham Slices.

**Manufacturer’s Name:** Yves Fine Foods Inc.

**Manufacturer’s Address:** 1638 Derwent Way, Delta (Vancouver) V3M 6R9, B.C., Canada. Phone: (604) 525-1345.

**Date of Introduction:** 1999 May.

**Ingredients:** Water, isolated soy protein, wheat gluten, evaporated cane juice, natural flavors, salt, yeast extract, carrageenan, wheat germ, onion powder, rice starch, beet root powder, garlic powder, wheat starch, nutritional yeast, spices. Vitamins and minerals: Vitamin B-1 (thiamine hydrochloride), vitamin B-12 (cyanocobalamin), pantothenic acid (calcium pantothenate), potassium (dipotassium phosphate).

**Wt/Vol., Packaging, Price:** 10 slices in 5.5 oz (155 gm) package. Retail for \$2.19 (1999/12, Lafayette, California).

**How Stored:** Refrigerated.

**New Product–Documentation:** Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West. 2000. March. “More of a good thing: Another addition to the Yves family.” On the front is a half-page photo of these round slices folded into sliced bread. On the rear: “Fat-free. Preservative-free. Nitrite free. Cholesterol free. A good source of soy protein. Kosher. Made from soy protein. Contains no meat. Yves Turkey Slices deliciously compliment the rest of the Yves Veggie Cuisine slice family—Veggie Deli Slices, Veggie Pepperoni Slices, Veggie Pizza Pepperoni, and Canadian Veggie Bacon. Dated Jan. 1999.

Note: The ingredients are not given.

Second leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo East. 2000. Sept. “Go ahead, ham it up.” On the front is a half-page photo of these round slices folded into sliced bread. The rear is the same as the first leaflet—but dated May 1999.

3153. **Product Name:** [VeggieFresh Bratwurst, Mild Tofu

Hot Dogs, Hot Veggie Hot Dogs, Mild Jumbo Smoked Hot Dogs].

**Foreign Name:** VeggieFrisch Bratwuerste, Tofu Knacker, Toscaninis, Real Jumbos.

**Manufacturer's Name:** Viana Naturkost GmbH.

**Manufacturer's Address:** D-54578 TofuTown Wiesbaum, Germany. Phone: +496593 9967-0. Fax: 6593 9967-225.

**Date of Introduction:** 1999 June.

**Wt/Vol., Packaging, Price:** 250-300 gm pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Color packages sent by Bernd Drosihn. 2004. Nov. 15. Size: 9.5 by 11.5 by 2.3 cm. Paperboard boxes. Various colors. Color photo of the dish, ready to eat, on a white plate. Each of these Viana-brand products is a meat alternative, ready to heat and serve, introduced in June 1999. The packaging is very attractive. On the front panel: 100% made from plants. 0% cholesterol. 100% veggie power. 100% Organic. Ingredients are listed in 5 languages: German, French, English, Spanish, Italian. Nutritional facts are given in German and English. On the rear panel: “Good source of soy protein. 30 mg isoflavones per serving.”

3154. **Product Name:** Gardenburger–LifeBurger (Soy Patties).

**Manufacturer's Name:** Gardenburger Inc.

**Manufacturer's Address:** 1411 S.W. Morrison St., Suite 400, Portland, OR 97205. Phone: 1-800-636-0109.

**Date of Introduction:** 1999 July.

**Ingredients:** Soy protein concentrate–hydrated, water, wheat gluten, isolated soy protein, autolyzed yeast extract, maltodextrin, natural flavor, flax seeds, soy isoflavone concentrate flour, wheat fiber, vegetable gum, roasted garlic, sea salt, carrageenan, konjac flour, dried onion, caramel color, dried garlic, natural grill flavor (from expeller pressed vegetable oil), spice.

**Wt/Vol., Packaging, Price:** 2 patties per 6 oz (170 gm) box.

**How Stored:** Frozen.

**New Product–Documentation:** Label (package) sent by Amanda of Gardenburger in Oregon. 2000. March 23. 5½ by 5.0 by 1.5 inches. Paperboard box. Front panel: Dark blue, yellow, and white on sky blue. “Packed with soy protein. 13 grams. Made with soy isoflavone flour, flax seeds, and garlic.” A color photo shows one grilled patty on a bun with all the trimmings. On one end of the package is a small color photo of Paul Wenner. The caption: “The Gardenburger soy patty was created by GardenChef Paul Wenner in his pursuit of great-tasting foods that promote healthy eating and a healthy environment. A percentage of our sales is being donated to organizations that share this vision.” Each burger is individually packed in a sealed cellophane pouch. Soyfoods Center taste test. 2000 March 25. Poor. Tastes and smells like dog food.

3155. Murphy, Patricia A.; Song, T.; Buseman, G.; Barua, K.; et al. 1999. Isoflavones in retail and institutional soy foods. *J. of Agricultural and Food Chemistry* 47(7):2697-2704. July. [27 ref]

• **Summary:** Gives the content of daidzein, genistein, glycitein. Isoflavone levels ranged from 1 microgram per gram in soy sauces to 540 micrograms per gram in tempeh. “Soy milk and tofu represented the major portion of the soy foods evaluated.”

Also includes: Tofu (different kinds, raw and cooked), soy sauce, miso (white and red), tempeh (raw and cooked), FriChik (soy chicken, raw and cooked), meatless frank (raw and cooked), Harvest Burger (raw and cooked), Meatless links (raw and cooked), Soy/beef burgers (raw and cooked). Address: 1-4. 2312 Food Science Building, Food Science & Human Nutrition Dep., Iowa State Univ., Ames, Iowa 50011.

3156. Tofutti Brands Inc. 1999. Quit Beef'n: The world's best tasting veggie burger (Memorabilia–Button with safety pin on back). Cranford, New Jersey.

• **Summary:** This metal button, 4 inches in diameter, is meant to be worn on one's shirt. The words are written in red, yellow, and black on an orange-yellow background. Across the top is written “Tofutti brand. Living dairy free,” next to a small image of a person kicking a soccer ball. This button was sent to Soyfoods Center in July 1999 by Patricia Smith who picked it up at the Tofutti booth at the NNFA show at Las Vegas. Address: 50 Jackson Dr. (P.O. Box 786), Cranford, New Jersey 07016. Phone: 201-272-2400.

3157. United Specialty Foods. 1999. Award-winning vegetarian products (Leaflet). P.O. Box 41279, Nashville, TN 37204. 1 p. Front and back. Black and white. 28 cm.

• **Summary:** “Longa Life ‘Not Meats’ are so good they are the only vegetarian products to win the National Nutritional Foods Association People's Choice Award \* Three Years in a Row!

“Plus, they are so healthy they are free of hydrogenated fats and artificial color.”

Photos of the front panels of Longa Life vegetarian products bear these captions: Notchicken: Winner “Best of Show” 1996. Notcorndogs: Winner “Best of Show” 1997. Not Chicken Breast Fillet: Winner “Best of Show” 1998.

In the upper left is the People's Choice seal. In the lower left corner is a 75¢ coupon.

On the rear, ingredients are given for each of the following Longa Life products: Notchicken slices. Notham slices. Notbacon. Notpepperoni. Notchicken Breast Fillet. Notchicken Nuggets. Notcorndogs.

The first 4 ingredients are typically water, soy protein, wheat gluten (or wheat flour), and canola oil. Address: Nashville, Tennessee. Phone: 1-888-57-4-LIFE.

3158. **Product Name:** Natural Touch Tuno (Vegetarian

Tuna).

**Manufacturer's Name:** Worthington Foods, Inc.

**Manufacturer's Address:** 900 Proprietors Rd.,  
Worthington, OH 43085.

**Date of Introduction:** 1999 July.

**Ingredients:** Textured soy protein concentrate, water, expeller canola oil, contains 2% or less of autolyzed yeast extract, natural flavors from non-meat sources, hydrolyzed corn protein, corn starch, sea salt, citric acid, wheat germ oil, onion powder.

**Wt/Vol., Packaging, Price:** 12 oz. can.

**How Stored:** Shelf stable; refrigerate after opening.

**New Product–Documentation:** Leaflet (8½ by 11 inch, color, single sided) sent by Patricia Smith from Natural Products Expo East. 1999. July. "Sorry Charlie, no tuna wanted." A photo shows the front of the can.

3159. *SoyaScan Notes*. 1999. The soybean: Animal, vegetable or mineral? (Overview). Aug. 4. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** A traditional American parlor game and quiz show named "Twenty Questions" was based on the assumption that all things in the universe could be classified as either animal, vegetable, or mineral. Clearly the soybean is a vegetable, and it is most like a vegetable when served as edamamé or green vegetable soybeans. But soybean pods and leaves are unusually hairy, and the soybean can easily be transformed into alternatives to almost every known animal food product—more specifically into all kinds of meats and dairy products. It can be made into meatless burgers, hot dogs (wieners), breakfast sausages, beef jerky, bacon bits (such as Bac\*Os) or meatless bacon, juicy chicken drumsticks or meatless chick nuggets, meatless steak, and the like. Or it can be made into all the dairy alternatives such as milk, yogurt, ice cream, cheese, cream cheese, cheesecake, sour cream, coffee creamer, whip topping and the like.

Soybean oil can also be made to imitate the greatest commodity of the 20th century: petroleum. We now have soy ink, soy diesel fuel, soy resins, soy paints and varnishes, etc.

Thus, of all the vegetables in the world, the soybean is the most versatile—the most like an animal and the most like a vegetable. What will they think of next?

Note: Twenty Questions began on radio in 1946, then played on television from Nov. 1949 until May 1955.

3160. Mair, Amy Tyler. 1999. Appetizing growth: Profile—Yves Potvin. Yves Potvin's meatless cuisine is North America's best-seller. Now he's looking for the recipe for a winning, healthy fast-food restaurant. *Business in Vancouver (Canada)*. Aug. 10-16. p. 23.

• **Summary:** Yves Potvin, age 43, never uses the word "vegetarian" in his speeches or marketing materials. He is a "semi-vegetarian," who eats little red meat and is looking for healthy food choices. He now runs a business that does

an estimated \$46 million per year in sales. Earlier this spring he opened fast food restaurants in Kitsilano and South Granville, Vancouver. There he serves only meatless foods, such as tofu hot dogs, soy burgers, meatless lasagna, and baked fries [French fries]. Fourteen years ago, the Quebec native, a chef and amateur cyclist, "was living in Vancouver and dishing up buttery sauces at former French restaurant Le Chef et Sa Femme. Disillusioned with the high-stress low-paying job," he looked for a way to be more independent. "With \$10,000 of his own money and \$30,000 borrowed from friends and family," Potvin developed a tasty meatless hot dog.

"The next several years were difficult after Potvin sold 40% of his company to finance growth." He later bought back the shares and today owns 100% of the company. The company also took a hit when it spent \$600,000 in R&D for a new veggie burger that went nowhere. 1992 was the year of "take-off"—the "year they crossed a major threshold and really began to grow." In 1985, when Yves Fine Food opened, the company saw its first product, a tofu wiener, as a "fusion food and adopted a sun logo to symbolize the marriage of East and West." Last year the company adopted its current logo, which shows a "French chef sporting a red beret and holding a basket brimming with fresh vegetables."

A large photo shows Yves.

3161. **Product Name:** Vegetarian Entrees: Mushroom & Gravy Stroganoff.

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

**Date of Introduction:** 1999 August.

**Ingredients:** Water, wheat gluten, wheat flour...

**Wt/Vol., Packaging, Price:** 10 oz box.

**New Product–Documentation:** Leaflet (color) sent by Mia Fox, Marketing Manager of White Wave. 1999. Aug. "Easy and delicious vegetarian entrees—Just heat 'n' eat!" A color photo of each product appears on the front of the leaflet. The ingredients are listed on the back.

3162. **Product Name:** Vegetarian Entrees: Chick'n & Gravy.

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

**Date of Introduction:** 1999 August.

**Ingredients:** Water, wheat gluten, wheat flour...

**Wt/Vol., Packaging, Price:** 10 oz box.

**New Product–Documentation:** Leaflet (color) sent by Mia Fox, Marketing Manager of White Wave. 1999. Aug. "Easy and delicious vegetarian entrees—Just heat 'n' eat!" A color photo of each product appears on the front of the leaflet. The ingredients are listed on the back.

3163. **Product Name:** Vegetarian Entrees: Thai Coconut Curry.

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

**Date of Introduction:** 1999 August.

**Ingredients:** Coconut milk, water, wheat gluten, agave syrup...

**Wt/Vol., Packaging, Price:** 10 oz box.

**New Product–Documentation:** Leaflet (color) sent by Mia Fox, Marketing Manager of White Wave. 1999. Aug. "Easy and delicious vegetarian entrees–Just heat 'n' eat!" A color photo of each product appears on the front of the leaflet. The ingredients are listed on the back.

3164. **Product Name:** Vegetarian Entrees: Sloppy Joe Sandwich Filling.

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

**Date of Introduction:** 1999 August.

**Ingredients:** Water, soy tempeh (cultured organic soybeans, water), seitan...

**Wt/Vol., Packaging, Price:** 10 oz box.

**New Product–Documentation:** Leaflet (color) sent by Mia Fox, Marketing Manager of White Wave. 1999. Aug. "Easy and delicious vegetarian entrees–Just heat 'n' eat!" A color photo of each product appears on the front of the leaflet. The ingredients are listed on the back.

3165. **Product Name:** Vegetarian Entrees: Tempeh Marinara.

**Manufacturer's Name:** White Wave, Inc.

**Manufacturer's Address:** 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

**Date of Introduction:** 1999 August.

**Ingredients:** Water, tomatoes, soybeans, brown rice, organic raw cane crystals...

**Wt/Vol., Packaging, Price:** 10 oz box.

**New Product–Documentation:** Leaflet (color) sent by Mia Fox, Marketing Manager of White Wave. 1999. Aug. "Easy and delicious vegetarian entrees–Just heat 'n' eat!" A color photo of each product appears on the front of the leaflet. The ingredients are listed on the back.

3166. Worthington Foods, Inc. 1999. Second quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. Front and back. 22 x 9 cm.

• **Summary:** Net sales for the second quarter of 1997 rose 27.5% over the same period in 1996, net income fell 13.6%, and earnings per share fell 16.7%. Morningstar Farms retail sales ("which include meat alternative products and frozen egg substitutes") rose 38.9%. Meat alternative product sales rose 44.5%. But, approximately one-half of the quarterly

sales gain was from the recently acquired [from Pillsbury] Harvest Burger brand. The company is involved in the largest marketing campaign in its 60-year history; initial feedback from the TV campaign is very encouraging. The company is in the final stages of its nationwide search for a new president. Address: Worthington, Ohio. Phone: (614) 885-9511.

3167. Ungar, Laura. 1999. Don't bet your tofu. *News Journal (Wilmington, Delaware)*. Sept. 15.

• **Summary:** The writer, a vegetarian since youth, conducted a taste panel using ten teen tasters. Her research showed that sales of Tofurky have been tripling each year. And according to Information Resources Inc. [IRI, that aggregates data from supermarket scanners] sales of Boca Burgers are up 79% from last year to \$17.3 million and sales of Gardenburgers are up 49% to \$45.9 million.

The teen testers tried eight products: Boca Burgers, Gardenburgers, Bella Burgers, Chicken-Free Nuggets, White Wave Chicken-Style Sandwich Slices, Tofurky Deli Slices (peppered), Foney Baloney and Morningstar Farms Veggie Dogs. The writer cooked the burgers, nuggets and dogs in the microwave, and served the "cold cuts" cold.

The testers were picky. They liked the veggie hot dogs best. Of the three burgers, they liked Boca Burgers best. Only 4 of the 10 said they would eat a Boca Burger again. The Bella Burgers were made from portabella mushrooms. Address: Staff reporter.

3168. *Recorder (Greenfield, Massachusetts)*. 1999. Lightlife celebrates long life (Photo caption). Sept. 24.

• **Summary:** During Lightlife Foods' 20th anniversary celebration, Jason Torrey holds a rack of tofu hot dogs freshly made at Lightlife's factory in the industrial park at Turners Falls. Ron Hunter, Lightlife's vice president of operations, appears at right.

3169. *Bluebook Update (Bar Harbor, Maine)*. 1999. New study finds soyfoods sales healthy. 6(3):1, 7. July/Sept.

• **Summary:** A market study titled *The U.S. Soyfoods Industry* was recently completed by Soyatech, Inc. and Senechal, Jorgenson & Hale Co. It found that retail sales of soy products reached 1.7 billion in 1998 and are expected to reach \$2.12 billion by the end of 1999, \$2.56 billion by the end of 2000, and 3.67 billion by the end of 1002. After growing at less than 10% a year from 1990 to 1995, sales for the entire soyfoods category shot up quickly, growing 11.5% in 1997, and 17.7% in 1998; they are expected to increase 23.2% in 1999. A major reason for this growth is a keen interest in health by consumers who believe that soyfoods can provide health benefits.

Looking at the various market segments, the one with the most rapid growth has been meat alternatives, which grew 48% in 1997, 45.8% in 1998, and is expected to grow

44.8% in 1999. The category already has retail sales of \$500 million a year.

Soy milk is another category with strong growth; retail sales rose 38.7% in 1998 and are expected to grow 38% in 1999.

The study is composed of three major parts: (1) U.S. Soyfood Products & Market, which covers sales, companies, products, and market trends; (2) The Soyfoods Consumer, which provides a detailed analysis of who this consumer is; and (3) Soy Protein Ingredients, which outlines the industry and market for soy ingredients. The report can be purchased in its entirety or by section.

Note: A brochure describing this study, from the two companies that conducted it, states that it was completed in April 1999 and costs \$12,500.

3170. **Product Name:** The Original Boca Breakfast Patties.

**Manufacturer's Name:** Boca Burger, Inc.

**Manufacturer's Address:** [Madison, Wisconsin].

**Date of Introduction:** 1999 September.

**New Product–Documentation:** See next page. Ad (full page, color, copyright 1999) in *Vegetarian Times*. 2000. Feb. Inside rear cover. “A delicious source of good-for-you soy.” “Dorothy and Ed Barnes.” Each has his or her own preferences, but both love Boca breakfast. “Real taste attracts all kinds.”

3171. *Consumer Reports*. 1999. Seeds of change: In the U.S. and elsewhere, the food supply is being genetically altered. Here's why you should care. Sept. p. 41-46.

• **Summary:** About genetically engineered foods in America, with focus on soybeans and corn. One of the most accurate, informative, and fair articles on the subject seen to date. Most Americans, even those who read food labels carefully, are unaware that many of the foods they now buy contain genetically engineered ingredients. By contrast, most Europeans are well aware of this. Today, only three years after the first large-scale commercial harvest of genetically engineered crops, they cover more than one-fourth of U.S. cropland—more than 90 million acres. That includes more than 55% of all soybeans, 35% of all corn, and nearly 50% of all cotton. The USDA has approved 50 genetically engineered crop plants, though some aren't yet being grown in large numbers.

Two of the biggest issues in the debate over genetically engineered foods are: (1) Should they be labeled—as is required several European countries. The U.S. government has opposed mandatory labeling, arguing that Americans aren't interested in the issue and that they don't have anything to worry about. Yet a *Time* magazine poll in Jan. 1999 found that 81% of respondents said genetically engineered food should be labeled as such. (2) What are the long-term environmental and health effects of genetically engineered crops? There is no evidence that genetically

engineered foods are unsafe to eat but there are several studies that raise serious concerns about their environmental impact. One recent study showed that when the larvae of monarch butterflies eat the pollen from genetically engineered corn, they die.

In July Gerber and Heinz announced that they were planning to remove genetically engineered ingredients from all their baby foods. Now that European Union regulations prohibit imports of unapproved varieties of genetically engineered corn, U.S. corn exports to Europe have virtually stopped—a \$200 million loss.

Basically, genetically engineered crops have been promoted to farmers, not to consumers. To date, they contain no consumer benefits. Do genetically engineered crops give higher yields? USDA data from 1996 to 1998 show significantly higher yields in some regions for some years, yet in other regions yields were lower. Do genetically engineered crops require less total use of pesticides? In some regions they do, in others they do not.

The magazine bought a variety of processed and fast foods that contain soybeans or corn, then had the DNA of these foods analyzed. They found genetically engineered ingredients in: (1) Three powdered infant formulas: Enfamil ProSobee Soy Formula, Similac Isomil Soy Formula, and Nestle Carnation Alsoy. (2) Several soy burgers, including Boca Burger Chef Max's Favorite, Morningstar Farms Better 'n Burgers, Morningstar Farms Harvest Burgers, and McDonald's McVeggie Burgers (sold in select stores in New York City).

A sidebar on the last page of the article is titled “Recommendations.” (1) Labeling: “Consumers have a fundamental right to know what they eat, and federal officials should require that all foods containing genetically engineered ingredients be labeled as such, including milk with recombinant bovine growth hormone. Regulatory precedent favors labeling.” For example, the FDA requires irradiated food and orange juice made from concentrate to be so labeled. (2) Safety testing: “Consumer Union believes that genetically engineered foods should be subject to a mandatory federal human-safety review before they hit the market. Today U.S. companies can choose whether or not they want federal review.” (3) Organic standard: “The USDA should set a single, national standard for certified-organic food that excludes genetically engineered food from the definition.” (4) Marker genes: “Industry should cease using antibiotic ‘marker’ genes in the manufacture of genetically modified crops.”

3172. Pszczola, Donald E.; Giese, James. 1999. Choosing ingredients for the Time Capsule. *Food Technology* (Chicago). Sept.

3174. **Product Name:** Harmony Farms Soy Burgers [Original, With Onion, With Mushrooms, With Garlic]. **Manufacturer's Name:** Tree of Life, Inc. (Marketer-Distributor). **Manufacturer's Address:** P.O. Box 410, St. Augustine, FL 32085-0410. Phone: (800) 260-2424. **Date of Introduction:** 1999 September. **Wt/Vol., Packaging, Price:** 10 oz paperboard box. **How Stored:** Frozen. **New Product–Documentation:** Ad (full page, color) in *Vegetarian Times*. 2000. Feb. p. 61. "Cowabunga: Introducing Harmony Farms Soy Burgers." Shows a cow, standing upright, riding a surfboard.

3175. Berner, Robert. 1999. Kellogg, going vegetarian, forges \$307 million deal for Worthington. *Wall Street Journal*. Oct. 4. p. B-12.

• **Summary:** Kellogg Co. approached and offered to buy Worthington Foods Inc. for \$307 million, or \$24 a share—which sent Worthington's stock price soaring 60%. Last Thursday, the stock had closed at \$14.375. Worthington, a "maker of meat-alternative products, such as veggie burgers," has 635 employees. Sales / revenues in 1998 were \$138.5 million, up 18% from 1997. Net income / profit in 1998 was \$8.02, or \$0.66 per diluted share. Morningstar Farms, the company's leading brand, commands about a 50% share of meat alternative sales in U.S. supermarkets. Sales in the meat alternative category have grown 33% a year for the past five years in the USA. And there is room for more growth, since only 15% of U.S. households presently consume meat alternatives. Last week H.J. Heinz Co. agreed

to buy a 19.5% stake in Hain Foods Group Inc., another natural-foods company.

The bold move by Kellogg's CEO, Carlos Gutierrez, shows that he isn't counting on the company's core, but stagnant, breakfast cereal business as an engine of growth. Gutierrez says he expects Worthington's sales to grow at 12-15% a year.

Note: This sale marks the end of a long era: Seventh-day Adventist food companies in the USA making cutting-edge meat alternatives and other soyfoods that greatly helped the expansion of vegetarian diets in America. However, SDA food companies are still making excellent meat and dairy alternatives in Europe and Australia. Address: Staff Reporter.

3176. Kilman, Scott. 1999. Biotech scare sweeps Europe, and companies wonder if U.S. is next: Hain labels its snacks as free of genetic engineering; other firms may follow. Veggie burgers feel the heat. *Wall Street Journal*. Oct. 7. p. A1, A15. Western ed.

• **Summary:** Executives of America's largest food and beverage companies are watching very carefully how U.S. consumers respond to the issue of genetically engineered foods—according to Andrew Jacobson, a senior executive of the Hain Food Group. Although most consumers aren't aware of it, genetically engineered ingredients are present in various products made by Coca-Cola Co., Kellogg Co., General Mills Inc., H.J. Heinz Co., Hershey Foods Corp., Quaker Oats Co., McDonald's Corp., and many more.

3177. Egan, Catherine. 1999. Soy, oh soy! Food Cos get protein power. *Dow Jones News Service (New York, NY)*. Oct. 8. [Eng]

• **Summary:** "New York (Dow Jones)—A good-for-you food is fast becoming a good-for-you investment.

"Soy, the high-in protein, low-in-taste food, has become so popular among American consumers that companies and investment houses are lining up to take advantage of what many are calling the next big thing in eating."

Last week Kellogg Co. (king of breakfast cereals) announced plans to buy Worthington Foods Inc. (WFDS) one of America's largest makers of soy burgers. And in August, Dean Foods Co. (DF) bought a minority stake in the closely held White Wave Inc., which make soy milk and various other soy products.

Moreover, packaged food companies are also developing a wide array of new soy-based products. According the Marketing Intelligence Service (publisher of *Product Alert*), the number of new food and beverage products containing soy has more than doubled since 1995, to 172, from 79.

Peter Golbitz, president of Soyatech, an industry consultancy, says that the soy-food industry, now worth \$1.75 billion, is expected to more than double in three years to \$3.7 billion.

Fueling the soy mania is aging baby boomers searching

for the elixir of life.

“Indeed in a matter of days the U.S. Food and Drug Administration is supposed to decide whether to allow products containing more than 6 grams of soy protein to be labeled as cholesterol-reducing. If approved, this heart-healthy claim could further increase demand for soy products, rendering current growth projections for the industry too low.”

Gardenburger Inc. (GBUR), maker of a veggie burger and soy-based patties, points to the fact that some 120 million Americans have never even tried soy.

Scientific studies dating back 20 years showed clearly that soy protein helped lower cholesterol and decrease the risk of heart disease. Then in 1995 the respected *New England Journal of Medicine* published an article [James Anderson’s meta-analysis] showing that soy protein lowered cholesterol; Americans began to take notice.

Then the soy category exploded. “Researchers have since found that soy reduces the risk of cancer, helps build bone density, reduces menopausal symptoms like hot flashes—and on and on.

“Now its soy, soy, soy, everywhere.”

3178. Archer Daniels Midland Co. 1999. Annual report: Globalization for the 21st century. P.O. Box 1470, Decatur, IL 62525. 42 p. Oct.

• **Summary:** Net sales and other operating income for 1999 (year ended June 30) were \$14,283 million, down 11.4% from 1998. Net earnings for 1999 were \$265.9 million, down 34.2% from 1998, and far below the recent peak of \$796 million in 1995. Shareholders’ equity (net worth) is \$6,240 million, down 4.1% from 1998. Net earnings per common share: \$0.43, down 36.9% from 1998. Number of shareholders: 31,764.

On p. 16 are photos and brief discussions of Harvest Burgers (now marketed by Worthington Foods), NutriSoy (a new generation of soy protein), and NovaSoy (isoflavones). Page 17 discusses ADM’s partnership with DuPont using the latter’s STS soybeans. This year the annual report came in a slip cover with another report titled “Archer Daniels Midland: An overview.”

Also accompanying the annual report is a “Notice of Annual Meeting.” G. Allen Andreas, age 56, Chairman of the Board and CEO, had a 1999 salary of \$2,437,698, up from \$803,282 in 1997. John D. McNamara, President, had a 1999 salary of \$625,243, up from \$147,672 in 1997. Address: Decatur, Illinois.

3179. Gardenburger, Inc. 1999. Media coverage and highlights of the FDA soy claim and Gardenburger (Color videotape). 1411 Southwest Morrison St., Suite 400, Portland, OR 97205. 10:02 minutes.

• **Summary:** These TV clips, compiled for Gardenburger by a clipping service, show coverage of the FDA soy health

claim by many TV stations across the United States. Address: Portland, Oregon. Phone: 614-885-9511.

3180. *Modern Woman (Canada)*. 1999. The Canadian Grand Prix New Products Awards. Oct.

• **Summary:** This year Yves Veggie Breakfast Links was a winner. Former winners were Veggie Ground Ground, Veggie Burger Burgers, and Veggie Pepperoni Slices. A photo shows the products in their packages.

3181. **Product Name:** Tofurky “Giblet” Gravy.

**Manufacturer’s Name:** Turtle Island Foods, Inc.

**Manufacturer’s Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031.

**Date of Introduction:** 1999 October.

**Ingredients:** Water, unbleached flour, expeller pressed non genetically engineered canola oil, Tofurky Giblets (water, vital wheat gluten, organic tofu...)... natural vegetarian flavor, spices, organic cane juice, sea salt, onion, garlic, autolyzed yeast, caramel color, non-dairy lactic acid culture.

**Wt/Vol., Packaging, Price:** 14 oz plastic tub. Retail for \$3.29 (2003/12, Lafayette, California).

**How Stored:** Frozen or refrigerated.

**New Product–Documentation:** Product with Label purchased at Safeway supermarket in Lafayette, California. 2003. Dec. 3. Paperboard sleeve has a round color photo of a boat of gravy on a wooden table surrounded by natural foods, against a blue background. “100% vegan. ‘The world’s best vegetarian gravy.’” Soyfoods Center taste test: Poor flavor and texture—especially compared with previous versions of this once-delicious gravy. Very bland. The “giblets” are very small. The texture is lumpy.

Talk with Seth Tibbott of Turtle Island. 2003 Dec. 4. This product was introduced 4-5 years ago. It is very popular and many people have said how much they like it. This year Turtle Island has sold more than 8,000 cases, up from 6,700 cases last year.

3182. United Soybean Board. 1999. National report on consumer attitudes about nutrition—1999-2000. Seattle, Washington. 8 p. Oct. 22 cm.

• **Summary:** This sixth annual nationwide survey, commissioned by the United Soybean Board, was conducted in July 1999 by an independent research firm in Seattle, Washington. It included telephone interviews with 1,028 randomly selected consumers and primary household shoppers of all ages throughout the USA. They were asked a series of up to 23 questions. The standard margin of error for the study is  $\pm 3.1\%$ .

Contents: Concern about nutritional content of food (1996-99). Americans changing eating habits due to concern about nutrition (1996-99). Specific dietary changes (Big changes: Reduce fat 49%, more vegetables 25%, more fruit 18%, less red meat 17%). Importance of nutrition in selecting

groceries and restaurants. Americans recalling stories on health and nutrition issues.

Consumer perceptions of genetically modified food, biotechnology, and labeling: Aware of the term “genetically modified food”—42% in 1999 vs. 48% in 1998; aware of “biotechnology”—36% in 1999 vs. 41% in 1998. “Consumers continue to view biotechnology more favorably than genetically modified. When asked if they would continue to purchase a product with these terms on the label, 71% said yes or maybe to the term biotechnology, while 58% said yes or maybe to the term genetically modified.”

Consumer perception of cooking oils: “More consumers (89%) perceive soybean oil as being healthier than any other oil”—followed by olive oil (87%) and canola (86%). “However most Americans (78%) are unaware that vegetable oil is often synonymous with soybean oil.”

The healthiness of soy and soy products: “The number of consumers who perceive soy and soy products as very healthy increased significantly to 71% from 67% in 1998 and 59% in 1997.

“Forty percent of consumers are aware of specific health benefits of soy, such as reducing the risk of heart disease (14%), lowering cholesterol (10%), reducing the risk of breast cancer (8%) and prostate cancer (5%) and relieving or reducing the symptoms of menopause (7%).”

Consumer awareness and use of soy products: “Consumers report they are eating more soy products. Of those who have tried soy products, 68% report using them regularly. Twenty-four percent report using soy products once a week or more, compared to 15% in 1998. More consumers also report that they eat soy occasionally, about once a week.

“The three products that ranked highest in consumer awareness are tofu (78%), soy veggie burgers (72%) and soy milk (63%).

“Tofu and soy veggie burgers continue to receive the highest level of trial among consumers at 43% and 38%, respectively.”

Consumer perceptions of *trans* fat and hydrogenation. “Over half of consumers are aware of *trans* fatty acids (58%) and hydrogenation (54%). Fifty-three percent understand what the term *trans* fatty acids represents and 64% are familiar with the term hydrogenation.

“Most consumers view hydrogenation either neutrally or positively (56%), while 44% view the term negatively.

“Consumers seem to be confused about the healthiness of *trans* fatty acids. Forty-five percent think of *trans* fatty acids as somewhat or very healthy while 55% view it as somewhat unhealthy or very unhealthy.

“Consumers are also split between their likeliness to purchase a product with *trans* fatty acids listed on the Nutrition Facts label. Forty-five percent are either very likely or somewhat likely to purchase a product with a *trans* fatty listing on the label and 55% would be somewhat or very

unlikely to do so. This split also seems to indicate confusion among consumers about the term *trans* fatty acids.”

Talk with Vicki M. Nesper of United Soybean Board / Publicis Dialog, in Seattle, Washington. 2002. May 2. This survey was conducted in July 1999, about 3 months before the FDA issued its health claim. The preliminary results were released at the IFT convention that summer. The report itself was published in October—as it is each year.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at [www.soyconnection.com/health\\_nutrition/pdf/](http://www.soyconnection.com/health_nutrition/pdf/).

3183. **Product Name:** Morningstar Farms Buffalo Wings.

**Manufacturer’s Name:** Worthington Foods, Inc.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085.

**Date of Introduction:** 1999 October.

**How Stored:** Frozen.

**New Product—Documentation:** Ad (full page, color) in *Vegetarian Times*. 1999. Oct. Rear cover. “It’s mother was a health nut. It’s father a couch potato. Sound like a family you know?” Resembles chicken wings.

3184. Yves Veggie Cuisine, Inc. 1999. Prepare for the soy explosion (October 26, 1999): Stock up on Yves products early (Leaflet). Delta, British Columbia, Canada. 1 p. 28 cm.

• **Summary:** This single-sided leaflet, is printed with blank ink on pea-green paper, discusses the FDA announcement expected to occur on 26 Feb. 1999. “Soy protein may reduce the risk of heart disease. Eating Yves Veggie Cuisine may reduce the risk of coronary heart disease, the single leading cause of death in America.” The slogan on the bottom reads: “Yves takes great taste to heart.” Address: 1638 Derwent Way, Delta, BC V3M 6R9 Canada. Phone: (604) 525-1345 or [www.yvesveggie.com](http://www.yvesveggie.com).

3185. Thompson, Stephanie. 1999. Natural foods experiencing organic growth: ‘Health foods’ no more, new options attract consumers and food marketers. *Advertising Age*. Nov. 1.

• **Summary:** Mentions Boca Burgers (“Happy Stomachs, Healthy Hearts” ads), increasing sales of organic foods, last week’s FDA ruling for a soy heart health claim, Kellogg, owner of Worthington Foods and the belief that “Soy-based foods have enormous potential.”

3186. Hack, Greg. 1999. Adding marketing muscle. *Kansas City Star (Missouri)*. Nov. 2.

• **Summary:** A table titled “Selected soybean product sales” gives U.S. statistics (in millions of dollars for) for four years: 1996 / 1997 / 1998 / 1999.

Soy milk: 12.2 / 13.4 / 15.4 / 18.7.

Meat substitutes:

Gardenburger: 6.2 / 10.2 / 44.9 / 45.9.

Morningstar Farms: 30.6 / 33.0 / 37.1 / 40.4.

Boca Burger: 5.3 / 7.6 / 12.3 / 17.3.

Source: American Soybean Association and Information Resources Inc.

A photo shows the front panel of a Gardenburger Soy Burgers carton.

3187. Smith, Katie. 1999. A vegetarian Thanksgiving: Tofu turkey with stuffing is the centerpiece for meatless feast. *Blade (Toledo, Ohio)*. Nov. 9.

• **Summary:** “The tofu turkey, trademarked Tofurky, is a tofu roast made with wheat gluten, tofu, white beans, garbanzo beans, and spices. The stuffing is made of brown rice, wild rice, bread cubes, onion, celery, and vegetarian seasoning. It comes with a carton of frozen golden mushroom gravy and Tempeh Drumettes.” When the gravy is cooked, it adds the aroma of turkey.

Sales of Tofurky have tripled each year since the product was introduced in 1995, says Seth Tibbott of Turtle Island Foods. To date more than 47,800 of these vegetarian feasts have been purchased.

3188. McKelvey, Richard. 1999. New developments at Lightlife Foods in Greenfield, Massachusetts (Interview). *SoyaScan Notes*. Nov. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Lightlife is now America’s largest maker of non-frozen meat alternatives. This year, Lightlife is celebrating its 20th birthday. On the Internet, the Kellogg Co. just announced that it will introduce a soy-fortified cereal. Address: Sales Manager, Lightlife Foods Inc., P.O. Box 70, Greenfield MA 01302. Phone: 1-800-274-6001.

3189. Hizer, Cynthia. 1999. Versatile vegetarian: Talking turkey getting easier with new items. *Atlanta Journal-Constitution*. Nov. 22.

• **Summary:** Vegetarians are getting tired of being the brunt of turkey jokes. But new turkey substitutes make life easier for them. There is: (1) Tofurky Feast (\$12.95 to \$16.95). (2) Sliced “turkey” for sandwiches from Tofurky. (3) Tofu Turkey. (4) New and Zen Unturkey (with a crisp rind of yuba) (\$16.19 and \$27.99).

3190. Savidge, Mariella. 1999. Bean curd bird: Allentown’s Fresh Tofu Inc. says customers flock to its meatless Thanksgiving treat. *Call (Allentown, Pennsylvania)*. Nov. 24.

• **Summary:** Gary Abramowitz, age 47, owner (with his wife, Andrea) of Fresh Tofu Inc. in Allentown, Pennsylvania, now makes Tofu Turkeys for Thanksgiving. A large color photo shows him and an employee with six of them. Gary has been a vegetarian since the early 1970s. He used to be head chef at the High Street Cafe, a vegetarian restaurant in Morristown, New Jersey; there he met Jeff Connerton, who owned a tofu company named Fresh Tofu Inc., which had started operation

in Easton, Pennsylvania, in Nov. 1984. In March 1985 he bought half of Connerton’s tofu Company. The two worked together until Oct. 1988, when Abramowitz bought out Connerton’s shares and became sole owner.

In about 1990, while still enjoying the meatless side-dishes at his family’s Thanksgiving dinners, he began to think about an alternative. That year he created the prototype Tofu Turkey; it weighed about 14 pounds and measured 14 inches across. Fresh Tofu started producing the tofu-based Turkeys in 1992. The number sold grew steadily each year. In April 1999, to support the new growth, the company moved into an 18,000-square-foot building, part of the Bridgeworks business incubator [at 1101 Harrison St. in Allentown. Phone: 610-433-4711] Fresh Tofu now has 17 employees. Address: Food Editor. Phone: 610-433-4711.

3191. Lightlife Foods, Inc. 1999. Love the taste! Love your heart! Rich in soy protein (Leaflet). Turners Falls, Massachusetts. 3 panels each side. Each panel: 13 x 8 cm. • **Summary:** On the cover of this full-color, glossy leaflet is a Japanese lady in a red sweater holding up her baby in a blue jumper—on a light green background. Contents: Relax: Lightlife makes getting your 25 [gm of soy protein per day] delicious and easy. Table showing Lightlife products and the number of grams of soy protein and fat in each; all have zero cholesterol. Good taste goes with good health. Lightlife: 20 years and still cooking (brief company history). Live long—Travel light. Our website: [www.lightlife.com](http://www.lightlife.com). Heartening news! The FDA confirms what we knew all along. Serve Lightlife: You’ll love the taste. Hungry for information? Call for more recipes. Address: 153 Industrial Blvd., Turners Falls, Massachusetts 01376. Phone: 1-800-Soy-Easy = 1-800-769-3279.

3192. *Natural Foods Merchandiser*. 1999. Cereal giant Kellogg to buy Worthington Foods. Nov. p. 9.

• **Summary:** Kellogg (the world’s leading producer of breakfast cereals, with yearly sales of \$6.8 billion) will buy Worthington Foods for \$24 a share or more than \$300 million. Worthington has been locked in a battle with Gardenburger for leadership of the meatless burger market. Both have spent so much money on advertising trying to establish their names, that it has significantly reduced their profits. The purchase came days after Kellogg sold its Lender Bagels line for \$275 million, down from the \$466 million it paid for the company 3 years ago.

3193. *Nutrition Business Journal (San Diego, California)*. 1999. Central Soya dominates soy concentrates: Lecithin gets new lease on life. 4(10/11):22-23. Oct/Nov.

• **Summary:** Soy protein concentrates wholesale for about \$0.60/lb compared with \$1.00 for soy protein isolates. The leading maker is Central Soya, followed by ADM. Solbar of Israel [owned by Soya Mainz which is now owned by

ADM] is another major maker. Industry-wide, the market for concentrates is growing at about 15% a year. Concentrates go into products like veggie burgers. There are more than 40 different types of soy protein concentrates; one of the newest, which retains its natural isoflavone levels, contains more isoflavones than any isolate on the market.

The role of soy protein concentrates has changed over the years. From the 1940s to the 1970s they were an inexpensive substitute for meat. The earliest soyburgers tasted pretty bad. In the 1980s they served as a functional ingredient in foods. In the early 1990s they were an important ingredient in low-fat/no-fat food products and in energy bars. Now they are going mainstream. Earlier this year Central Soya expanded its concentrate manufacturing facility in Remington, Indiana; in large part they were anticipating the FDA health claim.

Central Soya has total annual sales of \$1.5 billion from soy oil, soybean meal, soy concentrates, and lecithin. The company is also a worldwide leader in lecithin. A major competitor is Lucas Meyer (Decatur, Illinois), now owned by SKW Trostberg. The price of nutritional lecithin ranges from \$1-\$1.25 per pound wholesale. Last year the federal government's health and nutrition board (which sets the RDAs) recognized (contained in lecithin) as an essential human nutrient, assigning it daily reference intake status—one step down from RDA. This was a major development, and contributed to a resurgence in sales.

3194. Turtle Island Foods, Inc. 1999. Tofurky: America's #1 turkey alternative. Now with Wishstix and Tofurky "Giblet" Gravy (Ad). *Vegetarian Times*. Nov. p. 52.

• **Summary:** This one-third page vertical color ad introduces Tofurky with new features. Color photos show: (1) Tofurky sliced and served on a silver platter. (2) Three hands holding Wishstix. (3) Three packages of Tofurky Deli Slices in Original, Hickory Smoked, and Peppered flavors.

Note: The word "giblets" (pronounced JIB-luts), a word first used in the 15th century, refers to the edible viscera or entrails of a fowl / bird. Address: Hood River, Oregon. Phone: 888-TOFURKY or tofurky.com.

3195. Worthington Foods, Inc. 1999. Notice of special meeting of shareholders. Proxy statement for special meeting of shareholders. 900 Proprietors Rd., Worthington, OH 43085. 2 + 60 + v + 41 + 12] p. 28 cm.

• **Summary:** A special meeting of shareholders of Worthington Foods, Inc. will be held on 29 Nov. 1999 at the Radisson Hotel in Columbus, Ohio, mainly to consider and vote upon a proposal to adopt the Agreement and Plan of Merger, dated 30 Sept. 1999, with WF Acquisition Inc., a wholly-owned subsidiary of the Kellogg Co. (the latter is a Delaware Corporation). If this passes, Worthington will become a wholly-owned subsidiary of Kellogg and each common share can be converted into \$24 cash. Signed,

Ronald L. McDermott, Secretary.

Worthington will cease to be a publicly traded company. "Offering more than 150 products, Worthington is one of the leading independent producers of healthier alternatives to meat, egg, and dairy products." These are made primarily from soy and wheat proteins. "Worthington was incorporated in Ohio in 1967 and became the successor to the original Worthington Foods business which was started in 1939... Kellogg was incorporated in Delaware in 1922 as the successor to Kellogg Toasted Corn Flake Company, which had been incorporated in Michigan in 1906."

The Merger-Background (p. 15-19) gives the history from 8 July 1999 when Stephen Benoit, Vice President of Kellogg, phoned Dale Twomley, Chairman, President, and CEO of Worthington to discuss a possible business relationship, including a merger. Kellogg now has a "Natural and Functional Foods Division." Twomley replied that Worthington was not looking for a buyer. The first meeting was held on 16 July 1999 at Worthington's offices. Numerous meetings followed. The merger agreement was finalized on 30 Sept. 1999. "On the morning of Friday, October 1, 1999, the parties issued a joint press release announcing that they had signed the merger agreement." The \$24 per common share represents a premium of approximately 77% over the closing price on Sept. 29. Address: Worthington, Ohio. Phone: (614) 885-9511.

3196. Worthington Foods, Inc. 1999. Third quarter financial report. 900 Proprietors Rd., Worthington, OH 43085. 8 panels. 22 x 9 cm.

• **Summary:** Describes the agreement to merge with the Kellogg Company. "The merger price is \$24 cash for each of the Company's 12.8 million shares outstanding or approximately \$307 million."

States (incorrectly) that Dr. John Harvey Kellogg was the founder of Worthington Foods. Gross profit for the quarter ended 1 Oct. 1999 was \$17,396,000, or 44.7% of net sales. This gross profit is up 13% compared with the same quarter one year ago.

"I expect this will be the last letter to the shareholders of Worthington Foods... I believe that the Kellogg Company is very committed to our brands and the meat alternative category. I am confident they will provide the resources and commitment to continue the vision for meat alternative products started by Dr. George Harding, III, James Hagle, Allan Buller, Warren (Kelly) Hartman and shared by many others that have worked hard to build upon the foundation they provided."

"Sincerely, Dale E. Twomley, Chairman, President, and Chief Executive Officer." Address: Worthington, Ohio. Phone: (614) 885-9511.

3197. Tibbott, Seth. 1999. Update on Tofurky (Interview). *SoyaScan Notes*. Dec. 6. Conducted by William Shurtleff of

Soyfoods Center.

• **Summary:** Sales of Tofurky (vegetarian turkey alternative) are up about 20-23% over last year. Seth expects to sell about 56,000 to 58,000 by the end of the year, up from about 45% last year.

His new product, Tofurky Deli Slices, are doing surprisingly well, with total sales almost equal to those of Tofurky. His slices are based on tofu, whereas most competing products are based on soy protein isolates, which is not as natural an ingredient.

The “slow roast” is new way to cook Tofurky for the best flavor. Seth learned this from a customer. Put diced potatoes and carrots inside, and baste them with the Tofurky. Wrap in foil, then bake at 300°F for 2 hours.

Seth gets lots of e-mail about Tofurky. Hot issues: (1) I’ve been a vegetarian for 15 years and I don’t like it because it tastes too much like turkey. (2) Its too expensive. Seth’s response: Ounce for ounce it is less expensive than Gardenburgers. (3) Does it contain genetically-engineered soybeans? (4) I like the new gravy. Address: Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: 541-386-7766 OF.

3198. Tibbott, Seth. 1999. How Seth got interested in tempeh (Interview). *SoyaScan Notes*. Dec. 7. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Seth now runs one of the largest tempeh manufacturing companies in the United States. He makes and private-labels tempeh for many other companies. Seth was born in 1951 in Washington, DC, at Columbia Hospital for Women. He attended Wittenberg University in Springfield, Ohio, but took a year off and worked at a nature center and in natural history programs in Yellow Springs. He also attended Antioch University in Yellow Springs, Ohio, for several semesters and studied outdoor education. His focus was elementary education with a strong background in environmental education. In 1974 he graduated from Wittenberg. Soon his main interest shifted to outdoor education, where he worked for 8-9 years before becoming a

tempeh maker.

In 1977 he was living in Oregon working as a teacher-naturalist. He had read Steven Gaskin’s books and knew about The Farm in Summertown, Tennessee. He was on their mailing list. He had read in their mailings about tempeh and he had been making soyburgers out of soy grits; he fried them in oil and they tasted awful, but they were one of his main foods. In the summer of 1977 he went to eastern Tennessee, not to visit The Farm but rather to work as a naturalist (officially an “environmental resource specialist”) for the Tennessee Valley Authority’s Youth Conservation Corps, located outside Greenville, Tennessee on Lake Nolichucky. He was a vegetarian, very interested in vegetarian diets and very interested in The Farm—but had never been there. He and several friends (coworkers) showed up at The Farm one weekend—just to meet the people and see what they were doing. He saw nothing related to soyfoods or tempeh. The Farm had just gotten a truckload of gluten steaks, which Seth helped them devour.

After his visit, he ordered some tempeh spores from The Farm. He followed the directions, dehulled the beans by hand in their tent kitchen (it took about 2 hours to do 2 pounds), cooked then inoculated them, spread them on a stainless steel tray, covered the tray with aluminum foil, perforated the foil, and put the tray out in a field for about 24 hours. The warm Tennessee summer weather at Lake Nolichucky was perfect for an incubator. “The next day we were just blown away to see what had happened to these beans. There was some discussion whether we should eat ‘em or not. But we fried ‘em up with okra and sweet corn. Man, it was just incredible. It was some of the best tempeh I’ve ever tasted. It was a religious experience.”

At the end of the summer Seth returned to Oregon to continue his work as a teacher-naturalist. Over the next few years he visited The Farm briefly during drives across the United States to visit his parents in Washington, DC. But, again, he never saw or tasted tempeh or soyfoods at The Farm; nor did he ever visit their Soy Dairy.

During these years he ordered more tempeh spores from The Farm, and made tempeh at home and for other people (retreat groups) at a retreat center in Oregon. By this time Seth had put together an incubator from an old refrigerator in a barn heated by light bulbs. By about 1980 he had obtained and started to use copies of *Tempeh Production* and *The Book of Tempeh* by Shurtleff and Aoyagi.

In 1980, when President Reagan came into office, many government natural history programs began to be cut. Seth realized how much of his income was tied to government programs. Seth wanted to see his poorly-funded retreat center survive, so he decided to go into business making tempeh in order to make a lot of money, which he would use to fund the environmental education program at the center. The idealism of the 1970s! Seth had just gotten back from Alaska, where he worked as a naturalist in the summer of 1980. In the fall

he began accumulating tempeh-making equipment, investing \$2,500 of his savings. He worked out a deal with the Hope Co-op in Forest Grove, Oregon, that he could use the space in their cafe during off-hours to make tempeh. He hoped to make tempeh another successful hippie food—like granola and yogurt. His first product, introduced in Dec. 1980, was Soy Tempeh. It was made from organically-grown soybeans (purchased from Applegate, in Oregon). The tempeh starter was purchased from The Farm in Tennessee. The tempeh was made in a perforated 8-oz bag, then sold packaged in a second outer bag—for \$0.74 wholesale and \$0.99 retail. Getting the labels printed was a big problem, because the minimum run on roll-stock was 1,000 labels—far too many. So Seth found a guy who printed bumper stickers, so he had several tempeh labels printed on each piece of bumper sticker stock. Unfortunately, it took a long time to peel each label off the bumper sticker. His next printed job was “Tempeh Information and Recipes.” Seth was the company’s sole employee for the first year; he did everything! Then he hired Belinda Hanley, followed by Alexander Lyon.

In 1982 Seth moved his tempeh company into an empty elementary school house which he rented in Husum, Washington, a little town of about ten houses, about 10 miles north of Hood River, where Seth’s company is now. The school had a perfect kitchen for making tempeh; they stayed there for ten years.

In about 1986, while working as a struggling tempeh maker and still unmarried, Seth lost the lease on his rental house after a big party. Looking for a place to live, he decided to rent a piece of land (for \$30/month) and build a tree house up in four Douglas firs. It took about a year to build (of and on), and Seth did most of the work himself—when he was not making tempeh. The main room (bottom floor) was 11 by 16 feet with a deck surrounding it. It was very cozy, heated by a wood stove, and well insulated. Above that was a sleeping loft, with a little cupola (the size of a phone booth) on the third floor; it had a little window seat that folded out into a bed.

In about 1987-88, while living in his tree house, Seth started to hear about other people living in tree houses. Unable to find a book on the subject, he started to write one. He found a professional photographer, and soon wrote an article about tree houses in the *Whole Earth Review*. The article mentioned his book and encouraged other tree house dwellers to contact him. Eventually Seth and the photographer traveled around the USA, interviewing people and taking photos. While he was on the road, other people ran the tempeh company. In about 1989 Seth took his ideas and materials to various small publishers, including Ten Speed Press in Berkeley, California. They all turned him down, so the book was never finished or published. Another fellow, Peter Nelson, a tree house builder, was writing a book on the same subject at the same time. Peter found a major publisher, got an advance, and had his book published in the

early 1990s.

Seth lived in this tree house for about five years—as his tempeh company steadily grew. In 1991 he married Suzanne Spowart, moved out of his tree house, and into her house at Trout Lake. In May 1992 Seth moved his company across the river to Hood River, Oregon. In June 1992 Seth and Suzanne had their first child. In about 1996 his wife, Suzanne, became the tempeh company’s bookkeeper, financial officer, etc.

A photo, taken in the summer of 1977 at Lake Nolichucky, shows Seth Tibbott—having fun, goofing off. Address: President and Founder, Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: (503) 386-7766.

3199. *SoyaScan Notes*. 1999. Chronology of soy protein isolates for food use. Dec. 9. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1939—The Glidden Company in Chicago, Illinois, becomes the world’s first company to manufacture a soy protein isolate for use in food. Named Albusoy and called “soy albumen,” it is an enzyme-modified isolate used as a whipping agent to replace egg whites. 1950—Gunther Products of Galesburg, Illinois, introduces an enzyme-modified soy protein isolate. By 1967 roughly 1 million lb/year of enzyme-modified soy protein isolates were being made in the USA.

1957—The Glidden Company in Chicago becomes the world’s first company to start large-scale production of today’s regular (non-enzyme modified) food grade soy protein isolate. Their \$4 million plant at Indianapolis, Indiana, makes Promine brand isolated soy protein.

1957 July—ADM purchases The Drackett Company (Evendale, Ohio), which makes commercial industrial soy protein isolates and is experimenting with edible isolates.

1958—The Glidden isolate plant at Indianapolis is purchased by Central Soya—which now enters the isolate business.

1958-1959—ADM starts to sell small amounts edible isolates to Consolidated Foods in Texas. William Atkinson developed the product, which was quite satisfactory and practical. But the patent was about to expire, so ADM turned its attention elsewhere.

1959 Oct.—Central Soya opens a huge new plant to produce their Promine brand of soy protein isolate. By 1966 Central Soya is making 30 million lb/year of soy protein isolates.

1962 Oct.—Ralston Purina starts making food grade soy protein isolates in Louisville, Kentucky, under the Edi-Pro brand, using technology largely developed by Frank Calvert and Robert Boyer when they worked as researchers for Henry Ford. Anderson Clayton and Carnation started to make soy protein isolates soon thereafter.

1964—The USDA allows the use of soy protein isolates

in meat sausages at the 2% level by weight.

1965 Oct. Skippy Peanut Butter with Smoky Crisps introduced. The “Smoky Crisps” are bacon-like bits made by General Mills from spun soy protein fiber.

1965 Dec.–General Mills introduces Bac\*O’s, meatless fried bacon bits made from spun soy protein fiber in several test markets.

1966 May–General Mills introduces its Bontrae line of meat analogs based on spun soy protein fibers, including Ground Beef Analog, Diced Ham Analog, and Diced Poultry Analog.

1969 Dec.–Bac\*Os, meatless bacon bits, are now available nationwide.

1970 Dec.–Bontrae spun soy protein fiber starts to be made at General Mills’ new plant in Cedar Rapids, Iowa.

1973 March–Hamburger prices reach all-time highs. Hamburger extended with 25% Bontrae (spun soy protein fiber) goes on sales at Red Owl Stores in Minnesota.

1973 summer–Grain Processing Corp. of Muscatine, Iowa, starts making soy protein isolates under the Pro-Fam brand.

1974 Oct.–General Mills introduces meatless Country Cuts, made from spun soy protein fiber, in ham or chicken flavors.

1976–Ralston Purina has become the world’s leading manufacturer of edible soy protein isolates. Their flagship plant is still in Louisville. 1977 May–Dawson Foods buys (for about \$10 million) the Bontrae spinning line, plus exclusive rights to General Mills’ soy isolate and patented spinning technology, equipment, and frozen spun products marketed to food processors and institutional customers. Dawson moved the equipment to Minnesota, and broke ground for a new plant in Feb. 1978

1979 March 31–Dawson Mills’ soy protein isolate plant opens 1½ miles east of Dawson, Minnesota, on a 220-acre site.

1980 May–Dawson Mills introduces its Anaprime line of meat analogs based on spun soy protein fibers and technology purchased from General Mills; they are very similar to the Bontrae line.

1980 Aug.–Central Soya sells all of its soy protein isolate operations to Archer Daniels Midland Co. With this purchase, ADM enters the edible isolate business, and Central Soya gets out. ADM names its first four edible isolates Ardex D, Ardex DHV, Ardex F, and Ardex SP-6—simply replacing Central Soya’s brand “Promine” by the brand “Ardex.”

1985–ADM moves its soy isolate plant from Chicago to Decatur, Illinois.

1986–ADM doubles the size of its soy isolate plant in Decatur.

1987-1988–ADM builds a second isolate plant in Decatur.

1988 June 23–ADM buys from Grain Processing Corp.

(GPC) their soy protein isolate technology, brand names (Pro-Fam), and customers—but not their equipment. ADM soon begins to produce the Pro-Fam line of isolates in Decatur, Illinois.

1988–The price of imported casein rises above the price of soy isolates—and stays there due to loss of subsidies by foreign governments.

1988–ADM starts to make industrial soy protein isolates in Decatur.

1995–ADM builds a third edible isolate plant in Decatur, adjacent to its other two plants.

1997–ADM sells its industrial isolate business in Decatur to PTI (Protein Technologies International).

1997 June–ADM starts producing soy protein isolates at its plant in Europoort, Netherlands.

3200. Israel, Cocavatiyah Baht. 1999. Re: Update on “Eternity” and Taste of Life vegetarian restaurants in Israel. Letters to William Shurtleff at Soyfoods Center, Dec. 12 and 10 Jan. 2000. 2 p. + 2 p. Handwritten, with signature. Plus leaflet. [1 ref. Eng; Heb]

• **Summary:** This group used to be known as “Eternity,” an all vegetable ice cream parlor. Now they serve their vegetarian ice cream plus a menu “consisting of many various dishes (vegetable) that include tofu and the vegetable protein product seitan. We are vegan—no animal by-products, no artificial food coloring, no cholesterol. Kosher.” They now have a second restaurant at Hakishon St. (across from Magen David), Tiberias, Israel. Phone: 06 671 2133. They also have a factory that produces the ice cream, tofu, and most of the take-out products and carob candies. The main dishes (entrees) and some vegetarian products are made in the restaurant daily. They make tofu at: Nature’s Gate Ltd., Mivne Taaseya Haradash 76, Box 029, Dimona, Israel 86000. Phone: 972-7-655-7774. Fax: 972-7-655-7769. In 1986 they started to make and sell tofu as tofu. They sell their tofu at about 30 different places outside their two restaurants. Nature’s Gate Ltd. own the factory and L’Haiem owns the restaurants.

They also make their own soymilk at Nature’s Gate Ltd. Presently they produce the soymilk only for their own use, but in the future they hope to expand.

Enclosed is a one page recipe in Hebrew and English. The 12 food categories are: Desserts (incl. 9 flavors of non-dairy ice cream), candies, beverages (incl. soya milk), dressings, salads, breads, breakfast (incl. tofu links, scrambled tofu), sandwiches (incl. tofu cheese, marinated tofu, okara sticks, tofu falafel, tofu burger, tofu vege burger, stir-fry with tofu, stir-fry with seitan), steamed vegetables, take away (take-out), main entrees (incl. tofu teriyaki, tofu with gravy, tofu medley), a la carte (incl. tofu medley). Address: 60 Ben Yehuda St., Tel Aviv, Israel. Phone: 03 620 3151.

3201. Brasher, Philip. 1999. USDA wants soy in schools (News release). Washington, DC. 2 p. Dec. 23.

• **Summary:** Federal officials, worried about the fat content of kid's school meals, want to start letting schools and day care centers serve tofu, veggieburgers, and other soy products as alternatives to meat in federally subsidized lunches—now consumed by 26 million children. In 1994 the USDA decided to start requiring schools to meet the government's dietary guidelines for fat and nutrients. That means that the average fat content in school meals cannot exceed 30% each week. The USDA is considering dropping its restrictions on how much soy can be used in meals. Currently soy can only be used as a food additive in amounts of less than 30 percent.

Of course, the meat industry is fighting the proposal. They believe, for good reason, that schools will probably use more soy and less meat in their standard dishes, such as burgers and tacos. Carol Tucker Foreman, Director of the Consumer Federation of America's Food Policy Institute, believes that allowing a higher soy content will make it easier for schools to keep meat on their menus. So the proposal could be a mixed victory for vegetarians. A final ruling is expected by Feb. 2000. Address: The Associated Press.

3202. Mangels, Reed. 1999. Vegetarian Journal's guide to poultry alternatives. *Vegetarian Journal* (Baltimore, Maryland). Nov/Dec. p. 28-29.

• **Summary:** A large table gives a nutritional comparison of breakfast meats and meat alternatives in four categories: Deli slices (9 alternatives), patties (8), products to be added to stir-fried, etc. (5), entrées (11).

These meatless poultry alternatives are made from various combinations of soy protein, wheat gluten and tofu.. Address: Ph.D., R.D.

3203. Sanitarium Health Food Company. 1999. Sanitarium (Portfolio). Berkeley Vale, NSW, Australia. 27 inserts. 30 cm.

• **Summary:** This is simply a collection of colorful documents (each in full color) without a portfolio cover, sent with a cover letter by Melissa Harris, Nutritionist. The documents include: (1) Eight nutrition fact sheets. Subjects include wholegrains, fibre, heart health, etc. (2) Seven product sell-sheets, incl. SoyHealthy, So Good Now, Soyaccino, etc. (3) Three small recipe booklets. (4) 10 tips for healthy eating for the family. (5) Now there's an easy way to lower your cholesterol. (6) Six food cards with recipes. (7) Two booklets in "A taste for health" series. (8) List of available publications and videos.

(9) Sanitarium product range—Australia: Cereals (19 products, incl. Soy Tasty, Weet-Bix Hi Bran Soy & Linseed, Up & Go). Beverages (6 products, all based on So Good, incl. yoghurts and ice cream). Meals (19 products, incl. 5

types of Soy Healthy Frozen, 9 types of Soy Healthy Chilled, Soya Beans in Tomato Sauce, Sanitarium Soya Mince/TVP, BBQ Soya Sausages). Spreads (4 products incl. Marmite and many types of peanut butter). Specialty Foods (incl. many nuts & seeds, dried fruits, legumes, pulses & seeds, fruit snacks, and juices). (10) Leaflet (1999; color, front and back) titled "Soya beans, good health & you." Contents: Introduction. What are phytoestrogens. Protecting hearts. Combating cancer. Managing menopause. Promoting healthy bones. Soy foods for children. Putting the good news into practice. Address: 1 Sanitarium Drive, Berkeley Vale, NSW 2261, Australia. Phone: (02) 4348 7777.

3204. *SoyaScan Notes*. 1999. Major soy-related company acquisitions and mergers worldwide 1990-1999 (Overview). Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1990 Jan.—Worthington Foods acquires La Loma Foods of Riverside, California (formerly Loma Linda Foods, owned by the Seventh-day Adventist Church).

1990 (early)—Daniel Gevaert purchases the Lima Andiran site at Andiran (near Mezin) in southern France from Lima Foods—but not the Lima trademark. In June 1990 Daniel and his wife, Valerie, established Danival.

1990 Aug. 3—Hong Kong Soya Bean Products Co. Ltd. (makers of Vitasoy soymilk) acquires Nasoya Foods of Leominster, Massachusetts.

1990 Dec. 21—The Haldane Foods Group (a subsidiary of British Arkady Ltd., which is in turn owned by ADM) acquires Unisoy Milk 'n' By-Products Ltd. of Cheshire, England.

1991 Jan. 1—The Haldane Foods Group acquires Granose Foods Ltd. of Watford, Hertfordshire, England (formerly owned by the Seventh-day Adventist Church).

1991 Jan. 28—Tetra Pak International acquires Alfa-Laval AB.

1991 April—Huegli Naehrmittel A.G. acquires Soyastern Naturkost GmbH / Dorstener Tofu Produktions GmbH.

1991 Dec.—Specialty Food Ingredients (SFI) Europe BV acquires Solnuts BV (Netherlands) and Solnuts Inc. (Hudson, Iowa).

1992 Oct.—Central Soya Co. acquires the Protein Division of Aarhus Oliefabrik in Denmark.

1993 June—Vitasoy purchases Azumaya Inc. (America's largest tofu manufacturer, and the low-price leader) in California, for an estimated \$4-\$5 million. Vitasoy is now in the tofu business.

1993 June—21st Century Foods acquires Farm Foods from Barricini Foods.

1993—House Foods of Japan purchases the remaining 50% of House Foods & Yamauchi, Inc. from Mr. Shoan Yamauchi. The new company is named House Foods American Corporation.

1993 July—Nutrition et Santé (part of the Sandoz Group) acquires Société Soy of Saint-Chamond, France. The latter

company was renamed Nutrition et Soja, and on 15 Oct. 1994 it moved into a new factory at Revel (near Toulouse), France.

1993 (mid)–B & K Holdings of Switzerland acquires Sojinal of Issenheim, France.

1993?–Kineret (pronounced kuh-NAIR-et) Acquisition Group acquires Farm Foods from 21st Century Foods, then in Nov. 1993 the Hain Food Group acquires Kineret plus some assets of Barricini Foods Inc.

1996 April 22–Alpro (Belgium) purchases Sojinal (France).

1995 April 21–Irene and Len Stuttman buy back control of their company, INARI Ltd. (dba. Sycamore Creek) from J. Charles Follett (former CEO) and Peter L. Pairitz (accountant).

1995 April–Quest International, a unit of Unilever, acquires A.E. Staley's Gunther Products Division.

1997 Feb. 3–Monsanto purchases Asgrow Seed Co. from Seminis Inc., a subsidiary of Empresas La Moderna, S.A. (ELM).

1997 Aug. 24–DuPont signs a letter of intent to acquire Protein Technologies International, a wholly-owned subsidiary of Ralston Purina Co.

1997 Oct. 14–The Hain Food Group acquires Westbrae Natural, Inc., makers of soymilk. Westbrae's new name becomes Hain Food Group–Westbrae. 1997 Dec. 3–DuPont finalizes its purchase of Protein Technologies International (PTI–the world's leading manufacturer of soy protein isolates).

1998 Oct. 16–Worthington Foods purchases the Harvest Burger product line from ADM; by agreement, ADM will continue to make the Harvest Burgers at its Illinois plant.

1998 Dec. 31–DE-VAU-GE acquires Bruno Fischer GmbH, which sells bottled soymilk; both companies are located in Germany.

1999 Jan. 4–W.G. Thompson & Sons Ltd. of Blenheim, Ontario, Canada, purchases Sycamore Creek Co., a maker of soynuts and soy nut butter (located in Mason, Michigan).

1999 Oct. 4–The Kellogg Co. (famous maker of breakfast cereals, Battle Creek, Michigan) buys Worthington Foods Inc., America's leading maker of meat alternatives.

3205. *Whole Foods*. 1999. U.S. FDA authorizes soy protein health claim. Dec.

• **Summary:** During the 12 months ending June 1999, overall sales of soyfoods reached \$494.4 million, up 34% over the previous year—according to statistics compiled by Spence Information Service (SPINS, San Francisco, California) and AC Nielsen. This included \$117.9 in sales at natural foods stores (a 31.4% rise) and 376.5 million at supermarkets and mainstream food/drug/mass merchandise outlets (a 35.2% increase). Note that this growth took place *before* announcement of the FDA health claim.

A table (based on figures provided by SPINS) gives

growth rates for selected soy subcategories and (in parentheses the growth rate for the entire subcategory): Soy supplements 120.8% (27.0%). Soy-based frozen desserts 98.4% (11.4%). Soy beverages (non-dairy) 45.7% (25.9%). Tofu 42.4% (all tofu is soy). Soy-based meat alternatives 16.4% (15.8%). Address: South Plainfield, New Jersey.

3206. Yves Veggie Cuisine, Inc. 1999. Good food. For a change (Portfolio). Delta (Vancouver), B.C., Canada. 28 inserts. 31 cm.

• **Summary:** In the center of the cover the company logo, “Yves Veggie Cuisine,” shows a Frenchman, wearing a beret, carrying a basket of vegetables. At the top and bottom is a border of alternating purple and light purple stripes. The documents enclosed in this portfolio include: (1) Company backgrounder (3 p. company history). (2) Yves Potvin: President and founder, Yves Veggie Cuisine (1 p. biographical sketch). (3) Awards and achievements (3 p., most recent first). (4) Guide to healthy eating (1 p.). (5) Product information. (6) Product information: Veggie wieners (1 p.). (7) Veggie Wieners (1 p. front and back, color photos of 5 products plus product information). (8) Ad—“You’ll be going for breakfast with your customers” (1 p. front and back, Veggie Breakfast Links, color photo and product information). (9) Product information: Veggie slices (1 p.). (10) Veggie Slices (1 p. front and back, color photos of 4 products plus product information). (11) Ad—“Go ahead, ham it up.” Veggie ham slices (1 p. front and back with color photo). (12) Ad—“More of a good thing.” Veggie Turkey Slices. (13) Product information: Veggie burgers. (14) Ad—“Great taste. More choice” (1 p. front and back. Color photos show 5 types of fat free Veggie Burger Patties). (15) Veggie burgers (1 p. front and back, with color photos). (16) Product information: Veggie ground round, Original or Italian. (17) Veggie ground round (1 p. front and back, with color photos). (18) Product information: Entrees (1 p., 4 types). (19) Perfecto Pasta. Enjoy the benefits of soy! (1 p. color, front and back). (20) Definition of ingredients (2 p). (21) Eight articles, photocopies. Address: 1638 Derwent Way, Delta (Vancouver) V3M 6R9, B.C., Canada. Phone: 604-525-1345.

3207. **Product Name:** [Sojasun Soya Steak Sojasun Stek du Soja (Fines herbes, Petits légumes, Provençale, Indian, Napolitan, Bordelaise)].

**Foreign Name:** Sojasun Stek du Soja (Aux fines herbes, Aux petits légumes, A la provençale, A l’Indienne, A la napolitane, A la bordelaise).

**Manufacturer’s Name:** Laiteries Triballat.

**Manufacturer’s Address:** B.P. 21, 35530 Noyal-sur-Vilaine, Prov. Brittany, France. Phone: 99 00 51 01.

**Date of Introduction:** 1999.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with French lady who

lives in Miami, Florida. 2002. May 16. This is her favorite meat alternative; it is sold refrigerated. She wants to know if it is sold in the USA. There are many flavors. Each package contains two steaks plus a tiny bag/sachet of sauce. Details can be found at [www.sojasun.com](http://www.sojasun.com).

3208. **Product Name:** Smart Ground [Original, or Taco & Burrito].

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** 153 Industrial Boulevard, Turners Falls, MA 01376. Phone: 1-877-SOY-EASY (877-769-3279).

**Date of Introduction:** 1999.

**Ingredients:** Original: Water, soy protein concentrate, wheat gluten, soy sauce (water, soybeans, wheat, salt), natural flavors (from vegetable sources), malt extract, wheat starch.

**Wt/Vol., Packaging, Price:** 12 oz.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Spot in Natural Foods Merchandiser. 1999. May. p. 69. “Lightlife adds Smart Ground to its line of soy-based meat substitutes. It is a delicious vegetarian, fat free replacement for ground beef...”

Leaflet sent by Patricia Smith from Natural Products Expo (Anaheim, California). 2000. March. “Ground *rules!*” On the front (glossy, color) is a photo of the front of both packages, and of the prepared product in a skillet. On the back (black-and-white) are ingredients and nutrition facts about the two products. “Made with non-GMO ingredients.”

3209. Soy City Foods. 1999. Soy City Foods: Specializing in great vegetarian burgers. Serving your vegetarian foodservice and retail needs since 1980 (Leaflet). Toronto, Ontario, Canada. 1 p. Front and back. 30 cm.

• **Summary:** See next page. On the front of this glossy color leaflet are photos of the following products—with both the English and the French panels showing: (1) Veggie Burgers / Végé burgers (soy-based). (2) Super Soy Burgers / Super burgers au soja. (3) Falafels (chickpea and soy-based). (4) Grain burgers / Burgers aux grains.

On the rear, in addition to these four, tofu and tempeh are also described. All of these products are vegan.

Across the bottom: “Health is the most precious thing you have—Sustain it by eating good food!” Also: [www.soycityfoods.com](http://www.soycityfoods.com). e-mail: [sales@soycityfoods.com](mailto:sales@soycityfoods.com).

Talk with Lorraine Guardino of Sol Cuisine, who sent this leaflet. 2013. March 13. Her best guess is that the leaflet was printed in about 1999, shortly before Dror Balshine bought Soy City Foods. The photography and artwork was done by Joan Burdette (later Joan Ness). Address: 2847 Dundas Street West, Toronto, Ontario, M6P 1Y9 Canada. Phone: 416-762-1257.

3210. Soy City Foods. 1999. Soy City Foods: Specializing in great vegetarian burgers. Veggie Burgers. Super Soy Burgers.

Grain Burgers. Falafels (Leaflet). Toronto, Ontario, Canada. 1 p. Front and back.

• **Summary:** On the front of this glossy color leaflet are photos of each of the flour products described above.

On the rear, in addition to these four, tofu and tempeh are also described. All of these products are vegan.

Across the bottom: “Health is the most precious thing you have—Sustain it by eating good food!” Also: [www.soycityfoods.com](http://www.soycityfoods.com). e-mail: [sales@soycityfoods.com](mailto:sales@soycityfoods.com).

Talk with Lorraine Guardino of Sol Cuisine, who sent this leaflet. 2013. March 13. Her best guess is that the leaflet was printed in about 1999, shortly before Dror Balshine bought Soy City Foods. The photography and artwork was done by Joan Burdette (later Joan Ness). Address: 2847 Dundas Street West, Toronto, Ontario, M6P 1Y9 Canada. Phone: 416-762-1257.

3211. Soy City Foods. 1999. Soy City Foods: Manufacturers of quality vegetarian foods since 1980 (Leaflet). Toronto, Ontario, Canada. 3 panels each side. Each panel: 21.5 x 9.4 cm.

• **Summary:** Printed with green ink on beige paper. Across the bottom of the front panel: “Health is the most precious thing you have—Sustain it by eating good food!” Also: e-mail: [sales@soycityfoods.com](mailto:sales@soycityfoods.com) [www.soycityfoods.com](http://www.soycityfoods.com).

On the remaining panels are descriptions of Falafels, Veggie Burgers, tofu, and frozen tofu.

Talk with Lorraine Guardino of Sol Cuisine, who sent this leaflet. 2013. March 13. Her best guess is that the leaflet was printed in about 1999, shortly before Dror Balshine bought Soy City Foods.

Note: Soy City Foods started making tofu at this address in 1980, making the company an early tofu manufacturer in Canada. The artwork was done by Joan Burdette (later Joan Ness). Address: 2847 Dundas Street West, Toronto, Ontario, M6P 1Y9 Canada. Phone: 416-762-1257.

3212. Davidson, Alan. 1999. The Oxford companion to food. New York, NY and Oxford, England: Oxford University Press. xviii + 892 p. Illust. by Soun Vannithone. Index. 29 cm. [1500+\* ref]

• **Summary:** The 2,650 alphabetical entries in this excellent encyclopedia and cornucopia represent 20 years of Davidson’s work. The 175 illustrations by Laotian artist Soun Vannithone are superb. There are 39 longer entries about staple foods such as rice, noodles, and apples. A comprehensive bibliography provides access to further information. The book does not contain recipes.

Soy-related entries include: Bean sprouts (p. 64). Black beans, fermented (*chi*, p. 79). Kecap (Indonesian soy sauce, made “basically from soya beans and palm sugar only.” “The word ‘kecap’ has passed into the English language as catchup or catsup and then as Ketchup, which now means something quite different.” p. 429). Ketchup (“probably via the Malay

*Serving Your  
Vegetarian Foodservice  
and Retail Needs  
Since 1980*

**SPECIALIZING IN GREAT VEGETARIAN BURGERS**

word *kechap*, now spelled *kecap*, which means soy sauce. The word was brought back to Europe by Dutch traders who also brought the oriental sauce itself. The sauce has changed far more than has the word, although the name has appeared in a large number of variations such as catchup and catsup.”

Tomato ketchup is now the best known and widely used—in fact almost the only ketchup left. Whereas tomato ketchup contains much sugar and vinegar, mushroom ketchup contains neither, and is basically a salted mushroom extract with a liquid, transparent consistency. The British food historian, C. Anne Wilson (1973), believes that mushroom ketchup was the first kind of ketchup in Britain; she argues that people used to pickle mushrooms, intending to use the mushrooms, but then started using the pickle too, and finally began using the pickle by itself.

“Oysters, mussels, walnuts, and many other ingredients have been used to make ketchup, and could be blended with spices, garlic or onions, wines and spirits to vary the flavour” p. 430-31). Koji (p. 435). Lecithin (p. 447). Miso (p. 509). Natto (p. 530). Soybean (p. 739). Soy milk (p. 739-40). Soy sauce (p. 740). Tempe (or tempeh, p. 788). Tofu (p. 798-99), including plain tofu (dofu in Chinese), pressed tofu (*doufu-kan*, sic, *doufu-gan*), *wu-hsiang kan*, cotton tofu or momendofu, kinugoshi or silk tofu, sui-dofu, freeze-dried tofu [dried frozen tofu], smoked tofu. Cooked forms of tofu: Deep-fried tofu, doufu pok, cha-dofu, abura agé or deep-fried thin slices which can be opened to make Inarizushi, ganmodoki or deep-fried tofu balls, yaki-dofu or tofu which has been grilled. Fermented tofu: The generic term is doufu-ru. The most popular type is white doufu-ru, and there is red doufu-ru, tsao-doufu, ch’ou doufu [chou doufu], Chiang doufu. In the Philippines fermented tofu is called tausi [sic, tahuri, tahuli; tausi is fermented black soybeans]. Miscellaneous: A specialty of Japan is *umesutsuke*, “tofu pickled in plum vinegar with a purple exterior.” Note: As of Oct. 2011 not one hit / result for *umesutsuke* can be found on Google. Nor have we ever heard of such a Japanese tofu product.

Dofu nao (literally “bean brain”) or smooth curds, yuba or “bean curd skin” or “tofu skin,” okara or “presscake” (pulped skins of soya beans) (p. 798-99). Yuba (p. 860-61).

Also discusses: Alfalfa (p. 10). Almond (p. 12-13, incl. “almond milk”). Amaranth (p. 13). American cookbooks, history (p. 15-17). Azuki beans (p. 44-45). Barley, barley breads, and barley sugar (p. 58-60). Beef–BSE (mad cow disease, p. 68). Chia (p. 166). Cowpea (p. 230-31). Chufa (p. 185). English cookery books, history (p. 276-80). Five grains of China (p. 305). Gluten (p. 341). Groundnuts (or peanuts, p. 356-57). Hemp (p. 377-78). Hydrogenation (p. 391). Japanese culinary terms (p. 415-17). Kudzu (p. 437). Linseed (p. 454-55). Lupin (p. 463). Margarine (p. 478-79). Mung bean (p. 518). Nori (p. 534). Noodles of China (p. 537, incl. “Gan si {soya bean noodles}” and “Fen si {also fen-szu} {mung bean vermicelli}.” Oncom (p. 553-54). Quark (p.

644). Quinoa (p. 645). Seaweeds (incl. hijiki, kombu/konbu, nori, wakame, etc., p. 712). Sesame (p. 713). Shortening (p. 721-22). Sprouts (no listing). Tahini (p. 779). Toast (p. 797, incl. Melba toast). Ume and umeboshi (p. 817). Winged bean (p. 849).

The entry for “Fermentation” states that the two main reasons for subjecting a food to fermentation are: (1) To “convert it from a form that will not keep, such as milk, to one which will, such as cheese.” (2) To “make foods which are indigestible in their original state, such as wheat or soya beans, digestible by turning them into products such as bread or tempe.” Other benefits include improvements in flavour. Many do not realize that fermentation is part of the process of making coffee, cocoa, vanilla, and many kinds of sausage. A brief biography and nice portrait photo of Alan Davidson, a man of extraordinary knowledge in the world of food, appear on the rear dust jacket.

Note: The paperback edition of this book (2002) is titled *The Penguin companion to food*. Address: World’s End, Chelsea, London, England.

3213. Hagler, Louise. 1999. Meatless burgers: Over 50 quick and easy recipes for America’s favorite food. Summertown, Tennessee: Book Publishing Co. 94 p. Illust. Index. 23 cm.

• **Summary:** A vegetarian cookbook. Contents: Introduction. Glossary of ingredients: Incl. (with a definition and description of each): Almond milk, arame, flaxseeds, hemp seeds, hulled, millet, miso, oat milk, quinoa, rice milk, shiitake, silken tofu, soy flour, soymilk, soy yogurt, tempeh, textured soy protein, tofu, vital wheat gluten.

Bean & grain burgers. Soyfood burgers: Tofu, tempeh, textured soy protein & soybeans. Vegetable burgers. Burgers with an ethnic flair. Accompaniments. Buns. Side dishes. Nondairy shakes. Address: Summertown, Tennessee.

3214. Now & Zen, Inc. 1999. Savory Selections: UnRibs, UnChicken, UnSteakout, UnReal! San Francisco, California.

• **Summary:** See next page. Leaflet (glossy, color, two-sided) sent by Patricia Smith from Natural Products Expo in Baltimore, Maryland. 2000. Sept. Copyright 1999. On the front, one of these three meat alternatives is pictured on each of three white plates. The rear states that Now and Zen is maker of the UnTurkey. No ingredients are given. Address: 665 22nd St., San Francisco, California 94107. Phone: (415) 695-2805.

3215. Wakai, Kenji; Egami, Isuzu; Kato, Kumiko; et al. 1999. Dietary intake and sources of isoflavones among Japanese. *Nutrition and Cancer* 33(2):139-45. [35 ref]

• **Summary:** The dietary intake and sources of isoflavones (daidzein and genistein) among Japanese subjects were examined based on dietary records (DRs). The subjects comprised two groups: 1,232 who completed one-day DRs (Group 1) and 88 men and women who kept four four-day

(16-day) DRs. For quantitative data on the level of daidzein and genistein in soy foods, the literature was thoroughly examined, particularly for Japanese soy foods, and adopted the median value for each food. The median intake of daidzein was 12.1 and 9.5 mg/day among Groups 1 and 2, respectively, while the corresponding values for genistein were 19.6 and 14.9 mg/day. About 90% of the daidzein and genistein in the Japanese diet comes from 3 soyfoods—tofu (including fried tofu), miso, and natto.

Table 2, titled “Estimated total daidzein and genistein contents of soy foods: Median values among results of food” lists these foods: Soybeans, dry. Soybeans, green [edamame]. Soybeans, boiled. Kinako (roasted and ground soybeans). Soybean sprouts. Tofu. Tofu, freeze dried (“kohri tofu”). Fried tofu, thin (“abura-age,” deep-fried). Fried tofu, thick (“nama-age,” fried briefly). Fried tofu and minced vegetables / seaweed (“ganmodoki”). Soy milk. Okara (tofu lees). Yuba (dried soy milk skim). Natto (fermented soybeans). Miso. Soy sauce. Address: Dep. of Preventive Medicine, Nagoya Univ. School of Medicine, 65 Tsurumai-cho, Showa-ku, Nagoya 466-8550, Japan.

3216. Ivey, Mike. 2000. Kraft Foods purchases Boca Burger: Soy-based burger firm will bring 20 jobs here. *Capital Times (Madison, Wisconsin)*. Jan. 18.

• **Summary:** Boca Burger was founded in 1993. Since 1997 it has been jointly owned by Austin Ventures and company management. Most of Boca Burger’s 145 employees will remain at manufacturing plants in Fort Lauderdale, Florida, and Hobbs, New Mexico. But about 20 jobs will come to Madison. Kraft is headquartered in Northfield, Illinois.

Last year American consumers spent about \$500 million on meat alternatives, about 75% of that on soy products. Boca Burger had revenues of \$40 million last year, about double the previous year. Address: Staff writer.

3217. Barrett, Rick. 2000. Veggie-burger firm’s new home will be Madison: Kraft Foods buys growing Boca Burger and will move its headquarters to Oscar Meyer plant. *Wisconsin State Journal (Madison)*. Jan. 19.

• **Summary:** The acquisition of Boca Burger gives Kraft an excellent position in the rapidly growing “meat alternatives” category, which has posted double-digit increases for the past five years. Greg Stahl, Boca Burger president, said the timing was right to sell since the Kellogg Co. had recently purchased Boca’s biggest competitor—Worthington Foods. Boca makes frozen soy-based products, including two sizes of Boca Burgers, Boca Breakfast Patties and Links, Ground Boca Burger Recipe Basics, and Boca Tenders and Nuggets (chicken alternatives).

In February, Boca Burger will be relocated from Chicago (Illinois) to Kraft’s Oscar Meyer Foods headquarters at 910 Oscar Mayer Ave. in Madison, Wisconsin. This will enable Boca Burger to use Oscar Meyer and Kraft resources,

including R&D, equipment, distribution channels, marketing and sales. Rick Searer, president of Kraft’s Oscar Meyer and pizza divisions, sees new potential and broader applications for soy-based products within Kraft.

A table compares the two Kraft divisions. Oscar Meyer has \$2.2 billion annual sales, with 3,000 employees in Madison. Address: Business reporter.

3218. *Western Livestock Journal (Denver, Colorado)*. 2000. Kraft grows soy product business [by acquisition of Boca Burger Inc.]. Jan. 31.

• **Summary:** Kraft Foods Inc., a division of the Philip Morris Cos, Inc. [of cigarette / tobacco fame], announced recently that it would acquire Boca Burger Inc. for an undisclosed sum. Chicago-based Boca had revenues of about \$40 million last year. The deal is expected to close next month. Kraft, America’s largest packaged food company, joins the growing list of food companies buying into the “trendy soy market.”

Boca, with manufacturing facilities in Ft. Lauderdale, Florida, and Hobbs, New Mexico, has about 145 employees. Kraft plans to move Boca’s headquarters, after a transition period, from Chicago to Madison, Wisconsin, where its Oscar Meyer division is based. Rick Searer is president of Kraft’s Oscar Meyer and pizza divisions.

3219. Gardenburger, Inc. 2000. Annual report 1999: Well prepared. 1411 Southwest Morrison St., Suite 400, Portland, OR 97205. 40 p. 23 cm.

• **Summary:** Sales in 1999 were \$88,817,000, about the same as the previous year, but net income was a huge net loss of \$21,826,000 compared with a net loss of \$9,348,000 the previous year. The company has a new manufacturing facility in Clearfield, Utah, and has expanded its product line to include 7 grain burgers and four soy burgers. They now have the most recognized brand in the meat replacement category. Their market share in the grocery channel grew to 49%, from 41% in March 1999.

Accompanying the annual report is a notice of Annual Meeting of Shareholders and proxy statement (18 p.). Fortunately Mr. Hubbard’s salary dropped to \$240,588 in 1999, from \$287,149 in 1998, but he received 174,812 securities and a retention bonus of \$500,000 if he stays with the company through 31 Dec. 2000—astonishing! Address: Portland, Oregon.

3220. **Product Name:** Smart Deli Sticks (Meatless, Fat Free): [Soylami].

**Manufacturer’s Name:** Lightlife Foods, Inc.

**Manufacturer’s Address:** 153 Industrial Boulevard, Turners Falls, MA 01376. Phone: 1-877-SOY-EASY (877-769-3279).

**Date of Introduction:** 2000 January.

**Ingredients:** Pepperoni: Water, wheat gluten, soy protein isolate, natural flavors (from vegetable sources), evaporated

cane juice, yeast extract, salt, soy sauce (water, soybeans, wheat, salt), paprika oleoresin, black pepper, soy oil.

**Wt/Vol., Packaging, Price:** Paperboard sleeve around 10 oz vacuum pack chubs. Suggested retail price: \$3.99.

**How Stored:** Refrigerated, 40 day shelf life. Or frozen.

**New Product–Documentation:** Spot in Whole Foods (Jan. 2000). Comes in Pepperoni and Soylami. 10 oz sticks. Fat free and cholesterol free.

3221. *Nutrition Business Journal (San Diego, California)*. 2000. M&A [mergers and acquisitions] update: Natural foods command high multiples. 5(1):15, 18. Jan.

• **Summary:** In Jan. 2000 Kraft purchased Balance Bar (\$19.40/share) and Boca Burger. Balance Bar had its initial public offering (IPO) in 1998. In the last fiscal year, Balance Bar had revenues of \$106 million, compared with \$40 million for Boca Burger. Balance Bar makes at least one product that features soy protein. All Boca Burgers are vegetarian and contain soy.

The year 1999 set a new record for nutrition industry M&A activity, with 90 transactions, compared with 75 in 1998.

Note 1. A story on page 1 of this issues states that the price of Balance Bar stock rose 27% during 1999; Hain Food Group was down 11%. Note 2. EBIT = Earnings before interest and taxes.

Note 3. Talk with Boca Burger. 2000. March 13. Chris Scott bought out Richard Gross (Max Shondor) several years ago.

3222. **Product Name:** Soy Sausage (Organic) [Spicy Italian, Smoked Portabella, Breakfast Style, Chorizo, Mild Italian].

**Manufacturer's Name:** Sunergia Soyfoods.

**Manufacturer's Address:** P.O. Box 1186, Charlottesville, VA 22902. Phone: 804-970-2798.

**Date of Introduction:** 2000 January.

**Ingredients:** Spicy Italian: Water, textured soy flour\*, vital wheat gluten\*, Italian balsamic vinegar, tamari soy sauce (water, soybeans\*, salt), oat flour\*, canola oil\*, onion\*, garlic\*, paprika, natural smoke flavor, yeast extract, salt, spices. \* = Certified organic by OCIA.

**Wt/Vol., Packaging, Price:** 8 oz. (227 gm) cellulose casing with paperboard sleeve.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Labels sent by Jon Kessler. 2000. Oct. 5. The first four flavors were in local retail stores on 1 Jan. 2000. Made with Non-GMO soybeans. The Mild Italian flavor was launched in March 2000.

3223. **Product Name:** Veggie Lasagna, Veggie Macaroni, Veggie Penne.

**Manufacturer's Name:** Yves Fine Foods Inc.

**Manufacturer's Address:** 1638 Derwent Way, Delta (Vancouver) V3M 6R9, B.C., Canada. Phone: (604) 525-

1345.

**Date of Introduction:** 2000 January.

**Ingredients:** Water, isolated soy protein, wheat gluten, evaporated cane juice, natural flavors, salt, yeast extract, carrageenan, wheat germ, onion powder, rice starch, beet root powder, garlic powder, wheat starch, nutritional yeast, spices. Vitamins and minerals: Vitamin B-1 (thiamine hydrochloride), vitamin B-12 (cyanocobalamin), pantothenic acid (calcium pantothenate), potassium (dipotassium phosphate).

**Wt/Vol., Packaging, Price:** 10 slices in 5.5 oz (155 gm) package. Retail for \$2.19 (1999/12, Lafayette, California).

**How Stored:** Refrigerated.

**New Product–Documentation:** Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West. 2000. March. "Fresh, ready-to-heat entrées." On the front is a half-page photo of a plate of Yves Veggie Lasagna. Across the bottom are photos of the front panels of each of these products. On the rear: "Cholesterol free. Made with soy protein. Contains no meat. Low fat." Dated Jan. 2000.

Note: The ingredients are not given.

3224. Erickson, Marsha. 2000. Soy foods may lower cholesterol: In season. *News-Tribune (Duluth, Minnesota)*. Feb. 17.

• **Summary:** "Editor's note: The American Heart Association has designated February as American Heart Month. Throughout the month, In Season is focusing on the 'right stuff' to feed your heart. Today the spotlight is on soy foods. Coming next week: Whole grains."

Soyfoods are good for the heart. They "are rich in special plant chemicals called isoflavones. These isoflavones may directly lower blood cholesterol. In addition, soy foods are low in saturated fat, high in soluble fiber, cholesterol-free and contain high quality protein.

"Food sources of soy include soynut butter, roasted soynuts, soy flour, miso, tofu, tempeh, textured soy protein and soymilk."

A black and white photo has a border of "green soybeans," both in the pods and shelled. The text, titled "Great soy sources," states: The FDA now allows products that contain at least 6.25 grams of soy protein per serving to say on the label that the product may reduce the risk of heart disease. Products that are good sources of soy protein per serving are:

4 ounces of firm tofu contains 12 grams of soy protein. 4 ounces of soft tofu contains 9 grams. 1 soy burger contains 10-12 grams. 8 ounces [1 cup] soymilk contains 10 grams. ½ cup cooked soybeans contains 16 grams. ½ cup green soybeans [shelled edamame] contains 10 grams. ½ cup tempeh contains 19 grams. ½ cup roasted soy nuts contains 39 grams. Address: Registered Dietitian, Miller-Dwan Medical Center; Duluth representative of the Minnesota Dietetic Assoc.

3225. Sojafarm. 2000. Tofu: Meister der Verwandlung. Land des Ursprungs [Tofu: Master of transformation. Land of its origin]. Trechtingshausen, Germany. 16 p. 21 cm. Catalog and list of products. [Ger]

• **Summary:** This catalog has an attractive, glossy color front and rear cover. On the inside front cover is an introduction to tofu in Japan—the land of its origin. [Note: Tofu originated in China]. The inside, titled “Information, products, prices,” consists of photocopied sheets. The company logo, on p. 1., consists of the Chinese character for “bean” over the company name. Below that is written in German: “High-quality, natural-food specialty products, made with pure spring water.” In the catalog, each product is described with a list of the ingredients.

The products are listed in the following order on the price list (\* = label enclosed): Tofu Natur\*. Tofu mariniert. Tofu mit Kräutern (Kräuter-Tofu\*). Gemüsetofu\*. Tofu geräuchert (Geräucherter Tofu\*). Tofu Frühlingssterrine\*. Tofu-Reisburger\*. Tofu-Bratschnitte\*. Nusstofu (tofu with hazelnuts)\*.

Smoked specialties: Räuchertofu mit Champignon (Champignon Räucher-Tofu\*). Räuchertofu mit Algen (Algen Räucher-Tofu\*). Räuchertofu mit Rotwein.

Tofu Würstchen: Piccolino’s (Frankfurter Art). Barbecue’s (Thüringer Art). Gourmet Scheiben. Brotaufstriche. Tofu-Kräutercreme. Tofu-Edelcreme.

Fermate (Soy cheese): Fermate Pfeffer. Fermate mit Kräuter. Sauce Bolognese.

Frischware: Gemüserollen. Asia-Rolle. Tofu Burger. Tofu Lauchburger. Grünkernburger.

Seitan: Seitan. Seitangulasch.

Pasta de Tofu: Spiralen. Gabelmakkaroni. Bandnudeln. Mischkiste. Tofu Kochbuch.

Also enclosed is a letter and two business cards.

Address: Im Paradis, D-55413 Trechtingshausen, Germany. Phone: 06721-6470.

3226. **Product Name:** [Chili with Veggie Minced Meat, Veggie Chicken Nuggets, Meatless Tofu Schnitzel, Bonanza Meatless Minced Meat Steaks, Greek-Style Pan-Fried Veggie Strips].

**Foreign Name:** Chili con Veggie Hack, Chickin Nuggets, Tofu Gemüseschnitzel, Bonanza Hacksteaks, Pfannen Gyros,.

**Manufacturer’s Name:** Viana Naturkost GmbH.

**Manufacturer’s Address:** D-54578 TofuTown Wiesbaum, Germany. Phone: +496593 9967-0. Fax: 6593 9967-225.

**Date of Introduction:** 2000 February.

**Wt/Vol., Packaging, Price:** 200-250 gm pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Color packages sent by Bernd Drosihn. 2004. Nov. 15. Size: 10 by 18 by 3.5 cm. Paperboard boxes. Red, light green, dark green and black on

beige. Color photo of the dish, ready to eat, on a white plate. Each of these Viana-brand products is a meat alternative, ready to heat, introduced in Feb. 2000. The packaging is very attractive.

3227. Cohen, Deborah L. 2000. Functional food fever hits local tastemakers. *Crain’s Chicago Business*. March 13.

• **Summary:** Food companies are starving for growth, and they see a way to get it in functional foods. Kraft spent nearly \$400 million this year to buy Boca Burger (a maker of veggie burgers in Chicago) and Balance Bar (a maker of nutrition bars in California).

Dean Foods (of Franklin Park, Illinois), faced with sluggish sales of dairy milk, took a minority stake last year in White Wave Inc. (of Boulder, Colorado), a maker of Silk soy milk. Dean Foods, a large dairy company, has already increased the number of Silk distribution outlets sixfold, says Dennis Purcell, head of Dean’s specialty business unit. White Wave had roughly \$21 million in sales in fiscal 1999.

Small photos show packages of Silk, Boca Burger, and Balance Bar. Address: Managing editor.

3228. Gerner, Bob. 2000. Customers upset upon reading that Boca Burgers contain genetically engineered ingredients. Sales plunge. “GMO Alert” published (Interview). *SoyaScan Notes*. March 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Sales of Boca Burgers have dropped dramatically during the past few weeks (to 1 box/week from 6-7 boxes/week) after customers read in some magazine that they contained genetically engineered (GE) soybeans. This shows that shoppers at natural food stores in California are more aware of the issue and they are changing their buying patterns based on this awareness. This is the first such case that Bob is aware of. One customer got very angry at Bob in his store last week for carrying a product that contains GE ingredients. The customer told Bob that he should be making his customers more aware of this issue. So, for the first time, Bob started to do so.

Right after this incident, on March 8, Bob drafted and issued a “GMO alert (Genetically modified organisms)” on his company’s stationery. The leaflet begins: “Over 40 genetically engineered crops sources have been approved for sale. These include several varieties of corn, canola, soybeans, potatoes,...—all spliced with the DNA of bacteria and viruses—and dairy products from cows injected with a genetically altered hormone (rBGH). From infant formula to soda, pizza to chips, genetically engineered foods are starting to pervade the American diet.

“Be aware that many products containing GMOs are currently on our shelves. There are no labeling requirements, so it is hard to tell which products contain GMOs. Most products that contain soy or corn that is not organically grown probably contain GMOs. If you want to avoid GMOs

buy organically grown products. Sign petitions that demand proper labeling. We eventually want to offer our customers only GMO free products.”

On the other side of the leaflet are Specials (Sales) offered by the company from March 8 to 19th. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

3229. Boca Burger Co, 2000. Tips for enjoying 25 grams of good-for-you Soy Protein every day (Leaflet).—1 p. Front and back. 19 x 11 cm.

• **Summary:** One the front. For breakfast: A delicious low-fat Boca Burger patty instead of sausage. Soy milk on your breakfast cereal. A soy-based breakfast bar. Soy score: 6-8 grams,

Lunch: A tasty Boca Burger with all the trimmings. A refreshing creamy smoothie made with soy protein powder, juice, and fresh fruit. Soy score: 10-12 grams.

For dinner: Ground Boca Burger Recipe Basics instead of ground beef in pasta sauce, chili or tacos. Boca Meatless Tenders, instead of grilled chicken breast, tossed in salad or pasta, A colorful stir-fry using tofu and a variety of fresh vegetables and seasonings. Soy score: 9-12 grams. Daily Soy total: 25-32 grams.

On the rear is a recipe for Mollie Katzen’s Meatless Marinara Sauce, with a color illustration by Mollie.

3230. **Product Name:** The Original Ground Boca Burger Recipe Basics.

**Manufacturer’s Name:** Boca Foods.

**Manufacturer’s Address:** Madison, Wisconsin. Phone: 608.285.6950.

**Date of Introduction:** 2000 March.

**New Product–Documentation:** Ad in *Vegetarian Times*. 2000. March. Inside rear cover. Shows Nancy and Scott Baker talking. No company name or address is given.

3231. El Burrito Mexican Food Products, Inc. 2000. Real meat taste you won’t believe! Made with 100% soy. Now! Made from Non-GMO Soybeans (Leaflet). 14944 Don Julian Rd., City of Industry, California 91745. 1 p. Front and back. Color front.

• **Summary:** The front is a large color photo of Soyrizo, NeatLoaf, and SoyTaco, in both packaged and prepared forms. On the rear is ingredients, Nutrition Facts, and a description and photo of each product. Address: City of Industry, California.

3232. Fayhee, M. John. 2000. Nutrition—Make mine fake. Throw another faux burger on the barby! In record numbers, health-minded Americans are turning to meat-alternative products. *Walking (Boston)*. March.

• **Summary:** Chicago-based Boca Burgers has 13% of the meat-alternative market. Yves Veggie Cuisine of Vancouver,

Canada, says sales of meat-alternatives alone increased 68% in 1999 alone.

Brands that the writer likes: Boca Breakfast Links. Gardenburger Hamburger Style Fat Free Burgers. Morningstar Meatless Buffalo Wings. Veat Vegetarian Nuggets. Meat of Wheat Chicken Style Wheat Meat. Address: Freelance writer in Colorado.

3233. **Product Name:** Country Roasted Chicken Free Chicken.

**Manufacturer’s Name:** Follow Your Heart (Product Developer-Distributor). Made in Canoga Park by Earth Island.

**Manufacturer’s Address:** Canoga Park, CA 91304. Phone: 818-347-9946.

**Date of Introduction:** 2000 March.

**New Product–Documentation:** Leaflet (single sided, 8½ by 11 inch, color) by Patricia Smith from Natural Products Expo West. 2000. March. “Low fat. Vegan. Wheat free. Rich in soy protein. Cholesterol free. Contains no genetically engineered ingredients.” No ingredients are given.

3234. *Food Trade Journal U.S.A. (Ikegawa Food Specialists)*. 2000. FDA as well as media help Japanese food industry: Soy products and green tea are highlighted. 10(2):1, 3-4. March. [Eng; Jap]

• **Summary:** Each article in this newspaper is published in both English and Japanese. Last October, the FDA gave its approval for U.S. companies to begin using a health claim on foods containing at least 6.25 gm of protein per serving. Except for traditional soy products (such as tofu), each serving must contain no more than 3 gm of fat, 20 mg of cholesterol, and 480 mg of sodium. The FDA believes that adults who consume 25 gm/day of soy protein could experience a decrease in their blood cholesterol, which reduces their risk of heart disease. The mainstream soyfoods that benefited from this announcement are veggie burgers, soymilk, tofu, and soy cheese. But now edamame has emerged as a big seller at supermarkets since a few years ago. A Japanese-style cartoon shows two blonde girls seated at a table. A boy, who is standing, says “I show you how to eat Edamame.” Holding a pod of edamame in his right hand, he is popping the beans into his mouth. A circular inset, showing how his fingers hold the pod, is titled “Squeeze.” Another cartoon shows Takuji Kimura [Mr. edamame in America], drawn by his son.

The article gives lengthy excerpts from two recent American articles: (1) Hesser, Amanda. 1999. “Bet you can’t eat just one soybean.” *New York Times*. Sept. 8. p. F3. (2) Deane, Donna. 2000. “Get more soy in your life.” *Los Angeles Times*. Jan. 12. p. H1, H3. Food section.

According to Shigeru Shirasaka, president of House Foods (a leading U.S. tofu maker), his company shipped 29 million pieces of tofu in 1999, which is a 70% increase over

1995.

The last page of this article is about edamame, by Takuji Kimura, America's leading edamame broker, Concord, California. Japanese restaurants have been the showrooms for edamame, and they are part of the reason for its growing popularity. Tak Kimura started trying to sell edamame in 1994 at several natural food stores, but nobody seemed interested. He contacted the produce manager of Whole Foods in Berkeley—a woman—without an appointment. When he asked her to try his edamame, she said that she knew what it was—an appetizer at sushi bars! She liked it very much and had tried to find a source, but the restaurants would not disclose their sources. During his first demo day at Whole Foods he sold only 8 packs in 8 hours. But after 2 weeks sales started to increase. Then he got permission to sell edamame at other Whole Foods Markets, and then at the Wild Oats chain of natural food stores. In 1998 sales started to increase rapidly. Now the FDA is supporting edamame and major newspapers are doing stories, so sales continue to grow.

3235. FoodTech International, Inc. 2000. A step ahead in vegetarian cuisine (Leaflet). 26 Kendall St., New Haven, CT 06512. 1 p. Single sided. Color.

• **Summary:** Leaflet (8½ by 11 inches) sent by Patricia Smith from Natural Products Expo West. 2000. March. A small color photo shows the front of each package. The company product list (tray weight = 10 oz) is: Burgeriffics, VeggieRounds. Veggittinos. Chick'n VeggieCutlets. Chick'n VeggieNuggets. Broccoli VeggieNuggets. Spinach VeggieNuggets. Corn VeggieNuggets. I Can't Believe It's Not Chicken! (Marinated in Teriyaki Sauce; or Marinated in Honey Dijon Sauce). I Can't Believe It's Not Beef! Below that is a list of Gloria's 7 Meatless International Soups. Address: Burlingame, California.

3238. **Product Name:** Vegi-Deli VegiJerky [Totally Teriyaki, Mild N' Mellow, Hot N' Peppered].

**Manufacturer's Name:** Green Options, Inc.

**Manufacturer's Address:** San Francisco, CA 94188-1781. Phone: 888.473.3667.

**Date of Introduction:** 2000 March.

**Ingredients:** Totally Teriyaki: Filtered water, wheat protein, natural hickory flavor, nutritional yeast, yeast extracts, dextrose, soy protein concentrate, spices, salt, garlic powder, onion, citric acid.

**Wt/Vol., Packaging, Price:** 1.5 oz pack.

**How Stored:** Shelf stable.

**New Product–Documentation:** Leaflet (front and back, 8½ by 11 inch, color) by Patricia Smith from Natural Products Expo West. 2000. March. All natural, meatless Jerky

3239. **Product Name:** Vegi-Deli Slices [Salami Style, Chicken Style, Turkey Style].

**Manufacturer's Name:** Green Options, Inc.

**Manufacturer's Address:** San Francisco, CA 94188-1781. Phone: 888.473.3667.

**Date of Introduction:** 2000 March.

**Ingredients:** Salami Style: Wheat protein, filtered water, nutritional yeast, expeller pressed canola oil, yeast extracts, natural hickory flavor, spices, salt, garlic powder, onion powder, citric acid.

**Wt/Vol., Packaging, Price:** 4.5 oz pack.

**How Stored:** Shelf stable.

**New Product–Documentation:** Leaflet (front and back, 8½ by 11 inch, color) by Patricia Smith from Natural Products Expo West. 2000. March. The all-natural, meat-free alternative.

3240. **Product Name:** Vegi-Deli Pepperoni [Original, Zesty Italian, Hot N' Spicy].

**Manufacturer's Name:** Green Options, Inc.

**Manufacturer's Address:** San Francisco, CA 94188-1781. Phone: 888.473.3667.

**Date of Introduction:** 2000 March.

**Ingredients:** Original: Wheat protein, water, nutritional yeast, expeller pressed canola oil, yeast extracts, natural hickory flavor, spices, salt, garlic powder, onion powder, citric acid.

**Wt/Vol., Packaging, Price:** 9 oz pack.

**How Stored:** Refrigerated, 180 day shelf life.

**New Product–Documentation:** Leaflet (front and back, 8½ by 11 inch, color) by Patricia Smith from Natural Products Expo West. 2000. March. The all-natural and delicious meat-free alternative to traditional pepperoni.

3241. **Product Name:** Veggie Burgers [Wild Mushroom, Veggies & Grain, Mexican Red Bean, Veggie Chick-N Patties, Ground Veggie Burger, Veggie Burger Patties].

**Manufacturer’s Name:** Hearty & Natural. A division of Sunrich, Inc.

**Manufacturer’s Address:** P.O. Box 147, Hope, Minnesota 56046. Phone: (507) 455-4054.

**Date of Introduction:** 2000 March.

**Ingredients:** Veggie Burger Patties: Certified organic soy flour, purified water, certified organic onion, egg white, certified organic potato starch, certified organic spices, sea salt, certified organic garlic. QAI certified organic.

**Wt/Vol., Packaging, Price:** 10 oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Leaflet (8½ by 11 inches, color, front and back) sent by Patricia Smith from Natural Products Expo West. 2000. March. The first 3 products are rice based, the last 3 are soy based. Non-GMO logo. Soy Health Claim. “The first certified vegetarian burgers in the industry.” On the front, the front of each package is shown. The rear shows the ingredients for each product and the bar code.

Note: A leaflet from March 2005 shows that Sunrich makes four meatless, wheat-free (gluten free), organic Veggie Burgers: Portabella Mushroom, Country Harvest, Classic Soy, and Cheddar Cheese.

3242. Quong Hop & Co. 2000. The Soy Deli: Hand crafted by tofumasters since 1906 (Leaflet). South San Francisco, California. 1 p. Printed front and back. 28 cm.

• **Summary:** Leaflet (glossy color) sent by Patricia Smith from Natural Products Expo West. 2000. March. On the front is the front of all Soy Deli brand products. Five flavors of vacuum packed tofu burgers (Garden, Mesquite Smoked, Original, Teriyaki, and Barbecue).

Five flavors of baked tofu (Teriyaki, Five Spice, Savory, Hickory, Honey Sesame), smoked tofu (Mesquite), and fried tofu (Hawaiian Style).

Four ready-to-eat soy entrees (Sweet & Sour, Tex Mex, Homestyle, Italian).

Tofu (Soft, Firm, Nigari Firm). Low-fat nigari tofu (two sizes).

On the rear is “Product specifications”—but no listing of ingredients. Address: 161 Beacon St., South San Francisco, California 94080. Phone: 650-553-9900.

3243. Vegeking Corp. 2000. VeggieMaster: Creating a new

generation. 100% natural vegetarian food containing no eggs, no preservatives (Portfolio). 6 p., incl. 12 inserts. 30 cm. [Eng]

• **Summary:** Sent by Patricia Smith from Natural Products Expo West, March 2000. This glossy color portfolio contains the following glossy color single-sided inserts: (1) Our product pledge. (2) Who we are (In 1993 Vegeking was established in the City of Industry. VeggieMaster is a brand marketed by Vegeking Corporation, Vegeking is a California-based subsidiary of Homemark Corporation, a leading vegetarian food manufacturer in Taiwan. The company introduced the brand name VeggieMaster in the early fall of 1999. Homemark Corporation has existed in Taiwan for 16 years; Mr. Tom Chen is President and CEO). (3) What we think (Our mission. Our vision. Statement of values). (4) Doing business with us (Vegeking is committed to building a global partner network). (5) Our products (Meat alternatives. Home meal replacement. Vege snack). (6) VeggieMaster Vege Tuna Fillet (shows package, Nutrition Facts, ingredients. Made in Taiwan). (7) Vege Hot Dog. (8) Vege Chicken Nugget. (9) Vege Black Pepper Steak. (10) Vege Steak. (11) Vege Ham Steak. (12) Veggie Chicken Chunk. Address: 877 Azusa Ave., City of Industry, California 91745. Phone: 1-877-877-VEGE.

3244. Yates, Scott C. 2000. Kraft gobbles two naturals companies. *Natural Foods Merchandiser*. March. p. 32.

• **Summary:** In January, Kraft Foods of Northfield, Illinois, bought vegetarian food maker, Boca Burger Inc., a privately owned company with revenues of \$40 million last year.

A few days later in January, Kraft announced that it also planned to buy the publicly traded Balance Bar Co. of Carpinteria, California; its sales had grown from \$1.3 million in 1995 to \$100.9 million in 1999. Balance Bar’s shares traded for about \$14 a share before the announcement that Kraft would pay \$19.40 per share. Kraft, which is owned by Phillip Morris, is the largest maker of packaged foods in the USA.

3245. Weissman, George. 2000. Founding Veat Gourmet (Interview). *SoyaScan Notes*. April 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** George founded this company in 1998; he was the sole founder. He came across the Taiwanese technology to make this very unique textured soy protein because his partner (Van Thi Dang) is Vietnamese, and she brought it home from a Chinese grocery store. He ran across something similar, but gluten-based in a Chinese monastery, where he was doing a Chan [Chinese Zen] Buddhist retreat. He is a practicing Buddhist. He was in academia at the time; he is a physicist having earned his PhD degree from Cal Berkeley. He worked on the foundations of quantum theory/paradigm. He started a group at the Lawrence Berkeley Lab in 1974 to discuss physics and spirituality. Fritjof Capra (Austrian by

birth) was a member of the group, as was Gary Zukoff. After that he went to the Swiss Polytechnical University where he did a post-doctorate program. George is a vegetarian and is also very interested in issues related to world water usage and water as a limiting resource in food production.

About two months ago his partner, Van, started a small business named Ahimsa Gourmet in San Pablo, California, where they make tofu, soymilk, and many other soyfood products. Address: 4690 East 2nd St. #9, Benicia, California 94510. Phone: 1-888-321-8328 (toll free).

**3246. Product Name:** Gardenburger–Flame Grilled [Hamburger Style (With Soy), or Original Veggie].

**Manufacturer's Name:** Gardenburger Inc.

**Manufacturer's Address:** 1411 S.W. Morrison St., Suite 400, Portland, OR 97205. Phone: 1-800-636-0109.

**Date of Introduction:** 2000 April.

**Ingredients:** Hamburger Style: Soy protein concentrate–hydrated, vegetable oil (canola and/or sunflower oil), vegetable gum, autolyzed yeast extract, wheat gluten, natural flavor, salt, dried onion, caramel color, dried garlic, natural grill flavor (from vegetable oil), chicory root extract, spice, dried yeast, soy sauce (wheat, soybeans, salt), sesame oil, ascorbic acid. Original Veggie: Mushrooms, cooked brown rice, onions, Mozzarella cheese, rolled oats, etc.

**Wt/Vol., Packaging, Price:** 4 patties per 10 oz (284 gm) box.

**How Stored:** Frozen.

**Nutrition:** Per patty (2.5 oz, 71 gm): Calories 160, calories from fat 70, total fat 8 gm (12% daily value; saturated fat 0 gm), cholesterol 0 mg, sodium 370 mg (15%), total carbohydrate 7 gm (dietary fiber 4 gm [16%], sugars 0 gm), protein 14 gm. Vitamin A 0%, calcium 0%, vitamin C 0%, iron 0%. Percent daily values are based on a 2,000 calorie diet.

**New Product–Documentation:** Label (package) sent by Amanda of Gardenburger in Oregon. 2000. March 23. She notes that this product is expected to be in stores in April 2,000. 7.75 by 5.0 by 1.5 inches. Paperboard box. Front panel: Red, brown, orange, yellow, and white. “All natural grilled soy patties. New–We grill it! You microwave it!” A color photo shows three patties on a grill, surrounded by flames, and with grilled marks on one side. On one end of the package is a small color photo of Paul Wenner. The caption: “The Gardenburger soy burger was created by GardenChef Paul Wenner in his pursuit of great-tasting foods that promote healthy eating and a healthy environment. A percentage of our sales is being donated to organizations that share this vision.” On the back panel we read in big letters: “The art of flame grilling... Our all natural patties are specially seasoned, then sizzled over a red-hot flame for the smokiest, juiciest taste sensation. So pack up the chuck wagon, brush off your ten-gallon hat, and hit the cookout trail.”

3247. Myers, Steve. 2000. The soy boom. *Organic & Natural News (Phoenix, Arizona)* 3(4):24-25. April.

• **Summary:** The decision in Oct. 1999 by the U.S. FDA to allow a heart health claim for soy has boosted sales and growth rates, but the real key to the growing interest has been the ongoing scientific research on the health benefits of soy. The combination of the two is impressive. According to SPINS, which collects scanner data from natural foods stores, sales of soy products were \$184.3 million, up 37% over the previous six months. In mainstream stores, sales for the 12 months ended Oct. 1999 were \$418.7 million, up 45% over the previous year. This mass market data was supplied in conjunction with ACNielsen.

Ranked by sales in natural products supermarkets, the top five soy products are (in million dollars for the 6 months ended Oct. 1999) are: (1) Soy beverages \$58.7. (2) Meat alternatives \$31.9. (3) Energy bars \$25.5. (4) Tofu \$32.1. (6) Frozen entrees \$6.2.

Ranked by growth rate in natural products supermarkets, the top five soy products (for the 6 months ended Oct. 1999) are: (1) Energy bars 56%. (2) Soy beverages 34%. (3) Meat alternatives 28%. (4) Tofu 26%. (5) Frozen entrees 26%. Source: SPINS.

Ranked by sales in mainstream stores, the top five soy products are (in million dollars for the 12 months ended Oct. 1999) are: (1) Meat alternatives \$176.2. (2) Energy bars \$81.6. (3) Soy beverages \$77.4. (4) Tofu \$46.0. (6) Frozen entrees \$3.2.

Ranked by growth rate in natural products supermarkets, the top five soy products (for the 12 months ended Oct. 1999) are: (1) Energy bars 93%. (2) Soy beverages 85%. (3) Frozen entrees 45%. (4) Meat alternatives 26%. (4) Tofu 19%. Source: SPINS/ACNielsen.

3248. Potvin, Yves; Mellina, Vesanto. 2000. The good cook book. 2nd ed. British Columbia, Canada: Yves Veggie Cuisine. vi + 116 p. Illust. No index. 19 x 19 cm.

• **Summary:** A handsome book promoting the company's products and containing many color photos. “This book is lovingly dedicated to my wife, Sylvia, and my two children, Ariane and Marcus.” Contents: Introduction. Breakfast. Appetizers and snacks. Soups & salads. Sandwiches, hot dogs & burgers. Entrées. Beverages. Glossary. Contains many color photos of recipes, and one of Yves Potvin. In the back are tear-out coupons.

Note: The first edition, almost identical to this one, was published in Feb. 2000. Address: 1. Founder & President, Yves Veggie Cuisine, 1638 Derwent Way, Delta, BC V3M 6R9 Canada; 2. Registered Dietitian, British Columbia. Phone: 604-525-1345.

3249. Mangels, Reed. 2000. *Vegetarian Journal's* guide to burgers and dogs. *Vegetarian Journal (Baltimore, Maryland)*

19(3):27-29. May/June.

• **Summary:** When this magazine first looked at these foods 7 years ago, they found 7 veggie burgers and 6 veggie dogs. This year they found nearly 50 veggie burgers and more than 10 dogs. Both the quality and the nutritional value have gone up. These burgers and dogs are generally lower in calories fat, and sodium, and richer in protein, iron, and fiber, than their meat-based counterparts.

A two-page table gives the nutritional composition of many different brands and products per serving. Data is given for calories, protein, fat, and sodium. The products are ranked from lowest to highest fat, then from lowest to highest sodium. The taster's burger favorites were: Boca Burger Vegan Original, Whole Foods Vegan Burger, Gardenburger Roasted Garlic, Garden Vegan, Amy's California Veggie Burger, Nature's Chef Fajita Burger, and Soyboy Okara Courage Burger. Many of these products contain soy. Address: PhD, RD.

3250. Sears, Barry. 2000. *The soy zone*. New York, NY: HarperCollins (ReganBooks). x + 338 p. Index. 25 cm. [216 ref]

• **Summary:** Contents: Acknowledgments. Introduction. 1. The health benefits of soy. 2. Enter the soy zone. 3. Zoning your kitchen. 4. Soy zone cooking tips. 5. Soy zone meals. 6. Modifying your favorite recipes. 7. Fine-tuning the soy zone diet. 8. Your longevity report card: The tests you want to pass. 9. Insulin: Your body's Dr. Jeekyll and Mr. Hyde. 10. Soy science. 11. How the soy zone diet stacks up against the traditional vegetarian diet. 12. Frequently asked questions. 13. World health implications for the soy zone diet. Appendixes. A. Technical support. B. Zone validation studies. C. Calculation of lean body mass. D. Zone food blocks for making soy zone meals. E. Synthesis of DHA. F. Glossary of terms. G. Resources. H. References.

Note: This book has all the hallmarks of a "quickie" written by a person who does not know his subject. Moreover, we believe the nutritional science and dietary philosophy are seriously flawed. Address: Ph.D., Swampscott, Massachusetts.

3251. Tofutti Brands Inc. 2000. Tofutti. 1999 annual report. 50 Jackson Dr., Cranford, NJ 07016. 16 p. 28 cm.

• **Summary:** Net sales for the 52-weeks ended Dec. 27, 1999 were \$11,912,000, up 32% from the previous year. Net income (profit) rose to \$850,000, up 51.8% from the previous year. 1999 was the eighth consecutive year that the company has been profitable.

During 1999 the company introduced the following new products: Crumb Cake Bars (vanilla and strawberry). Monkey Bars, additional flavors of Sugar free fat free Tofutti in half gallons. Quit Beef'n (veggie burgers, and veggie cheese burgers). Tofutti Ultra Soy Protein Power (nutriceutical).

Accompanying the annual report is a "Notice of Annual Meeting of Shareholders and Proxy Statement (10 p.)." David Mintz' salary rose to \$303,000 in 1999, up from \$225,000 in 1998, and \$180,000 in 1997 and \$155,000 in 1996. The 1999 figure includes a \$125,000 bonus for Mr. Mintz. This is a company that is run for the management, not for the shareholders. Address: Cranford, New Jersey. Phone: 908-272-2400.

3252. *Vegetarian Journal* (Baltimore, Maryland). 2000. Veggie bits: Can't blame them for trying. 19(3):24. May/June.

• **Summary:** "According to a recent Zogby Poll, 37.8% of adults nationwide have at least tried a prepackaged meat substitute. More people in the Western US (44.6%) have ventured a taste than those in the East (37.1%) and Central US (36.9%), while only 34.2% of Southerners have touched the stuff. Suburbanites seem to be statistically more open to trying out fake meat than city dwellers (but can we extrapolate that city folks may dine out more and buy fewer prepackaged goods?). And finally, whites and African-Americans have reported trying more meat substitutes than Hispanics.

"The survey consisted of 1,205 adults to whom this question was posed: "Have you ever eaten any of the meat substitutes that are readily available in grocery stores?" It looks like more folks are saying "Yes!"

3253. **Product Name:** Veggie Patch I Can't Believe It's Not Beef! [Marinated in Mesquite BBQ Sauce].

**Manufacturer's Name:** FoodTech International, Inc.

**Manufacturer's Address:** 26 Kendall St., New Haven, CT 06512.

**Date of Introduction:** 2000 June.

**Ingredients:** Strips: Water, texturized soy protein (GMO free), natural flavors and seasonings. Sauce: Tomato puree (water, tomato paste), sugar, vinegar, natural mesquite smoke, salt, dehydrated garlic, spices, dehydrated onion.

**Wt/Vol., Packaging, Price:** 10 oz (284 gm) in paperboard box. Retail for \$2.99 (2000/06, Safeway supermarket, Lafayette, California).

**How Stored:** Refrigerated.

**New Product-Documentation:** Product with Label purchased at Safeway supermarket (in produce section next to the melons) in Lafayette, California. 2000. June 18. Red, yellow, white, brown and green on dark green. Paperboard box with window on front panel. Product is shrink-wrapped in boilable plastic pouch inside. Illustration of vegetables on below window. "Soy-GMO free. Cholesterol free. Fat free. Excellent source of soy protein." To prepare: Use skillet or wok, boil sealed bag for 3 minutes, or remove strips from bag and microwave for 1½-2 minutes. "Serving suggestion: Stir-fry strips with vegetables and serve over rice/noodles." Soyfoods Center taste test. 2000. June 18. Flavor: Very good,

not too spicy nor too sweet. Texture: Excellent. Appearance: Excellent. Price: Very high.

**3254. Product Name:** Veggie Patch Burgeriffics: Wholesome Vegetable Hamburger Style.

**Manufacturer's Name:** FoodTech International, Inc.

**Manufacturer's Address:** 26 Kendall St., New Haven, CT 06512. Phone: 1-888-MY-VEGGIES.

**Date of Introduction:** 2000 June.

**Ingredients:** Water, soy protein (texturized, isolated), wheat protein (gluten), rice flour, fresh onions, egg white, canola oil, lite soy sauce, natural seasoning and spices, natural flavors, modified vegetable gum, garlic, dietary fibers, sesame oil, salt, potassium chloride, caramel color.

**Wt/Vol., Packaging, Price:** 4 patties 10 oz (284 gm) in paperboard box. Retail for \$2.99 (2000/06, Safeway supermarket, Lafayette, California).

**How Stored:** Refrigerated.

**New Product–Documentation:** Product with Label purchased at Safeway supermarket (in produce section next to the melons, semi-refrigerated) in Lafayette, California. 2000. June 18. 5.25 by 8.5 by 1.25 inches. Paperboard box. Red, green, turquoise blue, brown, and white on dark blue. Color photo on front panel shows a burger between two buns on a plate, with all the trimmings. “A new way to eat your veggies (TM).” “All natural. Cholesterol free. 96% fat free. 4 patties. Ideal for vegetarians. Keep refrigerated or frozen.” Soyfoods Center taste test. 2000. June 28. This product, kept in a refrigerator, spoiled before we could use or test it. We can find no “use by” date on the package.

**3255. Product Name:** Smart Cutlets (Meatless) [Salisbury Steak, or Seasoned Chick'n].

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** 153 Industrial Boulevard, Turners Falls, MA 01376. Phone: 1-877-SOY-EASY (877-769-3279).

**Date of Introduction:** 2000 June.

**Ingredients:** Seasoned Chick'n: Water, wheat gluten, isolated soy protein, cornmeal, maltodextrin, yeast extract, natural flavors, salt, soy oil, barley malt, potassium chloride, onion, garlic, dextrose, paprika, white pepper, annatto, turmeric, enzyme.

**Wt/Vol., Packaging, Price:** 8 oz vacuum pack shrink-wrapped in plastic with paperboard sleeve. Retail for \$2.59 (2000/10, Lafayette, California).

**How Stored:** Frozen.

**New Product–Documentation:** Leaflet sent by Patricia Smith from Natural Products Expo (Anaheim, California). 2000. March. “A cut above!” On the front (glossy, color) is a photo of the front of both packages, and of the prepared Salisbury Steak on a plate with prepared carrots and mashed potatoes. On the back (black-and-white) are ingredients and nutrition facts about the two products. “Smart Cutlets are

made with non-GMO soy protein.”

*Travelin' Light* newsletter. 2000. Mid Year. “Smart Cutlets—A cut above.” A spot on the rear cover shows a color photo of the two flavors. The products are rich in soy protein, low in fat, and quick cooking. “Getting soy protein into your diet has never been this easy and delicious.”

Products (both) with Labels purchased at Trader Joe's in Lafayette, California. 2000. Oct. 16. 5½ by 3.75 inches. Paperboard sleeve. Red, dark green, blue, and black on white. A color photo shows one breaded cutlet prepared on a dish with rice and vegetables. “Rich in soy. Meatless, Low fat. Baked. Ready to use! Two breaded cutlets. Diets low in saturated fat and cholesterol that include 25g of soy protein per day may reduce the risk of heart disease.” Text on back of label: “Great news!! Lightlife is going Non-GMO\*. Visit our website for latest updates. \* = Genetically Modified Organisms.”

Text on side panel: “Since 1979, Lightlife has been committed to creating vegetarian foods that taste great, are easy to use, and are good for your health. We are also committed to promoting a good life for all. That's why we contribute 5% of our profits to organizations that are working to protect children, human rights, the environment, economic justice—and peace. We believe that together, we can make a difference.”

Soyfoods Center taste test. 2000. Oct. 21. Texture: Good. Taste: Too spicy. Packaging concept: Poor. The two tightly shrink-wrapped cutlets are frozen together and impossible to separate in order to pan fry—the preferred cooking method. They must be thawed or microwaved first—but the directions don't say that.

Talk with Kathleen Strong of Lightlife. 2001. March 27. Smart These two products were first sold commercially by 1 June 2000.

**3256. Product Name:** Tofurky Jurky (Hickory Smoked) [Original, or Peppered].

**Manufacturer's Name:** Turtle Island Foods, Inc.

**Manufacturer's Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. Phone: 1-888-TOFURKY (863-8759).

**Date of Introduction:** 2000 June.

**Ingredients:** Water, vital wheat gluten, tofu (water, soybeans grown without herbicides, pesticides, or chemical fertilizers {and calcium sulfate coagulant}), white beans, garbanzo beans, lemon juice from concentrate, expeller pressed canola oil (GMO free), shoyu (water, non-GMO soybeans, wheat, salt), evaporated cane juice, granulated garlic, natural vegetarian flavors, spices, calcium lactate from beets. Peppered includes cracked peppercorns.

**Wt/Vol., Packaging, Price:** 2 oz plastic bag.

**How Stored:** Shelf stable.

**New Product–Documentation:** Product (Peppered) seen at Trader Joe's in Lafayette, California. 2000. Aug. 7.

Retails for \$3.09. Talk with Seth Tibbott, owner of Turtle Island. 2000. Sept. 5. This product was first sold in June 2000. It comes in two flavors: Original and Peppered (black pepper, not chili pepper). The product is doing well. Only the Peppered flavor is presently sold at Trader Joe's. Both products with Labels sent by Seth Tibbott. 2000. Oct. 12.

3257. **Product Name:** Veggie Chicken Burgers.

**Manufacturer's Name:** Yves Fine Foods Inc.

**Manufacturer's Address:** 1638 Derwent Way, Delta (Vancouver) V3M 6R9, B.C., Canada. Phone: (604) 525-1345.

**Date of Introduction:** 2000 June.

**Wt/Vol., Packaging, Price:** 2 patties, each 85 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Leaflet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo East. 2000. Sept. "Introducing. Make no bones about it—it's the best Veggie Chick'n Burger around!" On the front is a half-page photo of the burger and a smaller photo of the front of the rectangular tray. Across the bottom: "Low fat. Made with soy protein. Preservative free. Cholesterol free." Dated June 2000.

Note: The ingredients are not given.

3258. ConAgra, Inc. 2000. ConAgra acquires Lightlife Foods (News release). Omaha, Nebraska. 2 p. July 14.

• **Summary:** Today (July 14) ConAgra, Inc. (NYSE: CAG), "one of the world's leading food companies, and Lightlife Foods, Inc., a leading developer, manufacturer, and marketer of premium vegetarian and soy products... announced that ConAgra has purchased all assets of Lightlife. Terms of the transaction were not disclosed.

"Twenty-one-year-old Lightlife Foods [www.lightlife.com] is the leading refrigerated brand of vegetarian and soy-based food products in the United States. Lightlife manufactures a variety of meatless products including hot dogs, burgers, deli slices, ground meat substitutes, as well as popular vegetarian items like tempeh and seitan."

"ConAgra, Inc., (www.conagra.com) a \$25-billion-plus food company, is North America's largest foodservice manufacturer and second-largest retail food supplier. The company employs more than 80,000 people worldwide. In 1988, ConAgra developed Healthy Choice, a brand that brought the concept of healthy eating into the mainstream. Advantage 10, another ConAgra brand that was developed two years ago, is a full line of vegetarian foods and is endorsed by noted physician Dean Ornish, M.D." Address: Omaha, Nebraska.

3259. Broncaccio, Diane. 2000. Lightlife sold to food giant: 150 employees and company heads to keep their jobs here. *Recorder (Greenfield, Massachusetts)*. July 17. p. 1.

• **Summary:** ConAgra Inc. (of Omaha, Nebraska),

has purchased Lightlife Foods Inc. (of Turners Falls, Massachusetts) for an undisclosed amount. ConAgra Inc. has about \$25 billion in annual sales, while Lightlife has about \$25 million—only one-thousandth as much. Lightlife, which was founded 21 years ago and has 150 employees at its plant in Turners Falls, began to look for a strategic partner after the Kellogg Co. purchased one competitor [Worthington Foods] and Kraft purchased another [Boca Burger]. They chose ConAgra because ConAgra likes to keep companies completely intact, respects the Lightlife brand and what it stands for, and will help Lightlife accomplish its mission. No one will be fired, salaries, benefits packages, and profit-sharing agreements will remain unchanged, and the plant will stay in Turners Falls, Franklin County, Massachusetts. Lightlife's CEO Michael Cohen and President Chia Collins emphasize that they will remain as leaders and the entire management team will stay in place.

Lightlife's manufacturing plant, now only two years old, occupies less than 6 acres of its 13-acre lot at the Montague Airport Industrial Park—so there is room for plenty of growth. The 70,000-square-foot food processing facility has a Tax Incremental Financing (TIF) plan with Montague and with the state; this gives Lightlife a 63% tax exemption on its \$9.9 million plant investment from July 1999 to July 2009. Lightlife, in return, has agreed to add 5-10 employees each year to its 1998 work force of 82 full-time workers.

In a news release, Bruce Rohde, ConAgra's CEO and Chairman, said his company bought Lightlife because of the growing demand for vegetarian alternatives to meat and for more healthful foods. Rohde said the market is being "driven by awareness of the benefits of soy." He then quoted the FDA heart health claim. More than 70% of Lightlife's 45 products meet the requirements of that claim. These products, now marketed to at least 12,000 stores nationwide, include meatless franks, Smart Dogs, Tofu Pups, Smart Deli Slices, Gimme Lean (sausage alternatives), and Lightburgers. Other brands produced by ConAgra include Healthy Choice, Peter Pan, Hunt's, and Wesson. Address: Recorder staff.

3260. ConAgra, Inc. 2000. ConAgra buys Lightlife Foods health food firm (News release). Omaha, Nebraska. 2 p. July 17.

• **Summary:** Largely a reworded version of the original news release. Address: Omaha, Nebraska.

3261. Associated Press and the Gazette Staff. 2000. Agribiz giant buys Lightlife Foods. *Hampshire Gazette (Northampton, Massachusetts)*. July 18.

• **Summary:** "Lightlife Foods Inc., a 20-year-old homegrown vegetarian foods company that found greatest success packaging and marketing soybean derivatives in the familiar forms of hot dogs and burgers, as been bought by one of the world's largest food companies, ConAgra Inc."

In 1985 Lightlife borrowed \$250,000 in order to move

to a larger location in Greenfield. The company's name was changed to Lightlife Foods (from Tempehworks) and "it introduced the first vegetarian hot dog in the country, the Tofu Pup."

Note: Many vegetarian hot dogs had been launched before the Tofu Pup, including one made by Lightlife.

Two years ago [in 1998] the company relocated in a 60,000 square foot building on a 13 acre lot. Address: Staff writer.

3262. Bloomberg, Marcia. 2000. Lightlife Foods sold to ConAgra: Tofu Pups will join the stable of companies that includes Butterball turkeys and Healthy Choice frozen dinners. *Union News (Springfield, Massachusetts)*. July 18. • **Summary:** A long article. "Lightlife Foods, maker of Tofu Pups and Fakin' Bacon, has been acquired by ConAgra, Inc., one of the nation's largest food companies. The price was not disclosed."

Michael Cohen, Lightlife's CEO, said "the deal calls for Lightlife to remain at its new facility in the Turner Falls section of Montague [Massachusetts], to retain its 145 employees, and to preserve Lightlife's social mission."

Lightlife, which has annual sales of about \$25 million, is the leading refrigerated brand of meat alternatives in the United States.

ConAgra, which is publicly traded, has \$25 billion in sales in fiscal 2000; these sales were mainly to retail and foodservice companies.

A large photo shows Michael Cohen, CEO of Lightlife, and Chia Collins, president. Says Chia: "We were just two hippies in the 1970s. We did not plan on building this size of a company. That was not our objective at all. We were just into vegetarian eating, the wonders of the soybean, and we started out with tempeh.

Cohen says this acquisition is a really big deal for a company that started in 1979 in a 1,000-square-foot carwash. Address: Staff writer.

3263. Broncaccio, Diane. 2000. Lightlife sold to keep its competitive edge. *Recorder (Greenfield, Massachusetts)*. July 18.

• **Summary:** About a year ago the landscape changed for the natural foods market when competing makers of meatless products were purchased by major food giants. Kellogg Co. bought Worthington Foods and Kraft bought Boca Burger. Lightlife's owners became concerned that these huge food conglomerates could overpower their little company in the meat-alternatives market—so they began to look for a "strategic partner."

The acquisition could mean expansion for Lightlife. The company's 2-year old manufacturing plant of 70,000 square feet currently uses less than 6 acres of its 13-acre parcel in the Montague Airport Industrial Park in Franklin County—so there is plenty of room for growth.

In a news release, ConAgra's CEO and Chairman Bruce Rohe said "his company bought Lightlife for an undisclosed amount because of the growing demand for vegetarian alternatives to meat and for more healthful foods." Rohe said the market was being driven by consumer awareness of the health benefits of soy. The FDA heart health claim as been very important. More than 70% of Lightlife's products bear the FDA health claim.

Lightlife Foods, which started in Greenfield in 1979, now sells 45 products to at least 12,000 stores nationwide.

A color photo shows Lightlife CEO Michael Cohen and president Chia Collins. Their basic message: We and Lightlife and all our employees are here to stay and grow. Address: Recorder staff.

3264. McKelvey, Richard. 2000. The sale of Lightlife Foods to ConAgra and an overview of his work (Interview). *SoyaScan Notes*. July 19. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Rick left Lightlife 3-4 weeks ago, shortly before the sale of the company to ConAgra. When Richard joined Lightlife in 1989 as sales manager, the company's sales were \$1.1 million. Ten years later, in 1999, they were \$21.5 million, and Richard's title was now vice president of sales and marketing. When he left, they were about \$25 million, and they are projected to reach \$27-28 million by the end of this year.

Rick left because his "time there had expired." He thinks that ConAgra didn't want him around. He is confident that the company will stay in Turners Falls and continue to grow and expand there.

Over many long and difficult years, Michael and Chia have stayed completely true to their vegan values, even though that may limit the potential for some products. All of their products are presently vegan; they contain no animal products such as eggs, dairy products, meat, or honey. The time may come when ConAgra decides to come out with a vegetarian but non-vegan line of products, or possibly start adding egg whites as functional ingredients to improve the flavor and texture of some products for the mass market. ConAgra can do anything they want with the company. They could even fire Michael, but they would have to pay his contract. Rick feels that ConAgra is a good company, and their Healthy Choice brand has been very successful.

Lightlife went out looking for a strategic partner, just as the story in the *Greenfield Recorder* describes. Another factor was the timing. With the multiples high, this was a perfect time to sell a company.

Lightlife's top two lines are their meatless hot dogs (#1, four SKUs) and their deli slices (#2, 5 SKUs). Address: Former Sales Manager, Lightlife Foods Inc., P.O. Box 70, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001.

3265. House Foods America Corporation. 2000. Hinoichi

and House Foods products: Tofu, age, konnyaku, natto (Leaflet). Garden Grove, California. 1 p. Front and back. 28 cm.

• **Summary:** Glossy color and dated. Appears to show a photo of the front of the package of all the different types of Hinoichi-brand and House-brand soy products made at this time.

(1) Tofu. Hinoichi brand: Soft tofu 14 oz, regular tofu 14 oz, firm tofu 14 oz, and extra-firm tofu 14 oz. Soft tofu 19 oz, regular tofu 19 oz, firm tofu 19 oz, and extra-firm tofu 19 oz. House brand: Tokusen kinugoshi tofu (Soft tofu) 10 oz, Sukui tofu (Extra soft tofu) 12 oz, Spoon tofu (Extra soft tofu) 12 oz.

(2) Organic tofu. House brand: Organic tofu soft 14 oz, organic tofu regular 14 oz, organic tofu firm 14 oz, and organic tofu extra-firm 14 oz.

(3) Flavored tofu. House brand: Chef tofu original 19 oz, Chef tofu herb & garlic 19 oz, Chef tofu chili & vegie 19 oz.

(4) Tofu dessert. House brand: Shao mi tofu dessert (mango) 10 oz, Shao mi tofu dessert (lychee) 10 oz, Shao mi tofu dessert (tangerine) 10 oz.

(5) Age. Hinoichi brand: Agé (tofu pouches) 6 pieces = 1.5 oz total, Oagesan (tofu pouches) 2 pieces, Oagesan (tofu pouches) 4 pieces, Oagesan (tofu pouches) 100 pieces (institutional), Atsu-agé (tofu cutlets) 5 oz, jumbo atsu-agé (tofu cutlets) 9 oz, ganmodoki large (tofu fritters) 3 pieces = 5.4 oz total, ganmodoki small (tofu fritters) 8 pieces = 4.3 oz total.

(6) Konnyaku. Hinoichi brand: White ita konnyaku (yam cake) 10.5 oz, black ita konnyaku (yam cake) 10.5 oz, white shirataki bag (yam noodle) 8 oz, black shirataki bag (yam noodle) 8 oz, konnyaku (yam cake) 11 oz, shirataki (yam noodle) 9 oz.

(7) Natto. Hinoichi brand: Mamekozo natto (fermented soybeans) 5.4 oz, natto (fermented soybeans) 4 oz. Address: 7351 Orangewood Ave., Garden Grove, California 92841.

3266. Taira, Ele; Taira, Terry; et al. 2000. Auntie Aloha's—A taste of soy. Honolulu, Hawaii: Independent Distributors of Nutrition for Life. 92 p. Recipe index. 22 cm.

• **Summary:** These are Hawaiian-style recipes that use various NFLI (Nutrition for Life International) meatless soy products made from whole soy flour, such as: Harvest Beanuts, Heartful Gourmet Beef Chunks, Heartful Gourmet Beef Strips, Heartful Gourmet Chicken Chunks, Heartful Gourmet Chicken Strips, Heartful Gourmet Ground Beef, Heartful Gourmet Ground Turkey, Nutri-Flour Blend, Powdered Soymilk, or Vegetable Curls. Recipes also include traditional soyfoods such as shoyu, tofu. The name of the person who developed and submitted each recipe appears below the recipe title.

Contents: Salads. Soups. Pupus. Pasta & rice. Main dishes. Desserts and breads.

Proceeds (less costs) from the book go to HopeLine, the

advice line for young people sponsored by Karing for Kids, a Christian charity. The HopeLine currently operates 8 hours/day on average. Its budget will enable 65,000 youths to call and receive help each year. Yet the goal is to make HopeLine available 24 hours a day, every day, year-round.

Letter (fax) from Ele Taira. 2002. Aug. 6. All the NFLI Healthful gourmet product are meatless and made from soy. For details visit the website at [www.nutritionforlife.com](http://www.nutritionforlife.com). Address: Ele Taira, 1015 Ala Napunani Street #701, Honolulu, Hawaii 96818. Phone: 808-836-4994.

3267. *SoyaScan Notes*. 2000. Vacuum packaging tofu: Potential problems (Overview). Aug. 29-31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Quite a few brands of tofu and tofu products are currently vacuum packed in the USA. For example, Wildwood Natural Foods, Inc. in California makes about 43,000 lb/week of tofu products, of which about 20,000 lb/week (47%) are vacuum packed, including its plain tofu, smoked tofu, baked tofu, tofu burgers, and tofu cutlets. White Wave, Inc., in Boulder, Colorado, makes more than 120,000 lb/week of tofu and other soy products, of which approximately 40% are vacuum packaged. Lightlife Foods, Inc. in Massachusetts, makes over 150,000 lb/week of soy products, 100% of which are vacuum packed. There are many more regional and local producers in the USA. In Europe, even more tofu and tofu products are vacuum packed.

One U.S. tofu manufacturer has been asked by his state health department to discontinue production and sale of vacuum packed tofu until he can prove that it is safe. This state has seven rules for “reduced-oxygen packaging” (including vacuum packaging) of foods. Rule 2 is the most difficult for regular tofu to pass: “Potentially hazardous and perishable foods shall not be packaged in a reduced-oxygen atmosphere unless it possesses one or more of the following characteristics:

(a) A water activity ( $A_w$ ) below 0.91. (b) An acidity of less than 4.6 pH. (c) High levels of competing, non-pathogenic microorganisms that prohibit the growth of pathogenic organisms, such as in raw beef, raw poultry, hard and semi-soft cheese... (e) Kept frozen at 0 degrees Fahrenheit (-18 degrees Celsius) or colder. (f) Another method of preservation approved by and on file with the department.”

Rule 4 states that the “recommended last date of sale” (the “sell-by” date) “shall not exceed 14 days from processing...”

Rule 7 says that foods such as vacuum-packed tofu “shall be kept refrigerated at 40 degrees Fahrenheit or below.”

At the annual Soyfoods Association Conference held 7-11 July 1982 at the University of Washington in Seattle, Dr. York (of the University of California at Davis) and Dr.

Clifford W. Hesseltine (a world-famous microbiologist at the USDA Northern Regional Research Lab, Peoria, Illinois) gave a class on tofu packaging. According to William Shurtleff's notes, vacuum packaging of tofu was discussed at length and many questions were asked by participants. These notes state: "The growth of gram-negative oxidative bacteria is greatly slowed by vacuum packaging, but lactic acid bacteria grow faster; they are the main spoilage organisms for tofu. For tofu, a vacuum package is not really a vacuum package; it is just a negative pressure environment. Facultative anaerobes can grow in this environment. Botulism bacteria have great heat resistance, but they are poor competitors. They only grow well when no lactic acid producers are present. There is no need to worry about botulism in vacuum packed tofu unless you try to pasteurize the tofu after it is vacuum packed; that can kill the competing bacteria. Tofu has an average pH of about 6.2 (neutral) and water activity of about 0.95 (high). The foods that are potentially the most hazardous are those that are rich in protein and have a high natural water activity. In the long history of tofu, East and West, there are no known reports problems from or outbreaks of botulism. Water packed tofu that has been pasteurized is potentially more dangerous than vacuum packed tofu; the manufacturer should probably add a little lactic acid inoculation.

The book *Food Microbiology*, by W.C. Frazier and D.C. Westhoff (1978) states: "Botulism is a disease caused by the ingestion of food containing the neurotoxin produced by *Clostridium botulinum*. Between 1899 and 1972 there were 672 recorded outbreaks in the United States, involving 1,731 cases and 963 deaths." None of these was from tofu. The organism, a rod-shaped soil bacterium, is saprophytic, spore-forming, gas-forming, and anaerobic. Seven types are distinguished on the basis of the serological specificity of their toxins. Note that an anaerobic bacterium lives in an oxygen-free environment. Vacuum-packed tofu is not such an environment.

3268. *Travelin' Light (Lightlife Foods, Greenfield, Massachusetts)*. 2000. Soy's up!! Mid Year. p. 1-2.

• **Summary:** This summer, riding the wave of popularity enjoyed by its products, Lightlife will begin airing its first national television commercial in April 2000. "Look for our energetic produce boy with ESP (extra soy perception!) and great cooking ideas on the Food Network." Three small color photos show the high-energy produce boy, with his hat on backward by the produce department, intensely promoting Lightlife products. A large color photo on p. 5 shows Co-founders Chia and Michael Cohen in "their true colors-tie-dye shirts.

Lightlife will also be running print ads in national magazines such as *Cooking Light* and *Vegetarian Times*. Look "for our surfer gal hangin' ten [surfing] with our Smart Dogs and Smart Deli Slices. Guess we've come a long way

since our first paper sign over 20 years ago! Cowabunga!"

A photo shows a color ad for Smart Dogs with the headline "It's soy without suffering, baby." A girl, holding an orange and yellow surfboard and dressed in a wet suit, looks happy as she walks on the beach by the ocean. Note: The title "Soy's up" is a take-off on the surfing term "surf's up," meaning the waves are big and it's a good time for surfing.

3269. Wright, Allison. 2000. Melissa's/World Variety Produce introduces new soy products. *Produce News (Fort Lee, New Jersey)*. Sept. 11.

• **Summary:** World Variety Produce Inc. is the company name and Melissa's is their brand name. The latest soy products to hit retail market shelves are: (1) Melissa's Soy Slices (American, Jalapeño, or Mozzarella flavors). (2) Melissa's Organic Tofu (Soft, Firm, or Extra Firm). (3) In May the company introduced: Melissa's Soy Easy Gourmet Spread & Dip (Mediterranean Olive, Roasted Red Pepper, Slow Roasted Garlic—all are made with natural smoked tofu). (4) Soy Loaf.

Since last year, Melissa's has doubled its organic line from 40 items to 80. The number one trend in American foods is organic.

3270. Jaret, Peter. 2000. Sumptuous soy: If you think it still means bland cubes of tofu, you're in for a surprise. New products make it easy to add this disease-fighter to your meals (Ad). *People*. Sept. 27.

• **Summary:** This 2-page article was reprinted—as a special advertising supplement—from the July/August issue of *Health* magazine (p. 112-17). Photos show: Edamame. Veggie burgers. A tall glass of chocolate soy milk.

3271. Boca Foods Company. 2000. The Original Boca. Everything you need to know! Product specifications. Madison, Wisconsin.

• **Summary:** Detailed information (including ingredients) is given for the following five products: Breakfast Patties. Breakfast Links. Recipe Basics Meatless Crumbles. Meatless Tenders. Meatless Nuggets. The main soy ingredient in each product is soy protein concentrate. Address: 910 Mayer Ave., Madison, Wisconsin 53704.. Phone: 608.285.6950.

3272. **Product Name:** The Original Boca Nuggets.

**Manufacturer's Name:** Boca Foods.

**Manufacturer's Address:** Madison, Wisconsin. Phone: 608.285.6950.

**Date of Introduction:** 2000 September.

**New Product-Documentation:** Leaflets (front and back, 8½ by 11 inch, color) in portfolio sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2000. Sept. One leaflet is titled: "Boca Foods makes adding soy protein to your diet easy and delicious." A 3-column table shows the company's products, grams of soy protein in each

product, and serving size. The products are: The Original Boca Burger (in six flavors), The Bigger Boca Burger (2 flavors), The Original Boca Breakfast Links, The Original Boca Breakfast Patties, The Original Boca Tenders, The Original Boca Nuggets, and The Original Ground Boca Burger Recipe Basics.

3273. Business Communications Co. 2000. Soyfoods: Trends and developments. Norwalk, Connecticut. 137 p. Sept. \*  
 • **Summary:** This study of the soyfoods market, No. R2-419, retails for \$3,450. One section is titled “Whole soybean products.” By type of product: Largest share and fastest growth—Soy milk. Next largest share and fastest growth—Tofu. Good share: Soy sauce. By application: Largest share—Substitute meat products. Fastest growth—Substitute dairy products. Industry structure: Market influences—Consumers, age/gender, media messages, health benefits, retailing outlets. Driving forces—Regulations, technology, price, niche marketing. Most active manufacturers—Market leaders, industry environment.

The second section is titled “Soyfoods as ingredients—Soy protein, soy fiber, soy isoflavones. By type of product: Largest share—Soy flour (defatted). Fastest growth—Soy protein concentrates. Next fastest growth—TSP [Textured Soy Proteins] Good growth: Soy protein isolates. Slow growth—Soy grits, soy fiber. Soy isoflavones. By application: Largest share—Substitute meat products. Fast growth—Substitute dairy products.

The third section is “Soyoil products—Soybean oil and lecithin.” Address: Norwalk, Connecticut.

3274. **Product Name:** SoyRizo (Meatless Chorizo), SoyTaco, SoyLoaf (Meatless Meatloaf).

**Manufacturer’s Name:** El Burrito.

**Manufacturer’s Address:** California. Phone: (626) 369-7828.

**Date of Introduction:** 2000 September.

**Ingredients:** SoyRizo: Water, textured soy protein (caramel color), expeller pressed canola oil, spices, distilled vinegar, soy protein concentrate, salt, xanthan gum.

**New Product—Documentation:** Leaflets (front and back, 8½ by 11 inch) in portfolio sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2000. Sept.

3275. **Product Name:** Natural Touch Veggie Corn Dogs and Veggie Dogs—from Morningstar Farms.

**Manufacturer’s Name:** Kellogg Co. (Specialty Foods Investment Company).

**Manufacturer’s Address:** Battle Creek, Michigan.

**Date of Introduction:** 2000 September.

**How Stored:** Frozen.

**New Product—Documentation:** See next page. Ad (8½ by 11 inches, color) in Natural Foods Merchandiser. 2000. Sept. p. 24. “Nature’s symphony.” Note: The most striking thing about this ad is the merger of the Natural Touch brand with the Morningstar Farms brand. Worthington Foods had kept them carefully apart, with Natural Touch targeted to the natural / health foods market. The Kellogg Co. (famous maker of breakfast cereals) purchased Worthington Foods, Inc. on 1 Oct. 1999.

In the Jan. 2001 issue of Natural Foods Merchandiser is a corporate profile of “Natural Touch by Morningstar Farms.” The company address is: “Natural Touch, Natural and Functional Foods Division, P.O. Box 3599, One Kellogg Square, Battle Creek, Michigan.” Web site: www.naturaltouch.com. Key executives: Steve Benoit, Vice President and General Manager. Ron McDermott, Vice President, Research and Technology.

Note: By 2013 the Natural Touch brand has disappeared, replaced by the Morningstar Farms brand.

3276. **Product Name:** [Tofinelle Tofu Sausages (Spinach and Pine Nuts)].

**Foreign Name:** SOY Tofinelle (Épinards et pignons de pin).

**Manufacturer’s Name:** Nutrition & Santé S.A. (Formerly SOY / Société Soy).

**Manufacturer’s Address:** B.P. 33, Z.I. de la Pomme, 31250 Revel (near Toulouse), France. Phone: +33 62 18 72 50.

**Date of Introduction:** 2000 September.

**Ingredients:** Tofu\* 70.5% (water, dehulled soybeans\* 17.6%, coagulants: calcium sulfate, nigari), spinach\* 16.6%, rice flour\*, powdered egg white\*, sea salt, pine nuts\* 1.1%, non-deodorized sunflower seed oil\*, garlic\*, nutmeg\*, pepper\*. \* = Organically grown ingredients Certified by Ecocert F 32600 L’Isle Jourdain.

**Wt/Vol., Packaging, Price:** 200 gm paperboard box, 2 sausages per pack.

**How Stored:** Refrigerated, store at 4°C.

**New Product—Documentation:** Product with Label brought by Taro Mikuriya of the Nutrition & Santé Group (Revel, France). 2011. Dec. 14. Paperboard box. 4 by 6 by

**Natural Touch**®

**Nature's Symphony**

The **Natural Touch**® family brings to you naturally great taste that perfectly balances the finest vegetables with a delicate medley of select seasonings.

Truly a classical American favorite, **Natural Touch**® Veggie Corn Dogs are the perfect duo of vegetarian hot dogs with a delicious wholesome corn coating. Your family's response will be music to your ears.

Along the same measure, try **Natural Touch**® Veggie Dogs. They deliver the full fanfare of hot dog taste with less than one gram of fat.

The entire ensemble of **Natural Touch**® items is perfectly in tune with nature, containing no artificial ingredients, additives or preservatives. **Natural Touch**® is available in natural food stores and the natural food sections of select retailers.

**Natural Touch**® from **Morningstar Farms**®...bringing great taste to you naturally.

Call toll free 1.800.962.0130 for a product coupon or more information. Visit our Web site at [www.naturaltouch.com](http://www.naturaltouch.com)

1.5 inches. Dark green, light green, dark blue and black on white. Color photo of a cut sausage on a plate. On the front panel are the Soy logo (white on dark green), two organic certification symbols.

Letter (e-mail) from Bernard Storup, founder of Nutrition & Nature (Revel, France). This product was first sold commercially in Sept. 2000.

3277. Turtle Island Foods, Inc. 2000. Talkin' Tofurky (Color videotape). Hood River, Oregon. 6:40 minutes.

• **Summary:** This seven-minute video was released in Sept. 2000. It was developed by Turtle Island mainly for stores that might be interested in carrying the Tofurky line. Also, it could be sent to TV stations who request video footage before Thanksgiving or Christmas. It describes briefly how the company got started (in 1980 in Forest Grove, Oregon, making tempeh at night), then tells about the origin of Tofurky, how it has developed, and its market niche. It shows a family preparing a Thanksgiving dinner, when their vegetarian kid calls, saying he's coming home for Thanksgiving. Horrors! What to do? They also have some good footage of when Christina Applegate, a movie star, brought Tofurky on the Tonight show—as well as other TV show footage. Address: P.O. Box 176, 601 Industrial Ave., Hood River, Oregon 97031. Phone: 541-386-7766.

3278. **Product Name:** Shipping and display carton for various types of tempeh and Tofurky Deli Slices.

**Manufacturer's Name:** Turtle Island Foods, Inc.

**Manufacturer's Address:** Hood River, Oregon. Phone: 541-386-7766.

**Date of Introduction:** 2000 September.

**Ingredients:** -

**New Product–Documentation:** This brown cardboard carton may contain any of the following products made by Turtle Island Foods, Inc. (1) Soy Tempeh, 10 x 8 oz. (2) Five Grain Tempeh, 10 x 8 oz. (3) Wild Rice Rhapsody, 10 x 8 oz. (4) Low Fat Millet Tempeh, 10 x 8 oz. (5) Original SuperBurgers (TM), 10 x 6 oz. (6) BarBQ SuperBurgers (TM), 10 x 6 oz. (7) TexMex SuperBurgers (TM), 10 x 6 oz. (8) Tofurky Deli Slices Original. (9) Tofurky Deli Slices Smoked.

“Remember Folks ‘Brown is Beautiful.’ Please recycle this unbleached dioxin free box.” “The superior taste since 1980. #1 premium, northwest tempeh.”

3279. **Product Name:** Original Veggie Burger, Black Bean & Salsa Veggie Burger, Veg-T Balls (“The meatless meatball”), Breaded Chicken Pattie, Breaded Chicken Nuggets.

**Manufacturer's Name:** VeggieLand (formerly New York's Famous).

**Manufacturer's Address:** Parsippany, New Jersey. Phone: 973-808-1540.

**Date of Introduction:** 2000 September.

**Ingredients:** Water, white grape juice concentrate, expeller pressed high oleic canola oil, cocoa butter, tofu (soybeans, calcium sulfate), brown rice syrup, cashew butter, pure vanilla extract.

**Wt/Vol., Packaging, Price:** 7.5 oz tub.

**How Stored:** Frozen.

**New Product–Documentation:** Three leaflets (glossy, color, two-sided) sent by Patricia Smith from Natural Products Expo in Baltimore, Maryland. 2000. Copyright 1999. On the front of each is a color photo of the product. On the rear are Nutrition Facts and ingredients.

3280. **Product Name:** Melissa's Soy Loaf.

**Manufacturer's Name:** World Variety Produce Inc. (Marketer-Distributor).

**Manufacturer's Address:** 5325 S. Soto St., Vernon, CA 90021. Phone: 323-588-0151.

**Date of Introduction:** 2000 September.

**Wt/Vol., Packaging, Price:** 16 oz package.

**How Stored:** Refrigerated.

**New Product–Documentation:** Wright, Allison. 2000.

“Melissa's/World Variety Produce introduces new soy products.” *Produce News* (Fort Lee, New Jersey). Sept. 11. The Soy Loaf is for customers seeking protein-rich meat alternatives. Because it contains more than 6.25 gm of soy protein per serving it qualifies for the FDA health claim.

3281. Rose, Bruce. 2000. How Bruce got involved with natural foods, soyfoods, Rosewood Products, Inc. and Tofu International Ltd. (Interview). *SoyaScan Notes*. Oct. 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In 1967, while enrolled at Wayne State University in Detroit, Michigan, Bruce got involved with macrobiotics. His main education came from “street school.” He would drive to Ann Arbor for the fun of it, and there he discovered Eden Foods, a little upstairs co-op that was the first he found that sold brown rice. He would buy foods, and take them back to the little center which was in Detroit. Michio Kushi visited their center several times and gave lectures.

One of his childhood friends was Tim Redmond, whom he later met during his college years and then at Eden Foods. Redmond's dad invested money in Eden Foods on the condition that they cease to be a co-op. Michael Potter later contributed money “from spurious sources in tune with the times.” Potter's attitude has long been “It's Mike against the world.”

Many of the food co-ops were started by potheads; most were in university towns and part of the counterculture—a mix of politics and natural foods.

From time to time, usually when some problem or opportunity arose, Eden Foods would run out of money and call on Bruce. He loaned them money (once \$12,000) and

they paid it back each time. In 1978 Bruce started to work for Eden Foods at their warehouse on Platt Road in Ann Arbor. They were already a fairly big food distribution company with large semi trucks [semitrailers]. Soon Bruce learned about the Soy Plant, which was a co-operative on Ann Street in Ann Arbor. He started to visit their deli. In 1979, Bruce and his family moved to a town about 20 miles north of Ann Arbor—before the fire.

Then in Nov. 1979 the Eden warehouse at 4601 Platt Road was destroyed by a large fire. Bruce was a manager at the time. He is quite sure that the fire was *not* caused by arson. If it was arson, it certainly was not done by the owners. They definitely didn't burn down the company to collect on the insurance. The main reason is that Eden was greatly underinsured; they lost a lot more than they got back or than could ever have gotten back. In the best case, insurance pays you 80% of what you're insured for. To this day, nobody knows for sure what caused the fire. The fire almost put Eden out of business; they lost a lot of money. They were able to stay in business because of the help of their friends. Before the fire, the insurance companies were always trying to get Eden to buy more insurance coverage—but they never did.

The fire was devastating for Bruce as well. He had been working on some automatic packaging equipment for Eden; it all melted. So after the fire, he decided to leave the company. They owed him \$15-30,000 at the time. He sat down with Potter and his good friend Redmond and made them an offer. You can forget the debt if you will give me just 15% of the stock in Eden Foods. Potter said "Yes" and Redmond said "No."

Cliff Adler, who had joined the company before the fire, had a profound effect on its recovery. After the fire, he converted a \$100,000 loan into stock so that in 1980 he owned 34% of the company. "Cliff was great. He was an upper management mover and shaker and eased the company's debt burden. He moved the company forward."

At one point Bruce considered starting a company to make tofu, but he didn't want to compete with the Soy Plant. Then he happened to meet Ben Wenzel who was delivering (by contract) the Soy Plant's tofu out of the Ann Arbor area and outside of Michigan. "He was delivering cider and tofu in his old hippie van." So Bruce decided to go into the raw milk cheese business. He got into it by accident by misunderstanding the difference between markup and profit margin. "Had I known the difference, I never would have gone into the business." So in Aug. 1980 he started a distribution company named Rosewood Products, Inc. After about a year, he started to distribute the Soy Plant's products along with his cheese. Then the Soy Plant got into trouble financially. Bruce tried to help them. He said: "I had a long history with the Soy Plant and this looked easy. Making tofu sounds exciting. East meets West type products was the reason I went in. I never dreamed I'd be packing tofu for 20

years. You never know what life has to offer you."

Bruce ran the Soy Plant for 3 months before they went bankrupt. Then he bid on the company when they were in bankruptcy, and won the bid. He tried to keep all the employees but they came from a co-op background. "I was a pretty traditional business guy. I wasn't smoking dope any more, had short hair, hard working. A lot of the co-ops wouldn't work for me. I found the best workers were good old meat-eaters. The idealists would do great for three months, and then peter out."

For years after he took over the company, people who had loaned the Soy Plant \$100 or so, came to Bruce and said they wanted their money back. He tried to explain that the Soy Plant had declared bankruptcy and their debts were not his. But that didn't satisfy most of them. Bruce estimates that The Soy Plant paid back about half of the roughly \$10,000 they borrowed from members of the community.

In the end, Bruce merged the Soy Plant, a pioneer soy company, into his Rosewood Products, then later renamed it Tofu International Inc.

Update: Letter (fax) from Bruce Rose. 2001. May 22. Bruce says Rosewood Products no longer makes tempeh. They bought from White Wave from 1990-1998, but now buy their tempeh from Lightlife. They sell mostly bulk tempeh burgers. The Soy Plant started making tempeh in 1977. Rosewood started in 1987, stopped about 1995. Address: Founder and President, Rosewood Products, Inc., 738 Airport Blvd., Suite 6, Ann Arbor, Michigan 48108. Phone: 734-665-2222.

3282. Barovick, Harriet. 2000. I was a teen vegetarian. *Time*. Oct. 16.

• **Summary:** TV-cartoon heroine Lisa Simpson is a vocal vegetarian. "With mainstream groceries carrying products like Boca Burgers, soy milk and tofu, and fast-food restaurants like Wendy's offering veggie pitas, meat-eating meat-eating parents are having an easier time accommodating their kids and, in some cases, are following suit."

3283. **Product Name:** [Tempeh, and Handmade Tempeh-Seitan Sausages].

**Foreign Name:** Tempeh, Saucisses Artisales Tempeh et Seitan.

**Manufacturer's Name:** Produits Naturels Compagnards.

**Manufacturer's Address:** 3325 Rue Hugh-Greene, Rawdon, PQ J0K 1S0. Phone: 450-834-7391.

**Date of Introduction:** 2000 October.

**Ingredients:** Sausages: Tempeh, seitan, whole-wheat bread crumbs, filtered water, nutritional yeast, extra virgin olive oil, tamari, spices, potato flour, guar gum.

**New Product-Documentation:** Letter (fax) from Brian Morin. 2001. Feb. 22. He started making and selling Tempeh and Tempeh-Seitan Sausages on 1 Aug. 2000.

Form filled out and letter from Brian Morim. Gives his current address, phone, fax, email (morin\_brian@hotmail.com) and the ingredients for his sausages in French and English. He expects the labels to be ready by Aug. 2001.

3284. United Soybean Board. 2000. 7th annual national report: Consumer attitudes about nutrition, 2000/2001. Seattle, Washington. 8 p. Oct. 28 cm.

• **Summary:** This seventh annual nationwide survey, commissioned by USB, was conducted in July 2000 by an independent research firm in Seattle, Washington. Random telephone interviews were completed with 800 consumers. The study's margin of error is  $\pm 3.5$  percent and has a confidence level of 95%.

Contents: Nutritional concern and habits. Dietary changes in eating habits. Consumer awareness of nutrition terms and information. Media sources and nutritional information. Consumer perceptions of genetically modified food, biotechnology, and labeling. Consumer perceptions of *trans* fat and hydrogenation. Consumer perceptions of cooking oils. Consumer awareness and perception of soy products. Consumer perceptions of the healthiness of soy.

Consumer awareness and perception of soy products: 1. The number of consumers eating soy products once a week or more continues to rise, up to 27% in 2000. 2. The top 3 soy products that consumers are aware of are tofu (86%), soy veggie burgers (79%), and soymilk (79%). Other products that received a high level of awareness include soybean oil (78%), soy infant formula (67%), soy protein bars (50%), and soy supplements (49%). 3. Tofu and soy veggie burgers are the top two products consumers have tried, at 45% and 41% respectively. 4. There was a significant increase in the number of consumers who have tried soymilk, from 18% in 1999 to 25% in 2000.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at [www.soyconnection.com/health\\_nutrition/pdf/](http://www.soyconnection.com/health_nutrition/pdf/).

3285. McPherson, Heather. 2000. Vegetarians can feast on creativity. *Sentinel (Orlando, Florida)*. Nov. 2.

• **Summary:** After discussing Tofurky the writer, who is sympathetic to vegetarianism, adds: "I cannot figure out why people who choose to abstain from meat would want to eat food formed to look like meat." Address: Food editor.

3286. *Time*. 2000. Numbers. Nov. 6.

• **Summary:** "4: Years of protest by a vegan prisoner in Lewisburg, Pennsylvania, before a judge ordered the facility to serve soy milk.

"145,000: Total number of federal prisoners, now offered meatless cuisine like veggie burgers and barbecued tofu."

3287. *Northwest Florida News (Ft. Walton Beach, Florida)*.

2000. Tofurky Roasts for this Thanksgiving. Nov. 15.

• **Summary:** A color photo shows a package of Tofurky, made by one of those "Left Coast" companies that vows to spare 100,000 turkeys this Thanksgiving. The full Tofurky feast weighs 3¼ lb and sells for about \$20. A smaller 26 ounce Tofurky Vegetarian Feast retails for about \$10.

3288. *SoyaScan Notes*. 2000. How genetically engineered soybeans took over the soybean storage and distribution system and led to increased use of organic soybeans (Overview). Nov. 27. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** In the mid-1990s U.S. farmers began to deliver the first crop of genetically engineered (GE) soybeans to their local elevators. There they were accepted without question and mixed in with the traditional non-GE soybeans. They had entered the "stream" and taken over the system with no notification of soybean users, no discussion with consumers, no debate in Congress. It was a silent coup d'état. But the impact of this "non-decision" and "non-issue" was immense.

Soyfoods manufacturers that for decades had purchased their soybeans from the "stream" now suddenly found that, like it or not, they were buying GE soybeans mixed in with their regular soybeans. Magazines and newspapers began to analyze foods and report that certain brands of tofu, veggie burgers, or soymilk contained GE soybeans—even though there was no mention of this on the labels. Consumers began to call the companies that made their favorite soyfoods and ask if those foods now contained GE soybeans. The honest answer was a simple "Yes." Many companies fudged by saying that they were buying soybeans from the same source they always had.

As consumer concern rose (starting in 1999 and 2000) many company felt compelled to make products that were free of GE soybeans. They had two choices: (1) Buy non-GE soybeans, or (2) Buy organic soybeans. Many chose the organic approach. In this way GE soybeans helped the organic movement to prosper.

3289. Hartke, Kristen. 2000. Meet the fake meats. *Washington Post*. Nov. 29.

• **Summary:** Discusses seitan, tempeh, tofu, veggie burgers, meatless hot dogs, meatless ground beef / sausage, lunch "meats," bacon alternatives, vegetarian "poultry." Contains 4 recipes. Address: Freelance writer in Washington, DC.

3290. Abramowitz, Gary. 2000. Update on work with Fresh Tofu, Inc and Tofu Turkeys (Interview). *SoyaScan Notes*. Nov. 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The full story of Gary's work can be found on his website at [www.freshtofu.com](http://www.freshtofu.com). His first step into the world of vegetarian cooking was in 1980 when he

created a vegetarian lunch truck named Wok 'n Roll, parked at Douglas College, part of Rutgers University in New Brunswick, New Jersey. He did that for 2-3 years. Then he became the chef-manager at High Street Cafe from 1983-85. In 1998 Fresh Tofu, Inc. outgrew its original location at 900 Line St., Allentown, Pennsylvania. Using savings and a bank loan, with funding from Allentown Economic Development Corp., he purchased a building at 1101 Harrison St. in Allentown, Pennsylvania. After gutting and renovating it to allow for future expansion, he moved the company in April 1998. He moved into a building with 18,000 square feet from one in Easton that had 3,700 square feet. He did *not* move into a business incubator (as an article of 24 Nov. 1999 in the local newspaper says). Fresh Tofu Inc. now has 18 employees and is growing at a rate that is too fast to handle. The new building is now full and bursting at the seams.

In 1992 he began commercial production of Tofu Turkey. It has become a major product, and sales this year will top 2,000 by the end of the year. Each year before Thanksgiving things become hectic as they try to make enough "turkeys" to fill the growing demand.

At Gary's 20th high school reunion in 1990 he was given the award for the "most unusual occupation." During its early history the company had to struggle to make ends meet. Some people would laugh at what he was doing. But now all that has changed—in part because people realize you can make money making tofu. So a different kind of person is now coming into the industry—the person who is mainly interested in the money rather than the product. Many of these make second-generation soyfoods using tofu, rather than making the tofu itself. Making tofu is now "valid." It's okay. For the last 5 years sales have grown at 20-25% a year. He can't keep up with the demand. Since 1988 he has not pursued sales through advertising or in any other way—by word of mouth the customers come to him. And he's still turning business away. He would prefer a little slower growth. He could do a second shift, but he doesn't want that kind of life. Still, he finds it very difficult to say "no" to potential customers. Address: 1101 Harrison St., Allentown, Pennsylvania 18103. Phone: 610-433-4711.

3291. Appleson, Gail. 2000. Mock meat market grows: Meat substitutes gaining consumer acceptance. *Manitoba Cooperator (Winnipeg, Manitoba, Canada)*. Nov. 23.

• **Summary:** "Even the U.S. Bureau of Prisons changed its policy in October to offer vegetarian entree choices to all federal inmates, reflecting the nation's growing appetite for meatless meals.

Linda Gilbert, president of HealthFocus (a marketing firm in Atlanta, Georgia), said that a nationwide study of 2,000 grocery shoppers this summer showed that 22% purchase meat substitutes; in 1992 this figure was only 7%, showing a steady growth.

There are various reasons for this trend: (1) The greater

variety and quality of products, sold in both supermarkets and natural food stores. (2) The growing evidence that soy protein has definite health benefits. Last year the U.S. Food and Drug Association (FDA) approved a heart health statement for products made with soy protein. (3) Big food companies are stoking the trend. Kraft bought Boca Burger and the Kellogg Co. bought Worthington Foods, two of the largest makers of meat alternatives. (4) New technologies have made it possible to develop nutritious, tasty foods that have much the same taste, texture, appearance and nutritional value of meat, with none its disadvantages (such as high fat, high sodium, high cholesterol). Address: Freelance writer in Colorado.

3292. Fresh Tofu Inc. 2000. Home page and all links (Website printout—complete). [www.freshtofu.com](http://www.freshtofu.com) Printed Dec. 2.

• **Summary:** Links: (1) Home page (1 p.). (2) History: Fresh Tofu Inc. (2 p.). Incorporated in Nov. 1983 by Jeffrey Connerton. In 1984 he met Gary Abramowitz. (3) Our products (1 p.). Color photos of 9 products. (4) Nutritional information (1 p.). (5) Tofu Turkey. Introduced commercially in 1992. Address: 1101 Harrison St., Allentown, Pennsylvania 18103. Phone: 610-433-4711.

3293. *Cheraw Chronicle (Cheraw, South Carolina)*. 2000. Economic figures show more Americans going meatless and liking it. Dec. 7.

• **Summary:** In 1998 sales of meat alternatives totaled \$250 million; it is projected to pass \$1,000 million in 2001. The category's remarkable 48% growth rate has made it one of the top ten fastest growing categories in U.S. supermarkets. Soy protein, the most widely use protein source in meat alternatives, is an excellent source of all nine essential amino acids.

Most buyers are mainstream Americans; 80% of those polled do not consider themselves strict vegetarians. The health benefits of eating more plant proteins, now well documented by the American Dietetic Association and others, are hard to dispute. Moreover, by eating plant-based foods, you can also help save the lives of animals. For more information, contact the Animal Protection Institute, P.O. Box 22505, Sacramento, California 95822. Phone: 1-800-348-7387.

3294. Schwarz, Richard W. 2000. From Battle Creek to Battle Creek: A tale of vegetarian meat analogs. *Adventist Review*. Dec. 7. p. 12-16. [68 ref]

• **Summary:** Discusses Dr. John Harvey Kellogg, meat alternatives, Madison Foods, Loma Linda Foods, Worthington Foods, Robert Boyer, spun soy protein fiber, Miles Laboratories, Morningstar Farms, the Kellogg Co. Contains many excellent photos of early meat alternatives, many made by Worthington Foods.

3295. Barboza, David. 2000. New sprouts, old doubts for A.D.M. *New York Times*. Dec. 24. p. BU1.

• **Summary:** The company's top executives say a new ADM is emerging, one "that offers not just bulk grain but also a growing array of health and nutritional products like veggie burgers, soy milk, natural vitamin E and isoflavones, a soy extract that may reduce the risk of osteoporosis." In short, ADM is looking for alternatives to commodities, and working hard to grow its nutraceutical division.

It has been two years since the "retirement of Dwayne O. Andreas, the legendary chairman who built A.D.M. into one of the world's most powerful corporations." In 1997 the board chose G. Allen Andreas, Dwayne's nephew, to replace him as CEO; in 1999 Allen moved up to chairman of the board as well. Yet today, the leadership and future direction of the company are unclear. The big question concerns Michael D. Andreas, Dwayne's son and once the heir apparent. After his three-year prison term (for illegally conspiring worldwide to fix the price of lysine) ends in 2002, will he return to ADM. And if so, what office or offices will he hold?

In 1996 ADM paid a \$100 million fine to settle the government's charges in the lysine price fixing case. It was one of the largest price-fixing settlements in U.S. history. Although ADM never admitted wrongdoing, the company has been unable to rebound. Although the world is awash in vegetable oil, the European demand for soybean meal is rising due to the ban on bone meal in animal feeds. Graphs show that ADM's net income and stock price have fallen significantly since 1996.

3296. *SoyaScan Notes*. 2000. Chronology of major soy-related events and trends during 2000 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. 8—The Kerry Group (of Wisconsin and Iowa) purchases Solnuts, a pioneer manufacturer of dry-roasted soynuts, in Hudson, Iowa.

Jan.—Kraft Foods Inc. (Illinois) purchases Boca Burger Inc., America's third largest maker of veggie burgers, after Worthington Foods and Gardenburger.

March 6—The Hain Food Group announces that it will acquire the Celestial Seasonings tea company to become the largest natural foods company in the USA.

March 9—The USDA formally approves a rule change allowing soy protein products to completely replace meat products in the Federal School Lunch Program.

March 31—Monsanto, the world's leading agricultural biotech company, merges with Pharmacia & Upjohn (a large pharmaceutical company), and the new company is renamed Pharmacia Corporation.

April—An article by Lon White on tofu and brain aging is published in *J. of the American College of Nutrition*.

June 9—20/20 (ABC) television program, titled "Soy—

The untold story," airs on Friday at 10:00 p.m. discusses many of the shortcomings of soyfoods, but in a very fair way.

June 13—Martha Stewart, on her popular nationwide TV program *Living*, has a very positive segment on edamamé.

July 14—Lightlife Foods Inc. (of Turners Falls, Massachusetts) is purchased by ConAgra, Inc., a \$25 billion food company based in Omaha, Nebraska—for an undisclosed amount. Lightlife's plant, employees, and management team will stay in place. Lightlife is a leading maker of vegetarian meat alternatives, with 150 employees and about \$25 million in annual sales.

July—At a joint meeting of ASA and USB, the International Soy Protein Program (ISPP) was born as ASA and the Illinois Soybean Program Operating Board (ISPOB) formalized their joint commitment to "Increase the international consumption of soy protein by humans in new markets—developing countries—and thereby create new opportunities for disappearance of soybeans and provide higher economic returns to U.S. soybean producers." ISPOB and its Executive Director Lyle Roberts were instrumental in conceiving the program and raising its initial funding. This program was later renamed WISHH.

Sept.—Monsanto's patent on glyphosate expires. Glyphosate is the active ingredient in *Roundup*, the world's best-selling herbicide.

Dec.—Sanitarium Foods of Australia acquires the 47% of SoyaWorld owned by Sunrise Soya Foods (Vancouver, BC, Canada).

Trends: 1. This year, the momentum created by the FDA health claim in Oct. 1999 has propelled the soyfoods industry to new heights. Existing companies are growing rapidly, and many new companies (including some of America's biggest food companies) are entering the market with new products.

2. This year, for the first time, soymilk has become a mainstream American beverage. As of May, White Wave Silk soymilk is sold in 24,000 supermarkets nationwide. Edamamé (green vegetable soybeans) have gone mainstream in California, and are rapidly becoming popular on both coasts of the USA.

3. In the United States and Europe, the tide seems to be flowing increasingly against genetic engineering of foods and food plants. More and more companies in the natural foods industry are labeling their products as "non-GMO" or "GMO-free" or "No GMOs." Monsanto has stopped its efforts to develop genetically engineered soybeans for food use and focused its attention instead on livestock feeds. It now seems likely the genetic engineering of plants has a future, but not in the area of foods—at least in developed countries.

4. Interest in "food-grade soybeans" continues to grow in the USA and has increased substantially this year. Canada began focusing on identity-preserved food-grade soybeans 10-15 years before the USA. U.S. interest began to grow in

about 1995 with the introduction of genetically engineered soybeans and with the accelerating interest in food uses of soybeans.

5. While pro-soy articles (mostly about health benefits) continue to increase, so do anti-soy articles and Internet sites. The loudest anti-soy voices are those of Sally Fallon and Mary Enig of the USA (they believe traditional fermented soyfoods—such as miso, shoyu, natto, and tempeh—are good, traditional non-fermented soyfoods—such as tofu, soymilk, and edamamé—are not very good, and modern soy protein products—such as soy protein isolates, concentrates, and textured soy flour—are the worst of all, being highly processed with chemicals such as hexane solvent). Also: Richard and Valerie James of New Zealand, and Lon White of Hawaii. Some of the concerns they raise are legitimate and deserve further research, but the majority (we believe) are not. Nevertheless, many of the health claims made for soy in popular articles are exaggerated or somewhat sensational, and not firmly supported by scientific evidence.

6. As we are about to enter a new century and a new millennium on 1 Jan. 2001, soyfoods appear to have a bright future, worldwide. This past year has seen more activity and interest in, and media coverage of, soyfoods than at any time in the history of the United States.

3297. Huang, H.T. (Hsing-Tsung). 2000. Soybean curd and related products: Yuba (*doufu-pi*) and dried yuba sticks (*fuzhu*) (Document part). In: H.T. Huang. 2000. Science and Civilisation in China. Vol. 6, Biology and Biological Technology. Part V: Fermentations and Food Science. Joseph Needham series. Cambridge, England: Cambridge University Press. xxviii + 741 p. See p. 303, 320-23. [6 ref]

• **Summary:** Dr. Huang discusses yuba and dried yuba sticks mainly on pages 303, and 320-23.

When a film forms on the surface of heated soymilk, it can be lifted off to give *doufu-yi* ["tofu robes"] or *doufu-pi* ["tofu skin"] (3 Cc = Chinese characters given for each) as stated in the *Bencao Gangmu* [The great pharmacopoeia, by Li Shizhen, 1596] (Huang, p. 320).

Note: In Japanese this film is called yuba.

In a flow diagram of the process for making tofu (Huang, p. 321). "soy milk skin" [yuba] is shown as one of the by-products. This yuba can be further processed to give "Vegetarian chicken" and "Vegetarian ham."

Table 29 title "Family of products related to soybean curd" [tofu] (Huang, p. 322) includes *doufu-pi* which is called "Soy milk skin." Method of production: "Film skimmed off heated soy milk."

Huang, p. 323: The next food related to tofu is *doufu-pi* (3 Cc) bean curd skin [yuba], which is commonly known today as *fuzhu* (2 Cc, bean curd bamboo) [dried yuba sticks or rolls], apparently because its shape resembles a fairly young bamboo shoot. *Fuzhu* comes in long wrinkled strips that are light yellow in color. As mentioned on p. 303, the

*Bencao Gangmu* [The great pharmacopoeia, by Li Shizhen, 1596] states that a skin is formed on the surface of soymilk when it is heated; it can be lifted off and dried to give yuba. It seems reasonable to assume that yuba had been made in China for at least several hundred years before the *Bencao Gangmu* appeared.

It is mentioned in the *Bencao Gangmu Shiyi* [Supplemental Amplification of the *Bencao Gangmu*, by Zhao Xuemin, 1765, page 365] and in several literary works from the Qing (Manchu) dynasty (1644-1912).

Footnote 72: On page 365, one of the poems on tofu by Li Tiaoyuan describes the froth on the surface of cooked soymilk folding like a cloth. Doufu-pi [yuba] is directly mentioned as a dish in the popular Qing novels *Yu Lin Wai Shi* by Wu Jingzi (1701-1754), chapter 22, and *Jing Hua Yuan* by Li Ruzhen (1763-1830), chapter 23, and as a skin for dumplings in the *Hong Lou Meng* by Cao Xueqin, chapter 8. All four references are cited in Hong, Guangzhu. 1987. *Zhongguo Doufu* [Chinese Tofu]. Beijing, China: Commerce Publishers (p. 30-32).

As can be inferred from Table 29, yuba is the product in this group that contains the least amount of water. After drying, it can be stored for a long time without refrigeration, and has long been a popular ingredient in many Buddhist vegetarian dishes.

Footnote 73: Fuzhu is also translated as "dried bean curd sticks, as it is called in the basic Buddhist vegetarian recipe given in: Miller, Gloria Bley. 1966. *The Thousand Recipe Chinese Cookbook*, p. 624.

Note: This is the earliest English-language document seen (June 2011) that uses the term "bean curd bamboo" to refer to dried yuba sticks. Address: Alexandria, Virginia.

3298. **Product Name:** Smart Bacon.

**Manufacturer's Name:** Lightlife Foods, Inc.

**Manufacturer's Address:** 153 Industrial Boulevard, Turners Falls, MA 01376. Phone: 1-877-SOY-EASY (877-769-3279).

**Date of Introduction:** 2000 December.

**Ingredients:** Water, soy protein isolate, wheat gluten, soybean oil, textured wheat gluten, natural flavors, carrageenan, potato starch, spices, sesame oil, spice extract, tomato pulp, natural smoke flavor.

**Wt/Vol., Packaging, Price:** 5 oz. (142 gm) paperboard box. Retail for \$2.99 (2001/03, Lafayette, California).

**How Stored:** Refrigerated.

**New Product–Documentation:** Leaflet sent by Patricia Smith from Natural Products Expo East. 2000. Sept. "It's crunch time!" On the front is a large color photo of the bacon with a meatless burger and cheese in between sesame buns and a photo of the front panel of a box of Lightlife Smart Bacon; it is cholesterol free and low in fat. On the rear are the ingredients, cooking instructions, and a list of Lightlife products. Note: The first 6 ingredients listed on this leaflet

are water, wheat gluten, textured soy protein concentrate, soybean oil, natural flavors, and isolated soy protein. These are quite different from the ingredients listed on the actual package.

Ad (full page, color) in *Natural Foods Merchandiser*. 2001. Jan. p. 55. "It's crunch time!" A large photo shows the front of the box. "Pig-out intelligently."

Product with Label purchased at Safeway supermarket in Lafayette, California. 2001. March 4. 6.75 by 4.75 by 0.625 inches. Paperboard box. Red, dark green, and gold on white. Color photo shows wavy bacon strips atop scrambled eggs near an English muffin and two strawberries on a white plate. Front panel: "Meatless low fat strips. Cholesterol free. Contains 75% less fat than traditional bacon. Rich in soy. Pig out intelligently." Back panel: "Non GMO soy. No nitrates; no MSG."

Talk with Kathleen Strong of Lightlife. 2001. March 27. Smart Bacon was first sold commercially on 30 Dec. 2000.

3299. Shurtleff, William; Aoyagi, Akiko. 2000. *Tofu & soymilk production*. 3rd ed. Lafayette, California: Soyfoods Center. 336 p. Illust. by Akiko Aoyagi Shurtleff. Index. Dec. 28 cm. [223 ref]

• **Summary:** Contains many new advertisements, plus changes on the title page, copyright page, and rear cover

of both paperback and hardcover editions (new ISBN for each). Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

3300. **Product Name:** Barbecue Burger.

**Manufacturer's Name:** Vermont Soy

**Manufacturer's Address:** 44 Foundry St., Waterbury, VT 05676. Phone: 802-244-5400.

**Date of Introduction:** 2000.

**Ingredients:** Organic tempeh (organic soy beans, vinegar, culture), organic tomato sauce, water, soy bean oil, organic onion, honey, unsulphured molasses, organic garlic, tamari, organic lemon, chipotle pepper, spices.

**Wt/Vol., Packaging, Price:** 10 oz (285 gm).

**New Product-Documentation:** Form filled out and two labels sent by Megan Treadwell. 2001. June. Vermont Soy is at 44 Foundry St., Waterbury, Vermont 05676. Phone: 802-244-5400. Label for Barbecue Burger is 4 by 4 inches. Self adhesive. Green on white. "An organic cultured soy product."

3301. Liberty, Anne. 2000. *Super soy! Protect yourself against bone loss, heart disease, cancer, menopause, high cholesterol*. Boca Raton, Florida: American Media Mini Mags Inc. 66 p. 14 cm. [1 ref]

• **Summary:** This mini-book (only 5½ inches high) was sold (for \$1.19) next to the tabloid magazines at the checkout stand at Longs Drug Store in Lafayette, California. On the little cover is a color photo of a grey-haired and healthy-looking lady holding a glass of soymilk. Contents: All about soy: Inside the soybean (phytoestrogen, isoflavones, genistein, protease inhibitors), eight of soy's top health benefits (antioxidant protection from free radicals, breast cancer protection, cholesterol control, colon cancer protection, strong bones, hot flash reduction, a strong immune system, and kidney disease prevention), different soy products (green soybeans, hydrolyzed vegetable protein {HVP}, infant formula {soy-based}, lecithin, meat alternatives, miso, non-dairy frozen soy ("soy ice cream"), soy cheese, soy flour, soy grits, soy protein (incl. TSP = textured soy protein = textured soy flour), soy sauce, soy yogurt, whole soybeans, soy nut butter, soy nuts, soy oil, soy sprouts, tempeh, tofu, whipped soy-based topping, yuba), nutritional value, how much do you need? Bone loss. Heart disease and cancer: Heart disease, cancer (genistein, isoflavones, phenolic acids, phytates, protease inhibitors). Menopause. Cholesterol. Cooking with soy products: Soy flour, miso, soy milk, soy protein, tofu, tempeh. Delicious soy recipes.

The author frequently refers to Earl Mindell, PhD, but has no real scientific references. Many of the recipes were provided by the United Soybean Board. On the last page are two sources of more information and recipes: The United Soybean Board website [www.talksoy.com](http://www.talksoy.com) and the Indiana Soybean Board website [www.soyfoods.com](http://www.soyfoods.com).

3302. McCullough, Fran [Frances Monson]. 2000. Living low-carb: The complete guide to long-term low-carb dieting. Boston, New York, London: Little, Brown and Co. xiv + 370 p. Index. 22 cm.

• **Summary:** 175 new recipes from the author of the bestselling *The Low-Carb Cookbook*. Soy-related recipes: Tuna salad with beans and broccoli (with "15-ounce can Eden black soybeans, rinsed and drained" p. 159). Border beanburgers (with "15-ounce can Eden black soybeans," p. 190). Buffalo Boys Chili (with "½ cup Eden canned black soybeans, including some liquid" p. 214). Refried beans (with "15-ounce can Eden black soybeans, rinsed and drained" p. 233). Bean breakthrough (sidebar, p. 236; A half page in praise and promotion of Eden canned black soybeans). Scrambled tofu (with "10-ounce box silken tofu, drained," p. 338). Quick black soybean salsa (with "15-ounce can Eden black soybeans, drained" p. 348). Address: Culinary Inst. of America at Greystone (in St. Helena, California).

3303. Rose, Robert. ed. 2000. Beans, lentil & tofu gourmet. Toronto, Ontario, Canada: Robert Rose, Inc. 192 p. Illust. Index. 26 cm.

• **Summary:** This is an unusual but attractive book, with no real author or publisher. It was written by "The editors of Robert Rose" and published by Robert Rose Inc., with financial support of the government of Canada. Basically, it is a collection of recipes from other cookbooks. Except in the chapter titled "Meatless" (p. 145-62), many recipes contain meat, poultry, fish, or seafood. The section titled "Contributing authors" lists eight authors, with photos and descriptions of their cookbooks, and statements such as "Recipes from this book are found on pages 23, 38, 69, and 180." The book contains 12 full-page color photos of dishes prepared from the recipes.

Contains 13 tofu recipes and one tempeh recipe: Malay vegetable-stuffed fried bean curd with spicy sweet-and-sour sauce. Bak choy noodle and tofu chicken soup. Curry-fried tofu soup with vegetables and udon noodles. Mixed vegetable herb broth with soft tofu. Chickpea tofu stew. Braised stuffed bean curd. Braised roasted pork with tofu and green onions. Steamed shrimp-stuffed tofu with broccoli. Hoisin stir-fried vegetables and tofu over rice noodles. Barbecued tempeh with basil, hyssop and ginger. Chickpea tofu burgers with coriander mayonnaise. Thai dry vegetable curry (with tofu, p. 162). Pea tops with pancetta and tofu. Soy-braised tofu, cabbage and ginger with cellophane noodles (with soya sauce, p. 172-73). Address: 120 Eglinton Ave. E., Suite 1000, Toronto, ONT Canada. Phone: (416) 322-6522.

3304. Shimbo, Hiroko. 2000. The Japanese kitchen: 250 recipes in a traditional spirit. Boston, Massachusetts: Harvard Common Press. xiii + 512 p. Foreword by Ming Tsai. Illust. (by Rodica Prato). Index. 23 cm.

• **Summary:** An excellent book with exquisite illustrations. The index contains 46 entries for miso, 20 for tofu, 12 for shoyu, 10 for teriyaki, 7 for edamame, 6 for natto (fermented soybeans), 6 for soybeans, 5 for koji ("a fermentation starter"), 3 for koyadofu (freeze-dried tofu), 2 for soy milk, soy sauce dressing, soybean lover's soybean rice, soybean miso, soybean pulp, 1 each for kinu dofu, moyashi (incl. soybean sprouts; "Until recently, moyashi used for cooking in Japan were predominantly soybean sprouts," p. 42), nama-age, nama-miso, nama-shoyu, okara (soybean pulp), saikyo miso, and tamari.

In the section on *Daizu* "(Dried soybeans)" (p. 96-97) both roasted soybean flour and *kinako* are mentioned. Dried green soybeans, are toasted then ground to a flour (*kinako*) which "is mixed with sugar and used to coat moist or sticky Japanese sweets." During the summertime, edamame (fresh green soybeans) are boiled and served in the pods.

The section on "Koyadofu" recounts the story of its origin: "The dried form of tofu, koyadofu, was invented by accident around the twelfth century, when, it is said, a priest at Mt. Koya Temple left freshly made tofu as an offering on the altar one snowy night. The next morning the tofu was

frozen, so he threw it away in the back garden.” After several sunny days of melting and evaporation, the tofu was found completely dried. It was found that this dried form can be kept for a long time.

The section on *Tofu seihin*—“Cooked tofu products” (p. 139-41) includes *Abura-age*—“Fried thin tofu.” “One type of *abura-age*, called *sushi-age*, is sold specially for the preparation of *inarizushi*, a small barrel-shaped brown sushi, *Sushi-age* comes slit to make a pocket into which sushi rice can be stuffed.”

Note: This is the earliest English-language document seen (April 2013) that uses the term *Sushi-age* to refer deep-fried tofu pouches used to make inari-zushi.

*Atsuage*—“Fried tofu.” *Ganmodoki*—“Fried tofu dumplings.” *Yakidofu*—“Lightly broiled tofu.” *Yuba*—“Soy milk sheet.”

The latter section states nicely: “Because freshly collected yuba is soft and fragile, many sheets may be piled together and rolled into a 1-inch-thick stick. The stick is chilled, cut into bite-sized pieces, and eaten with a little shoyu (soy sauce) and grated wasabi. Fresh yuba has a wonderful creamy texture and a sweet, nutty taste.”

“Because fresh yuba is perishable, most yuba found in stores is in the form of a dried sheet.” It must be reconstituted in water, but after it has regained its flexibility it makes an excellent wrapper for other foods in fried or simmered dishes.

Shimbo-Beitchman is a knowledgeable and talented Japanese cooking teacher who ran a cooking school in Tokyo for eight years and in London for two; she now teaches in New York City. Address: Teacher of Japanese cooking, Hiroko’s Kitchen, London, England. Phone: Fax: 44-171-289-0855.

3305. Gardenburger, Inc. 2001. Annual report 2000: Adapting to a changing environment. 1411 Southwest Morrison St., Suite 400, Portland, OR 97205. 28 p. 23 cm.  
• **Summary:** Net sales in 2000 were \$71,043,000, only about 80% of the previous year, but net income was an even bigger, huge net loss of \$32,826,000 compared with a net loss of \$21,826,000 the previous year. This company has been very poorly managed and its annual reports are always misleading.

Accompanying the annual report is a notice of Annual Meeting of Shareholders and proxy statement (18 p.). Mr. Lyle Hubbard is the president and former CEO. His salary increased to \$312,914 in 2000, from 240,588 in 1999—and all other compensation totaled \$1.19 million! Unbelievable.

1996 was the last year that this company was profitable. As recently as July 1998 Gardenburger stock was selling at \$14.12/share. By the end of 1999 it had fallen to \$5.87/share and by the end of 2000 it had fallen to \$0.50/share. Crash! Address: Portland, Oregon.

3306. **Product Name:** Morningstar Farms Tomato & Basil Pizza Burger.

**Manufacturer’s Name:** Worthington Foods, Inc. Distributed by Kellogg USA Inc., Battle Creek, Michigan 49016.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085. Phone: 614-885-9511.

**Date of Introduction:** 2001 January.

**Ingredients:** Textured vegetable protein (soy protein concentrate, wheat gluten, water for hydration), onions, mushrooms, Mozzarella cheese...

**Wt/Vol., Packaging, Price:** Four burgers weigh 9.5 oz (269 gm). Paperboard box. Retail for \$2.89 (2002/05, Lafayette, California).

**How Stored:** Frozen.

**New Product–Documentation:** See next page. Product with Label purchased at Trader Joe’s in Lafayette, California. 2001. April 29. Box is 8 by 4 by 1¼ inches. Front panel text: “Veggie Burgers. Enjoy the traditional flavor of Italy. New package’ same delicious taste. 60% less fat than ground beef.” A color photo on left half of front panel shows a veggie burger on a piece of lettuce with melted cheese, sliced mushrooms, and tomato sauce on top. Above that is a bun. Note: This are no buns and no pizza in the product. In lower right corner of front panel is a gold medal: “2001 Gold: Taste Award. American Tasting Institute.” Note: One must pay to use this medal for promoting products. On back panel: “100% Vegetarian” circular logo with 3 green leaves on a white background, imitating that of the VSUK in the UK, although it is slightly different since the VSUK logo is oval, has a two-color background, and has two green leaves. Cooking: Best is in oven, second best in skillet, least desirable is in microwave. “Morningstar Farms appreciates consumer comments.” Gives phone, e-mail, and mail.

Ad (full page) in *Vegetarian Times*. 2004. Feb. p. 12. “Taking the low-carb thing a little too far?” The top two-thirds of the ad contains a color photo showing a small plate piled with crisp pieces of bacon. Below that is the front panel of a box of Morningstar Farms (biggest letters on the box) Tomato & Basil Burger. Below that we read: “Low-carb diets meet common sense. Morningstar Farms offers 13 lower-fat veggie options, like zesty Tomato & Basil Pizza Burgers, all with 4 grams of net carbs less. Available in your grocer’s freezer.” In small print: “Net carbs = carbs less dietary fiber.”

3307. Smith, Patricia. 2001. The Natural Products Expo at Anaheim and the natural foods industry (Interview). *SoyaScan Notes*. March 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The Expo at Anaheim this year was the biggest ever, attracting more than 30,000 people. She walked past every booth and almost every one was offering some kind of soy product. The interest in soyfoods just keeps growing.

At the show there was talk about illegal genetically-

## TAKING THE LOW-CARB THING A LITTLE TOO FAR?

**LOW-CARB DIETS, MEET COMMON SENSE.** Morningstar Farms offers 13 lower-fat veggie options, like zesty Tomato & Basil Pizza Burgers, all with 4 grams of net carbs or less. Available in your grocer's freezer.

Net carbs = carbs less dietary fiber.

engineered StarLink corn in Kellogg's Morningstar Farms products such as Corn Dogs, Mini Dogs, and maybe other products. Some company are pulling these products from their shelves.

Before the first Natural Foods Merchandiser (NFM) trade show was held in 1981, at Anaheim, California, the pioneering natural foods companies such as Erewhon, Eden, Westbrae, Sunburst, and Chico-San all (reluctantly) attended the annual NNFA show in Las Vegas, Nevada. There would always be a big party one evening in someone's hotel suite—with lots of fun. But from 1981 on, these and other natural foods companies found their real home at the NFM trade shows.

Patricia saw Yuko Okada at this year's show. His Macrobiotic Company of American now sells only Muso Shokuhin products. Norio Kushi is running the company. Yuko kicked out Bruce Macdonald over alleged financial improprieties. A lawsuit that Bruce filed has apparently been settled.

Michael Potter bought the Herb-T Company from Cecile Levin in southern California. Mr. Muramoto started the company many years ago.

Patricia has now worked for Trader Joe's for 16 years. Address: Radical Food, P.O. Box 952, Mill Valley, California 94942-0952.

**3308. Product Name:** StarLite Cuisine: Smoked B.B.Q. Patties, Spicy Cajun Patties, Soy Tenders.

**Manufacturer's Name:** First Vegetarian Foods, Inc.

**Manufacturer's Address:** 1429 Virginia Ave., Suite F, Baldwin Park, CA 91706. Phone: 626-338-8233.

**Date of Introduction:** 2001 March.

**Ingredients:** B.B.Q. Patties: Soy protein concentrate and isolate, salt, soy flour, wheat gluten, cornstarch, whey protein, onion powder, garlic powder, natural spices, autolyzed yeast, natural smoke flavor, raw cane juice, carrageenan, caramel color.

**Wt/Vol., Packaging, Price:** 6.9 oz.

**How Stored:** Frozen.

**New Product–Documentation:** Leaflet (8½ by 11 inches, 2 panels each side, glossy color, front and back) sent by Patricia Smith from Natural Products Expo West at Anaheim. 2001. March. Shows the front panel of each product. For example, B.B.Q. Patties: "Made from Soy Protein. High Protein. All Natural. Low Fat. Two Jumbo Patties." Gives details, ingredients, soy health claim, and Nutrition Facts for these three new products plus Soy Taquitos.

3313. **Product Name:** Quit Beef’N Veggie Burger, or Veggie Cheeseburger.

**Manufacturer’s Name:** Tofutti Brands Inc.

**Manufacturer’s Address:** Cranford, New Jersey. Phone: 201-272-2400.

**Date of Introduction:** 2001 March.

**Ingredients:** Burger: Water, soy protein, tofu, spices, dried onion, wheat gluten, egg whites, cellulose gum, dehydrated garlic, vinegar, malt extract, assorted spices, potato flakes, beet powder, paprika, natural flavors, soy lecithin, salt, brown sugar.

**Wt/Vol., Packaging, Price:** 10 oz box (4 x 2.5 oz burgers).

**New Product–Documentation:** Leaflets (8½ by 11 inch, black and white) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2001. March. One leaflet is front and back; one is single sided. Veggie cheeseburger uses soy cheese. Kosher.

3314. *Newsweek*. 2001. Faking it: Home cooking–Periscope. April 2. p. 9.

• **Summary:** This half-page picture-story shows the labels of six meat alternative products over a white plate on a blue table mat. A brief evaluation accompanies each product. From top center clockwise: Smart Bacon (made by Lightlife). Wonderdogs (Lightlife). Yves Veggie Salami Deli Slices. Boca Burger. Veat Vegetarian Breast (of Chicken). Nate’s Meatballs–Classic Flavor. The highest ratings were given to Nate’s meat balls, Wunderdogs, and Smart Bacon.

The text explains that even though Mad Cow Disease has not yet hit the USA, some flesh-eaters are thinking twice about beef. Luckily for these “unwilling vegetarians” the improved texture and flavor of soy products can now sate the

appetites of these carnivores. Signed: Periscope’s guide to the world of soybeans.

3315. **Product Name:** Royal Kaviar (Vegetarian–Made from Soy Protein) [Beluga, or Osetra]. Spelled Royal Caviar by March 2001.

**Manufacturer’s Name:** Royal Caviar, Inc.

**Manufacturer’s Address:** 4551 San Fernando Rd., Glendale, CA 91204. Phone: 818-546-5858.

**Date of Introduction:** 2001 April.

**Ingredients:** Purified water, organic soy protein, organic soy oil, natural gums, sea salt, natural color, natural flavor.

**Wt/Vol., Packaging, Price:** 4 oz (110 gm) glass jar.

**How Stored:** Refrigerate after opening.

**New Product–Documentation:** Two leaflets sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2001. March 8-11. One is 8½ by 11 inches,

**ROYAL CAVIAR, INC. 4551 SAN FERNANDO RD. GLENDALE, CA 91204 • TEL 818 546-5858 • FAX 818 546-5856**

color. On the front is a large color photo of five shallow jars of the product, with all the label text legible. On the back is information about the product and company. Website: [www.royalcaviar.com](http://www.royalcaviar.com). This is an alternative to typical caviar which are the eggs/roe of the sturgeon fish. The second, titled "It's finally here: Caviar for everyone!" states that Royal Caviar is the "long awaited dream of all gourmet and fancy food lovers." Label with magnetic backing (refrigerator magnet for "Beluga"). The colors of this label and the ingredients are different from the label shown in the leaflet. At the center of all labels are the words "Malosol 'Beluga.'" In English, "Beluga" can refer to a large white sturgeon or the caviar processed from its roe.

Talk with Ara Agadjanian, sales manager at Royal Caviar. 2001. April 23. This product was first sold commercially in early April, and is now widely available in local Armenian stores. The company was started by Armenians and they developed the product—which is patented and has a 1-year shelf life refrigerated. The president is Dr. Armen Kazanchian. They have recently had to change the name from Black Gold Royal Caviar to Royal Caviar since Caviar can only refer to fish eggs. It retails for about one twentieth the price of real caviar. The problem is that the sturgeon is now on the endangered species list (in the "Red Book") in Russia, so Russian caviar production has dropped to one-tenth of what it was last year. Then, Beluga caviar (the most expensive) sold for \$1,800/lb, but the price is expected to rise 5-10 fold. To obtain real caviar, the sturgeon fish is always killed and the belly cut open to remove the eggs. To serve Kaviar, remove from the fridge and allow contents to rise to room temperature. Lightly butter a small cracker, then top with 1 teaspoon of caviar. Enjoy.

Products with new labels sent by Ara. 2001. May 2. The words "Black Gold" have been replaced by a UPC indicia. Soyfoods Center taste test. A very creative product, consisting of hundreds of tiny black "eggs" per teaspoon. It is important to serve Kaviar as described above; when eaten straight (alone), it is too salty. An accompanying sheet shows that the soy protein in the product is ProFam 648, purchased from ADM under their documented IP [Identity Preserved] program.

3316. Soy Happy! 2001. "Get yer veggie dogs here!" Making the case for an all American healthy alternative in the ballparks (Color videotape). Los Angeles, California: VegTv.com. 8 minutes.

• **Summary:** An excellent color video. The goal of the Soy Happy! campaign, founded and led by Johanna (pronounced yo-HAN-nuh) McCloy, is to get "veggie dogs" (vegetarian/meatless hot dogs) into major league baseball parks and AAA baseball parks. The key concept is to give baseball fans a choice between a good-tasting, zero fat, zero cholesterol, low calorie vegetarian hot dog and the typical one loaded

with meat and fat.

One spokesman says that about 100 million veggie dogs were sold last year in the USA, worth about \$35 million in sales. The category has been growing at 25-35% a year in recent years, making it the fastest growing category in many supermarkets. Concession managers are realizing that veggie dogs make good sense financially.

Johanna says that (as of July 2001) seven major league baseball parks are now selling veggie dogs: Florida Marlins, Seattle Mariners [Washington state], Chicago White Sox, Toronto Bluejays, Montreal Expos, Oakland A's, and Los Angeles Dodgers.

Many movie stars endorse the idea on the video, and even more (including Tony La Russa, manager of the St. Louis Cardinals) endorse it on the video jacket. Dennis Weaver, for example, says that he became a vegetarian in 1958. If veggie dogs were sold at baseball games, that would be an incentive for him to attend the game.

Talk with Johanna McCloy. 2001. Sept. 17. This video was made in two parts. Most of it was shot in early April 2001, when only one ballpark had started to selling veggie dogs. The last part was shot in July 2001, when seven major league ballparks were selling them. For more details see Sept. 2001 interview with Johanna. Address: P.O. Box 42152, Los Angeles, California 90042. Phone: 323-363-7226.

3317. Soy Happy! 2001. Veggie dog baseball cap (Memorabilia). Los Angeles, California.

• **Summary:** Johanna McCloy brought one of these handsome baseball caps to Soyfoods Center as a gift on 30 July 2002. This cap was first available in April 2001. Made in China, it was stitched (not patched) for high quality by The Wizard on Sunset Strip in Hollywood. The crown / top of the cap was dark green and the large bill was grayish-brown—like a baseball field. On the front center was stitched a golden brown veggie hot dog with a smiley face plus two arms and two legs, between two yellow buns, against the background of a white baseball with red stitched seams. On the back: [www.soyhappy.org](http://www.soyhappy.org), the campaign's website. A band in the back makes the cap adjustable. Initially she intended to sell the caps via her website, but when she saw that sales were slow, she increasingly used them for publicity by giving them to supportive organizations, individuals, and the media. A second cap was introduced in July 2002; the cap was lighter green and the bill was smaller. Address: P.O. Box 42152, Los Angeles, California 90042. Phone: 323-363-7226.

3318. Kanai, Atsuko. 2001. Working with Fuji Seiyu to introduce new Japanese-style frozen tofu products to the USA (Interview). *SoyaScan Notes*. June 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Fuji Seiyu is a Japanese oil milling company

that got interested in soy protein products in the 1970s. They have strong research on soy protein and on developing soy protein products, but they do not have strong marketing or distribution in the USA; that is Mutual Trading Company's forte. So Mutual began working with Fuji Seiyu to bring their ready-to-eat frozen tofu products to the USA, introducing them first to Japanese restaurants in Dec. 2000. Her concept was to sell "authentically Japanese" tofu products that were not easily replicated by American manufacturers. Fuji Seiyu has dozens of such products; Mutual is test marketing only a few. This is one of Mutual's priority food lines in 2001. Eventually Atsuko would like to get one or more of those items into large natural foods retailers.

Atsuko sends two leaflets which describe eleven products in this "Miyako Tofu Course Series." For each is given: A photo of the finished product, the item number, pack size, product name and description in English and in Japanese (*hiragana*), and price per case, pack, and serving. The following products are sold: (1) Fukkura Ogon Tofu: Golden fried tofu puff. (2) Veggie-Fish Tsutsumi: Tofu stuffed squares patty. (3) Gomoku Inari: Vegetable medley squares patty. (4) Yuba to Yasai no Cabbage Tsutsumi: Yuba and tofu stuffed cabbage. (5) Ajitsuke Inari: Inari sushi pocket. (6) Yawaraka Ganmo: Tofu vegetable patty. (7) Yuba Shumai: Yuba and tofu shumai. (8) Vegetable Kinchaku: Tofu vegetable pouch. (9) Koimo Kinchaku: Tofu taro pouch. (10) Shrimp Yubamaki: Tofu shrimp roll. (11) Vegetable Yubamaki: Tofu vegetable roll. Address: Mutual Trading Co., Inc., 431 Crocker St., Los Angeles, California 90013. Phone: (213) 626-9458.

3319. *SoyaScan Notes*. 2001. Hain Celestial Group Inc. of New York has just acquired Yves Veggie Cuisine (Vancouver, BC, Canada) (Overview). June 15. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Dana Jacobi read two days ago that Hain acquired Yves. Hain CEO Irwin Simon said Yves' offices would serve as Hain Celestial's new Canadian headquarters. See June 12 article in the *Globe & Mail* (Toronto, ONT, Canada). Yves is Canada's largest manufacturer of meat alternatives, but the majority of their sales are in the United States.

3320. Tofu Shop Specialty Foods, Inc. 2001. Wholesale price list. Arcata, California. 1 p. June 15. Front and back. 28 cm.

• **Summary:** Contents: Fresh tofu, water-pac tubs (firm nigari, regular calcium [sulfate], soft calcium). Fresh bulk tofu—institutional (firm nigari, regular calcium). Baked tofu—retail or institutional (marinated cutlets, sausage patties, Mexi patties, veggie patties). Smoked tofu—Smoked Stiks (original, BBQ, spicy). Fresh soymilk (natural, chocolate, ginger, vanilla). Tofu salad and spreads (eggless egg, basic everyday spread, garlic 'n dill everyday spread, sweet

pickled beet dip, hot habañero carrot dip, smoked tofu spread).

Accompanying this price list are the following new and colorful self-adhesive labels: Organic Tofu (Regular, Firm, or Soft). Soymilk (Vanilla or Chocolate). Tofu Shop: Fine tofu products. Crafted in small batches from whole, organic, GMO-free soybeans. Also the following numbered vegetarian "Favorite seasonal tofu recipes": 1. Wild mushroom and asparagus frittata. 2. Tofu egg foo young. 3. Tofu 'ricotta' salad. 4. Creamy miso vinaigrette (with tofu). 5. Hunan style tofu. 6. Tofu turkey with herbed bread stuffing. 7. Almond orange cake (one layer). 8. Tofu apple sausage. Address: 65 Frank Martin Court, Arcata, California 95521. Phone: 707-822-7401.

3321. *Bild am Sonntag (Germany)*. 2001. Aufsteiger Soja: Jetzt steckt die Bohne schon in Wurst, Schinken, Aufstrich und Desserts [Social climber soya: It is now found in sausages, ham, spreads and desserts]. June 24. p. 38. [3 ref. Ger]

• **Summary:** This is the Sunday edition of the German photo tabloid "Bild." A photo shows 15 different food products in which soy (usually soy protein isolates) are found. One sidebar is titled: "Tastes delicious and goes fast: Tofu burger with tomato relish." A second titled "Recipes and many tips" introduces the cookbook *Soja, Tofu & Co.*, by Ingrid Schlieske.

3322. *EarthSave Magazine (Santa Cruz, California)*. 2001. Take me out to the ball game! (and give me a soy dog with everything) [The Soy Happy campaign, organized by Johanna McCloy]. Spring. p. 7.

• **Summary:** The "Soy Happy" campaign is asking Major League Baseball stadiums to add a veggie dog to their mainstream menu. "The Chicago White Sox responded to the campaign by adding a veggie dog last year. The Norfolk Tides offer a veggie dog, too. Recently, the Seattle Mariners and University of Arizona Wildcats have joined the bandwagon. Other teams are beginning to take notice."

A portrait photo shows Johanna McCloy, campaign organizer.

3323. Kilburn, Roger. 2001. New home for Harvest Direct products (News release). Knoxville, Tennessee: Harvest Direct. 1 p. 28 cm.

• **Summary:** This news release to Harvest Direct friends and customers begins: "Effective on Monday morning, June 18, Harvest Direct products will have a new home: The Dixie Diners' Club, the home of Soy Health Food That Tastes Like Junk Food. Dixie has acquired Harvest Direct's products, and will begin producing, marketing, and selling them next week.

At the bottom of the release, in addition to J. Roger Kilburn, is: Robert A. Beeley, Chairman, Dixie USA Inc. At the top of the release is a box showing the three divisions of

Dixie USA Inc.: (1) Dixie Diners' Club; (2) Harvest Direct, and (3) Legumes Plus. Address: President, Harvest Direct, Inc., P.O. Box 50906, Knoxville, Tennessee 37950-0906.

3324. *Soyfoods Canada Newsletter*. 2001. Who is buying soyfoods in Canada? June. p. 3.

• **Summary:** In Sept. 2000 Flamaglo Food Consultants commissioned a study by Omnitel on the market for soy products. The study was basically a national telephone interview with 2,000 Canadians, randomly selected. The data was provided by Francis Lo.

Findings: Tofu was the most popular soy product; about 25% of the sample had tried it during the past 12 months. About 18% of the sample had tried soymilk and less than 7% had tried soy-based meatless patties or sausages. Only a small percentage had tried soy ice cream.

In general: About 40% of the sample had consumed one of the above four products in the last 12 months. Most current users live in metropolitan areas with a population over 500,000. The higher the person's income and/or the higher their income, the greater their use of soyfoods. Current users tend to be female.

3325. Tibbott, Seth. 2001. Update on Turtle Island (Interview). *SoyaScan Notes*. Aug. 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Seth's factory is 11,000 square feet in size and about half of it is devoted to tempeh production. However tempeh sales have been down about 5-10% over the past 6 months; this was a shock to Seth. Seth's gross revenues now consist of about 1/3 holiday business (Tofurky and related products at Thanksgiving, Christmas, and New Year's), 1/3 Tofurky products (such as Deli Slices and Jerky) during the rest of the year, and 1/3 tempeh. The problem is that the tempeh takes up lots of space. It doesn't take much space to make a lot of Tofurky.

Another problem: Why black spots sometimes appear on tempeh? Indonesian-Americans, who are an important market for Seth, often return tempeh on which black spots appear. They should be the first to know that a black spot does not mean spoilage. But they believe that good tempeh should always be white. We need an albino spore. Address: President and Founder, Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: (503) 386-7766.

3326. McCloy, Johanna. 2001. Work with veggie dogs and the Soy Happy! campaign (Interview). *SoyaScan Notes*. Sept. 17, and April 21, 2003. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Johanna (pronounced yo-HAN-nuh, after her Icelandic grandmother) spent much of her early life overseas, including Spain (7 years), India (2 years), Japan (Tokyo, 6 years from 1975 to 1981), and Venezuela (one year). She moved to the USA to attend Duke University (Durham,

North Carolina), and graduated with a degree in Comparative Area Studies and a minor in Anthropology. She speaks Spanish (her first language) and "manageable" Japanese. During the summer of 1985, she studied intensive Japanese at ICU (International Christian University) in Tokyo.

During her six years in Tokyo, Johanna got her first taste for acting; she performed in plays and landed roles in commercials, TV and movies. In 1989 she moved to Los Angeles after being accepted to Sanford Meisner's acting class. Much of her income is from acting and people recognize her from her role as Ensign Calloway in *Star Trek: The Next Generation*, or from her numerous commercials.

In 1989 she became a vegetarian, and in 1999 a vegan.

In about March 2000, while at a Dodgers Game in Los Angeles, when she realized there was nothing in the stadium for her to eat—nothing! So the next day she called the concession manager at the stadium. First she pointed out that no veggie hot dogs were available in the stadium, then added that she was very surprised to find at that, even among the five sandwiches at the Subway stand (Subway is a company known for offering vegetarian alternatives), there were no meatless subs. So asked him to consider having something vegetarian there. The guy said, that the issue of the veggie dogs was a long-term problem that he would be willing to discuss, but as for the meatless Subway sandwich, he would be glad to contact the stand and have it available next week. And the next week they were offering vegetarian food—just like that. Johanna realized that all she had to do was ask! Note: Not until June 2001 did Dodgers stadium started offering veggie dogs—one of the last 3-4 major league parks to do so.

For years, Johanna had been a member of PETA (People for the Ethical Treatment of Animals). In one of their newsletters from a previous year, PETA had suggested that readers who were baseball fans contact their local baseball park for menu information. So she called PETA, told them that she had just called her own ballpark, mentioned the previous newsletter about baseball parks, and asked PETA if they happened to have current menu information from baseball parks because she was curious to know if any of them presently sold veggie dogs—so she could tell her contact at Dodgers' stadium. They said they had a list, but it was very old and needed to be updated. She offered to call all the ballparks to update it if they would fax her a copy. The next day she was on the phone updating the list. She personally called the concession manager at every major league ballpark, introduced herself, encouraged them to start selling veggie dogs, then asked them what their vegetarian menu offerings were.

Then someone advised her to create a Website and post the updated list on it—so many people could access it quickly and easily. She had never dealt with the Internet before, but her e-mail provider helped her to set up a very simple home page. Soon she had posted the updated list on her site. Her

Venue Reference Guide contained, for every major league ballpark: Contact information, concession company, current veggie menu offerings, and where the vegetarian foods are located in the ballpark.

In May 2000 a story about her work with vegetarian foods at baseball parks appeared on Vegesource.com—the most popular vegetarian resource website on the Internet. Almost immediately, many people started to visit Johanna’s little Website—as shown by the counter on her home page—which soon hit 700 visitors. She also got a few e-mails and phone calls. Then, because of the great interest in this subject, Vegsource.com offered to host her Website. She soon came to value the power of the Internet. Her consumer advocacy campaign began to pick up steam. She e-mailed concession managers, told them of her activities and number of visitors, encouraged them to sell veggie dogs at baseball games, and offered to help them get started by putting them in touch with manufacturers so they could sample different brands. She explained that many vegetarian baseball fans, who now eat before to the game or bring their own food to the ballpark, were potential customers.

In April 2000 she single-handedly started the Soy Happy! campaign to get veggie hot dogs into major league ballparks. Since that time she has devoted herself so wholly to this, and became so completely immersed in the cause and the campaign, that she put her life—her quest for an income and a viable way of life—on “hold.”

The first major league ballpark to sell veggie dogs was the San Francisco Giants in about 1989. The product was a vegan hot dog made by Yves in Canada, but the Giants only sold them for about two years at a “Health Stand”—big mistake. Johanna has heard that the Giants did this because the concession manager’s daughter was a vegetarian and she was insistent; moreover her dad had had a heart problem that year, and as a result decided to try the meatless hot dogs.

The next team was the Norfolk Tides, a AAA baseball team in Virginia—largely due to the efforts of PETA, which is headquartered in Norfolk. PETA agreed to buy a billboard ad in the stadium if the team would sell veggie dogs there. The first major ballpark to accept her idea was the Chicago White Sox, starting in April 2000. She was surprised and delighted.

In April 2001 she had a video (8 minutes, color) made about the Soy Happy! It was set at the Genesis Awards program. She mailed a copy of the video, with a cover letter, to every major-league ballpark. At that time only one major league park was selling veggie dogs. In July 2001 she added an appendix to the video and announced that seven teams were now selling veggie dogs.

Also in April 2001 she developed and launched the Soy Happy! website which has been very instrumental in this campaign on EarthLink. Within a month, VegSource, the most frequently visited vegetarian site on the Internet, offered to host her website, make it even more professional, and pay expenses. Jeff Nelson of VegSource has been her

“godfather.” VegSource also hosts many other vegetarian and animal rights sites.

During the past year Johanna has met and worked with many concession managers at baseball parks. Most major league baseball teams have their own concession stands in addition to those they contract with to come into the ballpark. Johanna believes strongly that veggie dogs should be sold along with the other foods and not in some separate place, such as a “Health Stand.” Today they are sold at only a few stands and those are often on a test-run basis, usually not advertised, and often not conveniently located—a formula for failure. The place where Johanna has learned the most about concession food is at Dodgers’ stadium in Los Angeles. Their hot dog maker, Farmer John, is a major force at that stadium since it was first created in Los Angeles. Farmer John provides a large portion of the marketing expense and budget for the stadium through their sponsorship. On the back of every Dodger ticket sold is a Farmer John logo.

Since the Hain Celestial Group recently purchased Yves Veggie Cuisine (of Canada), a major source of veggie dogs, Johanna plans to reduce her work with Soy Happy! unless she can work as a paid consultant. However she plans to continue developing and maintaining the website. Acting is a possibility, but it hasn’t been her principal focus for a long time. So she is pondering her future, which may include a move to northern California. Her mother lives in Walnut Creek, and she is attracted to that part of the world. She likes to write and is considering writing a book about growing up overseas.

An essay about her path to becoming a vegetarian will appear in the book *Voices from the Garden* (Lantern Books, fall 2001). Address: P.O. Box 42152, Los Angeles, California 90042. Phone: 323-363-7226.

3327. Soy Happy! 2001. SoyHappy.org. Let’s get veggie dogs in major league ball parks (Website printout—part). www.soyhappy.org Printed Sept. 17.

• **Summary:** Contents: Home page. 1. About the campaign (5 p.). 2. Veggie dog info. 3. Ballpark reference guide. 4. Soy Happy news. 5. Caps and patches. 6. Founder bio. 7. Links. 8. Contact us.

Dates when ballparks started selling veggie dogs: Norfolk Tides (before April 2000). Chicago White Sox (April 2001). Seattle Mariners (April 2001). Florida Marlins (April 2001). Montreal Expos (April 2001). Oakland A’s (May 2001). Los Angeles Dodgers (June 2001). Toronto Blue Jays (June 2001). Most ballparks are selling Morningstar (Kellogg’s) Veggie Dogs—which are vegetarian but not vegan. The Los Angeles Dodgers and a few others are selling Yves Veggie Cuisine’s The Good Dog—which are vegan, kosher, and non-GMO, or Lightlife Foods’ veggie dogs.

On page 1 of the home page is a color photo of Johanna McCloy, the campaign’s founder. Address: P.O. Box 42152, Los Angeles, California 90042. Phone: 323-363-7226.

3328. Tepper, Robert. 2001. Starting Sunrise Brand Marketing Specialists in Jan. 2000. Roger Kilburn sold Harvest Direct to Dixie Diner in June 2001 (Interview). *SoyaScan Notes*. Sept. 27. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Robert started business at Sunrise Brand Marketing Specialists on 1 Jan. 2000. He started the company while still holding a job at Annie's Naturals. Technically the company was incorporated in Dec. 1999. His company started with three clients, including Harvest Direct and Good Health Natural Foods. Robert managed the sales and marketing for Harvest Direct for a little less than 18 months. He worked closely with Monty and Mary Ellen Kilburn as well as Roger; they are all great folks. Between Feb. 2000 and April 2001 Robert tripled the sales of Harvest Direct. He repackaged the products and got them into supermarket chains such as Vaughn's, Ralph's, Wegman's etc. with 6-10 SKUs (out of 17 sold by the company) in a typical chain. All the products were dry mixes. Harvest Direct's lead items into supers were soy-based pudding mixes. Roger also bought several products, including the Seitan Mix from Arrowhead Mills and the Solait brand in cans he bought from Devansoy (both very good sellers). The Taco, Bar-B-Q, and TVP Chicken Strips (the latter made in Israel; Robert's favorite product).

His 90-day contract was broken on 1 April 2001. No-one from Dixie Diner has ever called him or returned his calls. On 12 June 2001 Roger Kilburn announced the sale of his company (effective June 18) to Dixie Diner, who proceeded to manage it very poorly. Some of his brokers have dropped the line and a number of distributors have discontinued it. Harvest Direct is still alive but declining. Address: Founder, Sunrise Brand Marketing Specialists, L.L.C., 22 Wenonah Ave., Rockaway, New Jersey 07866. Phone: 973-983-7452.

3329. Turtle Island Foods, Inc. 2001. Tofurky cooking contest announced (Leaflet), P.O. Box 176, Hood River, OR 97301. 1 panel each side. Single sided. Black ink on white. 28 cm.

• **Summary:** "Hood River, Oregon—Turtle Island Foods, Inc. introduced today its National Tofurky Cooking Contest. The company is planning to sell over 100,000 Tofurky Roasts in the last quarter of 2001 and wants to hear about the different ways customers prepare them. The Tofurky Roast is a 26 oz. vegetarian entrée that serves 4 people. It consists of a Tofu-Wheat Protein outer layer that has a Turkey like taste and texture and is filled with a Wild Rice Bread Crumb stuffing. Traditionally sold in the natural foods marketplace, Tofurkys are now beginning to show up in chain supermarkets as well.

"Many Tofurkys are roasted alongside Turkeys during the Thanksgiving and Christmas holiday seasons and served to vegetarian dinner guests. Just as there are many different ways to prepare Turkey, Tofurky can also be substituted in

many meat-based recipes. The contest runs through April 5, 2002 when recipes will be sampled and a winner selected. First prize is a 5 day all expenses paid trip for two to Alaska Wildland Adventure's (alaska-wildland.com) award winning Eco-lodge on Alaska's Kenai Peninsula.

"Tofurky is available in many different forms. In addition to the holiday versions, Tofurky is also sold year round as Tofurky Deli Slices and as Tofurky Jurky. This year the company's products will be sold in the United Kingdom for the first time."

With this large leaflet is a smaller (10 x 15 cm) glossy color leaflet titled "Cook.... Win... Go!" On the front upper right is a photo of a prepared and carved Tofurky Roast. The rest is a photo of three people overlooking the Alaska Wilderness. On the rear is the cooking contest rules. Address: Hood River, Oregon.

3330. Gonzalez, Yvonne. 2001. Teaching a tofu class in Costa Rica (Interview). *SoyaScan Notes*. Oct. 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** While visiting Costa Rica with a devotee of the Indian guru, Ammachi, Yvonne was invited to teach a tofu class on Oct. 3 at the only public school in the small town of Puerto Viejo, on the Caribbean coast of Costa Rica. The class was a great success. Some of the 43 people who attended were Seventh-day Adventists.

Yvonne began her preparations the day before the class. Her friend, Gia, went to a farm named Earth, located in Limón province. One of the companies that grows organic soybeans in Costa Rica on a large scale, they export large amounts of the soybeans they grow. Gia purchased 100 kg of soybeans from them. Yvonne went to the nearby ocean, got a container full of seawater, filtered it, boiled it until only the solids remained, then used the solids as nigari to make tofu the next day. At Gia's home where she was staying, Yvonne made a batch of tofu and a batch of soymilk. She then used this tofu to make Tofu Ceviché (her favorite tofu recipe, where tofu takes the place of fish; it requires no cooking). She added freshly ground cacao beans to the soymilk to make chocolate soymilk. Then she used the okara in a stir-fried dish.

The next day, she made tofu and soymilk again for the class, using a two-burner electric stove and nigari from the ocean. While the little stove was heating the soymilk, she served the three dishes she had prepared the day before. Also Margo, a friend who flew down with Yvonne from Los Angeles, demonstrated (in both Spanish and English) how to sprout and grow soybeans. She grows them in her back yard in Los Angeles. Then Yvonne passed out (free of charge) one kg of soybeans to each of the 30 adults who took the class. The next day, at least four of these adults planted some of the soybeans in their back yards. "The ground is so fertile there that everything grows." They kept the rest for making tofu or cooking.

A number of important local people came to Yvonne's class. First was the mayor's wife. After the class "she wept with happiness—it was so beautiful." She knew what tofu was but she didn't know how to make it. She was so happy to learn that she could feed so many people for so little money using tofu made at their home or congregation. She and her family and many friends are vegetarian, so previously they had to drive 4 hours to the capital, San Jose, to buy their tofu. Of course they also had to pay for the gas and spend all that time.

Second was Carter, a Canadian man who owned the local health food store. Third was Michael, an advanced French chef who owned the local gourmet restaurant named Michael's—as well as a restaurant in Paris. These two businesses cater mostly to European and Canadian customers—who are predominantly vegetarian. These two men drive to San Jose, the capital, once every three weeks to buy tofu—and they often run out of it, as when the local electricity goes out. Fourth was a man who owns a Filipino-Chinese restaurant in town. He hadn't used tofu in any of his dishes because he didn't want to drive to San Jose to buy it. He bought a tofu kit from Yvonne and now he has started to make tofu.

Three people invented and prepared their own dishes at home and brought them to show Yvonne the day after the class. (1) A Costa Rican man of Jamaican descent made a delicious Jamaican hummus using cooked and blended whole soybeans rather than tofu. (2) Carter made his own soymilk, added finely grated coconut to it, then sold it as coconut soymilk shakes; it was delicious, without any added any sweetener. (3) Michael cooked and blended soybeans, then added some other ingredients to make a patty. He fried it then topped it with a creamy garlic sauce to make a "soy steak." He served it to Yvonne, along with other great food, at his restaurant.

Within one week, various people who attended Yvonne's class were selling organic soybeans and chocolate soymilk at the local farmers' market. Some men went to Earth, purchased 100 kg of organic soybeans, divided them up into 1-kg plastic bags, and began to sell them at the farmers' market. One of the ladies who took Yvonne's class (Rachel, an American who is a devotee of Ammachi and has lived in Puerto Viejo for 3 years) decided to make chocolate soymilk and sell it at the market.

In the capital, San Jose, organic soybeans retail for \$1.30/kg and wholesale for \$1.00. At least three companies make tofu there: Yohann, the well-known Japanese supermarket chain, makes it twice a week in their butcher shop. At least two Chinese markets in Chinatown make 10 kg maximum at least once a week. They sell some of at their markets (stored in cold water in a bucket) and the rest to local restaurants. People know which day each company makes tofu, so they can buy it fresh.

Many foreign tourists travel to Costa Rica. The Japanese

go for the deep-sea fish and the bird watching. The most expensive establishments in the capital (restaurants, hotels, the country club) are all owned by Japanese. The Europeans and Canadians go to surf and to party. They fall in love with the country and its virgin natural beauty.

Sam Zaoui, who wants to start a tofu shop in Costa Rica, is a Frenchman presently living in Miami Beach, Florida. A year ago he visited Costa Rica, fell in love with the country, and decided to move there and try to earn his living making tofu. He recently purchased the book *Tofu & Soymilk Production* from Soyfoods Center. William Shurtleff gave Yvonne's phone number to Sam. Sam was unable to locate a source of soybeans; he especially wanted organic soybeans. So Sam called Yvonne after she returned from Costa Rica and was delighted to learn that Earth First grows organic soybeans on a large scale in Costa Rica. Sam also owns a record company in Miami and manages a very popular "roots reggae" band named Johnny Dred; the musicians are Rastafarians who do not eat meat. So when they travel, Sam has to try to find tofu and vegetarian meals for them.

Note: During the last two decades, soyfoods have made major strides in the United States. But they have not begun to realize their great potential in developing countries—such as Costa Rica. Address: 6029 LaPrada St., Los Angeles, California 90042. Phone: 213-254-1712.

3331. *Nutrition Business Journal* (San Diego, California). 2001. Kellogg debuts heart-healthy cereal: Kellogg extends Kashi into functional area, adds organic breakfast patties, and tests healthy snack bar. 6(10):12. Oct.

• **Summary:** In mid-October the Kellogg Co. announced its deepened commitment to offering healthful food alternatives by a major change to its Worthington Foods' Natural Touch line of vegetarian entrees. The company says that all of its "top products" in the Natural Touch line just went organic.

Kellogg's Garden Veggie Pattie, Okara Pattie, Spicy Black Bean Burger, and new Breakfast Pattie will all be made with organic ingredients and will be in stores starting in January 2002.

Another big announcement by Kellogg is its formation of a multi-year alliance with the Walt Disney Corporation. "The deal gives Kellogg exclusive rights to develop and market co-branded Disney / Kellogg breakfast foods centered around Disney characters." Moreover, Kellogg has been named "official sponsor of breakfast" at Walt Disney World.

3332. Towns, Sharon; Towns, Daniel. eds. 2001. *Voices from the garden: Stories of becoming a vegetarian*. New York, NY: Lantern Books. 176 p. No index. 22 cm. [143 ref]

• **Summary:** Nearly fifty personal stories about why and how people became vegetarian or vegan. Together the stories describe all the good reasons for going veggie: Ethical (such as animal rights), health, and ecological concerns. Contents: Foreword by Howard Lyman. Preface by Ingrid Newkirk

**www.tofurky.com • 888-TOFURKY • www.tofurky.com • 888-TOFURKY**

**Tofurky Vegetarian Feast**  
 Tofurky is a pre-cooked vegetarian feast designed to be the delicious centerpiece of your holiday or everyday meal. Made from a revolutionary Tofu-Vital Wheat Gluten blend, Tofurky is known for its incredible, turkey like texture and flavor. Each Tofurky Feast contains One Stuffed Tofu Roast, Four Hearty Tempeh Drumettes, fourteen ounces of Tofurky "Giblet" Gravy and a set of "Wishstix" made from Tofurky Jerky. Tofurky Feasts feed 4 people, are 100% Vegan and taste fabulous!

**Tofurky Vegetarian Roast**  
 This is the same Roast found in the Complete Vegetarian Feast sold in separate packaging. Each Tofu Stuffed Roast is filled with Wild Rice-Bread Crumb Stuffing in the center. Bake and surround with vegetables for a filling, festive meal.

**Tofurky "Giblet" Gravy**  
 No meat products here! This delicious brown vegan gravy is chocked full of diced pieces of Tofurky. Makes a delicious meal when served over potatoes, pasta or of course, Tofurky!

**Tofurky Deli Slices**  
 Using the same great recipe as found in the Stuffed Tofurky Roast, these deli slices are simply the best on the market. Sliced extra thin, some vegetarians have sent these deli slices back to the restaurant's kitchen because they thought they were eating meat!

**Tofurky Jerky**  
 Tofurky Jerky is the first great tasting vegetarian jerky made in a real smokehouse. Smoked and dried to tasty perfection, Tofurky Jerky is a great snack on the trail, at work or lunches. Long distance hikers and mountain climbers tell us - "Tofurky Jerky is the one food we didn't get tired of!"

**Where can I buy these products?**  
 Our products are widely available in natural foods and grocery stores throughout the world. You may also purchase some of our products direct via mail order. For a list of retail outlets or to order online go to [www.tofurky.com](http://www.tofurky.com) or call toll free 888-TOFURKY (888-863-8759) for more information.

**100% Vegan**

**TEMPEH - The Other White Bean**  
 Tempeh is an ethnic soy product from Indonesia, where it has been a staple protein for centuries. A fermented product, tempeh consists of soybeans and grains knit together to form a fragrant, tasty cake. Rich in cholesterol free vegetarian protein, isoflavones and fiber, tempeh has a great nutritional profile for those looking for alternatives to meat. We use certified organic beans and grains along with our own special processes developed over the last 20 years to make a premium tempeh judged the "Best this side of Bali" by our Indonesian customers!  
**Cookbook Offer:** Savor more than 100 tempeh recipes by ordering The Tempeh Cookbook by Dorothy Bates for \$8.95 postpaid. Send check or money order to Cookbook POB 176/Hood River, OR 97031 USA.

**SuperBurgers**  
 SuperBurgers are gourmet tempeh patties made from certified organic soybeans and grains marinated in a variety of sauces to create a unique, juicy vegetarian burger. Perfect on the grill or microwaved, SuperBurgers make a healthy and hearty meal.

**"I am constantly trying to replace the delicious meat flavors of my youth, minus the cruelty and killing. Your Tofurky Slices were just like the turkey sandwiches I remember! The consistency is so real it's uncanny and none of the flavors seem artificial like so many similar products."**

3334. United Soybean Board. 2001. National report 2001-2002: Consumer attitudes about nutrition. Seattle, Washington. 8 p. Oct. 28 cm.

• **Summary:** This eighth annual nationwide survey, commissioned by USB, was conducted in July 2001 by an independent research firm in Seattle, Washington. Random

telephone interviews were completed with 800 consumers. The study's margin of error is  $\pm 3.5$  percent and has a confidence level of 95%.

Contents: Consumer perceptions of cooking oils. Nutritional concern and habits. Consumer awareness of nutrition terms and information. Consumers on soyfoods and health: Awareness that soy reduces risk of heart disease, where consumers get information on soy and health. Consumers consumption of soyfoods. Media sources and nutritional information. Consumer attitudes about *trans* fatty acids. Consumer perception and knowledge of organic foods. Consumer perceptions of genetically modified food, political and activist organizations, and price increases for labeled foods.

Awareness that soy reduces risk of heart disease: 28% in 1999, 35% in 2000, 39% in 2001.

Percentage of consumers who have tried various soyfoods in 2000/2001: Tofu 45%/45%. Soy veggie burgers 41%/40%. Soymilk 25%/28%. Soy nuts 14%/20%. Soy protein bars 11%/18%.

Percentage of Americans that consume soyfoods weekly: 24% in 1999, 27% in 2000, and 27% in 2001. And 42% of Americans consume soyfoods once a month or more.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at [www.soyconnection.com/health\\_nutrition/pdf/](http://www.soyconnection.com/health_nutrition/pdf/).

3335. Watanabe, Koichi. 2001. Re: History of La Soyarie Inc. and list of current products. Letter to William Shurtleff at Soyfoods Center, Nov. 7. 5 p. Typed, with signature on letterhead. [Eng; Fre]

• **Summary:** Each page, except the cover letter, has a color heading and is written in two columns, the left one in French, the right one in English. "About us: La Soyarie produces many food products with soya: Tofu (firm, regular, silk), Tofu burger, Soy Nuts, Tofu Nuggets, Vegetarian Pate. We also distribute other products under the following brand names: Yves Veggie Cuisine, Fontaine Sante Foods Ltd., Nutrisoya, Noble Bean. Address, phone, and fax numbers." Mme. Jeanne d'Arc d'Astous is chief administrator.

"Company history: From very modest beginnings, La Soyarie produced its first Tofu in 1978, right in our founder's [Koichi Watanabe's] home kitchen. This product was supplied only to small local health food stores and friends.

"In 1979, we moved into our first real production facility at 25 St. Etienne St., Hull (Quebec). During this period, our production consisted of only 7 batches of tofu a week. Our company had 20 customers, and produced bulk tofu blocks for total sales of \$1600 a week.

"La Soyarie was incorporated on the 31<sup>st</sup> of March, 1982.

"In 1823, La Soyarie Inc. launched new product lines derived from traditional Japanese recipes, and made with tofu: the burgers and nuggets.

"On October, 1st, 1989, the business and offices moved to a brand new location, with 6000 square feet, at 94 Adrien-Robert St. in Hull. From then, the company began to prosper and grow rapidly. We now own the building and use all of its space that is 12000 square feet.

"Today, La Soyarie contracts 13 distributors that serve the regions of Montreal, Quebec and Toronto. We sell to some supermarkets chains and we supply 'Fontaine Sante Foods Ltd', on a weekly basis, for them to make their tofu based products.

"We serve more than 70 other businesses in the Ottawa region: Supermarkets, natural food stores, and some restaurants.

"We use more than 400,000 kg of organically grown Canadian soya beans per year.

"We currently employ 24 persons.

"The name for our company, 'La Soyarie' was selected from the entries in a 'name the business' contest. The winner received a year's supply of tofu.

"The logo represents a soya leaf."

A 1-page list of products shows that the company makes the following: Tofu-Regular water pack, 500 gm. Tofu-Regular vacuum pack, 454 gm. Tofu-Herb vacuum pack, 454 gm. Tofu-Vegetable vacuum pack, 454 gm. Tofu-Silk water pack, 500 gm. Tofu burger fried 300 gm. Miso burger fried 300 gm. Teriyaki burger fried 300 gm. Ganmo burger fried 300 gm. Tofu burger baked 280 gm. Miso burger baked 280 gm. Teriyaki burger baked 280 gm. Ganmo burger baked 280 gm. Imperial burger 150 gm. Oriental burger 150 gm. Nut burger 300 gm (no soya). Pinto burger 300 gm (no soya). Regular tofu nuggets 150 gm. BBQ tofu nuggets 150 gm. Soynuts 250 gm (regular, BBQ, plain, no salt). Tofu cutlets (150 gm, or 300 gm). Vege pate 220 gm (yeast free, no soya).

Note: This is the English-language document seen (Nov. 2014) that contains the term "Ganmo burger" (or "Ganmo burgers"). Address: President & plant manager, 94 Adrien-Robert St., Hull, Quebec, Canada J8Y 3S2. Phone: (819) 777-6716.

3336. Golbitz, Peter. 2001. Soyfoods sales experience strong growth in 2000. *Bluebook Update (Bar Harbor, Maine)* 8(2):1-2. Fall.

• **Summary:** A new report, titled "Soyfoods: The U.S. Market 2001," by SPINS and Soyatech, Inc., in association with Arthur D. Little, Inc., gives data for the year 2000. It shows that the category grew by 21.1% to reach \$2.77 billion during the year 2000; sales are projected to grow by 15-25% during the year 2001. Since 1995, dollar volume for the category has grown 250%, with double-digit increases every year. The top five soyfoods categories, accounting for 86.5% of total U.S. soyfoods sales, were: (1) Meal replacement beverages and powders. (2) Energy bars. (3) Soymilk. (4) Meat alternatives. (5) Tofu.

New trends: (1) Consumers are now buying more

soyfoods products at supermarkets and other mass-market stores than at any other channel; sales here grew more than 30% in 2000. Refrigerated soymilk sales grew more than 500% during 2000, reflecting their new positioning in the dairy case next to dairy milk.

For more information on the report contact SPINS at phone 415-957-4410.

3337. Hain Celestial Group, Inc. (The). 2001. Annual report 2001. Melville, New York. 36 p. Nov. 28 cm.

• **Summary:** Net sales for the year ended 30 June 2001 were \$412.880 million, up 2.3% from \$403.543 million in 2000. Net income in 2001 was \$23.589 million, way up from a loss of \$17.097 million in 2000, and 74.5% higher than the previous net income high of \$13.517 million reached in 1999.

The company now markets 26 brands with over 1,500 different products. “We continue to bring new organic products to market, as well as foods and snacks free of genetically engineered ingredients (GEIs).

In June 2001 the company acquired Yves Veggie Cuisine in Vancouver, BC, Canada. This gives Hain a strong base for growing its Canada operations. Yves has been extremely successful in Canada and the U.S. with its refrigerated meat and cheese alternatives. Hain will soon launch many of its U.S. products under the Yves brand in Canada, and also introduce many new product categories (p. 2).

“Soy beverages continue to be the largest natural food grocery category, and Westsoy has increased its #1 leadership position in aseptic products by growing 9.5% in the last 12 months in the grocery channel alone. This has been at the expense of both long-standing competitors and new entrants... Westsoy expanded to new beverage varieties including soy-based shakes and smoothies, and new refrigerated Westsoy is gaining in both distribution and sales velocity. We now also have the distribution network in place to aggressively support and merchandise the refrigerated section of natural food stores and supermarkets” (p. 3).

Photos show: (1) Westsoy, all natural soymilk beverages (p. 12-13). (2) Yves all natural soy protein products, incl. Veggie Bologna Slices, Veggie Ground Round, Good Slice (cheese alternative), Good Dog (hot dog alternatives), and Canadian Veggie Bacon. (p. 14-15). Yves “continues to lead the North American fresh meat alternative category with exceptional growth in both U.S. and Canadian fiscal markets in fiscal 2001. Yves led category growth with the introduction of new ‘Great Tasting’ products... Using Yves’ strong brand name and distribution network in Canada, we will roll out over 70 new products in the Canadian market in fiscal 2002.”

Accompanying the annual report is a “Notice of Annual Meeting of Stockholders and Proxy Statement” (17 p.). Irwin Simon, the founder and CEO, age 43, had the following annual compensation: Salary: \$460,000. Bonus: NA. Other

compensation: \$5,400. Andrew Jacobson, president of the company’s Natural Products Group, earned a salary of \$247,500. A color photo (p. 2) shows Irwin Simon pushing a shopping cart filled with Hain-Celestial products. Address: 58 South Service Road, Melville, New York 11747. Phone: 516-237-6200.

3338. Weed, Susun S. 2001. *New menopausal years: The wise woman way*. Woodstock, New York: Ash Tree Publishing. xxiii + 280 p. Dec. Illust. Index. 22 cm. [102\* ref]

• **Summary:** Soy is discussed throughout this book but sources are rarely cited. When they are cited, we insert them below. For heavy bleeding (flooding) during the menopausal years: To nourish and tonify, avoid tofu, soy drinks, and soy protein powders (p. 9-10). For uterine fibroids: Consume lignans, which are anti-estrogenic phytoestrogens, found in all whole grains and beans—including soy (p. 15). Building better bones: Exercise regularly, eat calcium-rich foods, and avoid calcium-leaching foods such as soy “milk,” tofu, coffee, alcohol, and white flour products (p. 24). Calcium: Caution—“Unfermented soy (e.g. tofu) is especially detrimental to bone health being protein-rich, naturally deficient in calcium, and a calcium antagonist to boot (p. 28). Beware of calcium antagonists, foods that interfere with calcium utilization. Avoid consistent use of unfermented soy products, including tofu, soy beverages, and soy burgers (p. 29; see p. 163).

Phytosterolic, phytoestrogenic foods: Whole grains and beans are good sources. “Caution: Beans must be cooked or fermented to remove anti-nutritional substances. Tofu and soy ‘milk’ are not recommended” (p. 70).

Red clover has ten times more phytoestrogens than soy, as well as much more bone-building minerals, such as calcium and magnesium (p. 71). Sea vegetables are second only to flax in concentration of lignans. Seaweeds, not soy, are the real secret of health in the Japanese diet (p. 72). “The phytoestrogens in *dong quai*, like those in soy, promote the growth of cancer cells in petri dishes” (p. 73). Phytoestrogenic herbs: Fermented soy products (miso, tamari, tempeh), ground flax seeds, whole grains, etc. are rich in hormonal precursors and phytoestrogens. Use daily to ease menopausal symptoms, prevent cancer, and lower heart disease risk (p. 94). Lack of vitamin B-12 doubles the risk of severe depression for older women; tofu and soy beverages interfere with its absorption (Fallon 1999) (p. 114).

Preventing breast cancer: 75% of all breast cancers occur in women over age 50. Reduce use of seed oils, such as soy oil. For each 5 gm of polyunsaturated fat (from vegetable oils), risk of breast cancer rose by 70% (Wolk 1997 [sic, 1998]) (p. 145). Eat more beans: “There is a relationship between the large amount of *fermented* soy products (miso and tamari) in the Japanese diet and low incidence of breast cancer. But no relationship has ever been shown between

the consumption of processed, fake, imitation soy foods, and breast cancer reduction. Soy beverage is used moderately, or not at all, depending on the specific Asian country” (p. 146).

**Herbal allies:** Red clover is everything you thought soy would be with none of soy’s drawbacks. It contributes to bone health, normalizes the thyroid, and prevents and counters breast cancer. “So do miso and tamari, but not other soy foods. Red clover contains more active phytoestrogens in greater quantity than soy... Red clover contains all four of the major estrogenic isoflavones; soy has only two of them. A cup of red clover infusion (not tea) contains ten times more phytoestrogens than a cup of soy beverage, is richer in calcium, has less calories, and contains no added sugars” (p. 161).

The section titled “Soy” (p. 163-64) praises fermented soy foods (miso, tamari, tempeh, natto) but is quite critical of tofu, soy milk, and “fake soy foods” (burgers, hot dogs, soy cheese, etc.). Soy can reduce hot flashes and prevent heart disease; fermented soy foods can protect against breast cancer. Soy is not a good source of calcium and it is deficient in fats needed for healthy brain/memory functioning. “Soy protein isolate, textured vegetable protein, isolated isoflavones—processed soy foods come in more forms than I can list. I eat miso and tamari freely, tofu and tempeh occasionally, and other soy products not at all. Dosage: 50-200 grams of isoflavones per day, preferably from food. Caution: Excess soy can cause liver damage and is said to feminize men. Soy may be difficult to digest, may cause allergic reactions.”

**Interstitial cystitis:** Tofu may cause problems (Ford 1999).

**Heart healthy:** Soy, whole grains, vitamin E (from foods), essential fatty acids, and seaweeds are helpful (p. 210).

**Osteoporosis risk factors:** Being a vegetarian or vegan who eats a lot of tofu or soy beverage (p. 218). “Eliminate soy products except tamari and miso. (Unfermented soy prevents you from utilizing calcium.)” (p. 220).

**Aching joints:** A tofu poultice may help (p. 229).

**Vitamins and minerals for the menopausal years:** Vitamin B-12, calcium, and iron are depleted by unfermented soy products (p. 248, 250-51).

**Note:** The author does not cite a single scientific publication to support her many criticisms of soyfoods. In fact, the scientific literature does not support her criticisms. It is well known that the author is an admirer of Sally Fallon. Address: P.O. Box 64, Woodstock, New York 12498-0064.

3339. **Product Name:** [Tempeh Bacon].

**Foreign Name:** Tempeh Bacon.

**Manufacturer’s Name:** De Hobbit.

**Manufacturer’s Address:** Nijverheidslaan 7, 9980 Maldegem, Belgium. Phone: 050 71 70 20. Food for Freedom makes.

**Date of Introduction:** 2001.

**Ingredients:** Tempeh\*, cornsyrup\*, shoyu\*, sea salt, yeast extract, cane sugar\*, spices\*, red fermented rice.

**Wt/Vol., Packaging, Price:** 120 gm.

**How Stored:** Refrigerated, 10 weeks shelf life.

**New Product–Documentation:** Form filled out by Mr. Frederik Dossche and two leaflets sent by fax. 2001. June 7. Food for Freedom and De Hobbit seem to have merged. Both make tempeh at: Nijverheidslaan 7, 9980 Maldegem, Belgium. Phone: 050 71 70 20. De Hobbit makes Tempeh, Smoked Tempeh, and Tempeh Bacon. Leaflet index card. De Hobbit. Product cluster: Tempeh. A photo shows Tempeh bacon. “Description: The vegetarian alternative for ordinary bacon. How to use: Fry golden brown on both sides or can be prepared like regular bacon, with cheese, eggs, etc., but very healthy.”

3340. Frost & Sullivan Inc. 2001. U.S. soy-based meat alternatives market. New York, NY: F&S. \*

• **Summary:** Contents: Market overview. Overview and definitions. Market drivers. Market restraints. Challenges. Forecasts and trends. Revenue forecasts. Demand analysis. Market and technology trends. Pricing trends. Competitive analysis. Competitive structure. Market share analysis. Product analysis. Recommendations and evaluation. Meat analogs market. Tofu market. Tempeh market.

3341. **Product Name:** Zenzo Organic Burger Patties.

**Manufacturer’s Name:** The Organic Soy Company, Ltd.

**Manufacturer’s Address:** Unit A, 2 Corban Ave., Henderson, Waitakere City, Auckland 0612, New Zealand.

**Date of Introduction:** 2001.

**Ingredients:** Certified organic ingredients: Soybeans, onions, palm kernel shortening, rice flour, pea flour, sugar, salt, spices, nigari.

**Wt/Vol., Packaging, Price:** 220 gm, vacuum packed inside paperboard box. 4 x vegetarian patties.

**How Stored:** Refrigerate at 4°C or less.

**New Product–Documentation:** Label sent by Elizabeth Chalmers, owner. 2007. Jan. 22. The product was introduced by this company in 2001, but it was first sold in this paperboard box in 2006. They started using the Zenzo brand name (for second generation soy products) in 2002. 4 by 4 by 1½ inches. Color photo of waves, surf, and ocean under a blue sky, beyond sand, green grass and a few yellow flowers, on a green background. Superb label design. Certified Organic logo. On side panel: “Consume within 24 hours once opened. Can be frozen.” On one side is a list, with each item followed by a white box inside of which is a red check (= yes): Vegetarian. Vegan. Dairy free. Gluten free. Cholesterol free. Certified organic. High protein. High energy.

3342. Berkoff, Nancy. 2001. Vegan meals for one or two: Your own personal recipes. Baltimore, Maryland: The

Vegetarian Resource Group. 216 p. Illust. Index by subject. Index to recipes. Index by major ingredients. 23 cm.

• **Summary:** Contents: It's all about you. Meal planning and shopping. Breakfast. One-pot wonders. Freeze or refrigerate now, eat later. Grab-and-go. Desserts and snacks. Every day and special day cooking. Glossary: Definitions of vegan products and details of less common cooking, measurements, soy substitutes. Resources from the Vegetarian Resource Group. Address: R.D.

3343. Breier, Davida Gypsy; Mangels, Reed. comps. 2001. Vegetarian & vegan FAQ: Answers to your frequently asked questions. Baltimore, Maryland: The Vegetarian Resource Group. 272 p. Illust. Index. 23 cm. [69 ref]

• **Summary:** Contents: 1. Most frequently asked questions (incl. How many people are vegetarian? Detailed results of polls conducted in 1994, 1997, 2000). 2. Vegetarianism in daily life (incl. How do you pronounce "vegan?" Ans: VEE-gun. Who are some famous vegetarians? What is the history of vegetarianism?). 3. Nutrition (incl. I need impartial, major scientific studies that show a correlation between a vegetarian diet and disease prevention? Gas caused by eating soy). 4. Food ingredients (incl. Soy cheeses, soy lecithin). 5. Recipes (incl. many recipes for tofu, tempeh, soy whipped cream, chocolate pudding with soymilk, soy yogurt, wheat gluten / seitan, TVP). 6. Vegetarian products (incl. What is seitan? Where can I buy seitan? What is tempeh? What is TVP? Where can I buy TVP? What is tofu? What do I do with it? Alternatives to dairy products. Vegan eggnog. Soy candles). 7. Cooking and baking (Tofu, draining tofu, tofu cream cheese, Tofutti). 8. Travel and restaurants. 9. Veggie kids (Soy-based infant formula. Phytoestrogens in and safety of soy infant formula). 10. Soy (p. 168-76; contains good, balanced responses to the anti-soy articles by Fallon and Enig, p. 173-76). 11. Vegan concerns. 12. Unique questions. 13. Questions about VRG. 14. Appendix: Quick guide to fast food. Quick guide to helpful websites. Protein content of selected vegan foods. Calcium content of selected vegan foods. Iron content of selected vegan foods. Daily values. A senior's guide to good nutrition. Eat better, perform better, sports nutrition guidelines for the vegetarian. Why is wine so fined? Handy guide to food ingredients. List of suggested reading: Vegetarian cookbooks, vegetarian families, vegetarian travel. School foods information. Feeding plans for infants and toddlers. VRG publications, resources, and tabling materials.

Soy-related questions and answers outside of Chapter 10: Gas and bloating after eating soy (p. 64). Casein found in many soy cheeses (p. 80). Soy lecithin (p. 85). Recipes: Tofu dill dip (p. 88). Spinach pie (with tofu, p. 93). Tempeh stuffed potatoes (p. 94-95). Spicy sautéed tofu with peas (p. 98). Quick sloppy joes (with tempeh, p. 98). Sweet potato slaw (with tofu). Tofu balls (p. 100). Pad Thai (p. 102-03). Davida's spicy garlic noodles and tofu (p. 105). Soy whipped

cream (with soymilk, p. 106-07). Chocolate pudding (with soymilk, p. 107). Heavenly chocolate cupcakes (with soymilk, p. 109). Tofu cheesecake (p. 112). Homemade soymilk, rice milk, almond milk (p. 115). Homemade tofu (p. 115). Tofu recipes on the Web (p. 116). Homemade soy yogurt (p. 116). Homemade wheat gluten & seitan (p. 116). What is tempeh? What is TVP (p. 119). Vegetarian mince or meatless ground beef (p. 120-21). vegetarian and soy cheeses (p. 121). Tofurky (meatless turkey, p. 122-23). Tofutti (non-dairy soy ice cream) and vegan eggnog (p. 125). Soy-based vegan candles (p. 126). Using tofu (p. 129-31). Tofu cream cheese (p. 131). Soymilk and soy creamer (p. 132). Soy buttermilk and soy mayonnaise (p. 133). Feeding an infant with soy formula (p. 154). Are the phytoestrogens in soy formula safe? (p. 155). Helping kinds to switch to soymilk from cow's milk (p. 156). Address: 1. Baltimore, Maryland; 2. R.D.

3344. Hayter, Kurumi. 2001. The soy for health cookbook: Recipes with style and taste. Alexandria, Virginia: Time-Life Books. 144 p. Illust. (color). Index. 25 x 19 cm.

• **Summary:** This is a beautiful and strange book, designed and produced by Quintet Publishing Ltd. (London). Beautiful in that almost every other page is a stylish full-color photo of a recipe. Strange in that: (1) Tofu is probably the most common soy ingredient used, yet it does not even appear in the index. Nor does tempeh which is also called for. Yet miso is in the index. (2) A number of the soyfood terms are bizarre and unconventional—such as "beancurd pouches" [abura-age or deep-fried tofu pouches], "sticky beans (natto)." (3) On the inside front cover, the book's title is given as "The Tofu for Health Cookbook."

Contents: Introduction: Nutrition and health, lactose (dairy intolerance), prevention against heart disease, prevention against cancer, prevention of other disorders. How to use this book. Glossary of soyfoods and other ingredients. Basic recipes. 1. Soups and stews. 2. Salads and appetizers. 3. Main dishes. 4. Snacks and side dishes. 5. Desserts.

This book is not vegetarian; some recipes call for beef, pork, chicken, fish, etc.—but none call for dairy products.

3345. Hsiung, Deh-Ta; Simonds, Nina. 2001. Food of China. Sydney, NSW, Australia: Bay Books, an imprint of Murdoch Books Pty Ltd. 296 p. Illust. (color photos by Jason Lowe). Index. 31 cm. [25 ref]

• **Summary:** A gorgeous book with many fine color photos on glossy paper. One section titled "Tofu" (p. 184-91) has recipes for: Braised tofu with Chinese mushrooms. Fermented tofu with Asian greens. Ma Po tofu ("A quintessential Sichuanese dish). Braised tofu. Soft tofu with chilli and spring onion.

The next section, titled "Soy" (p. 192-95) discusses: Introduction. Soy sauce. Tofu. Tofu products: Fermented

tofu, mouldy tofu, tofu skin [yuba]. Recipes: Northern-style tofu. Stuffed tofu. Stir-fried tofu in yellow bean sauce. Braised gluten. Mock duck (made with gluten). Buddha's delight (vegetarian, with gluten and tofu). Bean sprouts stir-fry ("Bean sprouts can mean either soya bean sprouts or mung bean sprouts and both are used in this recipe. Soya bean sprouts are slightly bigger and more robust for cooking, as well as being more commonly found in China").

Fermented tofu is mentioned on pages 9, 164 (1 tablespoon red fermented tofu), 167, 193. More soy recipes: Tofu rolls (with yuba. An alternative to spring rolls, often served as dim sum, p. 35). Salted soya bean pods ([green vegetable soybeans], p. 53). Tofu and spinach soup (p. 60). Hot-and-sour soup (with tofu, p. 68). Steamed mussels with black bean sauce (p. 76). Clams in yellow bean sauce (p. 76). Scallops with black bean sauce (p. 114). Soy chicken (with dark soy sauce, p. 140). Shanghai soy duck (similar to Cantonese soy chicken, with light soy sauce and dark soy sauce, p. 148). Beef with capsicum and black bean sauce (p. 172). Stuffed bitter melon in black bean sauce (p. 219). Chinese broccoli with soy sauce (p. 220). Soy and vinegar dipping sauce (p. 282). Soy, vinegar and chilli dipping sauce (p. 282). Soy, chilli and sesame dipping sauce (p. 282).

Contains a good glossary of Chinese food and cooking (p. 288-91) which includes entries for: Bean sprouts (incl. soya bean sprouts). Chilli bean paste: Substitute Hot or Sichuan bean pastes. Fermented tofu, which is sometimes called "preserved tofu or tofu cheese and is used as a condiment or flavoring." Hoisin sauce. Master sauce (incl. soy sauce). Salted, fermented black beans. Soy sauce. Soya beans (fresh, "cooked in their fuzzy pods and served as a snack." Or dried, yellow or black). Tofu (called *doufu* in China). Tofu puffs ("Deep-fried squares of tofu, crispy on the outside and spongy in the middle." Can be frozen). Tofu skins [yuba]. Yellow bean sauce (It is actually brown in color).

Photos show: Kung Wo Bean Curd factory in Hong Kong. A soy sauce factory and its canned "Premium Soy Sauce."

3346. Ishige, Naomichi. 2001. The history and culture of Japanese food. London, New York, Bahrain: Kegan Paul. x + 273 p. Illust. Maps. No index. 24 cm. [59 ref. Eng]

• **Summary:** This book is crippled by the lack of an index. Moreover, the sources of most of the interesting material in the text are not cited. Otherwise it is very well researched and well written.

Contents: Introduction–The historical framework. Part I: The dietary history of Japan. 1. The prehistoric era: The Paleolithic age, the advent of earthenware, Jōmon society and dietary culture. 2. Establishment of a rice-growing society: A crop held in special regard, the dissemination and development of rice, rice cooking, sake brewing, fermented fish and flavourings. 3. The formative period of

Japanese dietary culture: Historical setting, the taboo on meat eating, the lack of a dairy industry, annual observances and rites of passage, place settings and table settings, cooking and banquet styles, the roles of the monasteries, the popularization of noodles.

4. The age of change: Historical setting, the diffusion of tea, the impact of the 'Southern Barbarians' (*nanban*; first came the Portuguese and Spaniards, Catholics from Iberia, then the Dutch and English, Protestants from northwest Europe called *kômōjin* {"redheads"} to distinguish them from the Iberians, Saint Francis Xavier, introduction of meat eating {beef} by Catholics by 1557 in the town of Oita in northwest Kyushu, expansion of meat eating by non-Christians in Nagasaki and Hirado island {northeast Kyushu}, in 1612 Christianity and meat eating are prohibited by the Tokugawa shogunate but the Chinese colony in Nagasaki is exempted, Dutch traders are the only Europeans allowed to remain in Japan after the country is closed but they are isolated on a tiny island in Nagasaki harbor and barred from contact with ordinary citizens, dishes with nanban influence include fried tofu patties {called *ganmodoki* in the east of Japan, or *hirōsu* or *hiryōzu* in the west}, tempura, nanban confectionary {such as *kasutera*} is especially popular, introduction of new crops by Europeans {incl. sweet potato, two types of pumpkin squash, cayenne pepper, kidney beans, peanuts}), formation of a new style (banquet-style meals {*honzen ryōri*}, *kaiseki*), change in the frequency of meals (from two to three).

Note 1. This is the earliest (and only) English-language document seen (April 2013) that contains the word *hirōso*; it refers to Kyoto-style deep-fried tofu balls.

5. The maturing of traditional Japanese cuisine: Historical setting town and country, the spread of soy sauce, the emergence of the restaurant, snack shops, books on cooking and restaurants, the Ainu, the Ryukyu Islanders. 6. Changes in the modern age: Historical setting, the resumption of meat eating, milk and dairy products, entry of foreign foods, zenith and nadir, new meal patterns, integration of foreign foods—a model.

Part II: The dietary culture of the Japanese. 7. At the table: Gohan—framework of the meal, the rise of the table, the tabletop as landscape, chopsticks and table manners, etiquette—as you like it. 8. In the kitchen: The secularization of fire and water, from wood fire to electric rice cooker, the knife—a sword in the kitchen, restaurants—the public kitchen. 9. On the menu: Soup and umami flavouring. Sashimi—Cuisine that isn't cooked, Sushi—from preserved food to fast food, sukiyaki and nabemono, tofu and nattō—meat for vegetarians, vegetarian temple food, tempura and oil, noodles and regional tastes, pickled and preserved seafood, mochi, confectionery and tea, the dynamics of sake and tea.

Teriyaki developed during the Edo / Tokugawa period (1600-1867) (p. 116; However no citation for the source of this information is given).

During the Edo period, most commoners living in Japan's cities ate plain and repetitive meals. In Edo (later Tokyo) most had a breakfast of rice, miso soup, and pickles; for lunch and dinner they ate approximately the same thing "with the addition of one dish of simmered vegetables or tofu, or simmered or grilled fish" (p. 113). Address: National Museum of Ethnology, Osaka, Japan.

3347. Robertson, Robin. 2001. *Vegetarian meat & potatoes cookbook*. Boston, Massachusetts: The Harvard Common Press. xii + 356 p. Illust. (by Paul Hoffman). Index. 23 cm. • **Summary:** Another outstanding book from Robin Robertson. From the front cover below the title: "275 hearty and healthy meat-free recipes for burgers, steaks, stews, chilis, casseroles, pot pies, curries, pizza, pasta, and other stick-to-your-ribs favorites."

The Introduction begins: "When I married him in 1971, my husband, Jon, was a 'meat and potatoes' kind of guy. He remains so today, even though he has been a vegetarian since 1986. The answer to this seeming paradox can be found in the pages of this book." Chapter 5, "Steaks, vegetarian style" (p. 123-63) is packed with "meaty" main dishes featuring seitan (home made), tempeh, tofu and yuba.

A half-page sidebar titled "All about tofu" (p. 140) gives a basic description and lists the different types.

Another sidebar titled "A brief bean bio" (p. 266) states: "The most useful and versatile bean of all is the soybean. For years, the soybean has been hailed as one of humanity's greatest nutritional treasures, because there are a number of high-protein foods derived from it, such as tofu, tempeh, and miso. Roasted soy 'nuts' and edamame, boiled fresh soybeans in the pod, are other delicious ways to enjoy soy... Beans and grains are like the 'meat and potatoes' of vegetarian cuisine. Add some steamed or stir-fried vegetables for a complete, well-balanced meal."

The word "tofu" appears on 84 pages of this book, "tamari" on 58 pages (she uses the fixed phrase "tamari or other soy sauce"), "soy sauce" on 50 pages, "seitan" on 41 pages, "tempeh" on 35 pages, "hoisin" on 15 pages, "teriyaki" on 8 pages, "yuba" on 9 pages, "soybeans" on 6 pages, "miso" on 5 pages, "soy yogurt" on 4 pages, "shoyu" on 1 page, "edamame" and "soybean" on 1 page each.

3348. Sabaté, Joan; Ratzin-Turner, Rosemary. ed. 2001. *Vegetarian nutrition*. Boca Raton, Florida: CRC Press. [xxiv] + 551 p. Index. 24 cm. CRC Series in Modern Nutrition. [1732 ref]

• **Summary:** The best scholarly book seen to date on this subject. Consists of a Prologue (by Mervyn Hardinge) plus 21 chapters, in five sections, by various authors.

This book contains extensive information on soyfoods as follows: Vitamin B-12, homocysteine, meat analogues and soya milks (p. 47). Summary of epidemiologic studies of soy / tofu intake and breast cancer risk (p. 80-81). Vegetarian

diets and soy in the prevention of osteoporosis, diabetes, and neurological disorders (p. 120-21, 125). Iron and soy (p. 202-03). Guidelines to achieve an optimal ratio of essential fatty acids in the diet (p. 203; soy is rich in  $\alpha$ -linolenic acid). Zinc, calcium and soy (p. 206). Women's reproductive function, menopausal symptoms, phytoestrogens and soy (p. 232-34, 244). Health advantages of a vegetarian diet for the elderly—and soy (p. 254-55). Vegan children, protein and soy (p. 302). Iron and soy (p. 304; "While the percentage of iron absorbed from soy may be low, the total amount of iron absorbed is adequate, because soy beans naturally contain relatively large amounts of iron" (p. 304-05)). Phytoestrogens and soy (p. 312-13). Macrobiotic diets (p. 313-15). Calcium and soy (p. 316). Vitamin B-12, miso and tempeh (p. 319-22). Iodine and soy (p. 323). Health-promoting phytochemicals beyond the traditional nutrients—soyfoods and isoflavones (p. 342-45; One table shows the isoflavone content (genistein, daidzein, and glycitein) of soybeans, roasted soyflour, roasted soynuts, TVP, tofu, tempeh, miso, and soy milk). Another shows the isoflavone content of commercial soy products by the weight of a typical serving, in descending order of isoflavone content (cooked soybeans, dry TVP, dry roasted soy nuts, tofu, soy flour, soy protein isolate, soymilk, SoyBoy Breakfast Links, soybean chips, tempeh, miso, soy cheese, Ice Bean [soy ice cream], Green Giant Harvest Burger, soy noodles, Tofutti [soy ice cream], soy sauce, soy oil). Protection against cancer and soy (p. 346-47). Help for menopause and bone loss (p. 347-48). Protective substances and soy foods (p. 397-98). Calcium fortified products such as soy (p. 421). Consuming a wide range of vegetable oils from intact plants—soy (p. 421). Developing a vegetarian food guide—Legumes, lentils and peas (p. 428-29; "Among legumes, the soybean possesses unique nutrient characteristics." Many food guides place soy beverages in the milk-dairy category). Table: Comparison criteria for evaluating soy and grain-based beverages (p. 430). The water efficiency of food production—and soy (p. 449; "The water intensity of animal production is much larger than the water intensity of crops. For instance, per gram dry weight, soybeans require about 0.75 liters of water" compared with about 20 liters for cattle). Note: Joan Sabaté is a man. The series editor is Ira Wolinsky, PhD, Univ. of Houston, Texas. Address: 1. Prof. of Chair, Dep. of Nutrition, and Prof. of Epidemiology, Loma Linda Univ., Loma Linda, California.

3349. Gardenburger, Inc. 2002. *Annual report 2001* (Form 10-K). 1411 Southwest Morrison St., Suite 400, Portland, OR 97205. 30 + 15 + 6 p. 28 cm.

• **Summary:** The annual report is largely a copy of the 10-K form submitted to the government. Net sales in 2001 were \$50,751,000, down from \$61,113,000 the previous year. Net income was a net loss of \$7,156,000 smaller than the loss of \$32,826,000 the previous year. Mr. Lyle Hubbard is

(fortunately) no longer with the company.

Accompanying the annual report is a notice of Annual Meeting of Shareholders and proxy statement (20 p.). The CEO and president is now Scott C. Wallace. His salary in 2001 was \$170,769 plus a bonus of \$42,500, compared with that of \$312,914 for Lyle Hubbard in 2000. A graph (p. 18) shows that the value of company's stock has fallen steadily since Sept. 1998 and dropped to almost nothing during 2001. Address: Portland, Oregon.

3350. Lightlife Foods, Inc. 2002. Winning consumers—one meal at a time (Brochure). Turners Falls, Massachusetts. 8 panels. Front and back. Each panel: 8½ by 11 inches.

• **Summary:** On the cover of this very informative and attractive full-color, glossy brochure is a photo of a young man in a green t-shirt seated in a chair, and a lovely young lady, seated near him on the table, with her left knee touching his left shoulder, dressed in pink, and holding a banana. A bowl of fruit is on the table and the mood is a happy one. Across the bottom: "Lightlife Foods family of meat-free alternatives."

Note. This is the earliest (and only) English-language document seen (Nov. 2014) that contains the term "meat-free alternatives" (regardless of capitalization or hyphenation). What, in fact, does this term actually mean? How is it different from the much more widely used "meat alternatives"?

When you open the brochure, the two facing pages are about breakfast, lunch, dinner and FDA food facts. The word "Soy" is written in soft gray background letters.

When you open the brochure again you see four color pages, each 8½ by 11 inches, with 8 Lightlife products on each page—for a total of 32 products. For each product is given: (1) The name of the product. (2) A small color photo of the front panel of the package. (3) Nutrition facts for that product. (4) The ingredients. (5) The UPC bar code.

On the back of this brochure is a full-page table giving more information about each of Lightlife's products: Retail product name, UPC numbers, depth, unit dimension width, height, units per case, gross case weight, length x width x height dimensions, cube, pallet pattern, cases per pallet, shelf life frozen (Del. Code Ref. / Frze.). The brochure is dated Jan. 2002 (The good influence of ConAgra!). "Visit [www.lightlife.com](http://www.lightlife.com) to download recipes for these, and many more delicious meals from Lightlife Foods." Address: 153 Industrial Blvd., Turners Falls, Massachusetts 01376. Phone: 1-800-Soy-Easy = 1-800-769-3279.

3351. Lightlife Foods, Inc. 2002. Good for you—good for all of us (Brochure). Turners Falls, Massachusetts. 4 panels. Front and back. Each panel: 8½ by 11 inches.

• **Summary:** On the cover of this very artistic and informative full-color, glossy brochure is a photo of a numerous young women and men doing tai chi on a

hardwood floor with yoga mats. Across the bottom: "Smart Menu family of frozen foods."

When you open the brochure, the left page is about breakfast, lunch, and dinner. Two tables show: (1) Top brands—Market share (for what we are not told): Lightlife 31%, Boca 22%, Yves 18%, Gardenburger 12%, Turtle Island 7%, White Wave 6%—for the 52 weeks ending Sept. 2001. (2) Velocity. The three columns are Brand, SPP \$, and SPP (U). The leading brand is Lightlife, \$1,494, 616. Followed by Yves, Boca, Gardenburger, Turtle Island, Franklin Farms, and Veggie Patch. The word "Soy" is written in soft gray background letters.

Note: SPP \$ (or \$ SPP) stands for dollar Sales Per Point of distribution. This is a product's "velocity" or "sales rate." SPP \$ is a good measure of an item's strength in a store or channel, as a high SPP \$ means that a SKU is selling quickly off the shelf. SPP (U) is similar except in units instead of dollars.

On the right page is information about Lightlife's 7 Smart products. For each product is given: (1) The name of the product. (2) A small color photo of the front panel of the package. (3) Nutrition facts for that product. (4) The ingredients. (5) The UPC bar code.

On the back of this brochure is a half-page table giving more information about each of Lightlife's Smart products: Retail product name, UPC numbers, depth, unit dimension width, height, units per case, gross case weight, length x width x height dimensions, cube, pallet pattern, cases per pallet, shelf life frozen (Del. Code Ref. / Frze.).

Below the table is a pie chart titled "Lightlife Foods—The market share leader in meat substitutes" [sic, alternatives]. The shares are: Lightlife 31%, Boca 22%, Yves 18%, Gardenburger 12%, Turtle Island 7%, White Wave 6%. Source: SPINS 52 weeks ending Sept. 2001. Dollar share refrigerated / frozen meat alternative category.

The brochure is dated Jan. 2002 (The good influence of ConAgra!). "Visit [www.lightlife.com](http://www.lightlife.com) to download the recipes pictured in this flyer, and many more delicious meals from Lightlife Foods." Address: 153 Industrial Blvd., Turners Falls, Massachusetts 01376. Phone: 1-800-Soy-Easy = 1-800-769-3279.

3352. The Mail Order Catalog for healthy eating. Winter 2002. 2002. P.O. Box 180, Summertown, TN 38483. 36 p.

• **Summary:** The book section of this mail order catalog contains listings for an excellent selection of vegetarian and vegan cookbooks, vegetarian soyfood cookbooks, plus books on food nutrition & health, alternative healthcare, women's healthcare, native Americans and their cultures, animal rights, and sustainability.

The vegetarian food products section offers TVP granules and chunks, Response textured soy protein concentrates (misleadingly called "Response TVP flakes"), miso soup mixes, wheat free soy pasta, soy & rice pudding

mixes, soy & nondairy beverages and beverage mixes, soy protein powders & shake mixes, soynut butters, sea vegetables, vegetarian jerky, soynuts, plus foods from Worthington and Loma Linda, Jyoti India Cuisine, and Dr. John McDougall. Address: Summertown, Tennessee. Phone: 800-695-2241.

3353. **Product Name:** [Viana Life Paté Fine (Delicately Smoked Vegetarian Sandwich Paté), Life Paté Coarse (Delicately Smoked Vegetarian Sandwich Paté), Country Vegetarian Slicing Sausage for Sandwiches, Velami Vegetarian Slicing Sausage for Sandwiches, Veggie Tuna (Chunky Style Paté), VeggieDelight Supreme (Non-Dairy Cream Cheese), VeggieDelight Cheesy (Non-Dairy Cream Cheese)].

**Foreign Name:** Lebenswurst Fein, Lebenswurst Gross, Prima Wurst, Velami, Veggie Tuna, VeggieDelight Supreme, VeggieDelight Cheesy.

**Manufacturer's Name:** Tofutown.com

**Manufacturer's Address:** D-54578 TofuTown Wiesbaum, Germany. Phone: +496593 9967-0. Fax: 6593 9967-225.

**Date of Introduction:** 2002 January.

**Wt/Vol., Packaging, Price:** 200-250 gm pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Color packages sent by Bernd Drosihn. 2004. Nov. 15. Size: 5 by 17.5 by 3.5 cm. Paperboard boxes. Various colors. Color photo of the dish, ready to eat, on round wooden board. Each of these Viana-brand products is a meat alternative, ready to serve introduced in Jan. 2002. The packaging is very attractive, with all information given in 6 languages for the expanded European market: German, Dutch, Spanish, English, French, and Italian.

3354. **Product Name:** Trader Joe's Burger Nouveau Meatless Patties.

**Manufacturer's Name:** Trader Joe's (Marketer).

**Manufacturer's Address:** P.O. Box 3270, South Pasadena, CA 91031-6270.

**Date of Introduction:** 2002 January.

**Ingredients:** Soy protein concentrate, soy protein isolate, cellulose gum, spices, dried minced garlic, dried minced onion, salt, wheat gluten (non-hydrolyzed), canola oil, barley malt extract, dried onion, dried garlic, black pepper, tamari (water, whole soybeans).

**Wt/Vol., Packaging, Price:** 4 burgers in 14 oz (397 gm) paperboard box. Retail for \$3.59 (2002/07, Lafayette,

California).

**How Stored:** Frozen.

**Nutrition:** Per patty (3.5 oz): Calories 140, calories from fat 20, total fat 2.5 gm (4% daily value; saturated fat 0.5 gm), cholesterol 0 mg, sodium 430 mg (18%), total carbohydrate 8 gm (dietary fiber 5 gm [20%], sugars 0 gm), protein 21 gm. Vitamin A 0%, vitamin C 0%, calcium 10%, iron 20%. Percent daily values are based on a 2,000 calorie diet.

**New Product–Documentation:** Product with Label purchased at Trader Joe's in Lafayette, California. 2002. July 14. 10 by 5 inches. Paperboard box. Black and red on tan. Color photos on front and back panels show three burgers with grill marks surrounded by sliced tomatoes and onions. "Low fat. High in fiber. Excellent source of protein." Heating instructions: Preferred preparation method—Heat in non-stick or lightly oiled skillet for 3-4 minutes. Or microwave or grill. Soyfoods Center taste test. 2002. July 14. Each patty is sealed in a separate plastic pouch. Flavor and texture both very good. Package design: Excellent.

Talk with manager at Trader Joe's. 2002. July 21. This 4-burger product was introduced about 6 months ago. A 2-burger product with the same name was introduced about 4 years ago.

3355. Tibbott, Seth. 2002. Update on Tofurky (Interview). *SoyaScan Notes*. Feb. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Sales of Tofurky roasts grew nicely during the past year from 82,000 in 2000 to 105,000 in 2001—an increase of 28% during a recession year in the American economy. The product is sold in two forms: Tofurky Roast, and Tofurky Feast (the 26-ounce stuffed roast plus four Tempeh Drumettes, 14 oz. Tofurky “Giblet” Gravy, and Tofurky Jurky Wishstixs). In recent years, Tofurky has been made for Turtle Island in California. Now Seth is planning to move production in-house, which should enable him to reduce production costs dramatically. Address: Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: 541-386-7766 OF.

3356. Hey, Barbara. 2002. Tastes just like chicken: Mushroom variety offers new source of protein [Quorn]. *Natural Foods Merchandiser*. Feb. p. 1, 7.

• **Summary:** After 5 years of deliberation, the U.S. Food and Drug Administration has approved Quorn, made by Quorn Foods Inc. (Greenwich, Connecticut) for sale in the USA. Quorn, which has been on the market for 17 years in Europe, is a patented meat alternative made from mycoprotein—a vegetable protein derived from a variety of mushroom [*Fusarium graminearum*] discovered near the company’s original headquarters in North Yorkshire, England. The taste of Quorn has been compared in flavor and texture to that of chicken.

The first Quorn product was introduced in the UK in 1985 and rolled out across Europe in 1993. Today Quorn Foods has sales of \$150 million with more than 90 products in six European countries. Address: Senior editor of *Delicious Living!* magazine.

3357. Quorn Foods Inc. 2002. Quorn is the answer! Introducing the #1 retail selling meat-free brand in the world (Ad). *Natural Foods Merchandiser*. Feb. p. 29.

• **Summary:** This full-page color ad shows the inside of a Quorn (pronounced “Kworn”) cutlet and the front panel of the following seven Quorn products: Fettucine Alfredo, Grounds, Tenders, Patties, Lasagna, Cutlets, and Nuggets. Quorn is “the best-selling line of meat-free cuisine in the world...” “Quorn and the Quorn logo are trademarks of Marlow Foods Ltd. and are manufactured and used under license in the U.S. by Quorn Foods Inc.” Address: P.O. Box 370, Riverside, Connecticut 06878. Phone: 203-698-2529.

3358. *Soybean Digest*. 2002. Healthy growth in soyfoods. Mid-Feb. p. 34-35.

• **Summary:** This article is part of a special pull-out insert on “New Uses.” Notes that soyfoods have reached a new level of acceptance during the past year with the purchase of Kashi Co. (a natural cereal manufacturer) by the Kellogg Co. Kashi already made lines of soy-enriched cereal and the company recently expanded its line to include GoLean soy-based diet drinks and cereals. Founded in 1984 by Philip and

Gayle Tauber, Kashi grew by more than 100% during the fiscal year before Kellogg’s purchase—for an estimated \$30 to \$50 million. In the year 2000 Kashi had sales of about \$25 million, compared with \$7 billion for Kellogg. But Kellogg sees a continuing trend toward healthier eating.

Color photos show: (1) Packages of Kashi GoLean and Westsoy Soy Smoothie. (2) Various unpackaged soy products including textured soy protein, soymilk, silken tofu, edamamé, soy cheese, soy hot dogs, breaded soy cutlets, and soy powder. (3) Tortillas filled with cooked whole soybeans and trimmings, a package of Soy Fusion (Berry), and a soy burger between buns. (4) Cover of the 2001 Soyfoods Guide.

3359. **Product Name:** [Tofu Ravioli, from Whole Wheat Flour, Tofu Sausage].

**Foreign Name:** Integralni Ravioli od Tofua, Tofu Kobasica. **Manufacturer’s Name:** Annapurna.

**Manufacturer’s Address:** Nehajska 42, 10000 Zagreb, Croatia. Phone: 01 3639 092.

**Date of Introduction:** 2002 March.

**Ingredients:** Durum flour, 850 flour, whole wheat flour: Filling: Tofu, soya, breadcrumbs, onion, spices.

**Wt/Vol., Packaging, Price:** 150 gm vacuum packed. Sells for 15kn/pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Vlatka Kuzmic. 2005. June 6. She wrote the introduction date and English translation of the product name on the back of 6¼ by 6 inch label (folded in half). Dark green, red, white and tan against a light green background. Color illustration of ravioli shells, tofu, red bell pepper, carrots, and greens.

3360. Ethnic Gourmet Foods. 2002. Linda McCartney: Natural Frozen Foods (Leaflet). 190 Fountain St., Framingham, MA 01702. 1 panel each side.

• **Summary:** See next page. Leaflet (front and back, 8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2002. March. The front panel shows 13 Linda McCartney frozen meatless entrees. Some are meat alternatives. The rear gives some details on each, but no ingredients. Address: Framingham, Massachusetts.

3361. Heartland Fields. 2002. You’ve never sold soy like *this* before (Ad). *Natural Foods Merchandiser*. March. p. 26.

• **Summary:** See page after next. This 8½ by 11 inch color ad shows a tortilla or taco on a plate filled with one of the products. Below that are the labels of five products: Soy Steak Tips, Soy Ground Beef, Soy Barbeque, Soy Sausage, and Soy Taco Filling. A small logo states that all are “Made with non-GMO organic soy.” Below that are three bags of Soy Krisps (Lightly Salted, Sour Cream & Onion, Cinnamon Raisin). www.heartlandfields.com. “Healthy never tasted so good.” Address: [4200 Westown Parkway, Suite 106, West

**Manufacturer's Name:** i Foods, Inc.

**Manufacturer's Address:** 519 Stanford Ave., Los Angeles, CA 90013 Phone: (213) 688-7882.

**Date of Introduction:** 2002 March.

**Ingredients:** Cod Fillet: Textured soy protein, water, soybean oil, isolated soy protein, whey protein, sugar, corn starch, tapioca starch, wheat protein [gluten], potato starch, salt, spices, natural flavors (from vegetable sources), seaweed, autolyzed yeast extract.

**New Product–Documentation:** See page after next. Two leaflets (8½ by 11 inches, 1 panels each side, glossy color, front and back) sent by Patricia Smith from Natural Products

Expo West at Anaheim. 2002. March. The front of each shows a large color photo of the prepared product.

**3365. Imagine Foods, Inc. 2002. 20–Imagine what's next (Ad).** *Natural Foods Merchandiser*. March. p. 6.

• **Summary:** This creative and sometimes humorous full-page color ad celebrates Imagine Foods' 20th anniversary of developing and making alternatives to dairy and meat products. The text for most years is accompanied by a color photo of a product introduced that year—all on a jet-black background. Colorful arrows point the reader's way back and forth across the page to the next year.

1982–Imagine Foods is born in a log cabin in Jamestown, Missouri.

1983–Robert Nissenbaum and Bill Gates contemplate the future in slightly different ways.

1984–Rice Dream Frozen Desserts are introduced to Critical acclaim at the NNFA Show in Atlanta [Georgia]. Now how do we make thousands of gallons?

1985–World headquarters moved to Palo Alto.

1986–Rice Dream package is redesigned and seven flavors are added.

1987–World headquarters moves out of Robert's house and into real offices.

1988–Gone Bananas, frozen chocolate and carob covered banana bites, is introduced clearly ahead of its time.

1989–Imagine introduces the world's first organic crust, vegetarian pocket sandwich.

1990–Rice Dream beverage premieres after six years in development and two US patents.

1991–Rice Dream Bars and Pies reinvent natural frozen novelty desserts.

1992–Imagine creates Ken & Robert's Veggie Burger.

1993–Imagine shelf stable pudding cups are added to the non-dairy line of products.

1994–Original Rice Dream becomes the #1 [best-selling] product in the natural foods industry. The sky's the limit. And Rice Dream Enriched is launched offering the sale calcium and vitamins as milk.

1995–Robert goes fishing. Can't catch anything using rice for bait.

1998–Imagine Organic Soups and Broths revolutionize the category. And: Another Dream comes true. Soy Dream beverage is introduced in six flavors. And: Power Dream Soy Energy Drink is launched out of necessity to keep up with the staff's energy requirements.

1999–Soy Dream moves into the refrigerator in gable cartons to milk opportunity.

2000–Rice Dream follows Soy Dream into the refrigerator. "Its gett'n crowded in here."

2001–Soy Dream Frozen Dessert and novelties are introduced. Dreamheads rejoice.

2002–Visit us at booth #3757 to celebrate our 20th anniversary on Saturday from 1 to 3 pm for cake and Soy

**Manufacturer's Address:** 4585 Firestone Blvd., South Gate, CA 90280. Phone: 866-356-2800.

**Date of Introduction:** 2002 March.

**Ingredients:** Chicken Style Strips: Textured soybean protein, whey protein, soybean oil, evaporated cane juice, salt, white pepper, vitamin E, mustard, lemon juice, sage, thyme.

**Wt/Vol., Packaging, Price:** 6 oz. package.

**How Stored:** Refrigerated.

**New Product–Documentation:** Talk with John Sim, head of sales at Pulmuone. 2003. Nov. 10. This product was introduced in March 2002 at the Natural Products Expo West, at Anaheim, California.

Leaflet (front and back, 8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2003. Oct. The front shows the front panel of three packages. The rear gives nutrition facts and ingredients.

3368. Specialty Foods Investment Co. 2002. Natural Touch: Nourish your body and spirit (Ad). *Natural Foods Merchandiser*. March. p. 81.

• **Summary:** The top half of this full page color ad shows an Okara Patty on a sesame bun with lettuce and sliced onions. At the top: "Now made with organic soy!" Below that are the front panels of four packages of Natural Touch products: Breakfast Patties (New), Okara Pattie, Veggie Medely, and Tex Mex Burger. At the bottom left: "from Morningstar Farms." At the bottom right: "A proud supporter of: Global Re-Leaf, www.Americanforests.org."

Note: This company is owned by the Kellogg Co., which also owns Worthington Foods. Natural Touch is their natural food line.

3369. Krueger, Carol Ann. 2002. Re: History of work with soyfoods, 1982-2004. Letter to William Shurtleff at Soyfoods Center, April 4. 5 p. + 2 menus. Handwritten, with signature.

• **Summary:** 1982–After Carol Ann and Timothy Huang were divorced, Carol Ann lived in Arizona with her kids and started making jewelry. She was director of the Graham County Food Buying Club, grew a huge organic garden, and began traveling to craft fairs, Grateful Dead shows, and festivals where she sold her jewelry. Dealing with rheumatoid arthritis put her on the path of natural healing and interest in diet and nutrition. She found that stress, overwork, lack of sleep, lack of water, lack of green leafy vegetables, and a poor, non-organic diet all made her arthritis worse (it flared up), while their opposite made it better. From 1982 to 1989 she lived on a ranch in Pima, Arizona. In 1982 she met and married Richard Sansom.

1989–Carol Ann and Richard are divorced; she moved to Boulder Creek, California, where she lived for the next 4 years.

1990 June–She met her third life partner, Wild Bill, at the Health and Harmony Festival. He was part of the original Renaissance Festival in Northern California, and he played for a belly dance troupe. They began to co-create the Casbah Tea House. He had created a Bedouin-style tent–40 by 32 feet; he would set it up and serve tea, coffee, and treats. Musicians would play and belly-dancers perform. Carol, who now had a long history of feeding people, began to add more food. Soon they became a traveling tea house on the summer festival circuit, serving an organic vegetarian menu based on the foods she had been involved with for the past 20 years. They served a Middle East type menu–hummus, tabouli, pita sandwiches, Greek salads, etc.–which were very refreshing at a hot festival. However many regular meat-eating Americans couldn't relate to the food. So they added tempeh burgers, vegetarian chili and chili cheese soup, veggie dogs, organic french fries, and tempeh fries–which could serve a wider array of people. Carol bought her basic foods in bulk (e.g., 24 pounds of tempeh) from Mountain People's Warehouse, a natural foods distributor.

1995–They rented a building on 4th Avenue in the university district of Tucson. They put their crafts/imports into a shop in front called the Creative Spirit Gallery. In the back they developed the tea house concept. Over the past six years they have become a full service restaurant with evening entertainment of music and belly dance. "It is a beautiful international scene that embraces many cultures from around the world. It is decorated with low hand carved chairs from Afghanistan, brass trays from India, a bronze gong and carved wooden statues from Bali, and carpets from Persia. The tea house comes into fruition during the International

Gem and Mineral Show when Buddhist, Muslim, Hindu, Christian, and pagan people from around the world come together and be at peace drinking tea and sharing a meal... It is a vision of the beauty and diversity of this world in its fullness.”

1997—Carol and Bill split up. He went into retirement and she had a new tent made from hemp fabric and ropes. She continued to travel with the Casbah Tea House on the festival circuit each summer, serving a menu based largely on soy.

1999—The hand-written Casbah Tea House Festival Menu includes Middle Eastern favorites plus: Veggie Dog, Veggie Chili Cheese Dog, Vegetarian Chili, Tempeh (Soy) Burgers, and Tempeh Reuben.

2001 Feb.—The typeset Casbah Teahouse Tour Menu includes some new Middle Eastern favorites plus: Tofu Veggie Stir Fry, Vegetarian Chili, Tempeh Pita, and three types of soy burgers served with blue corn chips and a dill pickle: Tempeh Burger, Tempeh Cheese Burger, and Tempeh Reuben Burger. Veggie Hot Dogs (made from soy and seitan). Veggie Chili Cheese Dogs, and Tempeh Fries. A color photo (8 by 4½ inches) shows the colorful Casbah Tea House tent outdoors at the 2001 Seattle Hemp Fest (Washington state).

2002 spring—Carol Ann expanded, moving the gallery down the street to 549 N. 4th Ave., where it has three times as much space—the fullness to be a real store. The teahouse is now expanding into being a deli, bakery, and cafe in the front of the building. They make a lot of desserts that are vegan and sugar free, using tofu in their frostings. “We struggle with being a commercial operation trying to survive and holding to our values of providing as much organic high quality ingredients as we can.

“All three of my kids are now grown up, ages 21, 23, and 25. Emma attends the University of Arizona in the art department; she is our main baker and cake decorator. Eva is attending Pima College in graphic computer arts and is our main cook. Ethan is a part-time cook. Today I walked in here and there were nine gorgeous girls running around. They’re all in their 20s, all vivacious and healthy and beautiful. Emma’s assistant in the bakery is Rebecca, who is making tofu cheesecakes; her parents worked with us at Yellow Bean in Detroit, Michigan, when Rebecca was 5 years old. It’s pretty neat how everything has come around.

“We are developing are wholesale aspect slowly, providing the co-op with packaged food items that we make. We’ll see how it all evolves. What a long strange trip its been. One love.” Address: 438 South Star Ave., Tucson, Arizona 85719. Phone: 520-740-0393.

3370. Taylor, Owen: 2002. Southern scene: Soy burgers get a boost. *Soybean Digest*. April. p. 31.

• **Summary:** “More Americans are about to be exposed to soy burgers.” Back Yard Burgers—a franchiser based

in Memphis, Tennessee, with about 100 restaurants in 17 states, was one of the first fast food chains to offer a soy burger on its menu. Several years ago it began offering the Gardenburger, which now accounts for 5% of sales.

Now Back Yard has agreed to participate in a multi-brand restaurant test with Tricon International. Tricon is the franchiser of KFC, Taco Bell and Pizza Hut. In total, that’s 30,000 locations worldwide.

3371. *SoyaScan Notes*. 2002. The American Tasting Institute (ATI/AOTA) and their Gold Taste Awards (Overview). May. 18. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** The following information comes mostly from the company’s website: [www.awardsamericas.com](http://www.awardsamericas.com). The American Tasting Institute is a private organization, founded in 1985, comprised of about 35,000 professional chefs. They are headquartered at 211 Sutter St., 5th Floor, San Francisco, California 94108. Phone: 415-982-0781. The organization is also called AOTA = Awards of the Americas.

In awarding gold medals, at least six leading chefs conduct a double-blind test on products in a specific category. The highest scoring product in each category is offered the Institute’s Commercial Gold Medal Endorsement Program. It is offered to only one company in each category. Acceptance requires payment of an annual fee.

The following companies have accepted gold medal awards in soy-related categories (mostly in the natural-foods category): Soybean milk—Vitasoy. Soy chips/crisps—Snackie Jack. Soy protein drink: Next Nutrition, Inc. Yogurt, soy—Silk Cultured Soy (White Wave). Tofu—Nasoya. Veggie Burgers—Worthington Foods / Morningstar Farms.

3372. Willems, Nadine. 2002. Tofu: The taste of a hundred things. *Winds (JAL Group—Japan Airlines)* 22(12):19-25. May. [1 ref]

• **Summary:** “As versatile as eggs or potatoes, but far better for you, tofu—or bean curd—left the specialist health stores in the West long ago and is now a familiar sight on the menus of fashionable restaurants.” Starts with a description of making tofu at 5:00 a.m. one morning at Futaba tofu shop in Tokyo’s downtown Ningyocho area. A one-page sidebar discusses the *Tofu Hyakuchin* (One Hundred Tofu Delicacies), published in Osaka in 1782 during “The Golden Age of Tofu.”

Superb color photos show: (1) A Yokohama tofu maker at work early one morning. (2) Soymilk being poured into a wooden forming box to make silken tofu. (3) Dried yellow soybeans with a wooden measuring box (*masu*). (4) Freshly made silken tofu being cut away from the sides of a forming box. (5) Large block of tofu, held with one hand, being sliced into cakes under cold water. (6) Deep-fried tofu (Ganmodoki and aburage) draining on a bamboo mat (*sudare*). (7) Many tofu dishes served at Ume no Hana chain restaurant. (8) Tofu dengaku. (9) A cake of tofu being held out in one hand.

3373. Demos, Steve. 2002. White Wave's 25th anniversary: How Steve sold White Wave to Dean Foods for \$189 million (Interview). *SoyaScan Notes*. June 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Steve is at the farm. White Wave's 25th anniversary is coming up in September. At Goldman-Sachs Steve has given his presentation on Jack and the Beanstalk: A modern day fairy tale. "Depending on who I'm talking to, I bring 'Right Livelihood' into it. 'Right Livelihood,' to me, is at the root of it, but we don't always talk about it because we're not going to use that as the reason for the success in the business model. The business model has to be successful because it is a good business model, its based in Right Livelihood, but I don't want to become the Right Livelihood company, I want to become the business model that was very successful because it was based on Right Livelihood."

"Dean Foods is making a commitment to entering the branded foods business. And they've also chosen the healthy benefits foods to be part of that. This was somewhat of the introduction of the investment they had made, by me just giving the 'street' (Wall Street), so to speak, an update on the soy industry and White Wave." Dean Foods has owned brands before, but they have all been relatively small and No. 2 or 3 in their category. Dean Foods has about \$250 million a year in cash flow. This money is looking for a home. They need to invest their stockholder's money or give it back to them. Dean Foods is saying, hey, the way to use the money here is to invest in these value-added, branded foods. Where is the most growth coming from? The legitimate, natural, nutraceutical, healthy benefits, organic type of foods. We ring every one of those bells.

"Our business model is a series of very conscious choices going all the way back to the product itself. It's good for me, good for you, good for everybody who touches it. Right Livelihood is values-based business, or principal-based business.

"We ultimately gave away 10% of the company back to the employees. But we did it in two different ways. Round one came a few months ago; when we saw that this was very likely to occur, we awarded stock options (at the lowest possible price) back to the employees based on job responsibility and contribution to growth. That was 5% of the company. Everybody made 3-5 times what the price was of the option was. Nobody turned it down because it was absolutely free money. The option was something like \$10 and the stock sold for \$130; who is going to turn that down? The second round came from the five largest stock holders based only a years one had worked for the company. We have talked about this before so there is no need to go over it again."

Looking back over the past 25 years, what are the things that have been most important to White Wave success? "One is innovation. The willingness to constantly try until you find

something that works. If you look at the number of attempts versus the number of successes, clearly we are in our own one in a hundred, or even five hundred. We've introduced a lot more failures over the years than we have Silks. In the process, by innovation, we taught ourselves key things. Now, I could tell you how to make a soy product in any factory, virtually for any type of soyfood, from burgers to ice creams, from fermented to curdled. That gives us a different perspective, and it gives us insights into how soy is going to get into the mainstream diet. All that experience and all that time we have come to understand how it is accepted, what is accepted, what they are looking for. In this industry, I think this is somewhat unparalleled. We've tried everything but miso.

Second, we made a business model that was highly profitable and we proved it by investing in all the right stuff. We made all the right decisions for this business model so that we could prove that we could finance growth on our own, without a bank. And over the past several years, since we initially took on Dean's money, we haven't received anything else, and yet we've probably tripled in size—and the numbers were quite large."

When do you think that business model was first clear in your head? "It was at least 5 years ago I saw the three levels of profit that are associated with the soymilk business: Extraction, packaging, and distribution. All are money-makers but two of those are owned by the dairies. So my whole business model was: Use the infrastructure that existed, because the dairies had it all in place, and basically tell them you'd pay them more than they were currently making from their normal cow juice stuff. Once we sat that that was, in fact, true, then we started getting more and more interest on our side in going to a vertical business model, because the profits that were present with packaging and distribution were so much bigger than manufacturing the extract. We're about to start that with Dean Foods; the next step is proving this business model. In the past, White Wave has not been packaging; we have only been extracting. But we got control of how we distributed the extract by where we located the extract. It's funny. You can pay Mother Nature to distribute for you—in other words use the water where you find it and need it—or you can pay truckers to distribute if you happen to ship a heavy water product all over the U.S. So we located our extraction systems located in different parts of the U.S.—more efficient for where Silk was being packaged. And then we bought our own extraction. We have not put in our own processing / formulation, which is one more profit level that we haven't even seen yet, and we're already a very handsome business model. White Wave presently has two different extraction locations, but the company draws off of four. We have an arrangement with another company [such as Sunrich] to supply us. White Wave makes about 50% of the Silk sold and the other company also makes 50%. White Wave does not necessarily want control of 100%; there are

headaches that come with that. It is expensive to build a soymilk extraction facility. We are focusing our money on ramping up sales.

Anything else? “Over the past 25 years White Wave has stayed true to our principals—but those are things I take for granted. Some people seem to think that those are great achievements. I think they are normal, which is why I don’t mention them. How else would I do it? But it’s apparent that there are not a lot of people who walk their talk—at all; it’s unfortunate. So, even through some very difficult times, we did not compromise our morals or ethics in running the business. We probably compromised our personal well beings [overwork, stress], which is not all that good. But hopefully, we’ll be making up for that.

What was it like when White Wave began operations in 1977? Natural foods were bulk only. Organic was known, but there was no differentiation between organic and natural because nobody had yet deceived the public with a fake product. I had started a natural foods store in Pennsylvania based on no packaging, all bulk. So natural foods was a lifestyle but had not been compromised by business yet. There were not a lot of natural foods stores in the U.S. in 1977 and they were mostly co-ops. The big natural foods stores came a few years later. The chains and supermarkets (such as Whole Foods and Wild Oats) came 10-15 years later.”

Organically grown? “We used to go to Walnut Acres, one of the original organic meccas, to buy all our flours and grains for my natural food store named Touch the Earth in Pennsylvania. I have a clear memory of the bottom third of the bag being dirt. It was organic all-right. We always knew that we had to watch for stones and dirt in anything sold as organic. God knows why!

Soyfoods? “I don’t think the word had been invented or was well known. ‘Tofu’ as a word was starting to be known, partly because of what you were doing at that time. My first experience of making tofu came through the Seventh-day Adventists—through the Bible we used to carry around—*Ten Talents*. It had a recipe for making bean curd. Of course soy sauce was well known. In 1977 there was no category of foods called ‘soyfoods’ and there were no companies that were soyfoods companies” (Continued). Address: President, White Wave Inc., 1990 North 57th Court, Boulder, Colorado 80301.

3374. Abrams, Maribeth. 2002. New veggie burger sparks debate: To buy or not to buy. *Vegetarian Voice (NAVS, Dolgeville, New York)* Summer. p. 2-3.

• **Summary:** “March 18 was a historic date in U.S. fast-food history—Burger King placed a veggie burger on the menu of more than 8,000 BK locations across the country.”

Developed by Morningstar Farms specifically for Burger King, the patty is being promoted as completely plant-based; the first 5 main ingredients are mushrooms, water chestnuts,

brown rice, textured wheat protein, and rolled oats.

Soy is conspicuously absent because allergies are a big concern today.

3375. French, Steve. 2002. Top ten health and wellness trends to watch. *Natural Foods Merchandiser*. June. p. 52, 54.

• **Summary:** Trend No. 8 is “Soy, the ultimate health food.” French writes: “Will consumers ever fully understand, use and trust soy foods? As household penetration of soy products across categories continues—and mainstream computer packaged-goods companies search for new brands and extensions—look for a range of soy foods beyond soy milk and soy burgers to enter mainstream consciousness. Soy use is growing in frozen entrees, packaged grocery and snacks.”

A table (p. 54) shows that 24.1% of the U.S. general population indicates that they have used soyfoods during the past year. Source: The NMI [Natural Marketing Institute] Health and Wellness Trends Database. Address: Senior VP, Managing Partner, The Natural Marketing Institute.

3376. United Soybean Board. 2002. National report 2002-2003: Consumer attitudes about nutrition. Seattle, Washington. 8 p. June. 22 x 21 cm.

• **Summary:** This ninth annual nationwide survey, commissioned by USB, was conducted in early 2002 by an independent research firm in Seattle, Washington. Random telephone interviews were completed with 1,000 consumers. The study’s margin of error is  $\pm 3.1$  percent and has a confidence level of 95%.

Contents: Introduction and methodology. Nutrition concerns and habits. Consumer awareness of nutrition terms and information. Consumer perceptions of cooking oils. Consumer attitudes about fats. Consumers on soyfoods and health: Perceived healthfulness of soy products (74% healthy, 19% neutral, 7% unhealthy), awareness of health benefits of soy (heart health 39%, menopause relief 18%, cancer prevention 16%, osteoporosis prevention 4%, good source of protein 4%, other 19%), where consumers get information on soy and health (magazines 42%, TV news 22%, newspapers 20%, friends/family 20%, etc.). Soyfoods: Consumption and trial (42% of Americans report they consume soyfoods once a month or more, while 28% consume soyfoods weekly, up from 27% last year. 30% of consumers say they never use soyfoods, down from 35% in 2001). Consumer perceptions of genetically modified food. Consumer perceptions and knowledge of organic foods (42% of consumers buy organic food products either frequently or sometimes. On an unaided basis, 48% know that organic foods can’t contain genetically modified ingredients and 64% know that organics must be grown without pesticides and herbicides).

Percentage of American consumers who have tried various soy products in 2000, 2001, and 2002: Tofu 45%,

45%, 48%. Soy veggie burgers 25%, 28%, 35%. Soymilk 25%, 28%, 35%. Soy nuts 14%, 20%, 26%.

Percentage of Americans who consume soyfoods weekly: 24% in 1999, 27% in 2000, 27% in 2001, and 28% in 2002.

Percentage of Americans who are aware of the term “genetically modified”: 48% in 1998, 42% in 1999, 58% in 2000, 62% in 2001, and 68% in 2002.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at [www.soyconnection.com/health\\_nutrition/pdf/](http://www.soyconnection.com/health_nutrition/pdf/).

3377. *Nutrition Business Journal (San Diego, California)*. 2002. U.S. consumers gain appetite for meat alternatives: Boca, Gardenburger and Sunrich expand market with new meat alternative products. 7(7):4-6. July.

• **Summary:** A pie chart shows the \$395 million meat alternative market (wholesale figures, 2001) divided as follows: Kellogg (Morningstar Farms) 45%. Kraft (Boca Burger) 15%, Gardenburger 14%, ConAgra (Lightlife) 11%, Hain Celestial (Yves Veggie Cuisine) 8%. This converts to about \$550 million in consumer sales, with about 60% via the mass market channel, 30% through natural / health food stores, and 10% through other channels. Soy-based meat alternatives accounted for about 85% of those sold in mass market outlets and 80% of those sold in natural / health food stores. Growth during the previous year (2000) was estimated at 14.5% (16.4% in mainstream and 10.1% in natural / health).

In mainstream supermarkets and grocery stores, frozen products account for 68% of meat alternatives, while the remaining 32% are refrigerated. In natural food stores, 59% are sold refrigerated and 41% frozen. In the refrigerated category, Lightlife claims to have 50% of the market in natural food stores, followed by Yves (34.5%) and Veggie Patch (3%).

A new major player is Quorn, a European company making products from mycoprotein (myco = mold or fungi, not mushrooms).

Kraft owns both Boca Burger and Oscar Meyer; the latter just entered the meat alternative business. Kraft's newest introduction is Boca Ground Burger in microwaveable pouches, for use in recipes ranging from tacos to spaghetti.

3378. *Nutrition Business Journal (San Diego, California)*. 2002. Quorn enters U.S. market for meat alternatives: Sales grow for meat-free entrees amid mushrooming controversy. 7(7):7. July.

• **Summary:** Quorn Foods Inc. (Riverside, Connecticut) entered the U.S. market in January 2002, and has since generated \$1 in sales—along with plenty of controversy over Quorn's main ingredient, mycoprotein. Quorn products are marketed by Marlow Foods, a division of AstraZeneca. Last

year their retail sales in Europe were \$170 million, according to the company. Product labels describe mycoprotein as a “small, unassuming member of the mushroom family.” But both Gardenburger and Center for Science in the Public Interest have petitioned the FDA claiming that Quorn is mislabeled.

Quorn now has 7 SKUs in 1,000 U.S. stores, all frozen, including chicken-style nuggets, chicken-style tender, lasagna, and a beef-style ground ingredient. However in Europe, Quorn sells more than 90 SKUs, equally divided between fresh and frozen. Quorn's U.S. pricing is competitive with other meat alternatives at \$3.79 for a typical entree, or 10-15% higher than similar meat-based products.

Quorn says that 45% of European households buy frozen meat alternatives each year versus only 15% on the USA. The company claims that in taste tests American consumers prefer Quorn products to their Morningstar Farms counterparts by two to one. Morningstar is the leading U.S. meat-free brand.

3379. **Product Name:** Veggie Patch Veggitinos: Wholesome Vegetable Meatballs.

**Manufacturer's Name:** Veggie Patch Products.

**Manufacturer's Address:** 26 Kendall St., New Haven, CT 06512. Phone: 1-888-MY-VEGGIES.

**Date of Introduction:** 2002 August.

**Ingredients:** Water, soy protein (texturized, isolated), wheat protein (gluten), corn starch, onions, sunflower oil, natural flavors and spices, egg white, chicory fiber (inulin), soy sauce (water, soy beans, wheat, salt, vinegar), garlic powder, calcium carbonate, modified vegetable gum, evaporated can juice [sugar], sea salt, potassium chloride, parsley, caramel color.

**Wt/Vol., Packaging, Price:** 15 balls 9 oz (255 gm) in plastic tray. Retail for \$2.99 (2002/08, Trader Joe's, Lafayette, California).

**How Stored:** Refrigerated or frozen.

**New Product—Documentation:** See next page. Product with Label purchased at Trader Joe's in Lafayette, California. 2002. 5 by 8 inches. Plastic tray with sealed film lid. Green, brown, blue, and red. A color photo on the front panel shows a bowl of prepared Veggitinos balls in sauce over spaghetti against a background of contour-plowed soybean rows with blue sky overhead. “10 gm of soy. Non GMO soy. FOS prebiotics. Cholesterol free. 97% fat free. Promotes good digestive health. Good source of fiber. Excellent source of calcium.” [www.veggiepatch.com](http://www.veggiepatch.com).

3380. Piraro, Dan. 2002. Bizarro: Soybean nightclub (Cartoon). *Syndicated cartoon*. Sept. 6.

• **Summary:** A character, with arms, legs, and a large soybean-shaped head and face, is standing on a nightclub stage, facing a microphone and the audience (other soybeans

seated at tables). He says: “And now my impression of Canadian Bacon.”

3381. Schmit, Matthew. 2002. Soy pioneers: Where are they now? Part II (Interview). *SoyaScan Notes*. Sept. 19. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: Initially, they sold all their tofu to the co-op next door. Then people began to come into the little shop to ask what to do with the tofu; for recipes, they referred them to *The Book of Tofu*. Within a month, they decided to build a little wooden counter (so people couldn't walk into the production area) and began selling tofu directly to consumers out of the shop. The co-op didn't mind. “We were all in it together.”

Their original logo was a dragon; a woman artist in Telluride had painted it (copying a Chinese vase), and fired it on four tiles, then framed. Matthew and her husband taught Yoga classes together, and he knew their family very well. Matthew traveled with the husband to Durango; he opened the back door of his van and a box of the finished tiles fell out and were damaged. He picked one up and gave it to Matthew; it was a dragon. Matthew liked it, drew a circle around it, and decided to use it as the new company's logo. He hung the four tiles outside the shop door; she then painted “The Tofu Shop” on some new tiles, which were framed and hung below the dragon. The nearest alternative community was in Boulder, about 4 hours by car. They visited The Spinning Kitchen and White Wave, two early tofu shops in Boulder. Once they bought soybeans from Steve Demos of White Wave.

On 8 Dec. 1977 the earliest known article about the little company appeared in the *Telluride Times* on page 11. Titled “Tofu prepared daily in Telluride shop.” It gave a brief history of tofu and described the new company; a photo shows Matthew, Susie Imbarrato, and Tim Mecke—all holding a tray of sprouts.

In late 1977 or early 1978, Tim Mecke left the business. Matthew changed the ownership of The Tofu Shop to a worker-owned collective (legally a co-op, if he remembers correctly), although his name was on all legal documents.

About 3 months after the company started, they decided to install a take-out food window. The daily schedule now changed; they made tofu starting at 3:00 in the morning then cleaned and were out by 10:00 a.m.—when the people who made the restaurant products would show up. They developed a nice little two-sided vegan menu—no animal products. Their first deli items were 3-4 tofu sandwiches. Spinning Kitchen in Boulder made a “Kung Fu” open-face tofu sandwich; Matthew's cousin loved it and brought him the recipe; it was a slab of tofu grilled in a skillet with soy sauce and maybe some sesame seeds on top—very simple. Another was a mock tuna salad sandwich. They also made and sold tofu salads, and a tofu dressing, and soyburgers—made with cooked soybeans rather than tofu. Once a month

they would boil big pots of soybeans and of rice, then add carrots, spices, etc., mash it all together, run part of it through a Champion Juicer, shape into patties, fry hundreds and hundreds on a skillet, then freeze them. One year the smoke from frying disrupted the fledgling film festival in the opera upstairs. “We filled the opera house with smoke.” The guy who organized the festival rushed down to ask “What are you guys doing?”

Note: This is the earliest English-language document seen (June 2006) that mentions the “Champion Juicer.”

In 1978, about 6 months after starting The Tofu Shop, Tim, Matthew's partner, decided that making tofu was not the work for him; he was more of a carpenter. He gave Matthew his half of the company, but Matthew insisted on paying him for it. Years later, Tim popped into Arcata and was pleased to see Matthew making tofu there.

Matthew now started to run the business alone; he quickly felt overwhelmed, having no employees. He needed help. He hired a few people to help him make the tofu. But soon a little group formed around the shop—4-5 people who were loyal to the shop, very interested in tofu, and wanted to come in and learn and work. Matthew has always considered what he is doing as teaching, but he still preferred to pay people in exchange for their work.

The little group of loyal people decided to make The Tofu Shop a worker-owned business. People owned shares, and there was a constitution and by-laws based on a worker-owned restaurant in Santa Fe, New Mexico, that Matthew had learned about; he obtained copies of their documents. Telluride is located on the Uncompahgre Plateau of the Rockies; there is also an Uncompahgre River and an Uncompahgre Peak. So the little group decided to create a new organization named Uncompahgre Natural Foods; it was a legal holding company “that ran The Tofu Shop as a vehicle for its mission, which was developing sustainable vegetarian foods.”

Matthew was the “mover and shaker” of the group; he had his name on all the legal and tax documents. He was working full time and putting in lots of hours; most of the others were working part time and were less involved. The new ownership structure worked well. They would have business meeting every Sunday and make decisions based on consensus. Matthew made enough money to live in a nice rented stand-alone home—not an apartment.

At about the same time The Tofu Shop rented first one and then another shop space on both sides to their original space. The co-op also expanded into a second space, so between them they filled the entire mini-mall. The Tofu Shop's three rooms were used for: (1) Production of tofu and deli items. (2) A restaurant in the front space, which they remodeled themselves—with all wood and sit-down tables. (3) Sprout production—alfalfa, mung beans, radish seeds (no soybeans). Initially they grew the sprouts only for use in their sandwiches, but soon they began selling them in the co-

op in plastic bags.

Also at about that time they started distributing tofu and sprouts beyond the co-op—starting with a small supermarket in Telluride. Red Hat produce company, which brought the only fresh produce up from Grand Junction once a week, took The Tofu Shop’s products back down the mountains, and distributed them to health food stores and co-ops in Montrose, Durango, and Grand Junction. They also flew tofu up to Aspen where they competed with White Wave. “We had the western slope of the Colorado Rockies; White Wave had the eastern slope.” Address: Tofu Shop Specialty Foods, Inc., 65 Martin Ct., Arcata, California 95521. Phone: 707-822-7401.

3382. Schmit, Matthew. 2002. Soy pioneers: Where are they now? Part III (Interview). *SoyaScan Notes*. Sept. 19. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: In late July 1978 tofu makers from across America met for the first time in Ann Arbor, Michigan, and formed the Soycrafters Association of North America. Those announcing the meeting were unaware of The Tofu Shop in Telluride so—unfortunately—no one from Matthew’s group attended, although Catherine Peterson and one other person did attend the second meeting in 1979 at Amherst College in Massachusetts.

In 1978, as an expression of their abundant energy, the group published a booklet titled “Peaking out on tofu.” It was handwritten with brown ink on beige paper and contained 20 recipes. On the rear cover was the logo (dragon in a circle) and these words: “these original recipes sprouted in the kitchen of the tofu shop and are prepared with care by the telluride tofool family using our own homemade soy products. Special thanks to: Catherine Peterson, Kathy Greene, Barton Coffman, Becca Smith, and Sharyn.” The booklet was for education and publicity. There was no price on it and Matthew thinks they probably gave it away. Other key people in the “core group” were Joel Rosenbloom (Matthew’s right-hand man), Christie and Laurie Mather, and Andy Kahn (who ran the sprout operation).

In Nov. 1978, Craig Boyken sculpted a Tofu Turkey from a large block of tofu made by The Tofu Shop. About 30-40 people, including all workers from The Tofu Shop, gathered in his artist’s studio for a potluck vegetarian Tofu Turkey Thanksgiving dinner—probably the first in American history.

One day after Catherine Peterson arrived, the group was invited to the Navajo reservation in the four corners area and to do a tofu-making workshop. It was organized by the farm extension, home economics folks. There was a room full of traditional Navajo women and one social worker. After showing the women how to make tofu and passing out samples, a Navajo woman suggested using fine-weave Nylon paint straining bags (which are inexpensive and widely available at hardware stores) for straining the soymilk.

Matthew has used that idea for years.

One day in April 1979 the president of the Bank of Telluride brought Matthew a front-page article from the *Wall Street Journal* titled “Good old bean curd is suddenly popular, but you call it tofu” (April 12). Matthew learned more about other tofu makers across America.

In the spring of 1979 Matthew and Christie Mather, a member of The Tofu Shop group, took a trip to California. In about 1977 Matthew’s sister, Marna Utman, has relocated to Arcata, California (where her first child had been born) so her husband could attend Humboldt State University. They had become involved with a small group that was interested in buying land together and forming an intentional community. They had been meeting once a week for several years. They had reached the point where they want to establish a business, which would help them raise the money needed to buy the land. Marna mentioned that she had a brother who making tofu as a business. So the group invited Matthew to come to Arcata (at his own expense) and teach them how to make tofu (free of charge). So Matthew and Christie hitchhiked to California from Telluride—a sort of spring vacation, but teaching people how to make tofu on a home scale wherever they stopped—first in Arcata, then in Ashland, Oregon (where they had friends). and finally in the Dalles, Oregon. Typical attendance at each of their three “tofu workshops” was about 12 people. Each class was a combination of hands-on tofu-making and viewing the color slides that Matthew carried in his backpack—along with some nigari and booklets that he passed out at each workshop. Their efforts planted seeds. In Arcata, the group of people trying to form a community, continued for several years to make tofu and tofu burgers in people’s kitchens then sell these from a booth at fairs to raise money. In the kitchen of the Ashland Co-op, people soon began to make tofu; they were still making it several years later when Matthew returned to visit.

Matthew and Christie then hitchhiked north to Vancouver Island, then east to Glacier Park, and back home to Telluride—where they returned to their work at The Tofu Shop.

One of the small group of people who owned The Tofu Shop was Suzanne Kosciolk (pronounced kos-ee-OH-lek). In late 1978 she had moved to Telluride as a sort of tourist from Albuquerque, where she had been involved with a small yogurt business—so she came into the group with food processing and business knowledge. Matthew met her one day on the street, and she was soon involved with The Tofu Shop. Suzanne had a van; Matthew didn’t.

Telluride was a beautiful town, but the population was small and it fluctuated during the year, from a low of about 1,200 permanent residents during the early spring and early fall, to perhaps triple that amount during the ski season (starting with the snows in the late fall) and the summer season of hiking, camping, enjoying the spectacular

scenery, and attending various festivals such as the Bluegrass Festival, the Jazz Festival, and Film Festival. The Tofu Shop and co-op had food booths at some of these festivals.

Four interesting ads from the *Telluride Times* (1979) survive. All have a large illustration of the dragon and “Traditional vegetarian cuisine” as part of the company logo. The Tofu Shop is still located in Telluride at “116 N. Oak—on the Sheridan Mall.” One from March 1979 states: “Menus from different nationalities every night. Whatever you’re in the mood for, we can probably help you out. Thurs. 3/15 [Thursday, March 15]. Tofu Turkey, Vegetable stuffing, baked potatoes, fruit salad.” Note: The Tofu Shop in Telluride is now selling “Tofu Turkey” commercially, with all the trimmings—even though it was out of season.

Fri. 3/16. Pizza, Minestrone soup, Tossed green salad.

Sat. 3/17. Ganmo (Mock Goose), Stir-fried vegetables, miso soup, etc.

A second ad from April 1979 reads: “Thank you Telluride for a successful winter season. We will be closed for a week of remodeling beginning Monday, April 9, reopening Monday, April 16. During this week, Tofu and Sprouts will be available at Winterstash and Roses.”

A full-page typed sheet titled “Our favorite tofu recipes,” undated but probably from 1979, has as its 1st recipe “Tofu Turkey with Mushroom Gravy (serves 12-16).” There are also recipes for Tofuburgers, Spicy tofu and rice burritos, and Creamy tofu salad dressing. Address: Tofu Shop Specialty Foods, Inc., 65 Martin Ct., Arcata, California 95521. Phone: 707-822-7401.

3383. Redfield, Linda. 2002. Early work with tofu (Interview). *SoyaScan Notes*. Sept. 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Linda graduated from the University of California at Davis in 1972 in science, and stayed on the work as a research assistant in a biochemistry lab at U.C. Davis—but she did not like the work, which ended up being used for development of pharmaceuticals. “I have a deep interest in how things work at a deep level. I reached a dead end; it didn’t seem very ethical to me.” Also in 1972 she became a vegetarian. Then she became a potter and a gardener for a few years, and eventually found her way into whole foods and cooking. She worked for a few years at the Natural Food Works, a natural foods store, in Davis; she was assistant manager there for a while. Gradually she learned about tofu; she loved experimenting with it and making it. She began making tofu for friends in the area and teaching tofu cooking classes at the extended education program at U.C. Davis and at the Experimental College at Davis. She liked to help people replace meat in their diets with tofu—in dishes that were familiar to people such as tofu burgers or tofu in spaghetti sauce.

On 2 Feb. 1977 Shurtleff & Aoyagi gave a tofu class in Sacramento for the Sacramento Natural Foods Coop. Linda

was there, and that class changed her life. “It was the spark that ignited the whole thing. It totally changed my life. It was an inspirational moment.”

In about 1980 Linda wrote a booklet, based on recipes she had developed, titled “Vegetarian cooking with tofu.” It was typewritten, not typeset, and was never published. She made it available to at her tofu classes and sold copies to friends.

In early 1982 Linda was looking to move away from the Central Valley and the heat of Davis. While visiting friends in Arcata she visited The Tofu Shop, learned that there was a job opening, and applied for it. She got the job. She sold her pottery business in Davis and arrived in Arcata and began to work for The Tofu Shop in May 1982. She brought two recipes with her: Tofu Egg(less) Salad and Tofu Sausage. As far as she knows, both were her original idea. The salad started to be sold commercially in about July 1982 and the sausage in about August.

Also in 1982 she met Patrick and Meredith McCarty in Arcata and began practicing macrobiotics. She worked with them at their center until they left in about 1996.

Linda worked at The Tofu Shop for about a year, then returned to school at Humboldt State Univ. (studied philosophy and art), then returned to work at The Tofu Shop.

She is now a nutrition consultant and she teaches people about whole foods and vegan cooking classes. She does individual nutritional counseling, and she believes some people need to eat fish—especially those who have depleted their health and energy. Linda still lives in the same farmhouse that she moved to when she started living in Arcata; it has a ¼-acre vegetable garden that she loves. Address: Arcata, California. Phone: 707-822-6425.

3384. Meeks, Bob. 2002. Daybreak Cafe: A successful restaurant featuring soyfoods in Arcata, California (Interview). *SoyaScan Notes*. Sept. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bob purchased The Tofu Shop, a soy deli and restaurant, from Matthew Schmit, in 1993. It is an alternative restaurant that features soyfoods, all organic ingredients, and mostly local foods. Approximately 75% of his customers are vegetarians. Bob went to culinary school and has spent his life in the restaurant business. He has owned and run his own restaurants for almost 25 years, and has worked in restaurants for almost 32 years.

More than 20 items on his menu include soyfoods or soy substitutions—not including soymilk as a beverage, in coffee, or in smoothies. His most popular menu items that include soyfoods (in descending order of popularity) are: Vegan Florentine (with cashew gravy). Tofu Scrambler (Bob also sells the a packaged dry seasoning mix for Tofu Scrambler). Omelets with tofu instead of eggs. Other specials include Tofu Veggie Scrambler, stir fries with tofu, and curry rice with tofu. He also serves a number of tempeh recipes.

Some local farmers that grow organically are too small to be certified. This restaurant is doing very well as a business. An important part of its success is the energy that Matthew put into it before Bob arrived—even though Matthew wasn't really a restaurateur—but rather an excellent tofu-maker. Bob gets all of his tofu from Matthew. After people read his menu they are free to color it!

Bob continues to make a new version of the Tofu Turkey that Matthew used to make in Arcata. Bob blends the tofu with seasonings, then stuffs it with bread, and bakes it in a bowl shape in large, medium, and small sizes. It comes with either cashew gravy or a mushroom-miso gravy. It comes out of the oven ready to go, then customers bake it again at home and baste it. "Tofu Turkeys are a pretty big thing in Arcata." He sells it at the restaurant and also wholesales it to a few food outlets in Arcata. He likes keeping it small and local. "With Matthew's tofu its just awesome." His best year he sold about 1,200 Tofu Turkeys from Thanksgiving to Christmas; last year the number was about 300-400. Tofurky changed so that it was more similar to Bob's product; they now have it in a bowl shape, blended and its stuffed. Bob thinks he saw Tofurky spies some years ago at his restaurant trying to steal his secrets. Address: Owner, Daybreak Cafe, 768 18th St., Arcata, California 95521. Phone: 707-826-7543.

3385. Schmit, Matthew. 2002. Tofu turkey in Telluride, Colorado, and Arcata, California (Interview). *SoyaScan Notes*. Sept. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The first tofu turkey that Matthew is aware of was made in Telluride, Colorado, in 1978 at Thanksgiving by Craig Boyken, a longtime close friend of Matthew's who loaned him \$250 to help start The Tofu Shop in Telluride in the fall of 1977. Craig is an amazing, sort of Renaissance man—an artist, mountain climber, musician—among other things. 1978 Craig and his wife, Anne, were living in Telluride in a studio they had built inside an old deserted brick school building. He used to have big banquets in his studio. Shortly before Thanksgiving of 1978 Matthew brought Craig two large blocks of firm nigari tofu, which he sculpted into the shape of a turkey, basted it with soy sauce and oil, baked it in an oven, and continued to baste it from time to time. He probably fashioned some kind of drumsticks on the side. Matthew does not recall any stuffing inside the turkey. As the turkey baked, it shrunk/contracted and lost its distinctive turkey features. It was carved and served with a vegetarian gravy and probably cranberry sauce and stuffing on the side. It was a potluck Thanksgiving vegetarian banquet, with about 30-40 people present, including all people who worked at The Tofu Shop. It was probably the first "Tofu Turkey Thanksgiving" in American history.

After starting The Tofu Shop in Arcata, California, Matthew continued the turkey tradition each year from

Thanksgiving to Christmas, starting in about 1982 or 1983. It was a major event. They started carving the turkey from two large blocks of tofu; they would hollow each out, fill the space with stuffing, then put them together and bake them. It would come out like a loaf; when you sliced it you would get a combination of the white meat plus the stuffing inside. The Tofu Turkey came in three sizes (small, medium, and large—which fed 24 people) and was sold as a special-order product via the deli—either for take-home or as a hot plate (sliced, with gravy, stuffing, and cranberry sauce) to eat at the deli; it was not sold to other retail stores. Their record year, they sold \$4,000 worth of Tofu Turkeys including mushroom gravy, and a custom stuffing with okara and miso. People could also special-order tofu pumpkin pies, cranberry sauce, etc.—a full meal. The product was last sold by The Tofu Shop in 1993. Bob Meeks now makes it at the Daybreak Cafe in Arcata, but he has improved the recipe. Also, the Arcata Co-op, which has a service deli named Spoons, has for many years made their own Tofu Turkeys in house.

Matthew met Seth Tibbott of Turtle Island Foods (home of Tofurky) years ago when he came down through Arcata doing in-store food demos for his tempeh products, and Matthew has talked with him periodically over the years.

To this day, Matthew is asked to bring Tofu Turkey to his extended family's get-together on Thanksgiving in Arcata—for the vegetarians in the family. Address: Tofu Shop Specialty Foods Inc., 65 Frank Martin Court, Arcata, California 95521. Phone: 707-822-7401.

3386. Nordquist, Ted. 2002. Report to ACIDI/VOCA on ProSoy Santa Fe, Ltd. / CEDETI, Project #153041 in Bolivia. San Francisco, California. 15 p. Sept. 13. 28 cm.

• **Summary:** Ted has just returned from three weeks (Aug. 12-Sept. 16) in Bolivia working with ProSoy Santa Fe, Ltda., a women's co-op that makes soymilk at Av. Melchor Pinto No. 211, Santa Fe, Bolivia. Phone: +591 3 334-1663. Fax: +591 3 334-078. email: cedeti@cotas.com.bo. Website: www.cedeti.org. Ted's counterpart at ProSoy was Mrs. Rosa Angulo, President. The project manager was Engineer Ana Cristina Betancourt, Executive Director of CEDETI. Interpreter: Jaime Ugrinovic.

Santa Fe is a small town of about 3,000 inhabitants located 120 km north of the city of Santa Cruz in western Bolivia. The town is strongly influenced by the commercial activity of Yapacani, a city of 15,000 situated km from Santa Fe. This is an agricultural area with soybeans as one of the main crops.

ProSoy presently makes 150 liters/day of soymilk using rustic processing techniques. They were grinding their soybeans in a 25 liter mixer that took 20 minutes to complete; Ted sent them a new Corenco M6 disintegrator. Ted showed them how to improve their soymilk process and to make drinkable soy yogurt, okara burgers, okara patties, okara bread, and soy ice cream.

This report is accompanied by a 3-page background report (with no title, author, or date) on ProSoy that CEDETI prepared for Ted at his request, for him to study before his trip. It discusses: Equipment. Bottling. Milk processing plant. Competition. The organization of the women's group. Business experience. System of production. Plans for the future. The women's language and culture. The women formed this project named "Production of Soy Milk" on 25 Jan. 1997 at 7:00 p.m. But they first began to sell their soy milk several years later. Address: TAN Industries, Inc., 49 Stevenson St., Suite 1075, San Francisco, California 94105-2975; 660 Vischer Ct., Sonoma, CA 95476. Phone: 415-495-2870. Fax: 415-495-3060, Email tedalan@sirius.com.

3387. Wu, Olivia. 2002. The hidden world of tofu: Local producers offer a boggling array—from delicate and custardlike to chewy and crisp. *San Francisco Chronicle*. Oct. 30. p. E1, E4. Food & Wine section.

• **Summary:** About Chinese tofu, with recipes. Color photos show: 1. Yuba. 2. Soymilk. 3. Moist yuba. 4. Vegetarian duck. 5. Pressed tofu. 6. Tofu threads. 7. Fermented tofu. 8. Tofu puffs. 9. Dried yuba sticks. 10. Deep-fried tofu triangles. 11. Fried tofu knots (bayie knots). 12. Sheets of fresh yuba hanging above pans of steaming soymilk at China Tofu factory in Hayward. 12. Fresh, hot soymilk pouring from a spigot into a barrel, where it will be made into tofu. 13. At China Tofu, Hayward, one worker unwraps cloths from a tray of freshly-pressed tofu which another pours steaming curds into a nearby cloth-lined tray. 14. Chef Nei Chia Ji, of restaurant Jai Yun (933 Pacific Ave. at Mason, San Francisco) offers 6-7 delicious tofu dishes.

A tofu glossary, gives for each of 16 entries: Chinese characters, pinyin transliteration, English term, how sold and used. Soymilk (doufu, doujiang), tofu flowers (doufu hua, douhua, doufu nao), silken tofu (nun doufu), soft tofu (ruan doufu), firm tofu (ying doufu), pressed tofu (doufu gan), five-spice pressed tofu (wuxiang doufu gan), pressed tofu sheets (baiye, qianzhang), pressed tofu loops (baiye jie), pressed tofu noodles (gansi, doufusi), yuba (doufu pi, fuye), fermented tofu (furu, doufuru), vegetarian chicken, cuck (suji, suyia), stinky tofu (cho doufu), tofu puffs {deep-fried} (you doufu), deep-fried tofu (zha doufu). Address: Staff writer.

3388. Nordquist, Ted. 2002. Soyfoods are thriving in Bolivia (Interview). *SoyaScan Notes*. Nov. 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The oldest major company is Alimentos Alfa Ltda. in Cochabamba, Bolivia, run by Rene Mouton-Bluys (a native of Belgium). This company makes 36,000 gallons/week of soybase then converts it to Nordland soymilk, soy yogurt, and soy ice cream (including novelties on sticks). Rene has a fleet of 22 delivery trucks. He sells some of his products to school districts. Ted spent some time with him.

Rene has a friend—who was a nuclear scientist and worked in Washington, DC, for 22 years—who decided he wanted to find a means of "Right Livelihood" in Bolivia. So Rene helped him to start a company very similar to Rene's in Santa Cruz. Then Rene stopped shipping to Santa Cruz.

The third and newest company is ProSoy Santa Fe, Ltda., a women's cooperative in Santa Fe, Bolivia; it is run entirely by indigenous women (who are not of Spanish descent). Their native language is Quechua, but they all speak perfect Spanish as well. From Aug. 23 to Sept. 16, 2002 Ted and his wife, Anne-Marie, spent a month working with this Co-op, sponsored by ACDI-VOCA (an American company which paid Ted's travel expenses) and CEDETI (a Bolivian private development organization funded by many nonprofit organizations in several countries incl. Sweden, Switzerland, and Germany. Many of the workers are European volunteers). The co-op consists of 20 women who are very focused in what they are doing. In Bolivia, women do much of the work and have almost no rights. So they have decided to take their lives into their own hands. When they arrived, the co-op was making only soymilk in a building whose rent was paid by CEDETI. One member makes it late at night, so that it is ready at 4:00 each morning. They sold the soymilk hot (an excellent innovation) so they didn't have to refrigerate it. They poured it boiling hot into 10 liter, plastic jugs each with a 2-inch screw cap. When each jug was full and bulging (with 10.5 liters of soymilk), the rest of the women took two jugs each and would either bike or walk or take a motor taxi to a local market. There she would pour the hot soymilk into containers that each customer would bring. Each woman also carried special long, slender plastic bags for customers like taxi or truck drivers that wanted to buy soymilk but had no container. The woman would pour her hot soymilk into the plastic bag, insert a straw then a rubber band around the straw, then wrap a piece of paper around the neck of the hot bag so that the consumer could hold it. Each women then took income from sale of her soymilk back to the cooperative, which divided and managed it. The woman worked at night to make the soymilk was paid extra; they took turns at the night shift.

Each day Ted would teach the women how to make new products, such as soy yogurt, soy ice cream, okara burgers. Then they all ate the new products for lunch. The women loved the new products.

While Ted was there, CADETI was finishing a new building for the ProSoy women's cooperative, made with indigenous materials. Ted helped to design the building and floor plan, plus a soyplant that would produce—instead of the present 150 liters/day—about 400 liters/hour. Ted also sent them a new Corenco (cost \$9,000) stainless steel mill—as a gift. Ted has finished writing his end-of-project report. They are making the new products on a small scale but the new plant will not be up and running until the mill is installed. Ted and Anne-Marie plan to return to Bolivia next September

to visit their two “children.”

Ted and Anne-Marie adopted an 11-year-old orphaned and homeless boy, Armando, who had only one year of schooling and would hang around the soy co-op. They invited him to lunches for a month, then found a person at CADETI who agreed to use money that Ted and Anne-Marie now send each month to pay for his food, shelter, and schooling. Address: TAN Industries, Inc., 49 Stevenson St., Suite 1075, San Francisco, California 94105-2975; 660 Vischer Ct., Sonoma, CA 95476. Phone: 415-495-2870.

3389. Lightlife Foods. 2002. Share your values. And your veggie burgers (Ad). *Vegetarian Times*. Nov. p. 3.

• **Summary:** A full page color ad. A young boy in tennis shoes is standing in an orange-brown field holding something skewered on a metal rod in both hands. In the lower right corner is a photo of the front panel of a box of Meat Free Smart Menu Veggie Burgers. The caption reads: “Discover the smartest food in the freezer. It’s Smart Menu. Seven new, all-natural meatless choices...” Address: Massachusetts.

3390. *Nutrition Business Journal (San Diego, California)*. 2002. Summary of organic initiatives by large corporate entities. 8(11):17. Nov.

• **Summary:** Coca-Cola has acquired Odwalla. ConAgra, Inc. acquired Lightlife Foods. Danone acquired part of Stonyfield Farm. Dean Foods acquired White Wave and Suiza (which owns 14% of Horizon Organic Dairy). General Mills acquired Small Planet Foods (Cascadian Farms, Muir Glen brands). Kellogg acquired Kashi and Worthington Foods. Kraft Foods acquired Boca Burger.

3391. *Nutrition Business Journal (San Diego, California)*. 2002. Top U.S. natural & organic food companies, 2001. 8(11):5. Nov.

• **Summary:** For each of 43 companies gives the ranking by sales, the natural / organic sales in 2001 (\$ million), the percentage of natural & organic that are organic, and the organic sales in 2001 (\$ million).

The following companies make soyfood products: 1. The Hain Celestial Group \$360. 2. Kellogg (Worthington, Kashi) \$255. 4. Coca-Cola (Odwalla, Mad River Traders) \$160. 5. Dean Foods (White Wave, Alta Dena) \$150. 8. General Mills (Sunrise, Cascadian Farms, Muir Glen) \$125. 11. Stonyfield Farm \$85. 13. Amy’s Kitchen \$76. 14. Vitasoy USA Inc. \$75. 15. Imagine Foods Inc. \$70. 19. Pacific Foods \$63. 20. Kraft Foods (Boca Burger) \$60. 23. Eden Foods Inc. \$57. 25. Gardenburger \$55. 29. Galaxy Nutritional Foods \$42. 33. Conagra (Lightlife Foods) \$35.

Sum of sales of top 43: \$3.28 billion. Sum of organic sales of top 43: \$1.63 billion.

3392. *Nutrition Business Journal (San Diego, California)*. 2002. Kraft Foods expands organics under Boca Foods

Division. 8(11):12. Nov.

• **Summary:** When Kraft purchased the company, Boca did not have any organic products. In 2001, Boca Foods launched its first organic products. The company presently offers meatless burgers, breakfast links, and patties containing organic soy.

3393. Kaplan, J. Kim. 2002. For you, the consumer. *Agricultural Research* 50(12):4-9. Dec.

• **Summary:** A color photo on the top half of the first page shows many soy products, both foods and Industrial products, including: Kaukauna Nacho Cheese, Yves Veggie Tofu Wieners, ProSobee soy formula, NutriGrain energy bars, Betty Crocker Creamy deluxe, Wish-Bone salad dressing, Edensoy soymilk, Mori-Nu Tofu, Ken & Robert’s Veggie Burgers, SoyGold industrial solvent, Natural Touch Okara Pattie, soy ink and a newspaper printed with it.

Many “products that people use every day could justifiably carry the stamp ‘Courtesy of ARS Research.’” Omaha Steaks began offering irradiated hamburger patties and ground beef in November 2000—to be sure it is free of *Escherichia coli* O157:H7, bacteria that can cause serious, even life-threatening illness. Today all the 6.5 million pounds of ground beef they sell is irradiated, which means it is treated with “ionizing radiation produced by cobalt and cesium atoms, machine-produced X-rays, or electron beams. Treated meat in no way becomes radioactive.” Final FDA approval for irradiation treatment of meat came in Feb. 2000.

Nutrim, a product similar to Oatrim developed by USDA’s Agricultural Research Service (ARS), is now being used to make vegan, organic chocolate truffles. Mrs. Mudd’s Inc. (Oceanside, California) makes the delicious products; Nutrim flows like heavy dairy cream or coconut cream.

Tifsport is a variety of bermuda grass developed for football and soccer fields, and golf courses. Address: USDA-ARS Information Staff, 55601 Sunnyside Ave., Beltsville, Maryland 20705-5128. Phone: 301-504-1637.

3394. **Product Name:** Meatless Jerkies [Hickory Smoked Soya, Hot & Spicy Style (with Shiitake Mushrooms), Teriyaki Flavored].

**Manufacturer’s Name:** Primal Spirit Foods.

**Manufacturer’s Address:** RR1, Box 314, Limestone Hill Rd., Moundsville, WV 26041. Phone: (888) 817-1834.

**Date of Introduction:** 2002 December.

**Wt/Vol., Packaging, Price:** 1 oz bars or 4 oz bags.

**How Stored:** Shelf stable.

**New Product–Documentation:** Spot in *Vegetarian Journal*. 2003. Issue two. p. 9 “Introducing new ingredients for meatless jerkies.” This company was founded in 2001 and we are not told when their first or last two products were introduced. For more, visit their website at [www.primalspiritfods.com](http://www.primalspiritfods.com).

3395. **Product Name:** [Mo' Tuna: Veggie Filets].  
**Foreign Name:** Filets Végétariens de Thon.  
**Manufacturer's Name:** Momo's Kitchen Ltd.  
**Manufacturer's Address:** P.O. Box 94203, Richmond, BC V6Y 2A4, Canada.  
**Date of Introduction:** 2002.  
**Ingredients:** Water, non GM soy protein concentrate, non GM sunflower oil, wheat gluten, glucose, evaporated cane juice, salt, seasoning, natural food flavours, dill weed, lemon oil, natural food color.  
**Wt/Vol., Packaging, Price:** 6 oz (170 gm) paperboard box (2 patties). Retail for \$2.69 at Safeway supermarket (2002/03, Lafayette, California).  
**How Stored:** Refrigerated.  
**New Product–Documentation:** Product with Label purchased at Safeway supermarket in Lafayette, California. 2002. March 11. 4 by 4½ by 1½ inches. Blue, white, red, orange and green on purple.

3396. Sol Cuisine. 2002. Second Nature has found its Sol Mate! We are pleased to announce that Second Nature has merged with Soy City Foods and our products will be sold under the brand name Sol Cuisine (Leaflet). Mississauga, Ontario, Canada. 2 panels each side. Each panel: 28 x 21.5 cm. [Eng; Fre]

• **Summary:** See next page. On the front panel of this glossy, color leaflet, the text continues: “Together we have 28 years of experience serving the health and foodservice industries. Feed your Body, Mind and Sol.” At the top of the cover is the Sol Cuisine logo in blue and green, above a yellow stylized sun, all on a variegated brown background. One of the two inside panels is given information about the company's ten products: Meatless Burger, Meatless Chili, Meatless Taco Filling (Dry Mixes), Vegetable Burger, Original Burger, Spicy Bean Burger (Frozen), Organic Tofu, Grain Burgers, Falafels, Veggie Burgers. For each product is given: A color photo of the front of the package, nutritional information, the ingredients in English and French. On the back panel is a large photo of a veggie burger on a sesame bun, with this text: “With our expanded new facility, we plan to introduce a variety of healthy, vegetarian products, to better meet the needs of your busy lifestyle. We will continue to focus on exceptional vegan, gluten free and organic ingredients that are good for body, mind and sol.” Across the bottom is the company's contact information, plus logos for Soy City Foods and Second Nature (above a yellow stylized sun). Address: 5715 Coopers Avenue, Unit 1, Mississauga, Ontario, Canada L4Z 2C7. Phone: 905-502-8500.

3397. Charney, Ken. 2002. The bold vegetarian chef: Adventures in flavor with soy, beans, vegetables, and grains. New York, NY: John Wiley & Sons. vi + 313 p. Illust. Index. 23 x 19 cm.

• **Summary:** Contents: Acknowledgments. Introduction:

Vegetarian delights. 1. Starting off right: Appetizers and snacks. 2. Soups and stocks: Warm beginnings. 3. Breakfast, lunch, and brunch: From scrambles to sandwiches. 4. Burgers, fritters, and loaves: Stars of vegetarian cuisine. 5. Outrageous soy: Tempting tofu and tempeh. 6. A bold way with beans: Powerhouse dishes. 7. Pasta, risotto, and polenta: Comfort carbs. 8. Seitan: The power of wheat meat. 9. Vegetables and grains on the side: All the best accompaniments. 10. Green salads: Crisp and well dressed. 11. Just desserts: Sweetness and light.

On the rear cover is a brief bio of Ken Charney; on the front cover is a color portrait photo. Address: Seattle, Washington.

3398. Dragonwagon, Crescent. 2002. Passionate vegetarian. New York, NY: Workman Publishing. x + 1110 p. Illust. (by Robbin Gourley). Index. 23 cm. [10 ref]

• **Summary:** A superb, massive book, “with more than 1,000 robust recipes with notes on cooking, eating, loving, and living fearlessly”—as the cover proclaims. Very nicely designed, with many delicious recipes. The author is an outstanding writer with a deep knowledge of ingredients—including soyfoods.

Chapter 10, “Celebrating soyfoods” (p. 623-78) begins: “As a soy-loving girl from way back I invite you to enter an ever-expanding universe of foods: not merely extraordinarily healthful, but delectable and diverse—great ingredients for a passionate cook.” This chapter's contents: Introduction. Inneccote. Whole soybeans. Green soybeans (edamame). Canned soybeans. Cooked dry soybeans. Milled soybeans (soy flour and soy grits). Soynuts and soynut butter. Tempeh. Miso. Natto. Okara. Soy protein isolates. Textured soy protein (TSP or TVP). Soy sauces. Soy milk & soy milk products (soy yogurt, soy cheeses). Tofu & tofu products (fresh perishable tofus, classic traditional, seasoned tofus {savory baked tofu, other seasoned baked tofus}, ready-made tofu dips and spreads, ready ground tofu). Dry or packaged tofus (cupboard, like silken tofu). Other miscellaneous tofus (tofu burgers and sausages, deep-fried tofu, freeze-dried tofu [dried frozen tofu], tofu hot dogs, yuba).

Concerning yuba the author writes (p. 656): “I believe this traditional Asian product will explode onto the American soy-scene soon because it is so versatile and delicious and has a long and honorable history as a meat alternative. It is the unique thin-chewy texture of yuba sheets, when layered with seasonings and shaped, stacked, cut, and prepared in certain ways, that gives such a convincingly ‘meaty’ feeling to such dishes.”

The word “tofu” appears on 100 pages in this book, “tamari” on 100 pages (she uses the phrase “tamari or shoyu soy sauce”), “soy sauce” on 100 pages, “shoyu” on 98 pages, “tempeh” on 88 pages, “seitan” on 72 pages, “miso” on 58 pages, “soy milk” on 47 pages, “tofu sour cream” on 40 pages, “silken tofu” on 30 pages, “soybeans” on 25 pages,

**Second Nature has found its Sol Mate!**

Body, Mind and Sol!**

“baked tofu” on 22 pages, “savory baked tofu” on 16 pages, “firm tofu” on 10 pages, “green soybeans” and “edamame” each on 8 pages, “soy flour” on 6 pages, “soy ice cream” and “TVP” each on 5 pages, “dairy free” on 4 pages, “firm silken tofu,” “teriyaki,” “textured vegetable protein,” “yuba” and “whole soybeans” each on 2 pages, “Silk Soymilk Creamer” and “meat alternatives” each on 1 page.

3399. Emi, Kazuko. 2002. Japanese cooking: The traditions, techniques, ingredients and recipes. London and New York: Hermes House. 256 p. Illust. (color). Index. 31 cm.

• **Summary:** A beautiful book, with many old color woodblock prints and creative color photos. With recipes by Yasuko Fukuoka. Contents: Introduction. The development of Japanese cuisine. Foreign influences. The impact of isolation. Sushi: a national favourite. The tea ceremony. Traditions and festivals. Seasonal and regional foods. Cooking and eating. Equipment and utensils. Utensils for cooking with rice. Cooking at the table. Crockery and cutlery. Drinking vessels. The Japanese kitchen: Rice and rice products,... dried beans (incl. soya beans, boiled soya beans, dried yellow beans, dried green beans, black soya bean, soya bean products, kinako, natto), fresh beans (incl. eda-mame), tofu and tofu products (incl. fresh tofu, okara, silken tofu, koya-dofu, yuba, fried tofu, abura-age, atsu-age, ganmodoki, home-made ganmodoki), gluten products, mushrooms, seaweeds, fish, shellfish, fish roes, fish products, fish pastes, meat and chicken, sauces for flavouring and dipping, ready made sauces,... Japanese cooking (recipes). Glossary. Acknowledgements. Shopping information.

The index mentions: Abura-age (tofu), atsu-age (tofu), azuki beans (incl. *an* {sweet bean paste}), eda-mame, gammodoki, kinako (yellow soya bean flour), koya-dofu, miso, miso soup, shoyu (soy sauce), soya beans, silken tofu, sukuyaki (with tofu), tofu, yuba, vegetarian tempura.

Concerning kinako [roasted whole soy flour]: A photo (p. 65) shows kinako made from soybeans with three different color seedcoats: black, yellow, and green. The kinako made from the black soybeans is the darkest of the three—a medium brown—but not at all black. The kinako made from the yellow soybeans is the lightest of the three—yellowish brown. The kinako made from the green-coated soybeans is intermediate between the other two in darkness—light brown—but with no trace of green in its color. When kinako is mixed with an equal volume of sugar and a pinch of salt, it is rolled in lightly-boiled, soft mochi cakes which make tasty confection. Kinako, which is also used to make *wagashi* (Japanese cakes / confections), is sold at most Japanese grocery stores or supermarkets. Address: Japan.

3400. Sass, Lorna J. 2002. Lorna Sass' complete vegetarian kitchen: Where good flavors and good health meet. New York, NY: William Morrow. An imprint of HarperCollins Publishers. xiv + 494 p. Index. 26 cm. [35+\* ref]

• **Summary:** First published in 1992 as *An Ecological Kitchen: Healthy Meals for You and the Planet* (William Morrow). This innovative vegan cookbook offers 250 cholesterol-free recipes. It features a complete glossary of wholesome ingredients for stocking the vegan pantry (no meat, dairy, or eggs). Address: New York City.

3401. Lightlife Foods, Inc. 2003. Now, there's something especially good in the freezer (Ad). *Vegetarian Times*. Jan. p. 17.

• **Summary:** This full-page color ad shows a young lady in a sweater and tight pants lying on her back in the snow, with her legs wide apart. A pattern in the snow shows she has been flapping her arms and legs like wings. At the lower right is a package of “Smart Menu Meatless Meatballs.” The text at the bottom reads: “Discover the smartest food in the freezer. Sometimes convictions and convenience do meet. A perfect example is Smart Menu. Seven new meatless alternatives you'll find in the freezer section. Simple to serve. And each one is a delicious new chance to eat healthy and feel good. From Lightlife and over 20 years of healthy goodness. For recipes and ideas go to [www.lightlife.com](http://www.lightlife.com) or call 800-Soy-Easy.” Address: 153 Industrial Blvd., Turners Falls, Massachusetts 01376-1611. Phone: 1-800-Soy-Easy.

3402. Boca Foods Co. 2003. Go meatless. Win \$100,000. Boca Meatless Burgers (Ad). *Vegetarian Times*. Feb. p. 68-69.

• **Summary:** See next page. A full page color ad (p. 69) on a royal red background. In the center is the front panel of a pack of “Boca Meatless Burgers—All American. Flame Grilled. Soy Protein Burgers. 68% less fat.” Fine print at the bottom of the page gives the rules of the contest.

A related 1/3 page vertical ad appears on page 68. Address: Massachusetts.

3403. Gardenburger, Inc. 2003. Annual report 2002 (Form 10-K). 1411 Southwest Morrison St., Suite 400, Portland, OR 97205. 37 + 22 p. 28 cm.

• **Summary:** The annual report is largely a copy of the 10-K form submitted to the government. Net sales in 2002 were \$54.6 million, up from \$50.8 million the previous year. Net income was a loss of \$3.874 million, smaller than the loss of \$7.156 million the previous year.

Accompanying the annual report is a notice of Annual Meeting of Shareholders and proxy statement (21 p.). The CEO, president, and chairman of the board is now Scott C. Wallace. His salary in 2002 jumped to \$252,923 plus a bonus of \$15,000 and 50,000 stock option shares, compared with \$170,769 salary plus a bonus of \$42,500 in 2001. A graph (p. 19) shows that the value of company's stock has fallen steadily since Sept. 1998, dropped to almost nothing by Sept. 2001, then has risen very slightly by Sept. 2002. Address: Portland, Oregon.

**GO MEATLESS**  
You could **WIN**  
**\$100,000**

Boca products to be awarded as 18 product coupons. Total approximate retail value of all prizes \$107,272. ©2002 Boca Foods Company. BOCA is a registered trademark of Boca Foods Company.

3404. Carnig, Jennifer. 2003. Vegan actress-activist pitches vegetarian fare to ballparks. *Oakland Tribune*. March 10. Bay Area Living section. p. 1, 5.

• **Summary:** Johanna McCloy, age 38 of Oakland, is known for playing Ensign Calloway in “Star Trek: The Next Generation.” But as director of Soy Happy!, she is active in making vegetarian food more readily available. Three months ago vendor Ron Kasdan began selling veggie dogs from his food cart in San Francisco’s Financial District. A color photo shows Johanna, Ron, and the Cart—with Veggie Dogs advertisements on the side.

McCloy’s work began several years ago [April 2000] at a Dodgers Game in Los Angeles, when she realized there was nothing in the stadium for her to eat—nothing! So she called the stadium the next day and asked them to consider having something vegetarian there. The guy said, “OK, fine.” And the next week they were offering vegetarian food—just like that. She realized that all she had to do was ask.

So McCloy began contacting ballparks across the USA and discovered that many offered no veggie food alternatives. So she began a phone and letter campaign that targeted every major league baseball stadium in America. Her mission: Get them to offer veggie dogs.

Today 10 major league ballparks offer veggie dogs. Surprisingly 80% of the people who buy them are not vegetarian; they are just health conscious. McCloy, who eats no animal products, believes that no animal should be harmed for her benefit.

Last week she helped to introduce a resolution to the Education Committee of the California state legislature asking that public schools always offer students vegetarian alternatives in school lunches. It passed unanimously and will be voted on next by the assembly’s Appropriations Committee. Address: Staff writer.

3405. ConAgra Foods. 2003. Make the world a better place. One meal at a time (Ad). *Vegetarian Times*. March. Rear cover.

• **Summary:** This full-page color ad shows a mom and dad happily swinging their son in the air between them as they walk down a gently-sloping green hillside, with blue sky behind them. In the lower right corner is a photo of the front panel of Lightlife Smart Menu Chick ‘n Patties. The text reads: “Discover the smartest food in the freezer. Sometimes convictions and convenience do meet. A perfect example is Smart Menu. Seven new meatless alternatives you’ll find in the freezer section. Simple to serve. And each one is a delicious new chance to eat healthy and feel good. From Lightlife and over 22 years of healthy goodness. For recipes and ideas go to [www.lightlife.com](http://www.lightlife.com) or call 800-SOY-EASY.”

Note: The name of the manufacturer (ConAgra) does not appear in the ad.

3406. **Product Name:** Soy Creations Vegetarian Smoked Soy-Salmon Pizza, Grilled Soy-Chicken Pizza, Soy-Chicken Pot Pie (in Mushroom Sauce, in Kung Pao Sauce), Smoked Soy-Salmon and Penne (in Lemon Herb Sauce), Grilled Soy Chicken and Linguine (in Pesto Sauce).

**Manufacturer’s Name:** i Foods, Inc.

**Manufacturer’s Address:** 2222 Davie Ave., Los Angeles, CA 90040. Phone: (213) 728-8288.

**Date of Introduction:** 2003 March.

**Ingredients:** Cod Fillet: Textured soy protein, water, soybean oil, isolated soy protein, whey protein, sugar, corn starch, tapioca starch, wheat protein [gluten], potato starch, salt, spices, natural flavors (from vegetable sources), seaweed, autolyzed yeast extract.

**New Product—Documentation:** See next 2 pages. Three leaflets (8½ by 11 inches, 1 panel each side, glossy color, front and back) sent by Patricia Smith from Natural Products Expo West at Anaheim. 2003. March. The front of each shows a large color photo of the prepared product.

3407. Kraft Foods Inc. 2003. Can thou tell the difference? Boca Meatless Burgers: The taste will change you (Ad). *Vegetarian Times*. March. p. 3.

• **Summary:** See two pages after next. This full-page color ad shows two nuns, each dressed in identical black and white habits, looking up toward heaven—with a colorful sunset in the background. Each is holding an identical-looking burger in her two hands at waist level. The text reads: “Finally the burger you love has a tasty, meatless twin. Boca Flame Grilled. So good, who can tell? 68% less fat. (Footnote: Than a ground beef hamburger.) The protein you want. Hallelujah. You gotta try Boca Burgers. Like Sister Maria. (She’s the twin on the left.)”

In the lower right corner is a photo of the front panel of the product. For more information visit [bocaburger.com](http://bocaburger.com). Note: The name of the manufacturer (Kraft) does not appear in the ad. Address: [Illinois].

3408. Tasty Eats, Inc. 2003. Finally, a meatless jerky with taste (Ad). *Natural Foods Merchandiser*. March. p. 96.

• **Summary:** This 8½ by 11 inch color ad shows five packages of the company’s product: Soy Jerky—Dry Style: Original, Teriyaki, Ginger, Hot N’ Spicy, and Peppered. For more information: [www.TastyEats.com](http://www.TastyEats.com).

3409. **Product Name:** Soy Jerky—Dry Style (Original, Teriyaki, Ginger, Hot N’ Spicy, or Peppered).

**Manufacturer’s Name:** Tasty Eats, Inc.

**Manufacturer’s Address:** 25 Greystone Manor, Lewes, Delaware 19958. Phone: 302-236-7503.

**Date of Introduction:** 2003 March.

**Ingredients:** Ginger: Textured soy protein (non-GMO), water, evaporated cane juice, expeller pressed sesame oil, spices, ginger powder, salt, white pepper, caramel powder

• **Summary:** See next page. Leaflet sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2003. March. Front: “Made from gourmet, organic tempehs. Now available in Original, Smoked and TexMex varieties. Low fat. Vegan.

Rear: Shows the front panel of each package, with a product description and ingredients for each. Address: Hood River, Oregon. Phone: (800) 508-8100.

3412. **Product Name:** Vegan Chicken Tender, Vegan Chicken Nugget, Vegan Chicken Breast, Vegan Ham, Vegan Fish Steak.

**Manufacturer’s Name:** VegeFarm Corp.

**Manufacturer’s Address:** 877 Azusa Ave., City of Industry, CA 91745. Phone: 1-877-877-VEGE.

**Date of Introduction:** 2003 March.

**New Product–Documentation:** Leaflet (front and back, 8½ by 11 inch, glossy color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2003. March. The front shows the front panel of all five products. The rear gives Nutrition Facts and ingredients for each. The first two ingredients in each are: “Water, High Fiber Textured Soy Protein.” The business card of Tom Chen, President, at stapled to this leaflet.

Note: One year ago this vegan food manufacturing company (headquartered in Taiwan) was named Vegeking and its brand was VeggieMaster. They were at the same address in City of Industry, California.

3413. Fischer, Douglas. 2003. New opening day tradition: sun, beer and veggie hot dog. *Oakland Tribune*. April 1. News section. p. 1, 7.

• **Summary:** The Oakland Athletics and San Francisco Giants finished 2nd and 5th respectively in the second annual survey of menus at major-league ballparks, conducted by PETA (People for Ethical Treatment of Animals); Toronto finished first, largely because it is the first in the league to have an all-vegetarian food cart. Oakland’s Johanna McCloy, a vegetarian, started the trend a few years ago at Dodger Stadium when she was living in Los Angeles. People running concessions say vegetarian fare is a growing market. However last season, Oakland fans ate 900,065 regular hot dogs at 81 home games in the Coliseum—compared with only 5,265 veggie dogs, which is 65 per game, or 0.6% of the total.

The food available to vegetarians at baseball games has improved dramatically in recent years. Ten years ago a stadium vendor would have laughed if a fan asked for a veggie dog. Today, they apologize if they don’t have one. Address: Staff writer.

3414. *Sports Illustrated*. 2003. Sports beat. April 14.

• **Summary:** Actress Johanna McCloy, age 38, has launched Soy Happy, an organization whose goal is to get vegetarian fare on the menu at every major league ballpark. Several years ago she began writing concession managers at baseball parks and now about a dozen stadiums carry veggie dogs. Her website, soyhappy.org, includes an endorsement from Cardinals manager Tony La Russa, a vegetarian.

3415. *ASA Today* (St. Louis, Missouri). 2003. Soyfoods enjoy growing popularity. 9(6):4-page insert after p. 2. April.

• **Summary:** Attractive (with 5 color photos), interesting, and original. This is the first such insert in this 4-page newsletter, and the first time this newsletter has contained a significant amount of information about soyfoods. Below the title is printed: “A special publication from the American Soybean Association.” On the back page we read: “ASA thanks the sponsors of this publication...: Solae [DuPont & Bunge],

Soyatech, and White Wave. Below the logo of each company is 4½-inch-long column describing the company, its history and activities.

Contents of the insert: Introduction. Soyfoods become mainstream. The most common [widely used] soyfoods. U.S. consumers more aware of soyfoods. The push for soymilk in schools. Soyfoods for the future. Export demand for food ingredient beans.

It begins: “No longer are soyfoods considered unusual or hard to find. No longer are they considered the kind of foods only eaten by so-called ‘granola-crunchers’ or ‘health fanatics’... The menu at the recent American Soybean Association (ASA) awards banquet featured a serving of delicious edamame (sweet green soybeans) that soybean growers and guests alike enjoyed with enthusiasm.”

3416. El Burrito Mexican Food Products, Inc. 2003. Tastes like the real things, only better for you! (Ad). *Vegetarian Times*. April. p. 28.

• **Summary:** This color ad (5 by 7½ inches) shows the company’s various meatless soy products. Soyrizo [the best-seller, introduced Jan. 1997], SoyTaco [Jan. 1998], SoyLoaf [March 1999], SoySteak [2001, Jan. 2003], Soy Sausage [March 2003], Soy Dogs [March 2003]. “Made with 100% soy. Vegetarian. Meatless. No preservatives. No cholesterol.

Talk with Mark Roth, President and Founder. 2003. March 17. He gives the date each product was introduced. In 1992 he had open heart surgery; his doctor told him to cut way back on his consumption of cholesterol and suggested that he eat Morningstar Farms and Yves meat alternatives. He thought they “tasted like cardboard,” so in 1995 he began developing his own meatless soy products. In Jan. 1997 his company—which until that time had sold Mexican foods—introduced Soyrizo, which is still the company’s best seller. Now the company is slowly moving from a Mexican food company to a Mexican soyfood company. Address: 14944 Don Julian Rd., City of Industry, California 91745. Phone: 1-800-933-7828.

**El Burrito Mexican Food Products, Inc. (800) 933-7828**

launch a fried tofu burger (Interview). *SoyaScan Notes*. May 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Akiko recently saw a program on Japanese TV stating that McDonalds Holdings Co. (Japan) Ltd., the American burger giant, is experiencing lagging sales and decreasing profits for the first time in 29 years in Japan. In response they have decided to start selling a fried tofu burger as a healthy alternative in their Japanese restaurants, and to make other healthy additions to its Japanese menu. The new tofu burger will come with a ginger-flavored soy sauce and sell for \$1.91. McDonalds’ problems include youth savvy

competition from the Freshness Burger chain and fears about Bovine Spongiform Encephalopathy (BSE).

Note: An article in *Bluebook Update* (May 2003, p. 1) stated that On April 23, McDonalds Holdings Co. (Japan) Ltd., a mainstream foodservice company, is adding “tofu hamburgers” to its menu. Address: Walnut Creek, California.

3418. **Product Name:** Tempeh Burger.

**Manufacturer’s Name:** Henry’s Tempeh.

**Manufacturer’s Address:** Scott St., Kitchener, ON N2H 0A3, Canada.

**Date of Introduction:** 2003 May.

**Ingredients:** Incl. whole soybeans.

**Wt/Vol., Packaging, Price:** 2 per round pack. Vacuum packed.

**New Product–Documentation:** Letter (e-mail) from Henry Schmidt, founder of Henry’s Tempeh. 2011. Jan. 12. In May 2003 Henry introduced Tempeh Burger. which was discontinued in April 2004. He made tempeh, then ground it in a meat grinder, seasoned it with dry seasonings and spices (no marinade), put it into a patty machine, made patties, and shaped it into patties—very labor intensive. “It was brutal, just brutal.” He no longer has any labels for the tempeh burgers.

3419. Kraft Foods Inc. 2003. Say cheese! (Ad). *LOHAS Journal (Colorado)* 4(1):42. Spring.

• **Summary:** This 1/3 page color ad shows the front of a package of “New! Boca Meatless Burgers. Cheeseburger, Made with Organic Soy.” It contains “60% less fat than a ground beef hamburger.” Address: [Illinois].

3420. Kraft Foods Inc. 2003. Try to tell the difference. Boca Meatless Burgers: The taste will change you (Ad). *Vegetarian Times*. May. p. 3.

• **Summary:** See next page. This full-page color ad shows two tall African-American twins, each dressed in a straw hat, white shirt, red chef’s apron, and blue shorts, standing in front of a blue sky and white picket fence on a green lawn. In one hand, each holds a long burger flipper (spatula) and on the index finger of the other each balances a burger between buns with all the trimmings.

The text across the bottom reads: “Finally, the burger you love, has a tasty meatless twin. Boca Flame Grilled. So good, who can tell? 68% less fat. (Footnote: Than a ground beef hamburger.) The protein you want. Gentlemen, start your barbecues. You gotta try Boca Burgers.”

In the lower right corner is a photo of the front panel of the product. For more information visit bocaburger.com. Note: The name of the manufacturer (Kraft) does not appear in the ad. Address: [Illinois].

3421. **Product Name:** Tofurky Gourmet Meatless Sausages [Beer Brats with Micro Brewed Amber Ale, Sweet Italian Sausage with Sun Dried Tomatoes and Basil, or Kielbasa–

Great Sandwich or Dinner].

**Manufacturer’s Name:** Turtle Island Foods, Inc.

**Manufacturer’s Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. Phone: 1-888-TOFURKY (863-8759).

**Date of Introduction:** 2003 May.

**Ingredients:** Beer Brats: Tofu (non genetically modified soybeans, water, magnesium chloride or nigari), vital wheat gluten, expeller pressed non genetically modified canola oil, shoyu soy sauce (water, soybeans, wheat, salt, culture), Full Sail Amber Ale, herbs and spices, water.

**Wt/Vol., Packaging, Price:** Four vegan hot dogs in 14 oz pack. Suggested retail price: \$3.89 to 4.29.

**How Stored:** Frozen or refrigerated.

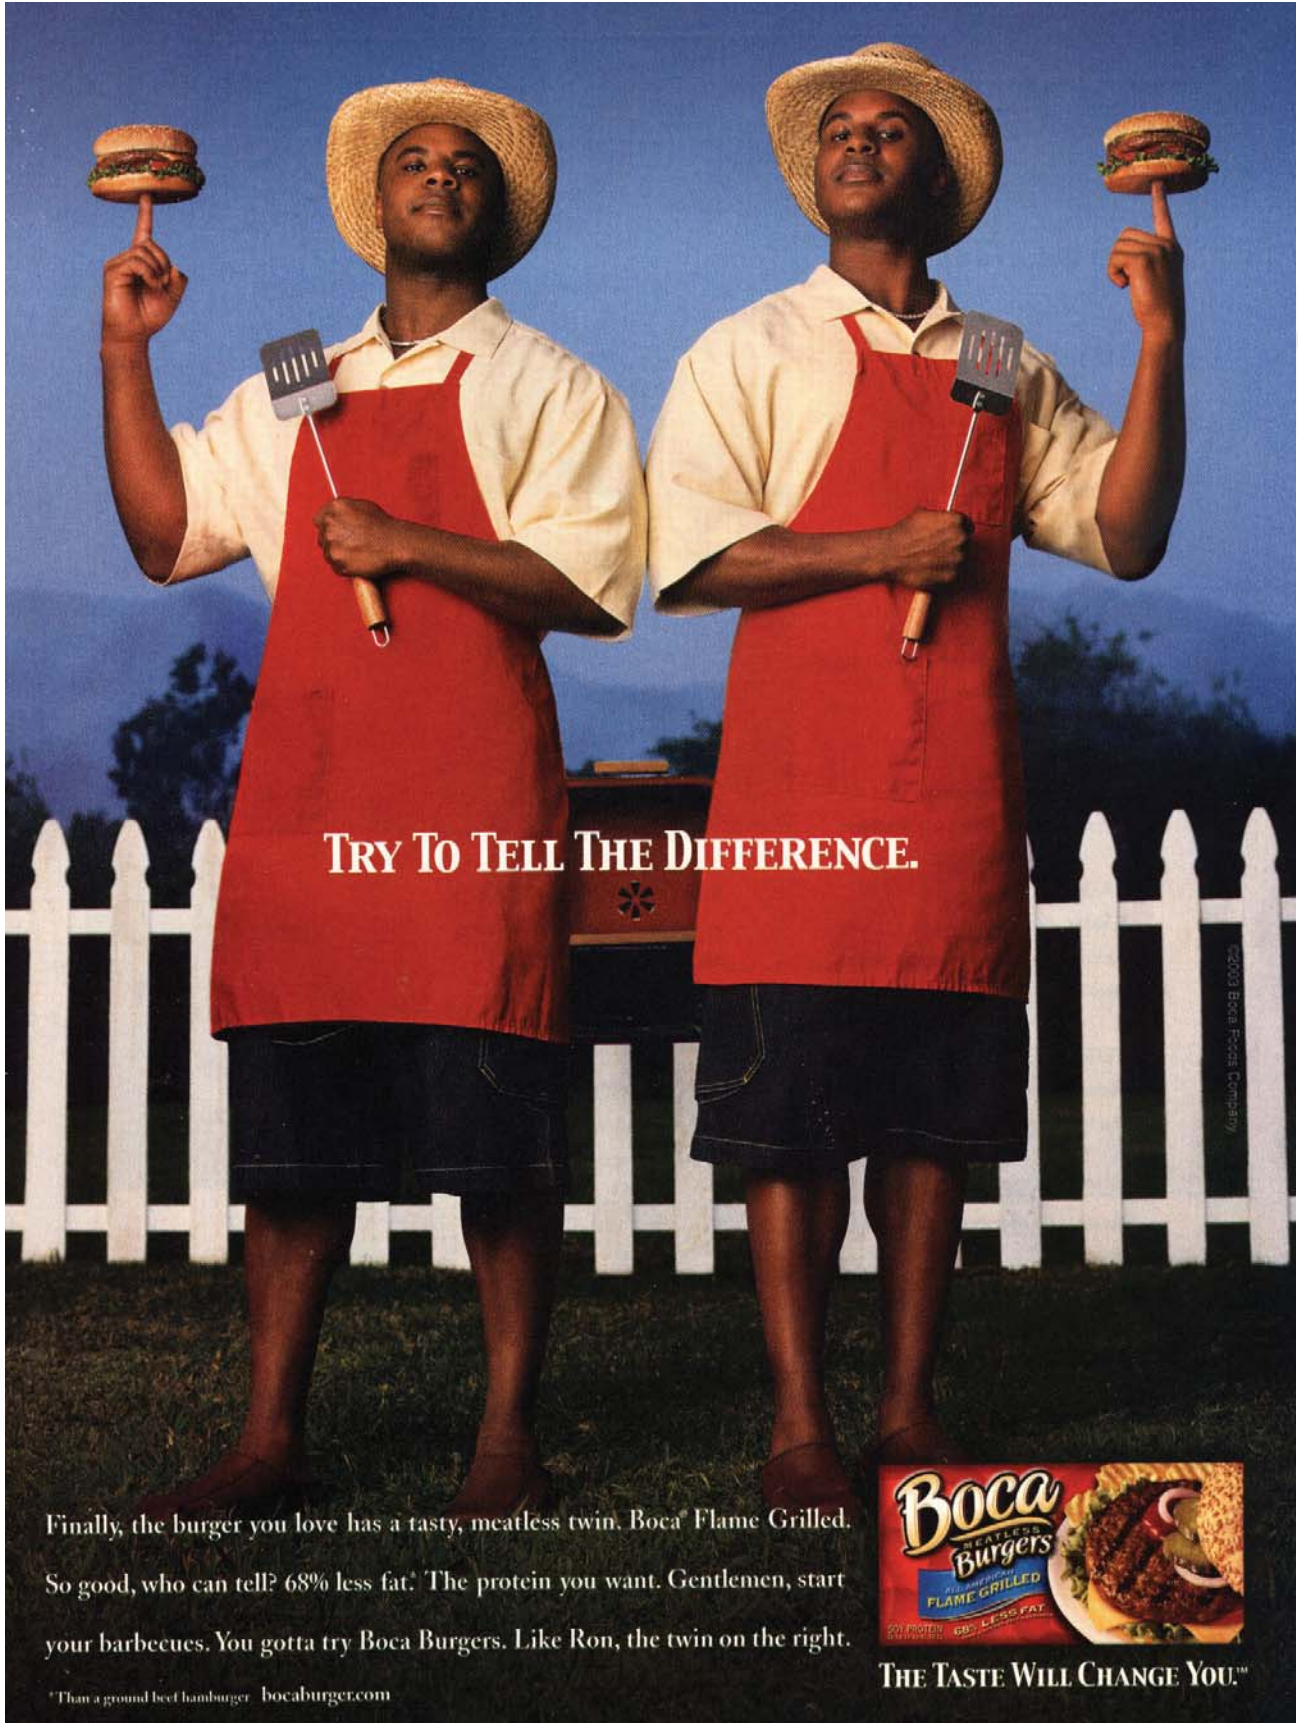

**New Product–Documentation:** See page after next. Color leaflet and news release from Turtle Island. 2003. May 1. “The liberation of the summer grill: No longer meat only.” “Turtle Island Foods today announces the first Line of Vegetarian Sausages that Sizzle on the backyard barbeque... ‘We hope that these Gourmet Sausages will do for the Vegetarian Grilling experience what the Tofurky Roast did for the Vegetarian Holiday Table...’ says Seth Tibbott, founder and company president.”

There are 3 sausages in the line. “Turtle Island is the first US company to be certified Vegan by the United Kingdom’s Vegan Society. Each pack contain 4, three and one half ounce sausages.” In the upper right corner of the front panel of each label is the colorful vegan logo, which is a yellow quarter circle with the words “Certified Vegan” around a sunflower.

Talk with Seth Tibbott of Turtle Island. 2003. May 14. These sausages will be available in early June in retail stores. They were introduced at the Anaheim trade show (March 2003) and attracted long lines of people. Even a janitor at the show kept coming back for more and said they were his favorite product at the show. They barbecue better than all other products for two reasons: (1) They have a little higher fat content; and (2) The main ingredient is tofu, rather than soy protein isolates. In fact, each type of sausage contains more than 50% tofu! The microbrew ale (beer) is made by one of Seth’s next-door neighbors. Jean Greenfield, in charge of quality control for Whole Foods Market in San Francisco, California, told Seth that her company plans to phase out products made with hexane-solvent extracted soy protein isolates.

Seth had these sausages certified by the Vegan Society in Jan. 2003. His company has always made only vegan products, but they generally positioned the products as meatless or vegetarian rather than vegan; now that may change. He is now developing a line of Tofurky hot dogs, and may also produce them as private label brands for other companies.

Products (all three) with Labels sent by Turtle Island. 2003. Nov. 19. On the front panel of each label, a color photo shows the product served in a dish (as between buns or

GRILL**

sliced over pasta) against a single-color background. Text: "Meatless & Delicious." "Keep frozen or refrigerated." Logo: "Outdoor Grill Approved." Turtle Island Foods, Inc. logo of turtle with a planet-shaped shell inside of a circle of soybean stem and leaves. Soyfoods Center taste test: We liked the Kielbasa best and found the Sweet Italian Sausage too spicy.

Color leaflet sent by Seth Tibbott of Turtle Island. 2003. Nov. "There's 3 big new dogs in the house." Note: Seth says this was printed in about June 2003.

3422. Richmond, Akasha. 2003. McDonalds is now running national TV ads for their Veggie Burger—made by Yves (Interview). *SoyaScan Notes*. June 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Can this really be happening in the USA? Yves is a Canadian company. Address: Los Angeles, California.

3423. **Product Name:** Soy Chorizo & Potato Taquitos.

**Manufacturer's Name:** Trader Joe's (Marketer-Distributor).

**Manufacturer's Address:** South Pasadena, CA 91031.

**Date of Introduction:** 2003 June.

**Ingredients:** Tortilla (corn, water, lime), roasted potatoes, Soyrizo (water, textured soy protein, canola oil, spices, distilled vinegar, soy protein concentrate, salt, xanthan gum), onion, green bell pepper, diced green chilies, guajillo chile, jalapenos, garlic, cilantro, refined canola oil (used for frying).

**Wt/Vol., Packaging, Price:** 10 taquitos. 16 oz (1 lb) 454 gm clear plastic shell. Retail for \$2.99 at Trader Joe's (2003/07, Lafayette, California).

**How Stored:** Refrigerated.

**New Product—Documentation:** Product with Label purchased at Trader Joe's in Lafayette, California. 2003. July 13. 8 by 5.5 by 3 inches clear plastic shell. Self-adhesive label 4 by 3 inches. Purple, red, white, green, and black." "Meatless. "Soy Chorizo is a healthy soy alternative to traditional chorizo that has the same texture and flavor. Dairy free. wheat free. Keep frozen." Soyfoods Center taste test. 2003. July 13. Pretty good. Too spicy for our tastes.

3424. Turtle Island Foods, Inc. 2003. There's 3 big new dogs in the house (Leaflet). P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. 1 p. Front and back. 28 cm.

• **Summary:** On the front in the foreground is a huge Tofurky sausage (grilled, between two buns, with all the trimmings) with a sort of brand / logo burned / stamped onto the center of it: "Approved—Outdoor grill." In the background are packages of the three meatless sausage products in the background: Tofurky Gourmet Meatless Sausages (Beer Brats with Micro Brewed Amber Ale, Sweet Italian Sausage with Sun Dried Tomatoes and Basil, or Kielbasa—Great Sandwich or Dinner).

Note: Kielbasa is one of the many common names for a type of Central and Eastern European sausage.

On the back are the three product labels with ingredients and Nutrition Facts. SRP (Suggested Retail Price): \$3.89 to \$4.29 per 14 oz. A sidebar reads: "Our premise: Up till now, the backyard barbeque has primarily been the domain of the carnivore. While the past 20 years have seen many great meat alternatives introduced that cook fine in the microwave, nearly all fall way short when placed on the outdoor grill. Some tofu wieners even say, 'Not recommended for barbeques'... Unlike the smaller dogs on the street, these dogs are not made from soy powders or concentrates. Real tofu is our soy protein! Finally there is a product vegetarians can Sizzle on an outdoor grill or cook in the comfort of your kitchen! We want these sausages to change the vegetarian grilling experience just like the Tofurky Roast changed the holiday dining experience!" Address: Hood River, Oregon.

3425. Turtle Island Foods, Inc. 2003. Vegetarian foodservice just got a whole lot easier (Leaflet). Hood River, OR 97031. 1 p. Front and back. 28 cm.

• **Summary:** See next page. On the front, color photos show the new foodservice products: Bulk SuperBurgers. Bulk Tofurky Gravy. Bulk Tofurky Deli Slices. Bulk Tofurky Stuffed Rolls. Bulk Organic Soy Tempeh. The rear gives a description of each product with ingredients, packaging information, and suggested uses. Address: Hood River, Oregon.

3426. Wang, June. 2003. Pioneering work of Tau Wang, founder of First Vegetarian Foods Co., in introducing Chinese vegetarian foods to California (Interview). *SoyaScan Notes*. July 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** June's father, Tau Wang, was born in 1935 in Shandong province, China. With his elder brother, he moved to Taiwan at age 11, became a veterinarian, married, and started a family. He was a Buddhist and a vegetarian. He decided (at a time or age unknown to June) to emigrate to the USA. He knew it would take too much time and money to get another veterinarian's degree in America, so he went through culinary training and cooking school in Taiwan. In the mid-1970s, while in his 40s, he came to the United States and established what June believes is the first Chinese company to make vegetarian products in California—perhaps in the United States. While his family waited in Taiwan as he created a place for them, he began by working at a Chinese restaurant in Maryland for 1-2 years until he obtained his resident status. Then in the late 1970s he moved to Southern California; he liked the semitropical climate and wanted to get away from the cold East Coast climate. In those days, most Chinese still lived in Chinatown in downtown Los Angeles. There he met some Buddhist friends from Buddhist temples. He soon realized that there were almost

[www.tofurky.com](http://www.tofurky.com)

no Chinese vegetarian foods for them to choose from—other than tofu and vegetables. So he decided to start a company named First Food to make vegetarian foods to supply first the Buddhist temples in Los Angeles, with the hope of soon expanding. His first product was steamed Chinese buns (*mantou*), followed by “Vegetarian Duck” or *Suya* (made by simmering wheat gluten; pinyin: *mianjin*; W.-G. *mien chin*), and steamed and lightly salted wheat gluten (*kaofu*). He experimented with many different vegetarian foods that were not available in Los Angeles. One new product was konnyaku.

June (age 11) and her brother left Taiwan joined their father in Los Angeles in 1979. Mrs. Wang and three more daughters came 6 months later (summer 1980). Soon the whole family was working in the business after school. June recalls: “After school, we kids would go to work. After work, we would all go home and eat together as a family. Then we’d do our homework. We knew that our life had changed and we all had to pitch in and do whatever we could.” When June arrived, she spoke no English. But she learned and graduated from California State Polytechnic University, Pomona, with a degree in accounting.

In about the mid-1980s Mr. Wang introduced his first soy product which was “Vegetarian chicken” called “Suchee” (pinyin: *siji*; Wade-Giles: *ssu-chi*), made out of extra-firm pressed tofu. It was cooked in water seasoned with a little salt, then the water was pressed out and it was sold in the shape of a half-cylinder. When this product was successful, he extended the line with Mushroom Suchee and Savory Suchee (seasoned with soy sauce and his own blend of seasonings). In 1985 he incorporated the company.

Gradually his business expanded to Chinese restaurants, supermarkets, northern California, then to distributors servicing other states. Because of the language barrier, and because it was family-run sole proprietorship where he pretty-much ran the whole show, with the help of his family and a few other workers.

June’s father was concerned about what would happen to his business when he retired. Their foods were sold, packaged, and distributed only to the Chinese market. He also hoped it would expand beyond the Chinese market. After working outside the family business for a few years, June bought the business from him on 31 Aug. 1999, with the goal of helping her dad to realize his dream of expanding the business beyond the Chinese community. She invited her younger sister, Saline, to join her as a manager—and a potential shareholder. She soon launched a new line of Hispanic / Mexican hand-held meatless snack products named Starlite Cuisine, including 3 flavors each of Soy Taquitos (rolled in corn tortillas) and Soy Rolled Tacos (rolled in wheat flour tortillas)—both filled with textured soy protein concentrates. She hoped to sell these through Trader Joe’s, but after sending many samples to the frozen foods buyer, he stole the product name and idea, and now Trader

Joe’s has its own Taquitos—Ugh!

A brief biography of Tau Wang’s work has been written in Chinese. The company also makes an abalone alternative based on konnyaku; it contains no soy ingredients. Address: 1429 Virginia Ave., Suite F, Baldwin Park, CA 91706. Phone: 626-338-8233.

**3427. Product Name:** StarLite Cuisine: Soy Rolled Tacos (in Wheat-Flour Tortilla) [Santa Fe Chicken Style, Garlic Chicken Style, Chorizo & Black Bean Style].

**Manufacturer’s Name:** First Vegetarian Foods, Inc.

**Manufacturer’s Address:** 1429 Virginia Ave., Suite F, Baldwin Park, CA 91706. Phone: 626-338-8233.

**Date of Introduction:** 2003 July.

**Ingredients:** Santa Fe Chicken Style: Water, flour tortillas (flour, vegetable oil), soy protein concentrate and isolate, soy flour, cornstarch, onion, garlic powder, black pepper, natural smoke flavor, spices, salt, brown sugar, autolyzed yeast, carrageenan.

**New Product–Documentation:** News release. June 2003. StarLite Cuisine introduces meatless rolled tacos: Crispy soy taquito maker extends popular line with three new rolled taco varieties (3 p.). The 3 new products are named Crispy Soy Rolled Tacos.

Talk with June Wang, company owner. 2003. July 10. This hand-held snack is being introduced this month.

\*

**3428. Natural Foods Merchandiser.** 2003. Astra-Zeneca sells Quorn [Marlow Foods Ltd.] to venture firm. July. p. 12.

• **Summary:** Marlow Foods Ltd. (North Yorkshire, UK), which makes Quorn meat-free products, was owned by the Anglo-Swedish pharmaceutical manufacturer AstraZeneca. Marlow was sold on 26 May 2003 to Montagu Private Equity for \$114.8 million, according the *Financial Times*.

Last year more than \$131 million of Quorn (mycoprotein) was sold worldwide. Eleven Quorn products are sold in the USA and sales in the first 12 months were claimed to exceed \$5 million.

**3429. United Soybean Board.** 2003. National report 2003-2004: Consumer attitudes about nutrition—Insights into nutrition, health & soyfoods. Seattle, Washington. 6 p. Sept. 22 x 21 cm.

• **Summary:** This tenth annual nationwide survey, commissioned by USB, was conducted in early 2003 by an independent research firm in Seattle, Washington. Random telephone interviews were completed with 1,000 consumers. The study’s margin of error is  $\pm 3.1$  percent and has a confidence level of 95%.

Contents: Introduction and methodology. Consumer nutritional habits and concerns. Healthy food decisions. Consumer knowledge of cooking oils. Consumer attitudes about fats. Awareness, usage, and trial of soy products.

Soyfoods and health: Perceived healthfulness of soy products (74% healthy, 21% neutral, 5% unhealthy), awareness of health benefits of soy (heart health 29%, menopause relief 19%, prevent obesity / promote weight loss 14%, cancer prevention 10%, good protein source 5%, reduced risk of osteoporosis 3%, prevent arthritis 2%, other 14%). Consumer perceptions of biotech [genetically engineered] food. Consumer awareness and usage organic products (45% of consumers regularly purchase organic food products. Unaided basis, 47% know that organic foods can't contain genetically modified ingredients and 60% know that organics must be grown without pesticides and herbicides).

Percentage of American consumers who have tried various soy products in 2001, 2002, and 2003: Tofu 45%, 48%, 48%. Soy [veggie] burgers 40%, 43%, 44%. Soymilk 28%, 35%, 39%. Soy nuts 20%, 26%, 26%. Soy protein bars 18%, 20%, 22%.

Awareness of soyfoods: "Overall consumer awareness of soy products increased significantly this year. Soymilk achieved an 89% awareness rating. One in six [16.7%] Americans consume soyfoods or soy beverages once a week or more. Among those who do not, 47% report that nothing in particular prevents them from including soy in their diet."

Genetically modified foods: Consumer awareness dropped to 60%, an 8% decrease from 2002. Awareness is higher among men (66%) than women (57%). Those aged 35-54 had the highest awareness (66%) compared to those 18-34% (57%), and those 55 and older (57%). Negative attitude: 20%, down from 24% last year. Positive attitude: 13%. But 67% feel neutral or don't know enough about biotech foods to form positive or negative feelings. 23% of consumers are willing to pay a premium for foods without biotech ingredients, down sharply from 32% last year.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at [www.soyconnection.com/health\\_nutrition/pdf/](http://www.soyconnection.com/health_nutrition/pdf/).

3430. Turtle Island Foods, Inc. 2003. No holiday guest left behind—Tofurky and Dumplings set for 2003 (Press release). P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. 1 p. Oct. 21.

• **Summary:** "Hood River, Oregon—Turtle Island Foods, Inc. announced today the introduction of a New and Improved version of its flagship product, Tofurky Vegetarian Feast. This year's changes include: the addition of a full pound of Cranberry-Apple, Potato Dumplings, a new 'Tofu Tender' Stuffed Tofu Roast, a new box with beautiful photos and graphics and a larger, 3.5 lb size for the entire package which retails in natural foods and grocery stores for around \$20.

"Tofurky was first introduced in the USA during the Thanksgiving Holiday season in 1995 when 500 Tofurky Feasts were sold. It was the first product that had been marketed to fill the need of what to serve vegetarian guests at one's holiday table. The product has been wildly successful

providing an alternative to Turkey for people who otherwise were left out of holiday celebrations. Last year, the company sold 120,000 Tofurkys in the U.S., Canada, and UK. This year, the products are to be offered to such major grocery chains as Safeway on a national level as well as in the natural foods supermarkets where it was the #4 overall selling meat alternative in 2002 despite only being sold in the 4th quarter of the year." Address: Hood River, Oregon.

3431. Book Publishing Co. 2003. Fall 2003 fall catalog (Mail order). Summertown, Tennessee. 64 p. 25 cm.

• **Summary:** Contains sections titled Soyfoods Cooking (p. 14-17, including books on tofu, miso, tempeh, soyfoods, meatless burgers, meat substitutes, and TVP), Healthy World Cuisine (Chinese, Japanese, Korean, Indian), Vegan Cooking (p. 24-32), Vegetarian Cooking (p. 33-36), Native Voices (Native American books and authors) (p. 45-61). Address: P.O. Box 99, 415 Farm Road, Summertown, Tennessee 38483. Phone: 1-888-260-8458 or 931-964-3571.

3432. HeartHealth Partnership. 2003. Turning over a new leaf: Your heart-healthy living guide (Vol. 4, No. 2). Health Drivers Publishing. 29 p. Illust. No index. 19 cm. [26 ref]

• **Summary:** This booklet gives basic information is for people who want to reduce their blood cholesterol levels. It contains ads and touts specific brands. The National Cholesterol Education Program (NCEP) estimates that 52 million Americans are being treated for high cholesterol levels.

"Cholesterol is a soft fat-like substance, which in moderate amounts is essential for good health. It is part of the makeup of all cell membranes, is found in body tissue, and can be made into various hormones. Cholesterol comes from two sources. Your body produces it naturally, mostly in the liver (about 1,000 milligrams a day). The other source is the food you eat, such as meat, poultry, fish, egg yolks, and dairy products. Fruits, vegetables, nuts, seeds, and other plant-based foods do not contain cholesterol and, in fact, some of these foods have been shown to actually reduce blood cholesterol" (p. 2).

HDL (High Density Lipoprotein) is "good" cholesterol. It contains very little cholesterol in its core, but as it travels through the bloodstream it carries LDL or "bad" cholesterol away from the arteries to the liver, where it is either recycled or excreted.

LDL (Low Density Lipoprotein) is "bad" cholesterol. Its makeup is the opposite of HDL cholesterol; its core is almost all cholesterol. "If LDL levels are abnormally high, as it travels through the bloodstream it builds up on the artery walls. When LDL cholesterol combines with other substances, a plaque-like substance is produced that can clog the arteries.

"The ugly: Triglyceride is a form of fat found in food, body fat, and is also carried in the blood as part of the

cholesterol molecule. The visible fat on chicken or steak is actually triglyceride. If you are overweight, your body stores the extra calories you eat as triglycerides. People with high triglyceride levels often have low HDL or ‘good’ cholesterol levels and this combination is considered by many experts to be associated with an increased risk of heart disease.”

Fats in your diet and the role they play. Saturated fats, which are higher in meat, dairy products, palm and coconut oils, tend to contribute to LDL (bad) cholesterol levels. Monounsaturated fats are liquid at room temperature but will start to become solid when refrigerated. They can be found in almond, canola, olive, and peanut oils, and seem to have the effect of lowering bad LDL without lowering protective HDL cholesterol. Polyunsaturated fats are found in corn, soybean, safflower, and sunflower oils. They are liquid at room temperature and remain liquid when refrigerated. They may lower bad LDL cholesterol levels and, if used in large enough quantities, they may also reduce protective HDL levels as well. Trans fatty acids “are fats that do not occur naturally in other words, they are created” by hydrogenation. “Hydrogenated fats act like saturated fats.” Look for them on labels; effective Jan. 1, 2006, the FDA will be putting trans-fats content on nutrition labels.

Consider substituting healthier alternatives for the following: Mayonnaise, sour cream (use fat-free), milk (try “soy-milk”), cream, cheese (“many varieties of low-fat soy cheese”), egg yolks, meat (switch to extra lean cuts), butter, and cooking oils (“Almond, canola, olive, and peanut are considered best”).

Glossary of label terms related to calories, fats, and cholesterol: Example—“Fat free” means less than ½ gram of fat per serving. Plant sterols and stanols actually help lower LDL (bad) cholesterol.

Fiber (also called roughage or bulk) is the “part of plant foods that cannot be digested or absorbed by the body, yet it plays an important role in promoting good health and protecting against some diseases—such as heart disease. Men consuming 29 grams of protein a day have been shown to have a 40% reduction in heart attacks compared to men with the lowest fiber intake. The National Academy of Sciences recommends the following daily fiber consumption: Women ages 19-50 = 25 gm. Women over age 50 = 21 gm. Men ages 19-50 = 38 gm. Men over age 50 = 30 gm. More than 90% of Americans don’t meet these recommendations; they average only about 15 gm of fiber a day (p. 12).

Physical exercise “is very likely to lower your risk of heart disease and enhance your overall sense of health and well being.” Almonds can help lower blood cholesterol. In July 2003 almonds received a qualified health claim from FDA (p. 16).

“Soy-anara cholesterol: Research has shown that consuming soy protein, rather than animal protein (meat, poultry, milk, cheese, eggs) can decrease your overall LDL (bad) cholesterol.” In 1999 the FDA ruled in favor

of “heart healthy” labeling for certain soy products. “The most familiar forms of soy protein are those found in Asian cuisine; tofu, tempeh, and miso. To make soy proteins more familiar to Americans, products have been developed that closely resemble meat, poultry, and fish, in taste and texture. One of the great things about soy is that it can be flavored and shaped in an infinite number of ways.” On the facing page is a full-page color ad for Boca Burgers and other “Boca meatless products.”

3433. Klein, Barbara P.; Cadwallader, Keith R.; Chen, Dejun; Khanna, Pradeep; Sullivan, Cheryl L.; Weingartner, Karl E. 2003. Baking with soy in the American kitchen. Champaign-Urbana, Illinois: Illinois Center for Soy Foods. 63 p. Illust. No index. 24 cm. Series: Soy in the American Kitchen.

• **Summary:** Contents: Illinois Center for Soy Foods. Bringing soy foods to the American table. Why eat soy? Baking with soy. Soy flour. Soy protein isolate. Soymilk. Tofu. Textured vegetable protein. Soy nuts. Soy analogs (soy sour cream, soy cream cheese). Nutrient information,

Recipes (42 recipes). Every right-hand page contains an elegant full-page color photo of the recipe to its left. All of the recipes are meatless.

On page 5 we read: “Soy analogs: Soy products that have been made to look and taste like meat or dairy products are known as soy analogs.”

Note: This is the earliest English-language publication seen (Nov. 2014) that uses the term “soy analogs” to refer to both meat analogs and dairy analogs. Yet this term is almost never used! The typical terms were “meat analogs” and “dairy analogs”—terms that are probably best avoided in the state of Illinois. Address: 1. PhD, editor, Director, Illinois Center for Soy Foods, 170 National Soybean Research Center, 1101 Peabody Dr., Univ. of Illinois, Urbana, IL 61801. Phone: (212) 244-1706 or [www.soyfoodsillinois.uiuc.edu](http://www.soyfoodsillinois.uiuc.edu).

3434. Sol Cuisine. 2003. Delicious and nutritious vegetarian cuisine: Body, mind and sol (Leaflet). Mississauga, Ontario, Canada. 1 p. Front and back. 28 cm.

3435. Veat. Made in Taiwan. 2003. Veat. The next generation of soy protein. All natural. The new alternative to meat (Leaflet). 20318 Gramercy Place, Torrance, CA 90501. 3 panels each side. Front and back. Glossy color. 28 cm.

• **Summary:** The company now has five products (all meatless): Chick'n Free Nuggets, Grilled Chick'n Free Breast, Gourmet Bites, Vegetarian Breast, Vegetarian Fillet. "The ingredients common to all Veat products are: High-fiber textured soy protein, whey protein, soy oil (expeller pressed), unrefined evaporated cane juice, spices, sea salt."

The rear panel contains actual comments for six first-time Veat tasters. For example: "You've got to be kidding, this isn't chicken?"—Michael R., Chef & self professed carnivore." Address: Torrance, California. Phone: 310-320-8611.

3436. Turtle Island Foods, Inc. 2003. Record Tofurky sales reported (Press release). P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. 1 p. Nov. 4.

• **Summary:** "Hood River, Oregon—Turtle Island Foods, Inc. announced that 4th Quarter Tofurky sales have already exceeded the 116,120 Tofurkys sold in the 4th quarter of 2002. With orders for over 118,000 Tofurkys already, the company projects sales could approach 150,000 units by year's end. This would represent a 23% increase over last fall's record-breaking sales.

"Tofurky is seen by many to be a 'bellwether' product reflecting overall strength of the vegetarian category. Each Tofurky Roast weighs 26 oz." A bar chart shows the number of Tofurkys sold each year from 1995 to 2003.

Talk with Seth Tibbott. 2003. Dec. 3. The total for each year equals the number of Tofurky Feasts plus the number of Tofurky Roasts. In 2002 Turtle Island sold 48,230 feasts and 67,890 roasts for a total of 116,120. So far in 2003 Turtle Island has sold 78,868 feasts and 65,214 roasts for a total of 144,082 (up 24%)—and more will be sold before the year's end. Address: Hood River, Oregon. Phone: 1-800-508-8100.

3437. Jenkins, D.J.; Kendall, C.W.; et al. 2003. The effects of combining plant sterols, soy protein, viscous fibers, and almonds in treating hypercholesterolemia. *Metabolism* 52(11):1478-83. Nov. \*

• **Summary:** Jenkins' team has found new ways of achieving dramatic cholesterol-lowering effects through diet. In this study, 25 healthy hyperlipidemic individuals were put on a dietary plan (Portfolio eating plan) which included 30 gm of almonds, 2 gm of plant sterols (from enriched margarine), 15 gm of viscous fibre (from foods such as oats, barley, eggplant, or okra), and 35 gm of soy protein (from foods such as tofu, soymilk, or soy meat alternatives). The diet reduced their LDL cholesterol by 35% in two weeks. Address: Univ. of Toronto, Canada.

3438. **Product Name:** Grilled and Marinated Tofu [Santa Fe Chili & Lime, Sicilian Tomato Basil, Ginza Ginger Miso, and Korean Barbecue].

**Manufacturer's Name:** Soga Soyfoods [Pulmuone U.S.A.].

**Manufacturer's Address:** 4585 Firestone Blvd., South

Gate, CA 90280. Phone: 866-356-2800.

**Date of Introduction:** 2003 November.

**Ingredients:** Incl. tofu, miso.

**How Stored:** Refrigerated.

**New Product–Documentation:** Ad (8½ by 11-inch color) in Natural Foods Merchandiser. 2003. Nov. p. 11. “New grilled and marinated Soga Gourmet Tofu: You’ll never think of tofu the same way again” (Ad). Shows the labels of four products in this line: “Ready to eat! Pre-diced. Pre-seasoned. Pre-grilled.”

Talk with John Sim, head of sales at Pulmuone. 2003. Nov. 10. This product should be available in retail stores by Dec. 1. Note: The company answers the phone: Pulmuone USA and Soga Soyfoods R&D Center.

Product [Ginger Miso–“Ginza” is not mentioned] with Label purchased at Trader Joe’s in Lafayette, California. 2004. July 11. 3.75 by 6 inches. Vacuum packed. White, red, dark blue, green and yellow on blue. Retail for \$2.49.

3439. **Product Name:** Sunrich Natural Veggie Burgers: Clasic Soy, Country Garden, Portabella Mushroom, or Cheddar Cheese.

**Manufacturer’s Name:** SunRich Food Group.

**Manufacturer’s Address:** P.O. Box 128, Hope, Minnesota 56046.

**Date of Introduction:** 2003 November.

**Ingredients:** Soybeans.

**Wt/Vol., Packaging, Price:** 10 oz plastic bag.

**How Stored:** Frozen.

**New Product–Documentation:** Spot in Nutraceuticals World. 2003. Dec. p. 170. “New products: Veggie burgers and frozen edamame.” A color photo shows the front panel of the Country Garden Veggie Burger package.

3440. **Product Name:** Tofurky: A Delicious Vegetarian Holiday Feast.

**Manufacturer’s Name:** Turtle Island Foods, Inc.

**Manufacturer’s Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. Phone: 1-888-TOFURKY (863-8759).

**Date of Introduction:** 2003 November.

**Ingredients:** Roast: Water, vital wheat gluten, tofu (water, non genetically engineered soybeans grown without chemical fertilizers, pesticides, or herbicides, magnesium chloride and/or nigari), white beans, garbanzo beans, non-GE corn starch natural vegetarian flavor, expeller pressed non-GE canola oil, shoyu soy sauce, spices, lemon juice, calcium lactate from beets. Stuffing: Water, organic brown rice, bread cubes...

**Wt/Vol., Packaging, Price:** 3 lb 8 oz (serves 4).

**How Stored:** Frozen. But can be kept refrigerated for 30 days.

**New Product–Documentation:** See next page. Product (in box) sent by Seth Tibbott. 2003. Nov. 27. This is a

very attractive and well-designed box / label. 8.5 by 6.5 by 4 inches deep. The top is covered with a color photo of Tofurky, sliced in half, served on a white plate with salad. A gold and black seal, ensuring that the box has not been opened, states: “100% vegan. vegansociety.com.” Below the product name: “New & improved.” Below the product name: “Feast includes a tender, juicy stuffed tofu roast, 8 delicious cranberry-apple dumplings, rich Tofurky “giblet” gravy, and our signature Tofurky Jurky Wishstixs. Net weight 3 lbs. 8 oz. (1.59 kg). Keep frozen. diameter. On the front of the box: “America’s #1 turkey alternative since 1995.” On the right end panel is a brief company history and a section titled “Travels with Tofurky” showing 3 color photos of Tofurky in Minnesota, India, and above Niagara Falls, Canada. On the back panel are Nutrition Facts and a large panel giving ingredients. On the left end panel are “Preparation Instructions”—quite complex.

Talk with Seth Tibbott. 2003. Dec. 3. The Tofurky is designed to be put into the oven next to a regular turkey on Thanksgiving or Christmas. The Drumettes were not included in this years Tofurky Feast for 3 reasons: (1) They contained isolated soy protein which is made using hexane (a volatile petroleum derivative); Turtle Island has a goal of using only natural ingredients. “The hypocrometer was getting a little too high,” says Seth. (2) They took a lot of time to make at a time when Turtle Island is very busy. (3) The dumplings are delicious and could be made by another company. However Seth is getting feedback on the company Website that quite a few people like the tempeh from which the Drumettes were made, so he is looking for a more natural way to make them.

3441. Turtle Island Foods, Inc. 2003. Discovered! Tofurky seed pods. Introducing the new & improved Tofurky Vegetarian Feast with Cranberry-Apple Potato Dumplings (Leaflet). P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. 1 p. Front and back. 28 cm.

• **Summary:** In the middle third of the front of this full-color leaflet is a photo of a box (the packaging) of Tofurky. In the bottom third is a bar chart titled “Meatless poultry subcategory natural food supermarkets. We’re #1.” Source: SPINS Company, San Francisco, California. 52 weeks ending 30 Nov. 2002.” (1) Turtle Tofurky Feast Vegan, 52 oz. \$19.22. \$843,354. 3442. Jacobi, Dana. 2003. Serving soyfoods on Capitol Hill (Interview). *SoyaScan Notes*. Dec. 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Each year the American Soybean Assoc. (ASA) has a board meeting in Washington, DC. At that time they have an event for Congress. This year ASA decided to “host its first Soyfoods Luncheon,” which they announced in a 2-page news release. Representative Jo Ann Emerson (R-MO) served as the Congressional host of the event. White Wave, Solae, Soyatech, and SANA sponsored the event but it (incl. Dana and her food) was paid for by ASA.

Apparently Nancy Chapman of the Soyfoods Association told ASA that Dana was a professional chef with expertise in soyfoods. So Dana got a call from Anna Pavolva of ASA inviting her take responsibility for catering this event. Dana ended up hiring a local caterer, because she lives in New York City and could not make all the preparations at such a long distance. Dana supplied the recipes and supervised the food preparation.

The event took place at lunchtime on Tuesday, 1 April 2003 at the Rayburn Building in Washington, DC. Dana was told to prepare for 200 people, but about 250-350 showed up—most of them staffers, but there were a few members of Congress. The room (29 by 52 feet, or 1,508 square feet) was packed, with standing room only. Food was served on four draped tables, buffet style like a real catered party, with real China plates (no paper plates), and spoons and forks. The attendees ate *all* the food. Dana’s meatless recipes (the majority of which came out of her latest cookbook), all on one long table were: Sweet & sour meatballs. Beans and franks (Using Bratos for the franks). Macaroni salad (using ADM’s Soy-7 macaroni). Honey mustard with tofu (served 3 kinds of donated soyburgers from Boca and Morningstar Farms). Chocolate velvet mousse. Edamamé. Finger sandwiches with soynut butter and jelly.

ASA hired a chef (Tod Schiller) from one of Washington, DC’s premier restaurants, Kinthead’s, and he conducted a cooking demonstration at the luncheon; at a second table he served a very elegant soyfoods recipe that

included edamamé.

White Wave / Dean Foods had a 3rd table at which they served Silk Cappuccino soymilk out of a cooling machine. On a 4th table at the end of the room was Solae 8th Continent soymilk and Luna Bars (cut into pieces for finger foods). ASA and United Soybean Board had a 5th long table on which was information (leaflet, pamphlets) and exhibits about soybeans and soyfoods.

Dana mingled anonymously and talked with many of the staffers. “They were astounded by all the good food. This sort of event helps greatly to dispel the negative image that soy still has in terms of how it tastes and looks.” Dana notes: “My interest in not in preaching to the converted, it is in introducing soyfoods to the rest of the people.” Address: New York City.

3443. **Product Name:** Gardenburger Meatless Riblets.

**Manufacturer’s Name:** Gardenburger Inc.

**Manufacturer’s Address:** Portland, OR 97205. Phone: 1-800-636-0109.

**Date of Introduction:** 2003 December.

**Ingredients:** Meatless Riblett: Soy protein concentrate–hydrated, wheat gluten–hydrated, canola oil, natural hickory smoke flavor, yeast extract, isolated soy protein, vegetable gum, salt,... Barbecue Sauce: High fructose corn syrup, water, tomato puree, molasses, distilled vinegar, salt, modified food starch, natural smoke flavor, spices, dried onion, dried garlic, cayenne pepper.

**Wt/Vol., Packaging, Price:** 2 Riblets, each in a plastic pouch, per 10 oz (284 gm) box. Retail for \$2.69 (2003/12, Lafayette, California).

**How Stored:** Frozen.

**New Product–Documentation:** Product with Label purchased at Trader Joe's in Lafayette, California. 2003. Dec. 7. 7½ by 5 by 1½ inches. Paperboard box. Brown, white, and black on beige. Illustration of a fork piercing a riblet. Front panel: "Meaty-tasting BBQ soy ribs. In BBQ sauce. Snappy and well dressed." The back of the box contains 1960s style and younger-generation creative design: "It is a man's sympathy with all creatures that first makes him truly a man."—Albert Schweitzer. "Karma points—Redeemable in this life and beyond." "Some companies spend lots of money doing focus group research on new package back designs. We decided to just use our own wits and true personality. Hope you like it. Sorry if you don't. Let us know." "Mission—manifesto—dream—goal—intent—mandate—decree—creed—belief—proclamation—declaration—reason for being." "Gardenburger pursues visionary ideas that are helping to sustain the health and integrity of our planet. We are committed to offering healthy food choices to the world, supporting meatless concerns, and advocating the benefits of meatless eating." "Who we are: Contrary to popular belief, Gardenburger, Inc. is not a huge 'conglomerate.' We are a small, Oregon-based company started by one man nearly 20 years ago. Paul Wenner, chef, vegetarian, and all-around health guru, created the first Gardenburger patty to serve in his Gresham, OR restaurant. It caught on, in a big way. In fact, the burger became so popular it devoured the little restaurant and became a business unto itself."

Talk with meat department at Diablo Foods in Lafayette. 2003. Dec. 10. Spare ribs and baby back ribs come from pork / pigs. Short ribs and prime rib come from beef / cows. In the USA, pork ribs are less expensive and probably more popular than beef ribs. Emil Villa's Hick'ry [Hickory] Pit serves only pork ribs—no beef.

Talk with person at Gardenburger, Inc. 2003. Dec. 10. This product is made by Gardenburger Inc. dba Authentic Foods Co. The product, with different packaging, was first introduced in Sept. 2000.

3444. *Nutraceuticals World*. 2003. New products: Veggie burgers and frozen edamame. 6(12):170. Dec.

• **Summary:** A new line of organic gluten-free veggie burgers and frozen edamame, under the Sunrich Naturals [TM] brand name has been launched by the Sunrich Food Group (Hope, Minnesota). The veggie burgers include Classic Soy, Country Garden, Portabella Mushroom, and Cheddar Cheese varieties. The edamame come both in the pod and shelled.

3445. **Product Name:** Breaded Chickenless Nuggets.

**Manufacturer's Name:** Trader Joe's (Marketer-Distributor).

**Manufacturer's Address:** South Pasadena, CA 91031.

**Date of Introduction:** 2003 December.

**Ingredients:** Water, soy protein, natural spices & flavorings (yeast, autolyzed yeast extract, granulated onion, granulated

garlic, spices), breadcrumbs (unbleached wheat flour, salt, soybean oil, yeast, annatto color), tapioca starch, powdered egg white, cellulose gum (stabilizer), sea salt, expeller pressed canola oil.

**Wt/Vol., Packaging, Price:** 18 nuggets. 14 oz (397 gm) in sealed foil pouch inside paperboard box. Retail for \$2.99 at Trader Joe's (2003/12, Lafayette, California).

**How Stored:** Frozen.

**New Product–Documentation:** Product with Label purchased at Trader Joe's in Lafayette, California. 2003. Dec. 21. 9 by 7 by 1.5 inches paperboard box. Orange, yellow, brown, red, green and white. A large color photo shows a plate of the Nuggets on a white plate with slices of tomatoes and cucumber, and lettuce leaves. Circular logo: "Meatless: Made with soy. OU Pareve." On the back panel are Nutrition Facts, ingredients, and heating instructions (conventional oven only; bake for 8-10 minutes at 350°F). Soyfoods Center taste test. Very good flavor (especially the coating), excellent appearance, not much texture inside.

3446. Fresh Tofu Inc. 2004. Home page and all links (Website printout—complete). [www.freshtofu.com](http://www.freshtofu.com) Printed Jan. 19.

• **Summary:** Links: (1) About us (1 p.). (2) The history of Fresh Tofu (2 p.). Incorporated in Nov. 1983 by Jeffrey Connerton. In 1984 he met Gary Abramowitz. (3) Our products (1 p.). Color photos of 9 products. (3) Tofu Turkey. Introduced in 1992. Address: 1101 Harrison St., Allentown, Pennsylvania 18103. Phone: 610-433-4711.

3447. **Product Name:** [Veggie Tuna].

**Foreign Name:** Veggie Tuna.

**Manufacturer's Name:** Viana Naturkost GmbH.

**Manufacturer's Address:** D-54578 TofuTown Wiesbaum, Germany. Phone: +496593 9967-0. Fax: 6593 9967-225.

**Date of Introduction:** 2004 January.

**Ingredients:** Real nigari tofu (pure Eifel water, soybeans\*) (25%), wheat gluten, Viana real smoked tofu (pure Eifel water, soybeans\*, smoke), sunflower seed oil\*, almonds\*, tomato pulp\*, spices\*, yeast\*, red beets\*, sea salt, sea vegetables, carrageenan, carob flour\*, rice flour\*, cane sugar\* (0.4%), herbs\*. \* = Organically grown.

**Wt/Vol., Packaging, Price:** 150 gm vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Color leaflet brought by Bernd Drosihn. 2004. March 15.

3448. Gardenburger, Inc. 2004. Annual report 2003 (Form 10-K). 15615 Alton Parkway, Suite 350, Irvine, California 92618. 56 p. 28 cm.

• **Summary:** During the past year the company moved its headquarters from Portland, Oregon, to Irvine, California, and dropped its toll-free number. The annual report is largely a copy of the 10-K form submitted to the government. Net

sales in 2003 were \$49.4 million, down from \$55.6 million the previous year. Net income was a loss of \$10.790 million, larger than the loss of \$3.874 million the previous year.

Accompanying the annual report is a notice of Annual Meeting of Shareholders and proxy statement (29 p.). The CEO, president, and chairman of the board is Scott C. Wallace. His salary in 2003 increased (despite poor performance) to \$270,092, with no bonus and no stock options. A graph (p. 18) shows that the value of company's stock has fallen steadily since Sept. 1998, dropped to almost nothing by Sept. 2001, and has stayed there.

In 2001 the company decided to diversify from meatless burgers into other meat alternatives. In 2002 they introduced 3 new meat alternative products. In 2003 they introduced 5 new non-burger meat alternatives: BBQ Chik'n, Meatless Meatloaf, Meatless Sweet & Sour Pork, Buffalo Chik'n Wings, and Country Fried Chik'n with Creamy Pepper Gravy. "The timing of this evolution in our product line has proven crucial. The popularity of low carbohydrate diets has spurred increased meat consumption nationwide, causing a corresponding 6% downturn in veggie burger sales. Additionally, competition in the veggie burger category has grown over the past 4 years, causing margins to shrink..."

Tables (p. 9-11) give details on the company's 7 retail grocery veggie grain products, 12 retail grocery meat-like products, 3 club channel products, and 15 food service products. Address: Irvine, California. Phone: 949-255-2000.

3449. *Soyfoods Canada Newsletter*. 2004. Soyfoods Canada member profile: SunOpta. Winter. p. 3.

• **Summary:** "The Sunrich Foods Group is a global supplier of Identity Preserved and Organic soy, corn and rice products. From ingredients to consumer packaged products, we help our customers create great tasting foods, naturally. The Sunrich Food Group is made up of four operating divisions—Sunrich, Nordic Aseptic, Northern Foods and Dairy and Hearty and Natural.

"Founded in 1978, the Sunrich grain division is a fully integrated producer, supplier and ingredient developer for the food industry. Based in Minnesota, Michigan and Ontario, we are in the best position to both produce and supply Identity Preserved (IP), Non Genetically Modified (Non-GMO) and organic grain based food ingredients.

"Nordic Aseptic is an aseptic packaging facility with a focus in private label manufacturing. The facility specializes in Tetra Pak slim, square, wedge and Combi Bloc packages, with a variety of opening types. The extended shelf life and logistical benefits of aseptic packaging make it one of the fastest growing delivery vehicles for liquid products."

"Hearty and Natural is the consumer products division of the Sunrich Food Group. Consumer products include edamame, veggie burgers, frozen soy vegetables and functional foods.

"The Sunrich Food Group is a wholly owned subsidiary

of SunOpta (formerly Stake Technology). SunOpta owns and operates high-growth ethical businesses, focused on environmental responsibility and the health and well-being of its communities. SunOpta's Food Group is well positioned in the rapidly growing natural and organic foods sectors through its vertically integrated operations throughout North America."

3450. Drosihn, Bernd. 2004. Update on soyfoods in Europe. Part II (Interview). *SoyaScan Notes*. March 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Soymilk: A major new soymilk maker in Europe is named Wild ([www.wild.de](http://www.wild.de)), an old German food company that specializes in fruits and ingredients; their retail soymilk is named Soy and Joy. Their most famous brand is Caprisun, a non-soy drink in a foil pouch, well known in the USA. They and So Good, the Australian soymilk now made with Solae, are both strong competitors of Alpro.

Several weeks ago Hain-Celestial of New York purchased two German soymilk makers, both owned by Bruno Fischer, Jr.: Natumi and Gut Honneroth. He sold both companies at a low price—probably because he had to. Bruno had gotten his soymilk into Aldi, the mother company of Trader Joe's and the No. 1 discounter in Germany—and maybe in all of Europe, and he developed a large soymilk business with Aldi—perhaps so large he could no longer handle it himself. Bruno also made a lot of private label soymilk. With Hain, Bruno found a large German dairy to make soymilk for Aldi under a new Aldi brand. The new European CEO of Hain-Celestial is Philippe Woitrin, who was CEO of Lima Foods when Hain acquired it.

Triballat makes the best soy yogurts (Sojasun brand) in the world—in Bernd's opinion. They have a new brand, Sojadé, which are delicious creamy yogurt drinks—maybe organic. The Japanese Yakult concept of drinking live beneficial probiotic bacteria each morning has now caught on in a big way in Europe. Yakult is one of the best entries into the European food market in years. Bernd just saw White Wave's Silk Alive [the name was soon changed; it was sold commercially only under the name "Silk Live"], a similar product, at the Anaheim Natural Products Expo. But he liked the Wildwood smoothie even better, and the WholeSoy fermented soymilk best of all American products.

In France a small company named Sojami (pronounced so-zha-MEE), which started about 10 years ago, makes very creative, unique, and interesting soy cheeses and cultured soy yogurts. The founder has a university research background and is a very nice guy.

Tofu: Tofu consumption in Europe has expanded steadily over the past 5-7 years, but it is still a very small product. The largest maker of the tofu and tofu products sold in Germany is Life Food GmbH / Taifun Produkte, run by Wolfgang Heck and Guenter Klein. Heuschen-Schrouff B.V. (Landgraaf, Netherlands) and Viana are tied for second

place. About 10 years ago, Heuschen-Schrouff started selling their tofu under the organic So Fine brand ([www.sofine.nl](http://www.sofine.nl)). An Indian-run company in Kerkrade, Netherlands, run by the brothers Singh (both Sikhs), makes tofu mostly for the Asian (Indonesian) market. In 2001 Viana started selling its tofu to the mainstream market under the Veggie Life brand; this English-language brand name communicates well to people speaking many different languages throughout the EU (European Union)—though distribution is still limited to Germany and Austria. Soto Tofu, formerly run by Rolf Barthof has been sold to a very large dairy company, Algåuland. Viana's main products are tofu and tofu products—such as meat and cheese alternatives. Viana is #1 in Germany in meat alternatives. Germans buy soyfoods for three main reasons: They are good for one's health, they taste good, and good for the environment. Bernd is a vegan, but about 90% of Viana's products are sold to non-vegetarians.

Early tofu companies still active in Europe include Sojafarm (founded and still run by Lothar Stassen), Albert's Tofuhaus (Albert Hess; exports lots of his products to France). A basic problem with the smaller, early tofumakers in Germany is that they didn't have the creativity or power to put a brand on the market. So both these companies produce a lot of tofu under private labels. Lothar bought the Svadesha brand (Svadesha was the first German tofu company) and produces tofu under the Svadesha brand. About 2-3 years ago he also purchased the Nagel's Tofu brand from Christian Nagel, who now markets the tofu under his former brand. So Lothar makes tofu under 3 brands. Berief Feinkost (in Beckum, northern Germany), started 10-15 years ago, tries to cover the mainstream tofu market, but not very successfully. Kassel Tofu Kato (started by Gyoergy / Yuri Debrecini, who was at Soyastern). Thomas Karas is no longer involved with soyfoods; he tried to enter the computer business but Bernd does not know what he is doing now. In Spain, the market leader is Natursoy near Barcelona. Nearby is Salvador Sala of Vegetalia. In Spain, there is a lot of interest in and rapid growth of soyfoods and organic foods. In Italy the Ki Group (Schenker) owns a tofu company—fairly old but not very creative.

In the United States, Pulmuone now has three U.S. factories; their first one in Southgate, southern California, a new one at Fullerton, California, and a 3rd one in New York. The Fullerton factory is the most modern Bernd has ever seen. There they make Gourmet Tofu, introduced in about Jan. 2004, which is presliced and marinated, in 4 flavors / styles: Baked, Sliced, and Marinated.

Meat alternatives: Nestle now owns Osem which owns Tivall, the Israeli maker of meat alternatives. Since all of Tivall's products are held together by eggs or egg whites, none of them are vegan—and none are organic. Quorn, which also contains lots of egg protein, is owned by AstraZeneca [Marlow Foods]—which wants to sell the company because growth and profits have been lower than expected. DE-

VAU-GE in Germany is a very big company, they make large amounts of meat alternatives (incl. burgers), and they do a lot of business with Aldi in breakfast cereals—not in soyfoods. Bernd thinks they are good, and very economical manufacturers, but they are not very creative and they have no USP (unique sales point); moreover, many of their products contain egg protein, but their quality is lower than that of Tivall. Bernd believes his meat alternatives are as good as Tivall's, but more expensive, in part because of organic ingredients. Tivall makes its raw materials in Israel, then exports these to Europe for cutting and flavoring.

Klaus Gaiser owns Topas which sells Viti brand meat alternatives based on wheat gluten, with no soy; he owns the brand and markets the products, but he has meat companies manufacture them. However, when his typically 3-year contract with the manufacturer expires, he has to find a new manufacturer, but the previous one keeps making his products under their own brand. In the USA: At Turtle Island Foods (Hood River, Oregon), Bernd met Hans Wrobel, a German who does product development. Note: Hans and Rhonda Wrobel of The Higher Taste developed Tofurky in Portland, Oregon. Bernd makes Pizzarella, a tofu-based cheese alternative. Address: Founder and president, Viana Naturkost GmbH, 54578 Wiesbaum / Vulkaneifel, Germany. Phone: +49 06593-99670.

3451. **Product Name:** Soy7 Soy Dry Mixes [Burger Mix, Chili Mix, Burger Bits, Taco Mix, Recipe Strips].

**Manufacturer's Name:** ADM Health and Nutrition.

**Manufacturer's Address:** 4666 Fairies Parkway, Decatur, IL 62526. Phone: 1-800-510-2178.

**Date of Introduction:** 2004 March.

**Ingredients:** Incl. NutriSoy soy protein.

**Wt/Vol., Packaging, Price:** Paperboard box.

**How Stored:** Shelf stable.

**New Product—Documentation:** See next page. Leaflet (8½ by 11 inch, color, glossy, front and back) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2004. March. "What is Soy7?" Includes 6 pastas and 5 dry mixes. Each package contains at least 7 grams of all-natural Nutri-Soy soy protein. The ingredients are not listed.

3452. **Product Name:** Spring Rolls (Meatless) [Thai, Hot & Spicy, South West].

**Manufacturer's Name:** Health Is Wealth Products, Inc.

**Manufacturer's Address:** 217 Prosser Ave., Williamstown, NJ 08094-8600. Phone: 856-728-1998.

**Date of Introduction:** 2004 March.

**Ingredients:** Thai: Wrapper: Water, unbleached wheat flour, water, salt, wheat gluten flour, corn starch. Filling: Cabbage, tofu (soybeans, water), carrots, onions, green beans, shiitake mushrooms, textured wheat gluten, peanut sauce (peanuts, evaporated cane juice), soy sauce (soybeans, water, salt),

# Soy7™

## What is Soy7™?

Soy7™ is a versatile line of six soy-enriched pasta varieties and five dry mix entrée varieties, perfect for incorporation into a range of meal applications. Each Soy7 variety contains at least seven grams of all-natural NutriSoy® soy protein per serving. All Soy7 products are cholesterol-free and low in fat, provide a complete source of amino acids, and, of course, provide an excellent source of soy protein. Soy7 pastas also contain about 17 percent less carbohydrate than traditional pastas.

The Soy7 line is also convenient. Soy7 pastas cook just like traditional pastas, and Soy7 dry mix entrées are typically faster and easier to cook than traditional meat or poultry products—all without sacrificing taste of nutrition.

## Natural and healthy

Heart disease is the number one killer of Americans, so incorporating heart-healthy foods into the diet without having to change the way you eat is important. Great-tasting Soy7 products are not only versatile and easy to use, but they also have at least seven grams of NutriSoy brand soy protein per serving. The NutriSoy logo can be found on food products, such as Soy7, which contain a significant amount of great-tasting, heart-healthy soy protein per serving.

Products with the Soy7 logo qualify for the FDA-approved heart health claim, which states that "25 grams of soy protein a day, as part of a diet low in saturated fat and cholesterol, may reduce the risk of heart disease." Consumers need only look for the Soy7 logo to know that they are getting a great-tasting, heart-healthy dose of NutriSoy soy protein in each serving!

## Quality products

Aside from their versatility and heart-healthy benefits, Soy7 pastas and dry mix entrées are certified kosher. Pastas shelf-life is two years and mixes one year. Because they meet the American Heart Association food criteria for saturated fat and cholesterol for people over age two, Soy7 products also carry the AHA's heart-check mark.

GOOD NUTRITION, Great Taste!

## Advantages to retailers

Soy7 products can help expand retailers' customer base by appealing to those whose diets are restricted due to eating requirements. Plus, Soy7 products are ideal for vegetarians and for consumers who simply want to eat healthier without drastically altering their diets.

## Soy7™ Pastas

Varieties of Soy7 pasta available for retail sale:

- Lasagna
- Rotini
- Elbow
- Angel Hair
- Penne Rigate
- Spaghetti

## Soy7™ Mixes

Varieties of Soy7 dry mix entrées available for retail sale:

- Burger Mix
- Chili Mix
- Burger Bits
- Taco Mix
- Recipe Strips

tomato paste, rice vinegar, expeller pressed soybean oil, sea salt, garlic powder, onion powder, spices.

**Wt/Vol., Packaging, Price:** 6.4 oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Leaflet (1 panel each side, front and back, glossy color, 28 cm). Sent by Patricia Smith from Natural Products Expo West. 2004 March. “New taste sensations! Spring rolls.” “1978-2003. 25 years of frozen product innovation.”

3453. SunOpta Inc. 2004. Sunrich (Portfolio). Toronto, Ontario, Canada. 12 inserts. 31 cm.

• **Summary:** The cover of this portfolio is a composite color photo on a tan background. The photo shows (L-R) whole soybeans, a glass of soymilk, green edamame (in the pods), a farmer in a field examining heads of wheat, a wooden scoop of corn flour and grits, whole kernels of corn. Below it is the SunRich logo, the name in red, a stylized yellow sun background, and the tag line below: “Your direct link to Nature.” On the inside front cover are six oval color photos, each explaining Sunrich’s mission.

Inserts: (1) The SunRich Food Group: Unique vertically integrated soymilk business model. Identity preserved non-genetically modified soy foods ingredients. Five photos show from seed producer to third party distribution.

(2) SunRich company fact sheet (on letterhead). Sunrich (a Sun-Opta company) was founded in 1978. In Aug. 1999 Sunrich, led by CEO Allan Routh, was acquired by Stake Technology Ltd. The Sunrich Food Group, composed of four companies (Sunrich, Nordic Aseptic, Northern Food and Dairy, and Hearty and Natural) now has \$150 million in sales.

(3) Reprint of an article: Fleming, Richard. 2001. “The roots of sustainability run deep for Sunrich.” *Natural Business LOHAS Journal* 2(4):45-46. Fall.

(4) SunRich Food Group product and services. (5) Soy and organic food trends. Soymilk sales nationwide have grown from \$100 million in 1995 to \$550 million in 2001. (6) William Fenske: Vice president of technical services for Sunrich Food Group (Bio). (7) Allan Routh: President of the Grains and Soy Products Group of Sunrich Food Group (Bio). “Mr. Routh has been involved with Sunrich since it was established in 1978, originally to develop export markets for waxy corn growers. A graduate of the University of Minnesota and the University of St. Thomas (Minnesota).” Mr. Routh is also involved in the production of high quality Berkshire Pork for export to Japan, and continues to be active in his family’s farming operations in southern Minnesota. (8) Unlimited soy solutions! Color, glossy, back to back. (9) Unlimited Organic Solutions! (10) Cooking with SunRich Naturals brand edamame and shelled edamame (9 p. of recipes). (11) SunRich Food Group patents low fat, high protein organic soymilk formulation–Soy Lite (Feb. 2003). (12). SunRich Food Group executive named new president

of Soyfoods Association of North America (Tina Nelson, Feb. 2003). (13) SunRich Food Group introduces new SunRich Naturals line of frozen edamame and fully organic, gluten-free veggie burgers (Sept. 2003, expected to hit stores by Jan. 2004). (14) SunRich to co-sponsor soy tasting event, hosted by Soyfoods Association of North America (on March 6 during 2004 Expo West). (13) Edamame and shelled edamame: New food service item. Address: Toronto, Ontario.

3454. **Product Name:** Trader Joe’s Greek Style Tofu Veggie Burger.

**Manufacturer’s Name:** Trader Joe’s (Marketer-Distributor).

**Manufacturer’s Address:** Monrovia, CA 91016.

**Date of Introduction:** 2004 March.

**Ingredients:** Organic tofu (filtered water, organic soybeans, nigari–magnesium chloride, a natural firming agent), organic spinach, feta cheese (goat milk, salt, vegetable rennet cultures), organic onions, organic red bell peppers, organic garlic, black olives, organic bread crumbs (organic whole wheat flour, filtered water, organic rosemary, organic garlic, olive oil, sea salt, yeast), organic olive oil, organic dried tomato, tapioca flour, potato starch, nutritional yeast, organic onion powder, organic spices, organic black pepper, sea salt.

**Wt/Vol., Packaging, Price:** 2 burgers in 6 oz (170 gm) vacuum pack. Retail for \$2.69 (2004/03, Lafayette, California).

**How Stored:** Refrigerated.

**New Product–Documentation:** Product with Label purchased at Trader Joe’s in Lafayette, California. 2004. March 13. Label is 2.1 x 2.75 inches. Orange, red, black, green, and light green. “Made with organic tofu, spinach & peppers.” Logo: “Certified organic by Quality Assurance International (QAI).”

3455. **Product Name:** Vegetarian Crispy Spicy Chicken Patty, Vegetarian Chicken Nuggets, Vegetarian Chicken Steaks, Vegetarian Black Pepper Steaks, Vegetarian Black Pepper Chicken Tenders, Vegetarian Citrus Sparerib Cutlets, Vege Ginger Chicken, Vegetarian Fish Fillets, Vegetarian Chicken Drumsticks, Vegetarian Meatballs.

**Manufacturer’s Name:** VegeUSA.

**Manufacturer’s Address:** www.vegeusa.com. Phone: 1-888-772-8343.

**Date of Introduction:** 2004 March.

**Ingredients:** Vegetarian Chicken Drumsticks: Soybean fiber, water, whey protein, modified food starch, soybean protein, wheat protein, natural vegetarian smoked chicken flavor, raw cane sugar, sea salt, soybean oil, tofu skin [yuba].

**Wt/Vol., Packaging, Price:** 7 oz paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** 2 leaflets (1 panel each side, front and back, glossy color, 28 cm). Sent by Patricia

Smith from Natural Products Expo West. 2004 March. "Vegetarian plus: A meatless world. A new wave of vegetarian cuisine. The all natural choice." The front shows color photos of 7 prepared dishes. The rear gives ingredients, Nutrition Facts, and UPC for each product. Why does this company refuse to give its address?

In March 2005 a of its website, *vegeusa.com* showed its address to be: Vege USA, 4257 E. Live Oak Ave., Arcadia, CA 91006. Phone: 1-888-772-8343. Founded in 1998, the company is an importer and wholesaler.

In Dec. 2014 a search of its website, *vegeusa.com* showed its address to be: Vege USA, LLC, 1425 S. Myrtle Ave., Monrovia, California 91016. Phone: 626-386-0800. The company appears to have East Asian (Chinese or Japanese) roots.

**3456. Product Name:** [Veggie Chick'n Nuggets, Veggie Gyro, Veggie Bratwurst Sausages, Veggie Bolognese].

**Foreign Name:** Chick'n Nuggets, Veggie Gyros, Veggie Bratnacker, Veggie Bolognese.

**Manufacturer's Name:** Veggie Life.

**Manufacturer's Address:** Postfach 1154, D-54576 Hillesheim, Germany.

**Date of Introduction:** 2004 March.

**Wt/Vol., Packaging, Price:** 200-250 gm pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Color packages sent by Bernd Drosihn. 2004. Nov. 15. Size: 10 by 18 by 3.5 cm. Paperboard boxes. Red, blue, green, and black on light yellow. Color photo of the dish, ready to eat, on a white plate. Each of these Veggie-Life-brand products is a meat alternative, ready to heat, introduced in Feb. 2000. The packaging is very attractive. However the relationship between the two companies Viana and Veggie Life (located in different places) is confusing. We believe that Veggie Life is a brand owned by Viana, but sold at supermarkets.

**3457. Product Name:** [Grilled Tofu, Soy Burger, Marinated Tofu, Tofu Spread (Mediterranean, or Red Pepper / Paprika), Tofu with Vegetables].

**Foreign Name:** Tofu Grill, Burger Soja, Tofu Marinirani, Tofu Namaz (Mediterranean, or Paprika), Tofu s Povrcem.

**Manufacturer's Name:** Annapurna.

**Manufacturer's Address:** Nehajska 42, 10000 Zagreb, Croatia. Phone: 01 3385 533.

**Date of Introduction:** 2004 May.

**Ingredients:** Grilled: Tofu, soy sauce, salt, oil. Burger: Soybeans, carrots, onion, oak flakes, breadcrumbs, salt, spices, herbs, oil.

**Wt/Vol., Packaging, Price:** Grilled: 250 gm vacuum packed. Sells for 56kn/kg. Burger: 148 gm vacuum packed. Sells for 54kn/kg.

**How Stored:** Refrigerated.

**New Product–Documentation:** Labels sent by Vlatka

Kuzmic. 2005. June 6. She wrote the introduction date and English translation of the product name on the back of each 2½ by 3¼ inch label. Self adhesive. Blue, green, and orange. Color photo of yellow soybeans against a blue background. Product name in white letters on light green background. The dates of introduction in 2005 are: Grilled Tofu–Feb. Soy Burger–March. Marinated Tofu, Tofu Spread (Mediterranean, or Red Pepper / Paprika), and Tofu with Vegetables–April. The soy burger contains okara.

**3458. Product Name:** Quorn Naked Cutlets, Patties, Nuggets, Cutlets, Tenders (Meat Alternative Made from Mycoprotein).

**Manufacturer's Name:** Quorn Foods Inc.

**Manufacturer's Address:** P.O. Box 370, Riverside, CT 06878.

**Date of Introduction:** 2004 May.

**Ingredients:** Based on mycoprotein.

**New Product–Documentation:** Ad (full page, color) in *Vegetarian Times*. 2004. May. p. 66. "Tastes better than chicken." The company now makes the five meat alternatives listed above. In the lower left is a large \$1.00 coupon. "Take the Quorn taste challenge yourself."

**3459. Richmond, Akasha. 2004. Steve Demos and Gregg Engles are in Africa together on safari. Follow Your Heart restaurant in Los Angeles. Eddie Caraeef (Interview). *SoyaScan Notes*. June 12. Conducted by William Shurtleff of Soyfoods Center.**

• **Summary:** Steve and Gregg went together in Gregg's private jet. Note: Actually this trip never happened–says Steve Demos (10 April 2005)

Akasha thinks that Follow Your Heart is the single best restaurant in Los Angeles today. It is not vegetarian but all the foods are healthy and organic. It was started by Bob Goldberg.

A friend of Akasha's named Eddie Caraeef has two restaurants (each named The Newsroom) in Los Angeles. He has the best juice bar in LA, he serves great vegetarian foods and soups (though he is not presently a vegetarian), he cooks with soy, and makes a delicious veggie burger. He is an outstanding photographer and has a superb archive of the rock and roll era, including immortal images of Jimmy Hendrix, etc. Address: Chef, Los Angeles, California.

**3460. Product Name:** Tofurky Deli Slices [Italian Deli, Cranberry & Stuffing, or "Philly Style" Steak].

**Manufacturer's Name:** Turtle Island Foods, Inc.

**Manufacturer's Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. Phone: 1-888-TOFURKY (863-8759).

**Date of Introduction:** 2004 June.

**Ingredients:** Philly Style Steak: Water, wheat protein, tofu (water, organic soybeans, magnesium chloride, calcium

chloride), natural vegetarian flavors, non genetically engineered canola oil, non genetically engineered corn starch, white beans, garbanzo beans, spices, lemon juice from concentrate, calcium lactate from beets, autolysed yeast.

**Wt/Vol., Packaging, Price:** 5.5 oz (156 gm) vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Glossy color sell sheet for Tofurky Deli Slices sent by Seth Tibbott. 2008. Jan. 1. “New look!” Photos show the front and back panels for six flavors. “Oven Roasted” was introduced in 1998 as “Original.” Hickory Smoked was also introduced in 1998.

Letter (e-mail) from Seth Tibbott. 2009. Jan. 25. These three products were first sold commercially in June 2004.

3461. Richmond, Akasha. 2004. Self Realization Fellowship (SRF) served an early veggie burger (maybe on a bun) at their India House vegetarian restaurant in Los Angeles (Interview). *SoyaScan Notes*. July 17 and Aug. 19. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Self Realization Fellowship (SRF) was founded by Swami Paramahansa Yogananda. They had a center on Sunset Boulevard named India House; it consisted of a spiritual / meditation center (“house of worship”) and a restaurant named SRF India Café. The café, a large dining room with a counter that sat 8 people, was always located at the same place. It opened in 1951, closed in 1969, and was most famous for its Indian curries. SRF has said they are very interested in Akasha’s project, but has been unable to find any menus from that restaurant. Update: 2004. Sept. 11. The SRF publicist sent Akasha a 1951 photo showing the front of India House. But SRF still is unable to find a menu. They are very interested in Akasha’s book, which has inspired them to consider doing their own cookbook. Note: SRF is now located in Pacific Palisades near the Pacific Ocean.

Paul Bragg also had an early recipe for a vegetarian hamburger. Address: Chef, Los Angeles, California.

3462. *Consumer Reports*. 2004. Soy: Cutting through the confusion. July. p. 28-31.

• **Summary:** An excellent, very helpful article. Growing evidence suggests that soy protein and isoflavones may provide health benefits to most people. However, it is often impossible to tell how much of these are in a given product. *Consumer Reports* analyzed 42 foods for the content per serving of aglycone isoflavones, soy protein, and calories. Cost (per serving), organic or not, non-GMO or not is also indicated. Only 6 of these labeled the isoflavone content, but various definitions of “isoflavones” were used—which is very confusing for consumers. A table shows the results of the analysis with the foods grouped in the following categories: Cereals and snacks. Energy bars. Other drinks. Tofu. Non-dairy desserts (soy ice cream). Cultured soy (yogurt). Veggie

burgers. Supplements. Soymilk.

Should you limit your intake of soy? (sidebar): Infants, breast-cancer patients, people on thyroid medication, people with a history of kidney stones, people allergic to soy.

Health benefits: Soy and heart health, soy and menopause, soy and bones, soy and cancer. Behind the labels. How to choose. Photos show many soyfood products.

3463. *Food Processing (Chicago)*. 2004. Wellness Foods—New Product Profiles: Two next-generation analogues better simulate full muscle texture. 65(8):s38. Aug. 1.

• **Summary:** ADM has introduced NutriSoy Next using soy proteins combined with other vegetable proteins such as wheat gluten or, in some cases, egg whites. Using a twin-screw extruder with the ingredients at relatively high moisture levels of 50-80% locks in flavor and gives them a moist texture.

Garden Protein International has launched Gardein, which is extruded non-GMO soy protein and wheat. It comes in a variety of formats and flavors. “Beef, chicken, and pork analogs are available in small or medium shreds as well as 3/4 inch and 3/8 inch dice. Pre-sauce options include teriyaki, BBQ, sweet and sour, honey garlic as well as roasted garlic and pepper.”

3464. Boca Foods Co. 2004. When it tastes this right, it has to be wrong, right? Wrong. Boca Meatless Burgers (Ad). *Vegetarian Times*. July/Aug. Rear cover.

• **Summary:** See next page. A full page color ad (p. 69) featuring a young woman’s face on a reddish red background. In the center is a Boca Burger between sesame buns with a slice of cheese plus lettuce and tomato. A table in the lower left compares the Boca Meatless Original Burgers with regular ground beef burgers: Fat (gm) 1 vs. 13. Cholesterol (mg) 0 vs. 65. Protein (gm) 13 vs. 18. Calories 70 vs. 190. Address: Massachusetts.

3465. Tofutown.com. 2004. Brief portrait (Website printout—part). www.tofutown.com Printed in August.

• **Summary:** At the top of the page in orange: Network of activities. To do list for a sustainable world. Contents: Introduction. Brand names and marketing. Youth researches. Quality. Customer relations. Animal welfare, environmental protection, health. Sustainability. Very big numbers.

Introduction: “The company Tofutown.com GmbH was founded in 1988 in Cologne under the name Viana Naturkost by a group of experienced food producers, brave tofu makers and young musicians. Since then the company has practised ‘Business without Guilt’ (e.g. the use of purely vegetable organic raw materials, in part from Fair Trade). Even after 15 years the company sees itself as a dynamic “Veggie Start Up Company.” Tofutown.com has grown to become a renowned producer of entirely vegetable foods such as meat alternatives and dairy free milk and cream

products within Europe. It is part of the Tofutown.com philosophy to produce using one's own know how and not simply "bring into circulation" (i.e. have others produce), which is commonplace in such marketplace niches as organic foodstuffs.

"More than 60 vegetarian products are made in the middle of the beautiful natural countryside of the Volcanic Eifel region, in the town Wiesbaum, which has earned itself the description 'Tofutown.' Tofutown.com is known for its excellent, tasty 'Viana Real Smoked Tofu,' the vegetable drinks 'SoActiv' and ReisActiv, the meat alternatives 'Velami,' 'Vegetarian Kebab' or '½ Pound Veggie Mince,' the dairy free cheese 'Pizzarella,' and the 'Viana Soya Coffee Creamer.' The exquisitely fine 'Country Mild Smoked' from the product range 'Classic Veggie Carpaccio' won the German Vegetarian Union's Trend Prize 2004. The export share of turnover is about 30%. Tofutown products can be found throughout Europe and even in the Kingdom of Bahrain.

"Brand names and marketing: The company produces some 60 items for the European organic market under the traditional label 'Viana' as well as a soy drink under the quality label 'demeter' (Tofutown.com is a licensed demeter producer).

"In 2003 Tofutown.com was able to introduce a new brand name into German foods retail (supermarkets, warehouses, Cash&Carry, discounters, etc.). This new label is called VeggieLife (slogan: 'happy without meat'), encompasses at present some 15 products and has made its way into 500 supermarkets within just 9 months."

As many as 15,000 users visit the company's websites each week. "We believe in Food Democracy. The Tofutown.com philosophy is that every human should have the opportunity to get an entirely vegetarian product whenever and wherever he or she is hungry or thirsty. If it comes from Tofutown, it's much more delicious and far healthier than something similar containing meat or dairy products. Today's consumers know that they shape their own future with their purchases."

Tofutown.com makes "500,000 tofu burgers and 1,000,000 real vegetarian sausages per year." There are "500,000 faithful and enthusiastic Viana customers... and approximately 35 employees." Address: Wiesbaum, Germany.

3466. United Soybean Board. 2004. Consumer attitudes about nutrition—Insights into nutrition, health & soyfoods: National report 2004-2005. Seattle, Washington. 8 p. Sept. • **Summary:** This 11th annual nationwide survey, commissioned by USB, was conducted in early 2004 by an independent research firm in Seattle, Washington. Random telephone interviews were completed with 1,000 consumers, "providing a sample that is consistent with the total American population. The study's margin of error is ±1.9 to

3.1 percentage points and has a confidence level of 95%."

Contents: Introduction and methodology. Nutritional habits and obesity concerns. Healthy food decisions. Cooking oil impressions. Consumer attitudes about fats. Awareness, usage, and trial of soy products. Soyfoods and health: Perceived healthfulness of soy products (74% say healthy, 19% neutral, 7% unhealthy), awareness of health benefits of soy (heart health 29%, prevent obesity / promote weight loss 17%, menopause relief 16%, cancer prevention 8%, good protein source 6%, reduced risk of osteoporosis 2%). Consumer perceptions of biotech [genetically engineered] food. Soy meets beef? Note: This section replaced the section on Consumer awareness and usage organic products.

Awareness of soyfoods: "Overall consumer awareness of soy products increased this year. Soymilks awareness rating stepped up to 90%, while regular use of soymilk held fairly steady at 16%. "One-quarter [25%] of Americans consume soyfoods or soy beverages once a week or more." However 38% of respondents never consume soy, up 5 points since last year. Among these non-consumers of soy, 37% (down 10 points since last year) report that that nothing in particular prevents them from including soy in their diet, and another 18% say that taste prevents them from incorporating soy in their diet.

Genetically modified foods: The focus of these questions has changed from food to agriculture. 39% "of consumers consider themselves at least somewhat familiar with biotechnology and, of this group, 65% carry a positive perception of its role in agriculture." Awareness is slightly higher among men (66%) than women (64%). Of this group: 34% believe biotech improves the nutritional make-up of crops, 24% don't know enough about biotech to say what role it plays, 13% think that biotech enables farmers to use fewer pesticides, herbicides, and toxins. Other: 29%.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at [www.soyconnection.com/health\\_nutrition/pdf/](http://www.soyconnection.com/health_nutrition/pdf/).

3467. *ADM Health & Nutrition Update (Decatur, Illinois)*. 2004. ADM introduces NutriSoy Next line of meat alternatives. 6(2):3. Oct. [45 ref]

• **Summary:** These products are said to have a taste and texture similar to that of chicken. They are made "using an innovative technique which results in a more tender, juicy product than conventional soy-based meat analogs. The product is manufactured in ADM's state-of-the-art vegetarian food plant. The 100,000 square-foot plant is completely meat- and dairy-free, and is Kosher, Pareve and Halal certified."

Note: A separate 2005 leaflet for Nutri-Soy Next explains: "Twin-screw extruders of proteins at relatively high moisture levels [Wenger UniTex] gives NutriSoy Next meat analogs their tender, moist texture."

3468.

**Product Name:** [Tofu Spread (Horseradish), Soy Sausage].  
**Foreign Name:** Tofu Namaz (Hren), Sojina Kobasica.  
**Manufacturer's Name:** Annapurna.  
**Manufacturer's Address:** Nehajska 42, 10000 Zagreb, Croatia. Phone: 01 3385 533.  
**Date of Introduction:** 2004 October.  
**Ingredients:** Spread: Tofu, water, oil, vinegar, salt, horseradish. Sausage: Soybeans, soy flour, soy sauce, wheat germ, spices, salt, oil, palm fat.  
**Wt/Vol., Packaging, Price:** Spread: 150 gm vacuum packed. Sells for 8kn. Sausage: 130 gm vacuum packed. Sells for 60kn/kg.  
**How Stored:** Refrigerated.  
**New Product–Documentation:** Labels sent by Vlatka Kuzmic. 2005. June 6. She wrote the introduction date and English translation of the product name on the back of each 2½ by 3¼-inch label. Okara is the main ingredient in the Soy Sausage; it does not contain any cooked soybeans.

3469. Iowa Soybean Promotion Board. 2004. Simply soy: Recipes celebrating nature's perfect bean. Urbandale, Iowa: Iowa Soybean Promotion Board. 151 p. Illust. Index. 23 cm.  
**• Summary:** A gorgeous book, filled with elegant, mouth-watering full-page color photos of prepared recipes. Contents: Introduction, by Linda Funk, Executive Director, The Soyfoods Council. 1. The magical bean: Soy to the world, soy and health, the soyfoods pantry (glossary incl. soybean oil, soymilk, tofu, tempeh, edamame,

soynuts, soy flour, textured soy protein, canned soybeans, miso, soy protein powder {soy protein isolates}, dried soy flakes {MicroSoy}, soy yogurt and smoothies, soy pasta {ADM}). Soyfood nutrient chart. 2. Start it up with soy: Appetizers and nibbles. 3. On the sidelines: Sides and salads. 4. Spoon fed: Comforting soups and stews. 5. Vegetarian anyone? 6. Teamwork: Pork, beef, chicken, seafood and soy. 7. The bread box: Breads and muffins. 8. Desserts: Soy and spice and everything nice. 9. Cooking with kids. Resources (Directory of members of The Soyfoods Council and their soy products; Directory of state and national soybean boards).

A smoothie (p. 133) is made at home by combining 1 cup soymilk (plain or vanilla), ½ medium banana (may be frozen, if desired), and optional nondairy ingredients, such as chocolate syrup, peanut butter, fruit juice concentrate, or frozen fruits (alone or in combinations—pineapple, orange, cranberry, raspberry, etc.). “Many of the soy smoothies and soy yogurts on the market today are probiotic, meaning they contain active, live cultures that are beneficial to intestinal health.” Address: 4554 N.W. 114th Street, Urbandale, Iowa 50322-5410. Phone: 866-431-9814.

3470. **Product Name:** [Organic BBQ Tofu Ribs].  
**Foreign Name:** Côtes de tofu biologique à saveur BBQ.  
**Manufacturer's Name:** Sol Cuisine.  
**Manufacturer's Address:** Mississauga, Ontario, Canada. Phone: 905-502-8500.

**Date of Introduction:** 2004.

**Ingredients:** 2013: Tofu\* (filtered water, soybeans\*, calcium chloride, magnesium chloride), filtered water, tomato paste\*, evaporated cane juice\*, olive oil\*, wheat free tamari sauce\* (water, soybeans, salt), spice\*, lemon juice concentrate\*, onion powder\*, mustard powder\*, garlic powder\*.

**New Product–Documentation:** Label (30.5 x 22.8 cm.) sent by Lorraine Guardino of Sol Cuisine. 2013. March 11. She ads a note that this product was introduced in 2004 by Sol Cuisine.

3471. **Product Name:** [Sol Grounds. Renamed Organic Veggie Crumbles in 2011].

**Foreign Name:** Miettes aux légumes biologiques.

**Manufacturer's Name:** Sol Cuisine.

**Manufacturer's Address:** Mississauga, Ontario, Canada L4Z 2C7. Phone: 905-502-8500.

**Date of Introduction:** 2004.

**Ingredients:** 2013: Filtered water, soy flour\*, molasses\*, onions, sunflower oil, tomato paste\*, onion powder\*, evaporated cane juice\*, garlic powder, flavour (sesame), sea salt, yeast extract, spice\*, vitamins & minerals.

**Wt/Vol., Packaging, Price:** 280 gm (8 oz).

**How Stored:** Refrigerated.

**New Product–Documentation:** A 2005 Sol Cuisine catalog describes this as a savory ground-beef alternative. Current (2013) label sent by Lorraine Guardino of Sol Cuisine. 2013. March 11. She ads a note that this product was introduced in 2004 by Sol Cuisine as Sol Grounds; the name was changed in 2011.

3472. Atlas, Nava. 2004. *The vegetarian family cookbook*. New York, NY: Broadway Books. 339 p. Illust. Index. 23 x 21 cm. [15 ref]

• **Summary:** Contains 275 vegetarian recipes, many of which are vegan; a vegan option is provided for almost all of the recipes that are vegetarian.

The index contains 47 entries for tofu (incl. silken, soft, firm, extra firm), 13 for seitan, 4 each for tempeh, soy mayonnaise, and soy milk, 3 for soy yogurt, 2 each for edamame and miso, 2 each for soy nut butter, soy allergy, soy products, and 1 each for soy Canadian bacon, soy cheese, soy cream cheese, soy hot dogs, and soy pasta.

About the author: Nava Atlas is the author of eight previous vegetarian cookbooks. Her website, [www.vegankitchen.com](http://www.vegankitchen.com), is one of the most widely visited culinary websites on the Internet. She lives in the Hudson Valley with her husband of 25 years (Chaim “Rocky” Tabak) and their two sons, Adam and Evan. A photo (p. 339) shows Nava Atlas. Address: Author and illustrator, New Paltz, New York.

3473. Grimaldi, Polly. 2004. *Quick and easy soy and tofu recipes*. Hayward, California: Bristol Publishing Enterprises. (A Nitty Gritty book). iv + 155 p. Illust. Index. 14 x 21 cm.

• **Summary:** Contents: 1. An introduction to tofu and soy. 2. Breakfast. 3. Entrees. 4. Side dishes. 5. Salads. 6. Soups. 7. Sauces, spreads, dips and snacks. 8. Breads. 9. Drinks. 10. Desserts. Address: Hayward, California.

3474. Herring, Sandy. 2005. *The Solae Branded Products program (Interview)*. *SoyaScan Notes*. Jan. 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** For a product to become part of the Solae Branded Partners program, the manufacturer must agree to two things: (1) To put the Solae logo (of at least a minimum size) on the product. (2) To include a minimum amount of Solae brand isolated soy protein (ISP) in the product. Usually Solae’s advertising program (“Protein in Unexpected Places”) promotes some of the Branded Partners’ products. The makers of some products that do contain Solae might decide not be part of the Branded Partners program because (for example), the package might be too small to include the logo, the amount of protein that gives the maximum acceptability and profitability might be less than Solae requires.

In the past, many products contained ISP for its functional properties, such as being a good binder or emulsifier. The new program is designed to add value to consumer products by making Solae a “characterizing ingredient” and by advertising that the product contains Solae. Before Solae approaches a potential new customer about “a co-branding opportunity,” they do a great deal of consumer research and market research about the concept of a product that contains Solae—its acceptability and how the new product or product concept “would resonate with their consumers.” Solae presents their ideas of how the ad might look, the packaging might look, etc.

A media release (faxed by Sandy to Soyfoods Center) lists the following 16 branded products: 8th Continent Soymilk ([www.8thcontinent.com](http://www.8thcontinent.com)), Snapple-A-Day Meal Replacement Beverages ([www.snappleaday.com](http://www.snappleaday.com)), V8 Splash Smoothies ([www.v8juice.com](http://www.v8juice.com)), Gardenburger Meat Alternatives ([www.gardenburger.com](http://www.gardenburger.com)), Mori-Nu Tofu ([www.morinu.com](http://www.morinu.com)), Yves Veggie Cuisine ([www.yvesveggie.com](http://www.yvesveggie.com)), NuGo Bars ([www.nugonutrition.com](http://www.nugonutrition.com)), DelightFull Meal Replacement & Snack Bars ([www.affinta.com](http://www.affinta.com)), DelightFull Smart Snax ([www.delight-full.com](http://www.delight-full.com)), Hormel Health Labs Great Shake & Great Shake Plus ([www.hormelhealthlabs.com](http://www.hormelhealthlabs.com)), Perky’s 100% Natural Nutty Grains & Soy Cereal ([www.pacgrain.com](http://www.pacgrain.com)), Natural Harmony Foods SoyLean ([www.soylean.com](http://www.soylean.com)), So Good Soymilk (available in Canada) ([www.so-good.com](http://www.so-good.com)), Linda McCartney Spicy Peanut Pasta with Vegetarian Chicken ([www.linda-mccartney.com](http://www.linda-mccartney.com)), Body Choice Premium High Protein Cookies ([www.bodychoicenutrition.com](http://www.bodychoicenutrition.com)), El Burrito Meat Alternatives

3476. Gardenburger, Inc. 2005. Annual report 2004 (Form 10-K). 15615 Alton Parkway, Suite 350, Irvine, California 92618. 78 p. 28 cm.

• **Summary:** Sales and profits continue to drop. Net sales in 2005 were \$48,580 million, down from \$49.4 million the previous year. Net income was a loss of \$12.026 million, larger than the loss of \$10.790 million the previous year. On pages 4-7 are descriptions of the following categories of products: Retail grocery burger products (8 products). Retail grocery meatless specialty products (16). Club channel products (2). Food service products (19 products). The CEO, president, and chairman of the board is Scott C. Wallace. His salary in 2004 increased (despite poor performance) to \$283,800, plus a bonus of \$68,640. Paul Wenner, company founder, owns 13.5% of the company's shares.

Accompanying the annual report is a notice of Annual Meeting of Shareholders and proxy statement (19 p.). Address: Irvine, California. Phone: 949-255-2000.

3477. **Product Name:** Soy Creations Vegetarian Chicken Breast, Vegetarian Hors d'Oeuvres [BBQ, Curry (Vegan), Kung Pao (Vegan), Southwestern].

**Manufacturer's Name:** i Foods, Inc.

**Manufacturer's Address:** 2222 Davie Ave., Los Angeles, CA 90040. Phone: (213) 728-8288.

**Date of Introduction:** 2005 March.

**Ingredients:** Chicken Breast: Textured soy protein, water, soybean oil, isolated soy protein, whey protein, sugar, soy sauce (water, soybeans, wheat, salt), wheat protein [gluten], corn starch, tapioca starch, potato starch, salt, spices, natural flavors (from vegetable sources), seaweed, autolyzed yeast extract.

**Wt/Vol., Packaging, Price:** 150 gm paperboard box.

**New Product-Documentation:** Three leaflets (8½ by 11 inches, 1 panel each side, glossy color, front and back) sent by Patricia Smith from Natural Products Expo West at Anaheim. 2003. March. The front of each shows a large color photo of the prepared product.

3478. **Product Name:** [Tofu Burgers (Curry and Poppy Seeds)].

**Foreign Name:** SOY Croque Tofou (Curry et Pavot).

**Manufacturer's Name:** Nutrition & Santé S.A. (Formerly SOY / Société Soy).

**Manufacturer's Address:** B.P. 33, Z.I. de la Pomme, 31250 Revel (near Toulouse), France. Phone: +33 62 18 72 50.

**Date of Introduction:** 2005 March.

**Ingredients:** Fresh tofu\* 72.8% (water, dehulled soybeans\* 19.7%, coagulants: calcium sulfate, nigari), marrow squash\*, onions, capsicum / hot red peppers\*, rice flour\*, millet flakes\*, whole maize semolina\*, parsley\*, tomato

concentrate\*, non-deodorized sunflower seed oil\*, chestnut flour\*, sea salt, garlic\*, textured soy proteins\*, poppy seeds (0.55%), curry\* (0.6%) (coriander\*, cumin\*, turmeric / curcuma\*, paprika\*, cinnamon\*), yeast extract\*, dehydrated black mushrooms\*. \* = Organically grown ingredients Certified by Ecocert F 32600 L'Isle Jourdain.

**Wt/Vol., Packaging, Price:** 200 gm paperboard box, 2 burgers per pack.

**How Stored:** Refrigerated, store at 4°C.

**New Product–Documentation:** Product with Label brought by Taro Mikuriya of the Nutrition & Santé Group (Revel, France). 2011. Dec. 14. Paperboard box. 4 by 6 by 1.5 inches. Dark green, purple and black on white. Color photo of a burger on a plate, with a wedge partially removed on a fork. On the front panel are the Soy logo (white on dark green), two organic certification symbols, and the company's logo / statement: Organic soybeans guaranteed not genetically engineered (*Soja Bio garanti sans OGM*). Origin: 100% from southwest France. On the back: Since 1998 Soy has created the first line of products in Europe guaranteed to be not genetically engineered. For recipes and more visit [www.soy.fr](http://www.soy.fr).

Letter (e-mail) from Bernard Storup, founder of Nutrition & Nature (Revel, France). This product was first sold commercially in Sept. 1998.

3479. **Product Name:** Vegetarian Whole Turkey, Chicken Medallions.

**Manufacturer's Name:** VegeUSA.

**Manufacturer's Address:** [www.vegeusa.com](http://www.vegeusa.com). Phone: 1-888-772-8343.

**Date of Introduction:** 2005 March.

**Ingredients:** Soybean fiber, water, soybean protein, vegetable protein, raw cane sugar, starch, soybean oil, vegetarian turkey flavor, sea salt, cinnamon powder, tofu skin [yuba].

**Wt/Vol., Packaging, Price:** 6 lb package.

**How Stored:** Frozen.

**New Product–Documentation:** See next page. 4 leaflets (1 panel each side, front and back, glossy color, 28 cm). Sent by Patricia Smith from Natural Products Expo West. 2005. March. "Vegetarian plus: A meatless world. A new wave of vegetarian cuisine. The all natural choice."

3480. **Product Name:** Vegan Tuna Rolls, Vegetarian Chicken Masala, Vegetarian Lamb Vindaloo, Vegan Kung Pao Chicken, Vegan shrimp.

**Manufacturer's Name:** VegeUSA.

**Manufacturer's Address:** [www.vegeusa.com](http://www.vegeusa.com). Phone: 1-888-772-8343.

**Date of Introduction:** 2005 March.

**Ingredients:** Vegetarian Chicken Masala: Soybean fiber, water, whey protein, soy sauce, soybean oil, raw cane sugar, sea salt, vegetarian chicken flavor,...

**Wt/Vol., Packaging, Price:** 10.5 oz. package.

**How Stored:** Frozen.

VEGETARIAN PLUS

A MEATLESS WORLD

*healthy holidays*

### VEGETARIAN WHOLE TURKEY

A delicious centerpiece to any festive meal, our Vegetarian Whole Turkey has a flavor and texture so close to real turkey, you'll be double checking to make sure it's really vegetarian. An appealing presentation is such a big part of holiday celebrations, and our "bird" has a beautiful table appearance. Made with all natural ingredients and Non-GMO soy, it easily heats and serves in just one hour. Once heated, the vegetarian turkey is firm, moist, and slices beautifully. To round out the meal, a package of our delicious Himalayan Barley Fried Rice with Vegetarian Ham sidedish is included.

marinated in shoyu and ginger). Tofu herbs. Tofu spicy. Tofu teriyaki. Tofu vegies burger. Tofu tempeh burger. Strawberry tofu (dessert in a cup, with real fruit sauce on top). Apricot tofu (dessert in a cup).

Note: Nutrisoy is the inventor of Tofu tempeh, and Tofu tempeh burger. Address: 15 Hannon St., Botany (suburb), Sydney, NSW 2019 Australia. Phone: +61 2 9316 5171.

3483. Camps, Lisa. 2005. Re: History of work with soyfoods in Goa, India. Letter (e-mail) to William Shurtleff at Soyfoods Center, May 15. 2 p.

• **Summary:** 1984–Lisa came to Goa to nurse a friend back to health; he was a vegetarian. While in India she discovered so many alternative styles of life, so many people from all over the world with a similar consciousness related to healthy body, mind, and spirituality. All “seemed to care about the planet, nature, peace, yoga, natural healing, vegetarianism, etc. India is a whole country of vegetarians, but in Goa, a former Portuguese colony, the inhabitants are mostly Christians who eat meat.” That year, Lisa became a vegetarian.

She returned to America, only to yearn to come back to India. So she spent 7-8 years coming and going, whenever finances permitted. When in the USA, she worked with food, in restaurants, hotels, night clubs, made good money, then left again. She took many courses in the health and nutrition at community colleges. She had seen many unhealthy vegetarians and wanted to learn how to be a healthy, vigorous vegetarian. Having helped to deliver 4 children by natural child birth in Goa, she was interested vegetarian diets for children and natural healing.

1982–While in Goa, Lisa met an Australian woman, Diane [Froggatt], who was making her own tofu, because it was not available, and all were tired of Dal (lentils). “I asked her to teach me, and she did... I happily made it for myself to fill the protein gap. Along with Tofu also comes Soy Milk and Okara! A bonus! Made soysausage, soya burgers, etc., but only at home at that time.”

1986-87–Lisa attended a Michio Kushi Institute in Switzerland; she learned macrobiotics and shiatsu, which she practiced for about a year, then decided that macrobiotics was “excellent for healing purposes, but not for daily life, simply because any diet so extreme and tasteless is doomed to opposite extremes.” She observed that most people who regularly ate a macrobiotic diet “craved massive amounts of Chocolate, or some other form of ‘naughtiness.’”

1989-90. Lisa decided to settle in Goa. It had really become her home and it was too expensive to fly back and forth. But how to make money in India? Her many Indian women friends adored lingerie. So she did all the necessary paperwork and started a business named Ooh-La-La-Lingerie Pvt. Ltd., importing undergarments from Europe and traveling all over India to sell them to major department stores. The business went well for 2-3 years until the

suppliers and buyers connected—leaving her out.

At the same time, Lisa was selling soya burgers, hummus brown bread, and 4 flavors of soy milk in the Flea market [in Anjuna], where she had a food stall; she made these in her home kitchen. “Then a few people started asking me if I could make them some Tofu! So, I thought why not, since I’m doing it for myself anyway.” “All our production started in a small room (in my house), which I converted into a special tofu room, with ventilation above a false ceiling, a sink, stainless steel tables, and extreme hygiene. It was about 3 meters on a side with white tiles. We used (and still use) Aqua Guard water filter systems for all production and packing. So I started by making 2-3 kg at a time, squeezing the milk through a cloth by hand, actually burning my hands on a regular basis, until I decided to build a press. Made some wooden tofu boxes, and did the grinding on a grinding stone. Ouch, too much time and labor! We were selling only to shops and Five-Star hotels.

“As time passed and orders got bigger, my friend and now partner, Richard Chabin, helped me get some machinery, Then, I wanted to learn about Tempeh, and how to make it. There was an American fellow named Joseph Papa who had a book and an interest, so I traded him my shiatsu massages for the method on how to make Tempeh. My interest in Tempeh was the vitamin B’s only found in Tempeh. Important if you don’t eat beef liver.

“So now I knew many soy foods, and was happily cooking for many friends daily. I enjoy cooking, and they enjoyed eating.

“Then I tried to market the tofu to the local market and restaurants, but as they were not familiar with it, they were afraid, even after I gave them many recipes” and even showed them how to prepare it Indian style—like paneer. “That’s when I decided to open a small sandwich shop.”

1999–The sandwich shop, named Bean Me Up, Soya Station, Salad Bar, was a “raging success from the beginning.” It became too big for the original premises, and there were long lines at peak season. Note: The restaurant name derives from a famous catchphrase from the movie *Star Trek*, “Beam Me Up, Scotty!”

2004 Oct. 31–Lisa took on large premises with 14 rooms to rent and a small health food shop and restaurant. The commercial foods (tofu, tempeh, soymilk, etc.) are made in a separate building (a small factory) on the compound. It opened on Halloween with a costume party. The “real point is the restaurant” (which kept the same name); it is a unit of Ooh-La-La Ling. When people discover that they can get fresh safe salads, Tofu, Tempeh, Seitan, soya ice cream, Tofunaise, etc. after traveling in India, they are so Appreciative. That is a reward in itself! I truly believe that to introduce people to a more healthy diet, and to given up meat, the alternative must taste good, or why would they consider changing? Hence, our theme is ‘The Tasty Alternative.’ Lisa, now an established businesswoman, has a

new source of income from her 14-room hotel!

Two months later, on 24 Dec. 2004 (Christmas eve), a mob of 150 people, escorted by two policemen (for the mob's protection!) went to the Anjuna-Chopra beach belt and rudely demanded that certain restaurants and shops close down. Why? Because their owners were of foreign origin. No matter that Lisa, of American origin with an Indian passport, had lived in Goa for 23 years and had all the legal papers required to run her business. The agitation was probably initiated by indigenous restaurant / shop owners who resented the foreigners' success and had the blessings of local politicians—a familiar theme worldwide. Fortunately, Lisa had some friends with the National Press, *Times of India*, so she and her fellow foreigners showed no fear, followed the procedures, and made a big noise; the actions of the mob were clearly illegal. Her restaurant was never shut down and the problem appears to have gone away.

Lisa is a member of the Vegetarian Society of India, and occasionally they call on her to give seminars for the members.

Note: Diane Frogatt died a few years ago from cancer.

Photos sent by Ratan Sharma in 2010 and taken by him in Jan. 2005 show the entrance to and the inside of this remarkable soy restaurant and salad bar. They serve only soy-based recipes. They also have a branch in Hyderabad. Note: Lisa does not own a SoyaCow. Address: Owner, Bean Me Up, 1629 Deulvaddo, Anjuna / Vagator, Goa, India 403-509. Phone: 0091-(0)832-227349.

3484. Bean Me Up, Soya Station, Salad Bar. 2005. Welcome to the Soya Station (Menu). Anjuna/Vagator, Goa, India. 10 p.

• **Summary:** Contents: Welcome. Starters: Side dishes (incl. Spiced tofu {deep fried} with peanut or chilly sauce. Tofu or tempeh {pan fried} with peanut or tahini. Baked potato with sour cream, butter, or tofu cream cheese). Just for kids: 12 years and under (incl. Tofu bolognese, served over spaghetti. Tempeh sandwich with tortilla chips). New York Pizza (incl. Indonesian special {tempeh & pineapple}. Veg. special {tofu, onion, capsicum, mushroom & olives}, Additional toppings—tofu, tempeh). Salad bar (Tofu salad—Beet root, carrots, onions, cucumber, tofu cubes & tofunaise {vegan}, Side order of tofu or tempeh, with choice of tahini, peanut, or tomato sauce).

Good morning—Breakfast (incl. Tofu {scrambled w/ onion capsicum or butter fried w/soya sauce}, Soysage {4 pieces}, Add 10 rupees for soymilk with any breakfast dish). name Vibrant Life that meets the highest standards for health and nutrition.” “Shop for the Vibrant Life products at your local Adventist Book and Nutrition Centers, college markets, or on the web at [www.vibrantlife.info](http://www.vibrantlife.info).”

A color photo shows many meat alternatives in cans, boxes (frozen), or refrigerated packs, all under the Vibrant Life brand. These include: In boxes (frozen): Chik Bits. Chik Burger. Sliced Vegetarian Bologna. Sliced Vegetarian Chicken. Sliced Vegetarian Salami. Sliced Vegetarian Turkey.

Cans: 7-Grain Cutlet. Nut-Loaf. Super Frank. Vegeburger. Vege-Cuts. Vege-Franks. Vegelets. Vege-Steak.

Refrigerated packs: Breakfast Sausage. Tofu Links. Vege-Links. Address: Loma Linda, California 92350. Phone: 888-893-2002.

3491. Pueppke, Steven. 2005. From the director’s desk. *NSRL Bulletin (National Soybean Research Laboratory, Urbana, Illinois)* 12(2):7. June.

• **Summary:** “I spent two weeks in Europe this summer and learned the new meaning of the word bio,” which is pronounced BEE-oh, not BUY-oh. It means organically grown and Mr. Peupke is surprised to find it is so popular. But he wonders if it will last. “I wonder sometimes about the future sustainability of bio systems and locally grown food. Are more western Europeans going to push their shopping carts on past the meat case and purchase soy burgers? Will they pay more for them, and will they keep on feeling good because the beans are locally grown and organic?”

“I’m not sure of the answers, but its nice to know that the NSRL will be there no matter what. Our research and outreach programs are helping to make soy a healthy and nutritious component of the human diet, but we are also working to ensure that soy will help to meet the world’s increasing demand for healthy and nutritious animal food products. We’ve got the bases covered.” A portrait photo shows Steven Pueppke. Address: Director, NSRL, Univ. of Illinois, Urbana.

3492. Garger, Ilya. 2005. “I’ll have a soya on the rocks”. *Time (Europe)*. July 31.

• **Summary:** “Given its unglamorous associations with tofu burgers, vegetarian sausages and lactose-free dairy substitutes, the soybean has long been seen as a food for the abstemious.”

3493. Garger, Ilya. 2005. Amuse bouche. *Time (Asia)*. Aug. 1.

• **Summary:** “Given its unglamorous associations with tofu burgers, vegetarian sausages and lactose-free dairy substitutes, the soybean has long been seen as a food for the abstemious.” But the bean is now ready for an “image makeover thanks to its new role as a source of hard liquor.”

3494. **Product Name:** Mock Chicken Tempeh Salad, Curried Ginger Tempeh Salad.

**Manufacturer’s Name:** Mediterranean Delights.

**Manufacturer’s Address:** P.O. Box 749, 14 Warner Center, Saxtons River, VT 05104. Phone: 1-800-347-5850.

**Date of Introduction:** 2005 September.

**Wt/Vol., Packaging, Price:** 8 or 16 ounces.

**New Product–Documentation:** Spot in *Vegetarian Journal*. 2005. Sept. (Issue 3). p. 30. “Introducing two incredible ready-to-eat tempeh salads.” Visit [www.mediterraneandelights.com](http://www.mediterraneandelights.com). Note: These products are not listed on their website on 2 Sept. 2006.

3495. Nature Soy, Inc. 2005. Healthier living, healthier life (Brochure and Portfolio). 713 North 10th St., Philadelphia, PA 19123. 10 p. + 3 inserts. 28 cm.

• **Summary:** Brochure (glossy color) sent by Patricia Smith from Natural Products Expo East (Baltimore, Maryland). 2005. Sept. Contents: Nature’s Soy: Healthy, convenient, Our company. Our facilities (Large and very modern). Our R&D. Our philosophy (We take soy products seriously!). Our products.

“Based in Philadelphia, Pennsylvania, Nature Soy, Inc. is a major supplier of healthy soy and vegetarian products on the East coast. We have been manufacturing fresh soy products since 1991 and have well established our brand name among our customers. As one of the largest Chinese-owned and operated soy food companies in the USA, Nature Soy, Inc. was featured in a television documentary about successful overseas Chinese entrepreneurs by a Chinese television station.

“Our Nature’s Soy brand of tofu and soymilk products is in almost all major Asian grocery stores and supermarkets from New Jersey to North Carolina, reaching as far south as

Georgia and Florida.”

This company specializes in soy products. The two basic types are organic and conventional. The two basic types of organic are plain and flavored.

There are four organic plain products: (1) Silken tofu, 20 oz. (2) Soft tofu, 20 oz. (3) Firm tofu, 16 oz. (4) Extra firm tofu, 12 oz. “Using a cheese or deli slicer, this extra firm tofu can be sliced to about 1/16 inch thin slices, yet still maintains its integrity.”

There are four organic flavored products: (1) Five spice flavored tofu, 12 oz. (2) 5 minute tofu, 11.5 oz. (3) Tofu-Deli, pre-diced, 12 oz. (4) Tofu-Deli, pre-sliced, 12 oz.

There are four conventional plain products: (1) Silken tofu, 20 oz. (2) Soft tofu, 20 oz. (3) Firm tofu, 16 oz. (4) Extra firm tofu, 10 oz.

There are four conventional flavored products: (1) Flavored tofu, 12 oz. (2) Hot & spicy flavored tofu, 8 oz. (3) Curry flavored tofu, 10 oz. (4) Oriental sauce tofu, 10 oz.

There are 3 types of soymilk: (1) Plain, ½ gallon. (2) Sweetened, 16 oz. (3) Sweetened, ½ gallon.

There are two other products: (1) Soy puffs (deep-fried tofu), 14 pieces per pack of about 4 oz. (2) Fried tofu, 8 oz.

In addition the company makes two gluten-based products (somewhat like seitan) called “Protein Wise Meat Substitutes.” They come in Chicken Style and Beef Style, 8 oz per pack.

They also make Cantonese rice noodles and rice noodle rolls.

3496. United Soybean Board. 2005. Consumer attitudes about nutrition—Insights into nutrition, health and soyfoods: 12th annual national report. Seattle, Washington. 8 p. Sept. • **Summary:** This 12th annual nationwide survey, commissioned by USB, was conducted in early 2005 by an independent research firm in Seattle, Washington. Random telephone interviews were completed with 1,000 consumers, “providing a sample that is consistent with the total American population. The study’s margin of error is  $\pm 1.9$  to 3.1 percentage points and has a confidence interval of 95%.”

Contents: Introduction and methodology. Nutritional habits and obesity concerns. Healthy food decisions. Cooking oil impressions. Consumer attitudes about fats. Awareness, usage, and trial of soy products. Occasion preferences for consuming soy (Of consumers who use soy products at least once a month: Dinner 40%, breakfast 27%, lunch 23%, other times 10%). Soyfoods and health: Perceived healthfulness of soy products (78% say healthy, 17% neutral, 5% unhealthy), unaided awareness of health benefits of soy (prevent obesity / promote weight loss 17%, heart health 14%, menopause relief 12%, good protein source 11%, cancer prevention 10%, reduced risk of

osteoporosis 2%). Biotechnology [genetic engineering] in food and agriculture. Restaurants and soy products.

Perceptions of biotech and food: 46% (up from 39% last year) of consumers consider themselves at least somewhat familiar with biotechnology.” Of this group, 62% “report a positive perception of its role in food production.”

Perceptions of biotech in agriculture: Of that 46% who are at least somewhat familiar with biotechnology: 33% feel that its role within agriculture is to improve the nutritional make-up of crops, 25% don’t know enough about biotech to say what role it plays, 13% think that biotech enables farmers to use fewer pesticides, herbicides, and toxins, 13% have a negative perception, other 4%.

Restaurants and soy: A new question added to the survey this year shows that 20% of consumers would order soy products in restaurants if they were available. Types of soy actually ordered in restaurants: Plain white tofu 37%, veggie burger 28%, soymilk 11%, miso 11%, edamame 10%, other products 19%.

Note 1. As of Aug. 2008 this full survey is available gratis in PDF format at [www.soyconnection.com/health\\_nutrition/pdf/](http://www.soyconnection.com/health_nutrition/pdf/).

Note 2. This is the earliest English-language document seen (April 2013) that contains the term “Plain white tofu.”

3497. Roberts, Jane. 2005. The soy of life—On World Food Day, Solae helps feed Africa beyond its next meal. *Commercial Appeal (Memphis, Tennessee)*. Oct. 16.

• **Summary:** Today—which is World Food Day—350 employees at The Solae Co. in Memphis, Tennessee, are preparing to ship more than \$100,000 of soy protein and know-how to Africa. Much of this soy protein is made right in Memphis, at a 40-acre plant at 4247 S. Mendenhall, the crown jewel of Solae’s U.S. operations and one of the largest soy protein plants in the world. Solae has 28 plants around the world and annual sales exceed \$1.1 billion.

In this plant, that once belonged to the Ralston Purina Co., Solae transforms soybean flakes into high-protein powders, such as isolated soy proteins, used to fortify foods and beverages such as infant formula, meat, energy bars, smoothies, etc. for clients such as Gardenburger, Campbell’s Soup, 8th Continent, and Snapple.

Soy is a complete protein with all the amino acids necessary for human development. Solae is starting a new kind of philanthropy: helping developing fortify popular food staples—porridges, corn-based drinks and meats—with high-quality soy protein, and then working on the ground with local food producers to develop businesses, with local jobs, to make the project profitable and sustainable.

The project was initiated USAID, the arm of the U.S. Department of State that provides emergency food aid, and the World Initiative for Soy in Human Health (WISHH), funded in part by the American Soybean Association, including \$5,000 from the Tennessee Soybean Promotion

Board. Solae is the largest corporate partner in this \$750,000 project, according to Jim Hershey, director of WISHH. Hershey says that, of WISHH's six private partners, Solae is the only one that actually has an office and personnel in South Africa; the will accelerate project's ability to find local solutions.

For people with a protein deficiency, the addition of soy protein to the diet can improve life dramatically. Hershey says that children are born healthier and learn better because soy enhances brain function, and AIDS patients live longer because protein increases the effectiveness of retroviral drugs. In southern African nations, where one in five are infected with AIDS in some places, and the life expectancy as a result has dropped from 57 to 33, the infusion of an inexpensive protein holds promise. In the Ivory Coast, WISHH has helped introduce textured soy protein into the school lunch program.

3498. Associated Press (AP). 2005. Gardenburger files for bankruptcy: Company helped take veggie burgers to the mainstream (News release).

• **Summary:** "Portland, Oregon: Gardenburger Inc., the former company credited with taking veggie burgers into the mainstream, has filed for Chapter 11 bankruptcy protection."

In a statement Friday, company officials said that Gardenburger would stay in business, but would become privately held; they declined to name the new owner.

Founder and former president Paul Wenner, said its a very sad story; his stock was worth more than \$88 million before it crashed.

Note 1. The value of a share of Gardenburger stock was \$9.25 in Jan. 1998; it rose to a peak of \$14.12 by July of that year, then began to fall slowly. It was worth \$11.50 at the end of 1998, \$5.88 at the end of 1999, and \$0.50 at the end of 2000.

Note 2. As of July 2006, those who owned stock in Gardenburger Inc. now find that it is worthless. Note 3. A phone call to the company headquarters in Irvine, California, will be answered (by a machine), "Wholesome & Hearty, Inc."

3499. **Product Name:** Tofurky Roast & Gravy.

**Manufacturer's Name:** Turtle Island Foods, Inc.

**Manufacturer's Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. Distributor: P.O. Box 233, Trout Lake, WA 98650. Phone: 1-888-TOFURKY (863-8759).

**Date of Introduction:** 2005 October.

**Ingredients:** Roast: Water, vital wheat gluten, organic tofu (filtered water, organic whole soybeans, magnesium chloride, calcium chloride), expeller pressed non-genetically engineered canola oil, natural vegetarian flavors, shoyu soy sauce (water, non-genetically engineered soybeans, wheat, salt, culture), non-genetically engineered corn starch,

white bean flour, garbanzo bean flour, lemon juice from concentrate, onion, carrots, celery, salt, calcium lactate from beets. Contains: Soy and wheat.

Stuffing: Organic brown rice, whole wheat bread cubes (whole wheat, filtered water, unbleached wheat flour, organic evaporated cane juice, organic palm oil, sea salt, yeast, natural enzymes, ascorbic acid), onion, celery, expeller pressed non-genetically engineered canola oil, organic wild rice, natural vegetarian seasoning, granulated garlic, herbs and spices. Contains: Wheat.

“Giblet” Gravy: Water, whole wheat flour, expeller pressed non-genetically engineered canola oil, Tofurky giblets (water, vital wheat gluten, organic tofu [filtered water, organic whole soybeans, magnesium chloride, calcium chloride], expeller pressed non-genetically engineered canola oil, natural vegetarian flavors, shoyu soy sauce [water, non-genetically engineered soybeans, wheat, salt, culture], non-genetically engineered corn starch, white bean flour, garbanzo bean flour, lemon juice from concentrate, onion, carrot, celery, salt, calcium lactate from beets), natural vegetarian flavors, onion, carrot, celery, corn starch, salt, sunflower oil, thyme, rosemary. Contains: Soy and wheat.

**Wt/Vol., Packaging, Price:** 2 lb 8 oz (1.13 kg).

**How Stored:** Refrigerated.

**New Product–Documentation:** This refrigerated product was first sold in 2005 at Trader Joe’s. Package sent as a JPG file by Seth Tibbott, founder and owner of Turtle Island Foods. 2014. Aug. 5. Packaged in a colorful paperboard box. Front: A large color photo shows the Tofurky Roast & Gravy with a green background. “Family owned and independent since 1980.” “Gourmet. Meatless and delicious. A 100% vegan treat. Includes a tender, juicy stuffed tofu roast and rich mushroom & ‘giblet’ gravy. Serves & delights 4. Keep refrigerated. Vegan.”

E-mail from Seth Tibbott, founder and owner of Turtle Island Foods. 2014. July 30. “The green Tofurky Roast and Gravy combo box has always been a refrigerated item. It was first sold to Trader Joes in 2005. It has never been sold in the natural channel (Whole Foods, etc) but is now sold in many mainstream grocery stores coast to coast. The sales of both items are mostly equal but the Roast and Gravy is growing faster and we sell a few more of these at this point.

“The Tofurky Feast is frozen and primarily natural channel; roast and gravy refrigerated. This is a nice separation of channels so Whole Foods does not compete with Safeway.”

3500. *Daily Post (Liverpool, England)*. 2005. Premier swallows up another healthy eating company. Nov. 2. Business section.

• **Summary:** Premier Foods, owner of Quorn, purchased Cauldron Foods yesterday for £27 million. Cauldron Foods sells its vegetarian sausages, falafel, tofu, and other meatless products from its factory at Portishead, near Bristol.

Cauldron employs 215 people, generates 92% of its annual sales of £14.7 million from sales of its own brand, and had pre-tax profits last year of £1.3 million.

With the acquisition, Premier Foods has added to its portfolio of manufacturers of meat-free products and captured a larger share of the growing British market for healthy foods and meals.

In June, Premier Foods paid £172 million to acquire the maker of Quorn, which is now the largest brand in its portfolio that includes Ambrosia custard, Branston Pickle, Cadbury Hot Chocolate, and Sarson’s vinegar.

Robert Schofield, Premier’s CEO, said Cauldron was attractive because of its focus on the UK market.

3501. Marlow Foods Ltd. 2005. Quorn (Website printout–part). [www.quorn.com](http://www.quorn.com) Printed Nov. 9.

• **Summary:** Contents: 1. Visit your country’s site: United Kingdom, United States of America, Netherlands, Belgium, Switzerland, Sweden. 2. Other useful Quorn sites: Quorn education, Quorn comments. 3. Other information: Corporate profile, jobs. A color photo shows quorn with vegetables in a prepared dish. Address: United Kingdom.

3502. Marlow Foods Ltd. 2005. Quorn: Fancy trying something new? It might surprise you... (Website printout–part). [www.quorn.co.uk](http://www.quorn.co.uk) Printed Nov. 9.

• **Summary:** Contents: Our range. What’s new. What is Quorn?: About Quorn, Quorn history, Milestones. Recipes. Healthy eating. Quorn Club. Contact us. Recipe of the month. 6 free DVD rentals. Quorn on TV. A color photo shows quorn with vegetables in a prepared dish.

What is Quorn? “All Quorn products contain mycoprotein. Mycoprotein is a member of the fungi family, as are mushrooms and truffles... Mycoprotein is a fungus which contains high quality protein, enabling us to offer an alternative, purely vegetarian source of protein to meat. Mycoprotein also contains very few calories,” essential dietary fiber, and no cholesterol. Quorn is a brand name.

Historical milestones: 1967–The tiny organism used for the production of mycoprotein is identified. 1969–Initial work begins into flavor and texture of mycoprotein. 1975–Pilot development production facility is set up and full testing programmes established.

1985–Mycoprotein is approved by the UK’s Ministry of Agriculture, Fisheries and Food (MAFF) as being suitable for food use. Marlow Foods is established. The Quorn brand name is launched. The first even mycoprotein retail product—a savory vegetable pie—is launched.

1990–First Quorn branded home cooking product launched: Quorn pieces. 2002–U.S. approval established; sales launch in U.S. 2003–Montague Private Equity purchases Marlow Foods Ltd. 2005–Premier Foods ([www.premierfoods.co.uk](http://www.premierfoods.co.uk)) purchases Marlow Foods Ltd. Address: United Kingdom.

3503. Soy Happy! 2005. Re: Veggie dogs a win-win in 2005 World Series. Letter (e-mail) to Soy Happy list. Nov. 11. 1 p.  
 • **Summary:** “The 2005 Major League Baseball World Series was held between the Houston Astros and the Chicago White Sox. This means that fans attending every game were able to purchase veggie dogs!

“The Houston Astros’ Minute Maid Field consulted with Soy Happy and began serving vegetarian hot dogs two years ago. The World Champion Chicago White Sox’ US Cellular Field (formerly Comiskey Park) was the first MLB stadium to respond to Soy Happy. They added soy hot dogs and veggie burgers to their menu boards in 2000. And this just in from the White Sox. In the 2005 season, they sold 2,864 Veggie dogs and 4,781 Gardenburgers.” Address: California.

3504. Santoso, Sinta; Santoso, Sugeng. 2005. History of Primasoy [Tempeh maker in Australia]. Victoria, Australia. 1 p. Dec. 13.

• **Summary:** Both Sinta (a woman) and Sugeng (her husband) were born and raised in Malang, East Java, Indonesia. They grew up in Indonesia, where they enjoyed “Tempe Malang” as a staple food, eaten with meals at least once or twice a week. Sugeng writes: “I could remember as a child I was taken by my father, who spoke fluent English, to accompany an American to visit the tempeh village near Malang to see the tempeh production. This must have been in the sixties. I wonder if it was you.”

Sinta graduated as a food chemist from Braunschweig University, Germany, and Sugeng as a process engineer from Cologne, Germany. They migrated to Australia in 1982, and were married there in 1983. They initially opened an Indonesian restaurant in Melbourne, where Sugeng met Michael Manser, the first tempeh maker in Melbourne as far as he knows. Michael has since retired; he never went to Indonesia but made excellent tempeh. After the restaurant, they worked for large companies in their professional fields. Sugeng worked for a big supermarket as a quality officer; he realized that he was not destined to work in the corporate world and began researching the tempeh industry in Australia. He came to the conclusion, after Michael retired, that there was no good quality tempeh on the market; he believes that vacuum packing and the addition of vinegar makes the tempeh brown, chewy, watery, and bitter. “This has damaged the image of tempeh in Australia, and therefore tempeh is not very popular here now. I would really like to do some more research to extend the shelf life of tempeh so I can distribute my product interstate within Australia without using vacuum packaging.” They spent months perfecting the method of making Tempe Malang in order to produce a high quality, sellable product.

“There are several tempeh manufacturers in Australia at the moment. The last of these, Nutrisoy, is owned by an Indonesian born operator. Then there are smaller operators

such as Tally Ho, and Simply Soy and Blue Lotus in Melbourne. There may be more smaller manufacturers in other states which I am not aware of.”

2004 July—They rent a small suburban store, close to their home at 2 Dunoon Court, Mulgrave, Victoria; they convert it into a tempeh manufacturing kitchen. The tempeh is made solely by Sinta and Sugeng.

2005 Feb.—Primasoy has its first public debut at *The Age* ‘Harvest Picnic at Hanging Rock,’ a food festival designed to promote locally made food and beverages. About 30,000 visitors circle the various food stands. Their tempeh was very well received by the public as a new and exciting product.

2005 March—Following the Harvest Picnic success, Primasoy begins promoting their product in selected organic food shops around Melbourne.

2006 Dec.—Sinta and Sugeng are still making tempeh commercially at Primasoy. “Things are very good. We are still experimenting with the MAP vacuum packaging. MAP stands for Modified Atmosphere Packaging. Depending on the product, the atmosphere in the packaging is either nitrogen, carbon dioxide, oxygen, or a mixture of these gases in various ratios. Our experiments show that a mixture of oxygen and nitrogen looks promising. Currently we found pasteurization and light vacuum might be the way to go, but we have not yet validated it. We have been busy doing cooking demos lately and have not been concentrating on shelf life extension.” They are now writing a book about tempeh. And they will have two new tempeh products early next year: (1) Tempeh with tamari, ginger and sesame oil. (2) Tempeh with roasted garlic and coriander. “Next project will be okara tempeh (*tempe gembus*) and tempeh burger. I have a leaflet with recipes and I will send it to you.”

They have lost touch with Mike Manser; last they heard he was planning to move to Tasmania. Address: 2 Dunoon Court, Mulgrave 3170, Victoria, Australia.

3505. Nutrition House Co. Ltd. 2005. Nutrition House Co. (Website printout—part). www.nutritionhouse.co.th Printed Dec. 23.

• **Summary:** Contents: Home page: Restaurants. SPA Foods. Ready meals. J.V. About us. Health. Message from founder.

About us: “Nutrition House Co. Ltd. is committed to the manufacture of healthy meat free alternatives for the ever-growing health conscious segment of the market. Originally commencing business in 1991 with a restaurant (The Vegetarian Cottage), Nutrition House’s operation has extended to a total of 5 meat free restaurants and a factory, which produces and distributes its products both nationally and internationally. Two restaurants are situated on industrial parks, offering the employees subsidized meat free meals. The remaining 3 restaurants, located around Bangkok... offer a wide variety of Thai and European meat free dishes. Our founder, Teeranard Chokwatana, is dedicated to researching a healthy alternative to meat for ethical and health reasons.”

A huge sidebar down the left side of this page states: “We are SOY” in large white letters on a black background. Address: Bangkok, Thailand.

3506. *SoyaScan Notes*. 2005. Chronology of major soy-related events and trends during 2005 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan.–Monsanto acquires Seminis for \$1.4 billion. This gives Monsanto a commanding position in the fast-growing and very profitable vegetable seed market—a segment in which Monsanto previously had no presence. Jan.—*EarthSave News* stops being printed on paper and migrates to the Internet.

Feb. *The Whole Soy Story: The Dark Side of America's Favorite Health Food*, by Kaayla T. Daniel published by New Trends Publishing Inc. (Washington, DC). This is the first entirely anti-soy book.

March 14—Steve Demos, founder of White Wave, Inc., is terminated without cause (forced out) by Dean Foods.

July 7—Galaxy Nutritional Foods announces it will sell its manufacturing assets to Schreiber Foods, Inc. of Green Bay, Wisconsin, a major manufacturer of cheese products. Galaxy has recently suffered large financial losses.

July—Israeli Ministry of Health announces plans to recommend that young children limit soy products to one a day and advised that infants avoid them altogether. The French government recently advised that soy products not be given to children younger than age 3.

Oct. 17—Gardenburger Inc., the company credited with taking veggie burgers into the mainstream, files for Chapter 11 bankruptcy. The company will stay in business but become privately held; the name of the new owner is not yet known. The value of all Gardenburger shares is now zero.

Nov.—Yamasa Corporation purchases San Jirushi Corp. (Kuwana, Japan). San-J plans to build a new tamari plant next to their original plant (which has reached full capacity) in Richmond, Virginia.

During 2004-05 world production of palm oil reached 33.88 million metric tons to pass soybean oil (32.31) for the first time in history and to become the world's leading vegetable oil. Projections show this lead continuing to grow during the next two years (Source: *2007 Soya & Oilseed Bluebook*, p. 348).

3507. Richmond, Akasha. 2005. Hollywood dish: More than 150 delicious, healthy recipes from Hollywood's Chef to the Stars. New York, NY: Avery—A member of the Penguin Group (USA) Inc. xi + 310 p. Illust. Index. 25 x 20 cm. [125 ref]

• **Summary:** One of the most original and interesting cookbooks seen in decades. This book, originally titled *Healthy Hollywood*, is much more than just a collection of superb recipes and stories about Hollywood celebrities and glitterati. In carefully researched and well-written sidebars,

it documents the history of health foods in Hollywood and southern California. The introduction to each chapter tells the history of that type of food, and every recipe has a long and interesting historical headnote. The acknowledgments show vividly Chef Akasha's high and wide circle of Hollywood friends. The introduction—“The Road to Hollywood” tells the story of how Akasha got interested in and researched this subject. History is woven into every page of this book—in the most palatable way. In short, this is a cookbook with a remarkable tale to tell—one to read and study—as well as one to cook from.

Sidebars and illustrations: (1) “The stars and the Hollywood Diet”—Sue Carol (lovely future wife of Alan Ladd) on the cover of *Motion Picture* magazine, Oct. 1929. (2) Mildred Lager (1908-1960). (3) Harry Chandler (1864-1944). (4) Granola (Layton Gentry, Adelle Davis, Dorothea Van Gundy Jones). (5) Photo of silent film star Anita King eating Sun Maid Raisin Pie, 1916. (6) Adelle Davis (1904-1974). (7) Clarke Irvine, 1892-1975. (8) Photo of Radiant Radish health food store, owned by Beach Boy Brian Wilson, Los Angeles, 1969. (9) Otto Carque, 1867-1935, with a photo of his health wagon, around 1912. (10) Gayelord Hauser (1895-1984). (11) “Nature Boy”—Bill Pester and the 1948 hit song by Eden Ahbez. (12) The Ashram—Hollywood restaurant founded by Anne-Marie Bennstrom. (13) The Hollywood diet, with a photo of page 1 of the “18-Day Diet” from *Motion Picture* magazine, Oct. 1929. The sidebar begins: “The first best-selling diet book in America, *Diet and Health, with a Key to the Calories*, was written by Los Angeles-based Dr. Lulu Hunt Peters in 1918, and sold over 2 million copies. The book introduced the concept of counting calories.” (14) Alan Hooker (1902-1993). The grandfather of California cuisine, he opened the Ranch House restaurant in 1956 in Ojai, California. (15) Gloria Swanson—Hollywood's Green Goddess. She “was the highest paid and most popular, influential star of the 1920s.” (16) Jim Baker (1922-1975). A pioneering organic restaurateur, he Opened the Aware Inn in 1957, then the Source restaurant in 1969. (17) Raw, raw, raw (Arnold Ehret, Vera and John Richter, and raw foods). (18) Photo of silent film star Mary Pickford drinking orange juice made with Sunkist fruit and juicer. (19) The godfather of fitness—Jack LaLanne. Master chef Danny Kaye (1913-1987). (20) The Farmer's Market in Los Angeles, started in 1934. (21) Paul Bragg (1881-1976), with photo of Rita Hayworth on the cover of his *Health Builder* magazine. (22) Books and cooks—“150 Recipes of the Stars (1928), Helen Evans Brown. (23) Health foods—Dr. John Harvey Kellogg, the rise of health food sections in the late 1800s in L.A. department stores, the rise of health food stores, Sandy Gooch. (24) Mae West (1893-1980). Gypsy Boots (1914-2004). Photo of Boots and Paul Bragg. (25) Food and film. (25) Photo of Donna Reed and Paul Bragg, sometime in the 1950s. (26) Bernarr Macfadden (1868-1955). (27) Celebrity stew and Leo Pearlstein. (28) Vegetables, fruits, and nuts

(incl. Frieda Caplan, Albert's Organics). (28) Rancho La Puerta and the Golden Door. Photo of young Burt Lancaster baking bread at La Puerta. (29) Fred Waring (1900-1984), the blender, and smoothies. (30) Hain Pure Foods. "Harold Hain opened his first health food store in downtown Los Angeles on October 17, 1926." (31) Swamis and yogis. Paramahansa Yogananda arrived in L.A. in 1925; he advocated a healthy vegetarian diet, including in his magazine *East West*, first issued in 1926. On 8 April 1951 he opened SRF India Café at his India House compound on Sunset Boulevard. "Yogi Bhajan (1930-2004) came to Los Angeles in 1969, bringing the teachings of Kundalini Yoga and his own unique style of Indian and Ayurvedic cooking. In 1974 his students opened Golden Temple Conscious Cookery in Los Angeles. I [Akasha] was a cook there from 1979 to 1984..."

Soyfoods are used in recipes (and recipe titles) throughout this book: Edamame or fresh green soybeans (used in 2 recipes), miso (1 recipe), soymilk (many, especially in place of milk in desserts, incl. "Chocolate Jack Daniel's soy gelato" and "Soya chocolate" milk), soy flour (1, Bill Baker's bread), soybeans (whole, 1, "Soybean casserole"), tofu (10), and tempeh (4).

Also discusses: Sophie and Harry Cubbison (p. 47), El Molino Mills (p. 106). Early veggie burgers (p. 106). Silk soymilk and Steve Demos (of White Wave, p. 266).

The recipes in this book are largely vegetarian (including 17 vegetarian main dishes), all call for organically grown ingredients, and many are dairy-free (using soymilk instead of cow's milk). However: Beef (used in 2 recipes, incl. "Fillet mignon Japanese"). Pork (used in 1 recipe, "Citrus roasted pork chops with rosemary potatoes"). Chicken (used in 6 recipes, incl. "Endive petals with curried chicken salad"). Turkey and duck (3 recipes). Fish (many recipes as for cod, halibut, salmon, whitefish). Shellfish (crab, scallops, shrimp).

Talk with Akasha Richmond, who calls. 2005. Dec. 7. Her favorite parts of the book are: The smoothie story (p. 275-80, both dairy and nondairy). Otto Carque. Gloria Swanson. Yogis and Swamis, Granola. She is very happy with everything about the way the book and its promotion turned out ("It looks great")—except she wishes she could have included more photos. Address: Los Angeles, California.

3508. **Product Name:** MorningStar Farms Meal Starters: Chik'n Strips, Veggie Steak Strips, Steak Strips Natural, Chik'n Strips Natural.

**Manufacturer's Name:** Kellogg Co. (Marketer-Distributor).

**Manufacturer's Address:** Battle Creek, Michigan.

**Date of Introduction:** 2005.

**Ingredients:** Chick'n Strips: Veggie Chik'n (Water, soy protein isolate, wheat gluten, natural flavor, autolyzed yeast extract, evaporated cane juice, salt, color added, pea protein,

carrot fiber, vitamin B-1 {thiamin hydrochloride}, vitamin B-2 {riboflavin}, niacinamide, vitamin B-6 {pyridoxine hydrochloride}, vitamin B-12, calcium pantothenate, iron {ferric orthophosphate}, zinc oxide, magnesium oxide, dipotassium phosphate), seasoning (dehydrated garlic and onion, salt, maltodextrin, black pepper, dehydrated green and red bell pepper, evaporated cane juice, natural flavor), expeller pressed canola oil.

**Wt/Vol., Packaging, Price:** 8 oz (227 gm) plastic bag.

**How Stored:** Frozen.

**New Product–Documentation:** Packages (with Labels) sent by Yves Potvin of GPI. 2008. Oct. 28. Products seen on www.gardein.com at Products (30 Oct. 2008). Chik'n Strips: Gusseted plastic bag. 7½ inches square. Dark green, white, yellow and black on green. A large color photo on the front panel shows Chik'n Strips on a bed of lettuce. On the lower back panel is the early logo of Garden Protein International Inc. "Made with Gardein. The all-vegetable grown protein. Gardein is a registered trademark of Garden Protein International, Inc." "100% Vegan." On the back panel are Nutrition Facts, ingredients list and recipe ideas.

Note: Two packages designed at a later date have the word "Vegan!" in large letters in the upper left corner of the front panel. The "Gardein" logo, text, and location on the rear panel is unchanged.

3509. **Product Name:** Morningstar Farms Grillers (Meatless Hamburger Patties) [Prime, or Original].

**Manufacturer's Name:** Kellogg Sales Co. (Marketer-Distributor).

**Manufacturer's Address:** Battle Creek, MI 49016.

**Date of Introduction:** 2005.

**Ingredients:** Prime: Textured vegetable protein (wheat gluten, soy protein concentrate, concentrate, soy protein isolate, water for hydration), corn oil, sunflower oil, egg whites. Contains 2% or less of cornstarch, natural flavors from non-meat sources, soy protein isolate, autolyzed yeast extract, salt caramel color,...

**Wt/Vol., Packaging, Price:** 10 oz (284 gm). Four patties in paperboard box. Retail for \$4.59.

**How Stored:** Frozen.

**New Product–Documentation:** Products (two) with Labels purchased at Safeway supermarket in Lafayette, California. 2006. July 31. Prime: 8 by 4 by 1¼ inch box. Green, red, black and yellow on white. Color photo of a patty with veggies between two buns. Soyfoods Center taste test. Poor. Has the aroma of warm, moist dog food. Tough, not tender or juicy or tasty.

3510. Moriyama, Naomi; Doyle, William. 2005. Japanese women don't get old or fat: Secrets of my mother's Tokyo kitchen. New York, NY: Delacorte Press. 274 p. Illust. Index. 22 cm. [50+ ref]

• **Summary:** From the publisher's description: "Japanese-

born Moriyama reveals the key to the enduring health and beauty of Japanese women. The Japanese eat one of the most delicious, nutritious, and naturally satisfying cuisines in the world without denial, without guilt, and, yes, without getting fat or looking old. If you think you've eaten Japanese food, you haven't tasted anything yet. Japanese home-style cooking isn't just about sushi and raw fish but good, old-fashioned everyday-Japanese-mom's cooking that's stood the test of time—and waistlines—for decades. Reflected in this are the age-old traditional values of family and the abiding Japanese love of simplicity, nature, and good health. It's the food that millions of Japanese women eat every day to stay healthy, slim, and youthful. Even better, it's fast and easy. If you're tired of counting calories, counting carbs, and counting on diets that don't work and don't satisfy, it's time to discover this."

Traditional Japanese soyfoods are mentioned throughout this book, always in a very positive way and in recipes. Japanese generally eat soyfoods in their more natural and less processed forms such as tofu, miso, natto, and edamame—and rarely in the forms of soy supplements, soy shakes, soy burgers, soy energy bars, etc. that are so popular in the West.

Chapter 5, "The seven pillars of Japanese home cooking," states (p. 122) that they are: "fish, vegetables, rice, soy, noodles, tea and fruit." Soy, "The fourth pillar," is discussed very nicely on pages 181+.

Here is the number of pages on which various foods are mentioned: Tofu 56 (incl. silken tofu {kinugoshi}, cotton tofu {momen, regular}, atsu-age {deep-fried tofu cutlets}, usu-age {deep-fried tofu pouches}, yakidofu or broiled tofu). Miso 50 (incl. p. 91-92, 99-100). Soy sauce 50. Edamame 12. Shoyu 3 (p. 75, 114, 121). Natto 2 (p. 184, 188). Okara 1 (p. 184). Yuba 1 (p. 184). Also many reference to sea vegetables (hijiki, kombu, nori). A photo on the inside rear dust jacket shows the authors; she was born in Tokyo, and he is an American who has written or cowritten five books.

Note: The paperback edition of this book (only) mentions "The Japanese Skincare Revolution: How to Have the Most Beautiful Skin" in connection with tofu. Address: Wife and husband live in New York City.

3511. Soyfoods Association of North America. 2006. Soyfoods sales and trends (Website printout—all). [www.soyfoods.org/press/FAQ\\_sales.htm](http://www.soyfoods.org/press/FAQ_sales.htm) 2 p. Printed Jan. 19.  
 • **Summary:** Contents: What are the recent trends in soy consumption in the U.S.? Soy sales by category: Introduction, soy-based energy bars, soymilk sales, meat alternative sales, tofu sales, other soyfoods sales. 2003 Consumer Trends Report. Sources.

"The number of new soy-based products has increased 13.2% per year for the past 3 years. In 2000, approximately 2,295 soy-based SKU's were offered; by 2002 the number hit 3,399. In 2002 there were: 580 soy-based energy bars,

with 24.1% of sales [i.e. accounting for 24.1% of sales of soyfoods from all categories]. 366 soy-based meal replacements & powders with 18.5% of sales. 328 soymilk beverages with 16.3% of sales. 318 meat alternatives with 14.5% of sales. 236 tofu products with 6.8% of sales. [Other: 19.8% of total sales].

Soy-based energy bars: Sales reached \$880 million in 2002.

"Soymilk sales have grown from \$100 million in 1995 to nearly \$600 million in 2002. Soymilk has 87.3% of the nondairy beverage sales in mainstream markets. Sales of refrigerated soymilk grew over 100% per year for the past three years.

"Meat alternative sales have grown from \$114 million in 1992 to over \$530 million in 2002.

"Tofu sales have grown from 108 million in 1992 to \$250 million in 2002.

Other soyfoods sales: Soy [fortified] breakfast cereals grew to over \$150 million in 2001. Soy yogurt sales grew by 66.9% in 2001 to reach \$23.7 million. Soy-based cheese alternatives grew at 11.6% in 2001 to reach \$57.6 million. Sales of soy-based frozen desserts rose 39.9% in 2001 to reach \$42.2 million. Address: 1001 Connecticut Ave., NW, Suite 1120, Washington, DC 20036. Phone: 202-659-3520.

3512. Global Industry Analysts, Inc. (GIA). 2006. Soy foods—Global strategic business report. 5645 Silver Creek Valley Rd., San Jose, California. 302 p. Jan. \*

• **Summary:** Publisher description: This report analyzes the worldwide markets for Soy Foods in millions of US\$. The specific product segments analyzed are Soy Ingredients, and Soy Oil. The report provides separate comprehensive analytics for the US, Canada, Japan, Europe, Asia-Pacific (excluding Japan), Latin America, and Rest of World. Annual forecasts are provided for each region for the period of 2000 through 2010. The report profiles 151 companies including many key and niche players worldwide such as Archer Daniels Midland Company, Dean Foods Company, White Wave, Eden Foods, Inc., Galaxy Nutritional Foods, Inc., Gardenburger, General Mills, Glenn Foods, Greet Spot (Thailand), Griffith Laboratories (UK), H.J. Heinz Co. Hain Celestial Group, Hartz International (Australia), Hazlewood Grocery (UK), Heartland Fields (USA), Hermans Foods (Australia), High Mark Foods (New Zealand), Imagine Foods, Inc., Kerry Group PLC (Ireland), Kerry Ingredients (Australia), Kikkoman (Japan, Australia, USA, Singapore), Kimlan Foods Co. (Taiwan), Kuhne Nederland BV (Netherlands), SoyaWorld, Inc., Turtle Island Foods, Inc., and Vitasoy USA, Inc.

Price: Electronic or hard copy 3,496 euros. Please note: Reports are sold as single-site single-user licenses. The delivery time for hard copies is between 3-5 business days, as each hard copy is custom printed for the organization ordering it. Electronic versions require 24-48 hours as each

copy is customized to the client with digital controls and custom watermarks. Address: San Jose, California. Phone: 408-528-9966.

3513. Gandhi, A.P. 2006. The 'greater bean': Scientists continue to find new food and industrial uses for soybeans. *World Grain* 24(2):59-62. Feb.

• **Summary:** About 70% of world soybean production is crushed to make oil and meal, 20% is used directly for food, and the rest for seeds. Soybean meal used for human food "must be devoid of residual solvents that may cause various psychological disorders in humans. The International Standard Organization (ISO) recommends a maximum level of 50 parts per million (ppm) of residual hexane, which is used in the solvent extraction process."

A pie chart shows world soybean production in 2004.

3514. Turtle Island Foods. 2006. Turtle Island (Website printout-part). www.tofurky.com 5 p. Printed March 22 and May 29.

• **Summary:** Home: Products: Deli Slices, Sausages, Tofurky Franks, SuperBurgers, Tempeh, Tofurky Jurky, Tofurky holiday products. Food service products. Purchasing. Recipes. About us: Contact us, Where is Turtle Island, Company background, GMO's & organics, A "curd" of a different feather. Fun stuff: Travels with Tofurky. Essay contest winners, Classic Tofurky TV, Award winning Tofurky, Tofurky in the wild, Tofurky family album.

Company background: "Turtle Island Foods was founded in 1980 by Seth Tibbott in Forest Grove, Oregon. Seth had been making Tempeh for family and friends for 3 years out of an incubator made from an old refrigerator heated by a string of Christmas tree lights. He felt there was a future in American for this product and decided to quit his career as a teacher-naturalist and began working nights at the Hope Coop in Forest Grove.

"Seth made hundred pound batches of Tempeh in 3 flavors: Soy, Five Grain and Tempehroni (a spiced log which we no longer make).

"In 1982 the company expanded with the help of loans from Bob and Betty Tibbott, Seth's brother and mother, and moved to an abandoned schoolhouse with a beautiful commercial kitchen in Husum, Washington, 75 miles east of Portland, Oregon.

"Working days now, the company expanded and became the 3rd largest Tempeh manufacturer in the United States which began to stress among other things the water supply of the tiny (population 50) town of Husum.

"In 1992, Turtle Island moved across the Columbia River to Hood, Oregon, where it renovated an old cannery building where it is housed today. The 8,000 square feet of manufacturing space overlooks the Columbia...

"In 1995, the company introduced the Tofurky Vegetarian Feast... The response was overwhelming..."

Photos show: (1) Seth in about 1980 with his first Tempeh incubator in Forest Grove, Oregon. (2) Seth in the mid-1980s inside a tempeh incubator in Husum, Washington. (3) Two young men making tempeh in Indonesia. (4) Seth with his mother and brother before her death in Aug. 2002. Address: P.O. Box 176, Hood River, Oregon 97031.

3515. Green, Carolyn. 2006. Top ten: Welcome to the garden—Garden Protein International, Richmond, BC. *Food in Canada*. May. p. 39.

• **Summary:** Garden Protein International makes meatless chicken and beef from identity preserved (IP), non-GMO soy protein and wheat protein [gluten], plus various other ingredients such as carrot fiber, minerals and vitamins. In its first year, ending March 31, the company had sales of \$10 million.

By contrast, Yves Fine Foods, which he started in 1985, had sales of \$235,000 its first year. When Potvin began considering the next generation of meat alternatives in the early 1990s, he used the example of surimi, a Japanese crab-like product made from pollock fish. The result was Gardein, which is made like pasta (sort of) by a unique process of extrusion technology.

By 2003, Potvin began demonstrating Gardein to other food Manufacturers. One of his first customers was Morningstar Farms, a division of the Kellogg Co., Battle Creek, Michigan. Gardein will also be a major ingredient in Loblaw's President's Choice Blue Menu products this fall.

In 2001, when Yves sold Yves Veggie Cuisine to the Hain Celestial Group, he signed an agreement that contained a "non-compete clause" (covenant not to compete—CNC), which prevented Potvin from putting Gardein in the market as a stand-alone product until the fall of 2006. At that time he hopes to have four Garden Protein products in grocery stores: chicken or beef strips can be used in recipes such as stir fries or fajitas, and a chicken or beef dish in a sauce. The price is expected to be about \$3.99 for 250 gm.

A photo shows Yves Potvin, a native of Sherbrooke, Quebec, Canada (the only major city in the Eastern Townships) standing and looking happy.

Note: Yves was born in Waterloo, Quebec, then moved with his family to Sherbrooke, Quebec, when he was a teenager.

3516. **Product Name:** Tofu Jerky.

**Manufacturer's Name:** Hodo Soy Beanery.

**Manufacturer's Address:** 1600 S. De Anza Blvd., San Jose, CA 95106. Phone: 408-517-8958.

**Date of Introduction:** 2006 May.

**Ingredients:** Soybeans, filtered water, soybean oil, soy sauce, sugar, Chinese five-spice powder (fennel, clove, cinnamon, anise, peppercorn), calcium sulfate.

**Wt/Vol., Packaging, Price:** -

**How Stored:** Refrigerated.

**New Product–Documentation:** Labels by brought to Soyinfo Center by Minh Tsai on 2009. Sept. 16.

3517. Vandemoortele Group 2006. Vandemoortele Group takes over SoFine Foods (News release). Ghent, Belgium. 2 p. June 23.

• **Summary:** “The boards of Vandemoortele and Heuschen & Schrouff Foods Group confirm the takeover of SoFine Foods, a subsidiary of Heuschen & Schrouff, by Vandemoortele. SoFine Foods is a leading manufacturer of tofu, a soy-based alternative to meat products.

“Via its Alpro soya division, Vandemoortele is the European market leader in the segment of 100% natural soy products. The Heuschen & Schrouff Foods Group is through its subsidiary, Heuschen & Schrouff Oriental Foods Trading, one of the most important players in Europe in the field of import & export of authentic Asian products.” Bernard Deryckere is Managing Director of Alpro. Frits Schrouff is General Director of Heuschen & Schrouff Foods Group.

“SoFine, situated in Landgraaf [Netherlands], has more than 70 employees. Set up in 1963, this organisation was the first in Europe to produce tofu on an industrial scale. Through the ensuing years SoFine Foods has grown to become a leading player in the field of tofu products. Tofu is a 100% vegetable alternative for meat products on the basis of soy and has been part of the usual diet of people in China and Japan for centuries. SoFine Foods is active, with an extensive range of tofu products (Tofu strips, Tofu mince, Tofu Balls, Tofu Burgers), in various European countries, with the focus on Belgium, the Netherlands, France and Germany. Alongside its main brand name, SoFine also owns the brand De Morgenstond, which is mainly distributed in organic food shops in Belgium and the Netherlands.

“About Heuschen & Schrouff Foods Group: The Dutch company Heuschen & Schrouff has specialised for the last 45 years in the import & export of authentic Asian products. More than 2000 articles are imported directly from countries such as Thailand, the Philippines, Singapore, Malaysia, Vietnam, Japan, China, etc. The family-run company has its own bean sprout nursery and until recently a tofu factory. The company markets its assortment in some 10 European countries. With 225 employees the group turnover is in the region of 55 million euro. SoFine realises a turnover of 8.2 million euro.”

Note: Ghent, located in the Flemish region of Belgium, is the country’s 2nd largest municipality by number of inhabitants.

3518. Loma Linda Wholesome Foods. 2006. Meatless never tasted so good! Vibrant Life (Ad). *Vibrant Life* (Hagerstown, Maryland). Special issue on Taming Stress. p. 26. Undated.

• **Summary:** See next page. A full-page color ad. “Loma Linda University has joined *Vibrant Life* magazine (a Review and Herald Publication) in the development of a vegetarian

product line under the brand name Vibrant Life...”

“Vibrant Life products are sold exclusively in Adventist Book and Nutrition Centers, college markets and selected web sites.” Photos show: (1) Five plates of prepared dishes. (2) The various products in the Vibrant Life line. Canned products (19 or 48 oz.) include: 7-Grain Cutlets, Vege Steak, Super Franks, Vegeburger, Vege-Franks, Vegelets, and Vege-Cuts.

3519. United Soybean Board (USB). 2006. Consumer attitudes about nutrition: Insights into nutrition, health, and soyfoods. 13th annual national report. Seattle, Washington. 8 p. Oct. 28 cm.

• **Summary:** The methodology used in this survey changed significantly in 2006. Previously, random telephone interviews were completed with 1,000 consumers. This year an online self-administered survey was used. “Conducted by an independent research firm [in Seattle, Washington] in February and March 2006, the study includes 1,000 random surveys, providing a sample that is consistent with the total American population. The study’s margin of error remains  $\pm$  1.9 to 3.1%, with a confidence interval of 95 percent.”

Contents: Introduction. Methodology. About USB. Nutritional habits and obesity concerns. Healthy food decisions. Cooking oil impressions. Consumer attitudes about fats. Awareness and usage of soy products. Occasion preferences for consuming soy. Restaurants and soy products. Soyfoods in health.

Awareness and usage: 30% of Americans consume soyfoods or soy beverages once a month or more. A table shows the “Top 20 soy products by awareness.” Soymilk 87%. Soybean oil 61%. Soy veggie burger 60%. Plain white tofu 59%. Soy infant formula 44%. Soy nuts 43%. Soy latte 35% (Soymilk in espresso coffee drinks [as at Starbucks]). Soy protein bars 32%. Soy hot dogs 30%. Soy yogurt 29%. Dried or canned soybeans 29%. Soy flour 28%. Soy ice cream / cheese 28%. Cereal bar / Energy bar 28%. Flavored / Marinated tofu 26%. Miso 24%. Soy supplements 23%. Soy breakfast cereal 23%. Textured soy protein. Edamame 17%. All others mentioned 12% or less.

Occasion preferences for consuming soy (in descending order of preference): dinner 40%, breakfast 29%, lunch 22%, mid-morning snack 16%, mid-afternoon snack 16%, etc.

Soy products ordered in restaurants: Soy veggie burger 29%. Tofu 29%. Soymilk 28%. Miso 14%. Edamame 8%.

# Meatless Never Tasted So Good!

Faithful to its mission, *to serve a worldwide community by promoting healthful living*, Loma Linda University has joined Vibrant Life magazine (a Review and Herald publication) in the development of a vegetarian product line under the brand name **Vibrant Life®** that meets the highest standards for health and nutrition.

Made with the finest in wholesome and nutritious ingredients **Vibrant Life®** offers great tasting, *low carb* and *low fat* products.

**Vibrant Life®** products are sold exclusively in Adventist Book and Nutrition Centers, college markets and selected web sites.

## Vibrant Life®

Marketed by Loma Linda Wholesome Foods  
Loma Linda CA 92350 • Phone: 888-893-2002 • [www.vibrantlife.info](http://www.vibrantlife.info)

Tofu (prepared) 6%, etc.

“In 2006, 82% of consumers rate soy products as healthy, significantly more than in previous years” (78% in 2005, 74% in 2004, 67% in 1998). Why? Low-fat profile 20%. Protein content 15%. Heart health 15%. Cholesterol-lowering properties 12%. “Being good for you” 10%. “A lactose-free option 10%.”

Note: As of Aug. 2008 this full survey is available gratis in PDF format at [www.soyconnection.com/health\\_nutrition/pdf/](http://www.soyconnection.com/health_nutrition/pdf/).

**3520. **3522. Turtle Island Foods.** 2006. The one millionth Tofurky (Leaflet). Hood River, Oregon. 1 p. Front and back. Sept.

• **Summary:** “This year, Turtle Island Foods expects to hit a huge milestone with the sale of the one millionth Tofurky Roast. From its humble beginnings in 1995 when the first 500 Tofurkys were sold, the Tofurky name has become synonymous with vegetarian Thanksgiving...”

To commemorate this event, Turtle Island Foods is offering a cool electric Evader 1000 motor scooter to the person who comes closest to guessing what the total number of roasts sold in company history will be on January 1, 2007. This all electric scooter noiselessly glides along at 30 miles per hour with a range of 40 miles... Color photos show: (1) The scooter. (2) Tofurky Vegetarian Feast. (3) Tofurky Roast (Frozen). (4) Tofurky Roast (Refrigerated). (5) Tofurky Mushroom & Giblet Gravy. (6) Wild Rice & Mushroom Stuffing. (7) Tofurky Roast & Gravy (Refrigerated). Plus the Tofurky logo and the Turtle Island Foods, Inc. logo.

“By investing in wind power we have reduced carbon dioxide emissions by 252 tons per year. That reduction is

equivalent to the greenhouse gases released during 540,000 miles of driving or absorbed by 47 acres of trees.”

On the rear is a large color photo of many young people (at Toni Deale’s 8th grade Math Class in Spotsylvania, Virginia) gathered around a Tofurky Roast box plus many other color photos on a red background. Address: P.O. Box 176, Hood River, Oregon 97031.

3523. Viana. Made in Germany by Tofutown.com. 2006. Voluptuous veggie delights! Discover six unique meat alternatives from Europe’s premier tofu innovator (Sell sheet). Wiesbaum, Germany D-54578. 1 p. Front and back.  
**• Summary:** The following are “Now available in the U.S.” Import and distribution: Ceres Organics, 2121 30th St., Boulder, Colorado 80301. Tel. +1 866 542 1559. www.ceresorganic.com.” Viana Cowgirl Veggie Steaks (Holzfäller Hacksteaks), Viana Chicken Fillets, Viana Veggie Gyros, Viana Veggie Turkish Roast, Viana Veggie Cevapcici, Viana Veggie Kebab (Veggie Döner / Donner Kebab).

All are vegan with 0% lactose and 0% cholesterol. Heart healthy. Very low in saturated fatty acids. Savory and flavorful. Authentic texture in each variety. Ready in five minutes. Made with organic ingredients. High quality sources of protein. GMO free.

On the rear side of this sell sheet are nutrition facts and ingredients for each of the six products. Address: Wiesbaum, Germany.

3524. **Product Name:** Organic Pesto Sausage Patties, Curried Potato Patties, Original Breakfast Sausage (Replaces Tofu Sausage Patties, launched Aug. 1982).

**Manufacturer’s Name:** Tofu Shop Specialty Foods Inc.

**Manufacturer’s Address:** 65 Frank Martin Court, Arcata, CA 95521. Phone: 707-822-7401.

**Date of Introduction:** 2006 November.

**Wt/Vol., Packaging, Price:** 6.5 oz (184 gm).

**How Stored:** Refrigerated.

**New Product–Documentation:** Labels sent by Matthew Schmit. 2009. March 18. 3 by 3 inches. Self adhesive. Multi-colored on white. A stylish water-color illustration shows a tofu shop on stilts by the edge of the sea. All three products are “Certified organic. Seasoned and baked. Perishable–Keep refrigerated.” (1) Pesto: “Dice into pasta or add to pizza!” (2) Curried: “Add to falafel, wrap, or toast.” (3) Original: “Delicious sausage alternative.”

3525. McKee, David. 2006. Focus on Israel: Surge in imported wheat from Black Sea region in recent years has made life complicated for Israeli bakers. *World Grain* 24(12):18, 20, 21–22. Dec.

**• Summary:** Imports of soybeans to Israel in recent years are as follows (in 1,000 tonnes = metric tons): 600 in 2000–01. 735 in 2001–02. 500 in 2002–03. 494 in 2003–04. 543 in 2004–05. 450 in 2005–06. And 600 in 2006–07 (estimate).

The oilseed crushing industry also depends on imports. Of the estimated 650,000 tonnes of soybeans to be imported in 2006, less than 25% of these will come from the USA, despite a 90% share as late as 2002. Imports of soybean meal, which come mainly from Argentina, have doubled to over 200,000 tonnes over the past few years. Israel has three soybean crushers: Solbar Industries, Shemen Industries, and Teth-Beth; their combined yearly crush is about 660,000 tonnes.

Solbar industries has focused heavily on producing value-added products such as soy proteins, soy isoflavones, and soy flour. Solbar now exports 90% of its soy food products and has global market share for about 5% certain soy food categories. Israel has proven to be a good place to develop these food products. “Over 50% of the population is said to regularly consume soy-based foods including meat substitutes and soy milk.” Address: Grain industry consultant; davidmckee59@msn.com.

3526. **Product Name:** Morningstar Farms Sausage Patties (Meatless Sausage).

**Manufacturer’s Name:** Worthington Foods, Inc. Div. Kellogg NA Co.

**Manufacturer’s Address:** 900 Proprietors Rd., Worthington, OH 43085.

**Date of Introduction:** 2006.

**Ingredients:** June 2007: Textured vegetable protein (wheat gluten, soy protein concentrate, soy protein isolate, water for hydration), egg whites, corn oil, sodium caseinate, modified tapioca starch, contains 2 percent of lactose, soybean oil, hydrolyzed vegetable protein... plus many vitamins and minerals.

**Wt/Vol., Packaging, Price:** 8 oz paperboard box. Retail for \$2.69 (2007/06, Lafayette, California).

**How Stored:** Frozen.

**New Product–Documentation:** Product with Label purchased at Trader Joe’s (Lafayette, California). 2007. June 10. 7.5 by 4.5 by 2 inches high. Paperboard box. Brown, light green, green, blue, red and yellow. Design innovation. The design and text on the front panel are horizontal, but on the back panel are vertical, to provide two different facings. A color photo on each panel shows three deep-fried patties on a white plate with trimmings. “75% less fat than pork sausage patties. Savory, sizzling veggie patties seasoned with herbs and spices. Visit us at www.morningstarfarms.com for easy recipes, fun food ideas and more!”

3527. Jones, Ellis. 2006. The better world shopping guide: every dollar makes a difference. Gabriola Island, B.C., Canada: New Society Publishers. vi + 169 p. Portrait. Product Category Index. 16 cm. [26 ref]

**• Summary:** This is a book about green and ethical products. The ratings are not about flavor or sales or market leadership; they are about company commitment to a green and ethical

world. The author has consulted many reliable sources (p. 7) for his ratings.

Soy related sections include: Dairy alternatives (p. 68-69): Corporate hero: Silk (White Wave). Corporate villain: Cool Whip (Altria). A+: Silk. A: Follow Your Heart, Stonyfield Farms, Nancy's, Wildwood. A-: WholeSoy, ZenSoy. B+: Tofu Rella, Vegan Rella, Almond Rella, Soya Kaas. C: Lisanatti, Tofutti, Soy Moon, Soyco, Galaxy Nutritional, Soymage, Veggie Slices, Rice Slices. C-: Borden. D: International Delight. D-: Carnation. F: Cool Whip.

Note: Cool Whip is a brand of imitation whipped cream named a whipped topping by its manufacturer. Cool Whip was introduced in 1967 by the Birds Eye division of General Foods. Within two years of introduction, it became the largest and most profitable product in the Birds Eye line of products. Birds Eye later merged with Kraft Foods and Philip Morris, eventually becoming part of Altria Group until the spin-off of Kraft Foods from Altria in 2012. Cool Whip was invented by William A. Mitchell, a food chemist at General Foods Corporation. The key advantage of the invention was that it was a whipped cream-like product that could be distributed in a frozen state by grocery chains and kept in the consumer's refrigerator.

Ice cream alternatives (p. 96-97): Corporate hero: Ben & Jerry's. Corporate villain: Haagen Dazs (Nestle). A: Stonyfield Farms, Ben & Jerry's, Soy Delicious, Straus Family. A-: Celestial Seasonings, WholeSoy, Rice Dream, Soy Dream, Natural Choice. B+: Double Rainbow, Julie's, Newman's Own. B: Starbucks. B-: Dole. C+: Weight Watchers, Godiva. C: Tofutti, Crystal, Fruitfull. C-: Breyers, Klondike. D+: Dove, Snickers. D-: Healthy Choice. F: Dreyer's, Nestle, Haagen Dazs.

Meat alternatives (p. 102-03): Corporate hero: White Wave. Corporate villain: Boca (Altria). A+: White Wave, Tofutown. A: Amy's, Wildwood. A-: Yves, Small Planet. B+: Turtle Island, Tofurkey [sic, Tofurky], SuperBurgers. B-: Morningstar Farms. C+: Pete's. C: Gardenburger, Veggie Patch, Veat, Soy Deli, Health is Wealth, Sweet Earth, Mori Nu, Nasoya, Vitasoy, Primal Strips. C-: Quorn. D: Lightlife. F: Boca.

Milk & alternatives (p. 108-09): Corporate hero: Silk (White Wave). Corporate hero: Straus family. A+: Silk, Straus Family, Edensoy. A: Horizon. A-: Organic Valley, Nancy's, Organic Pastures, WestSoy, Rice Dream, Soy Dream, Amazake, Helios. B+: Clover Stornetta, Pacific. B: Lactaid. B-: 8th Continent. C+: Alta Dena. C: Crystal, Vitasoy. D-: Nestle. F: Knudsen. Address: Sociology teacher, Univ. of California, Davis.

3528. Schwarz, Richard W. 2006. John Harvey Kellogg, M.D.: Pioneering health reformer. Hagerstown, Maryland: Review & Herald Publishing. 240 p. Illust. Index. 24 cm. \*  
**• Summary:** This is a new revised and updated edition of the original classic 1970 edition. Address: Andrews Univ.,

Berrien Springs, Michigan.

3529. Singer, Peter; Mason, Jim. 2006. The way we eat: Why our food choices matter. Emmaus, Pennsylvania: Rodale Press, Inc. viii + 328 p. Index. 24 cm. [396 endnotes + 37 refs]

**• Summary:** An outstanding book. Contents: Preface. Introduction: Food and ethics. Part I: Eating the standard American diet. 1. Jake and Lee. 2. The hidden cost of cheap chicken. 3. Behind the label: "Animal care certified" eggs. 4. Meat and milk factories. 5. Can bigger get better?

Part II: The conscientious omnivores. 6. Jim and Mary Ann. 7. Behind the label: Niman ranch bacon. 8. Behind the label: "Organic" and "Certified humane" eggs. 9. Seafood. 10. Eating locally. 11. Trade, Fair Trade, and workers' rights. 12. Eating out and eating in, ethically.

Part III: The vegans. 13. JoAnn and Joe. 14. Going organic. 15. Is it unethical to raise children vegan? [No, if they have a reliable source of vitamin B-12]. 16. Are vegans better for the environment? [Yes! A good critique of factory farms or CAFOs] 17. The ethics of eating meat. 18. What should we eat? Appendixes: Where to find ethical food. Where to find information. Acknowledgments. Endnotes.

Soybeans are mentioned on 10 pages in this book (p. vii, 142, 194, 228, 232, 233, 234, 237, 272, 323), tofu on 9 pages in this book (p. 189, 194, 195, 219, 234, 263, 272, 284, 323), soybean on 2 pages (p. 206, 318), soy ice cream on 1 page (p. 197). Soymage and Veganrella (vegan soy-based cheeses), and a "vegan parmesan cheese made with organic tofu" are mentioned on pages 194-95.

Ice cream (p. 195): At Wild Oats in Overland Park, Kansas, JoAnn (a vegan) opens a glass freezer door and says: "This is the most awesome non-dairy ice cream I've found... yet, anyway. It's organic Soy Delicious... mint marble fudge. There are some other alternatives to dairy ice cream that are pretty good too. We also tasted the Rice Dream bars... but they're really high in fat. So we've kind of shifted away from their stuff. The Soy Dream desserts are awesome. I've taken these chocolate ice cream sandwiches to Sarina's friends in gymnastics class and they love them. They're called Li'l Dreamers. They're organic."

She also likes White Wave firm tofu. Then she gestures toward "Smart Deli," vegetarian salami, turkey slices, and baloney made by Lightlife Foods.

More about ice cream on p. 85: "Here's Soy Delicious, a soy-based ice cream. We eat this because the kids like it. They don't always accept alternatives to dairy and meat. There's another one, Tofutti Cuties, that they like."

For a nice section on great vegan athletes (Scott Jurek, Carl Lewis), see p. 230.

"The proportion of the population living on farms in the U.S. has fallen from nearly 40% in 1900 to less than 2% today" (p. 142).

It takes about 13 pounds of grain and soybeans to

produce a pound of boneless beef, 6 pounds of grain and soybeans to produce a pound of boneless pork, and 3 pounds grain and soybeans to produce a pound of boneless chicken. "If we really want to feed ourselves efficiently, we'll do much better to eat the grain ourselves than to feed it to the chickens" [or other animals] (p. 232). Other environmental concerns about rearing animals are the clearing of forests [and consequent loss of biodiversity] and the amount of water used. By the best estimates, it takes 792,000 gallons of water to produce a 1,000 pound steer (p. 235). On the inside rear dust jacket are color portrait photos and brief biographies of Peter Singer and Jim Mason. Address: 1. Prof. of Bioethics, Center for Human Values, Princeton Univ., Princeton, New Jersey; 2. Exmore, Virginia.

3530. Strahm, Brad. 2006. Meat alternatives. In: Mian A. Riaz, ed. 2006. *Soy Applications in Food*. Boca Raton, Florida, London, New York: CRC Press (Taylor & Francis Group). [x] + 288 p. See p. 135-54. [8 ref]

• **Summary:** Contents: Introduction. Types of intermediate product: Chunk and minced products, structured meat analogs, spun protein isolates, fibrous protein products, high-moisture meat analogs. Principles of extrusion. Raw materials: Soy-based raw materials, wheat gluten, other protein sources, additives, sulfur, calcium. Textured vegetable protein production system: Feeder, preconditioner, extruder, die, post-extrusion processing, drying. Conclusion.

Tables: (1) Protein dispersibility indexes of soy flour. (2) Components of Defatted soy flour for extrusion texturization process. (3) Components of soy protein concentrate. (4) Characteristics of mechanically defatted flour.

Figures: (1) Process flow diagram for the production of extruded texturized vegetable proteins. (2) Extruder for manufacturing texturized vegetable proteins. (3) Effect of mechanical energy added during extrusion on the water absorption capacity of texturized vegetable protein. (4) Drying time for texturized soy flour chunks dried at 100°C. (5) Example drying curves for various types of texturized vegetable protein products. Address: The XIM Group LLC, Sabetha, Kansas.

3531. Chalmers, Elizabeth. 2007. Business history of the Chalmers family: Making soyfoods in New Zealand (Interview). *SoyaScan Notes*. Jan. 16. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** On Easter 1980 Rick & Elizabeth Chalmers, together with Rick's brother Greg (his formal name is "Stephen"), opened Harvest Wholefoods, 403 Richmond Road, Grey Lynn, Auckland. They borrowed the money from Elizabeth's mother, and were all equal owners. It was New Zealand's first wholefoods / natural foods store as well as the country's first macrobiotic foods retail store. They were idealists and purists, refusing to sell any vitamins, or minerals, or dairy products.

They started the store partly as a result of becoming interested in macrobiotics, and partly because Elizabeth and Rick had a 3 year old son (Daniel) who could not tolerate dairy products. As the Chalmers could not get the food they wanted anywhere, they thought that they would open a shop to also provide it to others. Moreover, Greg, who had been overseas in London (where he had worked in a restaurant) and the USA, was a pioneer in bringing macrobiotics to New Zealand. "He brought home miso and some seaweeds—foods we had never seen before."

After about six months, in Oct. 1980, in order to attract customers to the shop, they started to make nigari tofu (for their own store only) in a small room at the back of the store, designated just for that purpose. They made the simple equipment themselves, and they learned the process from *The Book of Tofu*, by Shurtleff and Aoyagi.

After another six months they were inundated with other store owners, and cafe & restaurant owners from all over New Zealand wanting to buy their tofu. "It was just amazing." The tofu was completely unpackaged and they sold it under water in bulk buckets only. So in about April 1981 they started to sell their tofu outside of Harvest Whole Foods. "Sometimes they would pick it up, and sometimes we would deliver it."

Sanitarium Health Food Co. was making many kinds of breakfast cereals and canned nut meats, but no soyfoods. Several Chinese restaurants were making tofu (they called it "bean curd"), but only for use in their own restaurants; they did not sell it elsewhere. One of these was named Sun Sun, located in Khyber Pass, Auckland.

Their daughter, Jesse, was born on 1st October 1981, and by this time it was becoming difficult to manage both the shop and making tofu. So they sold the shop and with the capital gained they brought in special tofu making equipment from Japan, moved to new premises at 1 Wallingford St., Auckland, and started Harvest Soyfoods. Harvest Whole Foods is still at its same original location today; it is going strong and doing well financially.

Harvest Soyfoods' first product was nigari tofu; to this they soon added Tofu Spreads (Feb. 1981) then Tempeh (April 1981). The business grew very rapidly, and during this period Greg also had a child, so they all had very young children and were trying to manage their lives as well as an extremely rapidly increasing business.

Greg's partner decided that she wanted to leave Auckland, and as they could not picture another partner in his place and were feeling very overloaded anyway they decided in 1983 to sell the business to Paul and Trevor Johnston, who renamed it Bean Supreme. The Johnstons paid half the money at the time of sale and the remainder a year later; Elizabeth and Rick Chalmers worked for the Johnstons during that year. This business is also still in existence, although it was bought out by Sanitarium Health Food Co. in about Aug. 1986. Note: Trevor is no longer with

the company; Paul sold the company to Sanitarium Health Foods.

From 1983 to 1986 Rick and Elizabeth had a commercial cleaning business, which suited the family structure very well, but was very unsatisfying workwise and environmentally.

In about 1980 or 1981 Austin Holden had started a largely macrobiotic import and wholesale business, Kiaora Naturals, at 374 West Coast Road, Glen Eden, in west Auckland. Holden soon started a very small shop in the corner of his warehouse and called it East West Wholefoods. For the first few years, his only customer was Harvest Wholefoods. "We kept him going."

Then in 1986 Rick and Elizabeth started East West Organics, taking over the building (and business) formerly occupied by Austin Holden and Kiaora Naturals. They knocked out all the walls, resulting in a much larger shop that specialised in organic food, with a big emphasis on fruit and vegetables.

They had no intention of making soyfoods. However there was suddenly an influx of Asian immigrants to New Zealand and Asian Tofu (usually made with calcium sulfate in aluminum pots) became widely available. By this time organics was really growing in New Zealand. Elizabeth and Rick wanted to stock organic tofu in their store, but they couldn't find a source. They talked with Trevor and Paul Johnston about making it for them, but the brothers felt there was no future in it, so they declined to do it.

So in 1996 Elizabeth and Rick started The Organic Soy Company, again in a small food factory out the back of East West Organics. They started making nigari tofu again—for their own store only. For the first time, they started to use organic soybeans, and as many other organic ingredients as they needed and could get. "We were right back where we started. And then exactly the same thing happened again. Once the word got out that organic nigari tofu was available again, people started coming from everywhere to buy it. It was not our intention to get back into the soyfoods business; we'd already sold our company. But we wanted the quality, so we had to make it ourselves." East West Organics is still operating today, although out of new premises (outgrew old one), and has just moved up the road slightly.

Their son Daniel joined them in January 1998, and in October of 1998, they sold East West Organics and moved the Organic Soy Company to their current premises at Unit A, 2 Corban Avenue, Henderson, Auckland.

Elizabeth and Rick separated the same year, but continued on in the family business together. In 2001 their daughter Jesse returned from Europe and also joined us in the business. Later that same year Rick left the business to go to University and currently, Elizabeth, Daniel and Jesse are in joint ownership, with Rick still having a 10% share. They started using the brand names (the first being Tonzu) in 2002.

The business is growing slowly, currently producing

tofu, tempeh, soy yoghurt, tofu burgers and teriyaki sauce, all 100% organic. Elizabeth has moved to part time as the younger generation are taking on the responsibility for the business. They currently have 3 full time employees as well as themselves, so are still reasonably small.

"We see a great future for the business and will probably outgrow our current premises within the next few years. We love making traditional soy products, and eventually hope to make miso and tamari, which will be export products as well as for the domestic market."

First sold commercially by the organic soy company: Tofu (1996), Teriyaki Tofu (1999), Tempeh (1999), Tofu Burgers (2001), Teriyaki sauce (2003).

All current labels and packaging are new, and have changed very much from the original. They once made two tofu spreads, one teriyaki and the other curry flavour. However it was hard to get a good enough shelf life out of them to make them viable, so reluctantly they discontinued them. They have also changed their burgers significantly. When they first produced a burger in 2001, they had 3 varieties: Garlic and Cheese, Sundried Tomato, and Feta, and Vegan. They have discontinued them all and now just make one that is actually Vegan, although they do not call it that. The burgers did not sell well; they are not certain why that was, maybe they were too expensive with all the organic ingredients and very labour intensive. So they have simplified and streamlined their current burger making the whole process more viable.

As the population of the whole of New Zealand is around 4 million and only 15% of them are vegetarian, they are playing to quite a small market; this can sometimes be quite a challenge. In the long term it will be sensible to develop products that they can export. Address: Founder and owner, The Organic Soy Company, Ltd., Unit A, 2 Corban Ave., Henderson, Waitakere, Auckland 0612, New Zealand. Phone: +64 9 835 3617.

3532. Tibbott, Seth. comp. 2007. Tofurky brand products overview: Natural foods segment. Hood River, Oregon: Turtle Island Foods, Inc. [36] p. 28 cm. [1 ref]

• **Summary:** A full-color booklet bound with a handsome, black ProClick plastic spine. On the front cover: "1980-2006: 26th anniversary Turtle Island Foods, Inc." "Sales data from: SPINscan Natural and SPINscan Conventional. 52 weeks ending December 30, 2006. All statistics are for the total U.S. market.

Contents (unnumbered pages): (1) "Turtle Island Foods honored by Inc. magazine: 2,240th fastest growing small business in the USA (of 6 million total). 159.7% growth rate over last 4 years. 57th fastest growing food and beverage company in the USA. 19th fastest growing food processor.

(2) About Tofurky products: 100% vegan. Based on organic soy products. Use non hexane extracted proteins. VejNews. Winner veggie awards—Best meat substitute.

(3) Natural foods market without Whole Foods (which no longer shares sales info with the industry). Growth of top ten brands ranked by dollar volume. Frozen and refrigerated meat alternatives. 52 weeks ended Feb. 24, 2007. Category: \$35.5 million. Growth: 4.7%. Turtle Island is the fastest-growing brand: 16.1%, followed by Quorn, Nates, Amys Kitchen, Morningstar Farms, Gardenburger, and Yves. Lightlife, Boca Foods, and White Wave all have negative growth.

(4) Natural foods market. Frozen and refrigerated meat alternatives. Top ten of 478 items by dollar volume. 52 weeks ending Dec. 30, 2006. #1. Quorn Chicken Style Nuggets. 10.6 oz. \$1,507,537. 5.6%. #2. Turtle Island Tofurky Italian Sausage (organic) 14 oz. \$1,262,616. 25.7%. #3. Quorn Chicken Style Patties. #4. Lightlife Gimme Lean Sausage. #5. Quorn Veg. Naked Chicken Cutlet. #6. Turtle Island Tofurky Deli Slices, Hickory Smoked. 5.5 oz. \$1,131,760. 19.2%. #7. Lightlife Smart Dogs. #8. Boca Original Patties Chicken Natural (4-pack). #9. Amys Burger California Veggie. #10. Quorn Meat Free Chicken Tenders.

(5) Natural foods market. Refrigerated meat alternatives, Top 10 of 260 items by dollar volume. 52 weeks ending Dec. 30, 2006. Turtle Island currently as the #1, #3, #9 and #10 best selling items among the 260. They are: Tofurky Italian Sausage. Tofurky Deli Slices Hickory Smoked. Tofurky Deli Slices Oven Roasted. Tofurky Kielbasa (sausages).

(6) Tofurky deli slices: Six features, incl. "Organic tofu based." The six types of deli slices are: Oven roasted, Hickory smoked, Peppered, Italian deli, Cranberry & Stuffing, "Philly-style" steak.

(7) Tofurky deli slices. Bar charts of refrigerated meatless deli sales, 2001-2006. For each year are given: Competitor #1. Competitor #2. Turtle Island. Overall category. "While the competition sales have been flat, Turtle Island has grown the subcategory 72 and has become the #1 brand.

(8) Deli slice standings. (9) Tofurky gourmet sausages. (10) Frozen and refrigerated meat alternatives. (11) Tofurky Jurky: 5 features.

(12) Top 10 jerky items (meat and meatless)—SPINscan natural channel. 52 weeks ending Feb. 24, 2007. The category is \$8.3 million. There are three vegetarian jerky among the top 10. Tofurky Jurky Original is the #2 seller and Tofurky Jurky Peppered is #7. The other vegetarian brand (#6 seller) is Primal Strips Seitan Teriyaki.

(13) Tofurky "foot long" veggie dogs: 5 features, incl. organic tofu based. (14) "Open mouth, insert foot."

(15-17) Turtle Island tempeh: Five features.

(18-22) Happy Tofurky Day: Five features.

(23-35) Glossy color sell sheets, printed on both sides, with the following titles: (23-24) Happy Tofurky Day! (25-26) Brave New Tempeh. (27-28) Tofurky Jurky. (29-30) Frankly speaking Tofurky Franks & Links are the best! (31-32) There's 3 big new dogs in the house. (33-34) Go beyond

the bun: Introducing Tofurky 'foot long' veggie dogs. (35-36) Tofurky deli slices: New look. Other Turtle Island glossy color sell sheets. Address: Founder and President, Turtle Island Foods, P.O. Box 176, Hood River, Oregon 97031.

3533. Turtle Island Foods. 2007. One millionth Tofurky Roast sold in 2006! Lis Theil of Hudson, Ohio, wins Evader Electric Scooter (News release). Hood River, Oregon. 1 p. Jan. 20.

• **Summary:** "In 2006 a record-breaking 201,108 Tofurky Roasts were shipped, up [27%] from the 157,890 sold in 2005. This brought the number of roasts sold since 1995, the first year Tofurky Roasts were sold, to 1,083,418.

Lisa was the winner out of 4,383 people who logged onto www.tofurky.com and guessed at the number of Tofurky Roasts sold as of midnight 31 Dec. 2006. The Evader electric scooter is a green alternative to the gas-powered moped. It is capable of speeds up to 30 miles per hour and can go up to 40 miles on a single charge of its battery. Turtle Island is an independent, family-owned business. Seth Tibbott is founder and president. Address: P.O. Box 176, Hood River, Oregon 97031.

3534. **Product Name:** President's Choice Blue Menu [Mediterranean Meatless Chicken Strips, Meatless Beef Strips].

**Manufacturer's Name:** Garden Protein International Inc. **Manufacturer's Address:** 12751 Bathgate Way, Richmond (near Vancouver), BC V6V 1Y5, Canada. Phone: 604-278-7300.

**Date of Introduction:** 2007 January.

**Ingredients:** Chicken breasts: Water, wheat gluten, soy protein isolate, malted barley extract, natural flavour, yeast extract, garlic powder, onion powder, canola oil, evaporated cane juice, salt, sweet red bell pepper flakes, spice, malic acid, vitamins and minerals [the name of each is given], pea protein, carrot powder.

**Wt/Vol., Packaging, Price:** 227 gm. in plastic bag.

**How Stored:** Refrigerated.

**New Product—Documentation:** Packages sent by Yves Potvin of GPI. 2008. Oct. 28. Plastic seam-seal bag. 7.75 by 7.25 inches. Bluish green, dark blue, light blue, red and black on light blue. "Loblaws Inc.," Montreal, Toronto, and Calgary. A color photo on the front shows the Chicken Strips with lettuce and veggie strips in a tortilla wrap and the Beef Strips with veggies on bed of rice.

On the back panel are Nutrition Facts, ingredients list and recipe ideas. On the lower back panel is the logo of the manufacturer, Garden Protein International Inc. (in English and French) on a white background: "Made with Gardein. Protein from the garden. www.gardein.com. Gardein is a registered trademark of Garden Protein International Inc."

3535. **Product Name:** Organic BBQ Burgers, Mexi Burgers

(Replaces Tofu-Mexi Patties, launched June 1997), Veggie Burgers (Replaces Tofu Veggie Patties, launched 1981), Breakfast Sausage 12-Pack, Marinated Tofu Cutlets 12-Pack, Alder Smoked Tofu 12-Pack, Original Tofu Cutlets (Replaces Tofu Cutlets: Marinated and Baked, launched 1982).

**Manufacturer's Name:** Tofu Shop Specialty Foods Inc.  
**Manufacturer's Address:** 65 Frank Martin Court, Arcata, CA 95521. Phone: 707-822-7401.

**Date of Introduction:** 2007 April.

**Wt/Vol., Packaging, Price:** 6.5 oz (184 gm).

**How Stored:** Refrigerated.

**New Product–Documentation:** Labels sent by Matthew Schmit. 2009. March 18. Self adhesive. Products 1-3: 3 inches diameter. Multi-colored on white. A stylish water-color illustration shows a tofu shop on stilts by the edge of the sea. All three products weigh 7.5 oz (211 gm) and are “Organic. Baked tofu. Perishable–Keep refrigerated. Good source of calcium. Rich in vitamin C and iron. Cholesterol free.”

Products 4-6. Label is one color on white. 4 by 3 inches. No illustration. Product name, ingredients, nutrition facts (all information) is on front panel. Product 7: 3.5 by 2.5 inches. Multi-colored on white. A stylish water-color illustration shows a tofu shop on stilts by the edge of the sea. 6 oz. Certified organic. Marinated and baked. Enjoy our classic marinade rich with organic soy sauce, garlic, and a hint of lemon. Perfect for sandwiches, salads, stir-fry, and sushi rolls. Perishable–Keep refrigerated.

3536. Hain Celestial Group, Inc. (The). 2007. The Hain Celestial Group announces an agreement to acquire the tofu and meat-alternative business of WhiteWave Foods (News release). Melville, New York. 2 p. May 30. 28 cm.

• **Summary:** “The Hain Celestial Group, Inc. (Nasdaq: HAIN), a leading natural and organic food and personal care products company, today announced an agreement to acquire the tofu and meat-alternative business of WhiteWave Foods Company, a subsidiary of Dean Foods Company (NYSE: DF). These products are sold under the brand names TofuTown (R) and WhiteWave (R) and are currently manufactured in Boulder, Colorado.

“Adding the tofu and meat-alternative business from WhiteWave Foods complements our existing Yves Veggie Cuisine (R) product line, strengthening and expanding our fresh, meat-free alternative product offerings to further support this sector of the growing natural and organic market,” commented Irwin D. Simon, President and Chief Executive Officer of The Hain Celestial Group. ‘Purchasing this business will better position the Company to increase our meat-free alternative product sales in Canada and the United States, as we integrate the sales and marketing into our existing Yves operation,’ concluded Irwin Simon.

“The product line includes baked and grilled tofu, seitan,

tempeh and other traditional tofu items sold through natural and conventional grocery stores as well as in foodservice outlets. The tofu business generated sales of approximately \$8 million in the last fiscal year. The transaction excludes the WhiteWave trademark; however, Hain Celestial will continue to market existing products under the WhiteWave brand for a transitional period under license. Other terms of the acquisition, which is expected to close in June, were not disclosed. The transaction is expected to be accretive to Hain Celestial’s earnings during its fiscal year 2008.”

Note: The acquisition actually took place on 8 June 2007. Hain Celestial acquired all products sold under the TofuTown or WhiteWave brand under a 12-month license. Address: 58 South Service Road, Melville, New York 11747-2342.

3537. **Product Name:** Garden Goodness: 6 Veggie Chick’n Breasts, Lightly Seasoned.

**Manufacturer's Name:** Garden Protein International Inc.  
**Manufacturer's Address:** 12751 Bathgate Way, Richmond (near Vancouver), BC V6V 1Y5, Canada. Phone: 604-278-7300.

**Date of Introduction:** 2007 June.

**Ingredients:** Water, soy protein, Canadian wheat protein, modified cellulose, natural flavors, potato starch, expeller pressed canola oil, organic evaporated cane juice, yeast extract, spices, sea salt, pea protein, carrot fibre, organic beet root fibre, vitamins and minerals [each one is named].

**Wt/Vol., Packaging, Price:** 700 gm. Paperboard box. Six individual packs.

**New Product–Documentation:** Packages sent by Yves Potvin of GPI. 2008. Oct. 28. Paperboard box. 9 by 6 by 2½ inches. Black, yellow, green, red and white. A color photo on the front panel shows a Chick’n Breast sliced in half on a bed of lettuce. On the front and back panels is the logo of Garden Protein International Inc. “Made with Gardein. Garden grown protein.” side panel: “No artificial flavors, colors or preservatives. Manufactured for Its All Good Foods, Inc., Richmond, V6V 1Y5 Canada. www.gardein.com. Product of Canada. Copyright 2008.” At one end panel: “Heat & serve: Ready in 2 minutes.” On the back panel are Nutrition Facts, ingredients list and recipe ideas.

3538. Nichols, Russell. 2007. A whole new ballgame: Veggie dogs, sushi and deep-fried asparagus find fans in regional ballparks. Nutrition... now that’s another story. *Prosper Magazine*. July.

• **Summary:** Johanna McCloy has been the key person, working for many years, to bring meatless hot dogs to baseball stadiums. A sidebar titled “To boldly go where no veggie dog has gone before” tells the story of her work, starting in 2000. By 2003 she had arranged for veggie dogs to be served in ten stadiums, including Dodger Stadium in Los Angeles, California. A portrait photo shows her wearing

a “Dare to be Fabulous” t-shirt.

3539. United Soybean Board (USB). 2007. Consumer attitudes about nutrition: Insights into nutrition, health, and soyfoods. 14th annual national report. Seattle, Washington: USB. 12 p. Oct. 28 cm.

• **Summary:** Methodology: “This year represents the second year we have adopted an online self-administered survey as our methodology, a significant change from random telephone interviews. The survey, conducted by an independent research firm [in Seattle, Washington] in February and March 2007, includes 1,000 random surveys, providing a sample that is consistent with the total American population. The study’s margin of error remains  $\pm 1.9$  to 3.1%, with a confidence interval of 95 percent.”

Contents: Introduction. Methodology. About USB. Nutritional habits & obesity concerns. Healthy food decisions. Improving overall health. Cooking oil impressions. Consumer attitudes about fats. Awareness and usage of soy products. Occasion preferences for consuming soy. Restaurants and soy products. Soyfoods and health. Special health benefits of soy

Awareness and usage: 33% of Americans consume soyfoods or soy beverages once a month or more. “For the fourth year in a row, consumers reported the most familiarity with soymilk, soybean oil, soy veggie burgers and tofu.”

A table shows the “Top 20 soy products by awareness.” Soymilk 90%. Soybean oil 66%. Soy veggie burger 63%. Tofu (unspecified) 60%. Soy infant formula 51%. Soy nuts 47%. Soy latte / soymilk in espresso coffee drinks [as at Starbucks] 41%. Soy protein bars 34%. Dried or canned soybeans 34%. Soy yogurt 32%. Soy flour 31%. Soy ice cream / cheese 30%. Soy hot dogs 29%. Flavored / marinated tofu 28%. Miso 28%. Soy supplements 28%. Cereal bar / Energy bar 28%. Edamame 23%. Soy breakfast cereal 21%. Textured soy protein 21%. All others mentioned 14% or less.

Occasion preferences for consuming soy (in descending order of preference): dinner 41%, breakfast 28%, lunch 27%, mid-afternoon snacking 19%, late evening snacking 14%, mid-morning snacking 10%, desserts 6%.

Restaurants and soy products: “Over half of consumers have tried soyfoods in restaurants.” Tofu 25%. Soymilk 24%. Veggie burgers 22%. “Over one-third would order soy products in restaurants... if they could find soy on their restaurant’s menu.”

“In 2007, 85% of consumers rate soy products as healthy, up three percentage points from 2006.” A graph (p. 7) shows this increase in awareness (82% in 2006, 78% in 2005, 74% in 2004, 74% in 2003, 74% in 2002, 69% in 2001, 76% in 2000, 71% in 1999, 67% in 1998).

Why? Low-fat profile 18%. Protein content 17%. Heart health function 16%. Cholesterol-lowering properties 11%. “Being good for you” 11%. Potentially providing relief for menopause symptoms 10%.

Note: As of Aug. 2008 this full survey is available gratis in PDF format at [www.soyconnection.com/health\\_nutrition/pdf/](http://www.soyconnection.com/health_nutrition/pdf/).

3540. **Product Name:** Artie’s Tempeh Burgers, and Artie’s Fresh Organic Soy Tempeh.

**Manufacturer’s Name:** Artomoro Inc.

**Manufacturer’s Address:** 125 N.W. 23rd Ave. #17, Gainesville, FL 32601. Phone: 352-226-5561.

**Date of Introduction:** 2007 September.

**Ingredients:** Organic soybeans, water, Rhizopus oligosporus.

**Wt/Vol., Packaging, Price:** Frozen: Burgers: 4 x 3 oz burgers per pack; Not vacuum packed. Tempeh: 1 lb retail.

**New Product–Documentation:** Talk with Sam Guy. 2008. Dec. 29. His son is Art and the tempeh business was Art’s idea. The tempeh burgers were introduced in Sept. 2007 and the retail tempeh in Oct. 2007, one month later. His son delivers his tempeh locally on a bicycle—which has attracted media attention. The business provides detailed nutritional and microbiological info on its product; this as made it possible to attract large customers; the company has about 80 customers, big and small. Their tempeh is frozen but not pasteurized. See [www.artistempeh.blogspot.com](http://www.artistempeh.blogspot.com). On this website is a list of “Some of the fine grocery stores that are selling Artie’s Tempeh.” Many nice recipes are given (each with a color photo) on the website.

3541. **Product Name:** It’s All Good [2 Veggie Chick’n Breasts in a Tomato Tuscan Marinade, 2 Veggie Chick’n Breasts in a Herb Dijon Marinade, 2 Veggie Chick’n Breasts Lightly Seasoned, 8 Veggie Chick’n Filets in a Mediterranean Herb and Spice Rub, 8 Veggie Chick’n Filets in a Zesty Lemon Herb Rub, Veggie Chick’n Strips Lightly Seasoned, Veggie Beef Strips Lightly Seasoned, 6 Veggie Chick’n Satays in a Chili Lime Marinade, 5 Veggie Beef Skewers in a Chipotle BBQ Sauce].

**Manufacturer’s Name:** Garden Protein International Inc.

**Manufacturer’s Address:** 12751 Bathgate Way, Richmond (near Vancouver), BC V6V 1Y5, Canada. Phone: 604-278-7300.

**Date of Introduction:** 2007 October.

**Ingredients:** Veggie Chick’n Breasts: Water, isolated soy protein, vital wheat gluten, natural flavors, modified vegetable gum, potato starch, expeller pressed canola oil, tomato paste, spices, red bell pepper flakes, pea protein, carrot fiber, organic beet root fiber, organic evaporated cane juice, yeast extract, vinegar, sea salt, and citric acid. Contains Soy and Wheat.

**Wt/Vol., Packaging, Price:** 10.5 oz (300 gm). Paperboard box.

**How Stored:** Refrigerated.

**New Product–Documentation:** Packages sent by Yves Potvin of GPI. 2008. Oct. 28. Paperboard box. 6½ by 6½

by 1¼ inches. Green, red and black on white. A color photo on the front panel shows a Chick'n Breast sliced in half on a bowl of rice. On the front and back panels is the logo of Garden Protein International Inc. "Made with Gardein. Garden grown protein." On one side panel: "No artificial flavors, colors or preservatives. A good source of protein. Grain and vegetable ingredients. Suitable for vegans. Low fat. Manufactured for Its All Good Foods, Inc., Richmond, V6V 1Y5 Canada. www.itsallgoodfoods.com. Product of Canada, copyright 2007." On the other side panel: "Pan fry. Bake. Microwave. Barbecue, Good with rice, potatoes, couscous, pasta." On the bottom panel: "Heat & serve: Ready in 2 minutes." On the back panel are Nutrition Facts, ingredients list and recipe ideas.

3542. St. Clair, Stacy. 2007. Food for thought: Simple menu changes for special diets. *Recreation Management*. Oct.  
 • **Summary:** Contents: Introduction. Dietary definitions (incl. kosher, vegan, vegetarian, whole-grain). Choices for all.

Growin' veggie (population). Foods of faith. Keep Kosher ("Eight major sporting venues on the East Coast offer concession stands operated by Kosher Sports Inc."). Just do it.

Includes an interview with Johanna McCloy, founder of Soy Happy.

3543. Stern, Yoni; Taragin, Robyn; Larry, Shahar. 2007. New thought for food. *Food Technology* 61(10):34-36, 38-40. Oct.  
 • **Summary:** Michael Shemer, a young Israeli, methodically tried to develop meat alternatives that had excellent taste, texture, and nutritional value. For years, he experimented with wheat and soy proteins. In "the early 1980s he had a breakthrough when he combined the two vegetable proteins. He quickly evolved his technology into a line of meat analog products..." He found a home for his line of meat analog products at Kibbutz Lohamei HaGeta'ot. "Production began in 1985 under the name Tivall, later to become part of Nestlé Corp."

Note: This article is deceptive in two areas: (1) It does not explain that Michael Shemer worked for Worthington Foods, the world leader in meat alternatives since 1939 and owner of the famous Morningstar Farms brand, for about 3 years after earning his PhD degree in 1973 in the USA and before returning to Israel. (2) The idea of using wheat gluten and soy protein together to make outstanding meat alternatives was discovered by a team of researchers at Worthington Foods in about the mid-1970s. Michael Shemer was one member of that team. The leader of that team at the time, Richard Leiss, said that Michael deserves no more credit for the discovery than any other member of the team.

3544. *SoyaScan Notes*. 2007. Chronology of major soy-related events and trends during 2007 (Overview). Dec. 31. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** Jan. 1–Soyfoods Center changes its name to Soyinfo Center.

Feb.–The Soy Connection for the Food Industry (Vol. 1, No. 1) starts to be published by United Soybean Board as a free e-newsletter. The subject of the first issue is Qualisoy soy oil.

March 6–8 International Soy Utilization conference in Bangkok, Thailand. It is organized by: The Institute of Nutrition, Mahidol University (INMU), ASA International Marketing (ASA IM), and the Soy Food Forum Southeast Asia (SFF).

April 4–Organizations listed in the *Soya & Oilseed Bluebook* are invited and enabled to update their own listings online. The update listing will appear as soon as the *Bluebook* editors review it and in the print edition in the fall. The *Bluebook* will continue to be printed as a bound book. Preferred customers will receive a free copy. Qualified people or organizations in the industry who request a copy pay shipping and handling. Those outside the industry must pay for shipping and handling plus a \$95 fee.

June 11–The Hain Celestial Group completes its acquisition of the tofu and meat-alternatives business of WhiteWave Foods Co., a subsidiary of Dean Foods. The product line includes grilled and baked tofu, seitan, tempeh, etc. These products are expected to complement Hain Celestial's existing meat alternatives under the Yves brand in Canada and the United States. The White Wave tofu business generated sales of approximately \$8 million in the last financial year.

July 11–Solae announces that it has completed its purchase of Cargill's Prolisse line of isolated soy proteins (ISP; soy protein isolates), including the patented membrane technology for processing ISP.

Aug. 7–SunOpta (incl. SunRich), headquartered in Canada, announces that it has acquired a soymilk plant in Heuvelton, New York, from ProSoya Corporation (Ottawa, Ontario). Allan Routh is president of the SunOpta Grains and Foods Group.

Aug. 16–CPM (Waterloo, Iowa) acquires Crown Iron Works (Minneapolis, Minnesota). CPM is owned by Golbert Global, a private equity group. The acquisition doubles the size of CPM.

Sept. 11–Hain Celestial Group announces it will delay filing its annual report with the U.S. Securities and Exchange Commission (SEC) pending a review of its practices in granting stock options. Thus, the annual report was received by shareholders in April 2008, rather than the typical Nov. 2007.

Nov. 5–Symington's, a major U.K. food manufacturer, has acquired the dry-mix products from Hain Celestial (formerly known as Haldane Foods) for an undisclosed sum. In the purchase of Hain Celestial's dry mix operation, Symington will take over the Barrow based production centre from Hain Celestial and will enable the company to increase its stake in the growing health food and vegetarian sector. Main products in the acquisition are couscous, sport nutrition, snack pots and vegetarian meals. Brands acquired include Granose, Realeat, Direct Foods, Organic and Amazing Grains. Granose was owned by Haldane Foods which also owned Direct Foods and Realeat. So you will also find Sosmix and Burgamix have disappeared as well—but they have returned under the Granose brand. We now have the Granose Sausage Mix, Burger Mix and others that have replaced the Realeat and Direct Foods Sosmix and Banger Mix as well as the Burgamix. Popular products like Nut Roast, Cashew Nut Roast and Chicken Style Bake were discontinued following the sale of the Realeat, Granose and Direct Foods brands.

3545. Bittman, Mark. 2007. *How to cook everything vegetarian: simple meatless recipes for great food*. Hoboken, New Jersey: John Wiley & Sons, Inc. xii + 996 p. Illust. Index. 24 cm.

• **Summary:** The chapter titled "Tofu, vegetable burgers, and other high-protein foods" (p. 637-78) has this contents: Introduction. The umami factor (savory-ness). The basics of tofu: The tofu lexicon (regular tofu, silken tofu, pressed or extra-firm tofu, smoked tofu, fried tofu, baked tofu, fermented or pickled tofu, tofu skins {dried bean stick, yuba, bean curd sheets or skins}). Buying and storing tofu. Preparing tofu (freezing, squeezing, puréeing,...); then come a wealth of recipes.

The index contains 129 entries for tofu, 32 for miso, 26 for tempeh, 25 for soy sauce, 24 for edamame, 23 for seitan, 11 for soybeans, 7 for black beans (fermented [fermented black soybeans]), 4 for teriyaki sauce, 6 for tofu skins (yuba and dried yuba sticks), 3 for milk substitutes, 2 each for meatballs (vegetarian), and 1 each for bean sprouts (soy), black soybeans, meatless meat sauce, soybean oil, soy flour, soy milk, soy nuts, soy pasta, soy protein isolate, textured vegetable protein, tofu noodles, and Worcestershire sauce (hold the anchovies).

There are also recipes for adzuki beans [sic], tahini, vegan cookery—and much more. Address: New York Times food writer.

3546. Yeager, Selene. 2007. *The doctor's book of food remedies: the latest findings on the power of food to treat and prevent health problems—from aging and diabetes to ulcers and yeast infections.* Fully revised and updated. [Emmaus, Pennsylvania]: Rodale Inc. Distributed to the trade by Macmillan. xii + 707 p. Index. 24 cm. 1st ed. 1998.

• **Summary:** The chapter titled “Soy foods: Help for weight loss” (p. 579-83) explains that in the late 1990s the media strongly promoted soy, made it into a sort of miracle food or cure, and rode the wave up, then after about 2005 when scientists found that soy was not a miracle food, the media decided that “The party’s over,” and they rode the wave down. In 2005 soy foods faced big setbacks, when a U.S. government panel said there wasn’t clear evidence that soy could guard against heart disease, ease menopause, or protect bones from osteoporosis. “In response the National Institutes of Health (NIH) said it would stop paying for new soy studies.” That fall, the soyfoods industry withdrew a petition that asked the FDA to permit food labels that claim that soy protein helps prevent cancer.

This chapter explains: “But flash forward to 2006, where one dour headline—‘Soyonara—tells the sad tale. Has this promised [by the media] superfood become a has-bean?’ Maybe not.”

It proceeds to give a fair assessment of what current science says can and cannot be expected of soyfoods. Cannot (by itself): Significantly reduce cholesterol. Protect against breast or prostate cancer. Build bones or reduce osteoporosis. Cool hot flashes or reduce menopause symptoms. This is followed by a long list of its many well-known health benefits. “That’s good news because soy seems to be here to stay.” It has gone mainstream, and sales of soy foods in the United States rose dramatically from \$300 million in 1992 to \$3.9 billion by 2004—a 13-fold increase in 13 years.

The section titled “The joy of soy” gives brief definitions of some of the most popular soyfoods: Edamame, soy nuts, meat substitutes [sic, alternatives], soy flour (made from roasted, ground soybeans), soy milk, tempeh, and texturized soy protein.

A sidebar titled “Doctor’s top tip” recommends eating soy (such as edamame, tofu, soy nuts, and some soy burgers) in place of foods high in animal fats. The head of the American Heart Association’s nutrition committee reminds us: “Heart disease is a major problem—using soy protein instead of animal protein is still a win.”

Dr. Mark Messina, a prominent soy researcher, says there are many reasons to add soy to your diet from just a basic nutritional point of view: (1) Soyfoods such as tofu or tempeh are high quality, low-cost, versatile sources of protein. (2) A half cup of tofu, curded with calcium sulfate,

can provide more than 25% of the Daily Value (DV), plus a significant amount of iron. (3) Soyfoods contain little of the artery clogging saturated fats found in meat and many dairy products.

Contains recipes for: Soy fruit smoothie (with vanilla-flavored soy beverage, p. 583). Mocha Tofu Pudding (with 2 packages {10½ ounces each} silken tofu and 2/3 cup packed light brown sugar).

The index contains 34 entries for soy, 13 for tofu, 4 for tempeh, 3 entries for miso, 2 entries each for edamame and for soy milk, 1 entry each for soy nuts, soy yogurt, and textured soy protein.

Note: This book is not vegetarian.

3547. Chajuss, Daniel. 2008. Re: Brief biography of Dr. Micha / Michael Shemer. Letter (e-mail) to William Shurtleff at Soyinfo Center, Jan. 4. 1 p.

• **Summary:** “Micha [Michael] was born on April 26, 1944 and passed away on May 26, 2007 and had lived in Haifa.

“I knew Micha very well and for a long time. (His M.Sc. thesis [which was submitted in 1970 to the Technion, Haifa, Israel] on cottonseed protein isolation was a done based on a patent of mine that had used hexametaphosphate solution as extractant of proteins). Micha was a very capable and inventive person with an inquiring and open mind. He was the food technologist who had developed most of Tivall’s products. After obtaining his PhD as a visiting student in the U.S., he went to work for Miles Laboratories (Worthington Foods, in the US) for a few years on vegetarian meat analogs; he was later the mind behind Tivall’s success.” This job with Miles was the first one he got after earning his PhD degree at the University of Illinois at Urbana, Champaign.

“Tivall was founded in 1986 and is today considered a leading producer of vegetarian protein derived meat analogs like hamburgers and sausages (mainly using soy, peas and wheat proteins [gluten]) selling in the UK and the rest of Europe, including the Netherlands, Israel, Germany, Sweden, Italy and Belgium.

Micha was the first person in Israel who produced some technologically improved analogs of meat patties, hamburgers and sausages, that were commercially very successful. He did not invent meat alternatives.

“Tivall products were first made and still are made at kibbutz Lohamei-Hagetaot. Oshrat is probably the Mobile Post name not a real location and thus could not be found on a map.

“The Tivall plant (in Kibbutz “Lohamei-Hagetaot”) is located north of Haifa and is far away from the place where I live.

“Micha was not the founder of Tivall per se. Tivall was owned and built by the members of the kibbutz Lohamei-Hagetaot. Micha was not a member of the kibbutz but a hired person that had developed the technology by which Tivall had made their products and thus can be considered as a part

of the founders of Tivall.” Address: Israel.

3548. Sachs, Andrea. 2008. Check that chicken nugget: It might just be a plant. *Washington Post*. Jan. 9. p. F-1.

• **Summary:** The latest generation of imitation meats is so realistic its hard for vegetarians to tell whether they are meatless or not. While some vegetarians relish the idea of dining on pig’s foot made of soy protein, others would rather starve than dine on fake meat. Two good vegetarian restaurants that serve such foods are Java Green in Washington, DC, and the Vegetable Garden in Rockville, Maryland.

3549. Brown, Lester R. 2008. Feeding eight billion well (Document part). In: Lester R. Brown. 2008. Plan B 3.0: Mobilizing to Save Civilization. New York and London: W.W. Norton & Co. xiv + 400 p. See p. 175-191. Chap. 9. Jan. 16. [65 endnotes]

• **Summary:** The section titled “Producing protein more efficiently” (p. 183-89) notes that about 37% of the world’s grain harvest is used to produce animal protein. World meat consumption has increased from 44 million tons in 1950 to about 240 million tons in 2005; average yearly consumption per person has more than doubled from 17 kg to 39 kg (86 lb). “In every society where incomes have risen, meat consumption has too, perhaps reflecting a taste that evolved over 4 million years of hunting and gathering.”

Fortunately consumers are shifting from beef and pork to poultry and fish, “sources that convert grain into protein more efficiently.” Health concerns among more affluent consumers are reinforcing this shift.

The efficiency with various animals convert grain into live weight varies widely. “With cattle in feedlots, it takes roughly 7 kilograms of grain to produce a 1-kilogram gain in live weight.” For pork the figure is over 3 kg, and for poultry its just over 2. There are two main types of farmed fish: carnivores (salmon, shrimp) and herbivores (carp, tilapia, catfish, which dominate worldwide aquaculture). For herbivorous farmed fish, the figure is less than 2.

Pork (most of it produced in China) is now the most popular meat worldwide; it passed beef in 1979. In 1995 poultry passed beef worldwide to move into second place behind pork. From 1990 to 2006, pork production worldwide has grown by 2.6% a year, poultry by nearly 5% a year, and aquaculture by more than 9% a year. In aquaculture lies “the great growth potential for efficient animal protein production...” China, the world leader in aquaculture, “accounts for an astounding two-thirds of global fish farm output.” “Over time, China has also developed a fish polyculture using four types of carp that feed at different levels of the food chain... These four species thus form a small ecosystem, with each filling a particular niche” (p. 184). China is the first major country where production of fish and shellfish by aquaculture has surpassed poultry

production. “China’s aquaculture is often integrated with agriculture, enabling farmers to use agricultural wastes, such as pig or duck manure, to fertilize ponds, thus stimulating the growth of plankton on which the fish feed.”

“When we think of soybeans in our daily diet, it is typically as tofu, veggie burgers, or other meat substitutes. But most of the world’s fast-growing soybean harvest is consumed indirectly in the beef, pork, poultry, milk, eggs, and farmed fish that we eat. Although not a visible part of our diets, the incorporation of soybean meal into feed rations has revolutionized the world feed industry, greatly increasing the efficiency with which grain is converted into animal protein.

“In 2007, the world’s farmers produced 222 million tons of soybeans—1 ton for every 9 tons of grain produced. Of this, some 20 million tons [9%] were consumed directly as tofu or meat substitutes. The bulk of the remaining 202 million tons [91%], after some was saved for seed, was crushed in order to extract 37 million tons of soybean oil, separating it from the highly valued, high-protein meal.”

“The world’s three largest meat producers—China, the United States, and Brazil—now all rely heavily on soybean meal as a protein supplement in feed rations.” This use of soybean meal in animal feeds “helps explain why the share of the world grain harvest used for feed has not increased over the last 20 years even though production of meat, milk, eggs, and farmed fish has climbed. It also explains why world soybean production has increased nearly 14-fold since 1950” (p. 186).

“Moving down the food chain (p. 188-89):... In every society where incomes rise, people move up the food chain, eating more animal protein as beef, pork, poultry, milk, eggs, and seafood... The shift to more livestock products as purchasing power increases appears to be universal.”

We use less energy when we move down the food chain. A “plant-based diet requires roughly one-fourth as much energy as a diet rich in red meat. Shifting from a diet rich in red meat to a plant-based diet cuts greenhouse gas emissions as much as shifting from a [Chevrolet] Suburban SUV to a [Toyota] Prius.” Address: President, Earth Policy Inst., 1350 Connecticut Ave., N.W., Suite 403, Washington, DC 20036. Phone: 202-496-9290.

3550. Tibbott, Seth. 2008. Update on Tofurky and Turtle Island (Interview). *SoyaScan Notes*. Jan. 17. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** In about 1998 Turtle Island changed from being mainly a tempeh company to being mainly a meat alternatives company; that year sales of Tofurky-brand products passed sales of tempeh and tempeh products. Today, tempeh products (including two burgers, which are meat alternatives) account for only 7.2% of sales. In 2002 tempeh and products accounted for 18% of company sales.

Seth and his step-son, Jamie (who has a PhD and is

very bright) are working on an innovative new process for making tempeh. Seth believes that the flavor and texture of the finished product maybe slightly improved. Seth still considers homemade tempeh, with its magical snowy white mycelium on top, to be the very best. Vacuum-packing gives it a slight bitterness, which degrades the quality about 30%. Freezing is much better, as it lowers the quality less than 10%.

Tempeh is making a comeback nationwide. Sales were up 11% in 2007 compared with the 52 weeks before Dec. 2007. Seth can think of five possible reasons for this. Tempeh is: (1) a whole-grain food; (2) A fermented food, with the many benefits of fermentation; (3) A vegan meat alternative at a time when veganism is growing in the USA; (4) A low sodium food—all meats are high in sodium; (5) Gluten free.

In Dec. 2007 Tofurky got a great deal of free publicity. Citigroup, which lost about \$10 billion in the 4th quarter of 2007, ran a very nice, positive 2-page color ad featuring “tofurkey” tofu” as the center of a family’s Thanksgiving meal. It appeared at the very front of magazines such as *People*, *Time*, *Newsweek*, *Gourmet*, *The New Yorker*, etc. Note that Citigroup carefully misspelled and lowercased “tofurkey.”

In 2007 Turtle Island sold 275,634 Tofurky Roasts, up 37% from the 201,000 sold in 2006. This was the largest percentage increase since 1999 and is a key indicator of vegetarianism in America. In addition, Turtle Island was No. 2,240 in the INC, 5,000 fastest growing small, independently held companies in the USA and the 19th fastest growing independent food company. Seth’s company has grown 159% over the last four years.

Seth is always surprised and disappointed at the disconnect between environmental groups and vegetarianism. Such groups almost always serve plenty of meat at their various gatherings—as if to say that they are just regular American folks out to save the environment.

Steve Demos recently launched Goodbelly, an organic fruit juice containing a patented probiotic culture; he has apparently started a new company. Address: President and Founder, Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: (503) 386-7766.

**3551. Product Name:** President’s Choice Blue Menu—The World’s Best [Meatless Chicken Breast, Meatless Chicken Strips].

**Manufacturer’s Name:** Garden Protein International Inc.  
**Manufacturer’s Address:** 12751 Bathgate Way, Richmond (near Vancouver), BC V6V 1Y5, Canada. Phone: 604-278-7300.

**Date of Introduction:** 2008 January.

**Ingredients:** Chicken breast: Water, soy protein isolate, wheat gluten, natural flavour, methyl cellulose, potato starch, canola oil, spices (contain garlic), vitamins and minerals [name of each is given], pea protein, carrot powder, beet root

powder, cane juice powder, yeast extract, salt.

**Wt/Vol., Packaging, Price:** 900 to 936 gm. Paperboard box.

**How Stored:** Refrigerated.

**New Product—Documentation:** Packages sent by Yves Potvin of GPI. 2008. Oct. 28. The Chicken Breast was first sold in Jan. 2008 and the Breaded Chicken Strips in June 2008. Paperboard box. 9.5 by 7.5 by 2.5 inches. Light green, bark blue, light blue, red and black on light blue. “Loblaws Inc.,” Montreal, Toronto, and Calgary. A color photo on the front panel shows the Chicken Breast and the Breaded Chicken Strips (one of each is sliced) with veggies on a white plate.

On the back panel are Nutrition Facts, ingredients list and recipe ideas. On the lower back panel is the logo of the manufacturer, Garden Protein International Inc. (in English and French) on a light blue background: “Made with Gardein. Garden grown protein. www.gardein.com. Gardein is a registered trademark of Garden Protein International Inc.”

**3552. Product Name:** Wildwood Tofu-Veggie Burgers (Organic) [Original].

**Manufacturer’s Name:** Pulmuone Wildwood, Inc.

**Manufacturer’s Address:** Fullerton, CA 92833.

**Date of Introduction:** 2008 January.

**Ingredients:** Jan. 2008: Tofu\* (filtered water, soybeans\*, nigari {magnesium chloride, a natural firming agent}), vegetable oil\* (sunflower or canola), yellow onion\*, carrot\*, kale\*, tapioca starch\*, sea salt, garlic powder\*. \* = Organic.  
**Wt/Vol., Packaging, Price:** 6.5 oz (184 gm) vacuum packed. Package of two retails for \$2.69 (2008/01 Lafayette, California).

**How Stored:** Refrigerated.

**New Product—Documentation:** Product with Label purchased at Trader Joe’s, Lafayette, California. 2008. Jan. 16. Green, tan, red, orange, and blue. Front panel: “2 ready-

to-enjoy burgers. 25% organic vegetables.” “100% U.S. grown organic soybeans.” USDA Organic logo. Certified organic by Oregon Tilth. [www.wildwoodfoods.com](http://www.wildwoodfoods.com). “Dairy free, gluten-free & soy-isolate free, organic, vegan.”

3553. Shurtleff, William; Aoyagi, Akiko. 2008. *Le livre du tofu: La source de protéines de l'avenir—dès maintenant!* [The book of tofu: Protein source of the future—now! Translated from the English by Nathalie Tremblay]. Varennes, Quebec, Canada: Éditions AdA Inc. 430 p. Illust. by Akiko Aoyagi. Index. Feb. 28 cm. [53 ref. Fre]

• **Summary:** Contents: Preface. Acknowledgements. Part I. Tofu: Food for mankind. 1. Protein East and West. 2. Tofu as a food. 3. Getting started. Our favorite tofu recipes (lists about 80 recipe names for each of the different types of tofu, plus soymilk, yuba, whole soybeans, gô, okara, and curds; very favorites that are also quick and easy to prepare are preceded by an asterisk).

Part II. Cooking with tofu: Recipes from East and West (500 recipes). 4. Soybeans: History, cooking with whole dry soybeans, roasted soybeans (*iri-mame*), fresh green soybeans (*edamame*), kinako (roasted full-fat soy flour), soybean sprouts (*daizu no moyashi*), natto (sticky fermented whole soybeans, with “gossamer threads”), tempeh (fermented soybean cakes), Hamanatto and Daitokuji natto (raisin-like natto), modern western soybean foods (natural soy flour [full-fat], soy granules, defatted soy flour and grits, soy protein concentrates, soy protein isolates, spun protein fibers, textured vegetable protein (TVP), soy oil products). 5. Gô (*purée de fèves de soya fraîches*; a thick white puree of well-soaked uncooked soybeans). 6. Okara or Unohana. 7. Curds and whey (*Caillé et petit-lait*). 8. Tofu (includes history, and preparatory techniques: Parboiling, draining, pressing

{towel and fridge method, slanting press method, sliced tofu method}, squeezing, scrambling, reshaping, crumbling, grinding).

9. Deep-fried tofu (*Tofu frit*): Thick agé or nama agé (*Agé épais {côtelettes de tofu frit}*), ganmo or ganmodoki (*burgers de tofu frit*; incl. *hiryozu / hirosu*), agé or aburagé (*pochettes de tofu frit*; incl. “Smoked tofu,” p. 197). 10. Soymilk (*Lait de soya*). 11. Silken tofu (Kinugoshi ou tofu soyeux) (“*Kinu* means ‘silk’; *kosu* means ‘to strain’; well named, kinugoshi tofu has a texture so smooth that it seems to have been strained through silk”). 12. Grilled tofu (*Tofu grillé*). 13. Frozen and dried-frozen tofu (*Tofu surgelé et tofu surgelé sèche*). 14. Yuba (incl. many meat alternatives such as Yuba mock broiled eels, Buddha’s chicken, Buddha’s ham, sausage). 15. Tofu and yuba in China, Taiwan, and Korea (incl. Savory tofu {*wu-hsiang kan*}; see p. 258 for illustrations of many meat alternatives, incl. Buddha’s fish, chicken, drumsticks, and duck, plus vegetarian liver and tripe, molded pig’s head, and molded ham). 16. Special tofu (*Tofu particuliers*).

Part III—Japanese farmhouse tofu: Making tofu for more and more people. 17. The quest. 18. Making community tofu. 19. The traditional craftsman. 20. Making tofu in the traditional way. Appendices: A. Tofu restaurants in Japan (many are vegetarian). B. Tofu shops in the West (Directory of 43 shops in the USA, in Europe {Germany 11, Austria 1, Belgium 2, Denmark 1, Finland 1, France 6, Ireland 1, Italy 3, Netherlands 4, Portugal 1, Spain 6, Switzerland 4, UK 9, Wales 1}, and 3 in Latin America {Brazil, Colombia, El Salvador, Guatemala, Mexico}). C. People and institutions connected with tofu. D. Table of equivalents. Bibliography. Glossary. Index. About the authors (autobiographical sketches; a photo shows Shurtleff and Aoyagi, and gives their address as New-Age Foods Study Center, 278-28 Higashi Oizumi, Nerima-ku, Tokyo, Japan 177). Sending tofu in the four directions.

pudding recipes include: Rice pudding with gô and apple (p. 76, incl. 2 cups soymilk). Tofu chawan-mushi (p. 147; Steamed egg-vegetable custard with tofu). Tofu fruit whips (p. 148). Tofu rice pudding (p. 150, incl. 1 cup soymilk). Tofu custard pudding (p. 152). Soymilk custard pudding (p. 208). Brown rice pudding (p. 208, with 2 cups soymilk). Soymilk chawan-mushi (p. 209). Chawan-mushi with yuba (p. 249).

Dessert recipes include: Tofu whipped cream or yogurt (p. 148; resembles a pudding or parfait). Tofu ice cream (p. 149, with chilled tofu, honey, vanilla extract and salt). Banana-tofu milkshake (p. 149). Tofu cream cheese dessert balls (p. 149). Tofu icing (for cake, p. 149). Tofu cheesecake (p. 150). Tofu-pineapple sherbet (p. 151). Also: Soymilk yogurt (cultured, p. 205). Healthy banana milkshake (p. 206). On p. 160 is a recipe for “Mock tuna salad with deep fried tofu.”

Note. This is the earliest French-language document

seen (Sept. 2013) that mentions soy cream cheese (p. 125), which it calls *Fromage à la crème au tofu*. Address: Soyinfo Center, P.O. Box 234, Lafayette, California 94549 USA. Phone: 925-283-2991.

3554. *Globe & Mail (Toronto, ONT, Canada)*. 2008. Veggie innovator breaking new ground [Yves Potvin and Garden Protein International]. March 26. *Eat Well*, p. 2. Special information supplement.

• **Summary:** A photo show Yves Potvin shopping in a grocery store. In 1988, Mr. Potvin invented the meatless wiener.

Note: This last statement is incorrect. The first meatless wiener (named “Meatless Wiener”) was introduced in 1944 by Battle Creek Food Co. in Michigan. By 1988 more than 115 different meatless wieners and sausages had been launched in the USA. The first tofu hot dog was “Weissman’s Original Tofu Sausage,” introduced in Nov. 1980 by the Vegetable Protein Co., Cambridge, Massachusetts. At least ten tofu hot dogs had been launched in the USA before 1988. These included: Tofu Links (Nov. 1981, by Soya Food Products, Cincinnati, Ohio). Light Links (July 1982, by Light Foods Inc., St. Louis, Missouri). Lightlife Meatless Tofu Pups (Sept. 1985, by Tempworks, Greenfield, Massachusetts).

3555. *Nutrition & Soja*. 2008. Soy: Die pflanzliche Alternative. Tofu, seitan, getreide [Soy: The plant-based alternative. Tofu, seitan, cereal grains (Leaflet)]. Revel, France. 3 panels each side. Each panel: 21 x 10 cm. [Ger]

• **Summary:** This stylish German-language color leaflet is from an early French soyfoods company. Front panel: For almost 25 years we have offered a complete line of heat and serve or ready to eat products based on tofu and seitan. They use only organic soybeans grown in southwest France.

The three inner panels start with a vertical cartoon showing how soybeans are made into soymilk and then tofu. From the soymilk comes four lines of eleven products: (1) Biosoy soymilk (aseptically packed) in natural, vanilla, and calcium-enriched flavors. (2) Biosoy desserts (Hazelnut, Vanilla, and Chocolate). (3) Biosoy drinks in Chocolate (2 sizes), Tchai, and Moka. (4) Biosoy creme (like cream but with fewer calories).

From the tofu comes two lines of eight products: (1) Tofinelle meatless sausages in Sesame & Curry, and Mushroom flavors. (2) Six types of *Croque Tofu* (Tofu Croquettes / Burgers) in Provencale, Garlic & Fines Herbes, Mushrooms, Sea Vegetables, Chop Suey, Curry and Poppseed.

Back left panel: Tofu: The highest form of nutrition. Unique plant protein, unsaturated fatty acids, essential fiber and minerals, virtues for good health. Back middle panel: The delicious art of eating vegetables. Croc’ Seitan (Indian Style). Cereal Grains: Grinioc Patties in Quinoa-Tomato,

Millet-Mushroom, or Rice, Delicate Vegetables & Saffron. [www.soy.tm.fr](http://www.soy.tm.fr). Address: Chemin de l’Horte, 31250 Revel (near Toulouse), France.

3556. **Product Name:** Tofurky ‘Foot Long’ Veggie Dogs.

**Manufacturer’s Name:** Turtle Island Foods, Inc.

**Manufacturer’s Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031.

**Date of Introduction:** 2008 March.

**Ingredients:** Water, vital wheat gluten, organic tofu puree (water, organic soybeans, magnesium chloride, calcium chloride), expeller pressed (non hexane extracted) isolated soy protein, expeller pressed non-GMO canola oil, spices, sea salt, onion powder, organic cane juice, pepper, natural vegetarian flavors, natural smoke flavor, maltodextrin, granulated garlic, xanthan gum, konjac flour (yam root). carrageenan, wheat starch, natural caramel color, annatto.

**Wt/Vol., Packaging, Price:** 14 oz (397 gm) vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** See next page. Leaflet (8½ by 11 inches, 1 panel each side, glossy color, front and back) sent by Patricia Smith from Natural Products Expo West at Anaheim. 2008. March. “Go beyond the bun. Tofurky ‘Foot Long’ Veggie Dogs. Going boldly where no vegetarian hot dog has gone before.” A photo of the hot dog and a ruler shows that the hot dog is actually about 10 inches long. But it does stick out far beyond both ends of a regular hot dog bun.

3557. *Garden Protein International*. 2008. *Lifestyle* (Website printout–part). [www.gardenprotein.com](http://www.gardenprotein.com) 7 p. Printed May 28.

• **Summary:** Tabs (across the top): Product info (Garden Beef or Garden Chicken). Product usage. Availability. Formats & flavors. Nutrient info. Contact us. “Gardein (TM)–the new vegetable protein. More than an ingredient, its a foundation.” E-mail: [wow@gardenprotein.com](mailto:wow@gardenprotein.com).

Talk with Seth Tibbott, founder and president of Turtle Island Foods, Inc. 2008. May 27. Yves Potvin has started a new company (after selling his original company to the Hain Celestial Group in June 2001) named Garden Protein International. He probably had to wait until his “noncompete agreement” had expired. He has worked with Solae and soy protein isolates to develop a new generation of extruded meat alternatives, with an excellent texture and flavor. Yves also has a second and newer website with the latest info on its products: [www.gardein.com](http://www.gardein.com).

Note: As of Nov. 2012, the name of the company is still Garden Protein International. Address: 12751 Bathgate Way, Vancouver (Richmond), BC, Canada V6V 1V5. Phone: 604-278-7300.

3558. *Garden Protein International*. 2008. *Gardein–Garden Grown Protein* (Website printout–part). [www.gardein.com](http://www.gardein.com) 12 p. Printed May 28.

• **Summary:** This is Garden Protein International's new website—much more interesting than their previous [www.gardenprotein.com](http://www.gardenprotein.com). At the heart of the new website is a superb color video (6 minutes, 26 seconds) of Yves Potvin telling the story of his life and work.

Tabs (across the top): About Gardein (TM): What is Gardein?, our story (color video), our philosophy, how Gardein is made, news. Our products: Retail, food service, feature product. Healthy eating (Go flexitarian). Recipes: Veggie chick'n, Veggie beef. Partners. Contact us: Directions, employment.

Sayings that change about every 8 seconds at top of every page in the website: "Never take your ego too seriously. Learn something new everyday. Try something new everyday. Do something new everyday. Love your family. Eat your veggies. Be part of something bigger than you. Help people. Feed your body and your body will feed you. What comes around goes around—do unto others as you would like to have done unto you. Do something kind for another being. In your own way, make a contribution to making the world a better place. Today is more important than tomorrow. Be thankful. Embrace change. Step back and recharge your batteries. Success is always learning. If you have the ability to learn, you have the ability to grow." These same sayings are also found (written) at About Gardein > Our philosophy.

Most of the homepage is devoted to still color graphics that appear to move. Inside of a rectangle 8½ inches wide and 3¼ inches high, three color photos, side by side, fade in (from left to right) then fade out. The photos include: A young lady doing yoga, another sitting in the cross legged position facing away toward the sea, many photos of Gardein in prepared dishes, a little girl blowing a round white head of milkweed seeds, a field of wheat, a girl leaping down onto the sand. This set of 3 takes about 12 seconds, and then is replaced by three more. After two sets of three photos the Gardein logo (green, red, and yellow) slowly moves into place, with the tagline "Garden grown protein" in black letters below it. The full cycle of 3 sets of 3 takes about 39 seconds.

The story of Yves life (told in the 2nd person): He was born in small town of Waterloo, Quebec, the fourth of a family of five. He enjoyed a typical French-Canadian childhood of hockey, school, and church. And from a very early age he loved independence. Following high school and a brief stint studying architectural design, he asked himself a true entrepreneurial question: "Is this really what I want to do for the rest of my life? The answer was very clear to me." So he left school, went traveling to South America, learned Spanish, and discovered the world. He returned a year later with a fresh perspective. He decided then to pursue his passion for food, so he enrolled in the school of culinary art. With his degree in hand, he started his first venture, a French nouvelle cuisine restaurant called *Le Bateleur* (the

magician). Two years later with the restaurant successful, he woke up one extremely cold Quebec morning and thought, "Gosh, Vancouver sure looks good!" So he followed the old saying "Go West young man." But always being wont to do it differently, he thought, *Mais oui!* Why not bicycle across Canada. The journey was an adventure to discover just what he was made of. He didn't know then that his future would be in Vancouver, and it would be there that he would find his spot in life. When he arrived in Vancouver he noticed that people were interested in health, fitness, and nutrition—just like him. But there was no healthy, convenient food in the marketplace. So he thought, "Why not create a healthy fast food," and *voila!* He was 28 years old and full of energy when he started Yves Fine Foods in Quebec. With \$5,000 from his own pocket, \$10,000 from family, and \$25,000 from a small business loan. "It was very much a one-man operation: Me, myself, and I." He worked seven days a week manufacturing, packaging, marketing, selling, and distributing. His first product was a Veggie Dog. Initial production: 17 cases. Unfortunately, another 19 cases went to waste—not a great beginning. "I've always said, its okay to make a mistake, but in order to stay in business, learn and don't repeat them." The company started to take off and over the next 13 years it experienced an average growth of 50% per year. In that time we built a state of the art, 60,000 square foot facility and increased our distribution across 7,000 supermarkets in North America, Europe, and Asia. Their product line had grown to include 20 different items. Along the way, the company was fortunate to receive many national and international awards for entrepreneurship, export excellence, and product innovation. By the spring of 2001 the meatless market had changed drastically. Multinationals were buying up private companies left and right. In life, timing is everything. So Yves decided to sell to the Hain Celestial Group, a publicly traded company on the Nasdaq. It was time to recharge his batteries. Over the next year he spent quality time with his young family and traveled the world. The time off allowed him to reflect on the challenge our society is facing. Fast food epidemic, factory farming, and major population growth were placing our environment at risk. It was then that he decided to pursue an idea that he had long ago—to develop an ingredient made entirely of vegetable and grain sources, but which had the same taste and texture of premium lean meat or fish. So in 2003 he founded Garden Protein International. For the next two years he spent a great deal of money and time creating this new protein that was named Gardein (pronounced gar-DEEN)—a mixture of the words "garden" and "protein." Today GPI is a rapidly growing, award winning company, selling across North America, the UK, and Japan. Their strategy has three pillars: Private label, foodservice, and their own retail brand—all made with their proprietary ingredient Gardein. So why is he not at the beach enjoying life or playing golf every day. "Well, to be honest, the main reason is that I love

what I do. I think this is the right food at the right time. In my own way, I can make a small contribution to make this world a better place. *Pourquoi pas?* [Why not?]. And you know—I'm not the only one that believes in the potential of our vegetable resources. Take it from someone a bit smarter than me." There follows a color photo of Albert Einstein with a quotation by him in support of vegetarianism. Address: 12751 Bathgate Way, Vancouver (Richmond), BC, Canada V6V 1V5. Phone: 604-278-7300.

**3559. Product Name:** Viana Veggie Turkish Roast, Viana Veggie Gyros, Viana Cowgirl Veggie Steaks, Viana Mediterranean Veggie Sausages, (Non-Dairy, Vegan).  
**Manufacturer's Name:** Tofutown North America (Importer / Marketer). Made in Germany by Tofutown.com.  
**Manufacturer's Address:** P.O. Box 1186, Charlottesville, Virginia 22902. Phone: www.viana-usa.com.  
**Date of Introduction:** 2008 May.  
**Ingredients:** Viana Veggie Turkish Roast: Water, Tofu\*

(soybeans, water, nigari), wheat protein\*, sunflower oil\*, roasted onion (onions, palm oil, wheat flour, salt), soy sauce\* (water, soybeans\*, sea salt, wheat\*), spices, sea salt, raw cane sugar, tomato paste, locust bean gum, herbs, yeast. \* = Certified USDA Organic.

**Wt/Vol., Packaging, Price:** 7.05 oz (200 gm).

**How Stored:** Refrigerated.

**New Product–Documentation:** One sample of each (product with Label) with sales sheet and business card sent by Jon Kessler, Sales and Marketing Director, Tofutown North America. 2012. July 30. Front panel of Veggie Turkish Roast: Color photo of product ready to eat. USDA Organic. "Listen to your heart. 0% cholesterol. GMO free. Gourmet vegan meat alternatives. Heat and serve!"

Inside each paperboard box is the brown, often amorphous product vacuum-packed in thick plastic film. Letter (e-mail) from Jon Kessler. 2012. Aug. 10. Gives the date each product was first sold commercially. The labels were changed to the present more American and less European labels in April 2012.

**3560. Product Name:** Eating Right [Lightly Seasoned Veggie Chicken Breasts, Lightly Seasoned Veggie Chicken Strips, Lightly Seasoned Veggie Veggie Beef Strips, Veggie Chicken Breast in Tomato Basil Sauce].

**Manufacturer's Name:** Garden Protein International Inc.  
**Manufacturer's Address:** 12751 Bathgate Way, Richmond (near Vancouver), BC V6V 1Y5, Canada. Phone: 604-278-7300.

**Date of Introduction:** 2008 June.

**Ingredients:** Chicken breasts: Water, soy protein, wheat protein, natural flavors, modified cellulose, potato starch, canola oil, spices, pea protein, carrot, organic beet root fibre, organic evaporated cane juice, yeast extract, sea salt + vitamins and minerals.

**Wt/Vol., Packaging, Price:** 200 to 300 gm.

**How Stored:** Refrigerated.

**New Product–Documentation:** Packages sent by Yves Potvin of GPI. 2008. Oct. 28. Paperboard box. 5 by 6.5 by 1.5 inches. Green, blue, red, black and yellow on white. "Prepared for Lucerne Foods, Calgary, Alberta T2P 2J6, Canada." On the back panel are Nutrition Facts, ingredients list and recipe ideas. On the lower back panel is the logo of the manufacturer, Garden Protein International Inc. (in English and French) on a light green background: "Made with Gardein. Garden grown protein. www.gardein.com. Gardein is a registered trademark of Garden Protein International Inc."

**3561. Product Name:** Tesco Meat Free: 2 Chicken-style fillets.

**Manufacturer's Name:** Tesco Stores Ltd. (Retailer).

**Manufacturer's Address:** Chestnut EN8 9SL, UK.

**Date of Introduction:** 2008 June.

**Ingredients:** Rehydrated soy protein (33%), rehydrated wheat protein (33%), natural flavouring, stabiliser (methyl cellulose), red pepper flakes, yeast extract, beetroot fibre, onion powder, spices (black pepper), parsley, garlic powder, salt, cane sugar, vegetable oil, potato starch, white sugar, wheat flour, sage, pea protein, carrot fibre, white pepper, celery seed, smoke flavouring, pepper extract, sage extract.  
**Wt/Vol., Packaging, Price:** 200 gm. Paperboard box.

**How Stored:** Refrigerated.

**New Product–Documentation:** Packages sent by Yves Potvin of GPI. 2008. Oct. 28. Paperboard box. 6 by 5.75 by 1.25 inches. Pea green, orange, and black on white. “Produced in the U.K. for Tesco Stores Ltd., Chestnut, UK. On one side panel is the logo of Garden Protein International Inc. (Richmond, BC, Canada): “Made with Gardein. Farm grown protein.” A color photo on the front panel shows a Chicken Fillet sliced open, surrounded by veggies on a white plate. On the front panel: “A lightly seasoned blend of soya and wheat gluten, dusted with herbs. Low in saturates. A good source of fibre. No artificial preservatives, flavours or colours. A round logo says “Super Foods.” On the back panel are Nutrition Facts, ingredients list and recipe ideas. Note: Tesco is a leading supermarket chain in the UK.

3562. **Product Name:** Trader Joe's Chicken-Less Strips, Beef-Less Strips.

**Manufacturer's Name:** Trader Joe's (Marketer-Distributor).

**Manufacturer's Address:** Monrovia, CA 91016.

**Date of Introduction:** 2008 June.

**Ingredients:** Chicken-less: Water, isolated soy protein, vital wheat gluten, natural flavors, expeller pressed canola oil, organic evaporated cane juice [sugar], spices, yeast extract, sea salt, garlic powder, onion powder, red bell pepper flakes, parsley flakes, pea protein, carrot fiber, sunflower oil.

**Wt/Vol., Packaging, Price:** 8 oz (227 gm) in plastic bag. Retail for \$2.99 at Trader Joe's (2008/07, Lafayette, California).

**How Stored:** Refrigerated.

**Nutrition:** Chicken-less: Per 76 gm. (about 9 strips): Calories 110, calories from fat 15, total fat 1.5 gm (2% daily value; saturated fat 0 gm), cholesterol 0 mg, sodium 330 mg (14%), total carbohydrate 3 gm (dietary fiber 1 gm [4%], sugars 1 gm), protein 20 gm (40%). Vitamin A 6%, calcium

4%, vitamin C 2%, iron 35%. Percent daily values are based on a 2,000 calorie diet.

**New Product–Documentation:** Product (Chicken-less) with Label purchased at Trader Joe's in Lafayette, California. 2008. July 6. Paperboard box is 5 by 6½ by 1½ inches deep. Light blue, light green, white and black. Large color photo of product with fried vegetables on front panel. Front panel text: “Heat & serve. Ready in 2 minutes. Lightly seasoned.” Heart healthy logo and Vegan logo. On back panel are nutrition facts and ingredients. For best flavor, saute on stove for 2-3 minutes.

Soyfoods Center taste test. 2008. July 7-8. Good flavor, appearance, and label design; excellent texture. This extruded product contains too much protein for our taste if eaten by itself, but is nice if used as an ingredient. Note: The main ingredient is Gardein, made by Garden Protein International (GPI) (Richmond, BC, Canada). However, neither Gardein nor GPI are mentioned on the product. Two packages sent by Yves Potvin of GPI. 2008. Oct. 28.

3563. Crowe, Jerry. 2008. Half of baseball buys into veggie dogs. *Los Angeles Times*. July 22.

• **Summary:** About Johanna McCloy and her work to make veggie dogs available at all major league baseball ballparks. A photo shows McCloy holding up two veggie dogs at AT&T Park during a San Francisco Giants baseball game.

3564. Law, Bridget Murray. 2008. More joy for soy. *Diabetes Forecast* 61(7):19. July.

• **Summary:** Describes how tofu, edamame, and soy burgers are not only “trendy good-for-you foods” but also beneficial to those with type 2 diabetes, as they are good for the heart and kidneys.

3565. **Product Name:** Humboldt Organic–Vegan Sloppy Joe.

**Manufacturer’s Name:** Tofu Shop Specialty Foods Inc.

**Manufacturer’s Address:** 65 Frank Martin Court, Arcata, CA 95521. Phone: 707-822-7401.

**Date of Introduction:** 2008 August.

**Wt/Vol., Packaging, Price:** 12 oz (339 gm).

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Matthew Schmit. 2009. March 18. Self adhesive. 3.5 inches diameter. Red, yellow, blue, and black. An illustration (black on blue) at top of label shows a small tofu shop, with an Oriental-style roof, on stilts atop a small island, with a wind-blown tree arching over its roof. Text: “Healthy. Hearty. Easy to serve. Cholesterol free. Low in saturated fat. Great for tacos, chili, spaghetti, casseroles, burgers, or chips. Perishable–Keep refrigerated.”

3566. **Product Name:** Cassington’s [2 beef-style peppered steaks, 2 chicken style fillets in a tomato & herb marinade].

**Manufacturer’s Name:** Cassington’s Food Co. (Retailer).

**Manufacturer’s Address:** Dale House, Leeming Bar, Northallerton, North Yorkshire DL7 9UL. Phone: 0800 84 4776.

**Date of Introduction:** 2008 September.

**Ingredients:** Peppered steaks: Rehydrated wheat protein (43%), rehydrated soya protein (31%), peppercorn marinade (12%) [contains water, sugar, vinegar, garlic puree, onion, bell peppers, salt, yeast extract, corn flour, black pepper, pink peppercorns, thickening agent, pectin], natural flavourings, stabiliser (methyl cellulose), potato starch, barley malt extract, onion powder, cane sugar, pea protein, carrot fibre.

**Wt/Vol., Packaging, Price:** 200 gm. Paperboard box.

**How Stored:** Frozen.

**New Product–Documentation:** Packages sent by Yves Potvin of GPI. 2008. Oct. 28. Paperboard box. 5.75 by 5.75 by 1.125 inches. For peppered steaks: Golden brown, red, yellow, black, and light blue on white. On the upper front panel is the logo of Garden Protein International Inc.

(Richmond, BC, Canada): “Made with Gardein. Farm grown protein.” A color photo on the front panel shows a Peppered Steak surrounded by lettuce and veggies on a white plate.

On the front panel: “Meat free steaks made from a blend of beans, grains and vegetables. Less than 3% fat. 194 calories per portion. Vegetarian (logo). A passion for Healthier eating.” On the back panel are Nutrition Facts, ingredients list and recipe ideas.

3567. **Product Name:** Cassington’s beef-style meatballs.

**Manufacturer’s Name:** Cassington’s Food Co. (Retailer).

**Manufacturer’s Address:** Dale House, Leeming Bar, Northallerton, North Yorkshire DL7 9UL. Phone: 0800 84 4776.

**Date of Introduction:** 2008 September.

**Ingredients:** Rehydrated wheat protein (43%), rehydrated soya protein (32%), vegetable oil, onion, sugar, natural flavouring, tomato puree, stabiliser (methyl cellulose), salt, sugar, maize starch, chili powder, garlic powder, potato starch, yeast extract, barley malt extract, onion powder cane sugar, garlic puree, tomato puree, herbs [basil, marjoram, oregano, thyme], black pepper, pea protein, carrot fibre, cumin.

**Wt/Vol., Packaging, Price:** 300 gm. plastic foil pouch.

**How Stored:** Frozen.

**New Product–Documentation:** Packages sent by Yves Potvin of GPI. 2008. Oct. 28. Plastic foil pouch. 8.75 by 8.5 inches. Golden brown, red, yellow, black, and light blue on white. On the upper front panel (and on the back panel) is the logo of Garden Protein International Inc. (Richmond, BC, Canada): “Made with Gardein. Farm grown protein.” Two color photos on the front panel show (1) Two kids running down a hill with their dad. (2) Meatless meatballs with sauce on spaghetti, on a white plate. On the front panel: “Meat balls made from a blend of beans, grains and vegetables. Less than 4% fat. 123 calories per portion. Vegetarian society approved (logo). A passion for Healthier eating.” On the back panel are Nutrition Facts, ingredients list and recipe ideas.

3568. Potvin, Yves. 2008. The basic business model of Garden Protein International, Inc. (GPI) (Interview). *SoyaScan Notes*. Oct. 7. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** GPI’s main product is Gardein (TM, pronounced gar-DEEN, derived from Garden + protein). In his previous business, Yves Veggie Cuisine, Yves was a retail brand manufacturer. He manufactured everything he sold, and built a brand. Then he realized in 1998, when he developed this new proprietary process, Gardein, that he is now an ingredient manufacturer. That was one reason he sold his former business, but also because his present business is very capital intensive, so he needed more money to get it started.

Many different formulas / recipes are used to make

Gardein; its both an art and a science—and constantly evolving with new R&D. All the formulas have much in common (all are meatless. The main ingredients are wheat gluten and soy protein), but each one is different—and thus custom designed—to suit each individual product application. Yves works closely with a chef (and he is also a trained chef with many years of experience) to develop the best possible formula for each application. The product behaves differently with different sauces (when its a low pH sauce they must start with a softer product. The protein in Gardein reacts to a dairy-based sauce much differently from the way it reacts to a tomato sauce). They have recently started to add new grain ingredients such as quinoa, kamut, amaranth, etc. to give new and interesting textures, and to increase the percentage of grain in the product. In Canada Gardein must be fortified to makes its nutritional value equal to or better than that of the meat product it is designed to replace; this is not required in the USA. The strips that they make for Trader Joe's are simply the raw material (plain Gardein), whereas the Chick'n Breasts they make for Costco are carefully formulated and formed to make a second generation product. GPI has no list of all the different types of Gardein. Rather, each company tells GPI the application, and GPI develops Gardein specifically for that product; no two are the same.

Gardein is always sold in a moist form (62-65% moisture, very much like that of meat)—never dry.

GPI sells Gardein either refrigerated or frozen—to keep it fresh. Any product sold refrigerated must be pasteurized first, which creates a whole new manufacturing cycle. Gardein is still much more difficult to process and handle than meat—for example. Most retailers buy it refrigerated, but most of the bulk product (shipped overseas or to foodservice) is sold frozen as to Cysco, Kellogg, Loblaw.

In 2005, after two years of solely R&D, Yves started to sell Gardein; his first customer was the Kellogg Co., which was already selling a line of meat alternatives under their Morningstar Farms brand. This began even before sales in bulk to foodservice.

Yves' basic strategy is to sell the ingredient (Gardein) to food product manufacturers, but they are required by a license agreement to put the Gardein logo on the label. The agreement specifies very precisely the size and location of the logo, how the ingredients are to be listed, etc. and the fact that the buyer cannot mix Gardein with meat.

But GPI also sells Gardein in four other ways: (2) Private label, as when they sell to Kellogg's, Loblaw's, President's Choice or Trader Joe's. Each of these customers also signs a licensing agreement. GPI and the customer work together to design and name the product and ingredients. Many private label customers (such as Kellogg and Trader Joe's) design their own package / label—but this can be frustrating sometimes, as when Yves can see that a poor package design will hurt sales of the product. The customer then sends its packages to GPI in Vancouver (actually in

Richmond, BC, a suburb of Vancouver) where GPI packages its product.

(3) Control label, as for very large customers such as Costco, under the name Garden Goodness. The Gardein logo appears prominently on both the front (lower right corner) and the back (bottom center) of the attractive box. GPI owns the brand "Garden Goodness." Costco asks GPI to develop the product and to design the package; Costco has to approve of both, but they do not get involved in the details. Costco is happy because no other company has that Garden Goodness brand, and GPI is happy because it is their own label and their Gardein brand prominently displayed. "It is a win-win situation." Presently GPI makes only one SKU for Costco—"6 Veggie Chick'n Breasts," but they are about to launch several new items with Costco. GPI has already made the presentation and Costco liked the ideas.

(4) Under its own label, using the "It's All Good" brand. Initially Yves had no intention of going back into the retail business, because its very painful. But as he was trying to work with his previous company (Yves Veggie Cuisine), they kept saying it was too complicated, etc. So he realized he could use his own brand to do basic R&D. For example, in Canada he has tried selling "Its All Good in the meat section, the deli section, and the produce section of food stores. From this experiment, he has learned where it sells best, and he can share this valuable information with his customers that buy Gardein. He has also learned which product types and names sell best, what's the price point, etc. And he gets lots of consumer feedback about those products. Customers such as Trader Joe's, Costco, and Safeway in Canada always want the best seller in the It's All Good" line. Yves always changes the product name slightly, as from "Tuscan Tomato" to "Basil Tomato." A new product Yves is developing to sell under his own label is a stuffed product (like a stuffed chicken), which is Gardein stuffed with black beans (frijoles) and corn; the package has a tomato sauce inside. GPI uses a broker (who is paid 5%) to get these products into the retail market. In addition, GPI has its own sales force (1 person each in Ohio, New Jersey, and Toronto, and 3 in Vancouver). One guy is responsible for private label, one for the club business, etc. Next Wednesday they will make a presentation at Safeway headquarters; GPI wants to launch the "It's All Good" line with Safeway in the U.S. The week after that they go to Kroger headquarters, then the next week to Publics. Yves attends the most important presentations, which causes him to travel a lot.

Yves is also in the process of raising some money to finance that growth; he projects sales to double in the next 24 months. Currently Yves owns all the shares in GPI Inc. He's basically looking for one venture capitalist who will invest about \$1 million in exchange for 10% of the business—just enough to go to the next level. He hopes to find a person who understands his vision and wants to be part of the journey. Yves believes this can be a \$1 billion company.

Yves believes that he GPI must be strong in its own backyard before it tries to conquer the world. So his initial focus has been on Vancouver, British Columbia, and Canada (with 30 million population). His products are all over Canada, with 80% distribution. “But the big market for us is really the U.S.” Right now, about 40-50% of his sales are in the USA and 10% in the UK, but in 1-2 years he expects that figure to rise to 70%.

GPI presently has two manufacturing sites in Vancouver, located 5 minutes apart; the second facility is leased, 20,000 square feet, and houses all the sales and marketing. One is the distribution center where all products are shipped fresh, refrigerated. The other site makes products that are sold frozen. As soon as every batch of product is made, it is frozen to keep it fresh. Within the next 2-3 years Yves expects to have one plant in the USA and one in Europe, then one in Asia within 5 years. The product has tremendous global potential. Yves is fortunate to have already started one business, and to have already had so much business experience. This makes the growth go much faster, but it is still painful—yet he wouldn’t want to be doing anything else. Yves is married and has two kids. He feels that raising a family and growing a business are quite similar.

(3) GPI sells Gardein (as an ingredient, frozen, by the container) to a customer, such as Tesco or Grassington’s Food Co. in the UK, which has the product developed and produced, and packaged. Of course they also sign GPI’s licensing agreement as described above. In this case the Gardein logo and text must appear in the lower right corner of the front panel: “Made with Gardein (TM). Farm grown protein.” UK customers have (so far) asked for GPI’s opinion on their package design, and GPI always gives an honest opinion. A new brand in the UK will be “Pick of the Crop.”

(4) Food Service Products started with Whole Foods Market in Los Angeles, California, but are now sold to delis, restaurants, schools, catering companies, cafeterias, hospitals, etc. and go mostly through a distributor (such as CANA, UNFI, or Cysco Corp.), unless a company has large enough volume to go direct. GPI’s main foodservice customer at present is Whole Foods, which sells Gardein in their deli and displays the Gardein logo prominently on the deli case. When a product is sold to foodservice, GPI realizes that this product will be served in a wide variety of ways (salads, sandwiches, fajitas, in a sauce, etc.), so it must be designed with that flexibility in mind. Moreover, the product must keep its good texture and flavor whether it is eaten hot or cold. As of Oct. 2008 the following products were available to food service: Chicken Cubes, Chicken Strips, Beef Strips, Chicken Breasts (nonbreaded), Beef Burger, Chicken fillets (non-breaded or breaded), and a seasonal Stuffed Turkey.

3569. *SoyaScan Notes*. 2008. When was the first meat alternative turkey created? (Overview). Oct. 7. Compiled by

William Shurtleff of Soyinfo Center.

• **Summary:** We will the answer into two parts: (1) When was meatless turkey first served? That turkey was almost surely made from meat alternatives such as Protose, Nuttolene, and Nut Food—all made by the Sanitas Nut Food Co. of Battle Creek, Michigan. The earliest references for that are:

1895 Dec. 29 Chicago Daily Tribune. Vegetarian society Thanksgiving.

1899. Guide for Cookery, by Almeda Lambert (SDA—Seventh-day Adventist).

1904. Vegetarian Cook Book: Substitutes for Flesh Foods, by Edwin Giles Fulton (SDA).

(2) When was the first commercial meatless turkey first launched?

1968. Loma Linda Foods, Riverside, California. Loma Linda Canned Meatless Slices—Turkey-Like Slices. (SDA).

1968. Loma Linda Luncheon Slices—Smoked Turkey Flavor (SDA).

1968. Worthington Foods, Worthington, Ohio. Holiday Roast (Meatless Turkey-like product based on spun soy protein fibers) (SDA).

So 1968 was the “anno mirabilis” or “miracle year” for commercial meatless turkeys, just as a growing number of young vegetarian hippies were looking for something to eat at Thanksgiving and Christmas. Markets rarely fail to met a budding new demand!

3570. *Restaurant Hospitality*. 2008. Serving up soy. 92(10):62. Oct.

• **Summary:** Describes a survey conducted by the United Soybean Board in which veggie burgers, tofu, soymilk, and edamame were the top soyfoods preferred by consumers and one in five consumers said they would order soyfoods from restaurant menus. To “demonstrate the versatility of soy,” contains recipes for Edamame-tofu croquettes and Tofu gratin.

3571. **Product Name:** Soy Nuggets.

**Manufacturer’s Name:** Trader Joe’s (Marketer-Distributor).

**Manufacturer’s Address:** South Pasadena, CA 91031.

**Date of Introduction:** 2008 October.

**Ingredients:** Water, textured soy protein, soy protein isolate, rice starch, spices, toasted onion, salt, sea salt, dehydrated celery, garlic powder, carrageenan, maltodextrin. Battered with: Water, yellow corn flour, corn starch, sea salt, spices, (stabilizer), sea salt, spices, expeller pressed canola oil. Breaded with: Organic unbleached stone ground whole wheat flour, yeast, sea salt, barley malt extract.

**Wt/Vol., Packaging, Price:** 16 oz (454 gm) in sealed plastic bag inside paperboard box. Retail for \$2.99 at Trader Joe’s (2008/10, Lafayette, California).

**How Stored:** Frozen.

**New Product–Documentation:** Product with Label purchased at Trader Joe's in Lafayette, California. 2008. Oct. 19. 8 by 5¼ by 2¼ 5 inches paperboard box. Black, white, red and green on yellow. A large color photo shows the Nuggets on lettuce leaves, all on a white background. Circular logo: "All natural: Fully cooked." On the back panel are Nutrition Facts, ingredients, and heating instructions (conventional oven. range top, or microwave). Soyfoods Center taste test. Very good flavor (especially the coating), excellent appearance, fairly good texture.

3572. **Product Name:** [Alpro Soya Breaded Filets].

**Foreign Name:** Alpro Soya Filets Panés.

**Manufacturer's Name:** Alpro NV.

**Manufacturer's Address:** Vlamingstraat 28, B-8560 Belgium.

**Date of Introduction:** 2008 November.

**Wt/Vol., Packaging, Price:** 2 x 85 gm = 170 gm in paperboard sleeve. Price: 2.45 euros.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Sjon Welters from the Netherlands. 2008. Nov. 15. Front panel: Color photo of a filet surrounded by veggies.

3573. **Product Name:** [Taifun Demeter Tofu Fillets (Japanese-style)].

**Foreign Name:** Taifun Demeter Tofu-filets (Japans Aard).

**Manufacturer's Name:** Life Food GmbH.

**Manufacturer's Address:** D-79108 Freiburg, Germany. Phone: (+49) 761-15210-0.

**Date of Introduction:** 2008 November.

**Ingredients:** Tofu 97% (water, \*soybeans, coagulants: nigari {magnesium chloride}, calcium sulfate), \*vegetable bouillon (sea salt, yeast extract, potato flour, \*leek, \*carrots, \*sunflower seed oil, \*mace (from nutmeg), \*parsley, \*celery), lemon juice, \* sunflower seed oil.

**Wt/Vol., Packaging, Price:** 160 gm vacuum pack with 2 pockets.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Sjon Welters from the Netherlands. 2008. Nov. 15. Orange, green and black on beige. Full color photo of two tofu filets [cutlets] in a skillet with veggies. 100% from plants. Preparation tip.

3574. **Product Name:** [Healthy Planet Knacks–Hearty Smoked Sausages].

**Foreign Name:** Healthy Planet Knacks.

**Manufacturer's Name:** Udea BV.

**Manufacturer's Address:** Postbus 244, 5460 AE Veghel, Netherlands.

**Date of Introduction:** 2008 November.

**Ingredients:** Tofu\* (water, soybeans\*, nigari) (38%),

water, wheat protein\* (22%), sunflower oil\*, spices\*, sea salt, raw cane sugar\*, thickener, carob powder, celeriac. \* = organically grown.

**Wt/Vol., Packaging, Price:** 7 pieces. Price: 3.35 euros.

**New Product–Documentation:** Label sent by Sjon Welter from the Netherlands. 2008. Nov. 15. Front panel: Color photo of a long “hot dog” in a hot dog bun, with lettuce, mustard, pickles, etc. on a white plate: Text: “The world of tasty convenience products.” Paperboard sleeve is 10 by 18 by 3.5 cm. Red, black, orange, and white. www.udea.com.

3575. **Product Name:** [Oriental Mild Burger: Middle Eastern Tofu Snack].

**Manufacturer’s Name:** Viana Naturkost GmbH.

**Manufacturer’s Address:** D-54578 TofuTown Wiesbaum, Germany. Phone: +496593 9967-0. Fax: 6593 9967-225.

**Date of Introduction:** 2008 November.

**Ingredients:** Tofu (water, soy beans\*, nigari) (20%), water, wheat protein\* (15%), chick peas\* (14%), carrots\*, spanish onions\*, sunflower oil\*. sea salt, spices\*, rolled oats\*, yeast extract, rice flour\*, palm butter\*. \* = organically grown. flour\*, cane sugar\* (0.4%), herbs\*. \* = Organically grown.

**Wt/Vol., Packaging, Price:** 200 gm vacuum pack in paperboard sleeve. Retail for 2.39 euros (Nov. 2008).

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Sjon Welter from the Netherlands. 2008. Nov. 15. Paperboard sleeve is 9 by 13.5 by 1.75 cm. Red, black, orange, and blue on beige. Front panel: A full-color photo shows the tofu burger between buns. “2 burgers. 2 minutes. 100% vegetal. 0% cholesterol. Bio soya power / Bio organic. Try it cold too.” Rear panel: “Tofuism No. 17. Earth to mankind: Take global warming seriously. Stop eating animals... Made with pure volcanic Eifel water. Good source of soy protein. Suitable for vegetarians and vegans. www.viana.com.”

3576. Hurd, Frank J.; Hurd, Rosalie. 2008. A good cook—Ten talents. New updated, expanded pictorial ed. Grants Pass, Oregon: Published by the authors. Printed by The College Press, Collegedale, Tennessee 37315. 668 p. Illust. Color plates. No index. 22 x 15 cm. Spiral bound. [1 ref]

• **Summary:** A feast for the eyes, the mind, and the palate. Filled with more than 1,300 beautiful color photos; many of them accompany over 1,000 healthful, natural recipes, but others show the great variety of natural foods, from colorful fruits to basic whole grains. Brimming with sound advice on diet, lifestyle, and health.

This is the new edition of a very important, pioneering, indeed classic American vegan cookbook. On the front and back covers is an idyllic painting of the Garden of Eden. Author Rosalie Hurd is seated under The Tree, reading the Bible—Genesis 1:29, which describes God’s original diet for men and women. The book uses no animal products (except in one chapter at the end titled “Recipes Using Milk

and Eggs,” “for those who are in the transitional period. However, we encourage all those who still cling to milk and eggs to become acquainted with the facts concerning their use, and become weaned through this process”). Some recipes also use honey.

Contains even more innovative soy recipes than the original 1968 edition. A minor point: some of the soy terminology is inconsistent and/or outdated. Address: 1. D.C. [Doctor of Chiropractic], M.D.; 2. B.S. Both: P.O. Box 5209, Grants Pass, Oregon 97527. Phone: 541-472-1113.

3577. Atlas, Nava. 2008. Vegan express. New York, NY: Broadway Books. viii + 247 p. + 8 unnumbered pages of plates. Foreword by Neil Barnard, M.D. Illust. (some color). Index. 23 x 20 cm.

• **Summary:** On the cover: “Featuring 160 recipes for quick, delicious and healthy meals.” Chapter 2 is titled: “The protein trio: tofu, tempeh, seitan.” This book contains: About 37 recipes using tofu (she says, for example, “Cut each block of tofu into six slabs”). 10 recipes using seitan. 9 recipes using vegan cheese. 9 recipes using tempeh. 5 recipes using Tofurky sausage. 4 recipes using miso. 3 recipes using edamame. Address: Hudson Valley, New York.

3578. Fiore, Toni. 2008. Totally vegetarian: easy, fast, comforting food for every kind of vegetarian. Philadelphia, Pennsylvania: Da Capo / Life Long. xi + 273 p. + 16 pages of unnumbered plates. Illust. (some color). Index. 24 cm.

• **Summary:** A mostly vegan cookbook; each recipe that calls for milk as an ingredient gives soy milk as an alternative. Rarely, if ever, have we seen such a dazzling and delicious variety of vegetarian soy recipes and information in one book. One purpose of this book is to demystify the world of vegetarian cookery and vegetarianism—especially for non-vegetarians.

The Introduction tells the story of the author’s gradual transition from typical meat eater (living in Europe), to animal rights activist in Maine, to vegetarian. She advises: Buy locally, eat seasonally, buy organic, use your intuition (and imagination).

The chapter “Stocking the pantry” contains basic information (p. 39-42, 45-46) about sea vegetables, seitan, and soy products, including edamame, miso, tempeh, textured vegetable protein (TVP), tofu, and soy sauce (Light Chinese soy sauce, shoyu, and tamari), and Worcestershire sauce (vegetarian; without anchovies)

Soy related: Golden tofu bites (with one 14-ounce package firm tofu, frozen, then thawed... p. 50). Red pepper tofu dip (p. 67). Vegetarian Caesar salad (with “silken soft tofu, p. 76). Edamame and apple salad (p. 81; kids love edamame). Boiled edamame pods. Curried lima bean and rice salad with tempeh (p. 92). Tofu lime dressing (with silken tofu, p. 102). Spinach and tofu soup (p. 108). Miso soup. Hot and sour soup (with firm tofu, p. 109). Roasted

pumpkin bisque (with soy milk, p. 114). Corn bread (with soy milk, p. 130).

One chapter is titled “Tofu” (p. 145-53): Seared tofu. Tofu sour cream. Baked tofu meatballs. Tofu with parsley sauce. Tofu kebabs with tamari-ginger sauce. Tofu pot pie.

The next chapter is “Tempeh and seitan” (p. 155-69): Best braised tempeh (with sweet and spicy marinade, p. 197). Tamari tempeh. Barbequed tempeh. Jamaican jerk tempeh. Malaysian curried tempeh. Greek stuffed cabbage (with lemon cream sauce and tempeh). Tempeh and cabbage. Moroccan stew. Tempeh cacciatore. Tempeh fajitas. Tempeh marsala. Homemade seitan (from bulk vital wheat gluten). Penne with onions and vegetarian bacon (p. 175). Spaghetti tofunese (p. 176). Tofu ravioli with butter and sage (p. 181-82). Bechamel (with soy milk, p. 184). Tofu lasagna (p. 185-86). Vegetable lasagna (with tofu filling, p. 187). No-egg salad sandwiches (with tofu). Mock fish salad sandwiches (with tempeh). Mock Maryland crab cakes (with tofu, p. 196). Tempeh club sandwiches (p. 197). Cornhusker’s reubens (with tempeh, p. 198). New York hot dogs and onions (with vegetarian hot dogs, p. 199). Soysage-pepper sandwiches (with Italian-style vegetarian sausage links, p. 200). Eggplant meatballs (with tofu, p. 214). Stuffed sugar pumpkins (with tempeh, p. 215). Fluffy mashed potatoes (with soy milk, p. 219). Spinach tortillas with potatoes (and seitan, p. 228). Pfannkuchen (with soy milk, p. 239). Rye bread French toast (with soy milk, p. 240). Loaded bagel (with tofu cream cheese, p. 243). Tofu cannoli (p. 250). Tofu coconut cream pie (like a cheesecake, p. 251). Basmati rice pudding (with soy milk, p. 252). Banana chocolate chip cake (with soy milk, p. 256).

About the author: “A vegetarian for over 20 years, Fiore is a self-taught chef who first embraced Mediterranean culinary techniques and philosophy while growing up in Italy.” But she spent the first six years of her life in Germany. Address: Portland, Maine. Host of the national public television show Delicious TV’s Totally Vegetarian.

3579. Schmit, Matthew. 2009. New developments at The Tofu Shop (Interview). *SoyaScan Notes*. March 6. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** On 1 Jan. 2002 Matthew opened for business again after moving The Tofu Shop out of the food incubator (at 100 Ericson Ct., Suite 150, Arcata, California 95521) into the first building he had ever owned at 65 Frank Martin Court, Arcata 95521.

The people who used to make Tofu Turkey stopped the fall of 2008; they were splitting up and the restaurant got caught up in the legal battle. In the fall of 2008, The Tofu Shop made a fledgling effort to start making these product again, but they made the decision so late that they were unable to refine the recipe as they had wished so they could really market the product. The Tofu Shop made several dozen Tofu Turkeys, sold some to old friends, and

provided other for the community dinner. It was not really a commercial product in fall 2008, but is now definitely at the top of Matthew’s list for 2009.

Matthew is still very much involved in his business on a daily basis. He is not currently involved in the actual production; he helps his local delivery driver prepare shipments to be sure they arrive fresh and in good condition. He helps to supervise and coordinates the preparation schedules. About 80% of the company’s sales are in Humboldt County; most of the rest are to the south. As a specialty foods company, they have quite a complex production process. They make 18 batches, of 60 lbs. of tofu each. About 1/3 of those batches are made into regular 1-lb. blocks of tofu. All the rest are treated differently. Some are pressed with greater pressure for a longer time to give extra-firm tofu for certain customers. For others, seasonings and spices are stirred into the curds before they are pressed to make International Spice Tofu. Matthew will send dated labels for the four new products launched since 2002, and he relabeled and slightly changed the names of three earlier products.

The food incubator (25,000 square feet) attracted economic development groups and celebrities from all over the world. The basic concept was very interesting, and Matthew invested 12 years of hard work into the project, but in the end it did not work out as originally conceived—a vehicle to help small food manufacturers get into an equity ownership position in their own facilities; that was combined with the older business incubator concept, which would provide basic services and facilitate the growth of each business. Each business was to own its part of the incubator—quite like a condominium. Cindy Copple, executive director of AEDC, put the two ideas together to create the new idea of a non-graduating incubator. It had a large central warehouse, common restrooms and a development kitchen, water, electricity, drainage, etc. At the last minute, the “equity” language was excluded from the written agreements, but with the verbal understanding that nothing had changed. The ten companies all moved in during the same week; very exciting. But instead of the vision, the AEDC just became landlords and each business was a “tenant.” All progress toward owning in the facility died—immediately. The original vision was lost. Matthew eventually organized the ten tenant companies to fight the landlord; they won a monetary settlement. At that moment, Matthew decided to leave the food incubator as soon as possible. Address: Tofu Shop Specialty Foods Inc., 65 Frank Martin Court, Arcata, California 95521. Phone: 707-822-7401.

3580. *Travelin’ Light (Lightlife Foods, Greenfield, Massachusetts)*. 2009. Looking back: Lightlife veggie goodness hits its stride at 30. Spring/Summer. p. 1-2.

• **Summary:** This is a brief but insightful 30th anniversary history of the Lightlife Foods / Tempehworks. It begins:

“Veggie meals are cool. It’s official. Stop by any one of a million suburban dinner tables and you’ll see everything from Smart Pretzel Dogs to pan-fried tofu drizzled with olive oil.

“So why have veggie meals evolved from trendy tidbits—impossible to find except in natural food specialty stores—into a mainstream phenomenon as popular with suburban moms as they are with LA hipsters?

“News has been one driving force, from traditional reporting to social networking and the blogosphere. But this is only the tip of the soybean. The ascent of the veggie meal isn’t entirely the work of CNN or celebrity word of mouth. A good portion of the credit can be traced to the year 1979 and a car wash in western Massachusetts turned tempeh capital of the U.S.

1979: It was a *veggie* good year: His name is Michael Cohen. He’s an original partner of the New England Soy Dairy in Greenfield, MA, and an early pioneer in the popularization of tofu in America. Michael, a man with a ponytail and a mission, sensed an opportunity in the mass production of tempeh that he could build into his own veggie domain. The humble soybean was about to change from being an Indonesian novelty to an increasingly popular entrée on the American dinner plate.

“Within a year, Michael had partnered with Chia Collins and launched Tempeh Works at a start-up facility that had been a car wash in its previous incarnation. From the beginning, both were committed to promoting people’s health and well-being, as well as the overall health of the planet.

“At the time, their goal had all the markings of a pipe dream. Fried bologna was a middle-America mainstay from Maine to Modesto, and ‘veggie protein’ had yet to enter the dietary lexicon. Then innovation, ironically in the form of a healthier good old American hot dog, stepped in.

“In 1985, the company was transformed into Lightlife Foods, Tofu Pups were launched, and the veggie revolution began—spreading to grocery stores throughout the land.

“Smart rules the day: Today, as healthy eating plays a significant role in the American lifestyle, Lightlife’s breadth of all-veggie products is enabling more people than ever to realize the benefits of high-protein, cholesterol-free, veggie meals.”

Color photos show: (1) Founders Michael Cohen, Chia Collins and their daughter Chiana. (2) Our humble beginnings in a building that was once a car wash.

On the bottom half of page 5 of this issue of the newsletter is this statement: “Greening our newsletter. This is your last paper newsletter—if you choose.” To receive the newsletter via e-mail, visit [www.lightlife.com](http://www.lightlife.com), click on newsletter to sign up. Don’t own a computer? Not to worry, we will continue to print our newsletter for you!”

On the top half of page 5 is a list of all Lightlife’s products, divided into Refrigerated and Frozen.

Refrigerated: New Tempehtations Classic BBQ. New Tempehtations Zesty Lemon. New Tempehtations Ginger Teriyaki. Smart Dogs. Tofu Pups. Smart Dog Jumbos. Smart Links Breakfast. Smart Bacon. Light Burgers. Smart Deli Pepperoni. Smart Deli Turkey. Smart Deli Ham. Smart Deli Bologna. Gimme Lean Sausage. Gimme Lean Beef. Smart Ground Original. Smart Ground Mexican. Smart Strips Chick’n. Smart Strips Steak. Organic Fakin’ Bacon. Organic Soy Tempeh. Organic Three Grain Tempeh. Organic Flax Tempeh. Organic Wild Rice Tempeh. Garden Veggie Tempeh. Smart BBQ. Smart Tex Mex. Smart Chili. Smart Sausage Italian. Smart Sausage Chorizo. Smart Tenders Lemon Chick’n. Smart Tenders Savory Chick’n. Veggie Burgers. Mushroom Burgers.

Frozen: New Smart Stuffers Chick’n Parm. New Smart Cutlet Chick’n Fillet. Smart Pretzel Dog. Smart Stuffers Chick’n Cordon Melt. Smart Stuffers Chick’ Broccoli Melt. Smart Stuffers Turk’y w/ Cranberry Stuffing.

3581. Lam, Alex. 2009. Update on The Soy Shop, Atlanta, Georgia (Interview). *SoyaScan Notes*. April 14. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** His father, Kich Lam bought The Soy Shop (which started in July 1979) from Steve and Sarah Yurman in April 1985; he bought it mostly for the equipment. But before he bought the company, he had been making tofu in the basement of his home in Decatur, near Atlanta.

The Yurmans left the keys to the shop with their employees; one reason the Yurmans sold their company was because of employee theft. The employees came in in the middle of the night and made tofu, then delivered it the next morning. But the quality was not very good. After the Lams bought the company, Alex’s mom scared the employees away and the Lams began to make better quality tofu. But in the mid-1980s, there were not many Asians in the southeastern USA—so it was pretty tough times. And there was competition from Calco and Jimmy Wang, both of whom were better capitalized and were ahead of the Lams. But the Lams worked harder and harder, then eventually took the whole market from them. Alex’s father passed away in the year 2000. Up that time, his father had been the tofu maker and Alex had handled the business side of things—billing, logistics, etc. In Jan. 2008 the company moved from Decatur to Atlanta. The company has had great growth for the past 10 years. Today, Alex thinks, The Soy Shop is the biggest tofu manufacturer in the southeastern USA (Florida, Georgia, North Carolina, South Carolina, Tennessee, and Alabama).

Today the company makes only two products: firm and soft tofu. Ten years ago he used to make tempeh, soysage, and soymilk. But tofu, the company’s bread and butter, grew so fast that he had to discontinue the other soyfood products.

Now growth has begun to slow, because of the economic downturn and new competition. This has been his company’s

slowest year in the last ten years. In Oct. 2006 House Foods opened a brand new tofu factory in Somerset, New Jersey. They are now flooding the market with low-cost tofu. Alex is slowly seeing the products come into his market. Address: 5289 McCall Dr., Atlanta, GA 30367. Phone: 770-458-7808.

3582. *Plenty Bulletin (Summertown, Tennessee)*. 2009. Guatemala. 25(1):3. Spring.

• **Summary:** “About 75 children and adults who live or work in one of Guatemala City’s largest trash collection dumps participated in a soy foods cooking demonstration on April 4. The event was organized by Plenty volunteer, Humberto Jorge Gonzales, and women from UPAVIM, one of Plenty’s Central America Food Security (CAFSI) partners. Everyone got to sample and enjoy high protein foods such as soymilk (strawberry, vanilla, plain, and chocolate) as well as pineapple and strawberry soy yogurt and soy burgers.”

A photo shows a woman handing out samples to children in a room.

3583. **Product Name:** [Mushroom Rice Burger].

**Foreign Name:** Burger champignons et riz.

**Manufacturer’s Name:** Sol Cuisine.

**Manufacturer’s Address:** Mississauga, Ontario, Canada L4X 2G6.

**Date of Introduction:** 2009 May.

**Ingredients:** 2013: Filtered water, vegetables (portobello & button mushrooms, onions, carrots, red & green bell peppers, black olives, potatoes, garlic), organic cooked brown rice,

soy protein concentrate, modified cellulose, sunflower oil, organic wheat free tamari sauce (water, organic soybeans, salt), yeast extract, spice, sea salt, organic evaporated cane juice, citric acid.

**Wt/Vol., Packaging, Price:** Four meatless patties. 284 gm.

**How Stored:** Frozen.

**New Product–Documentation:** Current (2013) label sent by Lorraine Guardino of Sol Cuisine. 2013. March 11. She ads a note that this product was introduced in 2009 (spring).

3584. Byrd, Alita. 2009. 50 years selling Choplets [Interview with Allan Buller of Worthington Foods]. *Spectrum: Journal of the Association of Adventist Forums* 37(3):36-41, 63. Summer.

• **Summary:** “Allan Buller joined Worthington Foods as a young ex-soldier right after World War II and served as an executive at the legendary Adventist food company for more than 50 years, until he retired as president and CEO in 1986.

“He watched the company grow from a small Adventist-focused business to a nationally valuable brand with a sales volume of more than \$200 million and meat substitute products on the shelves of supermarkets across America. He watched the world of business and marketing evolve, as well as the attitudes of people toward vegetarianism. Spectrum interviewed him about his years as an Adventist businessman.

“Question: You began your career at Worthington Foods just after World War II. How did you get the job? What challenges did the company face in the late 1940s?”

COR 197

“Answer: I began my career with Worthington Foods in 1945 immediately following my discharge from active service in the U.S. Army. James Hagle was the manager of Worthington Foods at that time.

“Jim and I had known each other for a number of years prior to my four plus years in military service. We both were alumni of Andrews University (then Emmanuel Missionary College), although he graduated some four years before I did.

“Both of us were students from the community at Berrien Springs rather than dormitory students. He was president of the college senior class in 1935—the same year I was president of the academy senior class. We played ball together, as well as being involved in other activities of mutual interest.

“While I was serving as supply sergeant for the 1400-bed U.S. Army 102nd General Hospital and was stationed in England, Jim wrote to me and suggested I visit him at Worthington Foods before accepting employment anywhere else after the war was over. I responded by telling him I was interested in going back to school to pursue graduate studies leading to an MBA.

“Jim pointed out that Ohio State University was located in Columbus, and just a few miles from Worthington. He suggested I take a position at Worthington as assistant manager and at the same time enroll at Ohio State University.

“When I got my Army discharge my wife and I visited Worthington and decided to accept Jim’s offer. We moved there in December of 1945, and I became an employee of Worthington Foods. I enrolled at Ohio State University shortly thereafter, and received my MBA degree in 1952 after working full time and attending classes part time. In 1948 Jim accepted the position of manager at Harding Hospital in Worthington and I was asked to replace him as manager of Worthington Foods.

“The big challenge facing Worthington Foods at that time was an adjustment in the mission of the company. During the war years—under meat rationing—Worthington Foods had been busy trying to meet the public demand for a non-meat protein food that could serve as a replacement for meat. There was also a need to expand facilities and to raise capital for that purpose. The big question for the company was: Can we continue to produce and market a vegetarian protein food with no government meat rationing to support the business?

“Question: How many employees did Worthington have when you joined the company, and how many does it have now?

“Answer: We had less than 30 employees when I joined the company in 1945. When we merged with the Kellogg Co. in 1999 we had more than 500.

“Question: The Morningstar Farms brand launched by Worthington in the 1970s has become very well known in supermarkets across America. How did the marketing for

the Morningstar brand differ from the marketing for brands targeted at the traditional Adventist market?

“Answer: Actually the initial launch of the Morningstar Farms brand was done by Miles Laboratories, which had acquired the rights to market the meat analogs developed by Worthington, along with the technology of how to make them.

“When Worthington reacquired those rights in 1982, the product line had already been introduced into the supermarket trade. Of course Miles had to rely on advertising and sales promotion to get things started. They began by selecting the name Morningstar Farms to pique the interest of consumers. This introduction also involved persuading consumers there was a valid reason to use the products. Miles was aided in this by research that had established a link between the consumption of animal fats and the presence of cholesterol and plaque in the arteries of human beings.

“Adventist consumers were already aware of the benefits of protein from non-animal sources through the church’s health education programs. So advertising to the Adventist market could be directed toward taste, economy, and convenience.

“About this same time young people of high school and college age began to sense the social and economic—as well as possible moral issues—involved in raising and killing animals for human consumption. By the end of the 20th century some 200 colleges and university cafeterias were on Worthington’s customer list and moms around the country were asking: ‘What can I feed my child, newly converted to vegetarianism, when he or she comes home from school for the holidays?’ Mom, why not try a Morningstar Farms chicken or hot dog? They contain no animal fat, they taste good, they’re good for you, and you can get them at your local supermarket!

“Question: Why did Worthington put so much effort into the Adventist market over the years? Didn’t that restrict the company in some ways?

“Answer: In all the years we were in business we saw the Adventist market as our prime target. In a sense it was our *raison d’être*.

“We began our business with that market in mind and were committed to it from then on.

“When we merged with Miles Laboratories in 1970 a provision was included in the working agreement contract to ensure that the Adventist market would continue to be served by the company. After we reacquired the business in 1982 we continued to respect our commitment to the Adventist market. It was important to us, and we wanted our Adventist customers to know they could count on having our products available in the future even though we might merge with another company.

“I’d like to point out that during our years with Miles we insisted on maintaining our policy of avoiding the use

of meat products and meat derivatives as an ingredient in our product formulations. We insisted on this even though it was pointed out to us, and we agreed, that meat extractive flavors might make our products more palatable to the public taste. This policy did restrict us in some ways, but we felt that our Adventist and other customers who were vegetarian were counting on us to make sure Worthington brand products contained no meat or meat derivatives other than milk or eggs. In this respect we felt we were adhering to the traditional lacto-ovo vegetarian diet preferred by Adventists and others. Had we compromised our position in this matter we might have increased our sales—but we might also have confused or alienated our customers.

“Question: How would you describe Worthington’s connection to the Adventist church?”

“Answer: As a private company and as a chartered corporation Worthington could have no direct connection with the Adventist church. But individuals who were shareholders, employees, or members of the board of directors could be, and were, members of Adventist churches nearest their homes.

“For example: George T. Harding III, MD, one of the principal founders of the company, was an Adventist, a graduate of Columbia Union College and the Loma Linda College of Medicine. Beginning in 1948 and continuing for several years he took a leave of absence from Harding Hospital as its President and served as President of Loma Linda.

“James L. Hagle joined Worthington Foods in 1941 as General Manager. He, too, was an Adventist and a graduate of Andrews University, as well as of Northwestern University. He was serving as President of Worthington when it merged with Miles Laboratories in 1970. While President of Worthington Foods Mr. Hagle also served as a member of the Ohio Conference of SDA Executive Committee and the Columbia Union Conference Executive Committee. Later he was elected to serve on the Kettering Hospital Board.

“For my part, I was an Adventist graduate of Andrews University. During the 50 or more years I was employed at Worthington Foods, I not only filled every corporate office of the company at one time or another, but also served on the Ohio Conference of SDA Executive Committee for 23 years and on the Columbia Union Conference of SDA Executive Committee for over 15 years.

“Most of our key employees at one time or another filled important offices in their local churches. There has clearly been a close working relationship and support to the Adventist church from people who were a key part of Worthington Foods throughout its history.

“Question: How did the market for meat analogs change over the years?”

“Answer: I believe these were among the most important factors in change:

“1. A growing public awareness of the possible link

between high serum cholesterol levels and the consumption of animal fats.” Continued.

3585. Byrd, Alita. 2009. 50 years selling Choplets (Continued—Document part II) [Interview with Allan Buller of Worthington Foods]. *Spectrum: Journal of the Association of Adventist Forums* 37(3):36-41, 63. Summer.

• **Summary:** Continued: “2. A developing interest on the part of consumers, especially young people, in modifying their diets to eliminate, or at least minimize, the consumption of animal meats because of a perceived moral issue in the killing of animals for human food.

“3. As the demand for meat analogs grew so did competition. This led to a significant increase in the number of companies producing and marketing these analogs. Among the newcomers were Garden Burger made by a company in Oregon and Boca Burger made by a firm in Florida. Although Worthington Foods continued to be the leader in the industry, newcomers meant the competition grew keener and larger companies began to see potential for these products.

“Question: Did Worthington begin to put emphasis on other healthy foods as time went on?”

“Answer: Yes, I would say that became of interest to us. Other products that we added to our line included Kaffree Tea—a caffeine-free tea which we imported and repackaged for retail sale. This tea, known as rooibos or red tea, had been grown and used in Africa as a beverage for decades. We also added a second beverage, Roma, which was also imported (in this case from Europe), and repackaged it as a caffeine-free alternate to regular coffee. At one time we test-marketed canned mung (soy) bean sprouts and Kel-jel made without animal ingredients as an alternate to the popular gelatin products on the market. Lack of consumer response ended the tests and we continued to place primary emphasis on meat analogs.

“Question: In the early 1980s you re-mortgaged your home, along with other Worthington executives, and took great personal risk to buy back Worthington Foods, which had been taken over by Miles Laboratories and Bayer AG, in turn. Did you take the right decision? Why did you and the other executives agree to be taken over in the first place?”

“Answer: An adequate response to this question might require a rather extensive explanation of management philosophies, which could take more space than we have here. But I can say this much: I don’t believe any of us who were involved in the reacquisition of Worthington Foods had any doubts about what to do when the opportunity came—even though the cost and risks involved were high.

“Former president James Hagle, George Harding IV, the son of co-founder George T. Harding III, and I were convinced we should proceed with the chance we had to reacquire the business. It was the only way the future of the company and its purposes could be met. We pooled our

resources, such as they were, and moved ahead. For me the decision meant re-mortgaging my family's home and using my accumulated retirement funds. James Hagle had the foresight to make sure the name Worthington Foods had been legally safe-guarded. George Harding was willing to use his family's identity and financial resources to support the move.

"It proved to be a wise move. The company became even more successful than it had been before the merger with Miles Laboratories in 1970.

"Our merger with Miles had come about because we knew of at least four nationally known companies who were seriously exploring the possibility of entering the market with their own brands of meat analogs. A friendly merger with Miles, who agreed to continue making the Worthington brand of foods even though they anticipated establishing their own brand, seemed more promising and more prudent than trying to compete with a company with more resources and more experience in marketing than we had. James Hagle, George Harding, and I all felt we had a moral obligation to protect the interests of Adventists and other users of meat analogs.

"Question: Later, Worthington went public. What was the reason behind listing on the stock exchange? Did a new responsibility to shareholders hamper the company?

"Answer: When Worthington Foods merged with Miles Laboratories in 1970 both companies realized manufacturing capacity at Worthington would be inadequate to meet the needs of their expected sales volumes. Plans for a new plant at Worthington were initiated and the new factory was completed in 1972.

"As the planning and construction moved ahead it became clear that the 10 acres of land owned in Worthington did not provide for any further expansion should it be needed. Miles decided to purchase a food manufacturing facility that had become available in Schaumburg, Illinois, near to its own administrative offices located in Chicago. Miles decided to use the Schaumburg site for the production of the newly developed Morning Star Farms line of products.

"About ten years later, Miles itself became a partner in a merger with Bayer AG, a German company that was looking for an American pharmaceutical company with whom they might jointly work in expanding their markets. This newly formed company did not want to continue in the food business, which, in turn, provided an opportunity for Worthington to acquire its own meat analog business back, plus what had been launched by Miles. Worthington Foods chose not to include the Schaumburg operation in its purchase, because it believed it could meet its projected sales for a number of years with production limited to Worthington.

"Following our takeover of production and marketing of all analog products we experienced a surge in sales that created the need for additional production capacity. We were able to find land in an industrial park in Zanesville,

Ohio, about 60 miles from Worthington. Because no new manufacturing businesses had come to Zanesville for a number of years, the city offered us tax incentives and other benefits to build a new plant there. However, this would have taken millions of dollars of capital, which we did not have at that time. After a review of investment potential among our Adventist acquaintances, we concluded we could not generate enough capital quickly from that resource. Accordingly we decided to explore going public with a stock offering. This proved to be successful, but it also brought new problems.

"We soon discovered that public interest in stock investment is more directed toward financial return than to better eating habits. Furthermore, publicly held companies must learn to live with financial analysts, who see their purpose as that of helping companies to maximize profitability for the benefit of investors in the company. This places pressure on company management to make decisions that don't always coincide with management's vision of what is best for their company's customers. Under this constraint we were not always able to do what we felt was best for our customers. Expecting financial analysts to understand and share these ideals was not always practical or feasible.

"Question: When did Worthington Food experience the biggest growth?

"Answer: It all depends upon what you mean by growth and how it is defined. I'll respond in general terms. When we completed our new plant in 1972 we achieved a 250% increase in production capacity. When we completed our second plant construction at Zanesville we more than doubled our 1972 capacity in the production of frozen foods. Our production of frozen foods represented the major portion of total production and sales. The total number of employees peaked by 1990 when both the Worthington and Zanesville plants were in operation. As our technology and efficiency improved, production increased without an increase in the number of employees. From 1960 to 1970 our total sales volume increased 1,000% but in real dollars the increase between 1970 and 1980 was greater than it had been in the previous decade. This was also true for the decade 1980 to 1990 over the preceding decade. In capital investment, we never stopped growing.

"In summary I would say that our history of growth was geometrical in nature, rather than arithmetic. Profitability did not keep pace with production and sales increases, but we did continue to show increases in earnings as well. The year 1945 was the only year we did not show a profit and that was due to a post-war adjustment. In 1945 when I joined the company we had annual sales of less than \$200,000. By 1999 our sales volume was approaching \$200,000,000.

"Question: How did the challenges the company faced in the 1990s differ from those in the 1940s?

"Answer: Challenges in the 1990s differed from those in the 1940s because we had become committed to meeting the

interests and needs of the public rather than to a segment of it.

“A second area of challenge had to do with the increase of competition or possible competition from large companies who were beginning to see potential in what we were doing.

“A third area of challenge was in the field of finance. It had become necessary for us to expand in order to meet market demands. Raising capital was a real challenge. This is why we decided to go public with stock in our company. This, in turn, brought pressure from stockholders who were more interested in profit than in sound nutrition principles.

“Question: When were you the busiest? What did you enjoy most about your job?

“Answer: The most intense activity I experienced at Worthington Foods came during the time between August 15 and October 15, 1982. Those were the weeks we were preparing for the reacquisition of the company after 12 years affiliation with Miles Laboratories.” Continued.

3586. Byrd, Alita. 2009. 50 years selling Choplets (Continued—Document part III) [Interview with Allan Buller of Worthington Foods]. *Spectrum: Journal of the Association of Adventist Forums* 37(3):36-41, 63. Summer.

• **Summary:** Continued: “I was the Worthington representative in negotiations. It had already been decided that I would serve as the President and CEO of Worthington Foods after the company became ours again. The familiar phrase ‘the buck stops here’ seemed to apply. I was busy trying to raise capital while adjusting to line authority after years in a staff position. Putting together a management team for production, marketing, research, human resources, and finance took all the time and energy I could muster. There were development and communication of plans to be shared with customers, vendors, employees, prospective shareholders, etc.

“During this time my attaché case containing details of plans was stolen from my locked car. My prayers were answered in recovery of these valuable documents.

“Life was a bit hectic but with God’s leading and help we began business as Worthington Foods on Monday following the closing of business as a division of Miles the previous Friday. A big factor in making this possible was a decision on the part of every employee to accept our invitation to continue working for the company vs. continuing with the former parent company. Regaining control of the company and helping it to become a private company once more and successful beyond our expectations was the biggest thrill I experienced while I was a part of Worthington Foods.

“Question: What has been Worthington Foods best selling product of all time?

“Answer: I’m not sure I can specifically answer this question because different products were leading sellers at one time or another. I can say this much: Our reputation as

a vegetarian food producer began with our early product, Choplets. This was a meatless steak-like product made from wheat gluten. The name was adopted and registered as a trademark by company management after it was suggested as a name by George T. Harding IV, son of the company’s co-founder and just ten years old at the time. George’s family had just completed a meal at which Choplets were served and the question was asked, ‘What name shall we choose for this product when we’re ready to begin marketing it?’ George suggested his choice of names and Choplets went on the market in health food stores, Adventist book centers and campmeetings and rapidly became a favorite of many consumers—so much so that in time it began to be used as the generic term for any wheat gluten steak made and sold by any company.

“Choplets thus became the best-selling vegetarian product made by Worthington. Even New York’s Waldorf Astoria Hotel served Choplets during wartime rationing. Later when Veja-Links, a meatless ‘hot dog’ were introduced, they took over the number one spot for a while. In time frozen vegetarian foods came into their own, and because we were able to make them available to the public in supermarkets they took the lead in sales.

“Question: What is your own favorite Worthington food?

“Answer: My favorite Worthington food when I first joined the company was Choplets, but they are not now made the way we used to make them, so they no longer are my favorite. I guess my favorite among the products currently made would be Morning Star Farm Grillers.

“Question: When did you step down as Worthington’s chief executive?

“Answer: I stepped down as President and CEO of Worthington Foods, Inc. on January 1, 1986. I was succeeded by Dr. Dale E. Twomley who had joined the company some three years earlier as the intended successor. Before that he was serving as head of the business department at Andrews University.

“Under Dale’s leadership the company continued to grow at a rapid pace. He was instrumental in negotiating the acquisition of the Loma Linda Food Co. and later the purchase of land in Zanesville, Ohio, and the subsequent construction of a new plant in that area. As president and CEO he also took a lead role in negotiations with the Kellogg Co. when it acquired our business in 1999.

“Question: What kept you at the company for over 50 years?

“Answer: I enjoyed my work. I felt the company was responding to a genuine need on the part of its customers. My employer wanted me to stay. I felt the company had a promising future. Our family liked the community in which we lived. All of these had an influence in my continuing with the company for so long.

“Question: What would you say is the secret of

Worthington's success?

"Answer: I believe the secret of our success is not really a secret. Founders and owners, management, and key employees all believed in the mission of the company. The principles that guided these people were (a) honesty and fairness to employees, stockholders, and vendors, (b) a commitment to our mission, and (c) a faith in God.

"Question: What do you see in the future for Worthington Foods? How can it remain competitive as so many other companies get into the meatless food market?

"Answer: From a legal point of view the future for Worthington Foods now rests in the hands of the Kellogg Co., which now owns Worthington.

"Our Worthington board members decided that the Kellogg Company is better prepared with greater resources to be competitive than we were at the time we sold the business to Kellogg.

"I will be disappointed if Kellogg management does not aggressively protect its investment in what has been a promising vegetarian food business. The fact that Worthington Foods and Morning Star brand products continue to be made available in greater variety than years ago is some assurance of this.

"Question: Can you tell us an interesting story from your years with Worthington Foods?

"Answer: I'm sure I could identify a number of things that happened during my career that reflect human interest rather than business concern, but there is one that stands out as perhaps being a good example. I call it 'The story of the \$40,000 tree.'

"When I first joined Worthington Foods in 1945 a new factory building had just been completed. In front of it stood a tall and impressive white oak tree. At the time I had no idea of its age, but it looked quite old. Obviously the tree had not been moved or damaged by any recent construction activity. It remained undisturbed for the next 27 years, generously providing squirrels with an annual supply of acorns.

"By the time we merged with Miles Laboratories in 1970, it had become obvious that a new and larger factory was needed. The Miles Company hired an architect and assigned one of its engineers to supervise construction. I was asked to serve as chairman of the building committee

"The architectural firm had a set of building plans ready for us at the first official meeting of our committee. The first thing I noted was that no white oak tree appeared on the drawings. The architect's explanation was, 'We feel it needs be removed so the main entrance to the building can be located in that spot.' When I suggested we keep the tree and change the entrance, the architect responded, 'Because of the time already spent in preparing plans, it could cost as much as \$40,000 to change them.' The Miles engineer added this comment, 'I think changing anything at this stage might require approval by a higher authority than this committee has.'

"We shortly adjourned the meeting, but I didn't feel satisfied. At that time Dr. Walter Compton was President and CEO of Miles Laboratories. I had not known him before our merger with his company, but my impression of him was that he placed aesthetics above dollars. I decided to write a letter to him explaining my concern about cutting down a tree that had as much size and history as the white oak standing on property that had just become a part of Miles Lab. I explained that I had arranged for a horticulturist from nearby Ohio State University to give us an estimate on the age of the tree.

"His report stated that it in his opinion the tree was standing when George Washington and his troops were fighting the Revolutionary War. That would make it the oldest living thing in Worthington. Dr. Compton's immediate response was, 'We must save it!'

"The tree is still alive and well and stands in all its majesty where it sprang from an acorn. Lightning rods and a plaque have been installed. If the tree had a voice I'm sure it could tell us a great deal about how Worthington came to be settled and what life here was like when Indians lived here. Who knows how many Indian children might have played under this very tree?

"Allan Buller lives with his wife in Ohio. This interview was conducted via email over a number of months in 2008 and 2009."

3587. *Soy & Health (Europe)*. 2009. Vivera meat alternative products. No. 25. June. p. 6.

• **Summary:** "To meet the growing demand of healthy and tasty alternatives for meat, Vivera introduced meat alternative products to the Dutch market in 1990. Now one of the biggest producers of vegetarian products, Vivera's range includes cured meats, meal components, meal ingredients and snacks. Vivera's products are made of natural and mostly vegetable raw materials which are GMO free, based on soy and are a source of vitamin B-12 and iron. ([www.vivera.com](http://www.vivera.com))."

3588. **Product Name:** It's All Good [Meat-Free Tuscan Breasts in a Tomato and Basil Sauce, Meat-Free Chicken-Style Filets].

**Manufacturer's Name:** Garden Protein International Inc.  
**Manufacturer's Address:** 12751 Bathgate Way, Richmond (near Vancouver), BC V6V 1Y5, Canada. Phone: 604-278-7300.

**Date of Introduction:** 2009 July.

**Ingredients:** Tuscan Breasts: Water, soy protein\*, vital wheat gluten, ancient grains (quinoa, amaranth, millet, kamut), natural flavors (from plant sources), gum, potato starch, expeller pressed canola and/or safflower oil, pea protein, modified vegetable gum, carrot fiber, organic beet root fiber, organic evaporated cane juice, yeast extract, vinegar, sea salt. Marinade: Water, tomato paste, spices, red

bell pepper flakes, vinegar, citric acid. Contains Soy and Wheat. \* = Non-genetically engineered soybeans.

**Wt/Vol., Packaging, Price:** 7 oz (200 gm). Paperboard box. Retail two for \$6.00 (2009/07. Lafayette, California).

**How Stored:** Refrigerated.

**New Product–Documentation:** Product with Label purchased at Safeway in Lafayette, California. 2009. July 24. Paperboard box. 6½ by 6½ by 1¼ inches. Green, red and black on white. A color photo on the front panel shows each of the products on a white background. At bottom of front panel is an innovative horizontal table: Protein 11 gm. Fat: 1.5 gm. Cholesterol: 0. Calories: 70. Carbs: 3 gm. On all four panels is the logo of Garden Protein International Inc. “Made with Gardein. Garden protein.” On one side panel: “Low fat. No artificial flavors, colors or preservatives. A good source of protein. And suitable for vegans and meat lovers alike.” Manufactured for Its All Good Foods, Inc., Richmond, V6V 1Y5 Canada. [www.itsallgoodfoods.com](http://www.itsallgoodfoods.com). Made in Canada, On the other side panel: “Microwave. Stovetop. Grill. Bake. Good with rice, couscous, pasta.” On the bottom panel: “There are lots of good things growing at [www.gardein.com](http://www.gardein.com).” On the back panel are Nutrition Facts, ingredients list and recipe ideas.

3589. Wikipedia, the free encyclopedia. 2009. Quorn (Web article). <http://en.wikipedia.org/wiki/Quorn>. 5 p. Printed Dec. 8. [25 ref]

• **Summary:** Introduction: “Quorn is the leading brand of mycoprotein food product in the UK. A mycoprotein is any protein-rich foodstuff made from processed edible fungus.

Quorn is produced as both a cooking ingredient and a range of ready meals. It is sold (largely in Europe but also in other parts of the world) as a healthy food and an alternative to meat, especially for vegetarians, earning the Vegetarian Society’s seal of approval. As it uses egg white as a binder, it is not a vegan food. When introduced into the United States in 2002 there were concerns about possible health risks.

History: During the 1950s, it was predicted that by the 1980s there would be a shortage of protein-rich foods. In response to this, many research programmes were undertaken to use single-cell biomass as an animal feed. Contrary to the trend, J. Arthur Rank instructed the Rank Hovis McDougall (RHM) Research Centre to investigate converting starch (the waste product of cereal manufacturing undertaken by RHM) into a protein-rich food for human consumption.

“The filamentous fungus *Fusarium venenatum*, was discovered in 1967. After an extensive screening process, it was isolated as the best candidate. In 1980, RHM was given permission to sell mycoprotein for human consumption after a ten-year evaluation program.

“The initial retail product was produced in 1985 by Marlow Foods—named after RHM’s headquarters in Marlow, Buckinghamshire—a joint venture between RHM and

Imperial Chemical Industries (ICI) who provided a fermenter left vacant from their abandoned single-cell feed programme. The product was named after the Leicestershire village of Quorn, reputedly for purely marketing purposes. The two partners invested patents for growing and processing the fungus and other intellectual properties in the brand. Although the food sold well in the initial test market of the RHM staff canteen, the large supermarket chains were unconvinced until Lord Sainsbury, finance director of the UK’s Sainsbury’s supermarket chain—then 18%-owned by his family—agreed to stock the new brand.

“Quorn entered widespread distribution in the UK in 1994, and was introduced to other parts of Europe in the 1990s, and to the United States in 2002. The initial advertising campaign for Quorn featured sports personalities including footballer Ryan Giggs, rugby player Will Carling, and runner Sally Gunnell.

“Although the mycoprotein was originally conceived as a protein-rich food supplement for the predicted global famine, the food shortage has not yet occurred. In 1989, a survey revealed that almost half of the UK population was reducing their intake of red meats and a fifth of young people were vegetarians. As a result, Marlow Foods decided to sell Quorn as a healthy meat alternative free from animal fats and cholesterol.

“When ICI spun off its biological products divisions from the core chemical business in 1993, Marlow became part of the Astra Zeneca group, one of the world’s largest pharmaceutical companies. In 2003, Zeneca sold Marlow, the Quorn business, and associated trademarks and patents, to a private equity firm for £70 million. Two years later food giant Premier Foods bought Marlow for £172 million.

“Marlow sells Quorn brand mycoprotein in ready-to-cook forms—as cubes and a form resembling minced meat—and later introduced a range of chilled vegetarian meals, including pizzas, lasagna, cottage pie, and products resembling sliced meat, hot dogs, and burgers. As of 2006 it is available in stores in the UK, the Netherlands, Belgium, Sweden, the US, Switzerland and Republic of Ireland. It is also available in Delhaize supermarkets in Germany. In the UK, it enjoys around 60% of the meat-replacement food market, with annual sales of around £95 million. Until December 2003, Quorn had been available in France.

“In 2004, McDonald’s introduced a Quorn-branded burger bearing the seal of approval of the Vegetarian Society, an endorsement criticised by the Vegan Society. However, the product proved to be less popular than the company had envisaged and was soon removed from the menu.”

3590. May, Rebecca. 2009. Dale Twomley: A true investor in Adventist education. *Focus (The Andrews University Magazine)* 45(4):50-51. Fall.

• **Summary:** An excellent biography of a man of great talent and dedication, with many successful careers in education

and business. In 1983, after reorganizing and revitalizing the Andrews University School of Business, Dale began a “successful career with Worthington Foods [Worthington, Ohio]. Among the company’s successes during his 14 years as President / CEO, sales increased from \$27 million to \$185 million, and shareholders’ equity increased at 31 percent compounded annual growth rate for 14 years. The business theories he’d learned, taught, and institutionalized at Andrews were brilliantly successful in the ‘real world.’”

A large color photo show Dale Twomley in his later years. A smaller black and white photo shows Dale when he was younger. Address: Director of campus relations & events, Office of Integrated Marketing & Communication, Andrews Univ., Berrien Springs, Michigan 49104.

3591. Moncrieff, Scott. 2009. What the Sam’s Chicken? The true story of the man behind the meat. *Focus (The Andrews University Magazine)* 45(4):20-23. Fall.

• **Summary:** “You go through the serving line at Dining Services, picking up mashed potatoes and gravy, salad, and a drink. Oh, and you add a portion of Sam’s Chicken, along with two tablespoons of tartar sauce. It’s pricey, at \$3.79 a serving—and 25 cents for the tartar sauce—but it has been an irresistible favorite at Andrews University for 40 years. As you work through your five ounces of wheat gluten, soybean oil, soy flour, yeast extract, sea salt and top secret spices, you have no idea of the history of Sam’s Chicken, or who Sam is, if indeed there is such a person. But as those 400 calories hurtle past your taste buds and into your bloodstream, sit back and maintain consciousness. I’m going to tell you.

“Our story starts about 6,000 miles away from Berrien Springs, Michigan, near the city of Obihiro, on the island of Hokkaido, in Japan. That is where Michihisa Yoshimura was born on March 4, 1915. His father, a well-to-do businessman, owned a coal mine and raced horses for fun. In some ways, Michihisa was a lot like your average American kid of the Post World War I era. He liked to snow ski, ice skate and play baseball (catcher and left field). As Michihisa got into his teens his mother, a Christian (his father was an atheist), wanted her son to attend a Christian school, so she sent him way down south to Saniku Gakuin, the Adventist college about 50 miles east of Tokyo on the other side of Tokyo Bay.

“There Michihisa providentially—for purposes of our story and title product—worked in the food department, helping manufacture peanut butter, grape juice and bakery products. During summer vacations he worked with his grandfather’s flax company, further extending his knowledge of food production. When Michihisa turned 18, in 1933, he was required by law to apply to join the federal army. However, he was rejected because of flat feet—Japan was not yet in a large-scale war and its military was selective. This rejection prepared the way for him to gain permission to leave Japan to attend Madison College, just outside Nashville, Tenn., where he began further studies in 1937.

He had been encouraged to go to Madison by Perry Webber (Emmanuel Missionary College class of 1911), a PhD in chemistry who had a special interest in soyfoods, and had spent much time at Madison College as well as in Japan. As Michihisa set off for Madison, Webber suggested he adopt the name ‘Sam,’ after the biblical Samuel. Thus Webber unwittingly saved us from 40 years of ‘Michihisa’s Chicken.’ Incidentally, Sam’s younger brother Zenzaburo, who remained in Japan, trained as a kamikaze pilot, and had given away his clothes preparatory to his final mission—and then, mercifully, the war ended.

“In entering Madison College, Sam had come to the school most suited to enhance his work as a food technologist with soy products. In 1904, E.A. Sutherland, having resigned as president of Emmanuel Missionary College, embarked with his colaborer Percy Magan to open a new school in the South. This institution, originally the Nashville Agricultural and Normal Institute, became Madison College (in 1937), and Sutherland served as president there for over 50 years. This school, like Andrews and Saniku Gakuin, focused on the harmonious development of body, mind and spirit. As part of the plan, students were to work off half or more of their expenses each year. Among the industries which developed on campus was a food factory which, in 1918, became Madison Foods. By the time Sam arrived in 1937, Madison Foods was a leading—probably the leading—developer of soy-based products in the United States, including soymilk, soy meat substitutes and tofu products.

However, times were hard and wages were pennies per hour. Sam’s classmate Shirou Kunihira worked in the soymilk production plant, while Sam worked at the bakery, where his duties included running the bread loaves through the slicer. Shirou would get an allotment of soymilk at the end of his shift and Sam would collect the crumbs from the pan under the slicer. With these ingredients the friends would share a humble evening meal. For Japanese and Japanese-American students, there was the added challenge of the United States being at war with Japan. Despite these challenges, Sam graduated from Madison College in 1941 and worked an additional two years for Madison Foods, but now his passion for soy was balanced with a new passion for she.

Sumiko Yano, a.k.a. Sumi, was born in Japan, but grew up in Southern California. At the time the U.S. declared war on Japan, in December of 1941, her family was living in El Centro, California. Her father made his livelihood by arranging for cantaloupes and other valley produce to be shipped to market. In 1942, her family was given a one-month notice that they would be placed in a ‘War Relocation Camp’ in Poston, Arizona. (After relocation started, Sam and the other Japanese or Japanese-Americans at Madison would hide in the cornfields whenever immigration officials came looking for Japanese persons.) For approximately one

year Sumi lived with her parents in an army barracks at the camp, eating in the communal dining area, using a latrine, and working every day in the agriculture department as a secretary, for \$19 per month. One day, Sumi received a box of home-baked peanut-butter cookies from someone named Sam. Sam had sent the cookies as part of a thank you to Sumi's family, who had helped Sam's family with a financial transaction at a time when Japanese bank assets were frozen. Sumi wrote back asking for more cookies. Sam, in turn, helped arrange for Sumi to get early release from camp, in order to attend Emmanuel Missionary College, through the auspices of A.N. Nelson, then dean at EMC, but formerly president of Saniku Gakuin when Sam was a student there. Sumi, in turn, decided to pass through Madison on her train trip to EMC, to meet Sam. They met and got acquainted in the home of Perry Webber, and that fall of 1943 found Sam as well as Sumi enrolled for classes at EMC. Sumi worked as a reader in the home economics area for Mrs. Holquist, while Sam worked at the farm and the greenhouse.

The young couple was married on June 12, 1944, at a friend's house in Chicago, and lived in an apartment until Sam's graduation on August 1, 1945, with a BS in agriculture. Their first child, Steve, was born in June of that year. Sumi remembers that a friend drove her to Watervliet, Michigan, where the doctor, sympathizing with her state as a poor student, delivered her baby for free. Sam returned to Japan in 1947 (Sumi and infant Steve followed six months later), and spent ten years helping build up the food factory at Saniku Gakuin. The Yoshimuras returned to Tennessee in 1957, where Sam became production manager at Madison Foods. Continued. Address: M.A., Prof. of English, Andrews Univ., Berrien Springs, Michigan 49104.

3592. Moncrieff, Scott. 2009. What the Sam's Chicken? The true story of the man behind the meat. Part II. *Focus (The Andrews University Magazine)* 45(4):20-23. Fall.

• **Summary:** Continued: "Near the end of the time he worked there, he began developing Sam's Chicken '1.0,' a canned product. In 1963, Sam resigned from Madison Foods and began work as an independent consultant for Madison Hospital. He also did independent research using the hospital's facilities at night, working on, among other things, improving Sam's Chicken. As far as Sam knows, it was the first product to mix wheat gluten with soy or tofu. Sam says the product was made 'by blending tofu, wheat gluten, and other ingredients; the mixture was whipped, shaped into a loaf, baked briefly to sterilize it, torn into chunks, dipped into batter, then deep-fried to yield a delectable "meatless chicken"' (soyinfo.com).

"Sumi, who had gone on to get her BS in dietetics from Loma Linda University, was working as director of the Madison Hospital cafeteria, and used Sam's Chicken in the cafeteria with great success. What couldn't be consumed by the hospital was sent on to local self-supporting schools like

Little Creek and Fountain Head.

"Around 1966, Sam went to work at Harding Hospital for Worthington Foods. While there, he developed Sam's Chicken as a frozen product, and further tinkered with the recipe, which included soaking it in a buttermilk and egg batter overnight, prior to dipping it in a bread-crum and spice mixture and deep-fat frying it. It was shortly after this time, probably 1969 or 1970, when the Andrews cafeteria, under the leadership of Clinton Wall, began using Sam's Chicken, according to Ruth Roberts, who worked with Wall.

"Of his many accomplishments in the food technology industry, however, Sam himself was especially pleased to be loaned by Worthington Foods to help the country of Uganda with improving its food supplies for school children and women. Over a six-month period in 1969, he and his team, along with workers from UNICEF, developed porridge, roasted soybeans, and soyflour-enhanced bread for more nutritious school lunches.

"Sam and Sumi, now long retired, live in a suburb of Sacramento, California. And it appears that the ever-popular Sam's Chicken will tantalize the taste buds of new generations of Andrews students. As you wash down your last morsel with some grape juice, here are two last bits of the story to chew on. First, 'Sam's Chicken' has always been an unofficial name. The official Worthington product from which it is made is called 'Chic-ketts.' Second, Sam depended heavily on Sumi to give him feedback on the 'meaty' taste of his product. She ate real chicken, while the only meat occasionally eaten by Sam, the Sultan of Soy and illustrious innovator in a long line of meatless meat products, was fish."

3593. Esselstyn, Rip. 2009. *The Engine 2 diet: the Texas firefighter's 28-day save-your-life plan that lowers cholesterol and burns away the pounds*. New York, NY: Wellness Central. xiii + 273 p. Foreword by T. Colin Campbell, PhD. Illust. Index. 24 cm.

• **Summary:** A very interesting, readable, and innovative book that advocates a sound, healthy diet that can last a lifetime. "Rip managed to convert a firehouse full of committed firefighters to a plant-based diet. Rip (born in 1963) is the eldest son of Caldwell B. Esselstyn, Jr., M.D., who has become famous for his ground-breaking book *How to Prevent and Reverse Heart Disease*. This book is both similar and different. It is similar in that the basic whole foods, plant-based diets advocated by father and son are 98% the same (and please focus on practicing that 98% and not squabbling about the 2%). It is different in that Rip is from a younger generation, is not a physician but an athlete and firefighter, and is trying to help people who want help in lowering their high cholesterol levels and their weight. He is not primarily trying to help people who have had at least one heart attack, are a death's door, and are (generally) willing to do almost anything to save their lives.

In Chapter 2, "My story," we read that while in school, Rip was an outstanding athlete. He set many high school swimming records (he still holds a national record in the 200 meter medley relay); he was a top player in his high school tennis team and co-captain of the water polo team.

At the University of Texas at Austin, he was a three-time All American swimmer and an Olympic trials qualifier in the 100- and 200-meter backstroke and freestyle events. In 1986 he graduated from the University of Texas and within six months he was competing as a professional triathlete—which required a 1-mile swim, a 24.9 mile bike ride, and a 6.2 mile run. In the Hawaii Ironman Triathlon he competed against six-time Ironman Champion Dave Scott, who was powered by a plant-based diet—Rip lost. So in 1987, because of the influence of his father and of Dave Scott, Rip changed to a healthy, whole foods, plant-based diet. In 1997 he decided to become a fire fighter in Austin, Texas. He continued to compete and won many events and set many records. For example, in May 2008 he set the National Record at the U.S. Masters Swimming Championship in the 200 yard backstroke (1:56:55). Rip is married to Jill Kolasinski, and they have a son, Kole.

Rip's commitment to a healthy plant-based diet has resulted in many people asking him to help them with their diets. So in 2007, he devised the six-week Engine 2 Pilot Study in which 62 people agreed to eat a plant-strong diet; he put them through a gauntlet of tests before and after study to quantify the results—which were spectacular. Then in May 2008 he initiated a similar 4-week (28 day) study in which 15 people participated, 13 Engine 2 firefighters and two civilians. Again careful before and after records were kept. The average participant saw his total cholesterol drop 62 points (from 197 to 135), his average LDL (bad) cholesterol fall 50 points (from 125 to 74), and his weight drop 14 pounds (from 203 to 189). And all this in only 4 weeks! This book is based on the latter plan.

Rip makes much more use of soyfoods in his plant-based diet than does his father. The index contains 16 entries for tofu, 4 for tempeh, 4 for seitan, 2 for milk substitutes ("soy, rice, almond, and oat milk, for example"), 1 each tofu sour cream (p. 239), soy milk, soy yogurt (Silk or WholeSoy).

Soy related recipes include: Migas especiales (with 1 lb firm tofu, p. 154). Breakfast tacos (with "½ tube vegetarian breakfast sausage {we like Gimme Lean})," or use scrambled tofu (p. 155). E2 omelet (with "12 ounces Silken Lite Firm Tofu," p. 156). Lemon cornmeal pancakes (with "2 cups soy milk" and "½ cup soy yogurt, p. 157). Tofu steaks and mushrooms with mashed potatoes and green peas (with "1 pound extra-firm tofu," p. 180).

Linguine and creamy alfredo sauce (with "1 package Silken Lite firm tofu" and "2 cups unsweetened soy milk," p. 195). Lynn's meatloaf (with "10 ounces firm tofu," p. 204). Vegetable stir-fry with brown rice (with "1 pound seitan"

and “two tablespoons low-sodium tamari,” p. 208). Tempeh-mushroom stir-fry and soba noodles (with “1 package tempeh,” and “3 tablespoons low-sodium tamari,” p. 209). Red vegetable curry and brown rice (with “1 pound extra-firm tofu,” p. 210).

Pad Thai (with “1 pound broiled tofu cubes {see p. 210},” p. 211). The great wooden bowl salad (with “1 pound extra-firm tofu,” p. 214-15). Tofu vegetable spread (with “½ pound extra-firm tofu,” p. 238). E2 sour cream (with “1 package Silken Lite firm tofu,” p. 239). Asian marinade (with “3 tablespoons soy sauce, p. 241). Island marinade (with “4 tablespoons soy sauce,” p. 241). Add tofu and allow to marinate refrigerated for 30 minutes to 4 hours (p. 241). Rip’s favorite snacks include “4. Soy yogurt: I’m particularly fond of the Westsoy... cherry” (p. 243). E2 Basics chocolate pudding (with “1 package Silken Lite tofu,” p. 245). Fruit bowl with soy drizzle (with “4-6 ounce container of soy yogurt,” p. 249). Fruit mousse (with “1 package extra-firm Silken Lite tofu,” p. 255). Maple sour cream dream (with “1 vanilla soy yogurt,” p. 256).

Many recipes call for “Bragg Liquid Aminos” which are simply HVP (hydrolyzed vegetable protein) made by a quick and unnatural / artificial process; soybeans, wheat, and/or corn are immersed in hydrochloric acid until, after 1-3 days, the acid has broken down the protein into its constituent amino acids. Fermentation (as of soy sauce) can do the same thing naturally in 4-6 months. HVP is a source of flavor without salt, but that flavor is generally considered to not nearly as good as the flavor of soy sauce.

Rip has an exercise component to his “Engine 2” 28 day plan.

And Rip gives people a choice as they start the 28 day plan; one can be a Fire Cadet or a Firefighter (p. 22). The “Fire Cadet option is for those who prefer a more gradual approach.” In week 1 Cadets must stop eating dairy products and processed / refined foods (such as refined sugar, white flour, etc.). In week 2 Cadets must stop eating meat, poultry, fish and eggs. In week 3 Cadets must do without added or extracted oils—even vegetable oils such as olive oil. In week 4 Cadets and Firefighters eat the total E2 diet, a healthy, whole-foods, plant-based diet. A Firefighter (the plan Rip recommends) requires that a give up all of these unhealthy foods from the start of the program. “Americans consume a staggering 50 percent of their calories from refined and processed foods.”

Cholesterol-lowering drugs (such as statins: Rip, who is not a physician, does not use them).

Salt and sodium: Rip advocates a low-sodium diet.

Support groups after the 4-week program: Optional. People who wish to can create or find one themselves (p. 92).

Meditation and relaxation to reduce stress: Not part of the program.

Sugar and sweets. Avoid refined sugars, high fructose corn syrups, and things such as sodas, candy to which they

are added. Instead choose natural sugars such as those in whole naturally-sweet fruits (p. 114-15, 134). In desserts, Rip often calls for up to 3-4 tablespoons maple syrup or agave nectar, yet a recipe for Brownies (p. 247) calls for “½ cup light brown sugar, packed” and “½ cup raw sugar.” And a recipe for “Oatmeal raisin cookies” (p. 253) calls for even more refined sugar. Rip admits he has a sweet tooth. Some of his desserts violate the basic principles of the Engine 2 diet; they contain large amounts of refined sugars—unlike the recipes (developed by his mother) in his father’s book. Moreover, his mother strongly suggests that desserts be saved for special occasions.

This is a sound, healthy diet and anyone who stays on it for 28 days will see dramatic improvements in their overall health and weight.

The Engine 2 diet is a good, practical diet for the rest of your life. But go easy on the desserts and try to avoid the ones with refined sugar. Address: Austin, Texas.

3594. Foer, Jonathan Safran. 2009. *Eating animals*. New York: Little, Brown and Company. vii + 341 p. Index. 25 cm. [267 endnotes]

• **Summary:** This is an absolutely superb book—the best book—by far—I have ever read on this subject or on the subject of vegetarianism or animal rights. It is based on deep questioning, and on absolute honesty and intelligence, integrity and fairness. I wish everyone would read this book.

The main subject of the book is factory farming. The book is an in-depth exploration of the factory farm, its history, the fundamental way that it has changed the relationship between farmers and their animals, the way it has radically altered the genetics of the farmed animals, the way it promotes pain, suffering, and disease in these animals, factory farms as breeding grounds for bacteria that are resistant to antibiotics, factory farms as a source of widespread pollution, aquaculture and modern fishing as new types of factory farming, etc.

As of 30 Aug. 2014, this book has 2,034 reviews on Google Books. Of these, 931 are 5 stars (top rating) and 763 are 4 stars.

Contents: Storytelling. All or nothing or something else. Words / meaning. Hiding / seeking. Influence / speechlessness. Slices of paradise / pieces of shit. I do. Storytelling. Acknowledgments. Notes.

As a result of the in-depth knowledge acquired during the writing of this book, the author became a vegan; he does not eat animal products.

“For each animal species, animal agriculture is now dominated by the factory farm—99.9 percent of chickens raised for meat, 97 percent of laying hens, 99 percent of turkeys, 95 percent of pigs, and 78 percent of cattle—but there are still some vibrant alternatives” (p. 109).

The alternatives include: Frank Reese’s turkey farm in Lindsborg, Kansas (p. 110+). Paul Willis’s pig farm in

Thornton, Iowa (p. 165+). Niman Ranch for grass-fed in Bolinas, California. (p. 205+). Each does its best to give its animals or birds a good life and a decent death. They embody traditional American values of animal husbandry.

The following page numbers are in the hardcover edition.

Soy is mentioned on 3 pages in this book: "... corn and soy as far as the eye could see" (p. 165).

"So what kind of crime is animal agriculture, which uses 756 million tons of grain and corn per year, much more than enough to adequately feed the 1.4 billion humans who are living in dire poverty? And that 756 million tons doesn't even include the fact that 98% of the 225-million-ton global soy crop is also fed to farmed animals" (p. 207).

"Those figures assume that livestock is raised in intensive confinement facilities and fed grains and soy from fertilized crop fields. Such data is inapplicable to grazing animals kept entirely on pasture, like grass-fed cattle, goats, sheep, and deer (p. 215).

"The leading scientist investigating energy usage in food production has long been David Pimentel of Cornell University. Pimentel is not an advocate of vegetarianism. He even notes that 'all available evidence suggests that humans are omnivores.' He frequently writes of livestock's important role in world food production. For example, in his seminal work *Food, Energy, and Society*, he notes that livestock plays 'an important role... in providing food for humans.' He goes on to elaborate as follows: 'First, the livestock effectively convert forage growing in the marginal habitat into food suitable for humans. Second, the herds serve as stored food resources. Third, the cattle can be traded for grain during years of inadequate rainfall and poor crop yields.'

"Moreover, asserting that animal farming is inherently bad for the environment fails to comprehend national and world food production from a holistic perspective. Plowing and planting land for crops is inherently environmentally damaging. In fact, many ecosystems have evolved with grazing animals as integral components over tens of thousands of years. Grazing animals are the most ecologically sound way to maintain the integrity of those prairies and grasslands.

"As Wendell Berry has eloquently explained in his writings, the most ecologically sound farms raise plants and animals together. They are modeled on natural ecosystems, with their continual and complex interplay of flora and fauna. Many (probably most) organic fruit and vegetable farmers depend on manure from livestock and poultry as fertilizer."

The word "soybean" appears once: "We aren't exactly emptying the oceans; it's more like clear-cutting a forest with thousands of species to create massive fields with one type of soybean. Trawling and longline fishing aren't only ecologically worrisome; they're cruel" (p. 192).

The word "soybeans" also appears once: "Large windows opened onto the gentle rolls of a classic Iowa

landscape of soybeans, corn, and pasture" (p. 167).

The word "tofu" appears twice in this book. "My father, who did just about all the cooking in our house, raised us on exotics. We ate tofu before tofu was tofu. It's not that he liked the taste, or even that the supposed health benefits were touted as they are now..." (p. 62). "Anyone who suggests that there is a perfect symbiosis between the farmers' interest and the animals' is probably trying to sell you something (and it's not made of tofu)" (p. 168).

"Part memoir and part investigative report, *Eating Animals* is a book that, in the words of the *Los Angeles Times*, places Jonathan Safran Foer 'at the table with our greatest philosophers.'"—From the publisher.

Also available as a CD audiobook. Address: Brooklyn, New York.

3595. **Product Name:** Marinated Tempeh [Smoky Maple Bacon].

**Manufacturer's Name:** Turtle Island Foods, Inc.

**Manufacturer's Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. Phone: 1-888-TOFURKY (863-8759).

**Date of Introduction:** 2010 March.

**Ingredients:** Organic soybeans, water, shoyu soy sauce (water, non-GMO soybeans, wheat, salt, culture), molasses, maple syrup, natural smoke flavor, autolyzed yeast extract, salt, potato maltodextrin, gum arabic, organic apple cider vinegar, starter culture (*Rhizopus oligosporus*). Contains: Soy, wheat. Certified organic by Oregon Tilth.

**Wt/Vol., Packaging, Price:** 7 oz. paperboard box.

**How Stored:** Refrigerated or frozen.

**New Product–Documentation:** Labels (boxes) sent by Seth Tibbott of Turtle Island. 2010. Dec. 15.

3596. Turtle Island Foods, Inc. 2010. Tofurky Vegan Pizzas:

A delicious healthier slice of pie. First vegan frozen pizzas with melting cheese and meat alternatives (Leaflet). Hood River, Oregon. 1 p. Front and back.

• **Summary:** See next page. Front: A color photo shows the front panel of each of the three Tofurky vegan cheese boxes: Vegan Cheese Pizza, Italian Sausage & Fire-Roasted Veggie Pizza, and Pepperoni Pizza. A color photo shows one type of pizza, with a wedge sliced out and being lifted up to show the cheese stretching. Front and center is the rectangular “daiya: deliciously dairy free” logo. Key points: (1) Made with delicious non-dairy cheese. (2) Zero cholesterol. (3) Up to 50% less sodium and 67% less fat than dairy and meat pizzas.” Turtle Island Foods logo. “Since 1980. Family owned and independent.” Across the bottom: www.tofurky.com.

Rear: “How do we do it? We’ve combined our best selling Tofurky Italian Sausage and Pepperoni Slices with the revolutionary Daiya dairy free vegan cheese alternative. Daiya shreds, melts and stretches like dairy based cheese. It is not made with casein, the protein found in dairy products or soy, common to many other non-dairy cheese alternatives. It tastes great and forever puts to bed the old joke: ‘Did you hear about the fire in the vegan cheese plant? The cheese still didn’t melt!’”

A table compares the cholesterol, sodium, fat and saturated fat content of 100 grams of 3 meat and dairy pizzas with each of the three Tofurky pizzas. Ingredients for all 3 Tofurky pizzas are given. Address: P.O. Box 176, Hood River, Oregon 97031.

3597. **Product Name:** Tofurky Vegan Pizzas [Vegan Cheese Pizza, Italian Sausage & Fire-Roasted Veggie Pizza, Pepperoni Pizza].

**Manufacturer’s Name:** Turtle Island Foods, Inc.

**Manufacturer’s Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031.

**Date of Introduction:** 2010 April.

**Ingredients:** Pepperoni: Ingredients: Crust: Whole wheat flour, enriched wheat flour (niacin, iron, thiamine, riboflavin, folic acid), potato flour, water, expeller pressed non-GMO canola oil, yeast, organic sugar, salt, malt (malted barley, wheat flour, dextrose). Sauce: Water, tomato paste, garlic, expeller pressed non-GMO canola oil, salt, oregano, basil. Tofurky Pepperoni: Vital wheat gluten, water, organic tofu (filtered water, organic whole soybeans, magnesium chloride, calcium chloride), expeller pressed non-genetically engineered canola oil, organic brown rice, soy sauce (water, non-genetically engineered soybeans, wheat, salt, culture), non-GMO corn starch, annatto, garbanzo bean flour, white bean flour, oat fiber, lemon juice concentrate, salt, natural flavor, yeast extract, liquid smoke, garlic, fennel seed, red pepper flake, black pepper, lycopene (from tomatoes), calcium lactate, purple carrot juice, glycerin. Vegan Cheese: Filtered water, tapioca and/or arrowroot flours, non-GMO

expeller pressed canola and/or non-GMO expeller pressed safflower oil, coconut oil, pea protein, salt, vegan natural flavors, inactive yeast, vegetable glycerin, xanthan gum, vegan lactic acid (derived from sugar), titanium dioxide (a naturally occurring mineral).

**Wt/Vol., Packaging, Price:** 1 pizza. Net weight 13.6 oz (385 gm).

**How Stored:** Frozen.

**New Product–Documentation:** All three Labels sent by Turtle Island Foods, Inc. 2010. May. Seth Tibbott, founder and owner of Turtle Island Foods, Inc., says these 2 pizzas were first sold commercially in April 2010. The box is: 10.25 x 10.25 x 1 inch deep. Front: A color photo of one type of pizza, with a wedge sliced out and being lifted up to show the cheese stretching. “Family owned and independent since 1980.” “1st non-dairy cheese that really melts.” Meatless and delicious. Zero cholesterol. Vegan. Keep frozen.

Rear: “No pizza eater left behind! In 1995, Tofurky brought vegetarians back to the Thanksgiving table by providing a high protein, cholesterol free option to people who had been left out of the celebration. Today we continue that mission by offering delicious, nutritious frozen vegan pizzas in three bold flavors: Vegan Cheese, Pepperoni and Italian Sausage with Fire Roasted Veggies.

This pizza must be baked in an oven; microwave won’t work. Turtle Island Foods is a “Proud sponsor of” the Humane Society of the United States, whose logo is shown.

3598. United Soybean Board (USB). 2010. Consumer attitudes about nutrition: Insights into nutrition, health, and soyfoods. 17th annual national report. Seattle, Washington: USB. 12 p. Oct. 28 cm.

• **Summary:** Methodology: “This year represents the fifth year we have adopted an online self-administered survey as our methodology, a significant change from random telephone interviews. The survey, conducted by an independent research firm [in Seattle, Washington] in February 2010, includes 1,000 random surveys, providing a sample that is consistent with the total U.S. population. The study’s margin of error remains  $\pm 1.9$  to 3.1%, with a confidence interval of 95 percent.”

**Contents:** Introduction. Methodology. About USB. General nutritional attitudes and concerns. Examining the nutritional facts panel. Obesity concerns. Strategies for improving overall health. Soyfoods and health perceptions. Health reasons for seeking soy. Cooking and salad oil impressions. Soy in the media. FDA-approved health claim. Opinions on biotechnology. Spotlight on biotechnology. Trans fat awareness and opinion. Awareness and usage of soy products. Restaurants and soy products. Occasion preferences for consuming soy.

Awareness and usage: “37% percent of Americans consume soyfoods or soy beverages once a month or more, approximately five percentage points higher than during the

# www.tofurky.com

period between 2006 and 2008. Conversely, 35% indicate that they never consume soy, which has decreased steadily since 2006 (then at 43%). For the seventh year in a row, consumers reported the most familiarity with soymilk, soybean oil, tofu and soy veggie burgers.

“Soymilk continues to be the most regularly consumed soy product, with nearly one-quarter of Americans reporting that they drink it regularly. For comparison, in 1999, 18% of consumers reported that they had tried soymilk. By 2010, the number of consumers who have tried soymilk has more than doubled to 45% of all consumers.

Edamame holds the number two spot and has surpassed veggie burgers among the top three most consumed soyfoods for the past two years. In fact, it has more than tripled in popularity since 2005 (then at 4% and now at 13%). Plain white tofu follows in third place, on par with 2009 at 9%.”

A table shows the “Top 20 soy products by awareness.” Soymilk 90%. Soybean oil 56%. Plain white tofu 56%. Soy veggie burger 54%. Soynuts 40%. Soy protein bars 37%. Soy infant formula 36%. Soy latte / soymilk in espresso coffee drinks [as at Starbucks] 36%. Edamame 34%. Dried or canned soybeans 33%. Cereal bar / energy bar 32%. Miso 29%. Soy ice cream / cheese 28%. Soy yogurt 27%. Soy hot dogs 26%. Flavored / marinated tofu 24%. Soy supplements 21%. Soy flour 21%. Soy breakfast cereal 18%. Textured soy protein 16%. All others mentioned 14% or less.

Occasion preferences for consuming soy (in descending order of preference): dinner 39%, breakfast 30%, lunch 22%, mid-afternoon snacking 19%, late evening snacking 13%, mid-morning snacking 9%, desserts 5%.

“In 2010, 84% of consumers rate soy products as healthy, down one percentage points from 2009.” A graph (p. 6) shows this increase in awareness (82% in 2006, 78% in 2005, 74% in 2004, 74% in 2003, 74% in 2002, 69% in 2001, 76% in 2000, 71% in 1999, 67% in 1998).

Note: As of Oct. 2010 this full survey is available gratis in PDF format at [www.soyconnection.com/health\\_nutrition/pdf/](http://www.soyconnection.com/health_nutrition/pdf/).

**3599. Product Name:** Tofurky Vegetarian Feast.

**Manufacturer’s Name:** Turtle Island Foods, Inc.

**Manufacturer’s Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. Distributor: P.O. Box 233, Trout Lake, WA 98650. Phone: 1-888-TOFURKY (863-8759).

**Date of Introduction:** 2010 October.

**Ingredients:** Roast: Water, vital wheat gluten, organic tofu (filtered water, organic whole soybeans, magnesium chloride, calcium chloride), expeller pressed non-genetically engineered canola oil, natural vegetarian flavors, shoyu soy sauce (water, non-genetically engineered soybeans, wheat, salt, culture), non-genetically engineered corn starch, white bean flour, garbanzo bean flour, lemon juice from concentrate, onion, carrots, celery, salt, calcium lactate from

beets. Contains: Soy and wheat.

**Stuffing:** Organic brown rice, whole wheat bread cubes (whole wheat, filtered water, unbleached wheat flour, organic evaporated cane juice, organic palm oil, sea salt, yeast, natural enzymes, ascorbic acid), onion, celery, expeller pressed non-genetically engineered canola oil, organic wild rice, natural vegetarian seasoning, granulated garlic, herbs and spices. Contains: Wheat.

**“Giblet Gravy:** Water, whole wheat flour, expeller pressed non-genetically engineered canola oil, Tofurky giblets (water, vital wheat gluten, organic tofu [filtered water, organic whole soybeans, magnesium chloride, calcium chloride], expeller pressed non-genetically engineered canola oil, natural vegetarian flavors, shoyu soy sauce [water, non-genetically engineered soybeans, wheat, salt, culture], non-genetically engineered corn starch, white bean flour, garbanzo bean flour, lemon juice from concentrate, onion, carrot, celery, salt, calcium lactate from beets), natural vegetarian flavors, onion, carrot, celery, corn starch, salt, sunflower oil, thyme, rosemary. Contains: Soy and wheat.

**Chocolate Cake:** Filtered water, organic evaporated cane juice, organic wheat flour, organic expeller pressed high oleic safflower oil and/or sunflower oil, organic cocoa powder, organic apple cider vinegar, baking soda, organic vanilla extract, sea salt. Contains: Wheat.

**Tofurky Jurky Wishstix:** Water, vital wheat gluten, organic tofu (filtered water, organic whole soybeans, magnesium chloride, calcium chloride), non-genetically engineered canola oil, natural vegetarian flavors, shoyu soy sauce (water, non-genetically engineered soybeans, wheat, salt, culture), non-genetically engineered corn starch, white bean flour, garbanzo bean flour, organic evaporated cane juice, granulated garlic, lemon juice from concentrate, onion, carrots, celery, salt, calcium lactate from beets. Contains: Soy and wheat.

**Wt/Vol., Packaging, Price:** 3 lb 8 oz (1.59 kg).

**How Stored:** Frozen.

**New Product–Documentation:** Package sent by Seth Tibbott, founder and owner of Turtle Island Foods. 2010. April. Packaged in a colorful paperboard box. 8½ by 6½ by 4 inches. Front: A large color photo shows the Tofurky Feast, sliced and with gravy and “Now with Amy’s Dessert.” White, red, black and green on reddish purple. Serves 6. “Family owned & independent since 1980.” “New 20% larger stuffed tofu roast. Tofurky “giblet” gravy. New organic chocolate cake. Tofurky Jurky Wishstix. Happy Tofurky Day card and coupons. Vegan.”

“The sales of both items are mostly equal but the Roast and Gravy is growing faster and we sell a few more of these at this point.”

**3600. Product Name:** Tofurky Roast & Gravy.

**Manufacturer’s Name:** Turtle Island Foods, Inc.

**Manufacturer’s Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. Distributor: P.O. Box 233, Trout Lake, WA 98650. Phone: 1-888-TOFURKY (863-8759).

**Date of Introduction:** 2010 October.

**Ingredients:** Roast: Water, vital wheat gluten, organic tofu (filtered water, organic whole soybeans, magnesium chloride, calcium chloride), expeller pressed non-genetically engineered canola oil, natural vegetarian flavors, shoyu soy sauce (water, non-genetically engineered soybeans, wheat, salt, culture), non-genetically engineered corn starch, white bean flour, garbanzo bean flour, lemon juice from concentrate, onion, carrots, celery, salt, calcium lactate from beets. Contains: Soy and wheat.

Stuffing: Organic brown rice, whole wheat bread cubes

(whole wheat, filtered water, unbleached wheat flour, organic evaporated cane juice, organic palm oil, sea salt, yeast, natural enzymes, ascorbic acid), onion, celery, expeller pressed non-genetically engineered canola oil, organic wild rice, natural vegetarian seasoning, granulated garlic, herbs and spices. Contains: Wheat.

“Giblet” Gravy: Water, whole wheat flour, expeller pressed non-genetically engineered canola oil, Tofurky giblets (water, vital wheat gluten, organic tofu [filtered water, organic whole soybeans, magnesium chloride, calcium chloride], expeller pressed non-genetically engineered canola oil, natural vegetarian flavors, shoyu soy sauce [water, non-genetically engineered soybeans, wheat, salt, culture], non-genetically engineered corn starch, white bean flour, garbanzo bean flour, lemon juice from concentrate, onion, carrot, celery, salt, calcium lactate from beets), natural vegetarian flavors, onion, carrot, celery, corn starch, salt, sunflower oil, thyme, rosemary. Contains: Soy and wheat.

**Wt/Vol., Packaging, Price:** 2 lb 8 oz (1.13 kg).

**How Stored:** Refrigerated.

**New Product–Documentation:** This refrigerated product was first sold in 2005, however the box was slightly different from this 2010 version. Package sent by Seth Tibbott, founder and owner of Turtle Island Foods. 2010. April.

Packaged in a colorful paperboard box. 8½ by 6½ by 4 inches. Front: A large color photo shows the Tofurky Roast & Gravy White, red, black and green on a green background. Serves 5. Round Turtle Island logo. “Family owned & independent since 1980.” “Gourmet. meatless and delicious. Serves 5. A 100% vegan treat. Includes a tender, juicy stuffed tofu roast and rich ‘giblet’ gravy. Keep refrigerated. Vegan.”

Side: Nutrition facts and ingredients. “Proud supporter of The Humane Society of America” With Humane Society logo. (c) 2010 Turtle Island Foods, Hood River, Oregon 91031 Product of the USA tofurky.com into@tofurky.com. “America’s #1 turkey alternative since 1995.”

Note: This product is different from the Tofu Vegetarian Feast in several ways: (1) It weighs 1 pound less and serves 5 instead of six. (2) It does not contain the Amy’s chocolate cake or the Tofurky Jurky Wishstix. (3) The retail price is less. (4) It is sold refrigerated.

E-mail from Seth Tibbott, founder and owner of Turtle Island Foods. 2014. July 30. “The green Tofurky Roast and Gravy combo box has always been a refrigerated item. It was first sold to Trader Joes in 2005. It has never been sold in the natural channel (Whole Foods, etc) but is now sold in many mainstream grocery stores coast to coast. The sales of both items are mostly equal but the Roast and Gravy is growing faster and we sell a few more of these at this point.

“The Tofurky Feast is frozen and primarily natural channel; roast and gravy refrigerated. This is a nice separation of channels so Whole Foods does not compete with Safeway.

“We still support Humane Society of the United States (HSUS) but not on the package. Too controversial / polarizing.

“We support a lot of non-profits and hope to do more. Long story.

“Seven of our products are certified non-GMO by the Non-GMO Project. Others hopefully on the way but they are not set up to deal with products like ours. Long story but everything here has always been sourced non-GMO.”

**3601. Product Name:** Italian Tempeh Sausage (Mild, or Spicy).

**Manufacturer’s Name:** Hearty Vegan (The).

**Manufacturer’s Address:** Bastrop, Texas.

**Date of Introduction:** 2010 November.

**New Product–Documentation:** E-mail from Rebecca “Beth” Taylor. 2011. Oct. 9.

“I stopped making tempeh in early 2006 and then started again in July 2010. This time I was in a commercial kitchen attached to the Bastrop Producers Market in Bastrop, Texas, which is 30 miles from Austin. I sold it in their market and still sell it there. In September, 2010, I started selling tempeh to the Wheatsville Food Co-op.

“I started making and selling Italian Tempeh Sausage to those two stores in November, 2010. My daughter joined my

company in December 2010.”

**3602. Product Name:** [Veggie Breakfast Patties].

**Foreign Name:** Galettes végétariennes pour le petit-déjeuner.

**Manufacturer’s Name:** Sol Cuisine.

**Manufacturer’s Address:** Mississauga, Ontario, Canada L4X 2G6.

**Date of Introduction:** 2010.

**Ingredients:** 2013: Filtered water, soy protein concentrate, sunflower oil, torula yeast, yeast extract, modified cellulose, organic evaporated cane juice, spices, sea salt, onion powder, caramel color, vitamins & minerals.

**Wt/Vol., Packaging, Price:** 6 meatless breakfast patties. 228 gm.

**How Stored:** Frozen.

**New Product–Documentation:** Current (2013) label sent by Lorraine Guardino of Sol Cuisine. 2013. March 11. She ads a note that this product was introduced in 2010. “90% less fat than pork sausage.”

**3603. Hackett, Jolinda; Bull, Lorena Novak. 2010. The everything vegan cookbook: 300 recipes for any occasion! Avon, Massachusetts: Adams Media. x + 294 p. Index. 24 x 21 cm.**

• **Summary:** The book begins: “Dear Reader: When I decided to give up eggs and dairy, I asked every vegan I knew for their advice. One sentiment always stood out: ‘Learn to cook.’”

Chapter 11, titled “Tofu” (p. 219-42) contains 26 tofu recipes of great variety and creativity. Chapter 12, “Seitan, TVP, and tempeh” (p. 243-65) contains 23 recipes, including homemade seitan.

Other soy related recipes: Vegan mayonnaise (with “1 12-ounce block silken tofu,” p. 23). Vegan “pigs” in a blanket (with vegan hot dogs, p. 24). Vegan tzatziki (with soy yogurt, p. 30). Chili masala tofu scramble (p. 38). Quick tofu breakfast burrito (p. 42). Strawberry protein smoothie (with silken tofu, p. 43). Granola breakfast parfait (with soy yogurt, p. 46). Baked “sausage” and mushroom frittata (with vegetarian sausage or “beef” crumbles, p. 53). Creamy miso sesame dressing (p. 61). Tempeh dill “chicken” salad (p. 64). Edamame salad (p. 73). Winter seitan stew (p. 88). Saucy Chinese vegetables with seitan or tempeh (p. 105). Barley pilaf with edamame and roasted red peppers (p. 185). Cheesy macaroni and “hamburger” casserole (with veggie burgers, p. 210). TVP taco “meat” (taco filling, p. 250). Homemade baked seitan (p. 251).

Many other recipes call for soy milk or soy cream. Jolinda Hackett has been a vegetarian for nearly 20 years and a “plant-based vegan” for nearly ten. Address: 1. Santa Barbara, California; 2. RD [Registered Dietitian], Riverside, California.

3604. Schmidt, Henry. 2011. Re: History of Henry's Tempeh in Canada. Letter (e-mail) to William Shurtleff at Soyinfo Center, Jan. 12. 2 p.

• **Summary:** Henry Schmidt was born in 1948 in Winnipeg, Manitoba, Canada. His parents were farmers. He attended high school in Gretna, Manitoba, and graduated from the University of Manitoba, with a B.A. in sociology and psychology. In 1975 he left Manitoba and moved to Ontario, to pursue graduate studies in sociology at the University of Waterloo.

"1998–Daughter (Katrina) introduces me to tempeh via the statement of "I have an idea" and "The Book of Tempeh." Research led me to conclude: (1) That tempeh is a good food—good for the eater and good for the planet. (2) Consumption of tempeh is / will be a growing market. (3) There are a limited number of tempeh producers in Canada and there is opportunity for another one.

"Helped daughter, Katrina, establish a tempeh production facility on Saltspring Island (British Columbia), called Saltspring Tempeh. Note: Henry didn't live on Saltspring Island; his daughter did. After helping her to start her business, he returned home to Ontario. Tempeh production ceased on Saltspring in 2004.

2000—The company I was working with/for (senior housing development and management) was sold and I needed to find new employment. Having been in different business ventures with partners I had a desire to start a business all on my own. The tempeh business seemed to fit the bill. So about 8 years ago I moved to Ontario, from British Columbia, Canada, in order to gain access to a larger market, and to bypass the expensive process of transporting tempeh from an island (Saltspring) onto the mainland.

2000 Oct.—I sold my first tempeh to a retail outlet on Scott St. in Kitchener, Ontario, Canada. Started with one variety of tempeh (SoyKasha) and one year later introduced the second, SoyOnly. Using a unique production process we are able to produce tempeh that is mild in flavour, attractive in appearance and fresh to the consumer (i.e., not frozen). For several years I "flogged"—promoted (cold calling) and delivered—the product to health food stores.

2003—Started working with a health food distributor in Toronto area.

2004—Introduced a tempeh burger, discontinued after one year; decided to stick to our knitting and do what we do best—make excellent tempeh—and leave the value-added products for others to do. See next page.

2005—Had a website developed (traded tempeh for its development) website [www.tempeh.ca](http://www.tempeh.ca)

March—Introduced 3 more varieties of tempeh: SoyBasil, SoyCurry and SoyRedPepper.

Starting working with a second health food distributor, expanded coverage to include areas east to the coast and west to the prairies.

2010—Growth has been steady and organic; primary

promotion is word-of-mouth from satisfied consumers and via demos at health food stores and trade shows

Currently our tempeh is sold primarily in health food stores though some main stream grocery stores (Toronto area) also carry our product.

Henry's favorite is SoyKasha Tempeh (the buckwheat gives it a nutty flavor) but the SoyOnly is the best-seller. Address: Henry's Tempeh Inc., 237 Arnold St., Kitchener, ON N2H 6E8. Phone: 519-748-8677.

3605. Tibbott, Seth. 2011. Update on tempeh, Tofurky and Turtle Island (Interview). *SoyaScan Notes*. Jan. 19. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** Tempeh sales constituted about 10.7% of Turtle Island's total sales last year; the remaining 89.3% was Tofurky products. "The various types of Tofurky have steadily become our dominant products by far. Yet sales of all our tempeh products increased 39.8% during calendar year 2010. The increase was in two areas: In March 2009 we launched tempeh strips [Marinated Tempeh] in 3 flavors (Lemon Pepper, Coconut Curry, and Sesame Garlic), and packaged each in a nice box. In June 2010 we added a fourth flavor—Smoky Maple Bacon." The 39.8% sales increase figure refers to sales of these tempeh strips (4 SKUs, in a 12-pack to the natural food market and a 6-pack to the mass market) and sales of cake tempeh and tempeh strips to the mass market. Last year, Seth sold 27,000 cases of tempeh strips and 29,000 cases of tempeh cakes (of various types) in the natural foods market. Seth has been selling tempeh in cakes for about 30 years, but in strips for less than 2 years. So the strips (which weigh 7 oz per individual package) have caught on very rapidly and are almost at the level of the cakes (which weigh 8 oz per individual). In short, natural foods customers like flavored, heat-and-serve, 2nd generation tempeh products. But here's the kicker; sales of the strips are growing fastest in the mass market (supermarkets), where Seth sells about 10 times as many cases of strips as he does cakes. And its just getting started. In places like North Carolina and South Carolina they just can't get enough of these 6-pack cases of marinated strips.

Turtle Island was already in mass supermarkets in the southeastern United States, but by mid-2011 the tempeh products were added as line extensions in those accounts—especially in Florida, North Carolina, South Carolina, and Georgia, in that order. The Sesame Garlic and the Smoky Maple flavors are the best sellers in the line.

There are a growing number of voices in America talking about the health and flavor benefits of fermented foods.

Seth's tempeh sales (all cakes) (all types) were \$472,000 in calendar year 2002, rising to \$1.3 million in 2009. So sales of tempeh cakes are way up compared with 10 years ago.

The biggest tempeh maker in the USA by far is Lightlife Foods (in Massachusetts); they make about 10 times as

much tempeh (Fakin' Bacon and cake tempeh) as Turtle Island. No. 2 is Turtle Island, followed by Hain ("Where good brands go to die"—which now makes Westsoy Tempeh, which was originally made by Steve Demos of White Wave and is probably still made at the former White Wave plant in Boulder, Colorado), then (in the natural foods market) Surata Soyfoods (Oregon), Northern Soy / Soy Boy (Rochester, New York), Rhapsody (Vermont), Wildwood Natural Foods (Pulmuone, southern California, made by Turtle Island), Bountiful Bean (Madison, Wisconsin), Central Soyfoods (Lawrence, Kansas), 21st Century Foods (Jamaica Plain, Massachusetts), Sweet Earth (Birmingham, Alabama), M Café, and Hearty Vegan (Texas).

In the SPINS data there is no category for tempeh alone; rather the category is "Tempeh and Seitan." That category was \$6.1 million in 2006, increasing to \$6.5 million in 2009—but those numbers are inaccurate because Whole Foods recently stopped selling its data to SPINS.

How long will Seth continue to be in charge of his business? Good question. His stepson, Jaime Athos, who is extremely bright, has a PhD in neurobiology from the University of Washington (Seattle), is a vegetarian, and has good business sense, is "chomping at the bit" to take over the business from Seth. Seth wants to continue working there, but perhaps in an emeritus position and as chairman of the board. Seth's 60th birthday is coming up on April 20, 2011, so he has to start thinking about succession and what else he wants to do. He is considering starting a foundation.

Yet his basic financial situation is "rags to better rags; it's not rags to riches." Seth does not have a big attraction to money. "It's never been about money for me. In 1980 when I was first starting Turtle Island on my 2,500 bucks, I had never taken a class in business, but there were these free classes from the SBA [Small Business Administration] on how to start and run a business. So I figured, well, it's free and I don't have any money, so I'd better go there and learn about business. So I go the first class and this guy stands up there and his first question to this room-full of entrepreneurs is: 'How many of you people are out there to save the world?' And my hand shot up. I looked around and no one else's hand was up. And I go, 'Oh god. It's a rhetorical question. I just flunked my first business exam.' And then he goes, 'How many of you are out there to make money?' Every hand shot up. The place went wild. I was embarrassed—but... I see myself as the cosmic goof—the least likely person to succeed in business. Anyone with a good work ethic, little luck, a good product—so long as she doesn't take herself too seriously—can succeed in business.

"When I was younger, I was always this humorous guy. But when I started a business making tempeh I suddenly transformed into this serious guy. The conventional wisdom was—you don't want to make this funny; just play it straight. You don't wanna upset the middle class with a joke. And I lost tons of money. It was only when I came out with this

wacky Tofurky product, that people thought was a joke, did I start making money. Humor started creeping into the way Turtle Island presented itself at that time. The subject lent itself naturally to humor. "I could feel I was letting my true self come through in the business."

One important development: Pasteurizing tempeh by using vacuum sealing for longer refrigerated shelf life. This has been taking place since the mid-1990s, but it has been steadily improved. Refrigerated tempeh has a better texture and flavor than frozen, and requires much less energy use.

Also: People are increasingly becoming aware of the many important benefits of fermented foods and fermented soyfoods.

There has been a shakeup at Lightlife Foods. Top management has been asked to leave Turner Falls and move to Conagra Headquarters in Omaha, Nebraska. At least one top manager has quit.

In June 2010 Turtle Island launched a new product which has, so far, been extremely successful—Tofurky Pizza (vegan), in 3 SKUs. The cheese they use is the remarkable new tapioca-based Daiya Vegan Cheese, made by Daiya Foods, a relatively small start-up company in Vancouver, Canada ([www.daiyafoods.com](http://www.daiyafoods.com)) that was founded in mid-2007 by Andre Kroecher and Greg Blake. They have taken the cheese-alternative category by storm. You can find shredded pieces of Daiya at any Whole Foods Market in the non-dairy cheese section.

Seth asks:

"Have you heard the joke about the fire in the vegetarian cheese factory? Everything melted except the cheese!" This non-dairy cheese really melts and stretches, is gooey and tastes great. Amy's owns the natural foods pizza category but Seth's 3 vegan pizzas are moving up fast on the charts. They started to be sold commercially in June 2010.

Sales of the three Tofurky products (Roast & Gravy, Feast, and Roast) reached 353,250 units in calendar year 2010. Sales have increased every year since Turtle Island started making the product in about 1995. The number sold has increased every year as follows (numbers prior to 2002 were rounded off to the nearest thousand): 1995—500. 1996—1,500. 1997—18,000. 1998—45,000. 2000—84,000. 2002—118,000. 2004—152,070. 2006—201,108 (one millionth Tofurky roast sold!). 2008—308,436. 2009—339,996 (two millionth Tofurky roast sold!). 2010—353,250. Total: 2,360,734.

Tofurky Feast (3.5 lbs): First sold in November 1995. Gone through several incarnations of size and product offerings. Current pack holds: two pound Tofurky Stuffed Roast, 14 oz Savory Tofurky Gravy, 11 oz Amy's Vegan Chocolate Cake, one set of Tofurky Jurky Wishstixs, Happy Tofurky Day card, coupons for Tofurky products. Sold Frozen, mainly in Natural Foods stores like Whole Foods, Berkley Bowl, etc.

The Tofurky Roast has always had tofu in it; the first

two years it was all tofu, no wheat gluten. In 1997 wheat gluten was added to give more turkey-like texture and to aid in freeze/thaw process. Tempeh Drumettes were part of the original Tofurky Feast but were replaced with Cranberry Apple Potato Dumplings in 2003, which were in turn replaced with Amy's Vegan Chocolate Cake in 2010.

**Tofurky Roast (26 oz):** First sold in October 2002. Only the Tofurky Stuffed Roast. Sold Frozen, mainly in Natural Foods market.

**Tofurky Roast and Gravy (2.5 lbs):** First sold in October 2005. Includes one 26 oz Tofurky Stuffed Roast and 14 oz of Savory Tofurky Gravy. Sold Refrigerated in Mass Market accounts like Trader Joes, Publix, Safeway, etc. Address: President and Founder, Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: (503) 386-7766.

3606. Turtle Island Foods, Inc. 2011. The leader of the pack: America's #1 brand of meatless sausages (Leaflet). Hood River, Oregon. 1 p. Front and back.

• **Summary:** See next page. Front: A color photo shows the front panel of Tofurky Kielbasa, Tofurky Beer Brats, and Tofurky Italian Sausage packets. In the lower right is a huge sausage with grill marks between buns atop all the trimmings on a blue plate. On the top bun is a stamp which reads: "Approved: Outdoor Grill." In the lower left front: "KSA Parve. Vegan. Since 1980. Family owned and independent. www.tofurky.com."

Rear: Gives ingredients and nutrition facts for all three products. Non-GMO Project logo. Key points: (1) #1 selling brand of Meatless Sausages in USA Natural and Conventional Markets (according to SPINS/AC Nielsen 52 weeks ending 12/25/2010). (2) #1 selling item in Refrigerated Natural Foods (216 items) (Tofurky Italian Sausage). (3) Big juicy size and taste, Great for outdoor grills! (4) Organic tofu based. (5) Vegan and kosher. (6) The only meatless sausage certified Non-GMO. Address: P.O. Box 176, Hood River, Oregon 97031.

3607. Specter, Michael. 2011. Test-tube burgers: How long will it be before you can eat meat that was made in a lab? *Annals of science. New Yorker*. May 23. p. 32.

• **Summary:** About Willem van Eelen and his quest to grow meat outside of the body. It began to look possible in 1981 when stem cells were discovered in mice. In 1999 van Eelen received U.S. and international patents for the Industrial Production of Meat Using Cell Culture Methods. Now a new discipline is emerging, propelled by an unlikely combination of stem-cell biologists, tissue engineers, animal-rights activists, and environmentalists.

3608. **Product Name:** Tofurky Slices [Pepperoni].  
**Manufacturer's Name:** Turtle Island Foods, Inc.  
**Manufacturer's Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031.

**Date of Introduction:** 2011 June.

**Ingredients:** Vital wheat gluten, water, organic tofu (filtered water, organic whole soybeans, magnesium chloride, calcium chloride), expeller pressed non-genetically engineered canola oil, organic brown rice, soy sauce (water, non-genetically engineered soybeans, wheat, salt, culture), non-GMO corn starch, annatto, garbanzo bean flour, white bean flour, lemon juice concentrate, salt, vegan natural flavor, yeast extract, liquid smoke, garlic, fennel seed, red pepper flakes, black pepper, lycopene from tomatoes, calcium lactate from beets, purple carrot juice, vegetable glycerin. Contains: Wheat and soy.

**Wt/Vol., Packaging, Price:** 4 oz (113 gm) vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Label sent by Seth Tibbott, founder of Turtle Island, 2011. July. 5 by 5.5 inches. Paperboard box. White, green, gold and black on red. Color photo shows a slice of the pizza. Front panel: "Family owned and independent since 1980." "Meatless, Gourmet and Delicious. Vegan. KSA Parve." On the rear panel is a serving suggestions. And: www.Tofurky.com.

Letter (e-mail) from Seth. 2012. Nov. 13. "Pepperoni Deli Slices first shipped June 1, 2011 according to my records."

3609. Turtle Island Foods. 2011. Environmentally friendly Tofurky plant breaks ground in Hood River (News release). Hood River, Oregon. 1 p. July 22.

• **Summary:** "Hood River, Oregon–Turtle Island Foods, home of the famous Tofurky, broke ground today on a new 10 million dollar production facility to help meet the growing demand for the company's fast growing family of meat alternatives. The new plant will be 33,000 square feet in size and built on 1.5 acres of land purchased from the Port of Hood River about 200 yards from the banks of the Columbia River, just north of the town of Hood River.

"The building is being environmentally designed to achieve LEED certification, hopefully LEED Platinum which is the highest level of LEED certification. There are currently only 5 other buildings in the world with LEED Platinum certification. The company is also collaborating with the Portland Audubon Society to implement a 'green roof' to create not only bird habitat but also a pleasing visual appearance to the Port of Hood River Industrial Area. A bocce court and two miniature golf putting holes will make the roof more people friendly in the whimsical spirit of the Tofurky brand. The current production facility at 601 Industrial Avenue will be retained for tempeh production and renovated for future line extensions.

"Turtle Island Foods was founded in 1980 by Seth Tibbott who invested his life savings of \$2500 and started making tempeh, a soy product from Indonesia, at the Hope Coop in Forest Grove, OR. The company moved to Husum, Washington in 1982 and to the Graf building at 601

# The Leader of the Pack

America's # 1 Brand of Meatless Sausages

**VEGAN**

[www.tofurky.com](http://www.tofurky.com)

Industrial Avenue in Hood River in 1992. The company's fortunes changed in November 1995 with the introduction to the market of the first Tofurky Feast which became an overnight success and magnet for the nation's media. Today, the Tofurky brand has grown to the 2nd largest brand of refrigerated and frozen meat alternatives in the USA with a year to date growth rate of 25% in 2011. In addition to the traditional holiday Tofurky Feasts, the Tofurky line now contains category leading deli slices, sausages and pizzas and can be found in over 4,000 retail natural food stores and supermarkets across the US and Canada.

"The new plant construction project is being managed by Jaime Athos, Vice President of Operations at Turtle Island Foods. 'In our case, the decision to attempt to achieve the highest level of LEED certification was a no brainer. It is an authentic expression of both the mission of our company and the personal values of my family.'"

Note: "Leadership in Energy and Environmental Design (LEED) is an internationally recognized green building certification system, providing third-party verification that a building or community was designed and built using strategies intended to improve performance in metrics such as energy savings, water efficiency, CO2 emissions reduction, improved indoor environmental quality, and stewardship of resources and sensitivity to their impacts.

"Developed by the U.S. Green Building Council (USGBC), and spearheaded by LEED founding chairman Robert K. Watson, LEED is intended to provide building owners and operators a concise framework for identifying and implementing practical and measurable green building design, construction, operations and maintenance solutions.

"Since its inception in 1998, the U.S. Green Building

Council has grown to encompass more than 7,000 projects in the United States and 30 countries covering over 1.501 billion square feet (140 km) of development area" (Source of Note: Wikipedia at Leadership in Energy and Environmental Design, retrieved 2011 Aug. 5). Address: P.O. Box 176, Hood River, Oregon 97031.

3610. Turtle Island Foods. 2011. Project description. Hood River, Oregon. 2 p. July 22. Unpublished typescript.

• **Summary:** Turtle Island Foods is an exemplary food processing facility development. With the combination of the following three powerfully significant achievements, Turtle Island Foods represents the first of its kind in the nation:

**LEED Platinum:** Turtle Island Foods is tracking USGBC's LEED Platinum certification. This is a difficult hurdle to achieve for any commercially built project, much more so for a food processing facility project with large equipment process energy consumption. There are not many LEED Platinum food processing buildings in the world.

**High efficiency mechanical and food processing equipment:** Re-use of waste heating and cooling:

The other green building accomplishments of Turtle Island Foods are as impressive as they are extensive:

**Site selection:**

Repurposed site of former telephone company yard.

Turtle Island Foods is less than ½ mile from downtown Hood River and has pedestrian connections to existing residential neighborhoods, and numerous services.

With these proximities, the project will limit parking to code minimum.

Parking area will include spaces dedicated to highly efficient vehicles, low emission vehicles, and car sharing

programs

There will be extensive parking for bicycles along with showers and changing areas to encourage use.

Landscaping, green roof and open space reduces the building's heat island effect

The green roof feature will feature native species, which will improve the areas natural habitat.

Storm water systems are designed to limit event discharges, and improve water quality.

Site lighting is designed to limited "light pollution" of the nighttime sky.

Water Efficiency

The project achieves 40% water efficiency over code through the use of dual flush toilets, ultra-low flow showerheads and lavatories

The native landscape plan will require no potable water irrigation after the plants are established

Green Roof will mitigate storm water overflows and reduces the heat island effect of development in the city

Energy Efficiency

An 86 KW photovoltaic solar array is mounted on the roof, powering common areas electric and plug loads as well as an electric car charging station that will be available to the public. This will generate over 100,000 kWh of power annually.

Overall building efficiency is 40% more efficient than the Oregon building code

No harmful ozone depleting refrigerants were used

A highly efficient central ammonia based refrigeration system is being used.

Heat recovery from the refrigeration system will be used as heating source where needed.

Off site monitoring will direct renewable power to the facility when available

Material and Resources

Materials with superior durability were used for high traffic areas

Over 45% of all materials were specified and purchased with recycled content AND were regionally sourced within 500 miles of the project

All steel and concrete fabricated within 300 miles of Hood River.

95% of construction and demolition waste will be recycled, greatly eliminating the impacts on local landfills and making those materials available to be used again for some other purpose

Accessible garbage and recycling collection makes recycling easy.

Indoor Environmental Quality

Turtle Island Foods is naturally ventilated through large operable windows in all units and outdoor air delivery from the roof top to the corridors

Toxic materials were either eliminated or greatly reduced through the specification of low emitting paints,

sealants, carpets and finishes

Walk off mats will trap pollutants and other air quality contaminants from entering the building.

Because of the large window, Turtle Island Foods provides for the building occupants a connection between indoor spaces and the outdoor through the introduction of daylight into 75% (minimum) of regularly occupied areas of the building and views of the outdoors for 90% (minimum) of the regularly occupied areas of the building.

Innovation:

In addition to the ground breaking installation of a solar powered EV charging station at a car share facility, Turtle Island Foods innovates in these ways too:

Turtle Island Foods has committed to provide Green Housekeeping practices throughout the common areas. This will reduce the use of toxic cleaning materials, and providing non-toxic cleaning products to all residents when they move in and for the first 6 months of residency.

Tax Incentives: BETC credits

Oregon Department of Energy will provide Business Energy Tax Credits through its Sustainable Building program and also some funds from the Renewable Energy Incentive program.

3611. *SoyaScan Notes*. 2011. How big is the market for meat alternatives in the United States? (Overview). Oct. 4. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** Not all major distributors sell their statistics to aggregators, so these are only relative statistics.

First, in the natural foods channel / market: Sales of refrigerated meat alternatives for the year ending Aug. 2011 were at least \$51.6 million. This was comprised of the following categories:

Refrigerated meat alternatives other 26.8% (up 21.7% over previous year).

Refrigerated meatless deli products 19.8% (up 2.7%).

Refrigerated tempeh 19.3% (up 14.0%).

Refrigerated meatless dogs (like hot dogs) 11.2% (up 4.4%).

Refrigerated meatless ground (like ground beef or pork) 8.23% (down 1.0%).

Refrigerated meatless breakfast alternatives 4.27% (down 7.1%).

Refrigerated meatless burgers 2.11% (down 16.2%).

The category as a whole was up 8.4% in dollar value over the previous year.

Now looking at the mainstream / mass market (including conventional supermarket chains): Sales of refrigerated meat alternatives for the year ending Aug. 2011 were at least \$65.9 million. This was comprised of the following categories:

Refrigerated meat alternatives other 32.9% (up 4.3% over previous year).

Refrigerated meatless deli products 20.8% (up 5.5%).

Refrigerated meatless dogs (like hot dogs) 18.7% (up 0.0%).

Refrigerated meatless ground 12.9% (down 3.9%).

Refrigerated meatless burgers 6.04% (up 4.0%).

Refrigerated tempeh 4.75% (up 14.1%).

Refrigerated meatless breakfast alternatives 3.07% (up 0.7%).

The category as a whole was up 3.0% in dollar value over the previous year. Address: Founder & Director, Soyinfo Center, P.O. Box 234, Lafayette, California 94549.

3612. Iino, Maki. 2011. O-tofuya-san [A tofu maker / shop]. *Kagaku no Tomo*. Nov. 28 p. [Jap]

• **Summary:** This monthly magazine, titled “Friend of Science,” is published for Japanese school children. This delightful November issue, written and illustrated by Maki Iino, follows a mother and her son as they visit the neighborhood tofu shop early in the morning and see the fresh tofu products in the window where the wife is selling them. The tofu maker kindly shows the boy every step in the process of making soymilk, then tofu, and preparing deep-fried tofu pouches (aburagé), cutlets (atsugagé) and tofu burgers (ganmodoki). The text is written entirely in hiragana (no Chinese characters) so young students can read along as they look at the large, charming color illustrations.

A smaller 8-page insert gives additional details. Address: Japan. Phone: 05 62 18 72 78. E-mail: info@soy.fr.

3613. United Soybean Board (USB). 2012. Consumer attitudes about nutrition: Insights into nutrition, health, and soyfoods. 18th annual. 2011 edition. Seattle, Washington: USB. [12] p. March. 28 cm.

• **Summary:** Methodology: “This year represents the sixth year we have adopted an online self-administered survey as our methodology, a significant change from random telephone interviews. The survey, conducted by an independent research firm [in Seattle, Washington] in January 2011, includes 1,000 random surveys, providing a sample that is consistent with the total U.S. population. The study’s margin of error remains  $\pm 1.9$  to 3.1%, with a confidence interval of 95 percent.”

Note about the methodology of this survey from Mark Messina, PhD, who asked one of the survey’s designers. 2012. May 29. “The participants in the consumer survey

represent US demographics. The only difference with this survey compared to previous ones is that rather than interviewing the consumers by phone, once contacted, the consumers are directed to a web site where they fill out the survey.”

Contents: Introduction. Methodology. About USB. Consumers aim to choose healthier foods. Consumers examine the good and bad of nutrition facts. Effective strategies in improving overall health [about choice of amounts and types of fats; does not mention exercise]. Who is to blame for obesity? (Individuals 28%, the fast-food industry 18%). Soyfoods receive healthy rating (In 2011 81% of consumers rated soy products as healthy, with only 5% rating them as unhealthy. A graph shows “Awareness of soy as healthy” from 1998 (67%), to a peak of 85% in 2007 and 2008, falling to 81% in 2011). General nutritional attitudes and concerns. Examining the nutritional facts panel. Obesity concerns. Strategies for improving overall health. Soyfoods and health perceptions. Health reasons for seeking soy. Cooking and salad oil impressions. Soy in the media. FDA-approved health claim. Opinions on biotechnology. Spotlight on biotechnology. Trans fat awareness and opinion. Awareness and usage of soy products. Restaurants and soy products. Occasion preferences for consuming soy.

Awareness and usage: “37% percent of Americans consume soyfoods or soy beverages once a month or more, approximately five percentage points higher than during the period between 2006 and 2008. Conversely, 35% indicate that they never consume soy, which has decreased steadily since 2006 (then at 43%). For the seventh year in a row, consumers reported the most familiarity with soymilk, soybean oil, tofu and soy veggie burgers.

“Soymilk continues to be the most regularly consumed soy product, with nearly one-quarter of Americans reporting that they drink it regularly. For comparison, in 1999, 18% of consumers reported that they had tried soymilk. By 2010, the number of consumers who have tried soymilk has more than doubled to 45% of all consumers.

Edamame holds the number two spot and has surpassed veggie burgers among the top three most consumed soyfoods for the past two years. In fact, it has more than tripled in popularity since 2005 (then at 4% and now at 13%). “Plain white tofu” follows in third place, on par with 2009 at 9%.”

A table shows the “Top 20 soy products by awareness.” Soymilk 90%. Soybean oil 56%. Plain white tofu 56%. Soy veggie burger 54%. Soynuts 40%. Soy protein bars 37%. Soy infant formula 36%. Soy latte / soymilk in espresso coffee drinks [as at Starbucks] 36%. Edamame 34%. Dried or canned soybeans 33%. Cereal bar / energy bar 32%. Miso 29%. Soy ice cream / cheese 28%. Soy yogurt 27%. Soy hot dogs 26%. Flavored / marinated tofu 24%. Soy supplements 21%. Soy flour 21%. Soy breakfast cereal 18%. Textured soy protein 16%. All others mentioned 14% or less.

Occasion preferences for consuming soy (in descending

order of preference): dinner 39%, breakfast 30%, lunch 22%, mid-afternoon snacking 19%, late evening snacking 13%, mid-morning snacking 9%, desserts 5%.

"In 2010, 84% of consumers rate soy products as healthy, down one percentage points from 2009." A graph (p. 6) shows this increase in awareness (82% in 2006, 78% in 2005, 74% in 2004, 74% in 2003, 74% in 2002, 69% in 2001, 76% in 2000, 71% in 1999, 67% in 1998).

Note 1. As of March 2012 this full survey is available gratis in PDF format at [www.soyconnection.com/health\\_nutrition/pdf/](http://www.soyconnection.com/health_nutrition/pdf/).

Note 2. This survey is hard to cite and to use because it has no page numbers. It is hard to read when printed since much of the type is too light / pale. We appreciate the correct spelling (as one word) of the words soyfoods and soymilk.

**3614. Product Name:** Viana Smoked Veggie Frankfurters, Viana Veggie Bratwurst.

**Manufacturer's Name:** Tofutown North America (Importer / Marketer). Made in Germany by Tofutown.com.

**Manufacturer's Address:** P.O. Box 1186, Charlottesville, Virginia 22902. Phone: [www.viana-usa.com](http://www.viana-usa.com).

**Date of Introduction:** 2012 April.

**Ingredients:** Viana Smoked Veggie Frankfurters: Tofu\* (soybeans\*, water, nigari), water, wheat protein\*, sunflower oil\*, tomato paste, spices, sea salt, raw cane sugar, garlic, yeast, locust bean gum, almond flour, celeriac, onion, mustard \* = Certified USDA Organic. Contains almonds, soy and wheat.

**Wt/Vol., Packaging, Price:** 9.7 oz (275 gm).

**How Stored:** Refrigerated.

**New Product–Documentation:** One sample of each (product with Label) with sales sheet and business card sent by Jon Kessler, Sales and Marketing Director, Tofutown North America. 2012. July 30. Front panel of Smoked Veggie Frankfurters: Color photo of product ready to eat in a bun with mustard and all the traditional garnishes / trimmings. USDA Organic. "Kids love it. Listen to your heart. 0% cholesterol. GMO free. Traditional German smokehouse. Gourmet vegan meat alternative. Heat and serve!" Inside each paperboard box is the brown, product vacuum-packed in thick plastic film. Letter (e-mail) from Jon Kessler. 2012. Aug. 10. Gives the date each product was first sold commercially.

**3615. Product Name:** Tofurky [Ground Beef Style, Chorizo Style].

**Manufacturer's Name:** Turtle Island Foods, Inc.

**Manufacturer's Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031.

**Date of Introduction:** 2012 April.

**Ingredients:** Ground Beef Style: Water, organic soy flour, expeller pressed non-GMO canola oil, vinegar, autolyzed yeast extract, natural vegetarian flavor, sea salt, garlic,

onion powder, spices, xanthan gum, gum arabic, non-GMO caramel coloring, dicalcium phosphate. Contains: Wheat and soy.

**Wt/Vol., Packaging, Price:** 12 oz (340 gm) vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Both labels sent by Seth

Tibbott, founder of Turtle Island, 2012. Nov. 19. Seth says these two products were both first shipped in April 2012.

**3616. Product Name:** Tofurky Hot Dogs, Tofurky Jumbo Hot Dogs.

**Manufacturer's Name:** Turtle Island Foods, Inc.

**Manufacturer's Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031.

**Date of Introduction:** 2012 April.

**Ingredients:** Jumbo: Water, vital wheat gluten, expeller pressed non-GMO canola oil, pea protein, organic tofu (water, organic soybeans, magnesium chloride, calcium chloride), spices, sea salt, onion powder, organic cane sugar, natural vegetarian flavors, oat fiber, carrageenan, konjac flour, natural smoke flavor, granulated garlic, wheat starch, paprika, and annatto. Contains wheat and soy.

**Wt/Vol., Packaging, Price:** 12 oz (340 gm) vacuum pack.

**How Stored:** Refrigerated.

**New Product–Documentation:** Both labels sent by Seth Tibbott, founder of Turtle Island, 2012. Nov. 19. Seth says these two products were both first shipped in April 2012.

3617. Palmer, Sharon. 2012. *The plant-powered diet: The lifelong eating plan for achieving optimal health, beginning today.* New York, NY: The Experiment. xx + 412 p. Foreword by David L. Katz, MD, MPH. [228 ref]

• **Summary:** A positive attitude toward traditional soyfoods is found throughout this excellent book. The traditional Japanese diet (p. 19-20)—one of the healthiest—leads to an average life expectancy of 80 years for men and 85 years for women. The Japanese diet is characterized by a “Focus on soy foods. Whole soyfoods such as edamame, tofu, and miso are regular features of the diet.”

The section titled “Soy, the superfood” (p. 58-59) describes the basic types of soyfoods and their benefits. The next section is “A word about soy meat alternatives” (p. 60-61) including veggie burgers, soy meat crumbles, and vegetarian hot dogs.

The “Plant-based dairy alternatives guide” (p. 72-76) includes various types of soy milk, soy milk yogurt, and soy ice cream.

The word “soy” appears on 55 pages of this book, “tofu” on 54 pages, “tempeh” on 18 pages, “soy foods” on 17 pages, “seitan” on 15 pages, “edamame” on 10 pages, “soybeans” on 10 pages, “soy milk” on 8 pages, “soy sauce” on 6 pages, “miso” on 6 pages, “soy milk yogurt,” “soy ice cream” and “soybean oil” on 2 pages each, and “soy cheese” and “soy cream cheese” on 1 page each.

Includes “75 original plant-based recipes for every meal—all with nutritional data.” “A 14-day meal plan with action alerts to get you started.” “Essential information on the healthiest plant food—whole grains, vegetables, fruits, nuts, legumes, and even herbs, spices, dark chocolate (rich in polyphenol antioxidants), coffee (contains many beneficial

antioxidants), tea (rich in polyphenol antioxidants, and takes the place of high-calorie, high-sugar drinks), and wine.

Virginia Messina, in her blog *The Vegan RD*, says this: “It’s a book that makes the scientific case for eating fewer animal products and more plant foods while admitting that there is no precise definition for ‘plant-based diet.’ The information in the book is balanced, honest, and practical, and the recipes—which appear to all be vegan—look really nice. In the forward to the book, Dr. David Katz, of the Yale University Prevention Research Center says this about Sharon’s book: ‘So much of modern health advice is about marketing a particular perspective that such a balanced and moderate approach is a truly surprising and welcome departure.’

“I agree, and it’s the thing that made this book stand out for me. Admittedly, I wish the book had included more perspective on making compassionate food choices. When animals are part of the discussion (and I think they should always be part of the discussion) a vegan diet is the one and only best way to eat. When the focus moves away from animals, then diet-related issues become somewhat less clear. So far, no one has proven that a vegan diet is healthier than other plant-based ways of eating, and it’s unlikely that they ever will. So, this isn’t a book I would use to promote veganism—it presents a vegan option, but not a vegan imperative—but, it is one I would use to promote healthy plant-based eating for those who are looking for that type of information.”

About the author: “Sharon received her Bachelor of Sciences Degree with Honors from Loma Linda University, California. She enjoyed a diverse 16-year dietetics career with experiences as a clinical dietitian, wellness dietitian, chief clinical dietitian, food and nutrition services director, and consultant dietitian.” Address: RD (Registered Dietitian), P.O. Box 1052, Duarte, California 91009.

3618. Turtle Island Foods, Inc. 2012. *First annual Tofurky Trot set for Thanksgiving Day* (news release). Hood River, Oregon. 2 p. Nov. 16.

• **Summary:** See next page. “Hood River, OR. Turtle Island Foods, home of the famous Tofurky, announced today that it would sponsor the first annual ‘Tofurky Trot’ at Oaks Bottom Natural Area in Portland Oregon starting at 9 am Thursday November 22, 2012. Participants are asked to bring non perishable vegan food or donate \$20 to an organization serving vegan food in New York City to those residents affected by Hurricane Sandy. Runners will receive a free Tofurky Roast and Tofurky T shirt at the completion of their 3.9 mile run/walk. President and founder, Seth Tibbott plans to run the course wearing a large rendition of the iconic Tofurky Roast packaging.

“This is a great morning to get some exercise and support some great causes. Next year we hope to expand the Tofurky Trot to other US cities across the United States and

## PRESS RELEASE

### FIRST ANNUAL TOFURKY TROT SET FOR THANKSGIVING DAY

Canada.’

The Tofurky Trot will start from the Refuge Parking lot just off the Milwaukie exit from SE Mclaughlin Avenue.

“The Tofurky Roast is a savory combination of organic tofu, wheat protein [gluten], plant extracts and spices that give it a taste and texture similar to a boneless breast of turkey stuffed with a wild rice, celery and whole wheat bread crumb stuffing. Tofurky has become an iconic mainstay at hundreds of thousands of holiday celebrations since it’s introduction in Portland, Oregon in 1995. This year, the company sold the 3 millionth Tofurky Roast. And it’s not just vegetarians who are driving up Tofurky Roast sales so swiftly. According the USDA, Americans will consume 12.5% less turkey meat than they did in 2008 and a 2011 Harris Poll commissioned by the Vegetarian Resource Group of Baltimore, Maryland concluded that 17% of Americans now eat 50% of all their meals without meat.” Address: Founder, Turtle Island Foods.

3619. Turtle Island Foods, Inc. 2013. One giant leap for plant based foods: Historic grand opening of the new LEED Platinum Tofurky plant, September 2013 (Invitation). P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. 3 p. Jan. 28.

• **Summary:** This invitation was sent as an attachment to an e-mail in the form of a 3-page PowerPoint presentation.

On page 2, titled “Our new home,” are five color photos in and around the 33,000 square foot plant. It is the 10th food plant in the world to receive LEED platinum. In the upper right corner is the “U.S. Green Building Council (USGBC) Leed Platinum logo. In the upper left corner, photos of two parking signs show that “Priority parking” is given to (1) Electric and hybrid cars, (2) Carpool vehicles.

Note: LEED stands for “Leadership in Energy and Environmental Design.” The USGBC was established in 1998 (Source: Wikipedia, at LEED).

Page 3, “Save the date,” has a huge color photo of Mount Hood and the Tofurky plant (aerial view, on right half of page). The left half explains: “Grand Opening Weekend. September 6,7,8 2013. Hood River, Oregon. Plant Tours. Golf and Bocce Tournaments. Banquet with speakers. First Annual ‘Tofurky Trot’ 5K fun run. Rafting, Hiking, Wine tasting. General Merriment for whole family.” Address: Hood River, Oregon.

3620. Turtle Island Foods, Inc. 2013. Tofurky baseball cap (Memorabilia). Hood River, Oregon.

• **Summary:** Sent to Soyinfo Center by Turtle Island Foods. 2014. July 28. Made by eConscious (in China) using 100% organic cotton, it has an adjustable strap at the back, is beige in color with “Tofurky” embroidered in artichoke-green in large bold letters across the front.

Talk with Seth Tibbott, founder and owner of Turtle Island Foods. 2014. July 28. This cap first became available

in July 2013. It comes in five colors: Beige, olive, blue, white and brown. Address: P.O. Box 176, 601 Industrial Ave., Hood River, OR 97301. Phone: 1-800-508-8100.

3621. Turtle Island Foods, Inc. 2013. Tofurky (T-shirt). Hood River, Oregon.

• **Summary:** Sent to Soyinfo Center by Turtle Island Foods. 2014. July 28.

Made by anvill.organic (in Nicaragua) using 100% organic cotton, it is dark purple in color. In the center of the chest is a stencil of what looks like a cake of tofu (white) with two large black and white eyes and an

orange beak and a red turkey’s hanging below it. On both sides are short stick arms and white-gloved hands. Across the top are five white vertical feathers. Extending down from the bottom are two short stick legs and orange feet somewhat resembling a turkey’s feet. Below that, in all white lowercase letters, is the word “tofurky.”

Talk with Seth Tibbott, founder and owner of Turtle Island Foods. 2014. July 28. This T-shirt first became available in July 2013. The Tofurky on the front was designed by the winner of a recent contest. It is not a new company logo. Address: P.O. Box 176, 601 Industrial Ave., Hood River, OR 97301. Phone: 1-800-508-8100.

3622. Liptak, Adam. 2013. Supreme Court appears to defend patent on soybean. *New York Times*. Feb. 19.

• **Summary:** “The question in the case, *Bowman v. Monsanto Company*, No. 11-796, was whether patent rights [apply] to seeds and other things that can replicate themselves extend beyond the first generation.” Monsanto had sued Bowman, a farmer age 75, for buying seed from an elevator filled with a mix of seeds (some of which were almost sure to be Roundup Ready) then planted them.

Justice Stephen G. Breyer said that among the things Mr. Bowman could do with the seed he had bought from the grain elevator was to feed it to animals, feed it to his family, or “make tofu turkeys.” However he could not make copies of a patented invention. The U.S. Attorney General’s office (i.e., the U.S. government) filed a brief in support of Monsanto.

Note: This may be the first time that tofu was mentioned during oral arguments at the Supreme Court.

3623. Guardino, Lorraine. 2013. How Soy City Foods (in Toronto, Ontario, Canada) was transformed into Sol Cuisine by Dror Balshine (Interview). *SoyaScan Notes*. Feb. 28. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** During the 1970s Lorraine was part of a

meditation group—and doing other “weird” things; she was not on the scene until 1983, but she is familiar with the early history of Soy City Foods and Sol Cuisine.

In 1980 Soy City Foods started as a tofu company (at 2847 Dundas Street West), in order to supply their very successful restaurant, named The Vegetarian Restaurant, which had opened in 1976 at 542 Yonge Street by Wellesly; that was their first little company. It was one of the first vegetarian restaurants in Toronto; Annapurna was the other. However, the restaurant simply couldn't find a source of good tofu.

The Vegetarian Restaurant was established by Golden Age, Inc., a group of 28-30 like-minded young friends. Each person invested about \$1,000 to get it started. Being young, everyone had a lot of energy. The Vegetarian Restaurant was very profitable—initially—and that money enabled it to start Soy City Foods. It was worker owned—a cooperative. The only original restaurant manager Lorraine knows of and can confirm was Paul Dunlop.

Pat Guardino was hired to build the tofu shop because he was a welder. Pat went down to New Hampshire and apprenticed / studied with Jay and Pat Gibbons, owners and operators of Crystal Springs Tofu Shop (renamed North Country Soyfoods by summer 1980) in Bethlehem, New Hampshire; during the week he was there, he learned the basics of making tofu and tofu equipment.

The goal of Soy City Foods shop was to bring Toronto a “clean protein.” The main owners of the shop ended up being Pat Guardino & Paul Whitehead. However everyone who worked at the Soy City Foods owned it, and all the capital came from these workers.

Also in 1980 a second The Vegetarian Restaurant was opened on Dundonald Street (which is just off of Wellesly Street) along side of Soy City Foods. The owners / workers called the new restaurant the “West End” and the original one the “Downtown.” Both restaurants operated together for about 15 years—from 1980 until about 1995 or 1996, when the Downtown closed, because of dwindling profits and aging staff. When this restaurant had opened at its original downtown location in the mid-1970s there were lots of profits, because the restaurant was very unique. But as the years went on, almost every restaurant in Toronto began to offer good vegetarian food. So the uniqueness dwindled quite a bit as vegetarian food became more widely available. Moreover, leasing and renting rates skyrocketed in the downtown Toronto area. Soy City developed an excellent distribution network and several of their veggie burgers had gone into the larger grocery store chain in Ontario. They were also selling across Canada in foodservice, which ended up being Soy City's largest market. In Canada, in the university market, it was a requirement that each university provide two vegetarian options for breakfast, lunch, and dinner. That became the driver for Soy City's growth at the time. They ended up selling their tofu in bulk

to the university market, and one of the contract catering companies sent their chefs to the west end Vegetarian Restaurant for a week and learned how to cook vegetarian cuisine. Soy City developed two veggie burgers for them and they chose which one they preferred—which was called the Soy City Veggie Burger and which contained both soybeans and okara. That is still sold by Sol Cuisine, but it is now called the Almond Grain Burger. Soy City made an ongoing effort to use okara in foods. “It was very difficult for all of us who worked there to see such a beautiful protein and fiber be thrown away. So our Soysage used a lot of okara, as did a falafel and the veggie burger.”

Why did Soy City Foods want to sell? The worker population was aging and they were outgrowing the very small facility as the demand for tofu and veggie burgers steadily grew. Basically the worker-owners made the decision to sell rather than to invest more money and continue on at low wages and personal sacrifice. By 2002 two-thirds of the company's sales were via foodservice. Yet total sales were just under \$1 million (Canadian).

In 2002 Dror Balshine bought Soy City Foods, He was a young entrepreneur, in his early '30s. He already had a business in Toronto named Second Nature that sold veggie burgers and dry veggie burger mix. He did not have a manufacturing facility; his products were co-packed for him. He was already dedicated to vegetarianism and he used textured soy protein concentrate in his burgers. Lorraine, who was the sales manager of Soy City Foods, already knew Dror who she often met at food shows. She called him and discussed the possibility of his buying the company. He was interested and before long he decided to buy it.

One of the first things Dror did was to change the name to Sol Cuisine. The tofu continued to be sold under the brand / banner of Soy City Foods, and it is only now that the Soy City Foods name is being phased out. This tofu began to be made with organic soybeans in about 1985 and that tradition continued under Sol Cuisine. Shortly after buying Soy City Foods, Dror moved it to Mississauga (5715 Coopers Ave., Unit 1), just west of Toronto. Shortly after this move was completed, Soy City Foods' food manufacturing plant at 2847 Dundas Street West in Toronto, was closed. They made tofu, tempeh, veggie burgers, falafel, etc. at the new, lower-rent and lower-tax location. Later, the company needed a larger facility, so in Feb. 2008 they moved to their present address at 3249 Lenworth Drive, Mississauga (about 10 minutes drive south of 5715 Coopers Ave.). All foods that Sol Cuisine now sells (except the Sol-Dog, a veggie hot dog) are made at the plant on Lenworth Drive. The Sol-Dog is sold only to foodservice. When they moved to Lenworth Drive, they became a HACCP facility and also stopped making tempeh; the cross contamination of the tempeh spores was too strong. Dror is committed to making only vegan foods and to verification by the non-GMO Project (they are very thorough) and to organic when possible. And,

all but one of their products are now gluten-free.

Foods shown on a 2005 leaflet include T-Ribz (now called Organic Barbecued Ribz; made from their own tofu, sliced put in a package with their own sauce on top; sold fresh in Canada and frozen in the USA for about 18 months). Organic T-Nuggets (cubed tofu that was marinated, breaded and baked; never sold as a retail product, no longer made). Organic Sol-Ground (now the Veggie Crumble), 3 vegetarian burgers (they now make a total of 5 soy burgers in the retail market; the main ingredient is verified non-GMO TVP, made by ADM).

What was the Soyateria? It was Soy City's soy deli in Toronto that opened in April 1981. The public could come in and have a pita bread sandwich, or buy bulk tofu. There was a little menu. One popular dish was tofu, coated in Engivita nutritional yeast, then sauteed on the grill with sauteed onions and mushrooms and a sauce. The Soyateria did a lot of experimentation to learn what recipes and products people liked. They made tofu cheesecakes, tofu pumpkin pie, bulk soymilk, soft soy ice cream, etc. Lorraine began working there part time in 1983 (it was a short walk from her home) while raising a family. She left her good-paying job at the Royal Bank to work at the Soyateria! It was a lot of fun. But after 5-6 years it went out of business.

John Escavel, who is still production manager at Sol Cuisine, started working at Soy City Foods in about 1980 or 1981. He has an excellent memory, so he is a good person to talk with about the company's history. Address: Sales Manager, Sol Cuisine, 3249 Lenworth Drive, Mississauga, ONT L4X 2G6 Canada. Phone: 905-502-8500 x 221.

3624. Cloud, Jon. 2013. How Jon got involved with Soy City Foods in Toronto, Ontario, Canada (Interview). *SoyaScan Notes*. March 6. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** Jon was first introduced to tofu in the 1960s in Southeast Asia. Golden Age Foods—a religious organization and a collective—was the parent company of Soy City Foods, and eventually owned 2 restaurants and a deli. Soy City Foods was started in 1980 as part of the religious group. Pat Guardino, a welder, built the tofu-making equipment. Jon arranged for Pat to be trained in making tofu by Jay and Pat Gibbons, founders and owners of Crystal Hills Tofu Shop in Bethlehem, New Hampshire. Jon had previously learned how to make tofu at that same tofu shop, and at that time he became very interested in okara. Later in 1980, when Jon arrived in Toronto, Canada, Soy City Foods was “having a terrible time financially, as well as from a tofu product standpoint.” Trying to build your own tofu equipment is very difficult and this equipment did not work well. Pat struggled with the shop for about 4 months. The cycle time (to make one batch of tofu) was much too long—2 to 3 hours to cook the soymilk. “It was a fiasco.” The long, low-temperature cooking of the soymilk to deactivate the trypsin inhibitor

caused the proteins to stick to the side of the cooker, which produced a substance very similar to Naugahyde—an American brand of artificial leather. People used to ask Jon how many Naugas it took to make a Naugahyde jacket.

Throughout this time Jon was still in the United States; he knew of these problems because he talked to people at Soy City Foods by phone. In 1972 Jon bought a farm in Vermont; that same year he started a natural food distribution company which he named Cloud Mountain. Jon was farming organically (on about 40 acres as a side job) in Vermont and he had his own health food distribution company. Jon also grew some short-season soybeans. At one point he went to the University of Illinois at Urbana-Champaign and studied agronomy and how farmers grew crops before 1938—when the application of nitrate fertilizers started. Jon did not want to use any chemicals on his land. He was also one of the founders of Community College of Vermont, which became State College of Vermont.

In 1980 Jon's wife decided to join Golden Age in Toronto, so the two decided to move with their daughter to Canada. Jon never returned to his beautiful farm in Vermont. He and his family spent two months in Buffalo, New York, waiting for their application for a visa to reside in Canada was approved. During this time he distributed Soysage (whose main ingredient was okara, made at Crystal Hills in New Hampshire), honeys, apple juice / cider, etc. When Jon and his family arrived in Toronto, he went to Soy City Foods. Things were still not going well. “They were getting killed financially, and people were just standing around waiting for soymilk to boil.” They had a meeting and asked him if he would like to “take over” Soy City Foods. He said that he would, since he could see that someone needed to. He and Pat Guardino are really good friends; “I love him dearly and he has a Mentat (brilliant) mind.” At that time Pat, who was really a welder at heart, bowed out, and let Jon take over. Jon streamlined the tofu-making operation until they had a cycle time of about 23½ minutes. But it was hard work. “You couldn't fire anyone; it was a guaranteed job.”

After things began to run more smoothly, Jon spent more and more of his time in the fields recruiting soybean growers, contracting with them, and training them how to grow soybeans organically—and also how to grow all of the crops (including soybeans, wheat, open-pollinated corn, winter rye, buckwheat, and spelt) in the 7-year rotation he had developed. Crop rotation is essential, he has learned, for organic farming to really work. Everyone wanted Soy City Foods to use organic soybeans. Jon loved this organic work, and it enabled him to apply everything that he had learned in Illinois and Vermont. He organized 32 workshops, developed 80 slides, and 82 fact sheets. Jon also contracted to buy all the various crops these farmers grew. Out of that came Cloud Mountain (of Canada), his company that sold organic crops; he sold that company in 1992 to SunOpta. Jon contributed heavily to the financial construction of Soy City Foods.

At one point the Seed Breeders of Canada asked Jon to join their registration committee, named the Ontario Oil and Protein Seed Crop Committee; he was on it for 8 years. There he met Dr. Harvey Voldeng (a plant breeder at Agriculture Canada, Central Experimental Farm, Ottawa) and Gary Ablett (a soybean breeder at Ridgetown College) who became his mentors and friends.

Jon left Soy City in about 1993, shortly after his divorce in 1992. He took Cloud Mountain with him.

Jon has earned three masters degrees and is now working on a 4th at the University of Guelph. Address: Cloud Holding Inc., 342 Indian Rd. Cres., Toronto, ONT M6P 2H1 Canada. Phone: (905) 939 2962 or (416) 762-0940.

3625. Mintel. 2013. Who eats meat alternatives today? 36% of Americans!

• **Summary:** This bar chart shows: 46% of Americans age 18-24 use meat alternatives.

- 43% of Americans age 25-34.
- 37% of Americans age 35-44.
- 26% of Americans age 45-54.
- 34% of Americans age 55-64.
- 30% of Americans age 65 and older.

3626. **Product Name:** Tofurky Artisan Sausages [Chick'n & Apple, Spinach Pesto, Andouille–Cajun Style].

**Manufacturer's Name:** Turtle Island Foods, Inc.

**Manufacturer's Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031.

**Date of Introduction:** 2013 April.

**Ingredients:** Spinach Pesto: Vital wheat gluten, water, organic tofu (water, organic soybeans, magnesium chloride, calcium chloride), expeller pressed non-genetically engineered canola oil, wheat flour, spinach, wheat berries, shoyu soy sauce (water, non-genetically engineered soybeans,, wheat, salt, culture), basil, natural vegetarian flavors, maltodextrin, garlic puree, lactic acid, salt, onion powder, potassium chloride, oat fiber, granulated garlic, paprika, spices. Contains: Soy, wheat.

**Wt/Vol., Packaging, Price:** Four meatless sausages, shrink wrapped. Net weight 14 oz (997 gm).

**How Stored:** Refrigerated.

**New Product–Documentation:** All three Label sleeves sent by Turtle Island Foods, Inc. 2014. July 27. A note says these were all first sold commercially in April 2013. Four meatless sausages per pack are sold in a black plastic tray, with the sleeve around the middle, sideways. Each

At or near the top of anyone's list of great flavors is authentic Italian pesto. The combination of sweet basil, garlic and Parmesan cheese is enough to make a grown man cry "Mama Mia!" Especially when they realize this tasty version is vegan!

Adding spinach and crushed fennel seeds makes this delightful Italian Sausage a great addition to a variety of sauces and pasta dishes.

**SERVING INSTRUCTIONS:**  
**Stovetop:** (recommended) Chop Sausage into ½" rounds or ovals. Brown in lightly oiled pan. Add your favorite marinara sauce and simmer. Serve over pasta.  
**Microwave:** Place thawed sausage on microwaveable plate and cook on high for 30 seconds. Serve on bun with grilled peppers, onions and marinara sauce.  
**Grill:** Lightly rub each thawed sausage with cooking oil and place on heated grill. Cook until hot, turning occasionally. Do not overcook! Serve on a bun with all the fixings.

Check out [www.Tofurky.com](http://www.Tofurky.com) for great sausage recipes!  
After opening, wrap tightly in plastic bag and refrigerate.

**Ingredients:** Vital wheat gluten, water, organic tofu (water, organic soybeans, magnesium chloride, calcium chloride), expeller pressed non-genetically engineered canola oil, wheat flour, spinach, wheat berries, shoyu soy sauce (water, non-genetically engineered soybeans, wheat, salt, culture), basil, natural vegetarian flavors, maltodextrin, garlic puree, lactic acid, salt, onion powder, potassium chloride, oat fiber, granulated garlic, paprika, spices. **Contains: Soy and wheat.**

• **Summary:** Continued: 1906—Quong Hop & Co. starts making tofu in San Francisco, California. Until Sept. 2010, when it declared bankruptcy, Quong Hop was the oldest existing Chinese-American tofu manufacturer in the USA.

1910—Europe's first commercial soyfoods manufacturer, named Caséo-Sojaïne, is founded by Li Yu-ying, a Chinese citizen, biologist and engineer, at 46-48 Rue Denis Papin, Les Vallées, Colombes (near Asnières), a few miles northwest of Paris. By May 1911 he was making and selling tofu, and by August 1911 he had added smoked tofu, pressed tofu sheets, fermented tofu cheese (in Gruyere, Roquefort, and Camembert flavors), and soymilk.

1911—Ohta Tofu-ten (Ota Tofu Shop) is now making tofu at 266 Davis St., Portland, Oregon. As of 2013 Ota Family Tofu is still making tofu in Portland, Oregon, making it the oldest existing tofu maker in the United States.

1923—The two 2nd oldest existing Japanese-American tofu companies (House Foods & Yamauchi Inc. of Los Angeles and Aala Tofu Co. of Honolulu) are founded in Hawaii. They both began as H. Iwanaga Daufu at 1031 Aala St. in Honolulu. In 1926 the company was renamed Shoshiro Kanehori Tofu, and in 1937 Haruko Uyeda Tofu, still at the same address. In about 1939 the company was purchased by Mr. and Mrs. Shokin Yamauchi, who later renamed it Aala Tofu Co. Their son, Shoan Yamauchi, made tofu at the family company until 1946, when he went to Los Angeles, purchased the Hinode Tofu Co., and began making tofu there in 1947. After becoming Matsuda-Hinode Tofu Co. in 1963, the company was renamed House Foods & Yamauchi Inc. in 1983.

1929 Nov.—T.A. Van Gundy, a Seventh-day Adventist and founder of La Sierra Industries in Arlington, California (near Riverside), becomes the first Westerner to make tofu commercially when he introduces La Sierra Soya Cheese. This tofu was canned and pimiento was added to prevent graying after canning.

1930—Azumaya Tofu Seizo-sho (later renamed Azumaya Co.) starts making tofu, yaki-dofu (grilled tofu), and ganmodoki (fried tofu patties) in San Francisco at 1636 Post St. between Buchanan and Laguna streets. The company is

owned by Mr. Teranishi, who may have started it as early as the early 1920s. In Feb. 1937 it was sold to George and Jack Mizono, and their mother and father (Saichi Mizono).

1932 Dec.—Madison Foods, part of Madison College in Madison, Tennessee, is making Soy Cheese, then by 1939 they had launched Cheze-O-Soy (seasoned tofu), and by 1940 they were making a canned tofu bologna named Yum.

1934—By this year Loma Linda Food Co. (Adventist) in Loma Linda, California, is making Loma Linda Vege-Cheese (canned tofu with pimienta).

1939—Paris Tofu, founded by Joe Gon Fung, starts making tofu at 237 Powell St., Vancouver, BC, Canada. In 1957 the name was changed to Sunrise Market Ltd. and Leslie Joe became the owner.

1942 Sept.—Dr. Harry Miller, a Seventh-day Adventist doctor who had worked for many years in China as a medical missionary, begins making Miller's Soya Cheese (tofu) at Mt. Vernon, Ohio.

1944 Sept.—Butler Food Co. in Cedar Lake, Michigan, introduces Butler's Soynut Cheese. Note that the first five Caucasian-run tofu companies in the Western World were all founded and run by Seventh-day Adventists. Note also that each of these five Seventh-day Adventist tofu products used the word "cheese" in the name and that each was canned.

1957 Aug.—Shizuka Hayashi, head of the Japanese-American Soybean Institute in Tokyo, publishes (in *Soybean Digest*) the earliest English-language statistics on tofu in Japan. "There are approximately 45,000 tofu manufacturers in Japan, of which about 23,000 are members of the Tofu Association. There is one large factory in Osaka, the largest in Japan, which consumes 2 tons of soybeans a day." In 1957 Japan will use somewhere between 160,000 and 308,000 tons of soybeans to make tofu.

1958—The world's first packaged tofu is sold in Los Angeles, California, by Matsuda Hinode Tofu Co. Mr. Shoan Yamauchi, owner, conceived of the idea of putting individual cakes of tofu each in a plastic bag with water, sealing the bag with a heat sealer, placing the bag in a stiff paper deli carton with a wire handle, then folding over the top. The process was labor intensive. This happened at about the same time that a letter from journalist George Yoshinaga had led the city to pass a new regulation requiring tofu to be packaged in individual containers.

1958—Tofu is first sold in a U.S. supermarket, Boys Markets, a supermarket chain which had about 12 stores at the time in Los Angeles. The tofu was sold in individual packages (see above) and made by Matsuda Hinode Tofu Co., whose owner, Mr. Shoan Yamauchi was responsible for this major innovation, and for seeing the mainstream potential of tofu.

1965—The Library of Congress establishes the subject heading "Tofu" as the official name for that food in cataloging books for libraries across America. However, in the mid-1970's disputes arose there about the proper form

of Romanization of that term. The dispute was resolved by the decision to use the common English term "Bean Curd" instead.

1966—Tofu is first packaged in plastic trays/tubs, the type so widely used today. Again, Mr. Shoan Yamauchi conceived of the idea. He went to the Sealright Company in Los Angeles that made Sealright trays and asked them to make a waterproof plastic tray for his tofu. Mr. Yamauchi created three specific early innovations in tray packaging: (1) A very deep tray, holding 26-28 ounces; (2) A method for heat sealing a plastic film to the flange of a tray which had cold water flooding over the flange; (3) High-speed sealing machines to pack and seal the tofu in his plant.

1975 March—Alec Evans, owner of first of the new breed of Caucasian-run tofu shops, starts to make "Tofu" in Corvallis, Oregon. His Welcome Home Bakery and Tofu Shop is the sixth Caucasian-run tofu company in America.

1975 Dec.—*The Book of Tofu*, by Shurtleff and Aoyagi, is published by Autumn Press. This book, which had sold more than 618,000 copies in English-language editions by April 2013, played a major role in introducing tofu to the Western World. Tofu came to the Western world from 1975 on as part of a new wave of interest in vegetarianism.

1976 Jan.—Swan Gardens starts making tofu in St. Ingatius, Montana. Founded by Dick & Jocelyn McIntyre. In 1979 they moved the company to Miami, Florida.

1976 Aug.—Larry Needleman introduces The Learning Tree Tofu Kit (Bodega, California).

1976 Sept.—Farm Food Company starts making tofu as part of their Soy Deli at 820 B. St., San Rafael, California. Robert Dolgin and David Sandler are key figures.

1976 Nov.—Island Spring, Inc. begins making tofu on Vashon Island, Washington state, founded by partners Lukoskie and Sylvia Nogaki.

1977 Jan.—Laughing Grasshopper Tofu Shop starts making tofu in Millers Falls, Massachusetts, founded by Richard Leviton and Kathy Whelan. In Feb. Tom Timmins joined as a partner and by August of that year so did Michael Cohen. In Nov. 1977 Laughing Grasshopper moved to Greenfield, Massachusetts, was renamed New England Soy Dairy, and before long was the largest of the new wave of tofu makers in the United States.

1977 Jan.—The Soy Plant (a worker-owned collective) starts making tofu in Ann Arbor, Michigan. Steve Fiering is a key figure.

1977 March to Oct.—Bean Machine, Inc. (BMI) is established by Larry Needleman with headquarters in northern California. Initially, BMI Orders most of its equipment from Takai Tofu & Soymilk Equipment Co. in Kanazawa, Japan. New tofu companies can order specialized tofu equipment they need from BMI.

1977 May—Flying Cloud Tofu (later renamed The Tofu Shop, then Northern Soy) starts making tofu in Rochester, New York. Greg Weaver, Greg Mello, and Andy Schechter are

key figures.

1977 July—The Tofu Shop starts making tofu in Telluride, Colorado. In 1980 Matthew Schmit moves this tofu shop and soy deli to Arcata, California.

1977 Aug.—Takai Tofu & Soymilk Equipment Co. publishes its first English-language equipment catalog, which helps many American and European tofu shops to get started. Most order their equipment through Bean Machines, Inc.

1977 Sept.—White Wave, founded by Steve Demos, starts making tofu at 1738 Pearl St., Boulder, Colorado.

1977—Morinaga Milk Industry Co., Ltd. in Japan introduces the world's first aseptically packaged tofu in a Tetra Brik carton (see U.S. Patent No. 4,000,326 of 28 Dec. 1976). It is named "Morinaga brand Tofu. Soybean Curd." In 1978 the name was changed to "Morinaga brand Ever-Fresh Silken Tofu." In 1981 the product was first imported into the United States,

1977—Swan Foods Corporation, owned by Robert Brooks and Mary Pung, starts making "Tofu—Organic" at The Soybeanery, 5758½ Bird Rd., Miami, Florida. This is the first tofu in the Western World labeled "Organic." Swan Foods is also the first American company to make a wide variety of soyfoods, and the second to open a soy deli—which had a take-out menu. Continued. Address: Soyinfo Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

**Manufacturer's Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031.

**Date of Introduction:** 2013 July.

**Ingredients:** BBQ Chick'n: Crust—Whole wheat flour, water, enriched wheat flour (wheat flour, niacin, reduced iron, thiamine mononitrate, riboflavin, folic acid), organic cane sugar, non-genetically engineered soybean oil, dough conditioner (calcium sulfate, garlic powder), salt, yeast, starch, ascorbic acid, enriched durum flour (durum flour, iron, niacin, thiamine, riboflavin, folic acid).

Filling—Tofurky Chick'n: (water, vital wheat gluten, organic tofu [water, organic soybeans, magnesium chloride, calcium chloride], expeller pressed non-genetically engineered canola oil, natural vegan flavoring, organic cane sugar, oat fiber, non-genetically engineered corn starch, sea salt, sunflower oil, sesame oil, natural smoke flavor, paprika, granulated garlic, calcium lactate from beets, potassium chloride, spices, titanium dioxide [a naturally occurring mineral], gum arabic, citric acid, onion powder), water, tomato paste, distilled white vinegar, organic cane sugar, molasses powder (molasses, identity preserved maltodextrin), onion powder, garlic powder, natural smoke flavor, sea salt, caramel color, spices, rice starch, brown sugar. Contains: Wheat, soy.

**Wt/Vol., Packaging, Price:** 2 pocket sandwiches. Net weight 9 oz (255 gm) vacuum pack.

**How Stored:** Refrigerated.

**New Product—Documentation:** All three labels sent by Turtle Island Foods, Inc. 2014. July 27. A note says these three were first sold commercially in July 2013. Each paperboard box is 6½ x 6½ x 1.5 inches thick. On the front panel of each is a color photo showing the product. In the lower rear corner is the Human Society of the United States logo. Turtle Island is a "Proud supporter of" this society.

3629. Turtle Island Foods, Inc.. 2013. Fill your pockets with meat free goodness: Introducing Tofurky Pockets (Leaflet). Hood River, Oregon. 1 p. Front and back.

• **Summary:** Front: A color photo shows two pockets, each cut open so the inside is visible, on a white dish. To the right is the front panel of the three Tofurky Pockets products. In the lower left front: "Tofurky. www.tofurky.com. Facebook. com/Tofurkyfan@tofurky." In the lower right front: "Non-GMO, 100% vegan." In the rear is given nutrition facts and ingredients for all three products. Key points: (1) Meat and egg free. (2) Ready in minutes. 3. Microwaveable. 4. Made with organic soy. (5) Non-GMO. (6) Cholesterol free. Address: P.O. Box 176, Hood River, Oregon 97031.

3630. **Product Name:** Tofurky Sausage & Veggie Quiche. Tofurky Chick'n Pot Pie

**Manufacturer's Name:** Turtle Island Foods, Inc.

**Manufacturer's Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031.

**Date of Introduction:** 2013 July.

**Ingredients:** Quiche: Ingredients: Filling—Water, Tofurky

Italian Sausage (organic tofu [water, organic soybeans, magnesium chloride, calcium chloride], vital wheat gluten, expeller pressed non-genetically engineered canola oil, water, shoyu soy sauce (water, non-genetically engineered soybeans, wheat, salt, culture), sun-dried tomatoes, textured wheat protein, basil, black pepper, spices, granulated garlic, salt, chili pepper), organic tofu (filtered water, organic soybeans, magnesium chloride, calcium chloride), organic soy milk (filtered water, whole organic soybeans, carrageenan, sea salt, natural flavor), zucchini, tomatoes, green bell peppers, poblano chiles, red bell peppers, red onions, non-genetically engineered soy protein, vegan cheese (filtered water, tapioca and/or arrowroot flours, non-genetically engineered expeller pressed canola oil and/or expeller pressed safflower oil, coconut oil, pea protein, salt, vegan natural flavors, inactive yeast, vegetable glycerin, xanthan gum, lactic acid [derived from sugar], titanium dioxide [a naturally occurring mineral]), rice starch, nutritional yeast flakes (inactive dry yeast, niacin [B3], thiamine hydrochloride [B1], riboflavin [B2], pyridoxine hydrochloride [B6], vitamin B12 [from natural fermentation, not from a synthetic process or from an animal source]), vegan natural flavors (contains maltodextrin, yeast extract, lactic acid [derived from sugar], natural flavors, salt), spices, dried spinach, carrageenan, konjac, dextrose, potassium chloride, beta carotene (for color), modified vegetable gum, baking powder (monocalcium phosphate, sodium

bicarbonate, non-genetically engineered corn starch), xanthan gum, sea salt. Crust—Whole grain stone ground soft wheat flour, organic Brazilian palm oil, enriched white flour (wheat flour, niacin, reduced iron, thiamin mononitrate, riboflavin, folio acid), water, sugar, salt. Contains: Soy, Wheat, Tree Nuts (Coconut). The Tofurky Company, Turtle Island Foods, P.O. Box 176, Hood River, OR 97031 Made in the U.S.A.

**Wt/Vol., Packaging, Price:** 1 quiche or pot pie. Net weight 7.5 & 8 oz (213 or 227 gm).

**How Stored:** Frozen.

**New Product—Documentation:** Both Labels sent by Turtle Island Foods, Inc. 2014. July 27. A note says these were both first sold commercially in July 2013. Each paperboard box is 6 x 5 x 1¼ inches thick. Front: A color photo shows the product. At the lower left: “Meat, egg & dairy free. Microwaveable. Vegan. Keep frozen.” Rear: Nutrition facts and ingredients. At lower right: Tofurky.com info@Tofurky.com “Proud supporter of” The Humane Society of the United States.

Note: Most quiches contain meat (bacon, ham, etc.), eggs, milk, cheese, and vegetables.

3631. Sol Cuisine. 2013. Sol Cuisine: Your natural source for healthy, vegetarian foods since 1980 (Portfolio). 3249 Lenworth Drive, Mississauga, Ontario, Canada L4X 2G6. 22 inserts. 30.5 x 22.8 cm. [Eng; Fre]

• **Summary:** This portfolio (sent by Lorraine Guardino of Sol Cuisine) contains 20 inserts describing Sol Cuisine’s current Canadian products, retail and foodservice.

The glossy cover is printed with dark blue, orange and beige on white. On the inside left is one sheet (glossy color, 28 x 21.5 cm, in English and French) for each of the company’s current retail products. On the front left third of each sheet (printed with dark blue ink on an orange background) is a checklist of that product’s most important specifications. For example—for Organic BBQ Tofu Ribs: Vegetarian / vegan. Wheat free. Gluten free. Organic. Trans fat free. Source of iron. Source of calcium. Only 100 calories. 8 grams of protein. A box at the bottom gives company contact information. On the right two thirds (printed with dark blue on white fading into a blue sky above) is the product name written large and a one-sentence description of the product above, with a color photo of the package below. Across the bottom are four certification logos. The artistic design is excellent. On the rear left two-thirds of each sheet are: Preparation instructions. Exact ingredients. Package and

shipping information. Nutrition facts. At the right top is a color photo of the prepared dish. and below that (blue on orange) is a statement about the company and its mission.

The retail inserts are titled: Add protein and profit to your line-up: From a trusted source since 1980 (1 page overview of 9 products; Front in English, back in French). The retail products are: Organic BBQ Tofu Ribs. Almond Grain Burger. Sweet Curry Vegetable Burger. Mushroom Rice Burger. Spicy Black Bean Burger. Organic Veggie Crumbles. Veggie Breakfast Patties. Original Burger. Organic Falafel. Firm Tofu.

On the inside right is one sheet (glossy color, 28 x 21.5 cm, in English and French) for each of the company's current foodservice products. The layout and design of each sheet is similar to the retail sheets. The foodservice inserts are titled: Add protein and profit to your line-up: From a trusted source since 1980 (1 page overview of 8 frozen products, 1 refrigerated product, and 2 dry products; in English only). "All Sol Cuisine products are Vegan / Vegetarian, Trans Fat Free, Kosher and Halal." The weight of each product ranges from 3.6 kg (9 lb; Veggie Dog) to 7 kg (15.4 lb; Firm Tofu). The frozen products are: Almond Grain Veggie Burger. Meatless Burger. Mushroom Rice Burger. Veggie Sol Dog 7 Inch [made with tofu]. Organic Sol Grounds (Organic Veggie Grounds). Veggie Breakfast Patties. Falafel. T-Ribz (Organic BBQ Tofu Strips). The one refrigerated product is Organic Firm Tofu (A best seller since 1980). The two dry products are: Veggie Burger Mix. Texturized Vegetable Protein. Address: Mississauga, Ontario, Canada. Phone: 905-502-8500.

3632. Sol Cuisine. 2013. Sol Cuisine: Your natural source for healthy, vegetarian foods since 1980 (Portfolio). 3249 Lenworth Drive, Mississauga, Ontario, Canada L4X 2G6. 10 inserts. 30.5 x 22.8 cm. [Eng]

• **Summary:** This portfolio (sent by Lorraine Guardino of Sol Cuisine) contains 10 inserts describing Sol Cuisine's current U.S. products, which are sold only retail (none are sold to foodservice).

The glossy cover is printed with dark blue, orange and beige on white. On the inside left are the following two leaflets (glossy color, single sided, 28 x 21.5 cm): (1) Sol Cuisine SKU ranking in the USA: 1. Spicy Black Bean Burger. 2. Mushroom Rice Burger. 3. Veggie Breakfast Patties. 4. Original Burger. 5. Almond Grain Burger. 6. Original Falafel with Sauce. 7. Original BBQ Tofu Ribs. 8. Organic Veggie Crumbles.

(2) Sol bean anatomy. Like the diagram showing where the various cuts on a cow come from, but instead on a green soybean pod, where each "cut" is one of Sol Cuisine's products.

On the inside right is one sheet (glossy color, 28 x 21.5 cm.) for each of the company's current retail products. On the front left third of each sheet (printed with dark blue ink

on an orange background) is a checklist of that product's most important specifications. For example—for Organic BBQ Tofu Ribs: Vegetarian / vegan. Wheat free. Gluten free. Organic. Source of calcium. Only 130 calories. 9 grams of protein. A box at the bottom gives company contact information. On the right two thirds (printed with dark blue on white fading into a blue sky above) is the product name written large and a one-sentence description of the product above, with a color photo of the package below. Across the bottom are five certification logos, including the Non GMO Project. The artistic design is excellent. On the rear left two-thirds of each sheet are: Preparation instructions. Exact ingredients. Package and shipping information. Nutrition facts. At the right top is a color photo of the prepared dish. and below that (blue on orange) is a statement about the company and its mission. The retail inserts are titled: Add protein and profit to your line-up: From a trusted source since 1980 (1 page overview of 8 products). The retail products are: Organic BBQ Tofu Ribs. Almond Grain Burger. Mushroom Rice Burger. Spicy Black Bean Burger. Organic Veggie Crumbles. Veggie Breakfast Patties. Original Burger. Address: Mississauga, Ontario, Canada. Phone: 905-502-8500.

3633. US turkey production vs. refrigerated meat alternative trends. 2013.

• **Summary:** See next page. These graphs were sent by Seth Tibbott, founder and owner of Turtle Island Foods, Inc. The left graph shows that US turkey production rose from 260 million turkeys in 1990 to a peak of 307 million in 1995, then decreased to about 250 million in 2012. Thus, turkey production in the USA is now lower than it was in 1990.

The right graph show that refrigerated meat alternative sales in the USA increased steadily from about \$87.5 million in 2009 to about \$97.5 million in 2013, for a growth of about 11.4% in 4 years

3634. Shurtleff, William; Aoyagi, Akiko. comps. 2014. History of Seventh-day Adventist work with soyfoods, vegetarianism, meat alternatives, wheat gluten, dietary fiber and peanut butter (1863-2013): Extensively annotated bibliography and sourcebook (Continued—Document part II). Lafayette, California: Soyinfo Center. 1344 p. Subject/geographical index. Printed 6 Jan. 2014. 28 cm. [3638 ref]

• **Summary:** Continued:

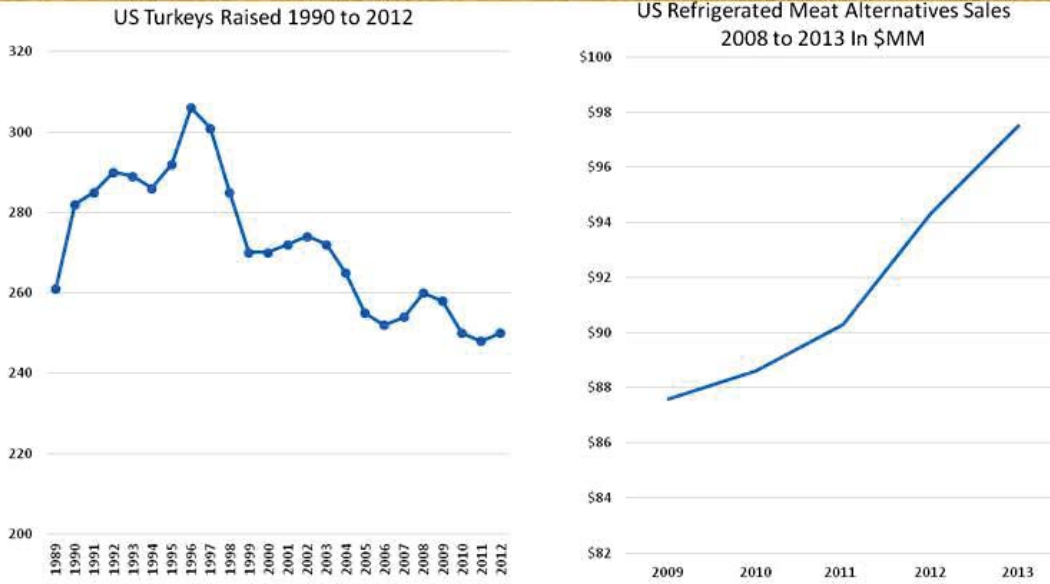

1991 Jan. 1—Granose Foods Ltd. (Newport Pagnell, England) is sold to the Haldane Foods Group and British Arkady Ltd. (Adventist Review, 1991; Fehlberg 1991).

1991 Oct. 1—Kellogg Co. (famous maker of breakfast cereals, Battle Creek, Michigan) buys Worthington Foods (Worthington, Ohio) for \$342 million. With this sale, no more SDA companies making soyfoods or meat alternatives are left in the United States.

1991—A major breakup and restructuring takes place at

DE-VAU-GE in Germany. They no longer sell under their GranoVita brand (Drosihn 2010).

2014 Jan.—The DE-VAU-GE website states that since June 1976 the company headquarters has been in Lüneburg. There they focus on the production of “crispy breakfast cereals, different kinds of muesli, and fruit bars. In 1998 another plant opened in Tangermünde near Stendal housing the very latest production facilities for breakfast cereals and muesli-bars.” Today DE-VAU-GE has more than 500 employees at the two locations. The products are made for the “private label sector.” Neither soyfoods nor meat alternatives are mentioned.

**Vegetarianism:** The organized vegetarian movement in America traces its origins to two Christian groups in the mid-1800s. The Bible-Christian Church in Philadelphia, under the leadership of Rev. William Metcalfe, started the American Vegetarian Society—America’s first such society—in May 1850. The following November, *The American Vegetarian and Health Journal* began publication, with Metcalfe as editor. Famous early vegetarians such as Sylvester Graham and Dr. William A. Alcott were deeply influenced by Metcalfe and this society. But this society’s influence was short-lived, especially after Metcalfe’s death.

The second group, the Seventh-day Adventist church, became actively involved in vegetarianism in 1863, following a vision received by Ellen G. White in Otsego, Michigan. Over the years the Adventist influence on vegetarianism grew steadily, initially through the influence of Dr. John Harvey Kellogg and the Battle Creek Sanitarium in Michigan, the writings and teachings of Ellen G. White and other Adventists on the benefits of a meatless diet, vegetarian cookbooks and other publications, and commercial vegetarian products—especially meatlike products based on nuts, soya, and/or gluten.

But the greatest impact began in the 1960s when Adventist health professionals began the first real scientific research on the health benefits of a vegetarian diet. The centerpiece of this research was the first two Adventist health studies, initiated at Loma Linda University. These were the first large-scale, long-term epidemiological studies on vegetarians, and they showed convincingly and dramatically that Adventists (roughly half of whom were vegetarians) have much lower rates of heart disease, cancer, diabetes, stroke, and several other major degenerative diseases. Based on these studies, researchers have published some 200 articles in scientific journals. We believe that this vast body of original research constitutes the single most important development in the field of vegetarianism since World War II.

Moreover, in 1987 the Loma Linda University Medical Center and affiliated groups organized the First International Congress on Vegetarian Nutrition. Subsequent meetings took place every five years, with the sixth taking place in 2013.

This pioneering scientific health research and these

congresses have played a leading role in changing the attitudes of health care professionals (physicians, nutritionists, dietitians etc.) toward a vegetarian diet.

In the 1960s, vegetarian diets were generally considered risky. But by the 1990s they were (if balanced) widely considered healthier than the standard American diet.

**Meat Alternatives:** Formerly called “meat substitutes.” By definition, these are meatless, meatlike products. The category of commercial meat alternatives was invented by Dr. John Harvey Kellogg, the world-famous head of the Battle Creek Sanitarium. His first two meat alternatives were Nuttose (1896) and Protose (1899)—both based on ground peanuts.

In the USA, this category was both pioneered (starting in the early 1940s) and developed by Worthington Foods and Loma Linda Foods.

Most of the meat alternatives made by Seventh-day Adventist companies have been vegan—they contain no animal products (such as eggs or dairy products).

**Wheat Gluten:** Seventh-day Adventists—and especially Dr. John Harvey Kellogg—were among the pioneers in introducing wheat gluten and foods based on wheat gluten to America. As early as 1882 the Food Department of the Battle Creek Sanitarium, supervised by Dr. Kellogg, was selling Gluten Wafers, Gluten Food, and Diabetic Food. All were probably used in diabetic diets. In 1907 Dr. Kellogg was issued U.S. Patent 869,371 for a meat substitute whose two main ingredients were gluten and casein (milk protein). And by 1912 the Kellogg Food Co. in Battle Creek, Michigan, was selling at least 7 food products based on wheat gluten, including 3 types of biscuits and a breakfast toast. Protose, launched in 1899, was Dr. Kellogg’s second earliest commercial meatlike product—after Nuttose. Originally made from nuts, at some early unknown date Protose came to include gluten.

Following Dr. Kellogg’s lead, other Adventist companies soon began to launch commercial meatlike products based on gluten. In 1929 La Sierra Soy Gluten was introduced by La Sierra Industries in Arlington, California. In 1932 Vigorost was launched by Madison Foods in Madison, Tennessee.

But the company that has been most successful in introducing gluten-based meatlike products to America is Worthington Foods in Worthington, Ohio. Their first such product was Proast, launched in 1939, followed by Choplets (Oct. 1941). In 1968-70 with Prostage (a meatless sausage) Worthington invented a unique and proprietary process for combining gluten and textured soy proteins to give improved texture, flavor, and nutritional value—leading to a host of new meatlike products by the early 1980s.

By 1992 Seventh-day Adventist food companies had introduced at least 166 commercial food products containing gluten as a major ingredient; of these at least 55 were made by Worthington Foods. Moreover, of Worthington’s 180 products, approximately 90% contained at least some wheat

gluten.

**Dietary Fiber:** Here, too, Dr. John Harvey Kellogg was the pioneer. He was so credited in at least four publications by Denis P. Burkitt and Hugh Trowell—who established the “fiber hypothesis” of disease causation. For example, in 1978 in “The Development of the Concept of Dietary Fiber in Human Nutrition” published in the *American Journal of Clinical Nutrition* (October, Supplement, p. S3-S11) Trowell wrote: “When Dr. John Harvey Kellogg, an American cereal manufacturer, advocated the use of bran in 1923 in *The New Dietetics*, he stimulated much research.”

**Note:** As early as 1909, Dr. Kellogg’s company, Battle Creek Foods in Battle Creek, Michigan, was selling and advertising “Sterilized bran (a gentle laxative).”

**Peanut Butter:** The forerunner of peanut butter (called “Peanut paste”) was invented and patented in the USA in Oct. 1884 by Marcellus Gilmore Edson of Montreal, Quebec, Canada. The patent (U.S. Patent No. 306,727) was titled “Manufacture of peanut-candy.” The term “peanut butter” does not appear in the patent. We call this peanut paste a “forerunner because it was not sold as peanut butter (or as a nut butter or as peanut paste), but rather was used an ingredient—in peanut-candy. We have been unable to find any evidence that the peanut-candy described in this patent was ever manufactured or sold commercially, or that Edson was a Seventh-day Adventist.

1895 Oct. 10—Dr. John Harvey Kellogg, in a letter to Ellen G. White in Australia, writes: “We make very little use of cream or milk in our family, and use no butter whatever for seasoning, but use nuts instead. I have recently succeeded in making some very excellent preparations from nuts which take the place of butter entirely and are sweeter, more palatable, and more digestible. I find this plan is working very successfully both with the patients and with the helpers at the Dormitory.” He is probably referring to peanut butter as we shall soon see.

1895 Nov. 4—Three months later, Dr. Kellogg applies for a U.S. patent (No. 567,901) for a “nut-butter” made from peanuts or almonds.

1896 Nov.—Dr. Kellogg’s peanut butter is now sold commercially—but is not yet named “peanut butter.” Sanitas Nut Food Co., in an ad titled “New Nut Products” in the *Chicago Vegetarian* (p. 8) advertises the following: 3. Nut Butter. “A substitute for ordinary butter, presenting fat in the form of a perfect emulsion; combined with water, forms a delicious cream. Used for shortening of all kinds. A pure product of nuts; can be eaten by those who cannot eat ordinary butter.” **Note:** This may well be peanut butter.

4. Nut Cream. “A delicate, delicious nut preparation, which, properly diluted, furnishes a delicately-flavored cream or milk. It resembles milk in appearance.” **Note:** It is probably made from peanuts and/or almonds.

1897 July 2—The term “peanut butter” first appears in an English-language document. In an article titled “For a

Trust in Peanuts,” the *Chicago Daily Tribune* writes (p. 10): “Economic uses for peanuts: The active brains of American inventors have found new economic uses for the peanut. A peanut butter, first designed for invalids, but now sold with other food products, is made simply by crushing the nuts into a paste and adding water.”

1897—Large-scale production of peanut butter begins in the United States in Kokomo, Indiana—but unrelated to Seventh-day Adventists. It is made by Lane Bros. Health Food Co. at 11 McCann St. See: *Kokomo Daily Tribune*. 1897. “The Latest in Butter: Kokomo has a New Industry Making Butter from Peanuts.” Nov. 16, p. 4, col. 3.

1898—In Australia, Edward Halsey, a baker at Sanitarium Health Food Co. (Seventh-day Adventist) introduces Sanitarium Peanut Butter—Australia’s first. Address: Soyinfo Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

**3635. Product Name:** Tofurky Gluten Free Pesto Supreme Pizza.

**Manufacturer’s Name:** Turtle Island Foods, Inc.

**Manufacturer’s Address:** P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031.

**Date of Introduction:** 2014 January.

**Ingredients:** Crust: Rice flour, water, sugar, potato flour, olive oil, tapioca flour, fresh yeast, gum (cellulose, guar, xanthan), salt, garlic powder, enzymes. Pesto Sauce: Water, basil, expeller pressed non-GMO canola oil, garlic puree, olive oil, maltodextrin, potassium chloride, yeast extract, xanthan gum, salt, vegan lactic acid, citric acid, pepper, vegan natural flavors. Vegan Cheese: Filtered water, tapioca and/or pea starch, non-GMO expeller pressed canola and/or safflower oil, coconut oil, pea protein, salt, vegan natural flavors, inactive yeast, vegetable glycerin, xanthan gum, vegan lactic acid, yeast extract, titanium dioxide (a naturally occurring mineral). Ground Tofurky Gluten-Free Sausage: Water, organic soy flour, expeller pressed non-GMO canola oil, vinegar, yeast extract, basil, sea salt, potassium chloride, garlic, onion, spices, xanthan gum, vegan natural flavors, gum arabic. Toppings: Red bell peppers and onions.

**Wt/Vol., Packaging, Price:** 1 pizza. Net weight 17.5 oz (496 gm).

**How Stored:** Frozen.

**New Product—Documentation:** Label sent by Turtle Island Foods, Inc. 2014. July 27. A note says this pizza was first sold commercially in Jan. 2014. The box is: 10.25 x 10.25 x 1.25 inches deep. Front: A color photo shows the pizza, with a wedge sliced out and being lifted up to show the cheese stretching. “Family owned and independent since 1980.” “Deliciously topped with gluten free, meat-free sausage.” “Meat free. Non-GMO. Vegan. Keep frozen.”

Rear: “No pizza eater left behind! In 1995, Tofurky brought vegetarians back to the Thanksgiving table by providing a high protein, vegan, cholesterol free option.

Today we continue to innovate by offering the first gluten-free vegan pizza with faux meat and veggie toppings.

“Join us in our goal for: ‘No pizza eater left behind.’”

This pizza must be baked in an oven; microwave won’t work.

In the lower left is a color illustration of the “LEED Platinum Tofurky plant, Hood River, Oregon.” Below it is a color photo of many solar panels on the production plant roof. The text beside them reads: “With the help of a Blue Sky (TM) Community Project grant we were able to install 400 solar panels on our production plant which will produce 119 megawatt hours of electricity a year. This is enough electricity to power 10½ average homes for 12 months.”

3636. Tibbott, Seth. 2014. What ever happened to Lightlife? (Interview). *SoyaScan Notes*. July 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** On 16 Sept. 2013 ConAgra Foods sold the Lightlife brand and its equity to Brynwood Partners, a

private equity firm. Before the sale, ConAgra called Seth and asked him if he was interested in buying Lightlife, which is still larger than Turtle Island, the company Seth founded and owns. He put in a half-hearted bid, then flew out to Massachusetts and toured the plant. He was also able to look at all the company’s numbers.

ConAgra ran Lightlife pretty well for the first ten years after buying the company, then Lightlife began to go downhill. Address: Founder and owner, Turtle Island Foods, Inc.

3637. Tibbott, Seth. 2014. From Birkenstocks to corporate stocks: An abbreviated history of meat alternatives in America (PowerPoint presentation). First presented at the Western New York Inaugural Veg Fest in Buffalo, New York, Aug. 3. 41 frames.

• **Summary:** All photos and photos are in color unless otherwise identified. The frames are as follows: (1) Title of presentation. (2) Credits to Bill Shurtleff, author and founder

of Soyinfo Center, and Lisa Shapiro, founder of All Things Vegan, who provided the title and ongoing support.

(3) “In the beginning there soybeans.” A large outline map of China has the northeast highlighted in red. “First written accounts of soybeans were in 1024 BCE in the Liaoning province of China.” A smaller photo shows two cupped hands holding soybeans.

(4) “First meat replacement: Tofu. Date of birth of Tofu is uncertain, but certainly China. 965 CE ‘Anecdotes Simple and Exotic’ by Tao Ku [in Chinese] is first document to mention tofu...” (5) “Tofu evolution. Exported to Japan by Buddhist monks around 1100 CE.” Photos: (a) A monk in begging attire holding a cake of tofu on a wooden plate. (b) Two pieces of inari-zushi.

(6) “Lung Sausage. It’s what’s for dinner! *Mien-chin* (wheat gluten). Meat alternatives included mock eel, grilled liver, barbequed liver, mock fish and mock lung sausage.”

(7) “We all scream for yuba! Yuba is formed when soymilk is heated at 90°C. A thin skin forms on the surface which is scraped off and dried.” Photos: (a) A modern yuba-making table. (b) A package of Hodo Soy Spicy Yuba Strips. (c) A prepared dish of fresh yuba with green garnishes.

(8) “Tempeh: ‘The Other White Bean.’ Traditional Indonesian soy product. Cooked soybeans are fermented 24 hours at 32°C.” Photos: (a) Cakes of fresh tempeh covered with white mycelium, some cut and wrapped in traditional green banana leaves, all on a round wooden tray. (b) Deep-fried tempeh strips.

(9) “Early Meat Alternatives in Pre Birkenstock America (PBA).” “The Adventist Era.” Black-and-white photos: (a) A woman in about 1900 leading group exercises at Dr. Kellogg’s Battle Creek Sanitarium. (b) An oval portrait photo of Dr. J.H. Kellogg, M.D. Note: Birkenstocks are a type of German-made leather sandals that fit the contour of the wearer’s sole; they became popular in the USA starting in 1967.

(10) “John Harvey Kellogg (1852 to 1943): The Grandfather of U.S. Plant Based Alternatives. JH Kellogg,

a Seventh Day Adventist MD, took over a church Health Center in 1876 in Battle Creek, MI. Renamed it the ‘Battle Creek Sanitarium.’” B&W photos: (a) Dr. Kellogg, dressed in white suit and hat, with two women. (b) A roomful of nurses at The San in Battle Creek.

(11) “‘A Place Where People Learn to Stay Well,’ ‘Kellogg worked tirelessly to make the Sanitarium the largest and most progressive healing center in America. Here he developed the first meat analogs in America.’” B&W photos show 3 of The San’s many famous patients: (a) William Howard Taft. (b) Henry Ford. (c) Thomas Edison.

(12) “Kellogg vs. Doctors of the PBA.” Kellogg’s beliefs: Simple, grain based vegetarian diet. Exercise, fresh air and Sunshine. Good dress and posture. Opposed meat, tobacco, alcohol, caffeine, narcotics and hot spices. Opposed eggs, accepted small amounts of milk. Low protein intake.

Doctors and General Public of Kellogg’s Era Beliefs: Disease was a product of divine judgment or chance. Bacon and eggs was a good breakfast. Heal people by purging with calomel, drug them with arsenic, opiates and mercury. Bleeding bad blood out of people creates health. Bid not believe in germs or diet causing disease. B&W photos: (a) Overhead view of a group at The San in straight lines and columns doing exercises. (b) Doctors around a patient’s bedside in the PBA era.

(13) “Tofurky Interlude. What was the name of the first successful cold breakfast cereal? (Hint, invented in Dansville, New York).

(14) “GranUla! The cereal you have to soak overnight.”

(15) “Food Products Invented by JH Kellogg.” The first meat alternative was called ‘Nuttose’ produced at Battle Creek. Dr. Kellogg’s food company was the first company to produce commercial meat alternatives in the United States. Nuttose [launched in June 1896] and Protose [June 1899] were the first American Meat Alternatives.

(16) “JH Kellogg, a Man **Way** Ahead of his Time. Believed in the efficiency of vegetable based meats as a way to fight world hunger. Believed that taking any animals

life was wrong and ‘accustomed mankind to violence and murder.’ Believed low protein, vegetarian diets created health.” An oval B&W portrait photo shows J.H. Kellogg, M.D.

(17) “Henry Ford (1863-1947): American Industrialist and Soybean Pioneer. ‘If we want the farmer to be our customer, we need to find a way to be his customer.’” Photos: (a) Portrait of Henry Ford on the cover of *Time* magazine (Jan. 14, 1935). (b) Illustration of a black Model T: “If I had asked my customers what they wanted, they would have said a faster horse”—Henry Ford. (c) Henry Ford in his Soy Suit seated with straw hat in hand on a pile of hay.

(18) “Industrialization of Soy Beans: Ford envisioned a society where farmers would prosper by creating cottage industries processing their crops in barns instead of raising animals.” Photos: (a) Salt and pepper shakers made out of Ford soybean gearshift knobs. (b) A man standing in a Ford exhibit in about 1936.

(19) “Chicago World’s Fair of 1934: The Ford exhibit featured: A barn which had a field of soybeans growing around it. A small scale soy extraction plant. A soy kitchen. Deep fried soy nuts given to visitors.” Photos: (a) A small clear glass bowl overflowing with soy nuts. (b) Cover of the booklet titled “The Industrialized American Barn.” (c) A contraption.

(20) “Ford’s Soy Food Legacy: Did massive cutting edge research projects on soy foods and soy materials. Died in 1947 aged 85.” B&W photos: (a) Ford’s soy car, circa 1941. (b) Henry Ford, dressed in coat and hat, swinging an ax (for the press) at the plastic trunk lid of his car. (c) An article titled “The car grown from the soil.”

(21) “Robert Allen Boyer: Ford’s head of the laboratory studying industrial applications. Mr. Boyer had developed a spun soy fiber used as a synthetic wool in WWII In this extraction process it was accidentally discovered that these fibers could be spun as a food source.” Photos: (a) First Worthington food factory circa 1940; built to look like a home in case food company failed. (b) Red and white Worthington (and Loma Linda) logo.

(22) Worthington Foods: First product was Proast, a meatloaf product made with peanuts, wheat gluten and defatted soy grits.” Photos: (a) A can of Worthington Choplets. “Choplets first introduced in 1941, the name suggested by Harding’s 11 year old grandson. (b) Proast meatloaf (on a white dish with mashed potatoes, peas and diced carrots).

(23) “Rapid growth in the 1950s.” Photos: (a) Front panel of cans of 5 different Worthington meat alternatives. (b) A carton of Wham. (c) A chub of Meatless Corned Beef.

(24) “1960s Products: After licensing Boyer’s spun fibers, Worthington had to find a producer who would make a sanitary version of these. Ralston Purina was the first company to make a food grade spun fiber. They also began to incorporate soy protein isolate powder into their

products.” Photos: (a) Carton of Worthington Stripples. (b) Can of Worthington FriChik Original. (c) Cartons of Heritage Health Food Corn Dogs, Meatless Ham Slices, Meatless Turkey Slices, Meatless Chicken Slices, Meatless Corned Beef Slices. Note: Heritage is based in Collegedale, Tennessee.

(25) “Morningstar Farms: In 1977, Worthington developed their Morningstar Farms brand after being acquired by Bayer. This was the first brand of meat alternatives to be sold in mass supermarkets. Worthington Foods and it’s Morningstar Farms brand was purchased by Kellogg’s in 1999.” Photos: (a) Carton of Morningstar Hickory BBQ Riblets. (b) Sausage Patties. (c) Bacon Strips. Continued. Address: Founder and owner, Turtle Island Foods.

3638. Tibbott, Seth. 2014. From Birkenstocks to corporate stocks: An abbreviated history of meat alternatives in America (PowerPoint presentation; Continued—Document part II). First presented at the Western New York Inaugural Veg Fest in Buffalo, New York, Aug. 3. 41 frames.

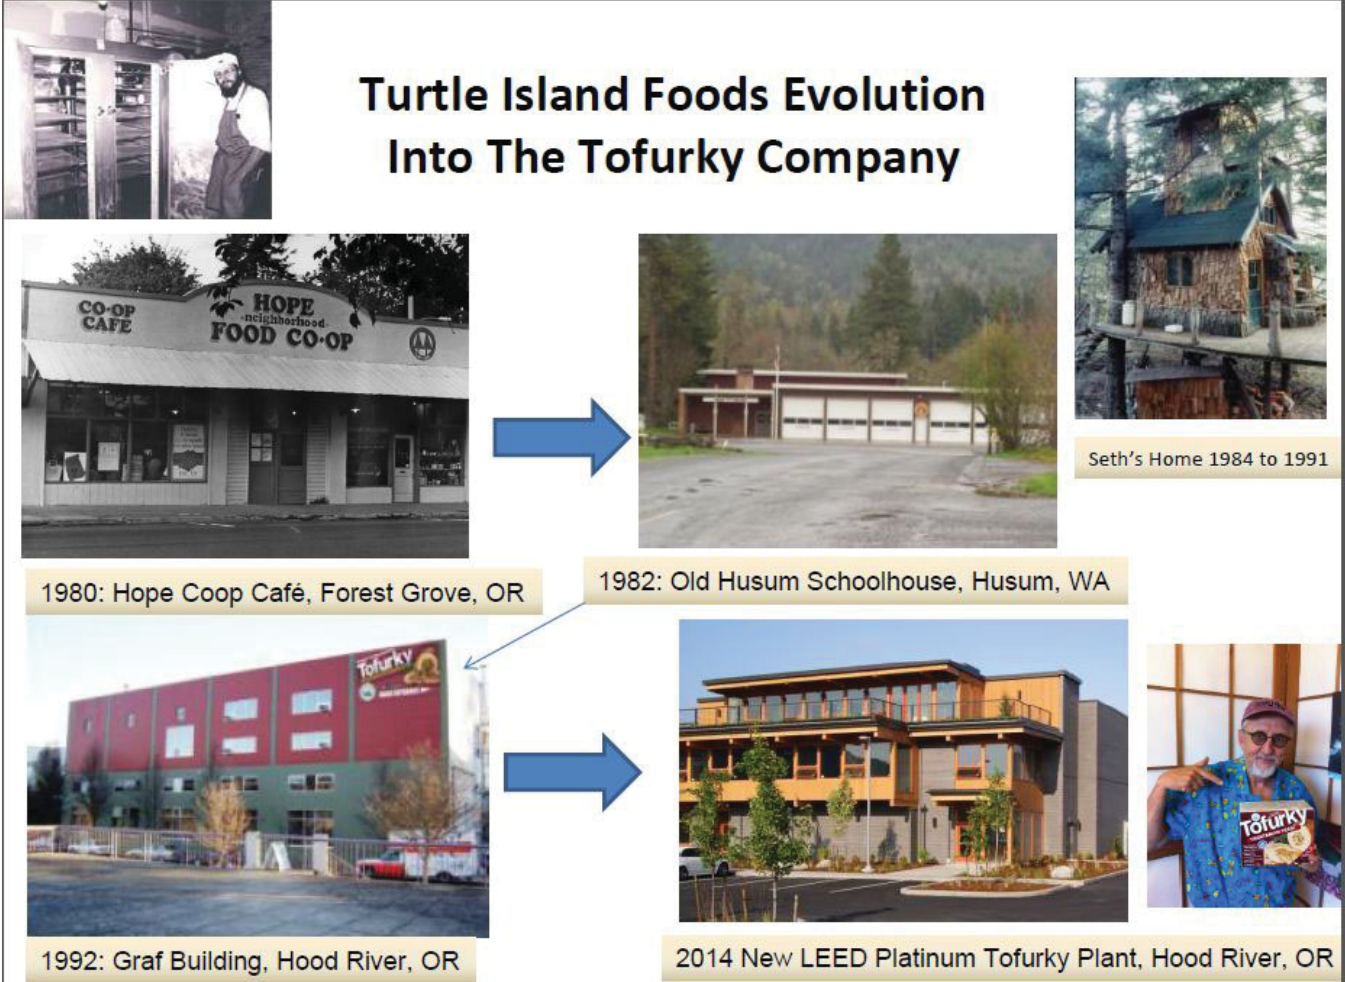

• **Summary:** Continued: (26) “Finally, The Birkenstock Era (BE) begins: Meat Alternative Pioneers of the 1970s and 1980s. Photo: Person walking in a pair of Birkenstock leather sandals—from the knees on down.

(27) “Bill Shurtleff: With wife Akiko Aoyagi, Zen Buddhist visited 300 cities in 1975 sampling and promoting soy foods as an alternative to meat.” Photos: (a) Shurtleff & Aoyagi standing next to the side of their white Dodge van during 1975 tour in Tennessee. (b) Front cover of the following books by Shurtleff & Aoyagi: *The Book of Tofu*. *The Book of Tempeh*. *The Book of Miso*. *Tofu & Soymilk Production*. *Tempeh Production*. *Miso Production*.

(28) “Stephen Gaskin and The Farm: Ex Marine and college professor, founded the largest hippie commune, The Farm in Tennessee in 1971. It had 1750 acres which they farmed. At its height 1500 vegan hippies lived there. They grew and ate a lot of soybeans and did great pioneering efforts on a variety of soy foods.” Photos: (a) Stephen Gaskin seated cross-legged

and looking very happy. (b) Aerial view of much of The Farm in Tennessee.

(29) “Farming Soy Hippie Style.” Photos: (a) A man (naked) with a woman (dressed) next to a horse. (b) Many long-haired Farm members carrying armloads of sorghum to load it onto a wagon. (c) Farm members planting seeds. (d) A Farm member in a field of soybeans, talking with two Guatemalan farmers.

(30) “Meat Alternatives Pioneered at the Farm: For protein, the farm processed soybeans into tofu, tempeh, soy milk and ice bean [soy ice cream]. Photos: (a) The rainbow-colored label from the top of a pint of Farm Foods Ice Bean. (b) Farm tofu shop in San Francisco circa 1972. (c) Ditto, with a Farm member pouring a white plastic bucketful of soy puree into boiling water in a caldron. Photos from The Farm Archives.

(31) “Pioneering Tofu Brands of the 1960’s and 70’s: Though tofu had been made by Asians in this country since the early 1900s, in the BE Caucasians, inspired by Shurtleff and the Farm started opening businesses. BE Tofu Companies:

NoMoo Dairy, Portland, ME  
 Heartsong Tofu, Miami, FL  
 Metta Tofu, Denman Island, BC  
 Island Spring, Vashon, WA  
 Laughing Grasshopper, Millers Falls, MA  
 Surata Soyfoods, Eugene, OR  
 Rochester Tofu, Rochester, NY  
 White Wave, Boulder, CO  
 Nasoya, Leominster, MA.

3639. Tibbott, Seth. 2014. Re: Origin and development of the Tofurky Trot. Letter (e-mail) to William Shurtleff at Soyinfo Center, Aug. 4–in reply to inquiry of Aug. 3 from William Shurtleff. 1 p.

• **Summary:** The idea for a Tofurky Trot was Seth Tibbott’s, who writes: “I wanted to raise money and have some fun with other veg inclined folks on Thanksgiving Day as a counter balance to the Turkey Trots that are held on that day. The first one was held in 2012 in Portland’s Oaks Bottom.

We had about 48 people show up. It was a very loosely structured and planned event. No fees, insurance or permits, just show up and donate some money for Food Not Bombs and the Cinnamon Snail vegan food cart in NYC who was feeding victims of the Sandy Hurricane. I ran the 5 K in the attached Tofurky Box.

“In 2013 we expanded the races from one to two big ones. Both were held on Thanksgiving day. One at Mt. Tabor Park in Portland, Oregon, and one in Pasadena, California, in the Rose Bowl parking lot. These had more advance notice and full permits, insurance, etc. Mt. Tabor had expenses under \$1000 and had 250 people show up. We also had KGW TV station show up to cover the event. Lots of people brought kids, dogs and there were a lot of dressed up folks. We raised over \$4000 which we split between Northwest VEG [nwveg.org], a Portland group that promotes vegetarian diets and Out to Pasture, a small animal sanctuary in Silverton, Oregon.

“The Rose Bowl race had huge overhead of nearly \$4000 just to rent the parking lot. It was very hard to find a park that was open on Thanksgiving and we liked the iconic nature of the Rose Bowl. We got 221 runners and even though we technically lost money we donated \$3,000 to Carolyn Merino Mullin’s ‘National Museum of Animals and Society’ on Melrose Avenue in Los Angeles. She also

had a local radio station cover the event. “These events are nice because they bring focus on the fact that not everyone is eating turkey on Thanksgiving day. It’s a special bonding time. We ran a small ‘dry run’ Tofurky Trot here in Hood River last September as part of our Tofurkyfest celebration but it was very small and mostly for our brokers and other guests. About 30 people ran there and we did not charge any money.”

“Just returned an hour ago from epic trip to Buffalo, New York, for the first Veg Fest in that city and the first Tofurky Trot East of the Mississippi River. We have 358 runners pay \$25 sign up for thee 5k run, our most ever.

“The Buffalo Tofurky Trot money is going to go to two groups: ASHA Farm Sanctuary (AHSA stands for “Acres of Sanctuary and Hope for Animals”) which is a small startup nonprofit in Buffalo and The Farm Sanctuary in Watkins Glen, New York, of which we are corporate sponsors of. It looks like each organization will get around \$3,000 this year. Partnering with the Buffalo Veg Fest was a very positive experience and a win/win. Good branding for us and good publicity for the Veg Fest. Some of the runners would not have come to the Veg Fest had it not been for this. They had about 2500 people come to the Veg Fest. Some Veg Fests are much larger. Toronto Veg Fest brings in upwards of 40,000 people.

“We cover about half of our expenses. Just rental of park, fees, insurance, half of tee shirt printing costs and then take 15% of net to help cover some of our expenses but we have never covered all of them. Me flying out to Buffalo and speaking was not covered. We have a part time marketing person who works here helping to coordinate the races. And we pay the race organizer \$500 honorarium to help compensate for their extra work.”

Note: A Vegfest is an annual–once a year–vegetarian food festival. The Vegetarian Food Festival in Toronto (which started in Sept. 1984) is regarded as the largest vegetarian festival in the world with 40,000 attendees each year and over 100 exhibiting food and product vendors. It is a free public festival held at Harbourfront Centre by the Toronto Vegetarian Association on the lakeshore in Toronto the second weekend of every September. Attendees have the opportunity to attend free lectures from world-renowned vegetarian cookbook authors, animal rights activists, and more. Another famous Vegfest is VegfestUK, which started in Bristol in 2003 under the name Bristol Vegan Fayre. (Source: Wikipedia at Vegfest, Aug. 2014).

Am discussing the possibility of a Tofurky Trot there next year. This is a new revenue stream for Veg Fests and local nonprofit groups so Buffalo was exciting to us on many levels. Next up: Charlottesville, VA in September!

Photos show: (1) 43 people at the First Annual Tofurky Trot in 2012, Portland, Oregon. (2) Seth Tibbott in Tofurky Box, fall 2012. (3) Sign for first annual Tofurky Trot. (4) Sign announcing Tofurky Trot in 2013. (5) Runners in

costume at the Tofurky Trot in the Rose Bowl parking lot (Pasadena, Calif.), Thanksgiving day 2013. (6) Seth Tibbott, the man who put Tofurky on the map, and a dedicated vegan–like Tofurky. Address: Founder, Turtle Island Foods.

3640. Leahy, Bobbi. 2014. Re: Meat Alternatives category. Who created it and when? Letter (e-mail) to William Shurtleff at Soyinfo Center, Aug. 12. 1 p.

• **Summary:** “Bill, The product category Meat Alternatives was created at the inception of SPINS Product Library (mid to late 90’s), later it was split Frozen vs Refrigerated Meat Alternatives.

“To the best of our knowledge, of the 3 syndicated research houses, SPINS was the first to have such a product category. As you can imagine, Meat Alternatives were not widely carried within Conventional supermarkets at that time.

“This information came from our Product Library team. But as far as ‘evidence’ of the statements above, I’m not sure what I can offer. SPINS works off of a syndicated category/ subcategory hierarchy, while both Nielsen and IRI offer both syndicated and custom category definitions. If a client had asked they to create a custom Meat Alternative segment they could have done that based on the few meat alternative items that were moving in the Conventional channel. I doubt very much that they were asked to do that back in the 90’s.

“Bobbi.”

3641. Tibbott, Seth. 2014. Re: Color photos of early Tofurky boxes. Letter (e-mail) to William Shurtleff at Soyinfo Center, Aug. 28–in reply to inquiry from William Shurtleff. 1 p.

• **Summary:** See next page. Here are the old Tofurky Boxes, from left to right: 1997 to 1998 white box, 1999 brown box (on top) with VRG printed on right side, 2000 brown box with Farm Sanctuary on side. Address: Founder, Turtle Island Foods.

3642. Tibbott, Seth. 2014. Re: Overview of Turtle Island history. Letter (e-mail) to William Shurtleff at Soyinfo Center, Sept. 30–in reply to inquiry from William Shurtleff. 1 p.

• **Summary:** Seth has thought about writing his company’s history. “We are basically the antithesis of the new, modern ‘Fast Company’ approach which is sell a bunch of stock to investment bankers, pay yourself 6 figure salaries from the get go, ramp up from 0 to \$20 MM (million) as fast as you can and sell to highest bidder in 3 to 5 years. We are ‘Slow Growth’ money and somewhat of an anachronism in today’s business world. I worked for \$300 per month for about 11 years (except for 1981 when I showed \$27 of gross income on my taxes) but they were very fun, fulfilling years. ‘Losing my shirt but living the dream.’” Address: Founder, Turtle Island Foods.

3643. Mertens, Randall J. College of Agriculture, Food and Natural Resources, Univ. of Missouri; ADM [Archer-Daniels Midland Co] 2014. New ADM and CAFNR laboratory teaches entrepreneur skills beyond the blackboard (news release). Columbia, Missouri. 2 p. Nov. 16.

• **Summary:** “Columbia, Mo.—A cutting-edge industrial laboratory to give agricultural and engineering students a chance to hone advanced team and entrepreneur skills will be opened Oct. 9.

“The College of Agriculture, Food and Natural Resources and College of Engineering, University of Missouri, and Archer Daniels Midland Company (ADM) partnered to create the facility in the Agricultural Engineering Building on Mizzou’s east campus.

“The ADM Center for Agricultural Development was designed to provide students experiential learning in the latest theories of biofuel development, food production and energy processing.

“As the global population continues to grow, the world is looking toward agriculture to create viable, sustainable solutions to some of the world’s most pressing needs—like an abundant food supply and advanced renewable fuels,” said Michael D’Ambrose, ADM senior vice president and chief human resources officer. “To help our industry meet this challenge, ADM is pleased to invest in the University of Missouri and the next generation of agricultural leaders.”

Address: Founder, Turtle Island Foods.

3644. **Product Name:** Tofurky Vegetarian Feast.

**Manufacturer’s Name:** Tofurky Company (The).

**Manufacturer’s Address:** Hood River, OR 97031.

**Date of Introduction:** 2014 October.

**Ingredients:** Roast: Water, vital wheat gluten, organic tofu (filtered water, organic whole soybeans, magnesium chloride, calcium chloride), expeller pressed non-genetically engineered canola oil, natural vegetarian flavors, shoyu soy sauce (water, non-genetically engineered soybeans, wheat, salt, culture), non-genetically engineered corn starch, white bean flour, garbanzo bean flour, lemon juice from concentrate, onion, carrots, celery, salt, calcium lactate from beets. Contains: Soy and wheat.

Stuffing: Organic brown rice, whole wheat bread cubes (whole wheat, filtered water, unbleached wheat flour, organic evaporated cane juice, organic palm oil, sea salt, yeast, natural enzymes, ascorbic acid), onion, celery, expeller pressed non-genetically engineered canola oil, organic wild rice, natural vegetarian seasoning, granulated garlic, herbs and spices. Contains: Wheat.

“Giblet” Gravy: Water, whole wheat flour, expeller pressed non-genetically engineered canola oil, Tofurky giblets (water, vital wheat gluten, organic tofu [filtered water, organic whole soybeans, magnesium chloride, calcium

Family Owned & Independent Since 1980

# Tofurky®

## VEGETARIAN FEAST

SERVES 6

- 2 lb Stuffed Tofu Roast
- Tofurky Savory Gravy
- New Fudge Brownie
- Tofurky Jurky Wishstix
- Tofurky Holiday Coupon Book

NET WT 3 LBS. 8 OZ. (1.59kg)

VEGAN KEEP FROZEN SERVING SUGGESTION

New Fudge Brownies

chloride], expeller pressed non-genetically engineered canola oil, natural vegetarian flavors, shoyu soy sauce [water, non-genetically engineered soybeans, wheat, salt, culture], non-genetically engineered corn starch, white bean flour, garbanzo bean flour, lemon juice from concentrate, onion, carrot, celery, salt, calcium lactate from beets), natural vegetarian flavors, onion, carrot, celery, corn starch, salt, sunflower oil, thyme, rosemary. Contains: Soy and wheat.

**Wt/Vol., Packaging, Price:** 2 lb 8 oz (1.13 kg).

**How Stored:** Refrigerated.

**New Product–Documentation:** This product was first sold in 2005, however the box was quite different from this 2014 version. Package sent by Seth Tibbott, founder and owner of Turtle Island Foods. 2014. Nov. 25.

Seth adds in an e-mail on Dec. 1. “We had two great Tofurky Trots on Thanksgiving morning. The one in Pasadena at the Rose Bowl had 515 runners and the one at Mt. Tabor Park in Portland had 550 runners, both record numbers for Tofurky Trots and more than double what these events totaled last year. Looks like over \$10,000 raised for our non profit partners. Here are photos of the Portland

event.” Seth was present at the Portland event. The two non profit partners splitting the profits from the Portland Tofurky Trot are Northwest Veg of Portland, Oregon, (60%) and Wildwood Sanctuary Farm of Sherwood, Oregon (40%).

“In Los Angeles, Carolyn Merino Mullen, founder of the National Museum for Animals and Society has run that Tofurky Trot for the past two years. Her museum is the sole recipient of money from the Pasadena Tofurky Trot.

“My only regret this year was we did not charge enough. We charged \$25 and I think we could have charged \$30 to \$35 to raise even more money. We will get paid back for about half of our expenses which include insurance, site rental fees, promotion, organization, etc.”

**3645. Product Name:** Trader Joe’s Breaded Turkey-less Stuffed Roast with Gravy. Made in Canada by Gardein.

**Manufacturer’s Name:** Trader Joe’s (Marketer-Distributor).

**Manufacturer’s Address:** Monrovia, California 91016.

**Date of Introduction:** 2014 October.

**Ingredients:** Turkey-less Roast: Water, Soy Protein

Isolate, Vital Wheat Gluten, Expeller Pressed Canola Oil, Yeast Extract, Organic Ancient Grain Flour (KAMUT(R) Khorasan Wheat, Amaranth, Millet, Quinoa), Potato Starch, Modified Cellulose, Corn Starch, Natural Flavors, Sea Salt, Dehydrated Garlic, Organic Cane Sugar, Color Added, Onion Powder, Pea Protein, Carrot Fiber, Beet Root Fiber, Extractives of Paprika and Turmeric.

Stuffing: Water, Onions, Stuffing Crumbs (Wheat Flour, Wheat Gluten, Sugar, Salt, Yeast), Celery, Wild and Brown Rice, Cranberries, Organic Apple Puree, Expeller Pressed Canola Oil, Yeast Extract, Soy Sauce (Water, Wheat, Soybeans, Salt, Alcohol\*, Vinegar), Natural Flavors, Modified Cellulose, Sea Salt, Spices, Garlic Powder, Onion Powder.

Breading: Rice Flour, Wheat Flour, Modified Corn Starch, Wheat Gluten, Sugar, Salt, Spice, Garlic Powder, Onion Powder, Yeast, Baking Powder, Malted Barley Flour, Ascorbic Acid (added as a dough conditioner). Seasoning Rub: Red Bell Pepper Flakes, Spices, Expeller Pressed Canola Oil.

Gravy: Water, Expeller Pressed Canola Oil, Corn Starch, Yeast Extract, Soy Sauce (Water, Wheat, Soybeans, Salt, Alcohol\*, Vinegar), Natural Flavors, Vital Wheat Gluten, Organic Miso Paste (Organic Soybeans, Organic Rice; Koji, Sea Salt, Water, Koji Spores), Soy Protein Isolate, Spices, Garlic Powder, Onion Powder, Soy Lecithin, Extractives of Turmeric.

\*Product contains less than 0.5% alcohol.

**Wt/Vol., Packaging, Price:** 2 lb 8 oz (1134 gm). Retail for \$9.99 (2014/11, Lafayette, Calif.).

**How Stored:** Refrigerated.

**New Product–Documentation:** the earliest meat alternatives containing Fibroprotein or Textured Edi-Pro (spun soy protein fibers), made by Ralston Purina Co., as a basic ingredient. Product purchased at Trader Joe's in Lafayette, California. 2014. Nov. 24. This refrigerated product was first sold in 2014 however earlier versions go back two years. On one side: Heat instructions using: Conventional oven. Stove top/toaster oven. Microwave. Gravy. Holiday Roast (How to prepare and serve). Vegan.

Note: In Nov. 2012 Trader Joe's sent their "Trader Joe's Fearless Flyer" to all residents in Lafayette, California. William Shurtleff received one and noticed that at the top of the back page was an announcement of an "All New Alternative: Turkey-less Stuffed Roast." With Gravy, it retailed for \$9.99. Could this be a competitor to Tofurky?

During his next visit to Trader Joe's Shurtleff asked if he could see the product. When he saw it, he asked a "team member" if it were the same as Tofurky but now sold under the Trader Joe's label? After checking with the front desk, the employee ensured him that it was indeed Tofurky. In fact, it was not. It was made by Gardein in Canada and private labeled for Trader Joe's.

3646. Harris, Jen. 2014. 20 years of Tofurky, from vegan zombies to 'Jeopardy.' *Los Angeles Times*. Nov. 14. Web article.

• **Summary:** This article begins: "If you're a meat eater, you may just think of Tofurky as that slightly rubbery, squishy

protein you tried at your hippie friend's dinner party, or the butt of a few late night comedians' Thanksgiving jokes. But did you know that Tofurky has been around for 20 years?

"With vegan restaurants booming across the country, it's not uncommon these days to see a turkey substitute on the Thanksgiving dinner table. But 20 years ago, more often than not, the dish at the center of the table was a big, meaty roast bird. That's when longtime vegetarian and sometimes vegan Seth Tibbott wanted something more than a collection of side dishes on his vegetarian holiday table."

One big boost was an appearance on "The Today Show." Today Seth and Turtle Island have sold more than 3.5 million Tofurky roasts in at least 25,000 food stores on five continents.

It ends: "Tofurky has been featured in multiple TV spots over the years, including a reference by a vegan zombie on 'The X-Files' in 2000, an appearance on 'Felicity' in 1999 and as the answer to a \$400 question on 'Jeopardy'—which none of the contestants was able to answer." "But my Aunt Rosie got it in her old folks home in Minnesota," said Tibbott. "She's the same aunt who told me 20 years ago that this was the stupidest idea I'd ever had."

3647. Tibbott, Seth. 2014. Re: This month is Tofurky's 20th anniversary; lots of good media coverage. Letter (e-mail) to William Shurtleff at Soyinfo Center, Nov. 20. 1 p.

• **Summary:** "This has been a crazy media year. Reminds me of how it was 10 years ago when we were a young, sexy brand! The LA Times piece just ran online but it got picked up by other outlets. It only appeared online, which is probably more read than the actual newspaper I would venture to guess.

"I also did a Skype interview with ABC news yesterday from my office which should be posted online tomorrow. Again, online is probably better than actual TV footage at this point.

"Also Conan O'Brien is going to do a humorous skit using Tofurky Roasts on his TV show tonight so that should be funny (always good not to take yourself too seriously I say).

"And the Portland NBC News crew is coming out on Tuesday. There have been a bunch of other smaller media requests too from *Glamour* magazine on down." Address: Founder, Turtle Island Foods.

3648. Turtle Island Foods, Inc. 2014. Happy Tofurky Day! (Color postcard). Hood River, Oregon. 1 p. Front and back. Undated. 10 x 16 cm.

• **Summary:** The ten color photos on the front show various animals in farm sanctuaries: (1) Two white goats. (2) A rooster and a turkey. (3) A row of about 8 ducks. (4) A close-up of the face of a pig from the snout. (5) Portrait of a turkey. (6) A white rooster with a red head. (7) Head of a rabbit. (8) Head of a young cow. (9) A girl kneeling next to and

holding a sheep. (10) A yellow cat indoors. Each photo is in a wooden frame.

On the rear. Upper left: "Tofurky: Family owned since 1980." With a tiny Tofurky logo. Across the bottom: Animal photos by world renown photographers Jo-Anne McArthur. For more info and photos check out [www.weanimals.com](http://www.weanimals.com). Address: Hood River, Oregon.

3650. *SoyaScan Notes*. 2014. Commercial soyfoods products wish list (Overview). Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** 1. Organic, non-GE soy protein isolates (2002/03). 2. A very low calorie soy beverage for weight loss in hospitals. Must be able to be used as a sole source of nutrition. 3. More smoked tofu in America.

4. Meatless pepperoni, sausage shaped, for use atop a meatless pizza. 5. Natural shoyu brewed in America, ideally as part of a joint venture with a Japanese shoyu company. 6. A vegetarian Worcestershire sauce, with no anchovies (John Troy developed "The Wizard's Worcestershire Sauce" for Joel Dee's Premier Japan line in about 1995; it was vegetarian).

7. A low-calorie, low-fat tofu. Fat and calorie content should be at least 30% lower than that made from whole soybeans. The easiest way to make this product would be to run soymilk made from whole soybeans through a decanting centrifuge (like a cream separator) to remove the desired amount of fat, just like the dairy industry does to make low-fat or non-fat milk. There is a big potential market for such a product since 1% fat milk has now passed low-fat milk (2%) as the best-seller in American supermarkets (11 Sept. 1991). 8. Bland soymilk base (11 July 1997). Presently no company (including International ProSoya Corp. of Canada, Pacific Foods of Oregon, and Ted Nordquist dba TAN Industries, Inc. etc.) offers this product.

9. A soy-based kefir made from authentic kefir grains/cultures plus FOS (fructooligosaccharides), a dietary fiber derived from chicory roots. FOS feeds and increases the

level of “good guy bifidobacteria by up to five times in the gastrointestinal tract, and boosts the body’s absorption of calcium and other minerals by up to 50 percent.” See article in *Ag Innovation News* (April 1999, p. 3, 14).

3651. *SoyaScan Notes*. 2014. The kosher dietary laws, kashruth, and pareve/parve (Overview). Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** Historically there has been a strong interest in soyfoods (especially soy ice creams, yogurts, cheeses, soymilk, and tofu) from Jews who follow the laws of kosher. *Webster’s Dictionary* defines kosher (a Yiddish word derived from the Hebrew *kasher* meaning fit or proper, and first used in 1851) as “1: sanctioned by Jewish law; esp. ritually fit for use (kosher meat). b: selling or serving food ritually fit according to Jewish law (a kosher restaurant). The verb “to kosher” (first used in 1871) means “to make kosher.”

“The kosher laws are derived from the ‘Book of Leviticus’ in the *Torah*, and are expounded upon in the volume of the Talmud (Oral Law) titled *Chulin*. Yet the teaching of kosher is touched upon in all 60 volumes of the Talmud.

“Kashruth, the Hebrew term meaning ‘fitness,’ itself derives from the term ‘kosher.’ Kashruth refers to the Jewish dietary laws; most Orthodox Jews observe kashruth.

“The kosher dietary laws divide all foods into three types: from the flesh (fleshig / fleishig), from milk (milchig), and neither flesh / meat nor milk (parev). From this latter Yiddish term ‘parev’ derive the terms pareve and parve, both pronounced ‘parv,’ and used interchangeably. They are Jewish cookery or dietary terms meaning (1) ‘neutral’ or (2) made without milk or meat or their derivatives. Eggs and seafood are both pareve. A pareve food can be eaten with either milk or meat. Many soy ice creams are labeled ‘kosher and parve’ or ‘kosher parve.’

“The laws of kosher state, among other things, that one cannot consume meat and milk products at the same meal. Hence, orthodox Jews do not consume ice cream after a meal that contains meat.” Perhaps the most widely observed kosher law is not to eat pig/pork. After eating meat, according to Jewish dietary laws, one should wait for 6 hours before consuming dairy (milchig) products. But one can consume dairy products and then have meat products after 30 minutes. The difference is based on the fact that meat takes longer to digest. For this reason, at least in Israel, more emphasis is placed on developing meatlike products than on dairylike, to bypass the 6-hour restriction. Meat substitutes are much more popular in Israel than dairylike products. The government has encouraged development of meatlike products. Yet there seem to be many opportunities for production of dairylike products on kibbutzim or moshavim.

In the USA, major kosher certifiers include: (1) Union of Orthodox Jewish Congregations of America, Kashruth Div., 45 West 36th St., New York, NY 10018. Tel. 212-564-

8330. Rabbi Reese and Rabbi Menach. Members: 3100. Publications: Keeping Posted: Bimonthly, Kosher Directory of Products and Services. Highly respected. O-U mark. (2) Kosher Supervision Services, 354 Fifth St., Hackensack, New Jersey 07601. Tel. 201-342-7400. Chuff K mark. (3) OK Laboratories, P.O. Box 218, Brooklyn, NY 11204. Tel. 718-851-6428. Rabbi Bernard Levy. Circle K mark.

Several important Hebrew or Yiddish words related to kosher: A “heksher” (pronounced HEK-shur) is the kosher mark. “OU is the most highly respected kosher heksher.” A “mashghiach” (pronounced mush-JEE-ak) is the person who inspects a food facility before giving approval.

3652. *SoyaScan Notes*. 2014. The visionary work of Henry Ford and his researchers with soyfoods—then and now: Invented meat alternatives based on spun soy protein fibers (Overview). Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** One day in 1942 at the Ford plant, Robert Boyer, while sampling fibers of his “soybean wool,” realized that these same soy protein fibers, if made tender by omitting the protein denaturation, hardening, and insolubilization, could be used as a basic ingredient in making meatlike textured soy protein foods. He had already developed an analog for the protein fibers that grow on the *outside* of a sheep (wool), why not develop an analog for those on the *inside*, a meatless meat or meat analog? In 1949 Boyer left his job at The Drackett Co.

He devoted all his energy to developing food uses of edible products made from spun soy isolates. His first patent for edible soy fibers was applied for in 1949; It was rewritten and applied for in May 1952 and issued in June 1954 (No. 2,682,466). In 1956 Worthington Foods purchased a license from Boyer and began to develop the world’s first meatlike meatless products based on these soy protein fibers. In Oct. 1962 Ralston Purina Co. began to produce the world’s first food-grade spun soy protein fibers—named Textured Edi Pro—at its plant in Louisville, Kentucky. Worthington Foods purchased these fibers and used them as key ingredients in a new generation of meatlike products. The first of these were on the market by 1963, with names like Worthington Soyameat–Fried Chicken Style, Chicken Style Roll, Prosage (like pork sausage), White-Chik, Soya Meat–Beef Like; The Soyameat–Fried Chicken style was canned whereas the other products were frozen. The flavor and texture were better than any meatlike product ever made in America. Initially these products were sold in health food stores but in late 1965 they started to be sold in supermarkets. In 1966 Worthington started to spin its own soy fibers, and the next year Ralston Purina stopped spinning.

Other companies also licensed the rights to spin soy protein fibers from Robert Boyer. In December 1965 General Mills introduced its Bontrae line of spun soy protein fiber products, starting with Bac-O\*s (imitation bacon bits). By

May 1966 General Mills was making analogs for ground beef, diced ham, and diced poultry—all from spun soy protein fibers. So successful were these products (they also won several prizes) that in June 1969 General Mills broke ground for a multi-million dollar state-of-the-art fiber spinning plant at Cedar Rapids, Iowa. It began making Bontrae products in later 1970. By 1975 Cortaulds in England had launched Kesp, based on spun soy protein.

Today about 15-20% of Worthington's meat alternatives contain spun soy protein fibers. These products have a retail value of about \$8.8 million. Worthington's Morningstar Farms line of meat alternatives, some of which contain spun soy protein fibers, is sold in the frozen foods section of about 95% of all supermarkets and grocery stores in America.

3653. *SoyaScan Notes*. 2014. Chronology of tofu worldwide—1930 to present. Part II. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** 1930s early—Azumaya Tofu Seizo-sho (later renamed Azumaya Co.) starts making tofu, *yaki-dofu* (grilled tofu), and *ganmodoki* (fried tofu patties) in San Francisco at 1636 Post St. between Buchanan and Laguna streets. The company is owned by Mr. Teranishi, who may have started it as early as the early 1920s. In Feb. 1937 it was sold to George and Jack Mizono, and their mother and father (Saichi Mizono).

1932, Dec.—Madison Foods, part of Madison College in Madison, Tennessee, was making Soy Cheese, then by 1939 they had launched Cheze-O-Soy (seasoned tofu), and by 1940 they were making a canned tofu bologna named Yum.

1934—By this year Loma Linda Food Co. (Adventist) in Loma Linda, California, was making Loma Linda Vege-Cheese (canned tofu with pimiento).

1942 Sept.—Dr. Harry Miller, a Seventh-day Adventist doctor who had worked for many years in China as a medical missionary, begins making Miller's Soy Cheese (tofu) at Mt. Vernon, Ohio.

1944 Sept.—Butler Food Co. in Cedar Lake, Michigan, introduces Butler's Soynut Cheese. Note that the first five Caucasian-run tofu companies in the Western World were all founded and run by Seventh-day Adventists. Note also that each of these five Seventh-day Adventist tofu products used the word "cheese" in the name and that each was canned. 1957 Aug.—Shizuka Hayashi, head of the Japanese-American Soybean Institute in Tokyo, publishes (in *Soybean Digest*) the earliest English-language statistics on tofu in Japan. "There are approximately 45,000 tofu manufacturers in Japan, of which about 23,000 are members of the Tofu Association. There is one large factory in Osaka, the largest in Japan, which consumes 2 tons of soybeans a day." In 1957 Japan will use somewhere between 160,000 and 308,000 tons of soybeans to make tofu.

1958—The world's first packaged tofu is sold in Los Angeles, California, by Matsuda Hinode Tofu Co. Mr. Shoan

Yamauchi, owner, conceived of the idea of putting individual cakes of tofu each in a plastic bag with water, sealing the bag with a heat sealer, placing the bag in a stiff paper deli carton with a wire handle, then folding over the top. The process was labor intensive. This happened at about the same time that a letter from journalist George Yoshinaga had led the city to pass a new regulation requiring tofu to be packaged in individual containers.

1958—Tofu is first sold in a U.S. supermarket—Boy's Market supermarket chain (which had about 12 stores at the time) in Los Angeles. The tofu was sold in individual packages (see above) and made by Matsuda Hinode Tofu Co., whose owner, Mr. Shoan Yamauchi was responsible for this major innovation, and for seeing the mainstream potential of tofu.

1965—The Library of Congress establishes the subject heading "Tofu" as the official name for that food in cataloging books for libraries across America. However, in the mid-1970's disputes arose there about the proper form of romanization of that term. The dispute was resolved by the decision to use the common English term "Bean Curd" instead.

1966—Tofu is first packaged in plastic trays/tubs, the type so widely used today. Again, Mr. Yamauchi conceived of the idea. He went to the Sealright Company in Los Angeles that made Sealright trays and asked them to make a waterproof plastic tray for his tofu. Mr. Yamauchi created three specific early innovations in tray packaging: (1) A very deep tray, holding 26-28 ounces; (2) A method for heat sealing a plastic film to the flange of a tray which had cold water flooding over the flange; (3) High-speed sealing machines to pack and seal the tofu in his plant.

1975 March—Alec Evans, owner of first of the new breed of Caucasian-run tofu shops, starts to make "Tofu" in Corvallis, Oregon. His Welcome Home Bakery and Tofu Shop is the sixth Caucasian-run tofu company in America.

1975 Dec.—*The Book of Tofu*, by Shurtleff and Aoyagi, is published by Autumn Press. This book, which had sold about 550,000 copies by 1997, played a major role in introducing tofu to the Western World.

1977 Aug.—Takai Tofu & Soymilk Equipment Co. publishes its first English-language equipment catalog, which helps many American and European tofu shops to get started.

1977 Sept.—White Wave, owned by Steve Demos, starts making tofu at 1738 Pearl St., in Boulder, Colorado.

1977—Morinaga Milk Industry Co., Ltd. in Japan introduces the world's first aseptically packaged tofu in a Tetra Brik carton. It is named "Morinaga brand Tofu. Soybean Curd." In 1978 the name was changed to "Morinaga brand Ever-Fresh Silken Tofu."

1977—Swan Foods Corporation, owned by Robert Brooks and Mary Pung, starts making "Tofu—Organic" at The Soybeanery, 5758½ Bird Rd., Miami, Florida. This is the first tofu in the Western World labeled "Organic." Swan

Foods is also the first American company to make a wide variety of soyfoods, and the first to open a soy deli—which had a take-out menu.

1978 April—Nasoya Foods, owned by John Paino and Bob Bergwall, starts making Nasoya Organic Tofu (water pack) at Mechanic Street Exit, Leominster, Massachusetts.

1978 Dec.—*The Book of Tofu*, by Shurtleff and Aoyagi, is published by Ballantine Books in a mass-market edition that retails for \$2.95.

1979 July—*Tofu & Soymilk Production*, by Shurtleff and Aoyagi, is published by Soyfoods Center in California. This book is used to start hundreds of tofu manufacturing companies throughout the Western World and in some Third World countries.

1982 April—There are 242 tofu manufacturers in the Western World, including 173 in the United States.

1985 June—The Library of Congress decides to change its subject heading from “Bean curd” back to “Tofu.” This, perhaps more than any other single thing, makes the word tofu “official.”

1983—House Food Industrial Co., Ltd. of Japan purchases 50% ownership in Yamauchi Enterprises (formerly Hinode Tofu Co., owned by Mr. Shoan Yamauchi) in Los Angeles. The company is renamed House Foods & Yamauchi, Inc.

1989 Dec.—Sixty-five books (each more than 48 pages long) on tofu have been published in the Western World since 1970. Each one has the word “tofu” or its equivalent in the title. Forty of these books were published in the United States, 6 in Canada, 5 in Switzerland, 5 in Japan (but written in English for sale primarily outside of Japan), 3 in West Germany, 3 in France (but 2 of these were published simultaneously and primarily in Quebec, Canada), 2 in England, and 1 each in Italy, Sweden, and Brazil.

1990 Aug. 3—Hong Kong Soya Bean Products Co. Ltd. (makers of Vitasoy) acquires Nasoya Foods of Leominster, Massachusetts.

1993 June—Vitasoy purchases Azumaya Inc. (America’s largest tofu manufacturer, and the low-price leader) in California for an estimated \$4-\$5 million.

1993—House Foods Corp. of Japan purchases the remaining 50% of House Foods & Yamauchi, Inc. from Mr. Shoan Yamauchi. The new company is renamed House Foods American Corporation.

1997 March 12—House Foods America Corporation holds the opening ceremony for America’s largest tofu factory, in Garden Grove, California; the company closes its tofu plant in central Los Angeles.

An asterisk (\*) at the end of the record means that SOYFOODS CENTER does not own that document. A plus after eng (eng+) means that SOYFOODS CENTER has done a partial or complete translation into English of

that document.

An asterisk in a listing of number of references [23\* ref] means that most of these references are not about soybeans or soyfoods.

Fermented Black Soybean Extract (*Shizhi* / *Shih Chih*), and Fermented Black Soybean Sauce (Mandarin: *Shiyou* / *Shih-yu*. Cantonese: *Shi-yau* / *Si-yau* / *Seow*. Japanese: *Kuki-jiru*). *See also* Black Bean Sauce. 3, 1440

Fermented Black Soybeans—Etymology of This Term and Its Cognates / Relatives in Various Languages. 145, 834, 1512

Fermented Black Soybeans—Whole Soybeans Fermented with Salt—Also called Fermented Black Beans, Salted Black Beans, Salty Black Beans, Black Fermented Beans, Black Beans, Black Bean Sauce, Black Bean and Ginger Sauce, Chinese Black Beans, Preserved Black Beans or Preserved Chinese Black Beans. In Chinese (Mandarin): *Shi*, *Doushi*, or *Douchi* (pinyin), *Tou-shih*, *Toushih*, or *Tou-ch'ih* (Wade-Giles). Cantonese: *Dow see*, *Dow si*, *Dow-si*, *Dowsi*, or *Do shih*. In Japan: *Hamanatto*, *Daitokuji Natto*, *Shiokara Natto*, or *Tera Natto*. In the Philippines: *Tausi* or *Taosi* / *Tao-si*. In Malaysia or Thailand: *Tao si*. In Indonesia: *Tao dji*, *Tao-dji*, or *Tao-djie*. 3, 6, 89, 119, 145, 161, 166, 458, 516, 591, 630, 636, 806, 809, 811, 834, 846, 851, 899, 900, 905, 910, 917, 970, 1002, 1053, 1133, 1138, 1229, 1238, 1327, 1440, 1443, 1508, 1509, 1512, 1557, 1573, 1648, 1663, 1710, 1810, 1910, 2484, 2487, 2574, 2607, 2878, 2879, 2881, 3036, 3212, 3400, 3545, 3553

Fermented Black Soybeans—from The Philippines—*Tau-si*, *Tausi*, *Tao-si*, *Taosi*. 1440, 2487, 3212

Fermented Black Soybeans from Japan—Other Names (*Tera Natto*, *Shiokara Natto*, *Jofukuji Natto*). 846, 1663, 1710

Fermented Black Soybeans, Homemade—How to Make at Home or on a Laboratory Scale, by Hand. 591

Fermented Specialty Soyfoods—Soy Wine, Cantonese Wine Starter (*Kiu-Tsee* / *Tsée*), Soy Fermentation Pellicle or Bean Ferment (*Tou Huang*), *Soyidli* / *Idli*, *Dosa* / *Dosai*, *Dhokla*, and *Soy Ogi*. 89, 193, 905, 906, 1068, 1074, 1931, 2101

Fermented tofu. *See* Tofu, Fermented

Fermented whole soybeans. *See* *Natto*, *Dawa-dawa*, *Kinema*, *Thuanao*

Fertilizer, soybean meal used as. *See* Soybean Meal / Cake, Fiber (as from *Okara*), or *Shoyu Presscake* as a Fertilizer or Manure for the Soil

Fertilizers / Fertilizer (Incl. Foliar Sprays), Fertilization, Plant Nutrition, Mineral Needs, and Nutritional / Physiological Disorders of Soybeans (Including Chlorosis). 2066, 2074

Fiber—*Okara* or Soy Pulp—Etymology of This Term and Its Cognates / Relatives in Various Languages. 9, 176, 215, 267, 343, 387, 731, 806, 812

Fiber—*Okara* or Soy Pulp, Used as an Ingredient in Commercial Soyfood Products. 148, 158, 196, 209, 235, 301, 443, 595, 916, 952, 974, 991, 997, 998, 1007, 1021, 1045, 1070, 1086, 1099, 1108, 1122, 1123, 1124, 1159, 1168, 1187, 1192, 1202, 1215, 1240, 1246, 1249, 1265, 1283, 1287, 1295, 1304, 1306, 1323, 1344, 1345, 1348, 1358, 1359, 1387, 1414, 1448, 1455, 1466, 1474, 1476, 1485, 1498, 1501, 1516, 1520, 1524, 1525, 1550, 1594, 1601, 1623, 1630, 1632, 1646, 1654, 1660, 1662, 1667, 1695, 1759, 1762, 1771, 1776, 1787, 1791, 1804, 1808, 1858, 1871, 1879, 1883, 1890, 1892, 1898, 1906, 1907, 1926, 1929, 1950, 1951, 1977, 2019, 2028, 2037, 2105, 2112,

- 2118, 2178, 2300, 2372, 2375, 2400, 2429, 2430, 2458, 2476, 2490, 2494, 2519, 2554, 2563, 2570, 2618, 2619, 2662, 2748, 2804, 2908, 2956, 3052, 3110, 3468
- Fiber–Okara or Soy Pulp, from Making Soymilk or Tofu–Value Added Uses (Not Including Livestock Feeds) and Solutions to Disposal Problems. 806, 809, 991, 997, 998, 1072, 1137, 1294, 1344, 1345, 1647, 1686, 1733, 1994, 2188, 2907, 2908, 2977, 3553
- Fiber–Okara or Soy Pulp, the Residue Left from Making Soymilk or Tofu. Also called Bean Curd Residue, Soybean Curd Residue, Dou-fu-zha (Pinyin). 9, 11, 88, 89, 118, 119, 132, 145, 176, 192, 193, 200, 215, 238, 266, 272, 278, 343, 344, 366, 381, 387, 410, 458, 459, 460, 462, 502, 629, 637, 655, 656, 700, 701, 703, 704, 731, 740, 765, 767, 776, 806, 809, 811, 812, 829, 835, 846, 860, 866, 874, 899, 905, 906, 910, 911, 926, 927, 937, 954, 995, 999, 1006, 1030, 1032, 1033, 1046, 1048, 1049, 1053, 1054, 1056, 1061, 1068, 1069, 1071, 1072, 1073, 1074, 1075, 1077, 1084, 1087, 1101, 1102, 1103, 1132, 1137, 1139, 1140, 1145, 1149, 1150, 1153, 1155, 1156, 1157, 1161, 1171, 1172, 1179, 1181, 1185, 1186, 1237, 1239, 1254, 1256, 1262, 1268, 1280, 1293, 1294, 1298, 1299, 1300, 1301, 1303, 1305, 1324, 1334, 1365, 1369, 1371, 1405, 1406, 1408, 1417, 1421, 1426, 1430, 1440, 1445, 1472, 1473, 1482, 1495, 1497, 1507, 1508, 1514, 1526, 1547, 1549, 1554, 1573, 1574, 1580, 1583, 1587, 1610, 1611, 1614, 1642, 1645, 1647, 1651, 1652, 1655, 1663, 1664, 1686, 1707, 1708, 1710, 1714, 1729, 1733, 1739, 1747, 1754, 1757, 1763, 1781, 1815, 1817, 1822, 1828, 1829, 1834, 1855, 1864, 1869, 1874, 1880, 1884, 1887, 1890, 1917, 1922, 1931, 1934, 1942, 1953, 1980, 1984, 1994, 1995, 1996, 1997, 1998, 2090, 2101, 2145, 2161, 2177, 2188, 2213, 2220, 2234, 2235, 2256, 2292, 2319, 2387, 2391, 2420, 2423, 2455, 2487, 2488, 2491, 2496, 2532, 2563, 2565, 2574, 2602, 2699, 2711, 2780, 2815, 2824, 2879, 2888, 2907, 2908, 2977, 2994, 3028, 3035, 3036, 3038, 3041, 3082, 3083, 3124, 3140, 3200, 3212, 3215, 3249, 3250, 3299, 3304, 3330, 3368, 3385, 3386, 3388, 3393, 3398, 3399, 3400, 3483, 3484, 3504, 3510, 3553, 3576, 3578, 3581, 3623, 3624
- Fiber–Presscake, Residue or Dregs from Making Soy Sauce. 458

Tofu in Second Generation Products, Documents About. 88, 806, 809, 867, 942, 969, 973, 995, 1003, 1071, 1077, 1078, 1156, 1263, 1297, 1300, 1301, 1398, 1408, 1461, 1464, 1468, 1505, 1529, 1547, 1548, 1549, 1572, 1629, 1672, 1724, 1736, 1748, 1778, 1831, 1862, 1864, 1867, 1877, 1880, 1939, 1941, 1942, 1944, 1960, 1971, 1980, 1984, 1988, 1994, 1995, 1996, 1997, 1998, 1999, 2055, 2072, 2085, 2092, 2096, 2107, 2110, 2161, 2169, 2188, 2199, 2231, 2295, 2711, 2724, 2791, 2814, 2821, 2910, 2954, 3160, 3197, 3355, 3393, 3489, 3518, 3553, 3627

Tofu, Braised, Grilled Broiled, or Roasted (*Jian-doufu* in Chinese). Chinese-Style, Prepared in the Kitchen or at Home. 1311, 3345, 3627

Tofu, Criticism of, Making Fun of, or Image Problems. 1055, 1092, 1097, 1537, 1540, 1885, 1971, 2011, 2160, 2165, 2171, 2208, 2379, 2827, 2940, 2991, 3008, 3065, 3627

Tofu, Fermented (Also Called *Doufu-ru*, *Toufu-ru*, *Furu*, *Fuyu*, *Tahuri*, *Tahuli*, *Tajure*, *Tao-hu-yi*, or *Sufu*). *See also* *Tofu-yo*. 6, 88, 89, 132, 161, 162, 193, 516, 591, 630, 636, 708, 806, 808, 809, 851, 874, 899, 905, 917, 926, 977, 1002, 1053, 1060, 1073, 1133, 1138, 1229, 1303, 1327, 1362, 1366, 1406, 1440, 1508, 1509, 1512, 1557, 1576, 1583, 1613, 1648, 1663, 1887, 1919, 1932, 2348, 2387, 2391, 2409, 2487, 2732, 2896, 3212, 3299, 3345, 3387, 3545, 3553

Tofu, Fermented—Etymology of This Term and Its Cognates / Relatives in Various Languages. 132, 162, 193, 917, 926, 1053

Tofu, Fermented—Imports, Exports, International Trade. 161

Tofu, Fermented—Stinky Tofu (pinyin: Chou Doufu (W.-G. Ch'ou Tofu). Also Called, Stinking, Smelly or Redolent Tofu / Bean Curd). 808, 1509, 1919, 3212, 3387

Tofu, Firm (Chinese-Style). 132, 926, 1053, 1073, 1101, 1303, 1408, 1434, 1460, 1508, 1546, 1557, 1581, 1641, 1757, 1822, 1877,

1920, 1926, 1994, 1997, 2000, 2003, 2411, 2412, 2484, 2506, 2539, 2640, 2866, 2954, 2959, 3034, 3132, 3212, 3224, 3265, 3387, 3398, 3482, 3495, 3545, 3578, 3579, 3593, 3627, 3631

Tofu, Five-Spice Pressed (*Wu-hsiang Toufukan / Wuxiang Doufugan*). 132, 806, 808, 809, 899, 1050, 1073, 1229, 1406, 1512, 1583, 1810, 1840, 2253, 2391, 2484, 3212, 3242, 3299, 3387, 3495, 3553, 3627

Tofu, Flavored / Seasoned / Marinated and Baked, Broiled, Grilled, Braised, or Roasted. Including Tofu Jerky and Savory Baked Tofu. 969, 973, 995, 1003, 1006, 1050, 1051, 1073, 1103, 1170, 1195, 1301, 1406, 1466, 1547, 1560, 1583, 1615, 1645, 1652, 1917, 1996, 2074, 2099, 2151, 2215, 2253, 2380, 2391, 2407, 2490, 2539, 2565, 2622, 2777, 2783, 2888, 2902, 3044, 3091, 3112, 3137, 3242, 3267, 3299, 3320, 3434, 3438, 3475, 3516, 3544, 3592, 3627

Tofu, Flavored, Seasoned, or Marinated, but not Baked, Broiled, Grilled, Braised, or Roasted. Including most Five-Spice Pressed Tofu (*wu-hsiang toufukan / wuxiang doufugan*). 132, 137, 806, 808, 809, 899, 1079, 1229, 1246, 1362, 1466, 1501, 1512, 1555, 1585, 1810, 1896, 1943, 1994, 2038, 2043, 2117, 2130, 2187, 2286, 2299, 2311, 2315, 2484, 2491, 2506, 2531, 2578, 2638, 2752, 2816, 2902, 2984, 3066, 3127, 3212, 3242, 3387, 3438, 3457, 3495, 3553, 3627, 3653

Tofu, Fried (Especially Deep-Fried Tofu Pouches, Puffs, Cutlets, or Burgers; Agé or Aburagé, Aburaagé, Usu-agé, Atsu-agé or Namaagé, Ganmodoki or Ganmo, Hiryoðu / Hiryozu). 9, 11, 63, 108, 132, 137, 141, 145, 150, 161, 197, 221, 318, 343, 364, 381, 387, 403, 406, 433, 458, 459, 460, 461, 462, 559, 589, 603, 630, 637, 655, 656, 665, 670, 685, 708, 713, 715, 737, 765, 767, 791, 806, 809, 810, 811, 846, 861, 867, 871, 873, 885, 899, 900, 902, 905, 910, 917, 920, 923, 926, 927, 953, 963, 964, 1006, 1007, 1025, 1044, 1050, 1051, 1052, 1053, 1055, 1060, 1071, 1073, 1078, 1087, 1101, 1130, 1133, 1138, 1142, 1146, 1147, 1148, 1154, 1156, 1157, 1165, 1169, 1170, 1173, 1182, 1211, 1213, 1214, 1227, 1229, 1232, 1235, 1239, 1251, 1278, 1303, 1307, 1308, 1312, 1329, 1335, 1343, 1344, 1362, 1366, 1369, 1384, 1394, 1400, 1406, 1408, 1410, 1412, 1414, 1416, 1420, 1422, 1423, 1430, 1431, 1433, 1434, 1440, 1443, 1446, 1453, 1477, 1478, 1479, 1482, 1484, 1494, 1497, 1508, 1511, 1513, 1514, 1515, 1520, 1523, 1528, 1530, 1537, 1541, 1542, 1546, 1556, 1557, 1559, 1569, 1575, 1576, 1579, 1580, 1582, 1583, 1584, 1585, 1588, 1597, 1603, 1610, 1613, 1614, 1628, 1629, 1635, 1639, 1641, 1642, 1648, 1650, 1659, 1661, 1663, 1665, 1666, 1668, 1669, 1675, 1679, 1683, 1691, 1692, 1693, 1706, 1710, 1714, 1716, 1717, 1727, 1730, 1734, 1736, 1741, 1742, 1743, 1748, 1753, 1759, 1766, 1769, 1771, 1774, 1775, 1776, 1777, 1782, 1810, 1814, 1815, 1817, 1818, 1821, 1822, 1823, 1826, 1829, 1832, 1836, 1840, 1847, 1854, 1867, 1871, 1873, 1877, 1879, 1881, 1887, 1888, 1896, 1897, 1902, 1904, 1910, 1912, 1914, 1920, 1922, 1926, 1927, 1928, 1929, 1931, 1935, 1936, 1938, 1941, 1943, 1944, 1948, 1955, 1959, 1961, 1969, 1981, 1982, 1983, 1986, 1999, 2001, 2002, 2015, 2021, 2022, 2031, 2033, 2036, 2038, 2040, 2042, 2057, 2061, 2064, 2065, 2066, 2070, 2073, 2074, 2078, 2079, 2084, 2087, 2091, 2093, 2110, 2117, 2119, 2122, 2126, 2130, 2131, 2132, 2139, 2143, 2146, 2147, 2158, 2162, 2163, 2164, 2166, 2167, 2174, 2178, 2188, 2191, 2195, 2198, 2204, 2205, 2206, 2208, 2213, 2220, 2221, 2233, 2235, 2243, 2256, 2283, 2286, 2290, 2291, 2292, 2293, 2295, 2297, 2300, 2308, 2310, 2311, 2312, 2315, 2316, 2317, 2319, 2347, 2365, 2380, 2387, 2391, 2393, 2400,

2409, 2412, 2418, 2420, 2421, 2423, 2428, 2433, 2439, 2448, 2458, 2481, 2485, 2486, 2487, 2489, 2491, 2493, 2494, 2496, 2505, 2508, 2534, 2538, 2539, 2542, 2547, 2565, 2568, 2573, 2575, 2589, 2613, 2640, 2699, 2706, 2718, 2752, 2774, 2775, 2777, 2780, 2833, 2943, 2959, 3011, 3031, 3036, 3212, 3215, 3242, 3265, 3299, 3304, 3318, 3335, 3344, 3345, 3346, 3372, 3387, 3399, 3417, 3495, 3510, 3545, 3553, 3573, 3612, 3627, 3653

Tofu, Fried or Deep-Fried—Etymology of This Term and Its Cognates / Relatives in Various Languages. 9, 137, 145, 150, 343, 364, 387, 458, 637, 685, 713, 806, 809, 811, 900, 1025, 1051, 1053, 1239, 1910, 3304, 3346, 3627

Tofu, Fried, Homemade—How to Make at Home or on a Laboratory Scale, by Hand. 3627

Tofu, Fried, Used as an Ingredient in Commercial Soyfood Products. 3627

Tofu, Frozen or Dried-Frozen—Etymology of This Term and Its Cognates / Relatives in Various Languages. 145, 150, 343, 708, 806, 808, 902, 1663, 1815, 1920, 2486, 3627

Tofu, Frozen or Dried-Frozen, Used as an Ingredient in Commercial Soyfood Products. 2480, 2771, 3627

Tofu, Frozen, Dried-frozen, or Dried Whole (Not Powdered). 6, 105, 132, 141, 145, 150, 161, 343, 403, 406, 458, 546, 591, 630, 637, 665, 670, 708, 713, 767, 803, 806, 808, 809, 810, 811, 846, 902, 905, 910, 917, 926, 972, 986, 1006, 1053, 1063, 1073, 1081, 1087, 1095, 1130, 1133, 1139, 1142, 1229, 1239, 1281, 1303, 1308, 1334, 1335, 1369, 1384, 1402, 1406, 1440, 1508, 1514, 1576, 1583, 1614, 1642, 1648, 1663, 1708, 1710, 1713, 1714, 1815, 1822, 1829, 1873, 1887, 1897, 1914, 1920, 1922, 2004, 2040, 2188, 2189, 2256, 2391, 2455, 2462, 2485, 2486, 2487, 2589, 2699, 2888, 2991, 3036, 3211, 3212, 3215, 3299, 3304, 3318, 3398, 3399, 3545, 3553, 3578, 3627

Tofu, Frozen, Homemade—How to Make at Home or on a Laboratory or Community Scale, by Hand. 806, 3627

Tofu, Grilled, Braised, Broiled, or Roasted (*Yaki-dôfu* in Japanese). A Japanese-Style Commercial Product. 63, 137, 150, 197, 343, 387, 403, 433, 458, 459, 460, 461, 462, 599, 670, 767, 806, 809, 810, 811, 846, 856, 902, 905, 910, 926, 937, 964, 999, 1007, 1025, 1053, 1071, 1073, 1142, 1229, 1239, 1303, 1406, 1434, 1440, 1482, 1501, 1508, 1509, 1514, 1546, 1583, 1614, 1629, 1648, 1663, 1708, 1710, 1714, 1817, 1822, 1910, 1914, 1920, 1935, 2204, 2208, 2220, 2235, 2391, 2407, 2411, 2486, 2487, 2496, 2520, 2913, 2959, 3082, 3109, 3212, 3299, 3303, 3304, 3362, 3438, 3457, 3510, 3536, 3553, 3593, 3627, 3653

Tofu, Grilled, Broiled, Braised, or Roasted—Etymology of This Term and Its Cognates / Relatives in Various Languages. 137, 343, 599, 767, 3082, 3627

Tofu, Homemade—How to Make at Home or on a Laboratory or Community Scale, by Hand. 119, 316, 375, 410, 411, 502, 629, 637, 662, 663, 701, 765, 767, 791, 806, 809, 834, 864, 895, 897, 957, 960, 1053, 1087, 1093, 1185, 1303, 1416, 1506, 1513, 1708, 1742,

2165, 2317, 2718, 3136, 3343, 3627

Tofu, Non-Soy Relatives (Such as Winged Bean Tofu or Peanut Tofu). 2782, 2799, 3627

Tofu, Pressed, Chinese-Style (*Toufukan / Doufugan / Dougan*). 6, 132, 366, 591, 636, 808, 809, 851, 852, 905, 921, 953, 987, 1050, 1073, 1095, 1138, 1432, 1444, 1512, 1557, 1615, 1642, 1648, 1822, 1919, 2213, 2319, 2412, 2455, 2484, 2487, 2504, 2506, 2547, 2966, 3212, 3387, 3426, 3627

Tofu, Silken (Kinugoshi)—Etymology of This Term and Its Cognates / Relatives in Various Languages. 806, 902, 917, 926, 1053, 3553, 3627

Tofu, Silken (Kinugoshi). Made without Separation of Curds and Whey. 670, 713, 806, 808, 809, 811, 846, 902, 905, 910, 917, 926, 960, 964, 1040, 1053, 1073, 1171, 1239, 1303, 1312, 1406, 1430, 1434, 1440, 1508, 1546, 1583, 1615, 1648, 1663, 1668, 1710, 1757, 1779, 1809, 1815, 1822, 1885, 1909, 1912, 1914, 1920, 1935, 1961, 1966, 2010, 2014, 2084, 2163, 2220, 2256, 2317, 2391, 2443, 2448, 2487, 2890, 2913, 2959, 2966, 3034, 3036, 3038, 3061, 3082, 3132, 3212, 3213, 3265, 3299, 3302, 3304, 3335, 3358, 3372, 3387, 3398, 3399, 3472, 3473, 3495, 3510, 3545, 3546, 3553, 3578, 3593, 3603, 3627, 3653

Tofu, Smoked—Etymology of This Term and Its Cognates / Relatives in Various Languages. 806, 1073, 3627

Tofu, Smoked. 6, 88, 89, 118, 119, 132, 141, 162, 169, 210, 408, 423, 438, 560, 627, 806, 1073, 1362, 1406, 1583, 1717, 1776, 1823, 1983, 2008, 2015, 2022, 2093, 2099, 2109, 2130, 2146, 2154, 2155, 2158, 2164, 2166, 2189, 2193, 2194, 2215, 2234, 2247, 2287, 2290, 2292, 2304, 2319, 2364, 2387, 2391, 2412, 2433, 2455, 2457, 2481, 2491, 2504, 2572, 2589, 2875, 2888, 2939, 3034, 3036, 3066, 3069, 3098, 3109, 3127, 3153, 3212, 3225, 3256, 3267, 3269, 3299, 3320, 3460, 3465, 3535, 3545, 3553, 3614, 3627, 3650

Tofu, Spray-dried or Powdered, Used as an Ingredient in Second Generation Commercial Products Such as Ice Creams, Beverages, etc. 2620, 2693, 2843, 3627

Tofu, Spray-dried or Powdered. 1731, 2189, 2433, 2721, 2759, 3627

Tofu, Used as an Ingredient in Second Generation Commercial Products Such as Dressings, Entrees, Ice Creams, etc. 158, 197, 209, 231, 256, 257, 373, 443, 487, 550, 921, 953, 1007, 1050, 1052, 1079, 1104, 1108, 1119, 1124, 1194, 1199, 1200, 1208, 1213, 1214, 1248, 1249, 1255, 1259, 1266, 1278, 1281, 1296, 1340, 1341, 1344, 1345, 1360, 1361, 1400, 1402, 1412, 1413, 1414, 1422, 1448, 1452, 1453, 1459, 1476, 1477, 1478, 1479, 1491, 1494, 1501, 1517, 1520, 1526, 1533, 1541, 1544, 1552, 1553, 1556, 1558, 1560, 1578, 1584, 1585, 1589, 1597, 1599, 1600, 1603, 1606, 1628, 1632, 1639, 1650, 1658, 1659, 1661, 1664, 1669, 1673, 1679, 1683, 1692, 1693, 1698, 1706, 1716, 1717, 1725, 1727, 1728, 1730, 1743, 1744, 1750, 1759, 1765, 1766, 1769, 1771, 1772, 1774, 1776, 1777, 1782, 1784, 1788, 1795, 1808, 1818, 1821, 1823, 1826, 1832, 1833, 1836, 1838, 1839, 1848, 1849, 1850, 1854, 1857, 1858, 1865, 1871, 1879, 1881, 1883, 1896, 1897, 1902, 1904, 1908, 1925, 1926, 1927, 1928, 1929, 1936,

1937, 1943, 1948, 1952, 1969, 1973, 1978, 1986, 1989, 1990, 1993, 2000, 2002, 2003, 2015, 2016, 2022, 2029, 2030, 2031, 2033, 2034, 2035, 2036, 2038, 2039, 2057, 2064, 2067, 2075, 2076, 2093, 2099, 2102, 2103, 2116, 2117, 2119, 2122, 2123, 2125, 2126, 2127, 2128, 2130, 2132, 2139, 2141, 2142, 2143, 2149, 2150, 2156, 2162, 2164, 2174, 2178, 2180, 2186, 2187, 2190, 2191, 2194, 2195, 2200, 2211, 2212, 2215, 2221, 2224, 2233, 2236, 2237, 2238, 2241, 2243, 2244, 2247, 2248, 2249, 2250, 2251, 2271, 2272, 2275, 2279, 2282, 2283, 2284, 2285, 2299, 2304, 2308, 2309, 2310, 2326, 2330, 2341, 2342, 2358, 2366, 2367, 2372, 2374, 2376, 2381, 2382, 2395, 2396, 2400, 2407, 2418, 2421, 2422, 2428, 2430, 2437, 2445, 2447, 2457, 2458, 2477, 2478, 2481, 2492, 2493, 2494, 2495, 2498, 2541, 2544, 2548, 2561, 2569, 2570, 2571, 2575, 2590, 2609, 2622, 2641, 2648, 2654, 2657, 2666, 2670, 2671, 2682, 2692, 2698, 2702, 2708, 2714, 2737, 2739, 2748, 2750, 2754, 2755, 2760, 2763, 2764, 2765, 2766, 2772, 2773, 2774, 2794, 2837, 2840, 2852, 2868, 2873, 2880, 2921, 2933, 2952, 2953, 2961, 2974, 2980, 2997, 3021, 3029, 3031, 3069, 3115, 3153, 3181, 3214, 3226, 3256, 3276, 3279, 3341, 3353, 3359, 3410, 3421, 3424, 3430, 3436, 3438, 3440, 3441, 3447, 3454, 3456, 3457, 3460, 3468, 3470, 3478, 3499, 3516, 3521, 3523, 3524, 3535, 3552, 3556, 3559, 3565, 3574, 3575, 3599, 3600, 3608, 3614, 3616, 3626, 3627, 3628, 3630, 3644
